OMBRAGE, Nebula.

OMENTA, Meninges.

OMENTESIS, Epiploitis.

OMENTITIS, Epiploitis.

OMENTULA, Appendiculæ pinguedinosæ.

OMENTUM, Epiploon—o. Colicum, Epiploon, colic — o. Gastro-colicum, Epiploon, gastro-colic —o. Gastro-splenic, Epiploon, gastro-splenic—o. Great, Epiploon, gastro-colic — o. Hepato-gastricum, Epiploon, gastro-hepatic — o. Lesser, Epiploon, gastro-hepatic—o. Majus, Epiploon, gastro-colic — o. Minus, Epiploon, gastro-hepatic — o. Ossium, Periosteum—o. Sac of the, see Epiploon, gastro-hepatic—o. Third, Epiploon, colic.

OMICHESIS, Micturition.

OMICHMA, Urine.

OMI'TIS, from *ωμος,* 'the shoulder,' and *itis,* denoting inflammation. Inflammation in or about the shoulder-joint.

OMMA, Eye, Vision.

OMNIPHAGUS, Omnivorous.

OMNIVORE, Omnivorous.

OMNIV'OROUS, *Omniv'orus, Omniph'agus, Pantoph'agus,* (F.) *Omnivore,* from *omnis,* 'all,' and *voro,* 'I eat.' An epithet for animals—*Pantoph'agists*—which eat every kind of food, animal or vegetable.

OMO. In the composition of anatomical terms, an abridgment of *omos* or *omus,* the humerus.

OMO-CLAVICULAR, see Coraco-clavicular.

OMOCOTYLE, see Glene.

OMO-HYOÏDEUS, *Cor'aco-hyoïdeus, Hyoïdis Quartus Mus'culus,* (F.) *Scapulo-hyoïdien, Omohyoïdien, Omoplat-hyoïdien.* This muscle is situate obliquely at the sides and front of the neck. It is slender, long, and flat. It arises from the superior costa of the scapula, near the semi-lunar notch, and from the ligament that runs across it, and is inserted at the sides of the inferior margin of the body of the os hyoides. It consists of two fasciculi, united by a common tendon, and is a true digastric muscle. It depresses the os hyoides, carrying it a little backwards, and to one side, except when it acts with its fellow, when the bone is depressed, and drawn obliquely backwards.

OMOPHAG''IA, *Omosit'ia,* from *ωμος,* 'raw,' and *φαγω,* 'I eat.' Fondness for raw food. Eating of raw food.

OMOPLATE, Scapula — *o. Col de l',* Collum scapulæ.

OMOPLAT-HYOÏDIEN, Omo-hyoideus.

OMOS, Crude, Humerus.

OMOSITIA, Omophagia.

OMOTAR'ICHOS, from *ωμος,* 'the shoulder,' and *ταριχος,* 'pickled.' *Salsamen'tum crudum; Salted Tunny Fish,* in particular. Properly, the neck or shoulder-piece of a salted animal. Once much recommended against the bites of vipers, and in hydrophobia.

OMOTES, Crudity.

OMOTOCIA, Abortion.

OMOT'RIBES, *Omphac''inum O'leum,* from *ωμος,* 'crude,' and *τριβω,* 'I bruise.' Oil expressed from unripe olives.

OMPHA'CION, *ομφακιον,* from *ομφακος,* 'an unripe grape;'—*Succus uvæ acer'bæ, Omphac'eium.* The juice of unripe grapes. Also, *Verjuice.*

OMPHACI'TES (VĪNUM). A name given to wine prepared from the unripe grape. *Omphaci'tis* is the name of a small gall.—Dioscorides.

OMPHACIUM, Verjuice.

OMPHACOM'ELI, from *ομφακος,* 'an unripe grape,' and *μελι,* 'honey.' A sort of oxymel, made of the juice of unripe grapes and honey.

OMPHALELCO'SIS, from *ομφαλος,* 'the navel,' and *'ελκος,* 'an ulcer.' Ulceration of the navel.

OMPHALEXOCHE, Exomphalus.

OMPHALOCARPUS, Galium aparine.

OMPHALOCELE, Exomphalos.

OM'PHALO-CRA'NIODID'YMUS, from *ομφαλος,* 'the navel,' *κρανιον,* 'the cranium,' and *διδυμος,* 'a twin.' A double monster, in which the umbilical cord or the rudiment of one fœtus is rooted in the cranium of another.

OMPHALOMANTI'A, *Om'phalomancy,* from *ομφαλος,* 'the navel,' and *μαντεια,* 'prophecy.' A species of divination, practised by credulous matrons, who pretend to be able to know the number of children a female will have, by the number of knots in the navel-string of the child.

OM'PHALO-MESENTER'IC, *Omphalo-mesenter'icus, Om'phalo-mesara'icus;* from *ομφαλος,* 'the navel,' and *mesenterium,* 'the mesentery.'

OMPHALO-MESENTERIC VESSELS, *Vitel'lo-mesenter'ic, Vit'elline vessels.* Haller gave this name to two very fine vessels, which spread their ramifications on the parietes of the umbilical vesicle. There is an *omphalo-mesenteric artery* and *vein.* The *omphalo-mesenteric artery* is a branch of the superior mesenteric;—the vein empties itself into the trunk, or into one of the branches of the superior mesenteric. Velpeau affirms, that they inosculate with a branch of the second or third order of those great vessels, with those in particular that are distributed to the cæcum, and he regards them to be the vessels of nutrition of the umbilical vesicle. They are occasionally met with in the fœtus, at the full period, under the form of whitish filaments, which extend from the mesenteric vessels to the umbilicus.

OMPHALO-MESERAIC, Omphalo-mesenteric.

OMPHALONCUS, Omphalophyma.

OMPHALONEURORRHEXIS, Omphalorrhexis.

OMPHALOPHLEBI'TIS, from *ομφαλος,* 'the umbilicus,' and *phlebitis,* 'inflammation of a vein.' Inflammation of the umbilical vein.

OMPHALOPHY'MA, *Omphalon'cus,* from *ομφαλος,* 'the navel,' and *φυμα,* 'tumour.' A tumefaction of the navel.

OMPHALOPROPTOSIS, Exomphalus.

OMPHALORRHAG''IA, *Omphalor'rhagē,* from *ομφαλος,* 'the umbilicus,' and *ρηγνυμι,* 'I break out.' Hemorrhage from the umbilicus, in the new-born in particular.

OMPHALORRHEX'IS, from *ομφαλος,* 'navel,' and *ρηξις,* 'rupture.' *Omphaloneurorrhex'is.* Rupture of the navel string.

OMPHALOS, Umbilicus.

OMPH'ALOSITE, from *ομφαλος,* 'the navel,' and *σιτος,* 'nourishment.' A monster that possesses an imperfect kind of life, which ceases when the umbilical cord is divided.

OMPHALOT'OMY, *Omphalotom'ia,* from *ομφαλος,* 'the umbilicus,' and *τεμνω,* 'I cut.' The division of the navel string.

OMPHALUS, Umbilicus.

OMUS, Crude, Humerus.

ONAGRA, Œnothera biennis.

ONANIA, Masturbation.

ONANISM, Masturbation.

ON-COME. A Scotch term, according to Sir Walter Scott, for "mysterious diseases, which baffle the regular physician."

ONCOS, Tumour.

ONCO'SES, from *ογκος,* 'a tumour.' Tumours, as diseases.

ONCOSIS, Intumescence.

ONCOT'OMY, *Oncotom'ia, Onkotomy,* from *ογκος,* 'a tumour,' and *τομη,* 'incision.' The open-

ing of an abscess with a cutting instrument, or the excision of a tumour.

ONCTION, Inunction.

ONCUS, Swelling, Tumour.

ONDULATION, Fluctuation.

ONEBERRY, Paris.

ONEIROCRIT'ICUS, *Oneiroc'rites*, from *ονειρος*, 'a dream,' and *κριτις*, 'judgment.' One who judges according to dreams.

ONEIRODYN'IA, from *ονειρος*, and *οδυνη*, 'pain.' Painful dreams. *Incubus* and *Somnambulism* are oneirodyniæ.

ONEIRODYNIA ACTIVA, Paroniria, Somnambulism—o. Gravans, Incubus.

ONEIRODYNIE GRAVATIVE, Incubus.

ONEIROG'MUS, *Oneirog'ynē*, *Oneiropol'esis*, from *ονειρος*, 'a dream.' A lascivious dream; pollution; nocturnal pollution.

ONEIROGONORRHŒA, Pollution, nocturnal.

ONEIROGONOS, Pollution.

ONEIROL'OGY, *Oneirolog''ia*, from *ονειρος*, 'a dream,' and *λογος*, 'a description.' The doctrine of dreams.

ONEIROMANTI'A, from *ονειρος*, 'a dream,' and *μαντεια*, 'divination.' The art of divining by dreams; or of interpreting dreams.

ONEIRON'OSUS, from *ονειρος*, and *νοσος*, 'a disease.' *Somnia'tio morbo'sa*. Morbid, uneasy dreaming.

ONEIROPOLESIS, Oneirogmus.

ONERA ALVI, Excrement.

ONGLADE, Paronychia.

ONGLE, Nail—o. *Incarné*, Onychogryphosis.

ONGLÉE (F.), *Digito'rum stupor à gelu*. Painful numbness at the extremities of the fingers, caused by cold.

ONGLET, Pterygion.

ONGUENT, Unguentum—o. *d'Althéa*, Unguentum de Althææ—o. *Blanc*, Ceratum cetacei—o. *de Blanc de baleine*, Unguentum cetacei — o. *Blanc de Rhazes*, Unguentum plumbi subcarbonatis—o. *de Céruse*, Unguentum plumbi subcarbonatis—o. *Citrin contre la gale*, Unguentum hydrargyri nitras — o. *Digestif simple*, Unguentum digestivum simplex — o. *Gris*, Unguentum oxidi hydrargyri cinereum — o. *de Guimauve*, Unguentum de althææ — o. *de Laurier*, Unguentum laurinum—o. *Mercuriel*, Unguentum hydrargyri—o. *Napolitain*, Unguentum hydrargyri—o. *de Nitrate de mercure*, Unguentum hydrargyri nitratis — o. *de Poix et de cire*, Basilicon—o. *de Soldat*, Martiatum unguentum — o. *de Sureau*, Unguentum sambuci — o. *de Tornamira*, Unguentum plumbi subcarbonatis.

ONION, COMMON, Allium cepa — o. Sea, Scilla.

ONIS'CUS, *Asel'lus*, *Cu'tio*, *Porcel'lio*, *Porcel'lus*, *Por'culus*, diminutive of *ονος*, 'a small ass.' A genus of insects, *Class*, Crustacea, very common in cellars and dark and moist places.

ONISCI ASELLI, *Millep'edes*, *Aselli*, *Millep'edæ*, *Fabæ*, *Wood-lice*, *Slaters*, *Hog-lice*, (F.) *Cloportes ordinaires*, had, at one time, a place in the pharmacopœias. They were considered stimulant and diuretic, and useful in jaundice.

ONITIS, Origanum dictamnus.

ONKOTOMY, Oncotomy.

ONOLOSAT, Obolus.

ONOMATOCLESIS, Nomenclature

ONOMATOLOGIA, Nomenclature.

ONONIS ANTIQUORUM, O. spinosa.

ONO'NIS ARVEN'SIS, (F.) *Bugrane des champs*, has properties like the next.

ONONIS SPINO'SA, *Ano'nis*, *Resta seu Arres'ta bovis*, *Rem'ora Ara'tri*, *Ononis antiquo'rum*, *Rest harrow*, (F.) *Arrête-bœuf*, *Bugrande épineuse*, *Bugrane*. *Nat. Ord.* Leguminosæ. *Sex. Syst.* Diadelphia Decandria. The root of this plant was once used as a diuretic.

ONOPORDON ACAN'THIUM, *Onopor'dum acan'thium*, *Car'duus tomento'sus*, *Acan'thium*, *Ac'anos*, *A. spina*, *Spina alba*, *Cotton Thistle*, (F.) *Chardon aux Ânes*. *Ord.* Compositæ. *Sex. Syst.* Syngenesia Polygamia æqualis. The expressed juice has been recommended as a cure for cancer, applied externally.

ONOPORDUM ACANTHIUM, Onopordon acanthium.

ONTHUS, Fimus.

ONYCHATROPH'IA, *Atroph'ia un'guium*, from *ονυξ*, *ονυχος*, 'a nail,' and *atrophia*, 'want of nourishment.' Atrophy of the nails.

ONYCHAUX'E, *Hypertroph'ia un'guium*, from *ονυξ*, *ονυχος*, 'a nail,' and *αυξη*, 'increase.' Unusual increase of the size and thickness of the nails.

ONYCHEXALLAX'IS, from *ονυξ*, *ονυχος*, 'a nail,' and *εξαλλαξις*, 'change. A morbid condition of the nails.

ONYCHIA, Paronychia.

ONYCHI'TIS, from *ονυξ*, *ονυχος*, 'a nail,' and *itis*, denoting inflammation. Inflammation of a nail. See Paronychia.

ONYCHOC'LASIS, from *ονυξ*, *ονυχος*, 'a nail,' and *κλασις*, 'fracture.' Fracture of a nail.

ONYCHOCRYPTOSIS, Onychogryphosis.

ONYCHOGRYPHO'SIS, *Onychogrypo'sis*, *Onychogrypto'sis*, *Onychocrypto'sis*, *Gripho'sis*, *Grypho'sis*, *Onyx'is*, from *ονυξ*, *ονυχος*, 'a nail,' and *gryposis*, 'crookedness.' Curvature of the nails; such as occurs in hectic individuals. Also, growing in of the nails; *Incarna'tio* seu *Adunca'tio* seu *Arctu'ra un'guium*, (F.) *Ongle incarné*.

ONYCHON'OSI, *Onychonu'si*, from *ονυξ*, *ονυχος*, 'a nail,' and *νοσος*, 'a disease.' Disease of the nails.

ONYCHOPH'THORA, *Onychophtho'ria*, *Onycoph'thora*, *Onycophtho'ria*, from *ονυξ*, *ονυχος*, 'the nail,' and *φθορα*, 'degeneration.' A degenerate condition or destruction of the nails.

ONYCHOPHY'MA, from *ονυξ*, *ονυχος*, 'the nail,' and *φυμα*, 'a tumour.' A painful degeneration of the nails, which become thick, rough, and crooked. It occurs as a symptom of syphilis and of lepra.

ONYCHOPTO'SIS, *Piptonyc'hia*, *Diæ'resis Un'guiæ*, from *ονυξ*, *ονυχος*, 'a nail,' and *πτωσις*, 'falling.' The falling off of the nails.

ONYCOPHTHORA, Onychophthora.

ONYX, Hook (blunt), Nail, Pterygion. Also, a collection of purulent matter between the laminæ of the cornea, having the shape of a nail. Unguis Lunula.

ONYXIS, see Onychogryphosis.

ONYXITIS, see Paronychia.

OOCYESIS, Pregnancy, ovarian.

OODEOCELE, see Hernia (foraminis ovalis.)

OODES, Aqueous humour, Oval.

OÖG'ALA, *Oög'la*, *Ogla*, *Pulsex Ovis et Lacte* Milk of eggs, from *ωον*, 'an egg,' and *γαλα*, 'milk.' A preparation of eggs and milk.

OOGLA, Oogala.

OOÏDES, Aqueous humour, Oval.

OOLEMMA PELLUCIDUM, Zona pellucida.

OÖLOG''IA, *Ovolog''ia*, *Ovol'ogy*, from *ωον*, 'an ovum or egg,' and *λογος*, 'a discourse,' 'a description.' A description of the ovum.

OON, Ovum.

OONINE, Albumen.

OÖPH'AGOUS, *Oöph'agus*, from *ωον*, 'an egg, and *φαγω*, 'I eat.' Feeding on eggs.

OOPHORAUXE, Oarioparectasia.

OOPHORITIS, Oaritis.

OOPHORON, Ovary.

OORITIS, Oaritis.

OPAC''ITY, *Opac''itas*, *Opakeness*; from *opacare*, 'to obscure.' Quality of that which is

opake. The property possessed by some bodies of not allowing the light to traverse them. It is opposed to transparency. *Opacity of the cornea* constitutes *albugo* or *leucoma*; — opacity of the crystalline causes cataract.

OPAKE', *Opa'cus, Opa'cous.* Same etymon. An epithet given to bodies, which do not permit the passage of rays of light. The *opake cornea* is the sclerotica, in contradistinction to the *transparent* cornea or true cornea.

OPAKENESS, Opacity.

OP'ALINE. That which resembles the opal. A fluid is said to be opaline, when milky, and when it presents an appearance more or less like that of the opal.

OPEOCELE, see Hernia.

OPERATIO, Action, Operation — o. Chirurgica, see Operation — o. Chymica seu pharmaceutica, Operation, chymical, &c. — o. Simplex, Haplotomia.

OPERA'TION, *Opera'tio*, from *opus, operis*, 'work.' The application of instruments to the human body with the view of curing disease. The object of an operation, *opera'tio chirur'gica*, is generally to divide or reunite parts, to extract extraneous or noxious bodies, and to replace organs that are wanting, by different instruments or artificial means. The principal operatory methods have been called *Synthesis, Diæresis, Exæresis*, and *Prothesis*. Frequently, the most difficult subject connected with an operation is to decide when it is absolutely called for or advisable, and when improper.

OPÉRATION À LAMBEAU, see Flap.

Operation, Bilateral, see Lithotomy—o. *Césarienne*, Cæsarean section.

Operation, Chym'ical or Pharmaceu'tical, *Opera'tio chym'ica* seu *pharmacen'tica*, is any process whose object is the preparation of medicines; their combinations with each other, analysis, and decomposition; — such are, *solution, distillation, sublimation, evaporation, digestion, maceration, infusion, decoction, calcination*, &c. Some of these operations are mechanical; others, really chymical.

Operation, High, see Lithotomy — o. Lateral, see Lithotomy—o. Sigaultian, Symphyseotomy.

OP'ERATOR. Same etymon. A surgeon who is in the habit of practising the greater operations. One who performs any operation. To be a good operator, the surgeon must be well acquainted with anatomy, and be possessed of strong nerve. See Surgeon.

OPER'CULUM, *Operto'rium, Operimen'tum*, from *operire*, 'to cover.' A cover or lid. In fishes, the gill cover.

Operculum Asperæ Arteriæ, Larynx — o. Cutis, Epidermis — o. Ilei, Bauhin, valve of — o. Laryngis, Epiglottis—o. Oculi, Palpebra.

Operculum Papilla'rum. A shield for the nipple.

OPERIMENTUM, Operculum — o. Intestinorum, Epiploon — o. Prætensum abdominis, Peritonæum.

OPERTORIUM, Operculum.

OPHELIA CHIRATA. Gentiana chirayta.

OPHIASIS, Calvities, Porrigo decalvans.

OPHIOGLOS'SUM VULGA'TUM, *O. ova'tum* seu *echinoglos'sum*, (*οφις*, 'a serpent,' and *γλωσσα*, 'a tongue.') *Lingua serpenta'ria, Adder's Tongue*, (F.) *Langue de Serpent. Ord.* Filices. *Sex. Syst.* Cryptogamia. This plant was formerly considered to be vulnerary.

OPHIOPH'AGOUS, *Ophioph'agus*, from *οφις*, 'a serpent,' and *φαγω*, 'I eat.' An epithet for animals which feed on serpents. Pliny has called certain African tribes by this name.

OPHIORRHI'ZA, *O. mungos*, from *οφις*, 'a serpent,' and *ριζα*, 'root.' *Family*, Gentianaceæ. *Sex. Syst.* Pentandria Digynia. The name of the plant whose root has been called *Radix Serpen'tum, Mungos Radix*. The bitter root is much esteemed in Java, Sumatra, &c., for preventing the effects that usually follow the bite of the *naja*, a venomous serpent; with which view it is eaten by the natives. It is, also, a reputed anthelmintic.

OPHIOXYLON, Ophioxylum.

OPHIOX'YLUM, from *οφις*, 'a serpent,' and *ξυλον*, 'wood.' *Ophioxylum* seu *Ophioxylon serpenti'num* seu *trifolia'tum, Acavce'ria, Lignum serpentum, Ord.* Apocynaceæ, has been recommended in the bites of serpents, and in intermittents. It is said to be very bitter.

OPHIS, Serpent.

OPHI'TES, from *οφις*, 'a serpent.' *Serpenti'nus, Ser'pentine* or *Black Por'phyry*. This rock was formerly worn as an amulet, to cure diseases of the head.

OPHROSTAPHYLON, Bryonia alba.

OPHRYS, Supercilium.

OPHTHALMAL'GIA, from *οφθαλμος*, 'the eye,' and *αλγος*, 'pain.' Pain in the eye. Neuralgia of the eye.

OPHTHALMEMPASMA, Collyrium siccum.

OPHTHAL'MIA, *Ophthalmi'tis*, from *οφθαλμος*, 'the eye.' *Oculo'rum inflamma'tio, Cauma ophthalmi'tis, Ophthalmopo'nia, Inflamma'tion of the Eye, Ophthal'my*, (F.) *Ophthalmie, Ophthalmite, Inflammation de l'œil, Catarrhe oculaire*. Three great varieties of ophthalmia, independently of the *acute* and *chronic* (which conditions occur in all inflammations,) may be reckoned:—the *Ophthalmia membranarum, O. purulenta*, and *O. tarsi*. The first is characterized by the general symptoms of ophthalmia; — pain and redness of the eye or its appendages; with intolerance of light, and unusual flow of tears; the inflammation being seated chiefly in the coats of the eyeball. It is the *Hymenophthal'mia, Ophthalmia tarax'is* seu *hu'mida* seu *vera* seu *chemo'sis, Conjunctivi'tis, Inflamma'tio conjuncti'væ, Symphymeni'tis, Syndesmi'tis, Catarr'hal ophthalmia, Ophthalmo-conjunctivi'tis, Epiph'ora* (Galen), *Conjunctival* or *Lach'rymóse Ophthal'mia, Tarax'is* (Paulus of Ægina), *Chemo'sis* (Aëtius), (F.) *Conjonctivite, Inflammation de la conjonctive*. In the second,—*Ophthalmia purulen'ta* seu *puriform'is, Blennophthalmia, Blepharoblennorrhœ'a, Opthalmoblennorrhœa, Blennorrhœa oc'uli* — the internal surface of the palpebræ associates in the inflammation of the eye-ball; and there is a copious secretion of a purulent fluid. An epidemic and contagious [?] variety of this is the *Ægyptian Ophthalmia, O. epidem'ica* seu *purulen'ta epidem'ica* seu *contagio'sa* seu *catarrha'lis bel'lica* seu *bel'lica* seu *Asiat'ica* seu *purulenta contagio'sa, Blennorrhœ'a Oculi Ægyptiaca, Lœmophthal'mia, Conjunctivi'tis puro-muco'sa contagio'sa* seu *Ægyptiaca, Blepharo'tis glandula'ris contagio'sa, Adeni'tis palpebra'rum contagiosa, Sup'purative ophthalmia, Epidemic contagious ophthal'mia* — called *Egyptian*, from its prevalence in Egypt during the British Expedition under Sir Ralph Abercrombie. The inflammation is rapid and destructive; granulations shoot from the tunica conjunctiva, and occasionally there is intolerable pain, often succeeded by delirium. In new-born children, a species of purulent ophthalmia, *O. purulen'ta infan'tum* seu *neonato'rum, Blepharophthalmia* seu *Lippitu'do* seu *Blennorrhœ'a Oc'uli* seu *Ophthal'mo-blennorrhœ'a* seu *Blepharo-blennorrhœ'a* seu *Blepharo-pyorrhœ'a* seu *Pyophthalmia, Psorophthalmia neonato'rum, Adenosynchiton'tis*, (F.) *Ophthalmie puriforme des nouveau-nés*, in which the palpebræ are florid and peculiarly tumid, is by no means uncommon. It seems to be caused by acrid discharges from the mother, applied to

the eye of the infant during its exit; or to the stimulus of the light, when the child first opens its eyes. A severe form of purulent ophthalmia — *Hyperconjunctivite* (Piorry) — is produced by the application of gonorrhœal matter to the eye. It is the *Ophthalmia gonorrho'ica, Blennorrhœ'a oculi gonorrho'ica, Gonorrhoblepharrhœ'a, Conjunctivitis blennorrhag''ica* seu *gonorrho'ica, Gonorrhœ'al Ophthal'mia*, (F.) *Ophthalmie blennorrhagique, Conjonctivite blennorrhagique.*

Ophthalmia is likewise modified by the condition of the constitution, and hence we have *strumous, variolous*, and other inflammations of the conjunctiva.

The *third* variety — the *Ophthalmia Tarsi* seu *glutino'sa, Blepharophthal'mia, Blepharo'tis, Blepharoti'tis, Blepharit'tis, Blepharadeni'tis, Psorophthal'mia, Oc'uli palpebra'rum sca'bies purigino'sa, Adenophthalmia*—is seated chiefly in the tarsus; the sebaceous crypts secreting a viscid and acrid fluid, that glues and ulcerates its edges, and irritates the eye.

The different forms of inflammation of the conjunctiva are thus classed by M. Desmarres:

- Conjunctivitis.....
  - 1. Pure or phlegmonous.
  - 2. Pustular.
  - 3. Granular or catarrhal.
    - Contagious.
    - Non-contagious.
    - Miasmatic.
    - Exanthematic.....
      - Erysipelatous.
      - Variolous.
      - Morbillous.
      - Scarlatinous.
  - 4. Purulent.....
    - Of new-born infants.
    - Gonorrhœal.
    - Egyptian.

Conjunctivitis, when slight, requires little treatment: the antiphlogistic regimen—and, particularly, avoiding exposure to light,—being all that is necessary. When more severe, along with this, general and local blood-letting, especially by leeches to the side of the septum narium, must be employed so as to make a decided impression on the system; with nauseating doses of antimony, purgatives, blisters (at some distance from the organ), refrigerants; and astringents, cold or warm, according to circumstances, to the eye. In *Purulent Ophthalmy*, these measures must be still more actively employed, otherwise disorganization will speedily follow: — the granulations, which form on the adnata of the eyelids may be removed with the scissors, and the sore be touched with a solution of alum. *Ophthalmia Tarsi* must be treated on general principles, when severe. It usually, however, requires merely the antiphlogistic regimen, with the occasional use, especially at night, of a slightly stimulating ointment, such as the unguentum hydrargyri nitrico-oxydi, considerably reduced with lard. The ointment prevents the eyelids from being glued together during the night, and thus obviates the irritation caused by attempts at separating them.

Ophthalmia, Ægyptian, see Ophthalmia — o. Asiatica, see Ophthalmia — o. Bellica, see Ophthalmia — o. Biliosa, Ophthalmocholosis — o. Catarrhal, see Ophthalmia — o. Catarrhalis bellica, see Ophthalmia—o. Chronica, Lippitudo—o. Conjunctival, see Ophthalmia — o. Contagiosa, see Ophthalmia — o. Epidemica, see Ophthalmia — o. Glutinosa, see Ophthalmia — o. Gonorrhoica, see Ophthalmia — o. Gonorrhœal, see Ophthalmia — o. Humida, see Ophthalmia—o. Lachrymose, see Ophthalmia — o. Membranarum, see Ophthalmia — o. Neonatorum, see Ophthalmia — o. Phlyctenular, see Ophthalmia — o. Puriformis, see Ophthalmia—o. Purulenta, see Ophthalmia—o. Purulenta contagiosa, see Ophthalmia — o. Purulenta epidemica, see Ophthalmia — o. Purulenta infantum, see Ophthalmia — o. Rheumatic, Sclerotitis — o. Sicca, Xerophthalmia — o. Suppurative, see Ophthalmia — o. Taraxis, see Ophthalmia — o. Tarsi, see Ophthalmia — o. Ulcerosa, Helcophthalmia—o. Varicose, Cirsophthalmia — o. Vera, see Ophthalmia.

OPHTHALMIATER, Oculist.

OPHTHALMIATRI'A, *Ophthalmiatrotech'nica, Ophthalmotherapi'a*, (F.) *Oculistique*; from *ophthalmos*, and *iatros*, 'a physician.' The art of the oculist. Treatment of diseases of the eye.

OPHTHALMIATROTECHNICA, Ophthalmiatria.

OPHTHAL'MIC, *Ophthal'micus*, from *ophthalmos*. That which relates or belongs to the eye.

Ophthalmic Artery, *A. orbitaire*, (Ch.) arises from the internal carotid, and issues from the cranium by the foramen opticum. At first, it is situate at the outer and lower side of the optic nerve, but ascends above this nerve, and passes towards the inner angle of the orbit. It furnishes, in its course, the *lachrymal, centralis retinæ, infra-orbitars, ciliaries, anterior ciliaries, inferior and superior musculars, anterior and posterior ethmoidals*, and *superior and inferior palpebrals*. After having given off these, it divides into two branches — the *frontal* and *nasal*, which furnish a number of ramifications, — some superficial, others deep-seated.

Ophthal'mic Gang'lion, *Lentic'ular* or *Cil'iary ganglion, Ganglion ophthal'micum* seu *semiluna're* seu *cilia're*, *G. orbitaire* (Ch.), is one of the smallest ganglions of the body, and formed by the 5th and 3d pairs of encephalic nerves. It is situate at the outer side of the optic nerve near the bottom of the orbit; is irregularly quadrilateral and flat; its colour of a reddish gray. Behind, it communicates by its posterior angles —by means of nervous filaments—with the nasal nerve of the ophthalmic, the motor oculi, and offsets from the sympathetic. Each of its anterior angles furnishes a fasciculus of small nerves. These are the ciliary nerves.

Ophthalmic Nerve, *Ophthalmic Nerve* of Willis, *Orbito-frontal*, (Ch.) is the smallest and first of the three branches given off by the 5th pair. It proceeds along the external paries of the cavernous sinus, and enters the orbit by the sphenoidal fissure. It divides into three branches, one, *external* — the lachrymal nerve; another, *superior* — frontal nerve: and the last, *internal* — the nasal nerve. See Lachrymal, Frontal, Nasal.

Ophthalmic or Optic Remedy, *Ophthal'micum* seu *Op'ticum*, (F.) *Topique ophthalmique*, is a medicine employed in ophthalmia.

Ophthalmic Sinus, see Cavernous Sinus.

Ophthalmic Vein has the same arrangement as the artery, which it accompanies in all its divisions. It issues from the orbit at the inner

part of the sphenoidal fissure, and discharges its blood into the cavernous sinus.

The name *Facial Ophthalmic* has been given to the branch by which the facial vein communicates with the ophthalmic.

OPHTHALMICA, Euphrasia officinalis.

OPHTHALMICI EXTERNI, Motores oculorum.

OPHTHALMICUM, Ophthalmic remedy.

OPHTHALMIDIUM, Microphthalmus.

OPHTHALMIE PURIFORME DES NOUVEAU-NÉS, see Ophthalmia — *o. Blennorrhagique*, see Ophthalmia.

OPHTHALMITE, Ophthalmia.

OPHTHALMI'TIS, Ophthalmia. This term is occasionally restricted to inflammation of the globe of the eye, in which, both the external and internal structures are involved.

OPHTHALMIUM, Microphthalmus.

OPHTHALMO-BLENNORRHŒA, Ophthalmia (purulent)—o.b. Neonatorum, see Ophthalmia (purulenta infantum).

OPHTHALMO-CARCINO'MA, from *ophthalmos*, and *καρκινωμα*, 'cancer.' Cancer of the eye.

OPHTHALMOCELE, Exophthalmia.

OPHTHALMOCHOLO'SIS, from *ophthalmos*, and *χολη*, 'bile;' *Ophthal'mia bilio'sa*. Ophthalmia from biliary excitement.

OPHTHALMOCHROÏTES, see Choroidea tunica.

OPHTHALMO-CONJUNCTIVITIS, see Ophthalmia.

OPHTHALMOCOPIA, Copyopia.

OPHTHALMODULI'A, from *ophthalmus*, and *δουλεια*, 'servitude.' Eye-service. The title of a book by Bartisch on diseases of the eye.

OPHTHALMODYN'IA, from *ophthalmos*, and *ὀδυνη*, 'pain,' especially rheumatic pain of the eye. Plenck has given this name to neuralgia of the frontal nerve, in which the pain radiates particularly towards the bottom of the orbit. See Neuralgia, frontal.

OPHTHALMODYNIA PERIODICA, Neuralgia, facial.

OPHTHALMŒDE'MA, from *ophthalmos*, and *οιδημα*, 'œdema.' Œdema of the conjunctiva.

OPHTHALMOG'RAPHY, from *ophthalmos*, and *γραφη*, 'a description.' The part of anatomy which gives a description of the eye. An anatomical description of the eye.

OPHTHALMOL'OGY, *Ophthalmolog''ia*, *Ophthalmotol'ogy*, from *ophthalmos*, and *λογος*, 'a discourse.' The part of anatomy which treats of the eye. An anatomical treatise on the eye. A description of the eye in health and disease.

OPHTHALMOM'ETER, from *ophthalmos*, and *μετρον*, 'measure.' An instrument of the nature of compasses, invented by F. Petit, for measuring the capacity of the anterior and posterior chambers of the eye in anatomical experiments.

OPHTHALMOMYÏ'TIS, *Ophthalmomyosi'tis*, from *ophthalmos*, *μυς*, 'a muscle,' and *itis*, denoting inflammation. Inflammation of the muscles of the eye.

OPHTHALMOPARALYSIS, Ophthalmoplegia.

OPHTHALMOPHLEBOTOM'IA, from *ophthalmos*, *φλεψ*, 'a vein,' and *τομη*, 'incision.' Bleeding from the vessels of the conjunctiva.

OPHTHALMOPHTHAR'SIS, *Ophthalmophthi'sis*, from *ophthalmos*, and *φθαρσις*, 'corruption.' Destruction of the eyeball.

OPHTHALMOPHTHISIS, Ophthalmophtharsis.

OPHTHALMOPLE'GIA, *Ophthalmoparal'ysis*, from *ophthalmos*, and *πλησσω*, 'I strike.' Paralysis of one or more of the muscles of the eye.

OPHTHALMOPONIA, Ophthalmia.

OPHTHALMOPTO'SIS, from *ophthalmos*, and *πτωσις*, 'a prolapse.' A word employed by some authors in the sense of exophthalmia; by others, in that of hydrophthalmia.

OPHTHALMORRHAG''IA, from *ophthalmos*, and *ῥηγνυμι*, 'I break forth.' Hemorrhage from the tunica conjunctiva. It is rare.

OPHTHALMOS, Eye.

OPHTHALMOSCOPE, see Ophthalmoscopia.

OPHTHALMOSCOP'IA, *Ophthalmoscopy*, from *ophthalmos*, and *σκοπω*, 'I regard attentively.' The art of judging of the temper, &c., of a person by examining his eyes. The art of judging of health or disease by inspection of the eyes. Exploration of the eyes in order to a diagnosis.

An *Ophthal'moscope*, *ophthalmoscop'ium*, *ophthalmos'copum*, has been invented, which by reflecting the light on the retina enables the condition of the interior of the eye to be appreciated. To a form of the ophthalmoscope the name *Anagnos'takis* has been given, after a young Greek physician, who, it was thought, invented it.

OPHTHALMOS'TATUM (F.) *Ophthal'mostat*, from *ophthalmos*, and *σταις*, 'station;' *Spec'ulum Oc'uli*. An instrument for fixing the eye.

OPHTHALMOTHERAPIA, Ophthalmiatria.

OPHTHALMOTOLOGY, Ophthalmology.

OPHTHALMOT'OMY, *Ophthalmotom'ia*, from *ophthalmos* and *τεμνω*, 'I cut.' The part of anatomy which treats of the dissection of the eye. It has, also, been applied to extirpation of the eye.

OPHTHALMOXEROSIS, Xerophthalmia.

OPHTHALMOX'YSIS, from *ophthalmos*, and *ξυω*, 'I scrape.' A name given to the scarification sometimes practised on the conjunctiva, in cases of ophthalmia.

OPHTHALMOXYS'TRUM, *Ophthalmoxys'ter*, *Ophthalmoxyste'rium*, *Xystrum ophthal'micum*. Same etymon. An instrument for scraping the eye. Name given to a small brush, with barbs like an ear of barley or rye, intended to scarify the eyelids in certain cases of ophthalmia.

OPHTHALMUS, Eye.

OPHTHALMYMENI'TIS, *Ophthalmohymeni'tis*, from *ophthalmos*, *ὑμην*, 'membrane,' and *itis*, denoting inflammation. Inflammation of one or more of the membranes of the eye.

OPIACÉ, Opiate.

OPIACUM, Opiatum.

OPIANE, Narcotine.

O'PIANINE, *Opiani'na*, *Opia'nio;* from *opium*. An alkaloid discovered in opium, which resembles morphia in its properties, and doses.

OPIANUM, Narcotine.

OPIAT, Opiate — *o. Dentifrice*, Dentifrice.

O'PIATE, *Opia'tum*, *Opia'cum*, *Papavera'ceum*, *Meco'nicum*, (F.) *Opiat*. *Opiacée*, from *οπιον*, (*οπος*, 'juice,') 'opium.' A medicine containing opium. A medicine that procures sleep. An *electuary;* — formerly, an electuary which contained opium.

O'PIATED, *Opia'tus*. Impregnated with opium. Affected by opium.

OPIA'TUM FEBRIF'UGUM, *Electua'rium de Kinâ Kinâ; Elec'tuary of Cincho'na*. (*Pulv. cinch.* ℥xviij, *ammon. muriat.* ℥j, *mellis, syrup., absinth.* ää ℥ij. Make into an electuary. *Ph. P.*) Given, when cinchona is indicated.

OPIATUM MESENTER'ICUM, *Electua'rium de Al'oë, Muria'tê Hydrar'gyri, et Ferro*. (*Gum. ammon.* ℥ss. *sennæ* ℥vj, *hydrargyri submuriat., rad. ari., aloës socotrin.* ää ℥ij, *pulv. scammon. comp.* (vulg. *de tribus,*) *rhej. rud.* ää ℥iij, *ferri limatur. porphyrisat.* ℥ss. Bruise and mix together, add of *compound syrup of apples* double the weight of the other matters, and make into an electuary. *Ph. P.*) Dose, ℥ss to ℥ij, in obstructions of the liver, mesentery, &c.

OPIATUS, Opiated.

OPION, Opium.

OPISMA, Succus.

OPIS'THENAR, *Dorsum manûs*, from *οπισθε*, 'backwards,' and *θεναρ*, 'the flat of the hand.' The back of the hand.

OPISTHOCEPHALON, Occiput.

OPISTHOCRANIUM, Occiput.

OPISTHOCYPHOSIS, Cyphoma.

OPISTHOLOB'IUM, *Opisthot'ium*, from *οπισθε*, 'behind,' and *λοβιον*, 'the lobe of the ear.' Any agent applied behind the ear.

OPISTHOTIUM, Opistholobium.

OPISTHOT'ONOS, *Raptus posterga'neus*, *Tet'anus dorsa'lis* seu *posti'cus* seu *posterga'neus*, from *οπισθε*, 'backwards,' and *τεινω*, 'I stretch.' A species of tetanus, in which the body is bent backwards.

OPIUM, see Papaver—o. Colatum, Extractum opii—o. Depuratum, Extractum opii.

Opium Eaters, Theriaki.

Opium, Lettuce, see Lactuca.

OPOBALSAMUM, see Amyris opobalsamum.

OPOCARPASON, Carpasium (juice.)

OPOCEPH'ALUS, (F.) *Opocéphale*. A genus of monsters having the two ears approximated or united under the head; the jaws atrophied; and no mouth or nose.—I. G. St. Hilaire.

OPODELDOC, Opodeldoch.

OPODEL'DOCH, *Opodel'toch*, *Opodeldoc*. An unmeaning term, frequently used by Paracelsus. Formerly, it signified a plaster for all external injuries; now, it is applied to the Linimentum Saponis Compositum.

Opodeldoch, Steer's. A liniment, called after the inventor. There are many formulæ for its preparation. The following is one. *Sap. alb.* ℔j, *camphor.* ℥ij, *ol. rorismarini* f℥iv, *spiritus vini rectificati* Oij. See Linimentum Saponis Compositum.

OPODEOCELE, see Hernia.

OPODYMUS, Diprosopus.

OPOÏDIA GALBANIFERA, see Bubon Galbanum.

OPOLÉ, Succus.

OPOLIDE, Succus.

OPOPIOS, Optic.

OPOPONACUM, Pastinaca opoponax.

OPOPONAX, see Pastinaca opoponax — o. Chironium, Pastinaca opoponax.

OPOPONAXWORT, Pastinaca opoponax.

OPO'RICE, from *οπωρα*, 'autumnal fruits.' A medicine, composed of several autumnal fruits, particularly of quinces, pomegranates, &c., and wine. It was formerly administered in dysentery, diseases of the stomach, &c.

OPOS, Succus expressus — o. Silphion, Laserpitium.

OPPIDULUM, Vulva.

OPPILATIO, Emphraxis—o. Telæ Cellulosæ, Induration of the cellular tissue.

OPPILATIVUS, Obstruens.

OPPO'NENS, (F.) *Opposant*, from *ob*, and *ponere*, 'to place.' That which faces or is put in opposition to something. The name has been given to two muscles of the hand.

Opponens Min'imi Dig''iti, (F.) *Opposant du petit doigt*, *Carpo-métacarpien du petit doigt* (Ch.), *Métacarpien du petit doigt*. This muscle has the same shape and arrangement as the preceding, but is of less size. It is situate in the hypothenar eminence. Its fibres are inserted into the anterior annular ligament of the carpus, and terminate on the whole length of the inner edge of the 5th metacarpal bone. This muscle carries the 5th metacarpal bone forwards and outwards, and thus augments the concavity of the palm of the hand.

Opponens Pol'licis, *Flexor ossis metacar'pi pollicis*, *F. primi interno'dii* (Douglass), *Oppouens pollicis manûs*, *Antith'enar* sive *semi-interosseus pollicis*, (F.) *Carpo-métacarpien du pouce* (Ch.), *Métacarpien du pouce*, *Opposant du Pouce*. A small, flat, triangular muscle, situate in the substance of the thenar eminence. It is attached, on the one hand, to the anterior annular ligament of the carpus and to the trapezium; and, on the other, to the whole of the outer margin of the first metacarpal bone. This muscle impresses on the first bone of the metacarpus a movement of rotation, which opposes the thumb to the other fingers.

OPPOSANT, Opponens — *o. du Petit doigt*, Opponens minimi digiti—*o. du Pouce*, Opponens pollicis.

OPPRESSIO, Catalepsy, Oppression—o. Nocturna, Incubus.

OPPRESSION, *Oppres'sio*, *Thlipsis*, *Catathlips'is*, from *opprimere* (*ob*, and *premere*, *pressum*,) 'to press against.' A state, in which the patient experiences a sensation of weight in the part affected. When employed abstractedly, it means, particularly, *Oppression of the chest*—*Oppressio Pec'toris*, (F.) *O. de Poitrine*.

Oppression, *Oppres'sio vir'ium*, (F.) *Oppression des forces*, is, also, used for that condition, at the commencement of fevers, &c., in which the system is oppressed rather than debilitated, and where the vascular action rises, as the obstruction to free circulation is relieved by bleeding, purging, &c.

OPS, Eye.

OPSEONUSI, Opsionusi.

OPSIALGIA, Neuralgia, facial.

OPSIONU'SI, *Opseonu'si*, from *οψις*, 'vision,' and *νουσος*, 'a disease;' *Morbi visûs*. Diseases of vision.

OPSIOTOC'IA, from *οψε*, 'too late,' and *τοκος*, 'birth;' *Partus sero'tinus*. Parturition after the usual period. See Pregnancy.

OPSIS, Pupil, Vision.

OPSOMA'NIAC, *Opsom'anes*, (F.) *Opsomane*, from *οψον*, 'aliment,' and *μανια*. One who loves some particular aliment to madness.

OPTESIS, Assatio.

OPTIC, *Op'ticus*, *Opo'pios*, (F.) *Optique*, from *οπτομαι*, 'I see.' That which relates to vision.

OPTIC CENTRE, *Centrum op'ticum*. The optic centre of the crystalline is the point at which the various rays proceeding from an object cross in their way to the retina.

Optic Commissure, see Chiasmus.

Optic Foramen, *Fora'men op'ticum*, (F.) *Trou optique*. A round opening in the sphenoid bone, near the base of its lesser ala, through which the optic nerve passes.

Optic Ganglia, Quadrigemina tubercula.

Optic Groove. A transverse groove on the superior surface of the sphenoid bone, on which the commissure of the optic nerve rests, and which is continuous on each side with the optic foramen.

Optic Lobes, Quadrigemina tubercula.

Optic Nerve, *Nervus op'ticus* seu *visi'vus* seu *viso'rius*, *Par secun'dum* seu *op'ticum* seu *viso'rium*, *Nerve of the 2d pair*, *Ocular nerve* of Chaussier. The optic nerves are remarkable for their size; for their running a longer course within than without, the cranium; and for their furnishing no branch from their origin to their termination. They do not seem to arise, as was long supposed, from the optic thalami, but from the tubercula quadrigemina. Immediately after their origin, the *optic tracts*, *Tractus op'tici*, proceed forwards; are, at first, broad and flat; but afterwards become narrower and round. In front of the fossa pituitaria, they unite and decussate, each nerve proceeding through the optic foramen

of the sphenoid bone with the ophthalmic artery, and through the *Fora'men op'ticum chorioïdeæ*, to form the retina. The nerve passes to the back part of the globe of the eye, becomes narrower, and enters that organ at a flattened circular papilla — *Collic'ulus* seu *Papill'a nervi optici* — to give rise to the nervous expansion called the retina. Between the colliculus and the yellow spot of Sömmering, a small projection or fold of the retina passes—*plica centra'lis ret'inæ*. Besides its neurilemma, the optic nerve is surrounded by a sheath, furnished by the dura mater. This accompanies it as far as the eye.

The optic nerve is the nerve of special sensibility of the eye. In the centre of the nerve, there is a *punctum cæcum*, *mac'ula nigra*, where the central artery enters the eye, and the corresponding vein passes out. If a ray of light falls on this spot it is not appreciated.

Optic Remedy, see Ophthalmic remedy — o. Thalami, Thalami nervorum opticorum—o. Tracts, see Optic nerve.

OPTICO-TROCHLÉI-SCLÉROTICIEN, Oblique, superior of the eye.

OPTICUM, Ophthalmic remedy.

OPTILOS, Eye.

OPTOM'ETER, from *οπτομαι*, 'I see,' and *μετρον*, 'a measure.' An instrument for measuring the distance of distinct vision.

OPUNTIA, Cactus opuntia—o. Vulgaris, Cactus opuntia.

OR, Gold—*o. Blanc*, Platinum—*o. Cyanure d'*, see Gold—*o. Divisé*, see Gold—*o. Hydrochlorate d'*, see Gold—*o. Iodure d'*, see Gold — *o. Métallique*, see Gold—*o. Nitromuriate d'*, see Gold—*o. Oxide d'*, see Gold — *o. et de Sodium chlorure d'*, see Gold—*o. et de Soude, Hydrochlorate d'*, see Gold —*o. et de Soude, Muriate d'*, see Gold.

ORA SERRATA, see Ciliary (Body.)

ORACHE, SPREADING, Atriplex patula—o. Stinking, Chenopodium vulvaria.

ORAL, *Vocal*, (F.) *Oral*, from *os*, *oris*, 'a mouth.' Relating to the mouth or to speech.

ORANGE, Citrus aurantium — o. Bitter, see Citrus aurantium — o. Flowers of the, see Citrus aurantium.

Orange Grass, Hypericum sarothra—o. Root, Hydrastis Canadensis — o. Tree, Citrus aurantium.

ORANGEADE. A drink, made with orange juice diluted with water. It is antiphlogistic, and often recommended in acute diseases.

ORANGES, see Citrus aurantium — o. Curassoa, Aurantia curassaventia.

ORBES CARTILAGINOSI TRACHEÆ, see Trachea.

ORBICULAIRE DES LÈVRES, Orbicularis oris—*o. des Paupières*, Orbicularis palpebrarum.

ORBIC'ULAR, *Orbicula'ris*, (F.) *Orbiculaire*, from *orbis*, 'a circle.' Spherical, circular.

Orbicular Bone, *Os orbicula'rē* seu *lenticula'rē* seu *Sylvii* seu *orbicula'rē Syl'vii*, *Glob'ulus stap'edis ossis*, *Epiph'ysis cruris longio'ris in'cudis*, *Ossic'ulum orbicula'rē* seu *squamo'sum* seu *cochlearē* seu *quartum*, is the smallest of the four bones of the ear. It is scarcely perceptible, round, convex on two surfaces, and situate between the long ramus of the incus and the head of the stapes.

Orbicular Muscles are muscles with circular fibres surrounding some natural opening of the body. 1. *Orbicula'ris* seu *Constric'tor Oris*, *Sphincter Labio'rum*, *Semi* seu *Demi-orbicula'ris*, *Supra-semi-orbicula'ris*, *Labia'lis*, *Osculato'rius*, *Basia'tor*, (F.) *Labial*, *Orbiculaire des lèvres*. A muscle situate in the substance of the lips, and extending from one commissure to the other. It is formed of two very distinct portions, of a semi-oval shape; one belonging to the upper lip, the other to the lower. Their extremities cross at the commissures, and are confounded with the other muscles of the parts. The use of this fleshy muscle is to bring the lips together, and to close the aperture of the mouth, by making it represent a sort of *bourrelet* with radiated wrinkles. It is an antagonist to every other muscle of the lips. 2. *Orbicularis Palpebra'rum* seu *oc'uli* seu *palpebra'rum cilia'ris*, *Palpebra'rum duo mus'culi*, *Palpebra'lis*, *Constrict'or* seu *Sphincter Palpebra'rum* seu *Oculi*, (F.) *Naso-palpébral* (Ch.), *Maxil'lo-palpébral*, *Palpébral*, *Orbiculaire des paupières*. A muscle common to both the eyelids, and seated in their substance. It is broad, thin, transversely oval, and cleft in its great diameter It is attached to the nasal process of the superior maxillary bone; to the internal angular process of the frontal bone, and to the orbitar process of the superior maxillary bone. From these origins the muscle passes outwards, under the skin of the eyelids, surrounding the orbit in a circular manner, extending somewhat beyond it, and covering the upper part of the cheek. It is inserted into the skin of the eyelids, its upper and inner edge being intimately connected with the frontal and corrugator muscles. Its use is to close the eye, by bringing the eyelids together. The part of the orbicularis which covers the cartilages of the eyelids, and which is remarkably thin, is the *Musculus Ciliaris* of some authors.

ORBICULARIS OCULI, Orbicularis palpebrarum, see Orbicular muscles — o. Oris, see Orbicular muscles — o. Palpebrarum, see Orbicular muscles — o. Palpebrarum ciliaris, see Orbicular muscles — o. Recti, Sphincter ani externus.

ORBICULUS CILIARIS, Ciliary ligament, Ciliary zone.

ORBIS GENU, Patella.

ORBIT, *Or'bita*, *O. oc'uli*, *Troch'ia*, *Conchus* seu *Cav'itas* seu *Fo'vea* seu *Pelvic'ula oc'uli*, (F.) *Orbite*, from *orbis*, 'a circle.' The circular cavities are so called, which lodge the organs of sight. The *orbits* or *orbitar fossæ* or *cavities*, conchi, *κογχοι*, are situate at the upper part of the face, and are composed of seven bones, viz.:— the *frontal*, above; the *palate* and *superior maxillary*, below; the *sphenoid* and *malar*, externally; and the *ethmoid* and *lachrymal*, internally. The orbit is filled by the globe of the eye, with its different accessory parts — muscles, nerves, vessels, the lachrymal gland, &c. Its margin is termed *margo orbita'lis*.

ORBITA, Orbit — o. Oculi, Orbit.

ORBITAL, Orbitar—o. Fissure, inferior, Sphenoidal fissure — o. Fissure, superior, Maxillary fissure.

OR'BITAR, *Orbita'rius*, *Orbita'lis*, *Or'bital*, (F.) *Orbitaire*. Same etymon. Relating or belonging to the orbit.

Orbitar Apoph'yses or Proc''esses terminate the two extremities of the orbitar arch. The *external* is much more prominent, and is articulated with the cheek-bone; the *internal* is thinner, and joins the os unguis.

Orbitar Arch, (F.) *Arcade orbitaire*, is the projecting, round margin, which separates the *frontal* and *orbitar* surfaces of the os frontis, and forms a part of the circumference of the orbit.

Or'bitar Fissures, (F.) *Fentes orbitaires*. These are situate in the orbit. They are two in number: one *superior*, the Sphenoidal; the other *inferior*, the Spheno-maxillary.

Orbitar Foram'ina. Of these there are several:—1. The *Foramen orbitarium supe'rius*, (F.) *Trou orbitaire supérieur*, which is situate at the junction of the inner third of the orbitar arch with its two outer thirds, and gives passage to the frontal nerve. 2. The *Foram'ina orbita'ria interio'ra* seu *inter'na*, *Foram'ina Ethmoïdea*

These are situate at the upper part of the internal paries of the orbit, are formed by the union of two notches of the os frontis with two similar ones of the ethmoid; and are distinguished into *anterior* and *posterior*. The former gives passage to the ethmoidal filament of the nasal nerve and to a small artery.

ORBITAR NERVE, *Nervus orbita'lis* seu *orbita'rius* seu *subcuta'neus malæ*, is a branch given off from the superior maxillary. It enters the orbit by the spheno-maxillary fissure, and divides into two filaments; the one — *malar* — which passes over the cheek-bone, is distributed to the orbicularis palpebrarum, and anastomoses with the facial nerve; the other — *temporal* — which passes to the temporal fossæ, and anastomoses with the inferior maxillary and facial, to become afterwards subcutaneous.

ORBITAR SURFACE, see Maxillary bone (superior).

ORBITO-EXTUS-SCLÉROTICIEN, Rectus externus oculi — *o. Intus-Scléroticien*, Rectus internus oculi — *o. Maxillo-labial*, Levator labii superioris proprius — *o. Palpébral*, Levator palpebræ superioris — *o. Sus-palpébral*, Levator palpebræ superioris.

ORCANETTE, Anchusa officinalis.

ORCHALGIA, Orchidalgia.

ORCHEA, Scrotum.

ORCHEI'TIS, *Oschi'tis*, *Oschei'tis*, *Inflammatio scroti*, from *ορχεα*, 'the scrotum,' and *itis*, denoting inflammation. Inflammation of the scrotum.

ORCHEITIS, Hernia humoralis.

ORCHEOCATABASIS, Orchidocatabasis.

ORCHEOCELE, Orchiocele.

ORCHEOTOMY, Castration.

ORCHESTROMANIA, Chorea.

ORCHIDAL'GIA, *Orchial'gia*, *Orchidodyn'ia*, from *ορχις*, *ορχιδος*, 'a testicle,' and *αλγος*, 'pain.' Pain of the testicle. Neuralgia of the testicle. Irritable testicle. A form of neuralgia.

ORCHIDATROPH'IA, *Atroph'ia testic'uli*, from *ορχις*, *ορχιδος*, 'a testicle,' and *atrophia*, 'atrophy.' Atrophy or wasting of the testicle.

ORCHIDITIS, Hernia humoralis.

ORCHIDOCARPUM ARIETINUM, see Carica papaya.

ORCHIDOCATAB'ASIS, *Orcheocatab'asis*, *Descen'sus testiculo'rum*, from *ορχις*, *ορχιδος*, 'the testis, and *καταβασις*, 'descent.' The descent of the testes into the scrotum.

ORCHIDOCELE, Hernia humoralis.

ORCHIDODYNIA, Orchidalgia.

ORCHIDONCUS, Hernia humoralis.

ORCHIDOTOMY, Castration.

ORCHILL, Lichen roccella.

ORCHIOCE'LĒ, *Orcheocel'ē*, from *ορχις*, *ορχιδος*, 'the testicle,' and *κηλη*, 'a rupture.' A tumour of the testicle. Scrotal hernia. Hernia humoralis. A name given to several diseases of the testicle and its envelopes, essentially differing from each other.

ORCHIOCE'LĒ SCIRRHO'SA, *Scirrhoce'lē*. A malignant tumour of the testis.

ORCHIS, Testicle — o. Butterfly, Orchis bifolia.

ORCHIS MAS'CULA, *Satyr'ion*, *Testic'ulus cani'nus*, *Cynosor'chis*, *Dogs' stones*, *Male orchis*, *Ballock-grass*, *Male Fools' stones*, *Twinroot*. *Ord.* Orchidaceæ. This root had a place in some pharmacopœias, on account of the glutinous, slimy juice it contains. The root of the *Orchis bifo'lia* or *Butterfly orchis*, has likewise been collected. It has been used as a demulcent. Its fancied aphrodisiac virtues seem to be owing to its resemblance to *ορχις*, 'a testicle,' whence its name.

Salep is obtained from this variety of the orchis; — and from the *Orchis morio*, &c. See Salep.

ORCHIS, ROUND-LEAVED, LARGE, Platanthera orbiculata.

ORCHITE, Hernia humoralis.

ORCHITIS, Hernia humoralis.

ORCHOI, see Tarsus.

ORCHOTOMIA, Castration. Also, removal of the tarsi.

ORDEAL NUT — called *Esére* by the natives of Calabar — of the natural family Leguminosæ, and closely resembling a Dolichos, is possessed of virulent acro-narcotic properties.

ORDEOLUM, Hordeolum.

ORDEUM, Hordeum.

ORDINAIRES, Menses.

ORDO MEDICINALIS, Police, medical.

ORDONNANCE, Formula, Prescription.

OREILLE D'ÂNE, Symphytum — *o. d'Homme*, Asarum — *o. de Souris*, Hieracium pilosella — *o. d'Ours*, Primula veris.

OREILLETTE, Asarum, Auricle of the heart.

OREILLONS, Parotis, Cynanche parotidæa.

ORELIA GRANDIFLORA, Allamanda.

ORELLANA, see Terra Orleana.

OREOSELINUM, Athamanta aureoselinum — o. Africanum, Bubon galbanum — o. Legitimum, Athamanta aureoselinum — o. Nigrum, Athamanta aureoselinum.

OREXIS, Appetite, Pyrosis — o. Cynodes, Boulimia.

ORGAN, *Or'ganum*, *Or'ganon*. From *εργον*, 'work.' 'An instrument.' Part of an organized being, destined to exercise some particular function. Thus — the eyes are organs of sight; the muscles are organs of motion, &c. The collection of organs, which concur in any function, is called *apparatus*.

ORGAN. Mentha pulegium.

ORGANA GENERATIONI INSERVIENTIA, Genital organs — o. Genitalia, Genital organs — Sexualia, Genital organs — o. Sudoripara, see Perspiration — o. Urogenitalia, Urogenital organs.

ORGANES GÉNITAUX, Genital organs.

ORGAN'IC, *Organ'icus*, (F.) *Organique*. Relating to an organ or organs, and to beings possessed of organs. Hence, ORGANIC FUNCTIONS are those possessed by both animals and vegetables. It is also used synonymously with *vital*, in contradistinction to *physical*.

ORGANIC CHEMISTRY, see Chymistry.

ORGANIC DISEASES or LESIONS are such as concern the organ itself, in contradistinction to *functional*, *rat''ional*, or *dynam'ic*, which merely concern the function. Of course, *organic* diseases of a part are always more serious than *functional*.

ORGANIC NERVOUS SYSTEM, see Trisplanchnic nerve.

OR'GANICISM, *Organicism'us*, from *οργανον*, 'an organ.' The doctrine of the localization of disease, or which refers it always to a material lesion of an organ. A modern term, but not much used.

ORGANISATIO, Organization.

ORGANISATUS, Organized.

OR'GANISM. Same etymon as organ. The living economy. Many physiologists have used this word synonymously with organization; but more especially to designate the aggregate of vital actions in organized beings, animals as well as vegetables. The collection of parts composing an organized body, and the laws which govern it.

ORGANIZABIL'ITY, from *organisatio*, and *habilis*, 'suitable.' Capability of organization or of being formed into living tissue. Substances possessed of such capability — as fibrin — are said to be organizable.

ORGANIZABLE, see Organizability.

ORGANIZA'TION, *Organisa'tio*, from *οργανον*, an organ.' The manner of structure proper to different beings. It is also employed in the sense of the structure of a part; as, the *organization of the heart*, &c.

ORGANIZATION, COMPOUNDS OF, Principles, immediate.

OR'GANIZED, *Or'ganis instruc'tus*, *Organisa'tus*, (F.) *Organisé*. That which is composed of organs.

ORGANIZED BODIES, (F.) *Corps organisés*, are those endowed with life; i. e. animals and vegetables: in contradistinction to *inorganic* bodies, which comprise the mineral kingdom. See Corpus.

ORGANOCHEMIA, Chymistry, organic.

ORGANOG"ENY, *Organogen'ia*, *Organogen'esis*, from *οργανον*, 'an organ,' and *γενεσις*, 'generation.' The doctrine of the formation of different organs.

ORGANOGNO'SIA, from *οργανον*, and *γνωσις*, 'knowledge.' The knowledge and discrimination of organized bodies.

ORGANOG'RAPHY, *Organograph'ia*, from *οργανον*, and *γραφη*, 'a description.' A description of the organs of a living body.

ORGANOLEPTIC, Plastic.

ORGANOLOGY, Anatomy, Craniology.

ORGANON OLFACTÛS, Nasus.

ORGANONOM'IA, from *οργανον*, and *νομος*, 'a law.' The doctrine of the laws of organic life.

ORGANOZOONOMIA, Zoenomia.

ORGANUM, Instrument.

ORGASM, *Orga'mus*, *Orgo'sis*, from *οργαω*, 'I desire ardently,' 'I am excited.' *Œstrua'tion*. A strong impulse or desire for something. State of excitement and turgescence of any organ whatever. Erethism. Applied particularly to the height of venereal excitement in sexual intercourse.

ORGASMUS, Turgescence.

ORGAS'TICA. Same etymon. The second order of the class *Genetica* of Good. Defined: diseases affecting the orgasm; organic or constitutional infirmity disordering the power or the desire of procreating.

ORGE, Rage.

ORGE, Hordeum—*o. Perlé*, see Hordeum.

ORGEAT, Syrupus amygdalæ.

ORGELET, Hordeolum.

ORGEOLET, Hordeolum.

ORGOSIS, Orgasm.

ORICHALCUM, Brass.

ORICULAR, Auricular.

ORICULE, Auricle, Pavilion of the ear.

ORIFICIUM, Mouth—o. Dextrum Ventriculi, Pylorus — o. Uteri, Os uteri — o. Uterinum, see Uterus — o. Vaginale, see Uterus — o. Ventriculi Sinistrum, Cardia.

ORIG'ANUM, *O. vulga'rē* seu *heracleot'icum*, (*Οριγανον*, from *ορος*, 'a mountain,' and *γανος*, 'delight.') *Cuni'la bu'bula*, *Majora'na nancura'na*, *Zazarhen'di herba*, *Wild* or *Common marjoram*, *Mancura'na*, (F.) *Pied de lit*. *Ord*. Labiatæ. *Sex. Syst*. Didynamia Gymnospermia. This plant resembles marjoram in smell; and has a pungent taste, much like thyme. It is aromatic and stimulant; and its oil possesses the properties of the essential oils in general. The oil, *Oleum origani* (Ph. U. S.), is very pungent, and is rarely given internally. It is used in toothache.

ORIGANUM AQUATICUM, Eupatorium cannabinum—o. Creticum, O. dictamnus.

ORIGANUM DICTAM'NUS, *O. Cret'icum*, *Dictam'nus Cret'icus*, *Amar'acus tomento'sus*, *Oni'tis*, *Dittany of Crete*, (F.) *Dictamne de Crète*. The leaves of this plant were once recommended as emmenagogue and alexipharmic.

ORIGANUM HERACLEOTICUM, Origanum.

ORIGANUM MAJORA'NA, *O. majoranoï'des*, *Majorana*, *M. horten'sis*, *Sweet mar'joram*, *Samp'sucus*, *Agriorig'anum*, *Amar'acus*, (F.) *Marjolaine*. Its odour is strong and fragrant; taste aromatic and bitterish. Its properties are those of a stomachic and errhine. It is chiefly used, however, for culinary purposes, and as a snuff in headache.

ORIGANUM SYRIACUM, Teucrium marum.

ORIGINAIRE (F.), from *origo*, *originis*, 'origin.' This term has been used, by French writers, in the same sense as *congenital*. It is particularly applied to affections depending upon faulty conformation, or to faulty conformation itself.

ORIGO, Arche.

ORISMOLOGY, Terminology.

ORLEANA, see Terra Orleana.

ORME, Appetite.

ORME, Ulmus—*o. Champêtre*, Ulmus—*o. Pyramidale*, Ulmus.

ORMEAU, Ulmus.

ORMSKIRK MED'ICINE. A celebrated antylissic remedy, supposed to consist of *Pulv. Cretæ*, ℥ss; *Bol. Armen*. ℥iij; *Alumin*. gr. x; *Pulv. Inulæ*, ℥j; *Ol. Anisi*, gtt. vj.

This is taken for a dose every morning for six times, in a glass of water, with a small proportion of fresh milk.

ORNAMENTUM FOLIACEUM, see Tube, Fallopian.

ORNITHOG'ALUM ALTIS'SIMUM. (*Ορνιθογαλον*, a fanciful name, from *ορνις*, *ορνιθος*, 'a bird,' and *γαλα*, 'milk.') A South African plant, *Nat. Ord*. Asphodeleæ, the fleshy bulb of which is diuretic. An oxymel is prepared of it, which is given in catarrh, asthma, phthisis, and hydrothorax. It resembles squill in its medical properties.

ORNITHOGALUM MARITIMUM, Scilla—o. Squilla, Scilla.

ORNITHOGLOSSA, see Fraxinus excelsior.

ORNUS EUROPÆA, see Fraxinus ornus—o. Mannifera, Fraxinus ornus — o. Rotundifolia, Fraxinus ornus — o. Sylvestris, Fraxinus excelsior.

OROBAN'CHĒ VIRGINIA'NA, (*οροβαγχη*, from *οροβος*, 'the orobus,' and *αγχω*, 'I strangle.') *Epiphe'gus* seu *Epifa'gus America'nus* seu *Virginia'nus*, *Virgin'ia broom-rape*, *Beech-drops*, *Cancer-root*. *Family*, Orobanchoideæ. This parasitic plant is astringent, and a peculiar and extremely nauseous bitter. It is most powerful when fresh. It has been used in dysentery; and, externally, to obstinate ulcers.

OROBAN'CHĒ AMERICA'NA, and O. UNIFLO'RA, have the same properties, and are, likewise, called *Cancer-root*, *Earth-club*, and *Clapwort*.

OROBE, Ervum ervilia.

OROBION, see Ervum ervilia.

OROBOÏ'DES, from *οροβος*, 'the orobus,' and *ειδος*, 'form.' *Orobo'des*. Having the shape of the orobus. A name given to urine, *Urina orobo'des* seu *orobоï'des*, when depositing a substance of a fawn colour, like the meal of the orobus.

OROBUS, Ervum ervilia—o. Faba, Vicia faba.

ORONGE, see Agaric.

OROPHALL'US, from *ορος*, or *ορρος*, 'the rump,' and *φαλλος*, 'the male organ.' A monster having a second male organ originating from the rump.—Gurlt.

OROS, *Croupion*, Serum.

OR'PIMENT, *Auripigmen'tum*, *Orpin*, *Risigal'lum*, *Risisgallum*, *Cloanx*, *Elomē*, *Sira*, *Lempnias*, *Spec'ulum oï'rinum*, *Yrides*, *Yride*. The native yellow sulphuret of arsenic. It is poisonous, but less so than the oxide. It is, also, called *Adarigo*, *Adarnech*, *Ahusal*, *Althanacha*, *Azarnet*.

The Turks prepare a depilatory with it, which they call *Rusma.*

ORPIN, Orpiment — *o. Brûlant,* Sedum — *o. Grand,* Sedum telephium — *o. Reprise,* Sedum telephium.

ORPINE, Sedum telephium.

ORRHOCHEZIA, Diarrhœa, serous.

ORRHOCYST'IS, from ὀρρος, 'serum,' and κυστις, 'a bladder.' An encysted tumour containing a serous fluid.

ORRHOHYMENITIS, Hydrohymenitis.

ORRHOPYG'ION. The inferior extremity of the vertebral column; from ορος, 'extremity,' and πυγη, 'the nates.' The os coccygis. Also, the raphe, extending from the penis to the anus, and separating the scrotum into two parts.

ORRHORRHŒ'A, from ὀρρος, 'serum,' and ρεω, 'I flow.' A morbidly increased secretion of a serous fluid.

ORRHOS, *Croupion,* Serum.

ORRIS, Iris Florentina — o. Common, Iris Germanica.

ORSEILLE, Lichen roccella.

ORTEIL, Digitus pedis.

ORTHOCO'LUM, from ορθος, 'straight,' and κωλον, 'limb.' Stiffness of the limb, so that it is kept quite straight.

ORTHODON'TIA, from ορθος, 'straight, right,' and οδους, οδοντος, 'a tooth.' The part of dentistry which is concerned in the treatment of irregularity of the teeth.

ORTHODO'RON. A measure with the Greeks, equal to eleven finger-breadths.

ORTHOG'NATHOUS, from ορθος, 'right, straight,' and γναθος, 'jaw.' Having a vertical jaw. A term applied to the form of head in which the facial angle approaches the right angle.

ORTHOMORPHIA, Orthopædia.

ORTHOMORPHOSIS, Orthopædia.

ORTHONTROPIA, Orthopædia.

ORTHOPÆDI'A, *Orthopæ'dicē, Orthomor'phia, Orthomorpho'sis, Orthontrop'ia, Orthope'dics,* from ορθος, 'right,' and παις, παιδος, 'a child.' The part of medicine whose object is to prevent and correct deformity in the bodies of children. Often used, however, with a more extensive signification, to embrace the correction or prevention of deformities at all ages. *Orthosomat'ics, Orthosomat'icē,* from ορθος, 'right,' and σωμα, 'body,' has been proposed as a preferable term.

ORTHOPE'DIC, *Orthopæ'dicus;* same etymon. Relating to orthopædia,—as *Orthopedic Institution, Institu'tum orthopæ'dicum* seu *orthopæ'dium:* an institution for the correction or prevention of deformities in children.

ORTHOPEDICS, Orthopædia.

ORTHOPE'DIST, *Ortho'ter, Orthopæ'dicus.* Same etymon. One who practises orthopædia.

ORTHOPHO'NIA, from ορθος, 'right,' and φωνη, 'voice.' A good pronunciation.

ORTHOPHREN'IC, *Orthophren'icus,* from ορθος, 'right,' and φρην, 'mind.' Relating to sound mind, and to the care of insanity.

ORTHOPNŒ'A, *Suffoca'tio, Strangula'tio, Præfoca'tio, Pnix, Pnigmus, Euthyp'noē, Euthypnœ'a, Angor, Apnœ'a,* from ορθος, 'right,' 'straight,' and πνεω, 'I respire.' Impracticability of breathing in the horizontal posture. Necessity of being in the erect posture, in order to respire.

ORTHOPNŒA CARDIACA, Angina Pectoris — o. Convulsiva, Asthma — o. Cynanchica, Cynanche trachealis—o. Hydrothoracica, Hydrothorax—o. Hysterica, Angone—o. Pituitosa, Mycorthopnœa —o. Tussiculosa, Pertussis.

ORTHOSOMATICE, Orthopædia.

ORTHOSOMATIQUE, Orthopædia.

ORTHOTER, Orthopedist.

ORTHYSTEROPTOMA, Prolapsus uteri.

ORTHYSTEROPTOSIS, Prolapsus uteri.

ORTIE, Urtica—*o. Blanche,* Lamium album—*o. Brûlante,* Urtica urens — *o. Morte,* Lamium album—*o. Morte des Bois,* Galeopsis—*o. Romaine,* Urtica pilulifera.

ORTYX, Tetrao coturnix.

ORUS, *Croupion,* Serum.

ORVALE, Salvia sclarea.

ORVIETA'NUM. From the Italian *Orvietano.* An electuary regarded as an invaluable antidote, and composed of *Old theriac, Dried vipers, Scorzonera, Carlina, Imperatorium, Angelica, Bistort, Rosemary, Juniper, Cinnamon, Cloves, Mace, Honey,* and a crowd of other substances. Its medical properties resembled, in some respects, those of the theriac. It was so called, according to some, because invented by Orvietano, a celebrated charlatan; or, according to others, from Orvieto, a town in Italy.

ORY'ZA, Ορυζα, *Ory'za sati'va, Rice,* (F.) *Riz. Family,* Gramineæ. *Sex. Syst.* Hexandria Monogynia. A plant, almost aquatic, and indigenous in China, one of the richest productions of Egypt, and which prospers in the warmer regions of the four quarters of the globe. The grain inclosed in the husk is called by the Malays *Paddy, Padi,* or *Paddie;* when deprived of the husk. *Bras,* and when boiled, *Nasi.* Its amylaceous seeds, *Ory'za, Ory'zum, Hordeum galac'ticum,* nourish more men than those of wheat and rye together. Besides being alimentary, they are demulcent and emollient. *Gardiner's alimentary preparation* is very finely ground rice-meal.

Mucilage of Rice, Rice water, may be formed by taking one ounce of *rice,* and, having washed it, macerating it for three hours in a quart of tepid *soft water,* in a pan placed upon a stove; then boiling the whole slowly for another hour, and straining through a sieve.

It may be sweetened and acidulated, or be prepared with milk, like arrow-root, and be used as a demulcent.

Rice Jelly is made by macerating a sufficient quantity of clean *rice* in as much *water* as will cover it; boiling slowly, adding water as it evaporates, until the rice is reduced to a pap, sweetening and flavouring with *lemon-juice* or *vanilla,* and passing through a fine sieve into a form or mould. It may be eaten alone or with milk; and is a good dietetic preparation for those of weak digestive powers.

Ground rice. Take a tablespoonful of *ground rice,* a pint and a half of milk, and half an ounce of *candied lemon-peel.* Rub the rice smooth with the milk: then add the lemon-peel cut into small pieces; boil for half an hour, and strain whilst the milk is hot. It is used in the same cases as rice jelly.

OS, Bone, Mouth, see Ossiculum—o. Acromii, Acromion — o. Adjutorium, Humeri os — o. Alæforme, Sphenoid — o. Alagas, Coccyx, Sacrum — o. Alatum, Sphenoid bone — o. Amphideon, Os uteri — o. *Anonyme,* Innominatum os — o. Anonymum, Innominatum os — o. Anticum, *Avant bouche* — o. Arcuale, Temporal bone — o. Armale, Temporal bone — o. Asser, Sternum — o. *de l'Assiette,* Ischion — o. Azygos, Sphenoid — o. Ballistæ, Astragalus — o. Basilare, Occipital bone, Palate bone, Sacrum, Sphenoid — o. Baxillare, Sphenoid—o. Bicorne, Hyoides os—o. Brachiale, Humeri os—o. Brachii, Humeri os—o Calcis, Calcaneum—o. Capitatum, Magnum os—o. Caudæ, Occipital bone—o. Clunium, Sacrum—o. Coccygis, Coccyx—o. Colatorii, Sphenoid bone — o. Colatorium, Ethmoid bone — o. Coliforme, Ethmoid — o. Convolutum superius, Turbinated bone, middle — o. Coronale, Frontal bone — o. Coxæ, Innominatum os—o. *Coxal,* Innominatum os, Ischion — o. *Cribleux,* Ethmoid — o. Cribri-

forme, Ethmoid — o. Cribrosum, Ethmoid — o. Cristatum, Ethmoid—*o. Crochu*, Os unciforme.

OS CROTAPHALE. A name given by M. Béclard to a bone sometimes met with at the anterior and inferior angle of the parietal bone; from *κροταφος*, 'the temple.'

Os Crotaphiticum, Temporal bone — o. Cubicum, Ethmoid bone — o. ad Cubitale, Radius — o. Cubiti Inferius, Ulna — *o. de la Cuisse*, Femur — o. Cuneiforme, Sphenoid — o. Cuneo comparatum, Sphenoid — o. Cymbiforme, Scaphoid bone — o. Disciforme, Patella — o. Durum, Temporal bone — o. Ensiforme, Sternum.

OS ÉPACTALE. A name given to one of the ossa Wormiana; particularly to one met with in the posterior fontanelle, and which has been described by G. Fischer, under the name *Os Epactalē* seu *Goëthia'num.*

OS ÉPACTAUX, Wormiana ossa.

Os Externum. The entrance into the vagina, in contradistinction to the *Os inter'num* or *Os u'teri.*

Os Extra Ordinem Carpi, Os pisiforme — o. Femoris, Femur—o. Fibrosum, Occipital bone — o. Foraminulentum, Ethmoid — o. Frontis, Frontal bone — o. Genæ, Malæ os — o. Gladioli, Sternum—o. *Grand*, Magnum os—o. *Grand, col du*, Collum ossis magni—o. Grandinosum, Cuboid—o. Gutturis, Hyoides os—o. Hamatum, Os uneciforme — o. *Hors du rang*, Os pisiforme — o. Hypopium, Malæ os—o. Hypseloides, Hyoides os—o. Inconjugatum, Sphenoid—o. Incudi similis, Incus—o. Inferius ventriculi, Pylorus — *o. Innominé*, Innominatum os — *o. Intercalēs*, Wormiana ossa — o. Internum, see Uterus—o. Inverecundum, Frontal bone—o. Ischii, Ischion—o. Interparietale, Interparictal bone—o. Jugale, Malæ os—o. Jugamentum, Malæ os—o. Juguli, Clavicle—o. Lacrymale, Unguis os—o. Lambda, Occipital bone—o. Lambdoides, Hyoides os, Occipital bone—o. Lapideum, Temporal bone — o. Lapidosum, Temporal bone —o. Latum, Sacrum—o. Latum humeri, Scapula, —o. Lenticulare, Os orbiculare, Os pisiforme—o. Lepidoides, Temporal bone—o. Linguæ, Hyoides os—o. Linguale, Hyoides os—o. Lithoides, Temporal bone — o. Magnum, neck of the, Collum ossis magni — *o. Malaire*, Malæ os — o. Malare, Malæ os — o. Maxillæ superioris undecimum, Vomer—*o. Maxillaire inférieure*, Collum mandibulæ—o. Memento mori, Temporal bone—o. Memoriæ, Occipital bone — o. Mendosum, Temporal bone — o. Morsus Adami, Thyroid cartilage — o. Mucronatum, Xiphoid cartilage—o. Multangulum majus, Trapezium os — o. Multangulum minus, Trapezoides os — o. Multiforme, Ethmoid, Sphenoid—*o. Nasaux*, Nasal bones—o. Naviculare, Os scaphoides—o. Nervale, Temporal bone—o. Nervosum, Occipital bone—o. Occipiti, Occipital bone —o. Orbiculare, Os pisiforme—*o. du Palais*, Palate bone — o. Palati, Palate bone — *o. Palatin*, Palate bone — o. Papillare, Sphenoid — o. Parietale inferius, Temporal bone—o. Paxillare, Sphenoid — o. Pectinis, Pubis, os — o. Pectoris, Sternum — o. Pelvi-cephalicum, Occipital bone — o. Pelvis laterale, Innominatum os — o. Perone, Fibula—o. Petrosum, Temporal bone—o. Polymorphon, Sphenoid—*o. de la Pommette*, Malæ os—o. Posterum, Pharynx—o. Præruptæ rupi assimilatum, Temporal bone — o. Procubitale, Ulna — *o. Propres du nez*, Nasal bones — o. Proræ, Frontal bone, Occipital bone—o. Pterygoideum, Sphenoid —o. Pudicum, Malæ os—o. Puppis, Frontal bone, Occipital bone—o. Pyramidale carpi, Trapezoides os—o. Pyxidis, Occipital bone—o. Rationis, Frontal bone—*o. du Rayon*, Radius — o. Sacrum, Sacrum—o. Saxeum, Temporal bone—o. Scutiforme, Patella—*o. de Sèche*, Sepia—o. Sedentarium, see Ischiatic—o. Semilunare, Lunare os—o. Sextum anii, Occipital bone — *o. du Sinciput*, Parietal bones, see Sinciput — *o. Sous-ethmoïdal*, Turbinated bone, inferior — o. Spheno-basilare, Occipital bone—o. Sphecoideum, Sphenoid—o. Sphenoidale, Sphenoid—o. Sphenoides, Sphenoid—o. Spongiosum, Ethmoid — o. Spongiosum inferius, Turbinated bone, inferior — o. Spongiosum medium, Turbinated bone, middle — o. Spongiosum superius, Turbinated bone, middle, Turbinated bone, superior — o. Spongoides, Ethmoid — o. Squamosum, Temporal bone — o. Suboculare, Malæ os—*o. Surnuméraires*, Wormiana ossa—*o. Suemaxillaire*, Maxillary (superior) bone — o. Sylvii, Os orbiculare—o. Synecipitis, Frontal bone — o. Temporis, Temporal bone — o. Tesseræ, Astragalus, Cuboid—o. Thyreoides, Patella—o. Tibiæ minus, Fibula—o. Tincæ, Os uteri—*o. Triangulaires*, Wormiana ossa — o. Turbinatum, Turbinated bone, middle—o. Turbinatum inferius, Turbinated bone, inferior — o. Uncinatum, Os uncinforme — o. Upsiloides, Hyoides os.

Os U'teri, *Os tincæ* seu *inter'num* seu *amphid'eon* seu *amphid'eum, Protos'porus, Os'cheon, Hysteros'toma, Os'culum* seu *orific''ium u'teri, Hysterostom'ium, Hysteros'toma*, (F.) *Museau de Tanche.* The mouth of the womb, see Uterus.

Os Uteri Externum, see Uterus—o. Uteri internum, see Uterus—o. Varium, Cuboid—o. Vespiforme, Sphenoid — o. Vomeris, Vomer — *o. Wormiens*, Wormiana ossa — o. Xiphoides, Sternum — o. Ypseloides, Hyoides os — o. Zygomaticum, Malæ os.

OSCEDO, Yawning.

OSCHÆMATŒDE'MA, *Oschæmœde'ma, Œde'ma scroti cruen'tum ;* from *οσχεον*, 'the scrotum,' and *κηλη*, 'tumour;' *Scrotal hernia*, see Bubonocele. Sauvages uses *oschecocle* in the sense of *Dropsy of the scrotum*, see Hydrocele.

Oschæmatœdema, Oschæmatocèle — o. Flatulenta, Physocele—o. Hydatidosa, Hydatidocele —o. Œdematica, Œdematoscheocele—o. Seminalis, Spermatocele—o. Urinalis, Urocele—o. Varicosa, Varicocele.

OSCHÉOCHALASIE, from *οσχεον*, 'the scrotum,' and *χαλασις*, 'relaxation.' A tumour resulting from hypertrophy of the areolar tissue of the scrotum, and the excessive extension of the skin of the part,—an affection which has been confounded with sarcocele.—Alibert.

OSCHEON, Scrotum, Os uteri.

OSCHEON'CUS, *Oschon'cus, Oscheophy'ma, Oschophy'ma*, from *oscheon*, and *ογκος*, 'a tumour.' A preternatural swelling of the scrotum.

OSCHEOPHYMA, Oscheoncus.

OSCHEOPLAS'TIC, *Oscheoplas'ticus*, from *oscheon*,' and *πλασσω*, 'I form.' An epithet given to the operation for restoring the scrotum when lost. *Os'cheoplasty.*

OSCHEOPŸŒDE'MA, *Oschopyœde'ma, Œde'ma scroti purulen'tum.* Purulent tumefaction of the scrotum.

OSCHEUS, Scrotum.

OSCHION. The raised margin of the os uteri. According to some, an excrescence from the os uteri.

OSCHI'TIS, *Orchei'tis, Oschei'tis, Inflamma'tio scroti*, from *oscheon*, and *itis*, 'inflammation.' Inflammation of the scrotum.

OSCHOCARCINOMA, Cancer, chimney-sweepers'.

OSCHOCELE, Oscheocele, Scrotocele.

OSCHONCUS, Oscheoncus.

OSCHOPHYMA, Oscheoncus.

OSCHOPYŒDEMA. Oscheopyœdema.

OSCHURŒDE'MA; from *oscheon*, *ουρον*, 'urine,' and *οἰδημα*, 'œdema.' Œdema from effusion of urine into the scrotum.

OSCHUS, Scrotum.

OSCHYDRŒDE'MA, from *oscheon*, *'ὑδωρ*, 'water,' and *οἰδημα*, 'œdema.' *Œdema scroti aquo'sum.* Watery œdema of the scrotum.

OSCILLA'TIO, Irritability, Oscillation.

OSCILLA'TION, *Oscilla'tio*; from *oscillum*, 'an image, perhaps of Bacchus, hung on ropes, and swung up and down in the air.' Vibration, *Vibra'men*, *Vibra'tio*, *Vibra'tus*. Also, a partial rotatory movement of the eyeball to and from its antero-posterior axis.

OS'CITANT (FEVER), *Febris os'citans*, (F.) *Fièvre oscitante*, from *oscitare*, 'to yawn.' A fever, in which the patient is continually yawning.

OSCITATIO, Yawning.

OSCULATORIUS, Orbicularis oris.

OSCULUM UTERI, Os uteri.

OSCUS, Scrotum.

OSEILLE, Rumex acetosus—*o. Boucher*, Rumex scutatus — *o. Petite*, Rumex scutatus — *o. Ronde*, Rumex scutatus — *o. Rouge*, Rumex sanguineus.

OSIER, Salix alba—o. red, Cornus sericea.

OS'MAZOME, *Os'mozome*, *Osmazo'ma*, *Osmozo'ma*, *Os'mazone*, *Zomod'mum*, (F.) *Matière extractive du Bouillon*, *Extrait de viande*; *Extrac'tive* or *Saponaceous extract of meat*; from *οσμη*, 'smell,' and *ζωμος*, 'soup.' M. Thénard gave this name to an extractive matter, contained in muscular flesh and in the blood of animals, which he considers of a peculiar nature. It has an agreeable smell and taste, and is found in *Bouillons* of meat, in the proportion of one part to seven of gelatin. Vauquelin discovered in it some fungi. It is the substance which gives the flavour of meat to soups, and hence its name. It is a mixture of different crystallizable and uncrystallizable principles with empyreumatic products.

Osmazome has been prescribed in the dose of ℥ss to ℥j, in broth or in powder, with aromatics, as a stimulant to the digestive actions and a restorer of appetite in convalescence. An *Osmazome choc'olate*, *Chocola'ta cum osmazo'ma*, has been introduced as an analeptic article of diet. It consists of *chocolate* ℔j to *osmazome* ℥j.

OSME, Odour.

OSMESIS, Olfaction.

OSMIDRO'SIS, from *οσμη*, 'odour,' and *ἱδρως*, 'sweat.' Perspiration of an unusual odour.

OSMITOPS'IS ASTERISCOÏ'DES, *Bellis*. A plant, of the Cape of Good Hope, which, from its smell and taste, seems to contain camphor; hence its antispasmodic virtues. In infusion, it is often beneficially employed in cough, hoarseness, and diseases of the chest generally, and is said to be serviceable in flatulent colic. Infused in spirit, *spir'itus bell'idis*, it has been used successfully as an external remedy in paralysis.

OSMOMETRICUS SENSUS, Olfaction.

OSMON'OSI, *Osmonu'si*, *Morbi olfac'tûs*, from *οσμη*, 'odour,' and *νοσος*, 'a disease.' Diseases of olfaction.

OSMONOSOLOG''IA, from *οσμη*, 'odour,' *νοσος*, 'disease,' and *λογος*, 'description.' The doctrine of, or a treatise on, the diseases of the sense of smell.

OSMORRHI'ZA LONGIS'TYLIS, (*οσμη*, 'a scent,' and *ριζα*, 'a root.') *Sweet Cic''ely*. An indigenous plant, *Order*, Umbelliferæ, which flowers in May and June. It is an agreeable aromatic, having much of the flavour of anise.

OSMOSE, *Osmo'sis*; from *ωσμος*, 'impulse.' The action by which fluids are impelled through moist membrane and other porous septa, in endosmotic and exosmotic experiments.

OSMOT'IC, *Osmot'icus*, same etymon. Relating or belonging to osmose: as "*osmotic* force," the force which induces osmose.

OSMOZOME, Osmazome.

OSMUND, ROYAL, Osmunda regalis.

OSMUN'DA CINNAMO'MEA, *Cinnamon Fern*. Indigenous; *Order*, Filices; is regarded to be demulcent, subastringent, and tonic. Boiled in milk, it yields a fine mucilage, which is useful in diarrhœa.

OSMUN'DA REGA'LIS, *O. spectab'ilis*, *Filix Flor'ida*, *Flow'ering Fern*, *Osmund-royal*. This plant was once thought to possess astringent and emmenagogue virtues.

OSMUNDA SPECTABILIS, O. regalis.

OSORON, Opium.

OSPHRANTERICUS, Olfactory.

OSPHRANTICOS, Olfactory

OSPHRASIA, Olfaction.

OSPHRESIOL'OGY, *Osphresiolog''ia*, from *οσφρησις*, 'olfaction,' and *λογος*, 'a discourse.' A treatise on olfaction and odours.

OSPHRESIS, Olfaction.

OSPHRETICUS, Olfactory.

OSPHRIS'TICE, from *οσφρησις*, 'olfaction.' The doctrine of the phenomena of odours.

OSPHYALGEMA, Coxalgia.

OSPHYALGIA, Coxalgia.

OSPHYARTHRITIS, Osphyitis.

OSPHYARTHROCACE, Coxarum morbus.

OSPHYI'TIS, *Osphy'tis*, *Osphyarthri'tis*, *Inflamma'tio coxæ*, from *οσφυς*, 'the hip,' and *itis*, denoting inflammation. Inflammation of the parts about the hip.

OSPHYRRHEUMA, Lumbago.

OSPHYS, Haunch, Lumbi.

OSPHYTIS, Osphyitis.

OSSA BREGMATIS, Parietal bones—o. Convoluta inferiora, Turbinated bones, inferior — o. Digitorum manûs, Phalanges of the fingers — o. Digitorum pedis, Phalanges of the toes—o. Epactalia, Wormiana ossa — o. Maxillæ superioris quarta seu quinta seu secunda, Nasal bones — o. Nasalia, Nasal bones — o. Nasi, Nasal bones — o. Nervalia, Parietal bones—o. Pisiformia lingualia, see Hyoides, os—o. Raphogeminantia, Wormiana ossa — o. Sesamoidea, Sesamoid bones — o. Sincipitis, Parietal bones—o. Spongiosa, Turbinated bones—o. Suturarum, Wormiana ossa—o. Tertia maxillæ superioris, Turbinated bones — o. Tetragona, Parietal bones—o. Triangularia, Sphenoidal cornua — o. Triangularia Blasii, Wormiana ossa — o. Triquetra, Wormiana ossa — o. Triticea, see Hyoides, os—o. Turbinata, Turbinated bones—o. Verticalia, Parietal bones.

OSSEINE, Osteine.

OSSELETS DE BERTIN, Sphenoidalia cornua — *o. de l'Oreille*, Ossicula auditûs — *o. de l'Ouie*, Ossicula auditûs—*o. du Tympan*, Ossicula auditûs.

OSSEOUS, *Os'seus*, *Osto'des*, *Ostoï'des*, *Ostoid*, (F.) *Osseux*; from *os*, 'a bone.' Bony. Resembling bone.

OSSICLES, Ossicula, see Ossiculum.

OSSICULA, see Ossiculum.

OSSIC'ULA AUDI'TÛS, *O. Auris*, (F.) *Osselets de l'oreille* ou *de l'ouie* ou *du tympan*. The small bones or *ossicles* situate in the cavity of the tympanum, and forming an uninterrupted chain from the membrane of the tympanum to that of the fenestra ovalis. They are four in number; and their series, from without to within, is as follows: *Malleus*, *Incus*, *Os orbiculare*, *Stapes*.

OSSICULA BERTINI, Sphenoidalia cornua — o. Innominata, Innominata minora ossa — o. Nasi, Nasal bones—o. Sesamoidea, Sesamoid bones—o. Triticea, see Hyoides, os.

OSSIC'ULUM, (plural *Ossic'ula,*) *Osta'rion, Os'sicle.* Diminutive of *os, ossis,* 'a bone.' A small bone. See Os.

OSSICULUM COCHLEARE, Orbicular bone — o. Incudi Comparatum, Incus — o. Malleolo assimilatum, Malleus — o. Molari denti comparatum, Incus — o. Orbiculare, Orbicular bone — o. Quartum, Orbicular bone — o. Squamosum, Orbicular bone.

OSSIFICA'TION, *Ossifica'tio, Ossifac'tio,* from *os,* 'a bone,' and *facere,* 'to make.' *Osteogen'ia, Osteogen'esis, Osteo'sis, Osto'sis.* Formation of bone. Development or increase of the osseous system. Ossification takes place in the same manner as the nutrition of other organs. The bones are, at first, mucous, and afterwards cartilaginous; the cartilage, at length, receives the phosphate of lime, and is, at the same time, replaced by a gelatinous parenchyma, when the bone has acquired the whole of its development.

OSSIFICATION, POINTS OF, *Puncta* seu *Nu'clei ossificatio'nis, Nu'clei ossei,* are the points where the ossification of a bone commences, whence it extends to other parts. Almost all the bones present a greater or less number of points of ossification. Besides the natural ossification, which we observe in the fœtus and in the first periods of life, there are also *accident'al ossifications,* such as those frequently remarked after the inflammation of serous membranes, in the parietes of arteries, and to which the terms *Osthex'ia, Incruста'tion* and *Petrifac'tion* have, sometimes, been applied.

OSSIFRAGA, Osteocolla.

OSSIS SACRI ACUMEN, Coccyx.

OSSISANA, Osteocolla.

OSSIV'OROUS, from *os, ossis,* 'a bone,' and *voro,* 'I devour.' A species of tumour, mentioned by Ruysch, which destroys bone.

OS'TAGRA, *Os'teagra,* from *οστεον,* 'a bone,' and *αγρα,* 'seizure.' A forceps to cut or remove portions of bone.

OSTALGIA, Osteocopus.

OSTARIUM, Ossiculum.

OSTARTHRITIS, Arthrophlogosis.

OSTARTHROCACE, Spina ventosa.

OSTEAGRA, Ostagra.

OSTEALGIA, Osteocopus.

OSTÉIDE, Osteoïd.

OS'TEINE, *Osseine,* from *οστεον,* 'a bone.' The animal matter of bone.

OSTEITES, Osteocolla.

OSTEI'TIS, *Osti'tis,* from *οστεον,* 'a bone,' and *itis. Inflamma'tio Ossis.* Inflammation of bone; characterized by violent shooting and lancinating pains in a bone.

OSTEMPYE'SIS, *Osteëmpye'sis, Ostempyo'sis,* from *οστεον,* 'a bone,' and *εμπυησις, (εν,* and *πυον,)* 'effusion of pus.' An abscess in the interior of a bone.

OSTEMPYOSIS, Ostempyesis.

OSTEOANABROSIS, Osteonabrosis.

OSTEOCE'LE, from *οστεον,* 'a bone,' and *κηλη,* 'a tumour.' A hernia in which the sac is cartilaginous and bony:—a rare case. Also, osseous induration of one or both testicles.

OSTEOCLASIS, Fracture.

OSTEOCOL'LA, from *οστεον,* 'a bone,' and *κολλα,* 'glue.' *Glue-bone, Stone* or *Bone binder; Ossif'raga, Holos'teus, Ossisa'na, Ostri'tes, Ostei'tes, Amos'teus, Osteol'ithos, Stelochi'tes.* A name given to petrified carbonate of lime, found in some parts of Germany and other portions of the globe; so called, because it has been supposed to possess the power of favouring the formation of *callus* in fractures. It is the *Chaux carbonatée concretionnée incrustante* of Haüy. Not used.

OSTEOC'OPUS, *Osteal'gia, Ostal'gia, Osteodyn'ia,* from *οστεον,* 'a bone,' and *κοπος,* 'fatigue. *Boneach, Bone-ague.* Pain in the bones,—as in syphilis.

OSTEOCYST'OID, *Osteocystoï'des,* from *οστεον,* 'a bone,' *κυστις,* 'a sack or cyst,' and *ειδος,* 'appearance.' A morbid growth in bone, consisting of the formation of cysts filled with puriform or other fluid.

OSTEODENTINE, see Tooth.

OSTEODYNIA, Osteocopus.

OSTEOGANGRÆNA, Necrosis.

OSTEOGENIA, Ossification.

OSTEOG'RAPHY, *Osteogra'phia,* from *οστεον,* 'a bone,' and *γραφειν,* 'to describe.' Description of the bones. The part of anatomy which describes the bones.

OSTEOHELCOSIS, Caries.

OS'TEOID, *Osteoï'des,* (F.) *Ostéide,* from *οστεον,* 'bone,' and *ειδος,* 'appearance.' An accidental bony production, or more frequently a morbid production, which is a calcareous incrustation of the normal tissue or of fibrous tumours.

OSTEOLITHOS, Osteocolla.

OSTEOL'OGY, *Osteolog''ia,* from *οστεον,* 'a bone,' and *λογος,* 'a discourse.' The part of anatomy which treats of bones.

OSTEOLYO'SIS, from *οστεον,* 'a bone,' and *λυω,* 'I dissolve.' Necrosis or death of the bone, as in hospital gangrene, in which the dead parts are of soft consistence.

OSTEOMA, Exostosis.

OSTEOMALACIA, Mollities ossium — o. Infantum, Rachitis.

OSTEOMALACOSIS, Mollities ossium.

OSTEOMYELITIS, Medullitis.

OSTEON, Bone — o. Hieron, Sacrum.

OSTEONABRO'SIS, *Osteoanabro'sis,* from *οστεον,* 'a bone,' *α* priv., and *βρωσις,* 'nutriment.' Atrophy of the osseous texture marked by diminution of volume.

OSTEON'CUS, from *οστεον,* 'a bone,' and *ογκος,* 'a tumour.' A bony tumour.

OSTEONECROSIS, Necrosis.

OSTEON'OSI, *Osteonu'si,* from *οστεον,* 'a bone,' and *νοσος,* 'a disease.' *Mor'bi os'sium.* Diseases of the bones.

OSTEOPÆDION, Lithopædion.

OSTEOPALIN'CLASIS, from *οστεον,* 'a bone,' *παλιν,* 'again,' and *κλασις,* 'fracture.' The breaking again of a bone which has united unfavourably.

OSTEOPHY'MA, Osteoncus. Sometimes used in the sense of Exostosis. By Lobstein applied to bony productions originating in the deep-seated layers of the periosteum, in the vicinity of a carious bone, and which seem to be intended to obviate the weakness resulting from the destruction of the bone.

OSTEOPHYTE, Exostosis.

OSTEOPH'YTON, *Os'teophyte,* from *οστεον,* 'a bone,' and *φυω,* 'I grow.' Under this name, Rokitansky describes a deposition of bony matter, found by him on the inner surface of the parietes of the skull of pregnant women.

OS'TEOPLASTY, (F.) *Ostéoplastie,* from *οστεον,* 'a bone,' and *πλασσειν,* 'to form.' An operation by which the total or partial loss of a bone is remedied.

OSTEOPLEU'RA, *Pleurosto'sis,* from *οστεον,* 'a bone,' and *πλευρον,* 'a rib.' Ossification of the cartilages of the ribs.

OSTEOPORO'SIS, *Osteosclero'sis,* from *οστεον,* 'a bone,' and *πωρωσις,* 'induration.' Induration of a bone, from the deposition of too much bony matter. Also, a bony degeneration, which consists in too great porosity with hardening. [?]

OSTEOPSATHYROSIS, Fragilitas ossium.

OSTEO-SARCO'MA, *Osteo-sarco'sis, Sarcosto'sis, Hæmatexosto'sis,* from *οστεον,* 'bone,' and *σαρξ,*

σαρκος, 'flesh.' Disease of the bony tissue, which consists in softening of its laminæ, and their transformation into a fleshy substance, analogous to that of cancer; accompanied with general symptoms of cancerous affection. The word has often, also, been used synonymously with spina ventosa.

OSTEOSARCOSIS, Osteosarcoma.

OSTEOSCLEROSIS, Osteoporosis.

OSTEOSIS, Ossification.

OSTEO-STEATO'MA, *Exosto'sis steatomato'des*, from οστεον, 'a bone,' and στεαρ, στεατος, 'suet or fat.' A name given to bony tumours or degenerations, which sometimes belong to osteo-sarcoma; at others, to spina ventosa, exostosis, &c.

OSTÉOTOME; same etymon as Osteotomy. A bone saw, which has the form of a chain.—Nysten.

OSTEOT'OMIST, *Osteotomis'ta*. Same etymon as the next. An instrument, invented by Dr. D. Davis, for cutting the bones of the fœtal cranium, where it becomes necessary to greatly reduce the size of the head in parturition.

OSTEOT'OMY, *Osteotom'ia*, from οστεον, 'a bone,' and τεμνειν, 'to cut,' (τομη, 'an incision.') The part of practical anatomy whose object is the dissection of bones.

OSTEOTOPHUS, Tophus.

OSTEOTYLUS, Callus.

OSTEULCUM, Bone-nippers.

OSTEUM, Bone.

OSTHEXIA, see Ossification.

OSTIARIUS, Pylorus.

OSTIOLUM, diminutive of οστιον, 'a mouth or opening.' A small door or gate.

OSTIOLA CORDIS, *Val'vulæ cordis, Pellic'ulæ cordis.* The valves of the heart.

OSTITIS, Osteitis.

OS'TIUM, οστιον, *Orific''ium*, a door or gate, —of the heart, for example. The opening—*Os'tium atrioventricula'rē* seu *ventric'uli veno'sum*—between the auricle and ventricle of each side. *Os'tium ventric'uli arterio'sum*, is the opening at the origin of the pulmonary artery and aorta.

OSTIUM ABDOMINALE, see Tube, Fallopian—o. Arteriosum, see Ostium—o. Atrioventriculare, see Ostium—o. Duodenale ventriculi, Pylorus—o. Internum, see Ostium uteri—o. Œsophageum, Cardia.

OSTIUM U'TERI. The vulva; the vagina. The term *Os'tium inter'num* has been applied to the inferior opening of the uterus, which establishes a free communication between the cavities of the body and neck, and which is often obliterated in old women.—Cruveilhier. The neck of the uterus; the mouth of the uterus. See Uterus.

OSTIUM UTERINUM, see Tube, Fallopian—o. Venosum, see Ostium—o. Ventriculi Duodenale seu Pyloricum seu Dextrum seu Inferius, Pylorus.

OSTODES, Osseous.

OSTOIDEA SUBSTANTIA, see Tooth.

OSTOID, Osseous.

OSTOMA, Exostosis.

OSTOSIS, Ossification.

OS'TREA, *Os'treum*, οστρεον, οστρειον, *Os'trea edu'lis*, (F.) *Huître. Class*, Acephala. The oyster. The oyster is a wholesome article of diet, often advised as analeptic and easy of digestion.

The shells, *Testæ Os'treæ, Testa* (Ph. U. S.), (F.) *Écailles d'huîtres*, have been received into the Pharmacopœias, and used medicinally. Their virtues are similar to those of the carbonate of lime. See Creta.

OSTREUM, Ostrea.

OSTRITES, Osteocolla.

OSTRUTHIUM, Imperatoria.

OSWEGO TEA, Monarda coccinea.

OSYRIS, Antirhinum linaria.

OTACOUST'IC, *Otacous'ticus*, from ους, ωτος, 'the ear,' and ακουω, 'I listen.' Any instrument is so called which improves the sense of hearing, —as the different species of trumpets.

OTAGRA, Otalgia.

OTAL'GIA. *Ot'agra, Otod'ynē, Otal'gy*, (F.) *Otalgie*, from ους, ωτος, 'the ear,' and αλγος, 'pain.' Pain in the ear; *Dolor au'rium, Spas'mus au'rium, Ear-ache.* See Otitis.

OTAL'GIC, *Otal'gicus*, (F.) *Otalgique.* An epithet for remedies used in otalgia.

OTECHUS, Tinnitus aurium.

OTEMPLAS'TRUM, *Otoplas'ta, Otoplas'trum*, from *ous, otos*, and εμπλαστρον, 'a plaster. A plaster put behind the ears.

OTEN'CHYTES, *Oten'chyta*, from *ous, otos*, εν, 'into,' and χυω, 'I pour.' *Sipho auricula'ris.* A species of syringe, used for injecting the ear.

OTHELCO'SIS, from *ous, otos*, and 'ελκωσις, 'ulceration.' Ulceration or suppuration of the ear.

OTHONE, Linteum.

OTHONION, Linteum.

OTHYGROTES, Otirrhœa.

OTIATER, Aurist.

OTIATRI'A, *Otiat'rice*, from *ous, otos*, and ιατρεια, 'medicine.' The business of the aurist. The management of diseases of the ear; *Aural Medicine* and *Surgery, Ear Surgery.*

OTIATRICE, Otiatria.

OTIATRUS, Aurist.

O'TIC, *O'ticus*, (F.) *Otique*, from *ous, otos.* Belonging or relating to the ear. A medicine employed in diseases of the ear.

OTIC GANGLION, *Otogan'glium, Gang'lion auricula'rē* seu *o'ticum, Auric'ular ganglion, Ganglion of Arnold*, (F.) *Ganglion maxillo-tympanique.* This is a small ganglion, although more than double the size of the ophthalmic, ash-coloured and pulpy like the ganglions of the sympathetic. It is situate in advance of the ganglion of Gasser, on the lower surface of the inferior maxillary nerve, at the inner margin of the foramen ovale of the sphenoid bone. See Petrous ganglion.

OTIRRHŒ'A, *Otorrhœ'a, Othy'grotes, Blennotorrhœ'a*, (F.) *Catarrhe de l'Oreille*, from *ous, otos*, and ρεω, 'I flow.' Discharge of a purulent or puriform liquid, from the meatus auditorius externus, *P'yorrhœ'a au'rium, Otopyorrhœ'a, Pyaotorrhœ'a, Otorrhœ'a purulen'ta.* It is a symptom of chronic otitis. Some authors, have, indeed, used the term synonymously with chronic otitis. When it extends to the brain, it is termed *cer'ebral otorrhœ'a;* and when from the middle or internal ear, it is termed *internal otorrhœa, Otorrhœ'a inter'na*, and *Entotorrhœ'a.*

OTIRRHŒA CEREBRAL, see Otirrhœa.

OTITES, see Digitus.

OTI'TIS, *Otophleg'monē, Empres'ma otitis, Inflamma'tio auris, Inflammation of the ear*, (F.) *Otite, Inflammation de l'oreille*, from *ous, otos*, and *itis*, denoting inflammation. Inflammation of the mucous membrane of the ear, characterized by excruciating pain; intolerable humming in the ear, with a discharge of mucus generally from the meatus externus or from the Eustachian tube. When the inflammation is restricted to the lining membrane of the meatus, it is termed *otitis catarrha'lis.* Otitis is divided into *external* and *internal*, according as it affects the meatus auditorius, or the cavity of the tympanum or internal ear. It may be *acute* or *chronic. Acute otitis* commonly terminates in a few days in a favourable manner, with the aid of antiphlogistics. *Chronic otitis, otirrhœ'a*, is almost always accompanied by a purulent discharge from the meatus auditorius. It is often incurable, and may ultimately give occasion to disease of the internal ear, and even of the brain.

OTITIS CATARRHALIS, see Otitis.

O'TIUM, *Otæ'rium*, from *ous, otos*. A small ear. The auricle or pavilion of the ear.

OTOCEPH'ALUS, *Mono'tia*, from *ous, otos*, and *κεφαλη*, 'head.' A monster, whose ears are in contact, or united into one.

OTOCONIES, see Otolithi.

OTODYNE, Otalgia.

OTOGLYPHIS, Earpick.

OTOGLYPHUM, Earpick.

OTOG'RAPHY, *Otogra'phia*, from *ous, otos*, and *γραφη*, 'a description.' The part of anatomy which describes the ear.

OT'OLITHS, *Otol'ithi, O'tolites*, (F.) *Otolithes*, from *ous, otos*, and *λιθος*, 'a stone.' White calcareous substances contained in the membranous vestibule, and seeming to be suspended in the fluid of the vestibule by means of a number of nervous filaments proceeding from the auditory nerve. Their universal presence in the ear of the mammalia would seem to show that they are inservient to audition. When of a looser consistence, they are called *Otocon'ia*, (F.) *Otoconies*, from *ους, ωτος*, 'the ear,' and *κονια*, 'dust.'

OTOL'OGY, *Otolog'ia*, from *ous, otos*, and *λογος*, 'a discourse.' The part of anatomy which treats of the ear. An anatomical treatise on the ear.

OTOPATHEMA, Otopathy.

OTOP'ATHY, *Otopathi'a, Otopathe'ma*, from *ous, otos*, and *παθος*, 'a disease.' A diseased condition of the ear.

OTOPHLEGMONE, Otitis.

OTOPLASTA, Otemplastrum.

OTOPLAS'TICE, *O'toplasty*, from *ous, otos*, and *πλαστικος*, 'forming.' The operation for restoring a lost ear.

OTOPLASTRUM, Otemplastrum.

OTOPYORRHŒA, Otirrhœa.

OTORRHAG''IA, from *ous, otos*, and *ραγη*, 'rupture.' Bleeding from the ear or ears.

OTORRHEUMATIS'MUS, from *ous, otos*, and *ρευματισμος*, 'rheumatism;' *Otal'gia rheumat'ica*. Rheumatic ear-ache.

OTORRHŒA. Otirrhœa—o. Cerebral, see Otirrhœa — o. Interna, see Otirrhœa — o. Purulenta, Otirrhœa.

O'TOSCOPE, *Otoscop'ium*, from *ous, otos*, and *σκοπη*, 'examination.' An instrument for examining the condition of the ear. An elastic stethoscope, the ends of which are tipped with ivory—one to be inserted into the meatus of the patient, and the other applied to the ear of the examiner.

OTOT'OMY, *Ototom'ia*, from *ous, otos*, and *τεμνειν*, 'to cut.' The part of practical anatomy which teaches the mode of dissecting and preparing the ear.

OTTO OF ROSES, see Rosa centifolia.

OUACHITA SPRINGS, see Arkansas, mineral waters of.

OUÏE, Audition.

OULA, Gingivæ.

OULE, Cicatrix.

OULITIS, Ulitis.

OULORRHAGIA, Ulorrhagia.

OUNCE. *Un'cia*. A weight equal to the 16th part of a pound avoirdupois, the 12th of a pound troy. It is composed of 8 drachms. See Weights and Measures.

OURAQUE, Urachus.

OURARI, Curare.

OUREMA, Urine.

OURLES, Parotis, Cynanche parotidæa.

OURON, Urine.

OUS, genitive *otos, ους, ωτος*, Ear.

OUTHAR, Mamma, Uterus.

OUTRE-MER, Lapis lazuli.

OUVERTURE CADAVERIQUE, Autopsia cadaverica.

OVA GRAAFIANA, Folliculi Graafiani — o. Nabothi, Nabothi glandulæ.

OVAIRE, Ovarium.

OVAL, *Ova'lis, Oö'des, Oöi'des, Ova'tus*, (F.) *Ovale*, from *ωον, ovum*, 'an egg.' Egg-shaped; elliptic. That which is round and oblong like an egg.

OVALE FORA'MEN, *Foramen oö'des*, (F.) *Trou ovale*. The foramen obturatorium; also, the foramen in the inner paries of the middle ear, which opens into the vestibule; the foramen in the sphenoid bone, through which the third branch of the fifth pair issues from the cranium; and the aperture, in the fœtus, between the auricles of the heart. See Botal Foramen.

OVALIS FOSSA, *Fo'vea ova'lis, Val'vula* seu *Vestig''ium Foram'inis ovalis*, is a depression observed in the right auricle of the heart, in the septum, which separates it from the left auricle. It has thick and strong edges, at its upper and fore part, called *Colum'næ foram'inis ova'lis, Isthmus* seu *An'nulus Vieussen'ii, An'nulus* seu *Limbus fossæ ovalis*: in the fœtus called *An'nulus foram'inis* seu *fossæ ova'lis*. The fossa ovalis, in the adult, replaces the inter-auricular aperture in the septum auriculorum of the fœtus.

OVALBUMEN, Albumen ovi.

OVA'RIAN, *Ova'rial, Ovaria'nus*, (F.) *Ovarien, Ovarique*; from *ovarium, ωαριον*, 'the ovary.' Relating or belonging to the ovary—as *Ovarian pregnancy*.

OVARIAN ARTERY, Spermatic artery—o. Nerves, Spermatic plexus of nerves — o. Pregnancy, see Pregnancy, ovarian—o. Veins. Spermatic veins—o. Vesicles, Folliculi Graafiani.

OVARIOTOMY, Oariotomy.

O'VARISTS, *Ovists*. Same etymon as Ovarian. Those physiologists who think that the phenomena of generation, in the human species and in every species of animal, result from the development of the ova or ovula of the female, merely incited by the male. Not many of the physiologists of the present day can be classed among the ovarists.

OVARITIS, Oaritis.

OVA'RIUM. Diminutive of *ωον, ovum*, 'an egg.' The *O'vary*, (Sc.) *Eggbed; Testis mulie'bris* seu *femine'us, Oa'rion, Ooph'oron, Gynoca'rium, Vesica'rium*, (F.) *Ovaire*. The ovaries are the organs in which the ova are formed in oviparous animals. By analogy, the name has been given to the organs which the ancients called the *testicles* of the female. They are two ovoid bodies, almost as large as the testicles in men, placed on each side of the uterus, between the Fallopian tube and round ligament, and in the substance of the broad ligament. Their outer extremity gives attachment to one of the projections of the fimbriated extremity of the Fallopian tube; and the internal is fixed to the uterus by a small ligamentous cord, called *Ligamen'tum rotun'dum ova'rii, Lig'ament of the O'vary*. The ovaries are composed of a very close, spongy texture—*stroma*,—and of small vesicles—*Follic'uli Graafia'ni*,— filled with a clear fluid: these vesicles contain ovules, which detach themselves from the ovarium before and after fecundation, and are carried into the cavity of the uterus by the Fallopian tube.

OVARIUM TUMIDUM, Oariocuus — o. Nabothi, Nabothi glandulæ.

OVATUS, Oval.

OVER-EATING, COLIC FROM, Colica crapulosa.

OVERO BUTUA, Pareira brava.

OVICAPSULE, see Folliculi Graafiani.

OVIDUCT, Tube, Fallopian.

OVIDUCTUS MULIEBRIS, Tuba Fallopiana.

OVIG''EROUS, *O'viger, Ovig''erus*; from

ovum, 'an egg,' and *gero*, 'I bear.' Containing or producing ova or eggs.

OVIPARITÉ, see Oviparous.

OVIP'AROUS, *Ovip'arus*, (F.) *Ovipare*; from *ovum*, 'an egg,' and *pario*, 'I bring forth.' An epithet applied to animals which are hatched from eggs outside of the body. The condition may be termed *Ovip'arousness*, (F.) *Oviparité*. See Generation.

OVIPAROUSNESS, see Oviparous.

OVISAC, see Folliculi Graafiani — o. Tunic of the, see Folliculi Graafiani.

OVISTS, Ovarists.

OVOLOGY, Oology.

OVO-VIVIP'AROUS, (F.) *Ovo-vivipare*, from *ovum*, 'an egg,' *vivus*, 'living,' and *pario*, 'I bring forth.' Oviparous animals, whose ova are hatched within the mother,—vipers, for example. See Generation.

OVULA GRAAFIANA, Folliculi Graafiani — o. Nabothi, Nabothi glandulæ.

O'VULAR, *Ovula'ris*; from *ovulum*, 'an ovule.' Relating or belonging to the ovule.

OVULA'TION; from *ovulum*, diminutive of *ovum*, 'an egg.' The formation of ova in the ovary, and the discharge of the same. Also, the development of the embryo from the egg.

SPONTANEOUS OVULATION, (F.) *Ovulation spontanée*, is the spontaneous formation and discharge of ova which takes place in the female of the mammalia. See Heat.

OVULE, Ovulum.

OVULINE, Decidua reflexa.

O'VULUM, *O'vule*; diminutive of *ovum*, 'an egg.' A small egg. That which has the appearance of a small egg. See Ovum.

OVUM, *ωον*, *Öön*, an egg. The eggs of poultry are chiefly used as food. The different parts are, likewise, employed in medicine. The shell, *Aura'cum*, *Aura'tum*, (F.) *Coque* ou *Coquille d'œuf*, calcined, is esteemed an absorbent. The *Oil of the egg* is emollient, and is used, externally, to burns and chaps. The *Yolk* or *Yelk of the egg* — *Vitel'lus* seu *Vitel'lus ovi*, *Lec'ithos* — renders oils, &c., miscible with water. Eggs, when light boiled, are easy of digestion; but, when very hard-boiled or fried, they are more rebellious.

Egg Brandy is made by taking of *Brandy* f℥iv; *Cinnamon water*, f℥iv; the yolks of two *eggs*; *Sugar*, ℥ss; and *Oil of cinnamon*, gtt. ij. Mix the yolks of the eggs first with the water, the oil and the sugar, stirring constantly. Then add the brandy little and little, until a smooth fluid is formed. It is an agreeable mode of giving brandy in adynamic states.

In *Pharmacy*, *white of egg*, which consists chiefly of albumen, is used for clarifying syrups, &c. *Yolk of egg*, (F.) *Jaune d'œuf*, beaten up with warm water and sugar, and *aromatized* with orange-flower water, forms an emulsion, which is emollient, and known under the name *Lait de poule* or *chicken's milk*.

Anatomists give the name *Ova*, *O'vula*, *O'vules*, (F.) *Œufs*, to round vesicles, containing a humour similar to the yolk of egg, which are situate in the ovaries of the female, and, when fecundated, constitute the rudiments of the fœtus. During gestation, the embryo and its enveloping membranes retain the name *Ovum*, (F.) *Œuf*. The changes induced in the mammalia after impregnation greatly resemble those in the bird.

OVUM, Testicle — o. Hystericum, see Clavus hystericus.

OXALAS SUBPOTASSICUS, Potass, oxalate of.

OXALAT'IC, *Oxalat'icus*. Relating to *oxalates*: hence *Oxalat'ic* or *Oxalic acid Diath'esis* is the habit of body which favours the formation and deposition of oxalates from the urine.

OXAL'IC ACID, *Acidum oxali'num* seu *sacchari'num* seu *hydro-carbon'icum* seu *acetosel'læ*, seu *oxal'icum* seu *sac'chari*, *Acid of sugar* or *of sorrel*, *Car'bonous acid*, from *ὀξαλις*, 'sorrel.' An acid found in sorrel. It crystallizes in long, colourless, quadrangular prisms, and is generally found, in nature, united with lime or potassa It has been proposed, in a diluted state, as a refrigerant, but it is unnecessary; and, besides, in quantity, it is a virulently acrid poison. It is largely employed for cleaning boot-tops; and, as it strongly resembles the sulphate of magnesia, has often been taken for it. Several fatal cases are, indeed, on record. For its antidotes, &c., see Poison.

OXALIC ACID DIATHESIS, see Oxalatic.

OXALIDE, Oxalis acetosella.

OXALIS ACETOSA, Rumex acetosus.

OX'ALIS ACETOSEL'LA, *O. America'na*, *Oxys alba*, called from *ὀξυς*, 'acid,' owing to the sharpness of its juice. This systematic name of the *Woodsorrel*, *Cuckowbread*, *Sour Trefoil*, *White sorrel*, *Mountain Sorrel*, *Trifo'lium aceto'sum*, *Oxitriphyl'lum*, *Lujula*, *Alleluja*, *Acetosel'la*, *Oxyphyl'lon*, *Oxytriphyl'lon*, *Panis cu'culi*, (F.) *Surelle*, *Oxalide*, *Pain a Coucou*, *Alleluia*. *Ord.* Oxalidaceæ. *Sex. Syst.* Decandria Decagynia. This plant has a gratefully acid taste, and is used in salads. It has been esteemed refrigerant, antiscorbutic, and diuretic.

OXALIS AMERICANA, O. acetosella.

OXALIS STRICTA, *Yellow wood sorrel*; indigenous, has similar virtues.

OXALIS TUBERO'SA, *Oca*. A tuberous plant, whose oval-shaped root is used as food by the Peruvians. It is watery, has a sweetish taste, and is much liked.

OXALIUM, Potass, oxalate of.

OXAL'MĒ, from *ὀξυς*, 'acid,' and *ἁλς*, 'salt.' A mixture of vinegar and salt.

OXALU'RIA, Urine, oxalic.

OXELÆ'ON, from *ὀξυς*, 'acid,' and *ἐλαιον*, 'oil.' A mixture of vinegar and oil, used as a condiment.

OX EYE, Helenium autumnale—o. Gall, Bile of the ox.

OXÉOLÉ, *Acétolé*.

OXICÈDRE, Juniperus oxycedrus.

OXID, Oxyd.

OXIDATION, Oxydation.

OXIDE, Oxyd.

OXIDUM, Oxyd, see Oxydum.

OXI'NES, *ὀξινης*, (*οινος*,) from *ὀξυς*, 'acid.' Wine already sour, but not yet vinegar.

OXITRIPHYLLUM, Oxalis acetosella.

OXODE, Oxyd.

OXODES, Acidulous.

OXOIDES, Acidulous.

OXOS, Aceticum acidum, Acetum.

OXTER, Axilla.

OXURE, Oxyd.

OXYA, Fagus sylvatica.

OXYACANTHA, Mespilus oxyacantha.

OXYACAN'THA GALE'NI, *Ber'beris*. *B. vulga'ris*, *Spina ac'ida*, *Crespi'nus*. (F.) *Épine vinette*, *Vinettier*. *Family*, Berberideæ. *Sex. Syst.* Hexandria Monogynia. The *Barberry*. The fruit of the berries, *Barberries*, is gratefully acid, and moderately astringent. By preparing an alcoholic extract of the root and adding water to it, a pulverulent brown substance is thrown down, which, when dissolved in alcohol and evaporated, yields the bitter principle, *Berberin*, which is an excellent stomachic in the dose of 2, 5, or 10 grains.

The American Barberry, *Ber'beris Canaden'-*

sis, Pipperidge Bush, Sowberry, differs slightly from the European. It flourishes on mountains and hilly districts from Canada to Virginia.

OXYÆSTHESIA, Hyperæsthesis.

OXYAPHE, Hyperaphia.

OXYAPHIA, Hyperaphia.

OXYBAPHION, see Acetabulum.

OXYBOL'IA, from *ὀξυς*, 'quick,' and *βολη*, 'ejection.' Too rapid emission of sperm.

OXYCEDRE, Juniperus oxycedrus.

OXYCEPHA'LIA, 'Sugar-loaf head,' from *ὀξυς*, 'sharp,' and *κεφαλη*, 'head.' Monstrosity in which the head is peaked like a sugar-loaf.

OXYCOCCOS, Vaccinium oxycoccos — o. Palustris, Vaccinium oxycoccos.

OX'YCRATE, *Oxycra'tum,* from *ὀξυς*, 'acid,' and *κραω*, 'I mix;' *Posca, Phusca.* A mixture of vinegar and water; frequently used in medicine as a refrigerant and antiseptic.

OXYCRO'CEUM EMPLASTRUM, from *ὀξυς*, 'acid,' and *κροκος*, 'saffron.' A plaster, composed of *saffron, pitch, colophony, yellow wax, turpentine, galbanum, gum ammoniac, myrrh, olibanum,* and *mastic.* It was employed as a strengthening plaster.

OXYCUM, Oxygen.

OXYD, *Oxid, Oxide, Oxyde, Ox'ydum, Ox'idum,* (F.) *Oxyde, Oxode, Oxure,* from *ὀξυς*, 'acid.' A combination, not acid, of a simple body with oxygen.

Oxyd, Calculous, Oxyd, cystic — o. Vesical, Oxyd, cystic.

Oxyd, Cystic, *Cal'culous* or *Ves'ical oxyd, Cystine, Nephrine, Scor'dosmine.* A species of urinary calculus, having the shape of confused, yellowish, semi-transparent, insipid, very hard crystals. When distilled, it furnishes subcarbonate of ammonia, like all nitrogenized matters. It dissolves in the nitric, sulphuric, phosphoric, and oxalic acids.

OXYDA'TION, *Oxyda'tio, Oxida'tion, Oxygena'tion.* The action of oxydizing a body; that is, of combining it with oxygen; a combination from which results an oxyd.

OXYDE, Oxyd.

OXYDE D'ANTIMOINE SULFURÉ, Oxydum stibii sulphuratum — o. *Gris* ou *noir de Mercure,* see Hydrargyri oxydum cinereum.

OXYDER'CIA, *Oxydor'cia, Visus a'cies,* from *ὀξυς*, 'quick,' and *δερκω*, 'I see.' Sharpness of vision.

OXYDER'CICUS, *Oxyder'ces.* A medicine which sharpens the sight.

OXYDORCIA, Oxydercia.

OXYDUM, Oxid — o. Antimonii cum phosphate calcis, Antimonial powder.

Oxydum Ferri Nigrum, *Ferri ox'idum nigrum, Black oxyd of iron.* The scales, which fall from iron, when heated, consist of iron, combined with oxygen. They have been used like the chalybeates in general. The Edinburgh Pharmacopœia has a *Ferri ox'idum nigrum,* made by precipitating, by *ammonia,* a solution of the mixed *sulphates of protoxide* and *sesquioxide of iron.* An analogous preparation is in the Dublin Pharmacopœia, under the name *Ferri ox'ydum magnet'icum, Magnetic oxide of iron, Mar'tial Ethiops.*

Oxydum Ferricum Crystallizatum Nativum, Hæmatites — o. Hydrargyri completum, Hydrargyri nitrico-oxydum — o. Hydrargyricum, Hydrargyri nitrico-oxydum — o. Hydrargyricum præparatum, Hydrargyri oxydum cinereum — o. Hydrargyrosum, Hydrargyri oxydum cinereum.

Oxydum Stibii Sulphura'tum, *Hepar antimo'nii, Cro'cus metallo'rum* seu *antimo'nii,* (F.) *Oxyde d'antimoine sulfuré, Foie d'Antimoine.* This was formerly exhibited in the cure of fevers, but it is now rarely employed.

OXYDUM URICUM, Uric oxide.

OXYECOIA, Hyperacusis.

OXYG'ALA, from *ὀξυς*, 'sour,' and *γαλα*, 'milk.' Sour milk. The *Oxygala equi'num, Caracos'mos,* is reckoned amongst the delicacies of the Tartars.

OXYG'ARON, from *ὀξυς*, 'acid,' and *γαρον*, '*garum.*' A composition of garum and vinegar.

OX'YGEN, *Oxygen'ium, Empy'real, Pure, Vital* or *Dephlogis'ticated air, Oxyg''enes, Ox'ycum, Princip'ium oxyg''enans* seu *oxygenet'icum* seu *acidificans* seu *ac'idum, Elemen'tum acidificum,* (F.) *Oxygène, Air du feu;* from *ὀξυς*, 'acid,' and *γενναω*, 'I engender,' that is, *generator of acids;* and such it was believed to be, *exclusively,* at the period when the name was given to it. This is now known not to be the case. Oxygen is largely distributed in nature. It exists in the air, in water, in several acids, in all the oxyds, and in vegetable and animal substances, &c. It is obtained by decomposing the peroxyd of manganese or the chlorate of potassa by heat in close vessels. Although oxygen, in the state of admixture in which it is found in the atmosphere, is of vital importance, it cannot be respired in a pure state with impunity. Animals die in it long before the whole of the oxygen is consumed. The properties of oxygen seem to be stimulant. It increases the force and velocity of the pulse, and has, accordingly, been used in cases of chronic debility, chlorosis, asthma, scrofula, dropsy, paralysis, &c. It requires to be diluted with from 10 to 20 parts of atmospheric air; one to two quarts being given during the day.

OXYGENATION, Oxydation.

OXYGÈNE, Oxygen.

OXYGÉNÈSES. A name given by Baumes to diseases which he attributed to disordered oxygenation.

OXYGEUSIA, Hypergeustia.

OXYG'LICUS, *Oxyg'lices,* from *ὀξυς*, 'acid,' and *γλυκυς*, 'sweet;' *Mulsa acida, Ace'tum mulsum dulcè.* Prepared by macerating and boiling honey-comb (from which the greater part of the honey has been taken) in water, and adding vinegar An *Oxymel.*

OXY-HYDRO-CARBURETUM EX OLEO PYROXYLICO PARATUM, Creasote.

OXYLAPATHUM, Rumex acutus.

OX'YMEL, *Apom'eli, Mel aceta'tum,* (F.) *Acétomel,* from *ὀξυς*, 'acid,' and *μελι*, 'honey.' Honey and vinegar boiled to a syrupy consistence. (*Mel. despumat.* ℔v, *acid. acetic.* ℥vij, *aq. destillat.* f℥viij. Add the acid to the water and mix them with the honey previously heated.—Ph. L.) It is cooling; — externally detergent.

Oxymel Æruginis, Linimentum Æruginis.

Oxymel Col'chici, *O. of meadow saffron,* (F.) *Oxymel colchiqué.* (*Rad. colch. recent. in lamin as tenues sectæ* ℥j, *aceti destillati* ℔j, *mellis despumat.* pond. ℔ij. Macerate in a gentle heat for 48 hours. Press and boil the liquor with the honey to the thickness of a syrup; stirring with a wooden spoon. Ph. D.) It is expectorant and diuretic. Dose, f℥j, in gruel.

OXYMEL COLCHIQUE, O. colchici — o. of Meadow saffron, O. colchici.

Oxymel Scillæ, *O. of squills, O. Scillicit'icum, Mel scillæ.* (*Mellis despumat.* Oiss, *aceti scillæ,* Oij. Boil in a glass vessel over a gentle fire to a proper consistence. Ph. U. S.) It is reputed to be expectorant and diuretic. Dose, f℥j to f℥ij.

Oxymel of Squill, O. scillæ.

OXYMYRRHINE, Ruscus.

OXYMYRSINE, Ruscus.

OXYNGIUM, Adeps suillus.

OXYNI'TRON, from *ὀξυς*, 'acid,' and *νιτρον*, 'nitre.' Name of a plaster, composed chiefly of vinegar and nitre, and recommended by Aëtius.

OXYNOSEMA, Acute disease.

OXYNOSOS, Acute disease.

OXYNUSOS, Acute disease.

OXYO'PIA, *Galero'pia, Hyperop'sia, Suffu'sio excla'rans, Acies visûs,* from *ὀξυς,* 'quick,' and *ωψ,* 'sight.' Excessive acuteness of the sense of sight. Instances have occurred where persons could see the stars in the day time. The cause is seated in great sensibility of the retina. The term has been used synonymously with nyctalopia.

OXYOSPHRE'SIA, *Oxyosphra'sia,* from *ὀξυς,* 'acute,' and *οσφρησις,* 'smell. Excessive acuteness of the sense of smell.

OXYPHLEGMA'SIA, *ὀξυφλεγμασια,* (*ὀξυς,* 'acute.' and *φλεγμασια,*) *Acu'ta et ve'hemens inflamma'tio.* A violent inflammation.

OXYPHŒNICON, Tamarindus.

OXYPHO'NIA, *Vox acu'ta;* from *ὀξυς,* 'sharp,' and *φωνη,* 'voice;' *Parapho'nia clangens* seu *ulcero'sa, Clangor, Vox clango'sa, Leptopho'nia.* A shrill and squalling voice, — frequently, a symptom of morbid affection of the larynx.

OXYPHYLLON, Oxalis acetosella.

OXYPODIA, see Kyllosis.

OXYPROTEIN, see Corium phlogisticum.

OXYREG'MIA, *Ructus ac'idus,* from *ὀξυς,* 'sour,' and *ερευγω,* 'I belch.' Acid eructation.

OXYR'IA RENIFORM'IS, *Rumex dig''ynus, Boreal sourdock, Mountain Sorrel, Welsh sorrel.* A plant, *Ord.* Polyganaceæ, *Sex. Syst.* Diandria Digynia, which grows in the northern parts of America and Europe; blossoming in the spring. It possesses the same properties as Oxalis acetosella.

OXYRRHOD'INON, *Ace'tum rosa'tum,* from *ὀξυς,* 'acid,' and *ροδον,* 'a rose.' A composition of vinegar and roses. (*Ol. rosat.* ℥ij, *acet. rosat.* ℥i.) Used as a liniment in herpes and erysipelas.

OXYS, Acid, Acute — o. Alba, Oxalis acetosella.

OXYSAC'CHARUM, from *ὀξυς,* 'acid,' and *σακχαρον,* 'sugar.' A mixture of sugar and vinegar. It was called *Oxysac'charum vomiti'vum,* when it held in solution the glass of antimony; and *Oxysac'charum scillit'icum,* when it contained squills.

OXYSAL DIAPHORET'ICUM AN'GELI SALÆ. A preparation of Angelo Sala. Acetate of potass exposed to the atmosphere; and consequently fallen into a state of deliquium.— Orfila.

OXYTARTARUS, Potassæ acetas.

OXYTES, Acidities.

OXYTOC'IA. Same etymon as the next. Rapidity of parturition.

OXYTOC'IC, *Oxyt'ocus,* from *ὀξυς,* 'quick,' and *τικτω,* 'I bring forth.' A medicine which promotes delivery.

OXYTRIPHYLLON, Oxalis acetosella.

OXYURE VERMICULAIRE, Ascaris vermicularis.

OXYURIS VERMICULARIS, Ascaris vermicularis.

OYSTER GREEN, Ulva latissima — o. Root, Tragopogon — o. Shells, Ostreæ testæ — o. Prepared, Testa præparata.

OZÆ'NA, *Coryza enton'ica* seu *purulen'ta* seu *oæno'sa* seu *ulcero'sa* seu *virulen'ta* seu *malig'na, Pyorrhœ'a nasa'lis, Entoxe'na, Rhini'tis ulcero'sa, Ulcus na'rium fœtens,* from *οζω,* 'I smell of something.' (F.) *Ozène, Punaisie.* An affection of the pituitary membrane, which gives occasion to a disagreeable odour similar to that of a crushed bed-bug; hence the name *Punaise,* by which the French designate one labouring under ozæna. It is, sometimes, owing to caries of the bones; but is, perhaps, most frequently dependent upon syphilitic ulceration of the pituitary membrane, with or without caries of the bones of the nose.

OZÆNA BENIGNA, Coryza, chronic.

OZE, Breath, offensive.

OZEMUN, Albumen.

OZÈNE, Ozæna.

OZONE: same etymon as Ozæna. The powerfully odorous matter produced when a current of ordinary electricity passes from pointed bodies into the air.—Schönbein. It is presumed to be a peculiar modification of oxygen; and its varying quantity in the atmosphere is supposed to affect the health of man.

Air containing ozone is said to be *ozonized.*

P.

P. A contraction of *Pugillus.*
P. Æ. A contraction of *Partes æquales.*
P. P. A contraction of *Pulvis patrum.*
} See Abbreviation.

PAB'ULUM, *Trophē, Phorbē, Alimen'tum, Nutri'men'tum.* Food, aliment. The *animal heat* and *animal spirits*—unmeaning terms—were formerly considered the *Pabulum vitæ.*

PACAY, Prosopis dulcis.

PACCHIO'NI, GLANDS OF, *Pacchio'nian Bodies, Glan'dulæ Duræ Matris* seu *duræ Menin'gis, Tuber'cula parva* seu *Cor'pora glandifor'mia duræ matris,* (F.) *Glandes de Pacchioni, Granulations cérébrales.* Small, whitish, or yellowish bodies, sometimes separate, at others united like a bunch of grapes, which are observed in several parts of the dura and pia mater. They receive vessels, but apparently no nerves. Their texture and uses are unknown. A considerable number is observed in the longitudinal sinus, covered by the internal membrane.

PACHÆ'MIA, *Pachyæ'mia, Pachæ'ma, Pachyæ'ma,* from *παχυς,* 'thick,' and *αιμα,* 'blood. Too great thickness of the blood.

PACHEABLEPHARO'SIS, *Pacheableph'aro, Pachybleph'aron, Pachyblepharo'sis, Pach'ytes,* from *παχυς,* 'thick,' and *βλεφαρον,* 'an eyelid.' A name given, by some authors, to a thickening of the eyelids, produced by tubercles or excrescences formed on their margins. It is the same affection as that which Sauvages designates *Callo'sitas.*

PACHETOS, see Laqueus.

PACHULOSIS, Pachylosis.

PACHYÆMIA, Pachæmia.

PACHYBLEPHARON, Pacheablepharosis.

PACHYCHOL'IA, from *παχυς,* 'thick,' and *χολη,* 'bile.' Morbid thickness of the bile.

PACHYDERMATOCE'LE, from *παχυς,* 'thick,' *δερμα, δερματος,* 'skin,' and *κηλη,* 'a tumour. A disease of the dermoid tissue, apparently congenital, which increases from a small mole or

spot, at times to the size and appearance of a relaxed and very emaciated mamma.—V. Mott.

PACHYLO'SIS, *Pachulo'sis*, from παχυς, 'thick.' An inordinate production of the epidermis dependent upon hypertrophy of the papillæ of the skin. —E. Wilson.

PACHYNSIS, Polysarcia adiposa.

PACHYNTICA, Incrassantia.

PACHYSMUS, Polysarcia adiposa.

PACHYTES, Pacheablepharosis.

PACINIAN CORPUSCLES, see Corpuscles.

PACKING, OF THE HYDROPATHISTS; *Émaillotage.*

PACKWAX, see Nucha.

PAD, (S.) *Pajado*, from *paja*, 'straw' [?]; *Plumace'olus, Pulvil'lus, Pulvin'ulus, Parvum pulvi'nar*; —a *cushion*, a *little cushion*; a *junk*; (F.) *Coussinet.* A small bag, filled with feathers, wool, hair, bran, chaff, &c. It is used to compress or support parts. In the treatment of certain fractures, soft pads or cushions, called by the French *Remplissages*, are placed between the splints and the fractured limb, in order that the prominent parts may not be chafed by the splints.

PADDIE, see Oryza.

PADDY, see Oryza.

PADNOON, Bit noben.

PAD'UA. MINERAL WATERS OF. Near Padua, in Italy, there are several thermal sulphureous springs, the hottest of which is 188° Fahr. The chief establishments are Abano, Battaglia, and Montegrotto.

PADUS, Prunus padus — p. Avium, Prunus padus—p. Lauro-cerasus, Prunus lauro-cerasus.

PÆDAN'CHONE, from παις, παιδος, 'a child,' and αγχω, 'I strangle;' *Angi'na Sicca.* Name of a fatal species of cynanche, mentioned by M. A. Severinus; probably the *Cynanche Trachealis*, or *Cynanche Maligna.*

PÆDARTHROCACE, Spina ventosa.

PÆDATROPH'IA, *Atrophia infan'tilis, Marasmus lactan'tium*, from παις, παιδος, 'a child,' a, privative, and τροφη, 'nourishment.' Atrophy of children. Tabes mesenterica.

PÆDATROPHIA GLANDULOSA, Scrofula.

PÆDERAS'TIA, *Pædogo'gium, Pædica'tio, Cinæ'dia*, from παις, παιδος, 'a boy,' and ερως, 'love.' The love of boys. A disgraceful passion, common in ancient times, but now unknown. These terms are likewise applied to the crime of sodomy.

PÆDEROTA VIRGINICA, Leptandra virginica.

PÆDENCÉPHALIE, Hydrocephalus internus.

PÆDI'A, παιδεια, *Educa'tio infan'tum.* The bringing up or education — physical as well as moral — of children.

PÆDIATRI'A, *Pædiat'rica, Pædiat'rics*, from παις, παιδος, 'a child,' and ιατρεια, 'medical management.' Treatment of the diseases of children.'

PÆDICATIO, Pæderastia.

PÆDICTERUS, Icterus infantum.

PÆDOBAROMACROMETER, Baromacrometer.

PÆDOGOGIUM, Pæderastia.

PÆDOMETER, Baromacrometer.

PÆDON'OSUS, from παις, παιδος, 'a child,' and νοσος, 'disease.' A disease of childhood.

PÆDOPHLEBOTOM'IA, from παις, παιδος, 'a child,' φλεψ, 'a vein,' and τομη, 'incision.' *Venæsec'tio puero'rum.* Bleeding performed on children.

PÆDOT'RIBES. *Min'ister Gymnas'tæ*, from παις, παιδος, 'a child,' and τριβω, 'I train.' In ancient gymnastics, the officer acquainted with all the prescribed exercises, and who carried them into effect, according to the direction of the superior.

PÆDOT'ROPHY, *Pædotroph'ia*, (F.) *Pédotrophie*, from παις, παιδος, 'a child,' and τροφη, 'nourishment.' The part of hygiene, which concerns the nourishment of children.

PÆON, Physician.

PÆO'NIA, *P. officina'lis* seu *mas'cula* seu *nemora'lis* seu *fem'ina* seu *loba'ta, Glycisidē, Hæmago'gum, Pe'ony, or Pi'ony, male and female.* (F.) *Pivoine, Pione, Herbe Sainte-Rose.* From Παιων, 'the god of physic.' The root, flowers, and seeds were long esteemed powerful medicines. They are feebly astringent, and have been considered to be narcotic and antispasmodic. They have been given, particularly, in intermittents and epilepsy, but are not now used. The flowers are called *Rosæ benedic'tæ, R. re'giæ.*

PÆONICE, Medicine.

PÆONICUS, Medical.

PÆONIUS, Medical.

PÆOSYNE, Medicine

PAGAPOPLEX'IA, from παγειν, 'to nail fast,' and αποπληξια, 'apoplexy.' Apoplexy from cold.

PAGOS, Peritonæum.

PAIDIA, Infancy.

PAIDION, Infans.

PAIGIL, Primula veris.

PAIN, (old F.) *painer*, 'to torment;' Sax. **pinan**, 'to torture.' *Dolor, Algos, Alge'ma, Alge'do, Alge'sis, Od'ynē, Ache*, (Sc.) *Hachse*, (Prov.) *Crazy, Wark*, (F.) *Douleur.* A disagreeable sensation, which scarcely admits of definition. It is generally symptomatic, and is called *acute*, (F.) *aiguë*, when very violent, as a *twinge*; *pungent*, (F.) *pongitive*, when it resembles that which would be produced by a sharp instrument run into the part: *heavy*, (F.) *gravative*, when attended with a sensation of weight; *tensive*, when the part seems distended: *lan'cinating*, when occurring in shoots: *lac'erating* or *tearing*, when the part seems to be tearing: *burning*, (F.) *brûlante*, when resembling that produced by a burn, &c.

PAIN, SUN, Hemicrania.

PAIN, see Triticum—*p. à Coucou*, Oxalis acetosella — *p. de Madagascar*, Jatropha manihot—*p. de Pourceau*, Cyclamen.

PAINS, AFTER, see P. labour.

PAINS, GNAWING, *Dolo'res roden'tes.* Pains resembling what might be produced by the gnawing of an animal.

PAINS, *Labour pains, Throes, Throws, Partu'rien'tis dolo'res, Ódin, Odis, Dolo'res ad partum, Torm'ina parturien'tium*, (F.) *Mal d'Enfant, Douleurs.* The uneasy sensations that accompany labour, and are owing to uterine contraction. The pains that precede actual delivery, and are simply employed in dilating the os uteri, are called *grinding*; those which extrude the child, *forcing.* Those which take place in the first days after delivery, and are employed in forcing away coagula, &c., are termed *After pains, Dolo'res seu Tormina post partum, D. puerpera'rum*, (F.) *Tranchées utérines.*

"*To take a pain*," — "To try a pain," — is to make an examination *per vaginam*, during labour, to discover its progress, character, &c.

The French term the pains, which precede and announce labour, *mouches*; those which accompany it, *douleurs*; and those which occur immediately afterwards, *tranchées* ou *coliques.*

PAINT, (from *pingere, pinctum*, 'to paint.' (I. *pinto*, (F.) *peint*;) *Pigmen'tum, Fucus*, (F.) *Fard.* A name given to different substances, employed for embellishing the complexion or rendering the skin softer. The substances most commonly used for this purpose are:—the *Subnitrate of Bismuth*, (F.) *Blanc de fard.* A spirituous solution of benzoin, precipitated by water, and forming *Virgin's milk*, (F.) *Lait virginal*; the red or *rouge*

of the carthamus; *Spanish white;* the oxides of lead, tin, and mercury, vermilion, red saunders, &c. All paints may be said to be noxious. They injure the skin; obstruct perspiration; and, thus, frequently lay the foundation for cutaneous affections. See Cosmetic.

PAINT, INDIAN, Hydrastis Canadensis, Sanguinaria Canadensis — p. Yellow, Hydrastis Canadensis.

PALAD, Vertex.

PALÆSTRA, Gymnasium.

PALAIS, Palate.

PALAME. Palm.

PALATAL, Palatine.

PALATE, *Pala'tum, Hypero'a, Hyperö'um, Uranis'cos, Roof of the mouth, Fossa Palati'na, Palatum stab'ilè, Hard Palate,* (F.) *Palais.* The upper part of the cavity of the mouth; a kind of parabolic vault, formed by the two superior maxillary bones, and the two palate bones, covered with a thick and dense mucous membrane: bounded, before and at the sides, by the superior dental arch; and, behind, by the velum palati. A whitish line runs along the middle, from before to behind; at the anterior extremity of which is a tubercle corresponding to the inferior orifice of the anterior palatine canal. The arteries of the palate and corresponding gums proceed from the palatine, alveolar, infra-orbitar, labial, and buccal branches. The veins follow a similar course. The nerves are given off from the palatine, facial, infra-orbitar, superior dental, and from the naso-palatine ganglion.

PALATE, ARTIFIC''IAL, (F.) *Obturateur du Palais.* A plate of tortoise-shell, silver, &c., used to close a deficiency of the palate.

PALATE BONE, *Os Pala'ti* seu *basila're*, (F.) *Os Palatin* ou *du Palais*, is a small bone, of an irregular shape, situate at the posterior part of the nasal fossæ and palate. It seems formed by the union of two bony plates joined at right angles to each other; so that one is *inferior* and *horizontal;* — the other, *superior* and *vertical.* The *horizontal* or *palatine portion, Arch of the palate,* is quadrilateral. Its upper surface forms part of the nasal fossæ; the lower forms part of the palatine arch, and contains the inferior orifice of the *posterior palatine canal.* Its *anterior* edge is articulated with the palatine process of the superior maxillary bone; the *posterior* is free and sharp. It gives attachment to the velum palati, and presents an eminence, which, when joined with one on the opposite side, forms the posterior nasal spine. Its inner edge is articulated with the corresponding bone; its outer is confounded with the vertical portion. The *vertical* or *ascending portion* has the form of a long square. The inner surface forms part of the outer paries of the nasal fossæ. Its outer surface is unequal, and is articulated with the superior maxillary bone; behind, it presents a vertical groove, which forms part of the posterior palatine canal; and, above, a small free surface, which looks into the zygomatic fossa. Its anterior edge is united with the superior maxillary bone; the posterior is unequal, and rests on the internal ala of the pterygoid process. The angle, which it forms by uniting with the posterior edge of the horizontal portion, presents a very prominent pyramidal eminence, called the *tuberosity of the palate bone.* Its upper margin is surmounted by two eminences;—the one, anterior, called the *orbitar process;* — the other posterior, the *sphenoid process.* These two processes are separated by an almost circular notch, which the sphenoid bone forms into a foramen, called the *sphenopalatine.*

This bone appears to be developed from a single point of ossification. It is articulated with the sphenoid, ethmoid, the cornua sphenoidalia, superior maxillary bone, the inferior spongy bone, the vomer, and its fellow.

PALATE, CLEFT, see Harelip—p. Falling down of the, Uvulitis — p. Fissured, see Harelip — p. Hard, Palate—p. Soft, Velum pendulum palati.

PAL'ATINE, *Pal'atol, Palati'nus, Pal'atic,* from *palatum,* 'the palate.' Relating or belonging to the palate.

PALATINE or PALATAL ARTERIES are two in number. They are distinguished into, 1. The *superior palatal* or *palatine, Palati'na descen'dens* or *Pal'ato-max'illary,* which leaves the internal maxillary behind the top of the orbit; descends into the pterygo-maxillary fissure, and enters the posterior maxillary canal. Its branches are distributed to the velum palati and the nasal fossæ. 2. The *inferior* or *ascending palatine* or *palatal,* which is very small, and separates from the facial near its origin. It passes along the lateral and superior part of the pharynx, between the pillars of the velum palati, and divides into a number of ramusculi, which are distributed to the pharynx, the corresponding tonsil, the Eustachian tube, and the velum palati.

PALATINE CANALS or DUCTS. These are two in number. The *anterior, Ductus incisi'vus* seu *Nasa'lo-palati'nus, Inci'sive canal,* is situate at the anterior part of the palatine arch, and is formed by the two superior maxillary bones. It is single beneath, but opens above by two apertures, one into each nasal fossa. The foramen is called *Fora'men incisi'vum* seu *Palati'num ante'rius* seu *Alveola'rē ante'rius* seu *cæcum ossis maxilla'ris superio'ris.* The *posterior palatine canal* is situate at the posterior part of the palate. It is formed by the palate and superior maxillary bones, ascends between these two bones, and, in its course, gives rise to two or three small accessory palatine canals, which open above the tuberosity of the palate bone. It transmits the nerves and vessels which bear its name. The foramen is called, *F. Palati'num poste'rius* seu *Palatomaxilla'rē* seu *alveola'rē poste'rius.*

PALATINE MEMBRANE is the fibro-mucous membrane that lines the palate or roof of the mouth.

PALATINE or PALATAL NERVES, *Gutturo-palatins* (Ch.), are three in number; and arise from the inferior part of the spheno-palatine ganglion. 1. The *great palatine, Palatin inférieur* (Ch.), is situate anteriorly to the two others, and descends into the posterior palatine canal; gives a *nasal* filament and a *staphyline* filament, and is distributed on the palate. 2. The *middle palatine, Guttural* (Ch.), which arises behind the preceding, enters one of the accessory palatine canals, and is distributed to the tonsils and velum palati. 3. The *little palatine nerve,* situate still more backward than the last, which loses itself by several filaments in the uvula, tonsils, and follicles of the palatine membrane.

PALATITE, Isthmitis.

PALATITIS, Uranisconitis.

PALATO-GLOSSUS, Glossostaphylinus.

PALATO-PHARYNGEUS, *Pharyn'go-staphyli'nus, Staphyli'no-pharyngeus, Thyro-pharyn'go-staphyli'nus,* part of the *Hypero-pharyngeus,* (F.) *Palato-pharyngien, Stylo-pharyngien* (Ch.). A membranous muscle, broader at its middle than at its extremities, and situate vertically in the lateral paries of the pharynx and velum palati. It includes the peristaphylo-pharyngeus, pharyngo-staphylinus, and thyro-staphylinus of Winslow. When the two palato-pharyngei contract together, they depress the velum. They elevate and shorten the pharynx, and act principally in deglutition.

PALATO-PHARYNGIEN, Palato-pharyn-

geus — p. Salpingeus, Circumflexus — *p. Salpingien*, Circumflexus.

PALATOSTAPHYLINI, see Azygos muscle.

PALATUM FISSUM, Hyperoochasma, see Harelip—p. Mobile, Velum pendulum palati—p. Molle, Velum pendulum palati—p. Pendulum, Velum pendulum palati.

PALE, Pollen.

PALENESS, *Pallor, Och'rotes, Ochro'ma, Ochri'asis, Leuco'sis, Dealba'tio, Luror*, (F.) *Pâleur*. Whiteness of complexion. It appears to be owing to a diminution or alteration of the blood circulating in the capillary vessels, and is often a sign of disease.

PÂLES COULEURS, Chlorosis.

PALETTE (F.), *Pal'mula, Fer'ula*. An instrument of percussion. It has the shape of a spatula with a long handle; is made of very light, white wood, and has been proposed, by Mr. Percy, for what is called the *Massage*, a kind of pressure or kneading, exerted by the hand on the body and limbs, to excite the tone of the skin and subjacent tissues.

Palette also means a cup for bleeding; and the xiphoid cartilage [?].

PALETTE À PANSEMENT. A small splint of thin, scooped wood, having the shape of the hand, and used to support the hand in certain cases—when burnt, for example—in order to prevent the fingers from being deformed by the cicatrices.

PALETTE DE CABANIS. An instrument, invented by Cabanis of Geneva to draw out the extremity of the stylet when passed into the nose, in the operation for fistula lacrymalis. It is composed of two plates of silver, pierced with several holes, and movable on each other. To use it, the instrument must be carried into the nose, so that the holes of the two plates correspond. When the end of the stylet is received into one of these holes, it is pinched, by sliding one of the plates on the other, and is easily withdrawn.

PÂLEUR, Paleness.

PALI PLAGUE, see Plague.

PALICOU'REA CROC''EA, *Psycho'tria croc''ea, Order*, Cinchonaceæ, a native of the West Indies, is possessed, according to Von Martius, of emetic properties.

Palicourea Marcgraa'vii, *Erva do rato, Galva'nia Vellozii*, a native of Brazil, is poisonous, and employed there to kill rats and mice.

Palicourea Officina'lis, a native of Brazil, is reputed to be a powerful diuretic in small doses.

Palicourea Specio'sa, *Goldshrub*, a native of New Granada and Brazil. The leaves are considered to be antisyphilitic. The decoction in large doses is poisonous.

PALILLO, Campomanesia lineatifolia.

PALIMPISSA, see Pinus sylvestris.

PALINCOTESIS, Recrudescentia.

PALINDROME, Palindromia.

PALINDROM'IA, *Palin'dromē*, from *παλιν*, 'again,' and *δρομος*, 'a course.' This word signifies, with some, a reflux of fluids from the exterior towards the interior; and, according to others, the relapse of an affection—the recurrence—*Recur'sio, Repetit''io*—of a paroxysm, or disease,—*Morbus recidi'vus, Morbi recur'sus*.

PALINGENESIS, Regeneration.

PALLA, Pila.

PALLAT, Vertex.

PALLIA'TION, *Pallia'tio*, from *palliare, palliatum*, 'to cover, mask;' from *pallium*, 'a mantle.' The act of palliating — that is, of causing the symptoms of a disease to mitigate, without curing it. The medical art can frequently only moderate the symptoms of a disease, prevent it from making progress, prolong the days of the patient, and diminish his sufferings. This is *palliative treatment*, (F.) *Traitement palliatif*.

PAL'LIATIVE, *Palliati'vus, Antipath'ic, Enantiopath'ic*, (F.) *Palliatif*. A remedy or mode of treatment, which only relieves a disease, without curing it. The *palliative* treatment—*Cura palliati'va*, is placed in antithesis to the radical, *Cura radica'lis*; see Radical.

PALLIDULUS, *Blafard*.

PALLIDUS MORBUS, Chlorosis.

PALLOR, Paleness — p. Virginum, Chlorosis.

PALM, *Palma, παλαμη, Vola, V. manûs, Plate'a, Thenar, Ages, Agos'tus, Poc'ulum, Pat'era, Supellex* seu *Supellec'tilē Diog''enis*, (F.) *Paume* ou *Creux de la main*. The hollow or inside of the hand. It is limited, *without*, by the thenar eminence, which answers to the thumb; *within*, by the hypothenar eminence, which answers to the little finger; *above*, by the wrist-joint; and, *below*, by the four fingers.

Palm, Gomuto, see Toddy.

PALMA CHRISTI, Ricinus communis — p. Cocos, Cocos nucifera—p. Dactylifera, Date tree —p. Humilis, Musa paradisiaca—p. Indica vinaria secunda, see Toddy—p. Unguentariorum, Myrobalanus.

PALMÆ U'TERI PLICA'TÆ. *Arbor vitæ uteri'nus, A. u'teri vivi'ficans*. The arborescent striæ in the interior of the cervix uteri.

PALMAIRE, Palmar — *p. Cutané*, Palmaris brevis — *p. Grand*, Palmaris magnus — *p. Grêle*, Palmaris longus — *p. Long*, Palmaris longus.

PALMAR, *Palma'ris*, (F.) *Palmaire*, from *palma*, 'the palm of the hand.' That which concerns the palm of the hand. The palm has, sometimes, been divided into three regions, called *palmar*. 1. The *external palmar region* corresponds to the thenar eminence. 2. The *internal palmar region* is formed by the hypothenar eminence: and, 3. The *middle palmar region* is the hollow of the hand, (F.) *Creux de la main*.

Palmar Aponeuro'sis, *Palmar fas'cia*. A strong triangular aponeurosis, which arises from the inferior tendon of the palmaris brevis, and the anterior annular ligament of the carpus. It covers the whole palm of the hand, and adheres, somewhat strongly, to the skin of the part. The *palmar ligaments* are small, very numerous, fibrous fasciæ, which unite the different bones of the carpus and metacarpus.

Palmar Arches, (F.) *Arcades* ou *Crosses palmaires*. The curved extremities of the radial and cubital arteries in the palm of the hand. There are two palmar arches: — the one, *cubital* or *superficial*,—*grande Arcade palmaire* of Chaussier, furnishes, at its convexity towards the fingers, the collateral arteries of the fingers, and the internal collateral of the thumb; the other, the *radial, profound*, or *deep-seated*,—*petite Arcade palmaire* of Chaussier, is deep in the palm of the hand beneath the tendons of the flexor muscles of the fingers. It gives some small branches only to the surrounding parts. The palmar veins accompany the corresponding arteries.

Palmar Arteries, see Palmar arches — p. Fascia, P. aponeurosis.

Palmar Muscles. These are three in number. 1. *Palma'ris Magnus, Flexor carpi radia'lis, Radia'lis intern'us*, (F.) *Épitrochlo-métacarpien* (Ch.), *Palmaire grand, Radial antérieur*. A long fusiform muscle, which passes obliquely from the inner tuberosity of the humerus to the upper extremity of the second metacarpal bone. It bends the hand. 2. *Palmaris longus, Latescen'tis chordæ, Ulna'ris grac''ilis*, (F.) *Épitrochlo-carpi-pal-*

maire (Ch.), *Palmaire long, P. grêle.* This muscle is situate on the inner side of the last. It is very slender, and passes from the inner tuberosity of the humerus to the anterior annular ligament of the carpus, and to the palmar aponeurosis, which it seems to form by the vanishing of its fibres. It stretches the palmar aponeurosis, and bends the hand. 3. *Palmaris Brevis, Caro quadra'ta, Carpiæ'us,* (F.) *Palmaire cutané.* A small, thin, quadrilateral muscle; situate before the thenar eminence. It passes from the annular ligament of the carpus to the integuments of the palm of the hand, which it wrinkles by its contraction.

PALMAR VEINS, see Palmar arches.

PALMARIS BREVIS, see Palmar muscles — p. Longus, see Palmar muscles — p. Magnus, see Palmar muscles.

PALMETTO, SAW, Chamærops serratula.

PALMI-PHALANGIENS, Lumbricales manus.

PALMISTRY, Chiromancy.

PALMOSCOP'IA, from *παλμος,* 'palpitation,' and *σκοπεω,* 'I view.' Investigation of the beating of the heart and pulse. Prognosis from the beating of the heart and pulse.

PALMULA, Date, *Palette.*

PALMUS, Palpitation—p. Cordis, Palpitation — p. Plumbarius, Colic, metallic — p. Vomitus, Vomiting.

PALO DE CALENTURAS, Calenturas—p. de Vacca, Galactodendron utile — p. de Velas, Parmentiera cerifera.

PALOMMIER, Gaultheria.

PALOS DE CALENTURA, Cinchona.

PALPA'TION, from *palpare, palpatum,* (F.) *palper,* 'to feel.' The sense of touch. It is also used for the mode of exploring diseases by feeling or pressing upon the diseased organ. A delicate and discriminating touch — *tactus erudi'tus* — is important in the diagnoses of many morbid conditions.

PAL'PEBRA, supposed to be from *palpitare,* 'to palpitate,' owing to its frequent motion. [?] *Bleph'aron, Oper'culum* seu *Coöper'culum oc'uli, Eyelid,* (Prov.) *Eye-breek,* (Sc.) *Ee-winker,* (F.) *Paupière.* The eyelids are two movable vela, situate in front of the eye; which by their separation permit the organ to receive the impression of light, or by their greater or less occlusion protect it from the influence of too great light, or from the action of extraneous bodies. They are separated, above, from the forehead, by the eyebrows; and, below, are confounded with the cheeks. They are distinguished into *upper, Palpebra major* seu *superior, Epicæ'lis* — and *lower, Palpebra minor* seu *inferior, Hypocæ'lis, Hypocæ'lum, Hypoc'ylum.* The former is much broader and more movable than the latter. They are separated by a transverse cleft — *Fissu'ra palpebra'rum*—and their edges are thick, and furnished with the cilia or eyelashes. Supported by the tarsal cartilages, they unite at the extremities of the transverse diameter of the orbit, forming two angles, the innermost being called the *greater angle of the eye,* or *inner* or *greater canthus;* the other, the *lesser,* or *external angle* or *canthus.* They are formed, 1. Of a thin dermoid texture: 2. Of a muscular membrane, — a portion of the orbicularis: 3. Of a particular fibrous membrane: 4. Of the tarsi: 5. Of a mucous membrane, — a part of the tunica conjunctiva.

Their vessels and nerves are called Palpebral.

PALPEBRA INFERIOR EXTRORSUM FLEXA, Ectropion—p. Tertia, Valvula semilunaris.

PALPEBRÆ SUPERIORIS PRIMUS, Levator palpebræ superioris.

PAL'PEBRAL, *Palpebra'lis,* from *palpebra,* 'the eyelid.' That which belongs or relates to the eyelid.

PALPEBRAL ARTERIES are those distributed to the eyelids. They are two in number; an *upper* and a *lower.* The *former* arises from the ophthalmic, a little beyond the cartilaginous pulley of the greater oblique muscle, and descends towards the upper eyelid, over which it is distributed. The *latter* arises at the side of, and a little behind, the preceding, and sends its ramifications to the lower eyelid and the neighbouring parts. The palpebral veins have a similar arrangement; except that some of them open into the temporal and labial veins.

PALPEBRAL FLUX, PURIFORM. A puriform discharge, furnished by the glands of Meibomius, when inflamed; and to which Scarpa attributes fistula lacrymalis, in many cases.

PALPEBRAL LIGAMENTS are distinguished into *superior* and *inferior.* Some anatomists, with Winslow, have described, under this name, the fibrous layer which is attached, — on the one hand, to the outer part of the circumference of the orbit; on the other, to the tarsal cartilages.

PALPEBRAL NERVES, *Nerves of the eyelids,* arise, particularly, from the frontal and lachrymal branches; from the ophthalmic nerve of Willis; and from the facial, nasal, and infra-orbitar branch of the superior maxillary nerve.

PALPEBRALIS, Orbicularis palpebrarum.

PALPEBRARUM APERIENS RECTUS, Levator palpebræ superioris — p. Duo musculi, Orbiculares palpebrarum.

PALPEBRATIO, Nictation.

PALPITATIO, Palpitation — p. Arteriarum, see Palpitation — p. Cordis trepidans, Cardiotromus.

PALPITATIO MEMBRO'RUM. A term used by Gaubius for involuntary shaking of the legs.

PALPITA'TION, *Palpita'tio, Palmus, P.* seu *Tremor Cordis, Palpita'tio* seu *Pulsa'tio Cordis, Vibra'tio Cardi'aca* seu *Cordis, Cardiogmus, Cardiopal'mus, Subsul'tio, Clonus Palpita'tio,* (Sc.) *Dunt, Dount,* (F.) *Palpitation, P. du Cœur,* from *palpitare, palpitatum,* 'to throb.' A name given to the pulsations of the heart, when they become stronger, more extensive, or more sensible to the individual than ordinarily. Palpitations occur in a number of affections. They are, sometimes, owing to organic diseases of the heart—hypertrophy, inflammation, &c.; at others, to a disease in some other viscus; whilst, frequently, they are merely nervous.

PALPITATION is sometimes felt in the arteries, constituting *Palpitatio Arterio'sa.*

PALPITATION DU CŒUR, Palpitation.

PALSIED, Paralytic.

PALSY, Paralysis—p. Bell's, Paralysis, Bell's — p. Histrionic, Paralysis, Bell's.

PALSY, LEAD, *Paral'ysis saturni'na* seu *metal'lica, Molybdopa'resis,* (F.) *Paralysie saturnine, Metal'lic Palsy, Painters' Palsy.* The paralysis of the upper extremities especially, induced by the poison of lead. Palsy of the intestines, thus induced, is called, by Piorry, *Anentéronervie saturnine.*

PALSY, METALLIC, see Palsy, lead — p. Painters', P. lead — p. Shaking, Paralysis agitans — p. Trembling, Paralysis agitans.

PALSY WORT, Primula veris.

PALTA, Persea gatissima.

PALUDAL, Elodes.

PALUDAPIUM, Apium graveolens.

PALUDÉEN, Elodes.

PALUDOSUS, Elodes.

PALUS, Marsh, Penis—p. Sanctus, Guaiacum.

PALUSTRE, Elodes.

PAMBIOMA, Panbioma.

PAMOISON, Syncope.

PAMPINIFORM PLEXUS, Corpus pampiniforme.

PAMPINIFORME CORPUS, see Corpus pampiniforme.

PAMPLE'GIA, *Pamplegia*, from *παν*, 'all,' and *πληγω*, 'I strike.' General paralysis. Palsy of the whole body.

PANACE'A, *πανακεια. Cathol'icon, Catholi'cum*, from *παν*, 'all,' and *ακεομαι*, 'I cure.' *Universa'le reme'dium, Panchres'tos.* A pretended universal remedy. There is no such thing in existence.

Panacea Ducis Holsatiæ, Potassæ sulphas —p. Duplicata, Potassæ sulphas — p. Lapsorum, Arnica montana — p. Mercurialis, Hydrargyri submurias — p. Mercurii rubri, Hydrargyri nitrico-oxidum — p. Pectoris, Glechoma hederacea —p. Vegetabilis, Crocus.

PANACÉE ANGLAISE, Magnesiæ carbonas.

PANA'DA, diminutive of Ital. *pane*, 'bread,' (Lat. *panis*,) *Pana'ta, Panatel'la.* Bread, boiled in water to the consistence of pap. Sometimes administered to the sick.

Simple Bread Panada may be made by putting any quantity of grated stale *bread* into enough *water* to form a moderately thick pulp; covering it up, and leaving it to soak for an hour; then beating it up with two tablespoonfuls of *milk*, and a small portion of *refined sugar*, and boiling the whole for ten minutes, stirring all the time.

PANAIS, Pastinaca sativa.

PANARIS, Paronychia.

PANARITIUM, Paronychia.

PANARIUM, Paronychia.

PANATA. Panada.

PANATELLA, Panada.

PANAX, see Panax quinquefolium — p. Costinum, Pastinaca opoponax—p. Heracleum, Pastinaca opoponax — p. Pastinacea, Pastinaca opoponax.

Panax Quinquefo'lium, *Aurelia'na* seu *Ara'lia Canaden'sis, Ginseng, Ninsing, Gensang, Redberry, Five fingers.* Same etymon as Panacea. *Family*, Araliaceæ. *Sex. Syst.* Polyandria Monœcia. This plant grows in North America. The root—*Panax* (Ph. U. S.)—*Radix ginseng*—is about the thickness of the little finger; an inch or two in length, often dividing into two branches; of a whitish-yellow colour; wrinkled on the surface, and of a compact, almost horny, texture. It has no smell, but a very sweet taste, combined with a slight degree of aromatic bitterness. It is much esteemed by the Chinese, who pay a high price for it. It is a gentle and agreeable stimulant.

Panax Schinseng, *Asiat'ic Ginseng*, a native of Asia, has been usually confounded with the last. The root, *radix ninsi*, has like virtues.

PANBIO'MA, *Pambio'ma*, from *παν*, 'all,' and *βιος*, 'life.' The original animating principle. The general principle of life.

PANCHRESTOS, Panacea.

PANCHYMAGO'GUM, *Pantago'gon*, from *παν*, 'all,' *χυμος*, 'juice,' and *αγω*, 'I drive away.' A medicine which the ancients believed capable of purging away all sorts of humours.

Panchymagogum Minerale, Hydrargyri submurias.

PANCŒNOSUS, Pandemic.

PANCŒNUS (MORBUS), Pandemic.

PANCRATIUM, Pancreas.

PAN'CREAS, from *παν*, 'all,' and *κρεας*, 'flesh;' i. e. 'quite fleshy.' *Callic'reas, Pancra'tium, Pan'creum, Lactes, Pulvi'nar ventri'culi, Totum carno'sum, Gland'ula saliva'lis abdomi'nis, Pancre'nē, Sweetbread.* A gland, deeply seated in the abdomen, and lying transversely on the vertebral column, between the three curvatures of the duodenum, behind the stomach, and to the right of the spleen. Its left extremity is called the *tail* of the pancreas; it is smaller than the right, which is called the *head*. At its right portion, it has, almost always, a greater or less prolongation; called, by Winslow, and some others, the *lesser pancreas*, (F.) *Petit pancréas, Pancreas of Asellı, Pancreas minus.* The pancreas resembles the salivary glands in structure, and has been called the *Abdominal Salivary Gland.* It is composed of lobes and granulated lobules, distinct, and united by areolar tissue. From each of the granulations of these lobes arise the radicles of its excretory duct, which are very delicate, and united like veins. The duct itself, *Ductus Pancreat'icus* seu *Wirsungia'nus, Pancreat'ic duct, Canal* or *Duct of Wirsung* or *Wirsungs*, (F.) *Canal pancréatique*, proceeds in a serpentine course through the substance of the organ; and when it has reached behind the second portion of the duodenum, it becomes free, and is of the size of a crow's quill. It opens at an acute angle into the choledoch duct, or proceeds close to it, opening separately into the duodenum. The *Pancreatic arteries* are very numerous and small. They proceed from the cœliac, splenic, superior mesenteric, right gastro-epiploic, coronaria ventriculi, and left capsular. Its *veins* open into the radicles of the vena porta; and, particularly, into the splenic and lesser mesenteric. Its *nerves* emanate from the solar plexus, and its lymphatics pass into ganglions, to which it gives its name. The pancreas secretes the *Pancreatic juice, Succus* seu *Liquor Pancreat'icus, Lympha Pancrea'tis*, (F.) *Suc pancréatique*, which resembles the saliva. When this juice is mixed with amylaceous matters, it converts them into dextrin and glucose. Its great use appears, however, to be, to emulsify fatty matters by virtue of a peculiar albuminoid principle — *pancreatin* — coagulable by heat or alcohol, which it contains.

Pancreas of Aselli, see Pancreas — p. Minus, see Pancreas — *p. Petit*, see Pancreas — p. Second, Brunner's glands.

PANCREATAL'GIA, from *pancreas*, and *αλγος*, 'pain.' Pain or disease of the pancreas.

PANCREATEMPHRAX'IS, from *pancreas*, and *εμφρασσω*, 'I obstruct.' Obstruction of the pancreas.

PANCREAT'IC, *Pancreat'icus*, (F.) *Pancréatique.* Same etymon as *Pancreas.* Relating to or affecting the pancreas.

Pancreatic Arteries, see Pancreas—p. Duct, see Pancreas—p. Juice, see Pancreas—p. Nerves, see Pancreas — p. Veins, see Pancreas.

Pancreat'ic Sarco'ma of Ab'ernethy, *Emphy'ma sarco'ma pancreat'icum.* A tumour, in irregular masses, connected by loose fibrous substance, like the irregular masses of the pancreas. Found in the areolar substance: but, more usually, in lymphatic glands, chiefly in the female breast.

PANCREATIN, see Pancreas.

PANCREATIT'IS, *Inflamma'tio pancrea'tis*, (F.) *Inflammation du Pancréas*, from *pancreas*, and *itis*, denoting inflammation. Inflammation of the pancreas; —an affection, the phenomena of which are not well known.

PAN'CREATOID, from *pancreas*, and *ειδος*, 'appearance.' *Pancreatoï'des.* A tumour resembling the pancreas in structure.

PANCREATON'CUS, from *pancreas*, and *ογκος*, 'a swelling.' Tumour of the pancreas.

PANCRENE. Pancreas.

PANCREUM, Pancreas.

PANDA'LEA. *Panda'leum.* A kind of lozenge used by the Arabian physicians.

PANDALEUM, Pandalea.

PANDALITIUM, Paronychia.

PANDEMIA, Pandemic.

PANDEM'IC, *Pan'demy, Pande'mia, Morbus Pande'mius* seu *Pande'nus* seu *Panca'nus, Pan-*

cœno'sus, (F.) *Pandémie;* from *παν*, 'all,' and *δημος*, 'people.' An epidemic which attacks the whole, or a great part, of the populatien.

PANDÉMIE, Pandemic.

PANDEMY, Pandemic.

PANDICULA'TION, *Pandicula'tio, Scordine'ma, Scordinis'mus, Clonus Pandicula'tio*, from *pandiculari*, (*pandere*, 'to stretch out,') 'to stretch as one awaking from sleep.' *Stretching, Hal'ices*, (pl.) An action, which consists in elevating the upper limbs, and throwing the head and trunk backwards, at the same time that the lower limbs are extended. This series of motions of the extensor muscles is in some measure independent of the will, and is accompanied with yawning, which is equally involuntary. In the state of health, stretching occurs before and after sleep; especially when we are fatigued. It is also observed at the onset of certain paroxysms of fever, hysteria, &c.

PANDOCE'UM, *Pandochi'um, Pandoci'um*, from *παν*, 'all,' and *δεχομαι*, 'to receive.' An inn that receives all classes. A general hospital, or one that admits all cases.

PANDOCHIUM, Pandoceum.

PANDOCIUM, Pandoceum.

PANHIDRO'SIS, from *παν*, 'all,' and *'ιδρωσις*, sweating.' *Sudor universa'lis.* Sweating over the whole body.

PANHYPERÆMIA, Plethora.

PANIC D'ITALIE, Panicum Italicum.

PANICAUT, Eryngium campestre—*p. Maritime.* Eryngium maritimum.

PANIC GRASS, ITALIAN, Panicum Italicum.

PANICUM DACTYLON, Cynodon dactylon.

PAN'ICUM ITAL'ICUM, from *panis*, "bread," *Italian Panic Grass, Indian Millet, Guinea Corn, Barba'does Millet, Mil'ium Ind'icum, Sorghum, Holcus Sorghum*, (F.) *Millet des oiseaux* ou *à grappes, Panic d'Italie. Nat. Ord.* Gramineæ. The seed—*Mil'ii Sem'ina*—are much esteemed in Italy, being a constant ingredient in soups, and made into a variety of forms for the table.

PANICUM MILIA'CEUM, *P. mil'ium, Common Millet, Milium, M. Pan'icum* seu *Esculent'um, Cenchron, Cenchrus*, (F.) *Millot ordinaire, Mil.* Millet-seed are esteemed a nutritious article of diet, and are often made into puddings.

PANICUM MILIUM, P. miliaceum.

PANIS CANICACEUS, see Canicæ—p. Cibarius seu secundarius, Syncomistos — p. Cuculi, Oxalis acetosella—p. Porcinus, Cyclamen.

PANIV'OROUS, *Paniv'orus*, from *panis*, 'bread,' and *voro*, 'I devour.' Subsisting on bread.

PANNI, Swathing clothes.

PANNICLE, Membrane.

PANNICULE CHARNU, Panniculus carnosus.

PANNIC'ULUS, diminutive of *pannus*, cloth. A piece of fine cloth. Pterygion.

PANNICULUS ADIPOSUS, Cellular membrane.

PANNICULUS CARNO'SUS. *Tu'nica carno'sa, Muscular Web, Mantle*, (F.) *Pannicule charnue*, is a general covering found in the quadruped, and formed by a thin, subcutaneous muscle, which serves to move the skin. It exists only in certain parts of the human body, — as in the forehead, where it is formed by the occipito-frontalis; in the neck, by the platysma myoides; and, in the scrotum, by the cremaster muscle.

PANNICULUS CORDIS, Pericardium — p. Hymenæus, Hymen—p. Virginalis, Hymen.

PANNIKELL, Cranium.

PANNUS. A piece of cloth. This word has several other meanings, many of which are equivocal. It means a tent for a wound, and, also, an irregular nævus or mark on the skin. — Castelli. Modern ophthalmologists apply it to an opake and vascular condition of the anterior membrane of the cornea, almost invariably produced by the continuance of purulent or strumous ophthalmia, or by chronic inflammation of the cornea. This part becomes nebulous, covered with red vessels, and opake. At times, the sclerotic conjunctiva undergoes a similar change to that which occurs in the corneal portion.

PANNUS HEPATICUS, Chloasma—p. Lenticularis, Ephelides.

PANOCHIA, Bubo.

PANOPHO'BIA, *Pantopho'bia, Panpho'bia, Pavopho'bia, Athym'ia, Pavor*, (F.) *Frayeur nocturne, Souci;* from *Παν*, 'the god Pan,' and *φαβος*, 'fear;' a panic or fear inspired by the god Pan, according to the opinion of the ancients. Others derive it, and with more probability, from *παν*, 'all,' and *φοβος*, 'fear.' This universal and groundless fear is morbid, and is a symptom of melancholy.

PANOPHTHALMI'TIS, from *παν*, 'all,' and *ophthalmitis*, 'inflammation of the eye.' Inflammation of the whole eye.

PANPHOBIA, Panophobia.

PANPLEGIA, Pamplegia.

PANSCLERO'SIS, from *παν*, 'all,' and *σκληρωσις*, 'hardness.' Complete induration of a part.

PANSE, Ingluvies.

PANSEMENT, Dressing.

PANSIES. Viola tricolor.

PANSPER'MIA, from *παν*, 'all,' and *σπερμα*, 'sperm.' The theory of *Dissemination of Germs*, according to which, ova or germs are disseminated over all space, undergoing development under favourable circumstances.

PANSY, Viola tricolor.

PANTAGOGON, Panchymagogum.

PANTANANCEPHA'LIA, from *παν, παντος*, 'all,' and *ανεγκεφαλια*, absence of brain. Entire absence of brain—the same as anencephalia. —I. G. St. Hilaire.

PANTATROPHI'A, from *παν, παντος*, 'all,' and *ατροφια*, 'atrophy.' Universal atrophy.

PANTHOD'IC, *Panthod'icus*, from *παν, παντος*, 'all,' and *'οδος*, 'a way.' An epithet applied by Dr. Marshall Hall, to a course of nervous action proceeding from one point in all directions to every other.

PANTICES, Intestine.

PANTING, Anhelatio.

PANTOGANGLIITIS, Cholera.

PANTOPHAGISTS, see Omnivorous.

PANTOPHAGUS, Omnivorous.

PANTOPHOBIA, Hydrophobia, Panophobia.

PANTOZOOTIA, Panzootia.

PANUS, Phygethlon — p. Faucium, Stomatopanus—p. Inguinalis, Bubo.

PANZOÖT'IA, *Pantozoötia;* from *παν*, 'all,' and *ζωον*, 'animal.' An endemic or epidemic disease affecting animals generally.

PAP, Mamma, Nipple. Also, a soft food made of bread boiled or softened with water, (Sc.) *Breadberry.*

PAP OF THE HASS, Uvula — p. of the Throat, Uvula.

PAPAS AMERICANUS, Solanum tuberosum.

PAPA'VER, *P. somnif'erum, Mecon, Lethe'a.* The *White Poppy, Papaver sati'vum*, (F.) *Pavot des Jardins. Ord.* Papaveraceæ. *Sex. Syst.* Polyandria Monogynia. The CAPSULE OF THE WHITE POPPY, *Co'dia, κωδια* or *κωδεια, Sca'phion, Papav'eris Caput* seu *Cap'sula, Papaver*, (Ph. U. S.,) *Mecon, Poppyhead*, is used in fomentation as an anodyne and relaxant, to inflamed or ulcerated parts. The expressed oil of the seeds is called by the French *Huile d'Œillette*. It is from the poppy that OPIUM—called, also, *Opium Theba'icum, Meco'nium, Opion, Manus Dei, Affion Aff'ium, Amphiam, Afium, Osoron, Lac dormus*

Meeon, Sopio, (Prov.) *Poppy pill,* (F.) *Opium brut ou cru* — is procured. It is the milky juice obtained after the flowering of the plant, by making longitudinal incisions in the capsules and stalks. It is commonly obtained from the Levant or India, where the poppy grows abundantly. Opium is a compound of morphia, narcotina, meconic acid, codeia, narcein, meconin, caoutchouc, fecula, resin, oil, and several other substances. *Turkey Opium* is of a heavy and slightly fetid colour. Its taste is nauseous, bitter, acrid, and warm: it is in flat pieces; solid and tenacious; of a dark brown colour, and yellowish when powdered; making a light brown, interrupted streak on paper. In *East India Opium,* the odour is the same, and empyreumatic; the taste is less bitter, but more nauseous, and the colour darker. The varieties of opium known in commerce are the *Smyrna,* the *Constantinople,* the *Egyptian,* the *Persian,* and the *Indian.* Opium is stimulant in small doses; sedative, in large; narcotic and anodyne; operating through the nervous system. It is a most valuable remedy in all painful affections, and inflammations, when given so as to produce its full, sedative effects, especially in peritonitis. In diarrhœa and dysentery, it acts as an astringent; and in intermittents, it will often prevent the paroxysm. In typhus, in small doses, it acts as a cordial; in larger, it allays irritation and produces sleep. When applied externally, its narcotic effects are developed: and, hence, it is a useful application to irritable sores, painful tumours, &c. Dose. gr. ¼ to ½ as a stimulant; gr. j to iv as a sedative.

Papaver Cereale, P. rhœas — p. Corniculatum, Chelidonium majus—p. Erraticum, P. rhœas —p. Luteum, Chelidonium majus.

Papaver Nigrum. This is merely a variety of the white poppy, producing black seeds.

Papaver Rhœas. The systematic and pharmacopœial name of the *Red corn-poppy, Corn rose, Papaver errat'icum* seu *cerea'lē* seu *rubrum, Copper rose, Red-mailkes,* (F.) *Coquelicot.* The heads of this species contain a milky juice of a narcotic quality. A syrup, *Syr'upus Rhœ'ados,* of its flowers—*Rhœas* (Ph. L. and E.)—has been directed, which has been esteemed diaphoretic and slightly soothing; but is more admired for its colour than for any other property.

PAPAVERACEUM, Opiate.

PAPAVERCULUM, Meconium.

PAPAV'ERINE, *Papaveri'na;* from *papaver,* 'the poppy.' An alkaloid contained in opium; but not much investigated.

PAPAVERINUM, Codeine.

PAPAW TREE, Carica papaya.

PAPAYER, Carica papaya.

PAPER, BLISTERING, see Sparadrapum vesicatorium.

PAPIER ÉPISPASTIQUE, see Sparadrapum vesicatorium.

PAPIL'LA, (F.) *Papille*—diminutive, perhaps, from *papa,* one of the earliest cries of the infant, ascribed to a craving for food. The end of the breast, the nipple. See Nipple. An eminence similar to a nipple. A name given to small eminences, more or less prominent, at the surface of several parts, particularly of the skin and mucous membranes, in which latter situation they are also called villi. See Villous. They appear formed by the ultimate expansion of the vessels and nerves, and are susceptible, in some cases, of a kind of erection. They are also called *Papillæ nervo'sæ* seu *Ner'veæ, P. Pyramida'les, Nervous papillæ,* (F.) *Papilles* ou *Papilles nerveuses, Houppes nerveuses.*

Papilla Lacrymalis, see Lachrymal puncta —p. Mammæ, Nipple—p. Nervi optici, see Optic nerve—p. Pili, see Hair.

Papillæ, see Corpuscles, Pacinian—p. Caliciformes, see Papillæ of the tongue — p. Capitatæ, see Papillæ of the tongue—p. Circumvallatæ, see Papillæ of the tongue — p. Conical, see Papillæ of the tongue — p. Conoidal, see Papillæ of the tongue — p. Filiform, see Papillæ of the tongue — p. Fungiform, see Papillæ of the tongue — p. Fungoid, see Papillæ of the tongue.

Papillæ of the Kidney, (F.) *Mamelons du rein,* are the projections into the pelvis of the kidney of the apices of the cones—*Pyramids of Malpighi, Pyram'ides Malpighia'næ* — of the tubular substance of the organ. They are also called *Proces'sus mamilla'res, Carun'culæ papilla'res,* and *Papill'æ renum.*

Papillæ, Lenticular, see Papillæ of the tongue — p. Maximæ, see Papillæ of the tongue —p. Mediæ, see Papillæ of the tongue—p. Minimæ, see Papillæ of the tongue—p. Mucosæ, see Papillæ of the tongue — p. Nerveæ, Corpuscles, Pacinian — p. Nervous, see Papilla — p. Pyramidal, see Papillæ of the tongue — p. Pyramidales, see Papilla — p. Renum, see Papillæ of the kidney — p. Semilenticulares, see Papillæ of the tongue.

Papillæ of the Tongue are very numerous and marked. They are observed, particularly, at the upper surface of the organ, and are distinguished into—1. *The Lentic'ular papillæ, Papillæ muco'sæ* seu *max'imæ* seu *capita'tæ* seu *valla'tæ* seu *circumvalla'tæ* seu *trunca'tæ* seu *calyci'for'mes.* They are arranged at the base of the tongue in two oblique lines having the shape of the letter V; and united angularly at the foramen cæcum. They have, in general, an ovoid or spherical shape, and have seemed to be mucous follicles similar to those of the palate, lips, &c. 2. The *Fun'giform* or *Fungoid Papillæ, Papillæ me'diæ* seu *semilenticula're,s,* are of indeterminate number, but always more numerous than the preceding. They are irregularly disseminated near the edges and the point of the tongue; have a rounded and flattened head, supported by a short and narrow footstalk. Their tint is whitish. 3. The *Con'ical, Conoid'al* or *Pyram'idal papillæ, P. mix'imæ* seu *villo'sæ,* are the most numerous of all. Their arrangement is more regular in the forepart of the tongue than behind. They resemble small cones; the base being towards the tongue and the apex free. The anterior are very small, and have been called *Fil'iform papil'læ.* They appear to be produced by the terminations of the filaments of the lingual nerve, and are surrounded by an evident vascular network.

Papillæ Truncatæ, see Papillæ of the tongue —p. Vallatæ, see Papillæ of the tongue—p. Villosæ, see Papillæ of the tongue.

PAP'ILLARY, *Papilla're,s, Papill'ous,* (F.) *Papillaire,* from *papilla.* Of or belonging to the nipple or to the papillæ.

Papillary Body, Corpus papillare.

PAPILLI-AUT-MAMMILLI-FORMIS, Mastoid.

PAPILL'IFORM, *Papilliform'is,* from *papilla,* and *forma,* 'form.' Having the shape or appearance of a papilla.

PAPILLO'MA. A tumour, whose specific elements are those of the papillæ of the normal skin; and which consequently is composed of a stem of fibrous or homogenous connective tissue: is club-shaped, cylindrical or acuminated, and covered with a layer of epithelial cells, similar to those of the normal papillæ.—Förster.

PAPILLOUS, Papillary.

PAPOOSE ROOT, Caulophyllum thalictroïdes.

PAPPE, Mamma.

PAPPEA CAPEN'SIS. A small tree of the *Nat. Ord.* Sapindaceæ, common in Cafferland, the fruit of which is called *Wild Plums.* It

furnishes a vinous beverage, and excellent vinegar. Its kernel contains an oil, which, although eatable, is somewhat cathartic, and is recommended as an external application in tinea capitis, alopecia, &c.

PAPPUS AMERICANUS, Solanum tuberosum.

PAP'ULA. Akin to *papilla*. A *pimple, Exor'mia*, (Prov.) *Pouke, Puckle*, (Sc.) *Pluke, Plouk*, (F.) *Papule, Bouton, Bourgeon*. A small, acuminated elevation of the cuticle, with an inflamed base; very seldom containing a fluid, or suppurating, and commonly terminating in scurf or desquamation. An eruption of pimples is called, in Devonshire, *Murfles*.

Papulæ form the first order of Willan and Bateman's arrangement of cutaneous diseases.

PAPULA AGRIA, Lichen agrius — p. Fera, Herpes exedens — p. Miliaris, Miliary fever — p. Typhosa, Spots, red.

PAPULÆ, Lichen—p. Siccæ, Lichen—p. Sudoris, Miliary fever — p. Sudorales, Sudamina.

PAPULAR, Papulose.

PAPULEUX, Papulose.

PAP'ULOSE, *Papulo'sus, Pap'ulous, Papula'tus, Pimpled, Pap'ular, Papula'ris*, (F.) *Papuleux*, from *papula*. Of or belonging to, resembling, or covered with, papulæ or pimples.

PAQUERETTE VIVACE, Bellis.

PAR NERVO'RUM, *Syz'ygi nervo'rum*. A pair of nerves.

PAR NONUM, Hypoglossus—p. Opticum Nervorum, Optic nerve—p. Primum nervorum cerebri, Olfactory nerve — p. Quartum, Pathetic nerve—p. Quintum nervorum cerebralium, Trigemini—p. Secundum nervorum, Optic nerve—p. Septimum sive faciale, Facial nerve — p. Tertium, Motores oculorum—p. Trigeminum, Trigemini—p. Trium funiculorum, Trigemini — p. Vagus, Pneumogastric — p. Visorius, Optic nerve.

PARA, *παρα*, a common prefix, 'by, near, contrary to, through,' (*per ;*) 'above and beyond,' (*ultra ;*) 'besides,' (*præter.*) In certain terms, as in *Paracusis, Parapsis, Parabysma*, &c., used by Dr. Good, *para* means a defective or morbid condition.

PARA NUT, see Pichurim beans.

PARABAL'ANUS, from *παραβαλλειν*, (*παρα*, and *βαλλειν*, 'to cast,') 'to expose one-self.' A name given, by the ancients, to a person who devoted himself to the service of the sick in hospitals; and particularly during epidemics and the plague.

PARABYS'MA, from *παρα*, and *βυειν*, 'to stuff.' Infarction or engorgement of an organ—as *Parabysma Lie'nis*, Engorgement of the spleen.

PARABYSMA MESENTERICUM, Tabes mesenterica.

PARABYS'TIA, same etymon. Engorgement or infarction of an organ with blood.

PARACELSIS'TA, *Paracel'sist, Paracel'sian ;* from Paracelsus. A follower of Paracelsus.

PARACELSISTICA MEDICINA, see Spagyrists.

PARACENTE'RIUM. Same etymon as the next. Woolhouse has given this appellation to a small trocar, employed by Nuck for puncturing the eye in cases of dropsy of that organ.

PARACENTE'SIS, *Perfora'tio, Punc'tio, Punctu'ra, Cenembate'sis, Cente'sis, Compunc'tio*, (F.) *Paracentèse*, from *παρακεντεω*, (*παρα*, and *κεντεω*, 'I pierce,') 'I pierce through.' Puncture. The operation of *tapping* to evacuate the collected fluid in ascites, ovarial dropsy, &c.

PARACENTESIS, Puncturing—p. Thoracis, Thoracocentesis.

PARACENTETERION, Trocar.

PARACENTICION, Trocar.

PARACEPH'ALUS, (F.) *Paracéphale*, from *παρα*, 'defective,' and *κεφαλη*, 'head.' A genus of monsters, with the head badly formed, but voluminous; the face distinct, with a mouth; rudimental sensorial organs, and thoracic members.

PARACHRŒ'A, from *para*, and *χροα*, 'colour.' Morbid change of colour of the surface, especially of the face.

PARACHROMA, Achromatopsia.

PARACHROSIS, Decoloration.

PARACINE'SES, (G.) Parakinesien, from *para*, and *κινησις*, 'motion.' Diseases of the motor nerves; morbid movements of voluntary muscles.

PARACMASIS, Decline.

PARACMAS'TIC, *Paracmas'ticus*, from *παρακμαζω*, (*para*, and *ακμη*, 'the highest point,') 'I decrease.' Decreasing. An epithet for a distemper, which gradually decreases. Also, according to Galen, the period of life when a person is said to grow old, which he places at from 35 to 49, after which he is said to be old—a definition that would not suit us at the present day.—Gorræus, and Castelli.

PARACMASTICOS, see Acmasticos.

PARACME, Decline.

PARACOE, see Cophosis, Paracusis.

PARAC'OPE, *Paraph'ora, Paracru'sis*, from *παρακοπτω*, (*para*, and *κοπτω*, 'I strike,') 'I strike falsely.' Delirium. In Hippocrates, it means the slight delirium which sometimes occurs in febrile diseases.

PARACOUSIA, see Cophosia.

PARAC'RISES, (G.) Parakrisien: from *para*, and *κρισις*, 'secretion.' Diseases of the secretory function.—Fuchs.

PARACRUSIS, Paracope.

PARACUSIS, Cophosis. Also, perverted audition.

PARACU'SIS ACRIS, *Audi'tus a'crior, Paracu'sis oxyco'a*, from *para*, and *ακουσις*, 'the act of hearing.' The hearing painfully acute, and intolerant of the lowest sounds; a symptom in otalgia, epilepsy, cephalitis, and febrile affections.

PARACUSIS DUPLICATA, Double hearing — p Imaginaria, Tinnitus aurium — p. Imperfecta, Double hearing, P. perversa — p. Obtusa, Baryecoia — p. Oxycoia, P. acris.

PARACUSIS PERVER'SA, *P. Willisia'na* seu *im. perfec'ta, Perverse hearing*. The ear only sensible to articulate sounds, when excited by other and louder sounds intermixed with them.—Good.

PARACUSIS SURDITAS, see Cophosis — p. Willisiana, Paracusis perversa.

PARACYCLE'SES, (G.) Parakyklesen, from *para*, and *κυκλησις*, (*κυκλος*, 'a circle,') 'circulation. Diseases of the blood as regards its distribution and motion.—Fuchs.

PARACYESIS, Pregnancy, morbid, Pregnancy, preternatural—p. Abortus, Abortion—p. Tubaria, Salpingocyesis.

PARACYNAN'CHE, (*para*, and *cynanche.*) Inflammation of the external muscles of the larynx. According to others, a slight cynanche.

PARÆSTHESIA, Paresthesis — p. Olfactoria, Parosmia.

PARÆSTHESIS, Paresthesis — p. Auditiva flacca, Proptoma auricularum.

PARÆTHENAR, Parathenar.

PARAGEUSIS, Ageustia. Also, perversion of taste, *Parageu'sia, Parageust'ia, Allotrogeus'tia, Gustus deprava'tus*, from *para*, and *γευσις*, 'taste.'

PARAGEUSTIA, Parageusis.

PARAGLOSSA, *Paraglos'sē*, from *para*, and *γλωσσα*, 'the tongue;' Swelling of the tongue; *Dyspha'gia Lingua'sa, Glassomegis'tus, Macroglos'sa, Prolap'sus linguæ*. Sauvages, under the term *Paraglossa deglutito'ria*, means a pretended

doubling of the tongue into the pharynx, (F.) *Renversement de la langue.* See Glossocele.

PARAGOGE, Abduction, Coaptation.

PARAGOMPHO'SIS, *Paragomphosis capi'tis*, from *para*, and *γομφωσις*, 'a nailing.' Incomplete wedging of the head of the child in the pelvis during labour.

PARAKINESIEN, Paracineses.

PARAKRISIEN, Paracrises.

PARAKYKLESEN, Paracycleses.

PARALALIA, Mogilalia — p. Nasalis, Rhinophonia.

PARALAMP'SIS, *παραλαμψις*, from *παραλαμπω*, (*παρα*, and *λαμπω*, 'I shine,') 'I shine at the side of;' *Mac'ula corneæ margarita'cea, Perla.* A cicatrix on the transparent part of the eye.—Hippocrates.

PARALEREMA, Delirium.

PARALLAGE, Insanity.

PARALLAGMA, *Chevauchement.*

PARALLAXIS, *Chevauchement*, Insanity.

PARALLE'LA. A kind of scurfy, cutaneous eruption, affecting the palms of the hands, in parallel lines, and symptomatic of the venereal disease.—Forestus.

PARALLELISM OF DISEASES, Isopathia.

PARALOGIA, Delirium.

PARALOPH'IA, from *para*, and *λοφια*, 'the first vertebra of the back.' The lower and lateral part of the neck, near the vertebræ.—Keil.

PARALYSÉ, Paralytic.

PARALYSIE, Paralysis—*p. Musculaire atrophique*, Atrophie musculaire, progressive—*p. Saturnine*, Palsy, lead.

PARAL'YSIS, *Par'esis, Resolu'tio membro'rum* seu *nervo'rum, Carus paralysis, Catal'ysis*, (F.) *Paralysie, Résolution des membres; Anev'ria, Anev'risie, Anervisme*,—Piorry; *Palsy;* from *παραλνω*, (*παρα*, and *λνω*, 'I loosen,') 'I relax.' Abolition or great diminution of the voluntary motions, *Myoparal'ysis*, and sometimes of sensation, in one or more parts of the body.

Palsy is said to be *local*, when it affects only a few muscles. When it extends to half the body, vertically or horizontally, it is called *Hemiple'gia* or *Paraple'gia*. It is commonly symptomatic of disease of the brain or of the nerves themselves, and is a frequent accompaniment, precursor, or successor of apoplexy,—*Phrenoparal'ysis*. The immediate cause is, generally, pressure, either by blood effused, or by serum, or by vascular turgescence. At its onset, therefore, bloodletting may be advisable; but, afterwards, the disease becomes one of nervous debility, and requires stimulants to the paralyzed parts, or to the mucous membranes,—frictions, sinapisms, blisters, the moxa, baths, electricity, galvanism, purgatives, and the nux vomica, which last has the property of exciting movements where the will has no longer power. The disease generally admits only of palliation, and is extremely apt to recur.

PARALYSIS, Primula veris.

PARAL'YSIS AG''ITANS, *P. trem'ula, Syn'clonus ballis'mus, Scelotyr'bē festi'nans, Tremor, Tromos, Shaking Palsy, Trembling Palsy.* A variety of tremor, in which the muscles are in a perpetual alternation of contraction and relaxation.

PARALYSIS, BELL'S, *Bell's Palsy, Histrion'ic Paral'ysis* or *Palsy, Paral'ysis facia'lis, Prosoparal'ysis, Trismus dias'trophē Sauvage'sii, Dias'trophē Gale'ni, Hemiple'gia facia'lis, Oris tortu'ra paralyt'ica Linnæ'i, Hemiprosople'gia.* The paralysis of the face induced by a lesion of the portio dura, has been called Bell's Palsy, owing to Sir Charles Bell having been one of the first to investigate it minutely.

PARALYSIS BERIBERIA, Beriberi—p. Extremitatum, Acro-paralysis — p. Facialis, Paralysis, Bell's—p. Hemiplegia, Hemiplegia—p. Histrionic, Paralysis, Bell's—p. of the Insane, Dementia paralytica — p. Intestini recti, Proctoparalysis — p. Intestinorum, Enteroparalysis — p. Linguæ, Glossolysis — p. Medullaris, Paraplegia — p. Metallica, Palsy, lead—p. Nervi hypoglossi, Glossoplegia—p. Nervi vagi in parte thoracicâ, Asthma —p. Nervorum thoracis, &c., Stethoparalysis—p. from Poisons, P. Venenata—p. Rachialgia, Colic, metallic — p. Saturnine, Palsy, lead — p. Scorbutica, Pellagra — p. Spinalis, Paraplegia — p. Tremula, Paralysis agitans.

PARAL'YSIS VENENA'TA, *Paralysis e vene'nis, Paralysis from poisons.* Paralysis, the result of poisonous substances—as of lead, mercury, arsenic, ergot, &c.

PARALYSIS E VENENIS, P. Venanata—p. Ventricoli, Gastroparalysis.

PARALYT'IC, *Paralyt'icus, Par'alyzed, Pal'sied*, (F.) *Paralysé, Paralytique.* Same etymon as Paralysis. Affected with or causing paralysis.

PARALYTIC STROKE, see Stroke, paralytic.

PARALYZED, Paralytic.

PARAME'NIA, from *para*, and *μην*, 'a month,' *Menstrua'tio anom'ala, Menses anom'alæ, Mismenstruation.* Difficult menstruation. Disordered menstruation.

PARAMENIA DIFFICILIS, Dysmenorrhœa — p. Erroris, Menstruation, vicarious — p. Obstructionis, see Amenorrhœa — p. Profusa, Menorrhagia —p. Superflua, Menorrhagia.

PARAME'RIA, *παραμηρια*, from *para*, and *μηρος*, 'the thigh.' The internal parts of the thigh.

PARAMESOS, Annular finger, see Digitus.

PARAMO DE RUIZ, MINERAL WATERS OF. A remarkable acid spring in New Granada. It contains free sulphuric and chlorohydric acids, and has a temperature of 157° Fahr.

PARANEPHRI'TIS, from *para*, and *nephritis*, 'inflammation of the kidney.' Inflammation of the renal capsules, *Inflamma'tio renum succenturiato'rum.*

PARANŒA, Delirium, Dementia.

PARANYMPH'US, from *para*, and *νυμφη*, 'a young spouse,' 'a bride.' A name given by the ancients to him who led the bride to the house of her husband. The term was adopted into the ancient schools of medicine to designate the usual discourse pronounced at the end of the prescribed period of study for licentiate, in which the qualifications and merits of the candidate were described.

PARAPATHIA, Pathomania.

PARAPECHYON, Radius.

PARAPHIA, Parapsis.

PARAPHIMO'SIS, *Periphimo'sis, Circumligatu'ra, Phimo'sis circumliga'ta, Penis lipoderm'us*, from *para*, and *φιμοω*, 'I bridle.' Strangulation of the glans penis, owing to the opening of the prepuce being too narrow. It frequently happens in persons affected with phimosis, when the prepuce has been pushed violently behind the base of the glans, during copulation, &c. In paraphimosis, the narrow and resisting aperture of the prepuce forms, behind the corona glandis, a kind of ligature, which strangulates the part, causes it to swell and inflame, and even to become gangrenous. Attempts must be made to bring back the prepuce. These excite considerable pain, yet they must be persevered in for some time; and should they not succeed, the rings, formed by the tumefied prepuce, must be cut transversely, and the antiphlogistic treatment be adopted.

PARAPHOBIA, Hydrophobia.

PARAPHO'NIA, from *para*, and *φωνη*, 'the voice.' Affection of the voice, when its character or *timbre* is less agreeable.

PARAPHONIA CLANGENS, Oxyphonia — p. Gutturalis, Asaphia — p. Nasalis, Rhinophonia — p. Puberum, Hirquitalitas—p. Rauca, Raucedo—p. Ulcerosa, Oxyphonia.

PARAPHORA, Delirium, Paracope.

PARAPHRENESIS, Paraphrenitis — p. Diaphragmatica, Diaphragmitis.

PARAPHRÉNIE, Insanity.

PARAPHRENI'TIS, from *para*, and *φρενες*, 'the diaphragm;' *Paraphrene'sis*, (F.) *Paraphrénésie*. A name given to inflammation of the diaphragm, (see Diaphragmitis,) which was supposed always to produce delirium:—as well as to the delirium itself accompanying that affection. See Phrenitis.

PARAPHROSYNE, Delirium.

PARAPHROTES, Delirium.

PARAPLAS'TIC, *Paraplas'ticus*, from *para*, and *πλαστικος*, 'formative.' Possessed of depraved formative powers,—as Carcinoma, Encephaloma, Melanosis, &c.

PARAPLE'GIA, *Paraplex'ia*, *Rachioparal'ysis*, *Rhachioparal'ysis*, *Rhachiople'gia*, *Myeloparal'ysis*, *Paral'ysis spina'lis* seu *Medulla'ris*, *Carus paralysis paraple'gia*, (F.) *Paraplégie*, from *para*, and *πλησσω*, 'I strike.' Palsy of the lower half of the body, including the bladder and rectum. It is, generally, owing to disease of some part of the cerebro-spinal axis; especially of the spinal portion. The ancients sometimes used the term for incomplete apoplexy. Some authors have, also, made a distinction between *paraplegia* and *paraplexia*,—using the former for *partial apoplexy*,—the latter for *general* or *complete apoplexy*.

PARAPLEURITIS, Pleurodynia.

PARAPLEXIA, Paraplegia.

PARAPOPHYSES, see Vertebra.

PARAP'OPLEXY, *Parapoplex'ia*, from *para*, and *αποπληξια*, 'apoplexy.' False apoplexy; a soporous state, resembling apoplexy; and especially that which occurs in the paroxysms of pernicious intermittents.

PARAP'SIS, *Paraph'ia*, from *para*, and *απτομαι*, 'I touch.' Sense of touch or general feeling vitiated or lost.—Good.

PARAPSIS ACRIS TENERITUDO, Soreness — p. Expers, Torpor, Anæsthesia — p. Illusoria, Pseudæsthesia — p. Pruritus, Itching.

PARARMA, Fimbria.

PARARRHYTHMICUS, Pararrhythmus.

PARARRHYTH'MUS, *Pararrhyth'micus*, from *para, and ρυϑμος*, 'rhythm.' An epithet for the pulse, when it has not the rhythm proper to the age and constitution of the individual.

PARARTHRE'MA, *Pararthro'ma*, *Pararthre'sis*, *Pararthro'sis*, *Parec'tasis*, *Parastrep'sis*, from *para*, and *αρϑρον*, 'a joint,' Incomplete luxation; subluxation.

PARASCEPAS'TRA, from *para*, and *σκεπτζω*, 'I cover.' A cap or bandage, which covers the whole head.—Galen.

PARASCEUE, Apparatus.

PARAS'CHIDES, from *para*, and *σκιζω*, 'I cleave.' Fragments or splinters of a broken bone.

PAR'ASITE, *Parasi'tus*, from *παρασιτεω*, (*παρα*, and *σιτος*, 'corn,' 'food.') 'I eat by the side of.' Parasites are plants which attach themselves to other plants; and animals which live in or on the bodies of other animals,—so as to subsist at their expense. The mistletoe is a parasitic plant; — the louse a parasitic animal. The chief parasitic animals are the *Pedic'ulus huma'nus corp'oris*, *P. cap'itis*, *P. pubis*, *Pulex irri'tans*, *P. pen'etrans*, and the *Ac'arus Sca'biei*.

PARASIT'IC, *Parasit'icus*, *Par'asitoid*, *Parasitoï'des*. Same etymon. Having the nature of, or resembling a parasite,—as 'parasitic growths,' tubercles, cancer, monster, (F.) *Parasitaire*, &c.

PARASITICIDE, Antiparasitic.

PARASI'TISM, *Parasitism'us*. Same etymon as Parasite. The condition of a parasite, or of an organized body which lives on another organized body.

PARASITISMUS INTESTINALIS, Helminthiasis — p. Superficiei, Malis.

PARASITOG''ENY, *Parasitogen'ia*, *Parasitogen'esis*. The corporeal condition, which favours the development of parasites.

PARASITOID, Parasitic.

PARASPA'DIA, from *para*, and *σπαω*, 'I draw.' A preternatural opening of the urethra at the side of the penis. One whose urethra opens in this manner is called *Paraspadiæ'us* and *Paraspa'dias*.

PARASPADIÆUS, see Paraspadia.

PARAS'PHAGIS, from *para*, and *σφαγη*, 'the throat.' The part of the neck contiguous to the clavicles.

PARAS'TATA, *Paras'tates*, from *παριστημι*, (*παρα*, and *ιστημι*,) 'I stand near.' The prostate. In Hippocrates, it means the epididymis. The epididymes were called by Herophilus and Galen *Varico'sæ parastatæ*, to distinguish them from *glandulo'sæ parastatæ* or *prostate*. Rufus of Ephesus called the Tubæ Fallopianæ *Parastatæ varico'sæ*.

PARASTATA ADENOIDES, Prostate — p. Glandula, Prostate — p. Glandulosa, Prostate.

PARASTATES, Parastata.

PARASTATI'TIS, *Epididymi'tis*; from *parastata*, 'epididymis,' and *itis*, denoting inflammation. Inflammation of the epididymis.

PARASTREM'MA, *Paras'trophē*, from *παρασστρεφω*, (*παρα*, and *στρεφω*, 'I turn,') 'I distort or pervert.' Convulsive distortion, especially of the face, the soft parts being drawn laterally.

PARASTREPSIS, Pararthrema.

PARASTROPHE, Parastremma.

PARASYNANCHE, Cynanche parotidæa.

PARASYSTOLE, Acinesia.

PARATH'ENAR, *Parœ'thenar*, from *para*, and *θεναρ*, 'the sole of the foot.' Winslow called *grand parathénar*, *parathenar major*, a portion of the abductor of the little toe, *musculus scandula'rius*; and *petit parathénar*, *parathenar minor*, the short flexor of that toe.

PARATHENAR MAJOR, Abductor minimi digiti pedis — p. Minor, Flexor brevis minimi digiti pedis.

PARATHROMA, Elongatio.

PARATONIA, see Spasm.

PARATOPIA, Luxation.

PARATOP'IÆ, from *para*, and *τοπος*, 'place.' Diseases in which organs are removed from their proper position. See Ectopia.

PARATRIMMA, Chafing.

PARATROPE, Apotrope.

PARAT'ROPHY, *Parat'rophē*, *Paratroph'ia*, from *para*, and *τροφη*, 'nourishment. Misnutrition.

PARBREAKING, Vomiting.

PARDALIANCHES, Aconitum.

PARDALIANCHUM, Aconitum.

PAREC'TAMA, *Parec'tasis*, from *para*, *εκ*, 'out of,' and *τεινω*, 'I stretch.' Immoderate extension, distension, or dilatation of a part—as of the heart.

PARECTASIS, Pararthrema, Parectama.

PAREGOR'IC, *Paregor'icus*, *So'pious*, (F.) *Parégorique*, from *παρηγορεω* (*παρα* and *αγορευω*), 'I soothe, I calm.' That which soothes or assuages—as paregoric elixir. An anodyne.

PAREIA, Gena.

PAREIRA, see P. brava.

PAREI'RA BRAVA, *Cissam'pelos Pareira*, *Pareyra*, *Butua*, *Abu'ta*, *Albu'tua*, *Botou*, *Caa-pebe*, *Overo butua*, *Wild vine*, *Velvet leaf*. *Family*

Menispermeæ. *Sex. Syst.* Dicœcia Monadelphia. The root of this plant — *Pareira* (Ph. U. S.) — a native of South America and the West Indies, has a sweet taste, with considerable bitterness and slight roughness. It has been recommended in nephritic and calculous affections; but it is not much used. By A. de St. Hilaire, Pareira is assigned to *Cissampelos glaber'rima*.

PARELLE, Rumex hydrolapathum, R. patientia.

PARENCEPHALIS, Cerebellum.

PARENCEPHALITIS, Cerebellitis.

PARENCEPHALOCE'LE, from παρεγκεφαλις, (παρα, and εγκεφαλος, 'the brain,') 'the cerebellum,' and κηλη, 'a rupture.' *Hernia of the cerebel'lum;* a very rare disease. It occurs under the form of a soft, indolent, or slightly painful tumour, without change in the colour of the skin, and is situate in the occipital region. It is constituted of the cerebellum, which escapes through an aperture in the occipital bone. Great attention must be paid not to mistake it for an ordinary tumour, as its extirpation would be attended with fatal consequences.

PARENCEPHALUS, Cerebellum.

PAREN'CHYMA, *Caro parenchymat'ica* seu *vis'cerum* seu *viscera'lis* seu *viscero'sa, Substan'tia parenchymato'sa, Procheu'ma*, (F.) *Parenchyme.* The texture of glandular and other organs, composed of agglomerated globules united by areolar tissue, and tearing with more or less facility. Such is the texture of the liver, kidneys, &c. Παρεγχυμα signifies, in Greek, effusion, (παρα, εν, and χυω, 'I pour,') and it was believed, that this tissue consisted of effused blood or other fluid.

PARENCHYMA TESTIS, Pulpa testis.

PAREN'CHYMAL, *Parenchym'atous, Paren'chymous, Parenchyma'lis, Parenchymat'icus*, (F.) *Parenchymateux;* same etymon. Belonging or relating to the parenchyma of an organ.

PARENCHYMATI'TIS; from *parenchyma*, and *itis*, denoting inflammation. *Inflamma'tio parenchymat'ica.* Inflammation of the substance of an organ.

PARENCHYMATOUS, Parenchymal.

PAR'ESIS, from παριημι, 'I relax.' (F.) *Parésie.* Paralysis. According to some, a slight, incomplete paralysis, affecting motion, not sensation.

PARESTHE'SIS, *Parœsthe'sis, Paresthe'sia, Sensus imperfec'tus*, from *para*, and αισθησις, 'sensation.' Congenital misconstruction of the external organs of sense. A genus in the nosology of Good. Also, perversion of sensibility.

PARET'ICA EXARTHRO'SIS. Luxation from relaxation of the ligaments of a joint.

PARETICUS, Relaxant.

PAREYRA, Pareira brava.

PARFUM, Suffimentum.

PARIERA, Pareira brava.

PARIES, Table.

PARI'ETAL, *Parieta'lis, Pariet'inus*, from *paries, parietis*, 'a wall.' Appertaining to the parietes or walls of an organ or to the parietal bones.

PARIETAL ARTERY, see P. Bones.

PARIETAL BONES, *Ossa parieta'lia* seu *vertica'lia* seu *ver'ticis* seu *sincip'itis* seu *breg'matis* seu *bregmat'ica* seu *nerva'lia* seu *tetrago'na*, are two fellow-bones, occupying the lateral and upper parts of the cranium, in the formation of which they assist. They have a quadrilateral shape: their external surface is convex, and presents, at its middle part, an eminence called the *Parietal protuberance, Tuber parieta'lē*, (F.) *Bosse pariétale.* Their inner or cerebral surface, which is concave, has a depression that corresponds with the preceding eminence, and which is called the *Parietal fossa, Fossa parieta'lis.* Above and behind, near the superior edge of these bones, is a foramen, which does not always exist, called the *Parietal foramen, Fora'men parieta'lē*, through which passes a vein — *parietal vein* — that opens into the superior longitudinal sinus of the dura mater: and an artery — *parietal artery* — a branch of the occipital, which ramifies on the same sinus. Each parietal bone is articulated *above*, with its fellow; *below*, with the temporal bone: *before*, with the frontal; *behind*, with the occipital, and by the anterior and inferior angle with the great ala of the sphenoid. Each parietal bone is developed from a single point of ossification.

PARIETAL FORAMEN, see P. Bones — p. Fossa, see P. Bones — p. Protuberance, see P. Bones — p. Veins, see P. Bones.

PARIETA'RIA, *P. officina'lis, Helx'inē, Vitra'ria, Wall pel'litory*, (F.) *Pariétaire commune, Perce-muraille, Aumure, Herbe aux murailles* ou *des Nones. Family*, Urticeæ. *Sex. Syst.* Polygamia Monœcia. This plant grows on old walls, —hence its name, from *paries, parietis*, 'a wall,' — and contains much nitrate of potassa. It is diuretic, but is not much used.

PARIETA'RIA PENNSYLVAN'ICA, *Amer'ican Pel'litory*, a small weed, flowering from June to August, has been used in juice or decoction as a diuretic, deobstruent [?] and emmenagogue.

PARI'ETES, Plural of *Paries*, 'a wall,' (F.) *Parois.* A name given to parts which form the enclosures or limits of different cavities of the body, as the *Parietes of the cranium, chest*, &c.

PARIETINUS, Parietal.

PARIS, *P. quadrifo'lia, Sola'num quadrifo'lium, Uva inver'sa* seu *lupi'na* seu *vulpi'na, Oneberry, Truelove*, (F.) *Parisette, Raisin de Renard, Herbe à Paris, Étrangle-loup.* It possesses narcotic properties, and was formerly considered a powerful love philter. It is emetic, and is sometimes used externally as a resolvent and anodyne.

PARISAGOGE INTESTINORUM, Intussusceptio.

PARISETTE, Paris.

PARISTH'MIA, *para*, and ισθμος, 'the throat.' A word employed to designate the tonsils, and, likewise, inflammation of the tonsils. *Cynanche tonsillaris*, and Cynanche in general.

PARISTHMIOT'OMUS, from παρισθμια, 'the tonsils,' and τεμνω, 'I cut.' An instrument with which the tonsils were formerly scarified.

PARISTHMITIS, Cynanche, C. tonsillaris.

PARISTHMIUM, Tonsil.

PARISWORT, Trillium latifolium.

PARMACITY, Cetaceum — p. Poor Man's, Thlaspi bursa.

PARME'LIA PARIET'INA, *Lichen pariet'inus, Yellow wall Lichen, Common Yellow Wall Moss*, which grows abundantly on trees and walls. *Order*, Lichenaceæ, is used in intermittent fever on account of its bitterness.

PARMELIA ISLANDICA, Lichen Islandicus — p. Plicata, Lichen plicatus — p. Pulmonacea, Lichen pulmonarius — p. Roccella, Lichen roccella — p. Saxatilis, Lichen saxatilis.

PARMENTIE'RA CERIF'ERA, *Palo de velas, Candle Tree.* A forest tree in the valley of the Chagres, —*Nat. Ord.* Crescentiaceæ, — the long cylindrical fruit of which, resembling candles, serves for food for cattle.

PAROARION, Parovarium.

PAROCHETEUSIS, Derivation.

PARODON'TIDES, from *para*, and οδους, tooth.' Tumours on the gums; parulis, &c.

PARODYNIA, Dystocia — p. Perversa, Presentation, preternatural.

PAROIS, Parietes.

PAROLE, Voice, articulated.

PAROMPHALOCE'LĒ, from *para*, ομφαλος,

'the navel,' and κηλη, 'rupture.' Hernia near the navel.

PARONI'RIA, from *para*, and ονειρον, 'a dream.' Depraved, disturbed, or morbid dreaming; *Oneirodyn'ia acti'va, Erethis'mus oneirodyn'ia.* The voluntary organs connected with the passing train of ideas, overpowered by the force of the imagination during dreaming, and involuntarily excited to their natural or accustomed actions, while the other organs remain asleep.—Good.

PARONIRIA AMBULANS, Somnambulism—p. Salax, Pollution.

PARONY'CHIA, *Paron'ychis, Paronychi'tis, Pan'aris, Redu'via, Redivi'via, Vermis* seu *Pteryg'ium dig''iti, Panarit''ium, Digit''ium, Pandalit''ium, Passa, Dactyli'tis, Pana'rium, Onych'ia,* (F.) *Onglade,* from *para,* and ονυξ, ονυχος, 'the nail.' The ancients gave this name to an inflammatory tumour,—*Onychi'tis, Onyxi'tis* (Gross), —seated near the nail, and involving the pulp or matrix. Some of the moderns have extended it to inflammation of the hand, and even of the forearm. It usually means every phlegmonous tumour of the fingers or toes, and especially of the first phalanx. Four kinds of paronychia are commonly pointed out: 1. That seated between the epidermis and skin, called in France *Tourniole.* 2. That seated in the subcutaneous areolar tissue. 3. That occupying the sheath of a tendon; and 4. That considered to be seated between the periosteum and bone. The last three are only different degrees of the same disease, constituting *Whitlow,* (Prov.) *Teak,* (F.) *Mal d'aventure*: — the worst kinds, in English, are called *Felon.* The inflammation generally commences in the subcutaneous areolar tissue, and spreads to other parts, occasioning excessive, lancinating pain, owing to the parts being put upon the stretch; hence, the necessity of dividing them freely, — even down to the bone, when there is reason to believe that the affection belongs to the fourth division, — making use of emollient applications, the antiphlogistic treatment, and opiates to relieve pain.

PARONYCHIA, Asplenium ruta muraria—p. Digitium, Digitium.

PARONYCHIS, Paronychia.

PARONYCHITIS, Paronychia.

PAROPHOBIA, Hydrophobia.

PAROPIA, Canthus (lesser.)

PAROPLEXIA, Paraplegia.

PAROPSIS, Dysæsthesia visualis — p. Amaurosis, Amaurosis — p. Cataracta, Cataract — p. Glaucosis, Glaucoma — p. Illusoria, Pseudoblepsia — p. Lateralis, Dysopia lateralis — p. Longinqua, Presbytia — p. Lucifuga, Nyctalopia — p. Noctifuga, Hemeralopia — p. Propinqua, Myopia — p. Staphyloma, Staphyloma — p. Staphyloma purulentum, Hypopyon—p. Staphyloma simplex, Hydrophthalmia — p. Strabismus, Strabismus — p. Synezisis, Synezisis.

PAROPTE'SIS, from παρα, dim., and οπταω, 'I roast.' Forcing a sweat by placing a patient before the fire or putting him in a dry bath.

PARORA'SIS, from *para,* and οραω, 'I see.' Perversion of sight, which prevents the person from judging accurately of the colour of objects. *Achromatop'sia.* Hallucination.—Galen.

PARORCHID'IUM, from *para,* 'something wrong,' and ορχις, ορχιδος, 'testicle.' Any position of one or both testicles, different from that which they ought to occupy in the scrotum; — whether they may not have descended through the abdominal ring, or are drawn up to the groins by the cremaster muscle.

PAROR'CHIDO-ENTEROCE'LĒ, *Hernia paror'chido-enter'ica.* Internal hernia complicated with displacement of the testicle.—Sauvages.

PAROSMIA, Anosmia. Also, perversion of smell; *Parœsthe'sia olfacto'ria, Olfac'tus depravа'tus, Idiosyncra'sia olfacto'ria,* from *para,* and οσμη, 'odour.'

PAROS'TIA, from παρα, 'defectively,' and οστεον, 'a bone.' Bones untempered in their substance, and incapable of affording proper support.—Good.

PAROSTIA FLEXILIS, Mollities ossium—p. Fragilis, Fragilitas ossium.

PAROTIA, Cynanche parotidæa.

PAROT'ID, *Gland'ula parotide'a* seu *ad Aures, Paro'tis, Animel'læ, Alimel'læ, Lacticin'ia;* from *para,* and ους, ωτος, 'the ear.' The largest of the salivary glands, seated under the ear, and near the angle of the lower jaw. It is composed of many separate lobes, giving rise to excretory ducts, which unite to form one canal, called the *Parotid duct, Steno's canal,*—the *Ductus superior* or *Superior salivary canal,* of some. This duct, after having advanced horizontally into the substance of the cheek, proceeds through an opening in the buccinator muscle, and terminates in the mouth opposite the second upper molaris. About the middle of its course, it sometimes receives the excretory duct of a glandular body, situate in its vicinity, and called the *Ac'cessory Gland of the Parotid, So'cia Paroti'dis, Gland'ula so'cia paroti'dis.* In the substance of the parotid are found—a number of branches of the facial nerve, of the transverse arteries of the face, and the posterior auricular. It receives, also, some filaments from the inferior maxillary nerve, and from the ascending branches of the superficial cervical plexus. Its lymphatic vessels are somewhat numerous, and pass into ganglions situate at its surface or behind the angle of the jaw. The parotid secretes saliva, and pours it copiously into the mouth.

PAROTID, ACCESSORY GLAND OF THE, see Parotid.

PAROTID APONEURO'SIS. A sheath of great thickness, continuous, below, with the cervical fascia. It forms a frame-work to the parotid by means of fibrous prolongations from its deep surface. Its density accounts for the pain of parotitis, and for the difficulty with which pus makes its way to the surface.

PAROTID ARTERIES, see Parotid — p. Duct, see Parotid — p. Veins, see Parotid.

PAROTIDE, Parotis.

PAROTIDE'AN, *Parotidæ'us,* (F.) *Parotidien* Belonging or relating to the parotid.

PAROTIDITIS, Cynanche parotidæa, Parotis

PAROTIDON'CUS, *Tumor paro'tidis, T. Gland'ulæ parotide'æ,* from *parotis,* and ογκος, 'a tumour.' Swelling of the parotid.

PARO'TIS, *Phleg'monē parotide'a, Inflamma'tio paro'tidum, Cynan'chē parotidæ'a, Paroti'tis, Parotidi'tis, Dioscu'ri,* (F.) *Parotide,* is the name of a tumour seated under the ear; which is reddish, hard, and attended with obtuse pain; tho progress to suppuration being slow and difficult. Sometimes it is of a malignant character, sloughing, and long protracted. Some French pathologists restrict the term *parotide* to symptomatic parotitis — as to that which occurs in plague; whilst they apply the terms *Oreillons* or *Ourles, Parotoncies,* to Cynanche parotidæa or Mumps.

PAROTIS CONTAGIOSA, Cynanche parotidæa — p. Epidemica, Cynanche parotidæa — p. Serosa

glutine tumens, Cynanche parotidæa—p. Spuria, Cynanche parotidæa.

PAROTITIS, Cynanche parotidæa, Parotis — p. Epidemica, Cynanche parotidæa — p. Erysipelatosa, Cynanche parotidæa — p. Polymorpha, Cynanche parotidæa — p. Specifica, Cynanche parotidæa.

PAROTONCIES, see Parotis.

PAROVA'RIUM, properly *Paroö'rion; Corpus'culum con'icum Rosenmülleri*, from *para*, and *ωαριον*, 'the ovary.' A body closely analogous in structure to the epididymis, which is seated between the Fallopian tube and the ovary in the broad ligament. The Corpus Wolffianum concurs in its formation. — Kobelt.

PAROXYN'TIC, *Paroxyn'ticus*, (F.) *Paroxyntique*, from *παροξυνω*, 'I excite.' Relating to a paroxysm.

Jours paroxyntiques are days on which paroxysms take place.

PAR'OXYSM, *Paroxys'mus*, from *παροξυνω*, (*παρα*, and *οξυνειν*, 'to render sharp.') 'I irritate;' *Im'petus, Insul'tus, Inva'sio, Exacerba'tio, Acces'sio, Acces'us*, (Old Eng.) *Axes*, (F.) *Exacerbation, Redoublement, Accès*. The augmentation which supervenes at equal or unequal intervals in the symptoms of acute diseases. Also, a periodical exacerbation or fit of a disease.

PAROXYS'MAL, *Paroxysma'lis;* same etymon. (F.) *Paroxystique*. Of or belonging to a paroxysm; — as a *paroxysmal* day, (F.) *Jour paroxystique;* a day on which a paroxysm of disease occurs.

PAROXYSMUS FEBRILIS, Pyrexia.

PAROXYSTIQUE, Paroxysmal.

PARTES GENERATIONI INSERVIENTES, Genital organs — p. Genitales, Genital organs — p. Laterales nasi, Scapulæ nasi — p. Nervosæ, see Nerve — p. Obscœnæ, Genital organs.

PARTHENEIA, Virginity.

PARTHENIUM FEBRIFUGUM, Matricaria — p. Mas, Tanacetum.

PARTHEN'IUS (*Morbus*); from *παρθενος*, 'a virgin.' A disease in a young female. Also, chlorosis.

PARTHENOGEN'ESIS, 'virgin birth;' from *παρθενος*, 'a virgin,' and *γενεσις*, 'generation.' The successive production of procreating individuals from a single ovum, without any renewal of fertilization. — Owen.

PARTHENOL'OGY, *Parthenolog''ia*, from *παρθενια*, 'virginity,' and *λογος*, 'a description. A description or consideration of the state of virginity in health or disease.

PARTHENUS, Virgin.

PARTIALIS, Local.

PARTICLES, PRIMITIVE, OF MUSCLES, Sarcous Elements.

PARTICULÆ SANGUINIS, Globules of the blood.

PARTIES, LES, Genital organs — *p. Génitales*, Genital organs — *p. Honteuses*, Genital organs — *p. Génitoires*, Genital organs — *p. Naturelles*, Genital organs—*p. Nobles*, Genital organs — *p. Sexuelles*, Genital organs.

PARTIO, Parturition.

PARTRIDGE-BERRY, Gaultheria, Mitchella repens.

PARTS, THE, Genital organs.

PARTURA, Parturition.

PARTU'RIENT. *Partu'riens*, from *parturire, parturitum*, itself from *parere*, 'to bring forth.' Bringing forth, or about to bring forth, or having recently brought forth young.

The *Parturient*, *Puer'perous*, *Childbed* or *Lying-in* or *Lying-down state*, *Confinement*, *Puerpe'rium*, generally comprises the period from parturition to perfect recovery, which is usually a month. In the north of England this is called the *steg-month*, requires careful management, and is subject to various diseases.

A *Partu'rient* or *Parturifa'cient* is a medicine which induces or promotes labour; as ergot, and, perhaps borate of soda. See Abortive.

PARTURIFACIENT, Parturient.

PARTURIGO, Parturition.

PARTURIT''ION, *Puerpe'rium, Partus, Partio, Parturit''io, Parturi'go, Partu'ra, Tocos, To'cetos, Texis, Lochi'a, Apocye'sis, Mæu'sis, Maieu'sis, Nego'tium* seu *Actus parturitio'nis, Enix'us* seu *Enix'io* seu *Expul'sio fœtûs, Apoly'sis, Status parturien'di, Deliv'ery, Labour, Childbearing, Child-birth, Birth, Trav'ail*, (Sc.) *Childill, Crying, Crying out*, (F.) *Accouchement, Couche, Travail d'Enfant, Enfantement*. Same etymon as Parturient. The act of delivery of the fœtus and its appendages, also the state during and immediately after delivery — *Childbed*, (Sc.) *Gizzenbed, Gizzen*, see Parturient. Labour is the necessary consequence of conception, pregnancy, and the completion of gestation. It does not take place, at the full time, until after nine months of utero-gestation,—the causes producing it being the contraction of the uterus and abdominal muscles. By different authors, the stages of labour have been variously divided. We may, perhaps, admit of four. The *first stage* comprises the precursory signs. One, two, or three days before labour, a mucous discharge, streaked with blood, takes place from the vagina, which is called the *Signum, Leucorrhœ'a Nabo'thi, Hæmorrhag''ia Nabothi, Labour-show*, or *Show;* and, along with this, trifling grinding pains, called by the French *Mouches*, are felt in the loins and abdomen. *Second stage:* — Peculiar pains, which extend from the lumbar region towards the uterus; tension and dilatation of the neck and orifice of that organ; protrusion into the vagina of the envelopes of the fœtus, forming the *bag of waters*, (F.) *Poche des eaux;* and rupture or breaking of the waters. *Third stage:*—Contractions of the uterus and abdominal muscles; forcing pains; the head of the fœtus becomes engaged in the pelvis: the occiput being commonly situate above the left acetabulum, passes beneath the arch of the pubis. *Fourth stage:*—the head now presents at the vulva, the perineum being

considerably distended; at length it clears the external parts, and the rest of the body is easily disengaged. The child still continues attached to the mother by the umbilical cord, which has to be divided. In the course of fifteen or twenty minutes, trifling pains occur, and the secundines are expelled. This completes delivery—the *birth*, (F.) *Naissance* of the child. In by far the majority of cases, the head is the presenting part, the occiput directed anteriorly, and the face posteriorly. Of 12,633 children, born at the Hospital *La Maternité*, in Paris, from the 10th of December, 1797, to the 31st of July, 1806, the following were the presentations:

The head, with the face posteriorly...	12,120
The head anteriorly	63
The breech	198
The feet	147
The knees	3
Other positions	102
	12,633

The following table, drawn up from data furnished by Velpeau, gives an approximate view of the comparative number of presentations, according to the experience of the individuals mentioned:

TABLE, EXHIBITING THE RATIO OF PRESENTATIONS IN 1000 CASES.

Labour has received different names, according to the period of pregnancy at which it occurs, and the mode in which it takes place. It is called *miscar'riage* or *abor'tion*, prior to the seventh month; *prem'ature labour*, *Omotoc'ia*, *Partus præcox* seu *præmatu'rus*, between this and eight months and a half; and *labour at the full period*, (F.) *Accouchement à terme*, when it happens at the end of nine months. Labours have likewise been variously divided by different authors. Perhaps the one into *Nat'ural*, *Preternat'ural*, and *Labo'rious*, is as common as any;—*natural Labour* meaning that which would occur without manual assistance; *preternatural*, requiring the assistance of art, but by the hand solely: and *laborious* or *instrumen'tal*, requiring instrumental assistance; which M. Capuron calls *Accouchement Méchanique*. *Powerless labour*, the *Inertie par épuisement* of Madame Lachapelle, is that in which the muscular powers from exhaustion are unable to accomplish such delivery.

Forced labour or *parturition*, (F.) *Accouchement ou Avortement provoqué*, is labour or abortion, induced by art. When labour is accompanied with other phenomena of a deranging character, it is said to be *complicated*. When the child, even when reduced in size, cannot pass, it is termed *impracticable*, &c. See Dystocia.

The French use the term *Part*, *Partus*, at times, synonymously with *delivery*; at others, with *fœtus*, *Maieu'ma*, *Mœeu'ma*. *Suppression de part* means concealment of delivery; *Part légitime*, a fœtus which comes into the world with the condition necessary for its enjoying advantages granted by law; and *Part illégitime*, one that does not fall under those conditions.

TABLE OF THE COURSE AND MANAGEMENT OF DIFFERENT KINDS OF LABOURS.

I. Natural Labours.

Or those in which Delivery can be effected without Assistance.

Head Presenting. (*Four Positions.*)

1. *Occiput towards the Left Acetabulum.* — The head with the chin bent upon the breast clears the brim of the pelvis. Motion of rotation produced by the inclined planes of the pelvis: the occipital protuberance is carried behind the symphysis pubis, and the face towards the hollow of the sacrum.

2. *Occiput towards the Right Acetabulum.* — The head attains the outlet: clears it; the occiput being first disengaged, and the face afterwards, which passes successively along the whole of the hollow of the sacrum. The shoulders enter the brim diagonally; and execute the movement of rotation. The one behind first clears the outlet. The same thing occurs with the nates.

3. *Occiput towards the Right Sacro-iliac Symphysis.* — The same course is here followed: except that after the rotary movement, the face passes behind the symphysis pubis, and the occiput into the hollow of the sacrum. The occiput is first extruded;—the face next.

4. *Occiput towards the Left Sacro-iliac Symphysis.* — When the chin presents and is turned forwards, the face is first expelled; the head is thrown backwards. This presentation is uncommon. If the chin present and be thrown backwards, natural delivery cannot be effected.

Natural Labours.—Continued.

Lower Extremity Presenting. (*Four Positions of the Feet, Knees, and Breech.*)	1. *Heel, Tibia, or Sacrum towards the left Acetabulum.*	The nates enter the brim diagonally: movement of rotation: the one passes behind the symphysis pubis; the other towards the hollow of the sacrum. The one behind is first extruded.
	2. *Heel, Tibia, or Sacrum towards the Right Acetabulum.*	The same thing happens to the shoulders. The chin is bent upon the chest to clear the brim: movement of rotation: the occiput passes behind the symphysis pubis, and the face towards the hollow of the sacrum. The face clears the outlet first; the occiput last.
	3. *Heel, Tibia, or Sacrum towards the Right Sacro-iliac Symphysis.*	The same progress, except that after the movement of rotation, the face is towards the pubis, and the occiput towards the sacrum. The face is here again delivered first.
	4. *Heel, Tibia, or Sacrum towards the Left Sacro-iliac Symphysis.*	

II. Preternatural Labours,

Or those which require Manual Assistance only.

I. Presentation of the Head, Upper Extremities, Back, Abdomen, &c.

1. When the labour is without any serious complication, and the head is not in a good position at the brim of the pelvis, endeavours are to be made to place it in its natural position: the hand to be introduced with the fingers united, and the long diameter of the head to be placed diagonally in the brim, if possible. Or the lever may be fixed over the occiput, and, by drawing it down, a closer approximation of the chin and chest may be effected; the position of the head to the pelvis being at the same time attended to.
2. If complicated with syncope, convulsions, hemorrhage, want of uterine action, &c., the feet must be laid hold of, and the child *turned*. For this purpose, empty the rectum and bladder; and turn, if possible, prior to the escape of the liquor amnii. The female may be placed on her back or left side, with the breech over the edge of the bed. Use the right or left hand, according as the feet of the child are to the right or left side of the pelvis; always so introducing the hand, that the child shall be in its palm, and the back of the hand opposed to the inner surface of the uterus. The hand and arm to be introduced during an interval of pain; and they must be flattened and tranquil whilst the uterus is contracting forcibly. If both feet cannot be readily brought down, seize one, and tie a fillet around it.
3. If the toes point to the vertebral column, or to the abdomen of the mother, the head, in its descent, will not enter the pelvis: the chin and occiput will be hitched on the pubis and promontory of the sacrum. In such case, grasp the nates as soon as they have passed the os externum; and, during a pain, endeavour to direct the toes towards either sacro-iliac synchondrosis. When the fingers can be passed along the body of the child, and over the shoulders to the bend of the elbows, draw down the arms successively. When the body is expelled, and the head filling up the brim, the termination of labour must be accelerated by passing two fingers over the shoulder of the child; using moderate and steady extracting power, whilst one finger of the other hand, passed into the mouth, depresses the chin on the sternum. In this way, the head may be extracted.

III. Instrumental Labours,

Or those requiring the Assistance of appropriate Instruments.

General Observations.	If the pains become feeble, or inadequate from any cause;—or if the presenting part be firmly wedged in the pelvis; or the woman be becoming exhausted, instrumental assistance may be required. In all such cases, place the female on the back or left side, empty the bladder and rectum; wait till the os uteri is in a fit state; afford assistance during the pains; introduce the instrument during the intervals between the pains; have the patient on her left side (generally); and extract according to the axes of brim and outlet, as the case may be.
1. *Short Forceps*	Apply these to the sides of the head of the child, so that the ears and parietal protuberances may be within the fenestræ. Introduce the left-hand blade first; the index and middle fingers of the right hand guiding it to the ear. With the right hand pass the other in an opposite line, corresponding with the course of the first blade, guided by the fore and middle fingers of the left hand; the third and little fingers being employed to retain the left-hand blade in place; humour the instrument so as to allow the blades to lock. The handles may now be tied gently together. The force used must be from blade to blade, with a gentle, tractile effort.
2. *Long Forceps*	Applicable where the head does not enter the brim. The long forceps must be applied, in most cases, over the occiput and face of the child, so that the convex edges of the blades may be towards the hollow of the sacrum. When used, the power may be exerted from side to side, with moderate traction.
3. *Lever* or *Vectis*	The lever is applicable to the same cases as the forceps. It must not be used strictly as a lever, but as a hook with which to draw downwards. It may be applied to any part of the head, but is generally hitched on the occiput.
4. *Fillet* and *Blunt Hook*	In certain cases of breech and knee presentation, where the hand is insufficient, it may be necessary to pass over the joint a fillet, or the blunt hook, with which to exert some force of traction. The operation is very simple.

INSTRUMENTAL LABOURS.—CONTINUED.

	Disproportionate size of head, or distorted or deformed pelvis, may require the child to be destroyed, and its bulk lessened; or the Cæsarean section or symphysotomy, or the induction of premature labour may be called for.
EMBRYULCIA	The instruments required here, are the *Perforator*, *Crotchet*, and *Craniotomy Forceps*. Make a steady pressure on the abdomen; pass two fingers of the left hand up to the head: feel for a suture or fontanelle; introduce the perforator and bore through, until the progress of the instrument at is arrested by its *shoulders*. Open the handles, and turn the instrument in different directions, so that the opening may be large enough to admit the perforator, with which the brain must be broken down. If, after this, delivery cannot be accomplished without further aid, pass up the craniotomy forceps; open the handles slightly, and introduce the blade without teeth within the cranium. On closing the forceps, a hold is obtained; and a tractile force can now be exerted during the pains, and the extrusion of the child be effected. Should great difficulty exist at the brim, the bones at the top of the head may have to be removed, until the base alone remains. The chin must then be brought through first. The crotchet is often used instead of the craniotomy forceps, being passed into the opening made by the perforator, and hooked upon some bony projection in the interior of the skull; but it is not a good instrument. In presentations of the face demanding perforation of the cranium, the perforator should be introduced just above the nose, in the sagittal suture.
SYMPHYSOTOMY AND CÆSAREAN SECTION.	When it is necessary to open the head after the lower extremities have been expelled, the perforation must be made behind the ear. In cases of great narrowness of the pelvis, the operation of *Symphysotomy* has been adopted by French practitioners,—rarely by British or American; and, in extreme cases, recourse has been had to the *Cæsarean Section*.
SEPARATION OF THE HEAD OF THE FŒTUS FROM THE BODY.	If the body of the fœtus has been forcibly separated, and the head left in the uterus, it must be laid hold of with one hand, and the forceps be applied; or the head be opened and delivered, as under embryulcia. Should the head have been brought away, and the body left behind, the feet must be brought down.
INDUCTION OF PREMATURE LABOUR.	In cases of narrowness of the pelvis, where the fœtus, at the full term, cannot be born alive, delivery may be brought about at an earlier period, or as soon as the child is capable of carrying on its functions independently of the mother. The most advisable plan for accomplishing this object is merely to pass the finger round and round within the os and cervix uteri, so as to detach the decidua;—the membranes being thus left entire, and the life of the child not so much endangered, as where the membranes are punctured, and the waters evacuated. Parturition usually follows within forty-eight hours.

The laying of eggs by animals is termed, in French, *ponte*. The term has been applied to the periodical discharge—*ponte périodique* — of ova, (F.) *Chute des Œufs*, which is supposed to take place from the ovaries at each menstrual period.

PARTURITION, DRY, Partus siccus.

PARTURIUM VANUM, *Fausse couche*.

PARTUS, Parturition — p. Abactio, Abortion — p. Abactus, Abortion — p. Cæsareus, Cesarean section — p. Difficilis, Dystocia — p. Laboriosus, Dystocia, Laborious labour — p. Præcox, Parturition (premature) — p. Præmaturus, Parturition (premature)—p. Serotinus, Opsiotocia.

PARTUS SICCUS, *Dry labour* or *parturition*. Labour, which is neither preceded nor attended by a discharge of the liquor amnii.

PARU'LIS, from *para*, and *οὐλον*, 'the gum.' *Aposte'ma parulis* seu *paroulis*, *Phleg'monē Parulis*, *Gum Boil*, *Alve'olar abscess*. Small abscesses are so called which generally form in the alveoli and involve the gums, sometimes without any known cause, but which often depend upon carious teeth.

PARU'RIA, from *para*, and *οὐρεω*, 'I pass urine.' Morbid secretion or discharge of urine.

PARURIA INCONTINENS, Enuresis — p. Incontinuens aquosa, see Diabetes — p. Inops, Ischuria, false — p. Mellita, Diabetes — p. Retentionis, Ischuria—p. Retentionis renalis, Ischuria—p. Retentionis vesicalis, Retention of urine — p. Stillatitia, Strangury — p. Stillatitia mucosa, Cystirrhœa.

PARVITAS MORBOSA PARTIUM ORGANICARUM, Microtesia.

PAR'YGRON, from *para*, and *'υγρος*, 'humid.' A liquid or moist preparation for allaying topical inflammation.

PAS D'ANE, Tussilago.

PASMA, Catapasma.

PASQUE FLOWER, Anemone pulsatilla.

PASSA, Paronychia.

PASSÆ CORINTHIACÆ, see Vitis Corinthiaca.

PASSAGES, DIGESTIVE, Ways, digestive —p. Second, Ways, second.

PASSAMBIO, Rio vinaigro.

PASSE-PIERRE, Crithmum maritimum.

PASSERAGE, Iberis amara—*p. Sauvage*, Cardamine pratensis.

PASSIBILITY, GREAT, Hypercræsthesis.

PASSIFLO'RA LAURIFO'LIA, *Bay-leaved Passion Flower*. *Ord.* Passifloreæ. A native of Surinam. The fruit has a delicious smell and flavour, and quenches thirst, abates heat of the stomach, increases the appetite, &c.

PASSIFLORA MALIFOR'MIS, *Apple-shaped Granadil'la*. The fruit of this species is esteemed a delicacy in the West Indies, where it is served up at table in desserts.

Some of the genus are said to possess narcotic and emetic properties.

PASSIO, Disease, Passion — p. Æmoptoica, Hæmoptysis—p. Cadiva, Epilepsy—p. Cardiaca, Cardialgia — p. Cœliaca, Cœliac flux — p. Cholerica, Cholera—p. Felliflua, Cholera—p. Hæmoptoica, Hæmoptysis — p. Hypochondriaca, Hypochondriasis — p. Hysterica, Hysteria — p. Iliaca, Ileus — p. Ischiadica, Neuralgia femoro-poplitæa — p. Pleuritica, Pleuritis — p. Stomachica, Dyspepsia — p. Ventriculosa, Cœliac flux — p. Vomicoflua, Phthisis pulmonalis.

PASSION, *Pas'sio*, *An'imi Pathe'ma*, *Affec'tus*, *Emo'tio*, from *patior*, *passus*, 'to suffer.' An active affection or emotion of the mind; as rage, terror, love, hatred, &c.

PASSION FLOWER, BAY-LEAVED, Passiflora laurifolia—*p. Hystérique*, Hysteria—p. Iliac, Ileus.

PASSIONES ANIMI, Affections of the mind.

PASSIVE, *Passi'vus*. Same etymon as Passion. An epithet for diseases which seem owing

to a greater or less diminution of the strength, or which are without apparent reaction. Thus, passive hemorrhages are such as supervene in debilitated individuals, or under conditions in which increased action of the arteries can scarcely be presumed. The term *passive* has, also, been given to aneurisms of the heart with extenuation of the parietes; in opposition to *active* aneurisms, with thickness of the parietes — hypertrophy.

PASSULÆ MAJORES, see Vitis vinifera — p. Minores, see Vitis Corinthiaca.

PASSULA'TUM, (*Uvæ passæ*, 'raisins, dried grapes.') A medicine in which the pulp of raisins is a chief ingredient.

PASSY, MINERAL WATERS OF. This village is in the vicinity of Paris There are several springs, containing sulphates of lime, iron, and magnesia, alum, common salt, carbonate of iron, carbonic acid, &c. They are employed as a tonic and astringent.

PASTA DE ALTHÆÂ, Paste, marshmallow — p. Amygdalina, Confection (almond) — p. de Dactylis, Paste, date — p. Emulsiva, Confection (almond) — p. de Jujubis, Paste of jujubes — p. Regia, Confection (almond).

PASTA GLYCYRRHI'ZÆ GUMMA'TA ET ANISA'TA seu *Massa de extracto glycyrrhi'zæ*. A compound of *extract of liquorice, gum Senegal, sugar, Florence orris-root*, and *volatile oil of aniseed*. Demulcent.

PASTA ZINCI CHLO'RIDI, (F.) *Pâte de Canquoin, Paste of Chloride of Zinc, Canquoin's Caustic Paste*. This paste is made of three strengths, consisting, respectively, of *chloride of zinc*, 1 part; *wheaten flour*, parts 4, 3 and 2; water sufficient to make a paste. This caustic destroys the part in a direct ratio with the thickness of the layer applied.

PASTE, *Pasta*, (F.) *Pâte*. A viscid, tenacious mixture. Also, a compound medicine, like the pastil, but less consistent, flexible, less saccharine, and more mucilaginous.

A convenient paste for attaching labels to glass, or for other services, is made of *gum tragacanth* and *water*, to which *alum* is added. This the author always keeps by him. Another form is to make a solution of *Gum Arabic*, ℥j, *boiling water*, fʒij, and *glycerin*, fʒij; and another is made by mixing powdered *Gum Arabic*, and powdered *tragacanth*, of each ʒss, *water*, fʒiss, *acetic acid*, ♏xx.

PASTE, CAGLIARI, see Turundæ Italicæ.

PASTE OF CHLORIDE OF ZINC, Pasta Zinci chloridi.

PASTE, DATE, *Massa* seu *Pasta de dac'tylis*. Composed of *dates, sugar, gum Arabic, water*, and *orange-flower water*.—Ph. P. Demulcent.

PASTE OF ICELAND MOSS, *Pasta Liche'nis*, (F.) *Pâte de lichen*. A paste made by boiling lichen Islandicus to a proper consistence, and adding gum Arabic and sugar.

The *Pâte de Lichen opiacée* contains opium in addition; about ½d of a grain to an ounce.

PASTE, ITALIAN, see Turundæ Italicæ.

PASTE OF JU'JUBES, *Pasta de ju'jubis, Massa de zizypho'rum fructû*, (F.) *Pâte de Jujube*. Composed of *jujubes, gum Senegal, sugar, water*, and *tincture of lemon-peel*. Demulcent.

PASTE, MARSHMAL'LOW, *Massa de gummi Arab'ico, Pasta de althæ'â*, (F.) *Pâte de Guimauve*. A compound of *gum Arabic, sugar, white of egg*, and *orange-flower water*.—Ph. P. It is demulcent.

PASTE, TOOTH, Dentifricium — p. Vienna, see Powder, Vienna — p. Ward's, Confectio piperis nigri.

PASTEL, Isatis tinctoria.

PASTÈQUE, Cucurbita citrullus.

PASTIL, *Pastil'lus, Diocres, Avic'ula Cip'ria, Cande'la fuma'lis, Phthois, Phthois'cus*. A compound of aromatic substances in various shapes, used as a fumigating material when set fire to See Fumigation.

The French use the term *Pastille*, (L.) *Pastil'lus*, for a solid, dry, round, oblong, square, or triangular compound, whose base is essential oil, and sugar the excipient. These pastilles are in fact small lozenges, and only differ from the *tablette* in their smaller size. They are termed, also, *Saccharolés solides*.

PASTILLE, see Pastel.

PASTILLES DIGESTIVES D'HAUTERIVE-VICHY, see Trochisci Sodæ bicarbonatis —p. Fumigating, see Fumigation — *p. de Vichy*, see Trochisci Sodæ bicarbonatis.

PASTILLI DIGESTIVI DARCETII, see Trochisci Sodæ bicarbonatis — p. Emetinæ Pectorales, Trochisci emetinæ pectorales.

PASTIL'LI DE MENTHÂ PIPERI'TÂ, *Peppermint drops*. (*Sacch. alb., aquæ menthæ pip., aq. destillat.* ää ʒij. Boil to the consistence of an electuary. Take of fine *white sugar* in powder, ℥iv; *volatile oil of peppermint*, ʒss. Mix, and add the electuary whilst warm. Drop it then on marble, and dry the *drops*.—Ph. P.)

PASTILLUS, Pastil.

PASTINACA ALTISSIMA, P. opoponax—p Anethum, Anethum graveolens — p. Graveolens, Anethum graveolens—p. Opaca, P. sativa.

PASTINA'CA OPOP'ANAX. *Ord.* Umbelliferæ. The name of the plant which furnishes the *Opopanax*. The plant, whence the gum resin is obtained, has, also, been called *Fer'ula opop'onax* seu *apop'onax, Pastina'ca altiss'ima, Laserpit'ium* seu *Seli'num chiro'nium, Opopana'cum, Panax heracle'um* seu *costi'num, Pastina'ca, Kyna, Hercules-all-heal, Opop'anaxwort*.

Opopanax, Opopana'cis gummi-resi'na, Gezir, Pop'anax, Gummi Pana'cis, exudes from the roots when wounded. Its odour is strong and peculiar; taste, bitter and acrid. It is met with in the shops, in lumps of a reddish-yellow colour, without; white within. It has been recommended as an antispasmodic and emmenagogue; but is seldom used. Dose, gr. x. to ℈j, in powder.

PASTINACA PRATENSIS, P. sativa.

PASTINA'CA SATI'VA, *Elaphobos'cum, Pastinaca sylves'tris* seu *opa'ca* seu *proten'sis, Ane'thum* seu *Seli'num pastina'ca, Ban'ica, Garden parsnep*, (F.) *Panais*, The root is sweet and nutritious, and is in esteem as an article of food. It has been used as a diuretic and demulcent in calculous affections, &c.

PASTINACA SYLVESTRIS, P. sativa—p. Sylvestris tenuifolia officinarum, Daucus carota.

PATATE, Convolvulus batatas.

PATCHOULI, Pogostemon patchouli.

PÂTE, Paste — *p. Arséniçale*, Arsenical paste —*p. de Canquoin*, Pasta Zinci chloridi—*p. Caustique de Vienne*, Powder, Vienna—*p. de Guimauve*, Paste, marshmallow — *p. de Jujube*, Paste of Jujubes.

PATEL'LA. *Rot'ula, R. genu, Epigon'atis, Epigon'tis, Acromy'lē, Epigou'nis* seu *Epigu'nis* seu *Epigo'nis, Mola* seu *Concha* seu *Oc'ulus* seu *Orbis* seu *Scutum genu, Os scutifor'mē* seu *disciformē* seu *thyreoï'des, Supergenua'lis, Cavcalol'des, My'laeris, Mylē, Gamba, Olec'ranon mob'ilē*, (PROV.) *Cop bone*, (F.) *Rotule*. Diminutive of *patera*, 'a boil,' so called from its shape. A sort of sesamoid, flat, short, thick, rounded bone, situate in front of the knee, and enveloped in the substance of the tendon common to the extensor muscles of the leg. The posterior surface of the patella is divided into two *facettes*, united angularly, which are encrusted with cartilage, and each of which is articulated with one of the condyles of

the femur. The patella is developed by a single point of ossification. When the patella is fractured, it is difficult to produce bony union. This can only be accomplished by keeping the fractured extremities closely in apposition.

PATELLA, Cup — p. Fixa, Oleeranon.

PATENCY OF THE FORAMEN OVALE, see Cyanopathy.

PATENT MED'ICINE, *Médecine brevetée* ou *patentée, Remède breveté* ou *patenté.* A medicinal compound, for the sale of which the proposer obtains from government an exclusive privilege. A specification of his *invention* must be registered in the Patent Office, and, hence, it differs from a secret medicine.

PATER OMNIUM VIVENTIUM, Penis.

PATERA DIOGENIS, Palm.

PÂTEUX, Clammy.

PATHEMA, Affection, Disease.

PATHEMATOLOGY, Pathology.

PATHET'IC, *Pathet'icus*, from *παθεω*, 'I feel.' That which moves the passions. A name given to the superior oblique muscle of the eye, and, also, to a nerve.

PATHETIC MUSCLE, Oblique superior of the eye.

PATHETIC NERVE, *Nervus Pathet'icus* seu *trochlea'ris* seu *trochleato'rius* seu *trochlea'tor*, the *4th pair of nerves, Par quartum*, (F.) *Oculo-musculaire interne* (Ch.), *Nerf pathétique*, is the smallest encephalic nerve. It arises behind the inferior part of the tubercula quadrigeminæ (*testes*) at the lateral parts of the valvula Vieussenii. Its roots unite into one thin round cord, which makes a turn upon the peduncles of the brain, and passes into a canal of the dura mater, near the posterior clinoid process. It enters the orbit by the broadest parts of the sphenoidal fissure, and terminates in the superior oblique muscle of the eye, by dividing into several filaments,

PATHETISM, Magnetism, animal.

PATHIC, Morbid.

PATHICAL, Morbid.

PATHICUS, Morbid.

PATHNE, Alveolus.

PATHOGENET'IC, *Pathogenet'icus, Pathogen'icus.* Same etymon as Pathogeny. Relating to pathogeny.

PATHOGENETIC PHYSIOLOGY, *Physiolog''ia pathogenet'ica.* That part of physiology which relates to the origin of disease.

PATHOGENICUS, Pathogenetic.

PATHOG''ENY, *Pathogen'ia, Nosogen'esis, Nosogen'ia*, from *παθος*, 'a disease,' and *γενεσις*, 'generation.' The branch of pathology which relates to the generation, production and development of disease.

PATHOGNOMON'IC, *Pathognomon'icus, Signum conjunc'tum* seu *characteris'ticum* seu *morbi essentia'lē*; from *παθος*, 'an affection,' and *γινωσκω*, 'I know.' A *characteristic symptom* of a disease.

PATHOG'RAPHY, *Pathograph'ia*, from *παθος*, 'disease,' and *γραφω*, 'I describe.' A description of disease.

PATHOLOGIA, Pathology — p. Humoralis, Humorism — p. Solidaris, Solidism.

PATHOLOG''ICAL, *Patholog''icus, Pathol'ogus*, (F.) *Pathologique.* Same etymon as pathology. Relating to pathology. Often used in the sense of pathical.

PATHOLOGICAL ANATOMY, see Anatomy.

PATHOL'OGIST, *Pathol'ogus.* Same etymon. One versed in pathology.

PATHOL'OGY, *Pathematol'ogy, Pathology''ia, Pathematolog''ia, Pathology''icē*, from *παθος*, 'a disease,' and *λογος*, 'a discourse.' The branch of medicine whose object is the knowledge of disease It has been defined *diseased physiology*, and *physiology of disease.* It is divided into *general* and *special.* The *first* considers diseases in common; — the *second*, the particular history of each. It is subdivided into *internal* and *external*, or *medical* and *surgical.*

PATHOLOGY, HUMORAL, Humorism.

PATHOMA'NIA, *Parapathi'a, Moral Insanity*, from *παθος*, 'a disease,' and *mania. Ma'nia sine Delir'io.* A morbid perversion of the natural feelings, affections, inclinations, temper, habits, moral disposition, and natural impulses, without any remarkable disorder or defect of the intellect, or knowing and reasoning faculties, and particularly without any insanity or hallucination.

PATHOMYOTOM'IA; from *παθος*, 'affection,' *μυς* or *μυων*, 'muscle,' and *τομη*, 'incision.' The title of a work by Dr. John Bulwer (1649), being "a dissection of the significative muscles of the affections of the mind."

PATHOPATRIDALGIA, Nostalgia.

PATHOS, Affection, Disease.

PATIENCE, Rumex patientia — *p. d'Eau*, Rumex hydrolopathum — p. Garden, Rumex patientia — *p. Rouge*, Rumex sanguineus — *p. Sauvage*, Rumex acutus.

PATIENT, see Sick.

PATIENT OF DEATH, Agony.

PATIENTIA, Rumex patientia.

PATIENTIÆ MUSCULUS, Levator scapulæ

PATNE, Alveolus.

PATOPATRIDALGIA, Nostalgia.

PATOR NA'RIUM. The cavity or the opening of the nostrils.

PATRATIO, Ejaculation, (of sperm.)

PATRINIA JATAMANSI, Nardus Indica.

PATTE D'OIE (F.), 'Goose's foot.' An aponeurotic expansion, which covers the internal surface of the tibia at its upper part, and consists of the expansion formed by the tendons of the sartorius, gracilis, and semi-tendinosus muscles.

PATURSA, Syphilis.

PAU, (CLIMATE OF.) Pau is the capital of the department of the Lower Pyrenees, and is about 150 miles from Bordeaux, and 50 from Bayonne. The climate corresponds with that of the south-west of France generally; its great quality is the comparative mildness of its spring, and exemption from cold winds. It is regarded as a favourable winter residence for invalids labouring under chronic affections of the mucous membranes. It is too changeable for the consumptive; and to be avoided by the rheumatic.

PAULLIN'IA. This is an extract from a plant of the same name in Brazil. It is prepared by the Indians, and appears to possess excitant powers. In Brazil, and the neighbouring countries, it is given in the form of tisane — the powder being mixed with cocoa — in diarrhœa and dysentery. It has been employed also as a tonic. An extract is prepared in Brazil from *Paullinia sor'bilis, Ord.* Sapindaceæ, known there under the name of *Guarana*, which is administered in similar pathological cases.

PAUME DE LA MAIN, Palm.

PAUNCH, Inglavies.

PAUONTA, Sedatives.

PAUPIÈRE, Palpebra.

PAUSIME'NIA, from *παυσις*, 'cessation,' and *μηνες*, 'menses.' Cessation of the menses.

PAVANA WOOD, Croton tiglium.

PAVANNE, Laurus sassafras.

PAVIL'ION. The French give the name *pavillon*, to the expanded extremity of a canal or cavity,—for example, of a catheter, sound, &c.

PAVILION OF THE EAR, *Auric'ula, Pinna, O'tium, Ala*, (F.) *Auricule* ou *Oricule, Pavillon de l'oreille*, is seated behind the cheeks, beneath

the temple, and anterior to the mastoid process. Its size varies in individuals. It is free above, behind, and below. Anteriorly and within, it is continuous with the neighbouring parts. Its outer surface has several prominences, the *Helix*, *Anthelix*, *Tragus*, *Antitragus*, and *Lobe;* and several cavities—the *groove of the Helix*, the *fossa navicularis* seu *scaphoïdes*, and the *Concha*. The skin which covers the pavilion is very fine, and studded with a number of sebaceous follicles. The auricle is fixed to the head by three fibro-areolar ligaments; — a *superior*, *anterior*, and *posterior*.

PAVILLON DE L'OREILLE, Pavilion of the ear — *p. de la Trompe*, see Tuba Fallopiana.

PAVIMENTUM CEREBRI, Base of the brain.

PAVINA, Æsculus hippocastanum.

PAVITA'TIO, *Tremor;* from *pavitare*, *pavitatum*, 'to tremble from fear.' Trembling from fright.

PAVOPHOBIA, Panophobia.

PAVOR (L.), Dread. Great fright. Panophobia.

PAVO'RES NOCTUR'NI seu DORMIEN'TIUM. Fear during sleep.

PAVOT, Papaver.

PAW, Manus.

PAWPAW, see Carica papaya.

PAXWAX, see Nucha.

PAXYWAXY, see Nucha.

PAZAHAR, Bezoar.

PEA, Pisum — p. Garden, Pisum — p. Ground Squirrel, Jeffersoniana Bartoni—p. Hoary, Galega Virginiana—p. Love, Abrus precatorius—p. Nut, Arachis hypogea — p. Partridge, Cassia chamæcrista — p. Turkey, Galega Virginiana.

PEACH BRANDY, Amygdalus Persica — p. Tree, Amygdalus Persica — p. Wood, see Cæsalpinia.

PEAGLE, Primula veris.

PEAR, see Pyrus malus — p. Avocado, Persea gratissima.

PEARL, *Perla*, *Mar'garon*, *Margari'ta*, *Margel'lium*, *Marge'lis*, *U'nio*, (F.) *Perle*. A roundish concretion of a silvery white colour, and brilliant polish, found in several shells, and especially in the *Avic'ula margaritif'era*, which has, hence, been called *Mater perlarum*, *Margari'ta*, and *Mother of pearl*, and is much used in the fabrication of handles for surgical instruments, &c. Pearls were formerly given in powder as astringents and antacids. They consist of lime and an animal matter.

PEARL ASH, Potash of commerce.

PEARL, MOTHER OF, see Pearl—p. White, Bismuth, subnitrate of.

PEAU, Cutis — *p. Divine*, Condom.

PEAUCIER, Platysma myoides.

PECAN or PECCAN NUT, see Hickory.

PECCANT, *Peccans*, from *peccare*, 'to sin.' Morbid, not healthy. An epithet given by the humourists to the humours when erring in quality or quantity. See Materia Morbosa.

PECHAN, Stomach.

PECHEDEON, Perinæum.

PECHEGUERA. A pulmonary affection affecting children three or four months old in South America, which is promptly fatal.

PÉCHER, Amygdalus Persica.

PECHIAGRA, Pechyagra.

PECHING, Anhelatio.

PECHU'RIM seu PICHU'RIM CORTEX. A highly aromatic bark, the produce of a species of laurus. It is extremely fragrant, like cinnamon, which it greatly resembles in its properties. In Portugal it is used in the cure of dysentery, &c. See Pichurim beans.

PECH'YAGRA, *Pech'agra*, *Ancon'agra*, *Pectihagra*, from πηχυς, 'the elbow,' and αγρα, 'a seizure.' Gout affecting the elbow.

PECHYS, Elbow.

PECHYTYRBE, Porphyra nautica.

PECKISH, Hungry.

PECTE, Cheese.

PECTEN, Pubes. Also, a comb.

PECTEN DENTIUM, see Sepes — p. Veneris, Scandix cerefolium.

PECTIHAGRA, Pechyagra.

PECTIN, from πηκτος, 'coagulated, curdled. A name given by Braconnot to a principle which forms the basis of vegetable jelly. It is extensively diffused in the juices of pulpy fruits and roots, especially when they are mature; and occasions these juices to coagulate when they are mixed with alcohol or boiled with sugar.

It is the basis of one of the classes of elementary principles of Dr. Pereira—the *pectinaceous*.

PECTINACEOUS, Pectinous.

PECTINA'LIS, from *pecten*, *pectinis*, 'the pubes;' *Pectina'us*, *Mus'culus liv'idus*, *Pectina'tus*, (F.) *Pubio-fémoral*, *Suspubio-fémoral* (Ch.), *Pectiné*. This muscle is situate at the inner and upper part of the thigh. It is long, flat, and triangular; is attached, above, to the space which separates the ileo-pectineal eminence from the spine of the os pubis; and, below, by a flat tendon, to the oblique line which descends from the lesser trochanter to the linea aspera. The pectinalis bends the thigh on the pelvis, and carries it outwards in adduction and rotation. It may also bend the pelvis on the thigh.

PEC'TINATED, *Pectina'tus*, *Pectin'iform*, *Pec'tinate*, (F.) *Pectiné*, from *pecten*, *pectinis*, 'a comb.' Having the shape of the teeth of a comb.

PECTINATED MUSCLES, *Pectina'ti mus'culi*. The fascicular texture observed in the right auricle of the heart: — *Mus'culi Auric'ulæ Pectina'ti* Their main use probably is — to prevent the over dilatation of the auricles.

PECTINATUS, Pectinalis.

PECTINÉ, Pectinalis, Pectinated.

PECTINEUS, Pectinalis.

PECTINIFORM, Pectinated.

PEC'TINOUS, *Pectina'ceus*, *Pectino'sus*, *Pectina'ceous*, from *pectin*. Of or belonging to pectin or vegetable jelly,—as a *pectinous* or *pectinaceous* vegetable principle.

PEC'TORAL, from *pectus*, *pectoris*, 'the breast.' Relating to the breast. See Pectorals.

PECTORAL, GRAND, Pectoralis major.

PECTORALE, Corset.

PECTORALIS INTERNUS, Triangularis sterni.

PECTORA'LIS MAJOR, from *pectus*, *pectoris*, 'the breast.' *Pectora'lis*, *Sterno-cleido-brachia'lis*, (F.) *Sterno-costo-clavio-huméral*, *Sterno-huméral* (Ch.), *Grand Pectoral*. A large, flat, triangular muscle, situate at the anterior part of the chest, before the axilla. It is attached, on the one hand, by means of aponeurotic fibres, to the inner half of the anterior edge of the clavicle; to the anterior surface of the sternum, and to the cartilages of the first six true ribs;—on the other, by a strong tendon, which is inserted at the anterior edge of the bicipital groove of the humerus. The use of this muscle is to move the arm in various directions. If it be hanging by the side of the body, it carries it inwards and a little forwards. When the arm is raised, it depresses it and carries it inwards. It can, also, move it in rotation inwards. If the humerus be raised and fixed, the pectoralis major draws the trunk towards the upper extremity.

PECTORA'LIS MINOR, *Serra'tus anti'cus minor*, (F.) *Costo-coracoïdien* (Ch.), *Petit Pectoral*, *Petit*

dentelé antérieur. This muscle is situate beneath the preceding, at the anterior and upper part of the chest. It is flat and triangular; is attached by its base, which appears digitated, to the upper edge and outer surface of the 3d, 4th, and 5th true ribs, and is inserted at the anterior part of the coracoid process. The pectoralis minor draws the scapula forwards and downwards, and makes it execute a rotatory motion, by virtue of which its inferior angle is carried backwards, and the anterior depressed. When the shoulder is fixed, it elevates the ribs to which it is attached, and aids in the dilatation of the chest.

PEC'TORALS, *Pectora'lia, Thorac''ica.* Medicines considered proper for relieving or removing affections of the chest.

PECTORAL DROPS, BATEMAN'S, consist chiefly of *tincture of castor*, with some *camphor* and *opium*, flavoured by *aniseed*. Gray gives the following formula: *Castor*, ℥j; *ol. anisi*, ℥j; *camph.* ℈v; *cocci*, ℥iss; *opii*, ℈vj; *proof spirit*, a gallon.

A form, advised by a committee of the Philadelphia College of Pharmacy, is the following:—*Alcohol. dil.* cong. iv; *Santal. rubr. ras.* ℥j; digere per horas xxiv; cola, et adde *Pulv. opii, Pulv. catechu, Camphoræ*, āā ℥ij; *Ol. anisi*, ℥iv. Digest for ten days.

PECTORILOQUE, from *pectus, pectoris*, 'the chest,' and *loqui*, 'to speak.' One, according to Laënnec, who presents the phenomenon of *Pectoriloquism*. Also, a stethoscope.

PECTORILOQUIE, Pectoriloquy — *p. Chévrotante*, Egophony.

PECTORILOQUOUS BRONCHOPHONY, see Pectoriloquy.

PECTORIL'OQUY, *Pectoril'oquism, Cav'ernous voice, Pectorilo'quia*, (F.) *Pectoriloquie, Voix caverneuse, V. articulée.* Same etymon. Speech or voice coming from the chest. Laënnec has designated, by this name, the phenomenon often presented by consumptive individuals, when their chests are examined with the stethoscope. The voice seems to issue *directly* from the chest, and to pass through the central canal of the cylinder, —a phenomenon owing to the voice resounding in the anfractuous cavities, produced in the lungs by the suppuration or breaking down of tubercles, which constitute *abscesses* or *ulcers of the lungs*. By some, it is not separated from bronchophony, having been termed, at times, *strong bronchophony*, and *pectoril'oquous bronchophony*. See Laryngophony. *Whispering pectoriloquy* is that produced by the whispering of the patient.

PECTORO'SUS, from *pectus, pectoris*, 'the chest.' One who has a broad chest.

PECTUS, Sternum, Thorax — p. Carinatum, see Carina and Lordosis.

PECULIUM, Penis.

PEDAGRA, Potassæ supertartras impurus.

PEDAL, *Peda'lis*, from *pes, pedis*, 'the foot.' Relating to the foot: — as

PEDAL APONEURO'SIS, (F.) *Aponévrose pédieuse.* A thin, aponeurotic layer, which invests the extensor brevis digitorum pedis, and separates the tendons of the foot from each other.

PEDBELLY, Physconia.

PEDES, Genital organs.

PEDESIS, Pulsation.

PEDETHMOS, Pulsation.

PEDIAL'GIA, *Pedional'gia, Pedioneural'gia*, from *πεδιον*, 'the sole of the foot,' and *ἀλγος*, 'pain.' Pain in the sole of the foot. Neuralgia of the foot in general. An affection of this kind, under the name *Pédionalgie*, prevailed in 1762 at Savigliano in Piedmont, and in 1806 amongst the military at Padua.

PEDICLE, VITELLINE, see Vesicula umbilicalis.

PEDICULARIA, Delphinium staphisagria.

PEDICULATIO. Phtheiriasis.

PEDIC'ULUS, *Phtheir, Louse*, (PLOV.) *Biddy*, (F.) *Pou.* Diminutive of *pes, pedis*, 'a foot,' from its having many feet. A genus of parasitic insects. The human body is infested with three kinds: the *Body-louse*, or *Clothes-louse, Pedic'ulus vestimen'ti*, (F.) *Pou de corps*; the *Head-louse, Pedic'ulus cap'itis*, (F.) *Pou de la tête*, which lives in the hair; the *Crab-louse, Mor'pio, Fera'lis pedic'ulus, Plat'ula, Phthi'rius inguina'lis, Pedic'ulus Pubis*, (F.) *Morpion*, which infests the hair of the pubes. Infusion of tobacco, or mercurial ointment, or ointment of white precipitate of mercury, or the white or red precipitate of mercury, readily destroys them. The louse occurring in phtheiriasis, *pedic'ulus tabescen'tium*, differs from the common louse.—Vogel.

PEDICULUS CAPITIS, see Pediculus — p. Pubis, Crab-louse—p. Tabescentium, see Pediculus—p. Vestimenti, see Pediculus.

PÉDICURE, Chiropodist.

PEDICUS, Extensor brevis digitorum pedis.

PÉDIEUX (*muscle*), Extensor brevis digitorum pedis.

PEDIGAMBRA, Ysambra.

PEDILAN'THUS TITHYMALOÏDES, *Euphor'bia tithymaloïdes* seu *myrtifo'lia, Jew bush, Order*, Euphorbiaceæ, grows in various parts of the West Indies. The practitioners of Curacoa give a decoction in venereal cases. It is also used in domestic practice, in amenorrhœa. It is, moreover, known and used as *Ipecacuanha*.—Lindley.

PEDILU'VIUM, from *pedes*, 'the feet, and *lavo*, 'I wash.' *Lavipe'dium*, (F.) *Pédiluve, Bain de pied.* A bath for the feet. See Bath.

PEDION, Sole.

PEDIONALGIA, Pedialgia.

PEDIONEURALGIA, Pedialgia.

PEDIUM, Tarsus.

PÉDONCULE, Peduncle.

PÉDONCULES DU CERVEAU, Peduncles of the brain—*p. du Cervelet*, Corpora restiformia —*p. du Conarium*, Peduncles of the pineal gland —*p. de la Glande pinéale*, Peduncles of the pineal gland.

PEDORA. The sordes of the eyes, ears, and feet.

PED'UNCLE, *Pedun'culus*, (F.) *Pédoncule*, from *pes, pedis*, 'a foot.' This term has been applied to different prolongations or appendices of the encephalon.

PEDUNCLES OF THE BRAIN, *Pedun'culi* seu *Crura* seu *Caudex cer'ebri*, called, also, *Crura anterio'ra medul'læ oblonga'tæ*, (F.) *Pédoncules du Cerveau*, are two white cords, about ⅜ths of an inch in diameter, on the outside of the corpora albicantia. They arise from the medullary substance of the brain, and gradually approach, till they join the tuber annulare. They are formed, internally, of a mixture of cineritious and medullary matter; the former of which, being of a darker colour at one part than in any other part of the brain, has been called *Locus niger cruru'm cerebri, Substan'tia nigra pedun'culi.*

PEDUNCLES OF THE CEREBELLUM, *Pedun'culi* seu *Crura cerebel'li*, called, also, *Crura posterio're*, are six in number, three on each side—a *superior*, a *middle*, and an *inferior*. The superior peduncles are generally known as the *Processus cerebelli ad testes, Crura cerebel'li ad cor'pora quadrigemi'na, Bra'chia copulati'va*: the inferior are the *Processus cerebelli ad medullam oblongatam*; and the middle are called, also, *Cerebel'lar ped'uncles — Proces'sus* seu *Crura cerebel'li ad pontem, Bra'chia pontis.*

PEDUNCLES, INFERIOR, OF THE CEREBELLUM,

Corpora restiformia—p. of the Medulla oblongata, Corpora restiformia.

Peduncles of the Pine'al Gland, *Pedunculi conarii*, (F.) *Pédoncules de la glande pinéale, P. du Conarium*, are two medullary bands or strips, which seem to issue from the pineal gland, and proceed on each side upon the upper and inner region of the optic thalami. See Pineal Gland.

Pedunculi Cerebelli, Peduncles of the Cerebellum — p. Cerebri. Peduncles of the brain — p. Conarii, Peduncles of the pineal gland, see Pineal gland — p. Medullæ oblongatæ, Corpora restiformia.

PEDUNCULUS, Peduncle.

PEGA, Canthus (lesser).

PEGANELÆ'ON, *Oleum ruta'ceum, O'leum rutæ*, from *πηγανον*, 'rue,' and *ελαιον*, 'oil.' Oil of Rue.

PEGANUM, Ruta.

PEGMIN, Corium phlogisticum.

PEINE, Hunger.

PEINOTHERAPIA, Limotherapeia.

PEIRA, Effort, Experience, Nisus.

PELA'DA, (F.) *Pelade*. A word of uncertain origin, applied to alopecia, especially to that resulting from syphilis. See Alopecia.

PELA'GIA. A kind of scaly erysipelas of the hands — sometimes of the legs, at others, of the face. Pellagra [?].

PELAGRA, Pellagra.

PELARGO'NIUM ANCEPS, *Peris'tera anceps*. A South African plant, *Nat. Ord.* Geraniaceæ, the decoction of which is used by the Malays in amenorrhœa, and to promote parturition and abortion.

Pelargonium Antidysenter'icum, *Jenkinso'nia antidysenter'ica*. This South African plant is used by the natives in dysentery. It is boiled in milk.

Pelargo'nium Cucculla'tum. Common along the side of the Table Mountain. It has been recommended in decoction as an enema in colic, nephritis, and suppression of urine. It is an excellent emollient, and was formerly exported to Holland under the name *Herba Althæ'æ*.

Pelargo'nium Triste, *Polyac'tium triste*. The root of this plant, which grows at the Cape of Good Hope, is somewhat astringent, and is used there in diarrhœa and dysentery, and as an anthelmintic.

PEL'ICAN, *Pelica'nus, Peleca'nus, Pel'ecan, Pel'ecas*, *πελεκαν*, from *πελεκαω*, 'I cleave.' An instrument, curved at the end like the beak of a pelican. Its use is to extract teeth.

PELI'CIDE, *Pelu'dē, Mel coc'tum*. Boiled honey.—Ruland and Johnson.

PELICOMETER, Pelvimeter.

PELIDNOMA, Ecchymoma, Peliома.

PELIO'MA, *Pelidno'ma* from *πελος*, 'black.' A livid ecchymosis.—Forestus. See Ecchymoma.

PÉLIOSE, Purpura.

PELIOSIS, Purpura hæmorrhagica—p. Rheumatica, see Purpura simplex.

PELLA, Cutis, Prepuce.

PEL'LAGRA, *Pel'agra, Ichthyo'sis* seu *Tuber* seu *Impeti'go Pellagra, Elephanti'asis Ital'ica, Lepra Mediolanen'sis* seu *Lombard'ica, Scorbu'tus alpi'nus, Ma'nia pella'gria, Erythe'ma endem'icum* seu *pel'lagrum, Insolazione de Primavera, Male del Sole, Dermat'agra, Erysip'elasperiod'ica nervo'sa chron'ica, Paral'ysis scorbu'tica, Scurvy of the Alps*, (F.) *Mal de misère, Scorbut des Alpes*; from *πελλα*, [?] 'skin,' and *αγρα*, 'seizure.' A disease, particularly noticed among the Milanese, which consists in the skin becoming covered with wrinkles, and assuming a scaly appearance, especially in the parts exposed to the air. The strength diminishes, the intellectual faculties and sensations become obscure, and cramps, convulsions, and other lesions of muscular contractility supervene. It is a singular endemic affection, and has been supposed to follow everywhere the introduction of Indian corn: hence the name *Rapha'nia maiz'tica*, given to it by some of the Italian physicians.

An affection endemic in the Asturias is said to be a variety of pellagra. It is the *Rosa* seu *Lepra Astu'rica, Mal de la Rosa*.

PELLENS, from *pellere*, 'to drive.' Driving; impelling.

Pellen'tia Medicamen'ta are medicines that promote the occurrence of the menstrual or hæmorrhoidal flux.

PELLICULA OVI, Membrana putaminis—p. Summa, Epidermis — p. Superior, Epidermis.

PELLICULÆ CORDIS, Ostiola cordis.

PELLIS, Cutis — p. Summa, Epidermis.

PELLITORY, Xanthoxylum fraxineum — p. American, Parietaria Pennsylvanica—p. Bastard, Achillea ptarmica — p. of Spain, Anthemis pyrethrum — p. Wall, Parietaria.

PELMA, Sole.

PELOHÆ'MIA, (F.) *Pélohémie*, from *πηλος*, 'dirt,' and *'αιμα*, 'blood.' A condition of the blood in which it is thick, syrupy, and of a very dark colour — as in diseases of the blood, gangrene, &c.

PELOR, Monster.

PELORIA, Monster.

PELORIUM, Monster.

PELORUM, Monster.

PELOTE DE MER, Pila marina.

PELTALIS seu PELTATUS CARTILAGO, Thyroid cartilage, Xiphoid cartilage.

PELTAN'DRA VIRGIN'ICA, from *πελτη*, 'a target,' and *ανηρ*, 'for anther,' from the shield-shaped stamens. *Arum Virgin'icum, Calla* seu *Lecon'tia* seu *Rensselaëria Virgin'ica, Arrow Arum, Taraho, Wampee*; indigenous; of the *Order* Araceæ. The fresh roots and seeds are acrid stimulants, like Arum.

PELTIDEA AMPLISSIMA, Lichen caninus — p. Aphthosa, Lichen aphthosus — p. Canina, Lichen caninus — p. Leucorrhiza, Lichen caninus —p. Malacea, Lichen caninus—p. Spuria, Lichen caninus.

PELTIGERA CANINA, Lichen caninus.

PELUDE, Pelicide.

PELVIC, *Pel'vicus, Pelvi'nus*. (F.) *Pelvien*, from *pelvis*. Belonging or relating to the pelvis.

Pelvic Aponeuro'sis, (F.) *Aponévrose pelvienne*. A tendinous lamina, given off from the sides of the pelvis, and from the entire circumference of the brim, which passes into and lines the pelvis, and is soon divided into two distinct layers; — one *external*, the *lateral pelvic* or *obturator fascia*, which continues to line the sides of the pelvis, and covers the obturator internus muscle; the other, *internal* or *superior*, which passes inwards upon the side of the prostate, bladder, and rectum in the male, and of the bladder, vagina, and rectum in the female, in order to form the floor of the pelvis.

Pelvic Cavity, (F.) *Cavité pelvienne*. The cavity of the pelvis.

Pelvic Members. The lower extremities.

Pelvic Surface of the Il'ium. That which faces the pelvic cavity.

PELVICULA OCULI, Orbit.

PELVID'YMUS, (F.) *Pelvidyme*, from *pelvis*, and *διδυμος*, 'a twin.' A monster united at the pelvis, and double above.

PELVI-TROCHANTE'RIAN, *Pelvi-trochanteria'nus*. That which relates to the pelvis and great trochanter. The *Pelvi-trochanterian region* is formed by the muscles—*pyramidalis, two obturatores, gemini*, and *quadratus femoris*—which

pass from the pelvis to the digital cavity of the great trochanter.

PELVIEN, Pelvic.

PELVIM'ETER, *Pelycom'eter*, *Pelyom'eter*, *Pelicom'eter*, *Pyelom'eter*, (F.) *Pelvimètre*, from *pelvis*, and *μετρον*, 'a measure.' A barbarous hybrid. This name has been given to different instruments, invented for measuring the diameters of the pelvis, and particularly the antero-posterior or fore-and-aft diameter of the brim: — *Pelvim'etry*, (F.) *Pelvimétrie*. Two have been chiefly employed, especially by French practitioners: — the *Compas d'épaisseur*, and the *Pelvimeter* of Coutouly. 1. The *Compas d'épaisseur* or *Cal'lipers* of Baudelocque, is formed like a pair of compasses—with blunt extremities—the branches of which can be moved at will. One of these is applied to the symphysis pubis, and the other on the sacrum. About three inches must be deducted from this measurement for the thickness of the mons veneris, pubis, and the base of the sacrum. 2. The *Pelvimeter of Coutouly* resembles the instruments used by shoemakers for measuring the length of the foot. The two branches are introduced, in a state of approximation, into the vagina, and then separated, so that one touches the promontory of the sacrum, the other comes behind the os pubis. It is a barbarous contrivance, and its introduction ought never to be attempted on the living subject. It does not, indeed, seem possible to introduce it without mischief.

The finger is, decidedly, the best pelvimeter, and by it we can judge whether the base of the sacrum be unusually prominent. Measurement of the pelvis by the hand has been called *Pelycochirometre'sis*; from *πελυξ*, 'the pelvis,' *χειρ*, 'the hand,' and *μετρον*, 'measure.'

PELVIMETRY, see Pelvimeter.

PELVIS, *Chol'ana*, *Py'elos*, *Lec'ane*, (F.) *Bassin*; so called from *πελυς*, and *πελλις*, 'a basin,' because fancied to be shaped like an ancient basin. The part of the trunk which bounds the abdomen below. It is a large, bony, irregular, conoidal cavity,—open above and below,—which supports and contains a part of the intestines, and the urinary and genital organs; and serves, at the same time, as a fixed point for the articulation of the lower limbs, the attachment of their muscles, and the execution of their movements. The pelvis supports, behind, the vertebral column, and is sustained, before, by the ossa femorum. It is situate, in the adult, near the middle part of the body, and is composed of four broad, flat, unequally thick bones, differing much in their shape, size, and arrangement, which touch, are articulated at some part of their surface, and intimately united by means of a number of ligamentous fasciæ. Of these bones, two are behind, on the median line,—the sacrum and the coccyx; the two others are before and at the sides,—the ilia. They are fellows, and unite, before, with each other. The most important parts of the pelvis, in an obstetrical point of view, are the *brim* and the *outlet*. The Brim, *Angus'tia abdomina'lis*, *Introi'tus*, *Apertu'ra pelvis supe'rior*, *Upper Opening* or *strait of the Cavity of the Pelvis*, (F.) *Détroit supérieur*, *D. abdominal*, is the narrow part which separates the greater pelvis from the less—the *false* from the *true*, *Pelvis vera* seu *minor*. In the well-formed woman it is elliptical, and slightly inclined forwards. Its *antero-posterior*, *sacro-pubic* or *con'jugate diameter*, in a *standard pelvis*, measures $4\frac{1}{2}$ inches, but with the soft parts, $3\frac{5}{8}$ inches; its *transverse* or *iliac* or *lateral*, $5\frac{1}{4}$ inches, but with the soft parts 4 inches; and its *oblique*, *Diameter of Deventer*, with the soft parts, $4\frac{5}{8}$ inches. The Outlet, *Ex'itus*, *Inferior opening* or *strait*, *Angus'tia perinæa'lis*, (F.) *Détroit inférieur*, *D. périnéal*, forms the lower aperture of the pelvis. The antero-posterior diameter is here, on account of the mobility of the coccyx, 5 inches: the lateral, 4 inches. The Axis of the Pelvis is important to be known in obstetrics. The *Axis of the Brim* is indicated by a straight line drawn from the umbilicus to the apex of the coccyx;—the *Axis of the Outlet* by a line drawn from the first bone of the sacrum to the entrance of the vagina. An imaginary curved line which indicates the direction of the canal of the pelvis, has occasionally been termed the *curve of Carus*, in conseqence of its having been pointedly described by the German obstetrician.

Pelvis Aurium, Cochlea—p. Cerebri, Infundibulum of the brain.

Pelvis of the Kidney, *Pelvis rena'lis* seu *renum*, *Sinus*, *Venter* seu *Alvus Renum*, (F.) *Bassinet*. This is a small, membranous pouch, occupying the posterior part of the fissure of the kidney. It is placed behind the renal artery and vein; is elongated from above to below; flattened from before to behind; irregularly oval in figure; and, below, contracts considerably, to be continuous with the ureter. It receives the orifices of the infundibula, which pour the urine secreted in the kidney into its cavity.

Pelvis Minor, Pelvis—p. Ocularis, Scaphium oculare—p. Renalis, Pelvis of the kidney—p. Renum, Pelvis of the kidney—p. Vera, Pelvis.

PELYCOCHIROMETRESIS, see Pelvimeter.

PELYCOMETER, Pelvimeter.

PELYOMETER, Pelvimeter.

PEM'MICAN or PEM'ICAN. Meat cured, pounded, and mixed with fat. It has been much used as nutriment on long overland journeys.

PEMPHIGO'DES, *Pemph'igoid*, (F.) *Pemphigode*, from *πεμφις*, 'a blister,' and *ειδος*, 'form.' An epithet given by the ancients to the fever that accompanies pemphigus.

PEM'PHIGUS, *Emphly'sis Pem'phigus*, *Pom'pholyx*, from *πεμφις*, *πεμφιγος*, 'a blister;' *Febris bullo'sa* seu *vesicula'ris* seu *ampullo'sa* seu *pemphigo'des* seu *pemphingo'des*, *Exanthe'ma serosum*, *Morta*, *Pem'phigus morta* seu *Helvet'icus* seu *major* seu *minor*, *Morbus bullo'sus* seu *vesicula'ris* seu *ampulla'ceus*, *Pemphinx*, *Pemphix*, *Pemphyx*, *Typhus vesicula'ris*, *Vesic'ular Fever*, *Bladdery Fever*, *Water-blebs*, (F.) *Fièvre bulleuse* ou *vésiculaire*, *Maladie bulleuse*. A disease, defined to consist of vesicles, scattered over the body; transparent, filbert-sized, with a red, inflamed edge, but without surrounding blush or tumefaction; on breaking, disposed to ulcerate; fluid, pellucid or slightly coloured; fever, typhous. It is doubtful whether any such idiopathic fever have ever existed: the probability is, that the fever and vesications have been an accidental complication. Cullen thinks the *Pemphigus Helveticus* must have been malignant sore throat. If, however, such a distinct disease did exist, it was probably only as an endemico-epidemic.

Pemphigus Gangrænosa, Rupia escharotica—p. Hungaricus, see Anthrax—p. Infantilis, Rupia escharotica—p. Major, Pemphigus—p. Minor, Pemphigus—p. Morta, Pemphigus—p. Variolodes, see Varicella.

PEMPHINX, Pemphigus.

PEMPHIX, Pemphigus.

PEMPHYX, Pemphigus.

PEMPTÆA FEBRIS, Quintan.

PENÆA MUCRONATA, see Sarcocolla—p. Sarcocolla, Sarcocolla.

PENCHE, Abdomen.

PENCIL-LIKE PROCESSES, Styloid processes.

PENDULOUS ABDOMEN, Physconia.

PENDULUM PALATI, Velum pendulum palati.

PEN'ETRATING, *Pen'etrans*, from *penetrare*, *penetratum*, (*penitus intrare*,) 'to go into.' A wound is so called which penetrates one of the great splanchnic cavities — *Vulnus penetrans*.

A medicine is, also, so called, which is supposed to pass through the pores, and stimulate.

PENICILLUM, Compress, Penicillus.

PENICIL'LUS, *Penicillum*, *Penic'ulus*, 'a painter's brush;' diminutive of *penis*, 'a tail.' A tent or pledget. A pessary. The secreting glandiform extremities of the venæ portæ, (*Ac''ini bilio'si*) have been so termed, as well as the villous textures.

PENICILLUS, Tent.

PENICULUM, Compress.

PENICULUS, Penicillus, Tent.

PÉNIDE, Penidium.

PENIDES, Saccharum hordeatum.

PENID'IUM, *Penidium saccharat'um*, from *penis*, 'a tail,' from the shape [?], (F.) *Pénide*, *Sucre tors*. A kind of clarified sugar, made up into rolls. *Barley sugar*. It is demulcent; see Saccharum hordeatum.

PÉNIL, Mons veneris.

PENIS, 'a tail.' *Caulis*, *Coles*, *Caules*, *Caulos*, *Men'tula*, *Menta*. *Phall'us*, *Farcif'era*, *Posthē*, *Pros'thium*, *Crithē*, *Cor'ynē*, *Vomer*, *Pater om'nium viven't'ium*, *Pria'pus*, *Virga*, *V. viri'lis*, *V. genita'lis*, *Vere'trum*, *Sathē*, *Membrum virī'lē* seu *seminalē* seu *genitalē viro'rum*, *Morion*, *Cyon*, *Sic'ula*, *Tentum*, *Hasta*, *H. nuptia'lis*, *H. virī'lis*, *Vas*, *Vas'culum*, *Pecu'lium*, *Vir'gula*, *Vir*, *Thyrsus*, *Tensus*, *Clavus*, *Cauda salax*, *Cauda*, *Fas'cinum*, *F. virī'lē*, *Muto*, *Nervus*, *N. fistulo'sus* seu *fistula'ris* seu *juveni'lis*, *Per'tica per se*, *Scapus*, *Leco*, *Curcu'lio*, *Vena*, *Contus*, *Telum*, *Gurgu'lio*, *Sceptrum*, *Arma*, *Gla'dius*, *Lu'bricum Caput*, *Muti'num*, *Palus*, *Pes'sulus*, *Radix*, *Ramus*, *Rutab'ulum*, *Arma Ventris*, *Columna adstans inguin'ibus*, *Columna*, *Pyr'amis*, *Trabs*, *Spina*, *Catapulta viri'lis*, *Verpa*, *Machœ'ra*, *Taurus*; the *Yard*, *Male organ*, &c. (F.) *Verge*, *Membre viril*. This organ, the use of which is to carry the seminal fluid into the female organs of generation, is cylindroid, long, and erectile, and situate before and beneath the symphysis pubis. In the ordinary state, it is soft and pendent in front of the scrotum. During erection, it becomes elongated, upright, and assumes a triangular shape. Its upper surface is called the *Dorsum penis*, (F.) *Dos de la verge*; and, at its anterior surface, there is a longitudinal projection formed by the canal of the urethra. The two sides of the penis are round, and its posterior extremity or root is attached to the pelvis. Its anterior extremity is free, and presents the glans, prepuce, and orifice of the urethra. The penis is formed of the corpora cavernosa, the principal seat of erection; the corpus spongiosum of the urethra, for the conveyance of the urine and sperm; and of the glans, which terminates the canal. The *Arteries* of the penis are branches of the internal pudic. The *Veins* correspond with the arteries. The *Nerves* are from the internal pudic.

PENIS CEREBRI, Pineal gland — p. Femineus, Clitoris — p. Lipodermus, Paraphimosis — p. Muliebris, Clitoris.

PENNATUS, Penniform.

PEN'NIFORM, *Pennifor'mis*, *Penna'tus*, from *penna*, 'a pen,' and *forma*, 'form.' An epithet for muscles whose fleshy fibres are inserted at the side of a middle tendon, like the feathers of a pen on their common stalk.

PENNSYLVA'NIA, MINERAL WATERS OF. The most celebrated are those of Bedford. The Carlisle, Ephrata, and Yellow Springs are also frequented.

PENNYCRESS, Thlaspi.

PENNYR'YAL, Mentha pulegium, Hedeoma pulegioides — p. Hart's, Mentha cervina.

PENNYWORT, ASIATIC, Hydrocotyle Asiatica.

PENSACOLA, see Saint Augustine.

PENSÉE, Viola tricolor — *p. Sauvage*, Viola tricolor.

PENSILIA, Pudibilia.

PENSY, Viola tricolor.

PENTAMY'RON, from πεντε, 'five,' and μυρον, 'ointment.' An ancient ointment, consisting of five ingredients. These are said to have been — storax, mastich, wax, opobalsam, and unguentum nardinum. — Paulus, and Aëtius.

PENTAPHAR'MACON, from πεντε, 'five,' and φαρμακον, 'remedy.' Any medicine consisting of five ingredients.

PENTAPHYLLUM. Potentilla reptans.

PEN'TATEUCH, (SURGICAL,) *Pentateu'chus*, from πεντε, 'five,' and τευχος, 'a book,' which signifies the five books of Moses — Genesis, Exodus, Leviticus, Numbers, and Deuteronomy. By analogy, some surgeons have given the name *Surgical Pentateuch* to the division of external diseases into five classes: — wounds, ulcers, tumours, luxations, and fractures.

PENTATH'ETUM, from πεντε, 'five,' and τιθεναι, 'to place.' An ancient plaster consisting of five ingredients.

PENULA, Ingluvies.

PENZANCE, CLIMATE OF. This is the chief residence of invalids in Cornwall, England, during the winter. It is situated on Mount's Bay, about ten miles from the Land's End. It is 5½° warmer in winter than London, 2° colder in summer; scarcely 1° warmer in the spring, and only about 2½° warmer in the autumn. It is a very favourable winter residence for the phthisical invalid.

PEONY, Pæonia.

PEPANSIS, Coction, Maturation.

PEPANTICOS, Maturative.

PEPASMOS, Coction, Maturation.

PEPAS'TIC, *Pepas'ticus*, from πεπαινω, 'I concoct.' A medicine supposed to have the power of favouring the concoction of diseases. Maturative.

PEPEIRUS, Concocted.

PEPERI, Piper.

PEPINO (S.). A *cucurbitacea*, which is cultivated in great abundance in the fields of Peru. The pulp or edible part is solid, juicy, and well flavoured; but is apt to disagree.

PEPO, Cucurbita pepo — p. Lagenarius, Cucurbita lagenaria — p. Vulgaris, Cucurbita pepo.

PEPPER, BLACK, Piper nigrum — p. Cayenne, Capsicum annuum — p. Chilly, Capsicum annuum — p. Cubeb, Piper cubeba — p. Decorticated, Fulton's, see Piper nigrum — p. Guinea, Capsicum annuum — p. Jamaica, Myrtus Pimento — p. Long, Piper longum.

PEPPER BUSH, SWEET, Clethra alnifolia.

PEPPER, MALAGUET'A. This term has been applied to the fruit or seeds of several zingiberaceous plants, as well as to the pimento. It is usually considered to be synonymous with *Grana Paradi'si*, *Grains of Par'adise*, and *Grana Guinen'sia*, *Guinea grains*. — Pereira.

PEPPER, POOR-MAN'S, Polygonum hydropiper — p. Tailed, Piper cubeba — p. Turnip, Arum triphyllum — p. Water, Polygonum hydropiper — p. Water, of America, Polygonum punctatum — p. Wall, Sedum — p. White, Piper album.

PEPPERWORT, Lepidium.

PEPSIN, *Pepsine*, *Peps'inum*, *Chy'mosin*, *Gastérase*, *Diges'tive Prin'ciple*, from πεψις, 'coction,' 'digestion.' A peculiar organic matter, which, in combination with the gastric acids, is considered to form the proper digestive solvent. Its chemi-

cal constitution is unknown. It would appear that its presence is necessary to induce changes in the elements of the food, which may enable the gastric acids to act upon them so as to form chyme.

PEPSINUM, Pepsin.

PEPSIS, Coction, Digestion.

PEPTIC, *Pep'ticus*, from *πεπτω*, 'I ripen,' 'I digest.' An agent that promotes digestion, or is digestive. Also, applied adjectively to an article of food that is easy of digestion.

PEPTIC PERSUADER, see Pilulæ aloes et Kinæ Kinæ.

PEPTONE. A presumed definite combination between the solvent fluid in the stomach, and albuminous matters received into the organ as aliments. The same as Albuminose.

PER, 'by or through,' in composition often gives intensity to the signification: as *pertussis*, a violent cough.

PERACUTUS, Catoxys.

PERARTICULATIO, Diarthrosis.

PERATODYNIA, Cardialgia.

PERCE-CRANE, Perforator.

PERCE-FEUILLE, Bupleurum rotundifolium.

PERCE-MOUSSE, Polytrichum.

PERCE-MURAILLE, Parietaria.

PERCE-PIERRE, Crithmum maritimum.

PERCEP'TA, from *percipere*, *perceptum*, (*per*, and *capio*,) 'to perceive,' 'receive.' A word used by some writers on hygiene to indicate, in a general manner, the effects of the nervous action on the animal economy; in other words, the sensations, the functions of the mind, and their deterioration or privation.

PERCEPTIBILITY, see Sensibility.

PERCEP'TION, *Percep'tio*. Same etymon. The appreciation which the brain has of an impression made upon an organ of sense.

PERCEPTIV'ITY. Same etymon. The power of perception.

PERCOLATIO, Filtration. Percolation.

PERCOLA'TION, *Percola'tio*, from *percolare*, *percolatum*, (*per*, and *colare*,) 'to strain through.'

Displacer or Percolator.

The terms percolation and *displacement* are applied in pharmacy to an operation which consists in placing any substance, the virtues of which have to be extracted by a menstruum, in a funnel-shaped instrument, having a septum perforated with holes, or its tube stuffed with cotton or tow, and pouring fresh portions of the menstruum upon it until all its virtues have been extracted. The operation is used in the formation of certain infusions, extracts, tinctures, &c.

An instrument used for this purpose is called a *displacer* or *percolator*.

PERCOLATOR, see Percolation.

PERCUSS. *Percu'terē*, *Percussion*, (*per*, and *quatere*, 'to strike,') (F.) *Percuter*, *Frapper*. Same etymon as the next. To strike upon with the view of appreciating the resulting sound. To practise percussion.

PERCUS'SION, *Epicrou'sis*, *Percus'sio*. When *immediate* or direct percussion is made on the chest or abdomen, the more or less perfect resonance is an index of the state of the contained organs; and the physician is thus aided in his diagnosis. For this purpose the chest may be struck with the fingers, gathered into a bundle, and their tips placed upon a level. It is better, however, to employ *mediate percussion*, which consists in interposing, between the point of the fingers and the chest, the finger of the other hand, or a *Plexim'eter*, and striking this instead of the naked chest.

PERCUSSION, AUSCULTATORY, see Acouophonia.

PERCUTER, Percuss.

PERCUTEUR COURBE À MARTEAU, (F.) An instrument used by Baron Heurteloup in the operation of lithotomy, in which a hammer is employed instead of a screw, to force together the blades of the instrument on the foreign body.

PERDO'NIUM. A medicated wine of herbs. —Paracelsus.

PERETERIUM, Trepan.

PERETORIUM, Trepan.

PER'FORANS, from *perforo*, (*per*, and *fo rare*,) 'to bore through.' A name given to different muscles, whose tendons pass through intervals between the fibres or tendons of other muscles; thence called *perforated*. See Flexor Longus Digitorum, &c. Under the name *Perforating Ar'teries*, are included, 1. *In the hand*—arterial branches, given off by the profound palmar arch, which traverse the muscles and interosseous spaces. 2. *In the thigh*—three or four arteries, furnished by the profunda, which pass through the openings of the abductor magnus. 3. *In the foot*—the anterior and superior branches of the plantar arch.

PERFORANS CASSERII, see Cutaneous — p. Manûs, Flexor profundus perforans — p. Profundus, Flexor longus digitorum pedis profundus perforans.

PERFORATED SPOT, Locus perforatus.

PERFORATING ARTERIES, see Perforans.

PERFORATIO, Perforation — p. Cranii, see Perforator — p. Intestinorum, Enterobrosis — p. Ventriculi, Gastrobrosis.

PERFORA'TION, *Perfora'tio*, *Anatre'sis*, *Diatre'sis*. Same etymon as Perforans. An accidental opening in the continuity of organs, either from an external or internal cause.

PERFORATION, Paracentesis — *p. de l'Estomac*, Gastrobrosis — *p. des Intestins*, Enterobrosis — p. Uteri, Uterus, rupture of the.

PER'FORATOR, *Perforato'rium*, (F.) *Perce-crane*. An instrument for opening the head of the fœtus in utero, when it is necessary to diminish its size. The operation is called *Cephalotom'ia*, *Perfora'tio cra'nii*.

PERFORATORIUM, Perforator.

PERFORA'TUS. That which is pierced. Anatomists have given this name to muscles whose fibres or tendons separate to suffer other parts to pass through them. Such are the *Flexor brevis digitorum pedis*, *F. sublimis perforatus*, and *Coraco-brachialis*. Also, to parts that are perforated for any purpose — as the *substan'tia perfora'ta* of the brain.

PERFORATUS CASSERII, Coraco-brachialis.

PERFRIC'TIO, *Perfrige'rium*, *Catapsyx'is*, *Peripsyz'is*, from *perfrigere*, *perfrictum*, (*per*, and *frigere*,) 'to shiver with cold.' Considerable refrigeration. Great sense of cold: — shivering.

PERFRIGERATIO, see Rigor.

PERFRIGERIUM, Perfrictio.

PERFUSIO, Fomentation — p. Frigida, see Affusion.

PERI, *περι*, 'about, on all sides, round about.' An augmentative prefix. Hence:

PERIÆ'RESIS, from *peri*, and *αιρεω*, 'I take away.' A sort of circular incision, which the ancients made in the neighbourhood of large ab-

scesses. The periæresis is now only practised in some cases of tumours.

PERIAL'GIA, from *peri*, and *αλγος*, 'pain.' A very violent pain.

PERIAMMA, Amuletum.

PERIAPTON, Amuletum.

PERIBLAST, *Periplast*, (F.) *Périblaste*, from *περι*, 'around,' and *βλαστος*, 'a germ.' The amorphous matter, which surrounds the *endoblast*, *endoplast*, (F.) *Endoblaste* or cell nucleus, and undergoes segmentation.

PERIBLEMA, Catablema.

PERIBLEP'SIS, from *peri*, and *βλεπω*, 'I look.' The wild look that accompanies delirium. —Foësius.

PERIB'OLE, from *περιβαλλω*, (*περι*, and *βαλλω*), 'I surround.' The dress of a person. The pericardium. Also, the translation of morbific matters towards the surface of the body.

PERIBRO'SIS, *Pericra'sis*, from *περιβρωσκω*, (*περι*, and *βρωσκω*, 'I eat,') 'I eat around.' Ulceration or erosion at the corners of the eyelids.

PERICAR'DIAC, *Pericar'dial*, *Pericardi'acus*; same etymon as Pericardium. Relating to the pericardium,—as '*pericardial* murmur,' '*pericardial* effusion,' '*pericardial* arteries, veins,' &c., &c.

PERICARDIAL, Pericardiac.

PERICARDI'TIS, from *pericardium*, and *itis*, denoting inflammation; *Inflamma'tio* seu *Pleuri'tis pericar'dii*, *Cardi'tis exter'na* seu *sero'sa* seu *membrano'sa*, *Exocardi'tis*, *Inflamma'tion of the pericardium*, (F.) *Péricardite*, *Inflammation du Péricarde*. This is probably the proper appellation for most of those cases which have received the names of *Cardi'tis*, *Cardipericardi'tis*, *Cardopericardi'tis*, and *Cardiopericardi'tis*. Along with signs of pyrexia, the local symptoms resemble those of pneumonia. Those which point out that the pericardium is the seat of disease, are the following:—pain, referred to the region of the heart, or the scrobiculus cordis,—sometimes pungent, at others, dull and heavy: palpitation, accompanied with spasmodic twitchings in the neighbourhood of the heart, shooting up to the left shoulder; pulsation, and sometimes soreness of the carotids, with tinnitus aurium and vertigo; the breathing is by catches; dyspnœa considerable; pulse jarring, jerking, peculiar; the tongue white, covered with a mucous coat, and the skin often bathed in sweat, as in acute rheumatism. The *physical signs* during the first period are as follows. The action of the heart is generally evident to the eye, and may be felt by the hand. There is soreness to the touch over the intercostal spaces, and over a small surface in the epigastric region, when the pressure is directed upwards towards the pericardium. Percussion is usually natural, but at times there is dulness. On auscultation, the cardiac movements are found to be frequent, abrupt, jerking, and tumultuous; often irregular and intermittent. The pulse presents correspondnig characters. When effusion of lymph has occurred, percussion may be negative, or be but slightly affected. On auscultation, in addition to the preceding signs, there may be one or more of the rubbing or friction *bruits* resembling the rustling of parchment, or of a sawing or rasping character. In some cases, the sound is like the creaking of new leather. This has been supposed to be pathognomonic of effused lymph. The most important point in the pathology of pericarditis is its connexion with acute rheumatism; and it forms one of the most dangerous occurrences in the latter disease. It may be *acute* or *chronic*: in either case, it is, of course, formidable. The most active depletion must be used; with large doses of opium, counter-irritants, and all the means required in the most violent internal inflammations.

PERICARDITIS EXSUDATORIA SANGUINOLENTA, Hæmopericardium.

PERICAR'DIUM, *Pericar'dion*, *Perib'olē*, *Membra'na Cor circumplex'a*, *Involu'crum* seu *Ar'cula* seu *Capsa* seu *Cap'sula* seu *Cam'era* seu *Indumen'tum* seu *Pannic'ulus* seu *Membru'na* seu *Theca* seu *Saccus* seu *Sac'culus* seu *Scrotum* seu *Vagi'na* seu *Vesi'ca* seu *Arca* seu *Thal'amus rega'lis* seu *Amphies'ma* seu *Bursa Cordis*, *Sac* or *Capsule of the Heart*, (F.) *Péricarde*; from *peri*, and *καρδια*, 'the heart.' The pericardium is a membranous sac, which envelopes the heart, and the arterial and venous trunks that pass from or into it. It is seated in the separation of the mediastinum, above the central aponeurosis of the diaphragm, to which it strongly adheres. Its shape is triangular, like that of the heart, to which it is fitted. The pericardium is composed of two membranes:—the one—*external*—fibrous; the other—*internal*—serous. The latter, having lined the inner surface of the external layer, is reflected over the heart, and covers it entirely; without, however, having the heart within it; in which arrangement it resembles other serous membranes. The pericardium envelops the heart; retains it in position, and facilitates its movements by means of the serous fluid contained in its cavity—*Cavum pericardii*—and secreted by the membrane—*Liquor* seu *Aqua* seu *Humor* seu *Lympha* seu *Uri'na Pericar'dii*, *Hydrocar'dia*, which it contains in greater or less quantity.

The *arteries* of the pericardium are small, and derived from the superior phrenic, anterior mediastinal and bronchial. The *veins* accompany them, and open into the brachio-cephalic. No nerves have been traced to it. The *lymphatics* enter the lymphatic glands that surround the vena cava superior.

PERICARPIUM, Epicarpium.

PERICHOLIA, Polycholia.

PERICHONDRI'TIS, *Inflamma'tio perichon'drii*, from *perichondrium*, and *itis*, denoting inflammation. Inflammation of the perichondrium: hence *Perichondri'tis laryngea*;—Inflammation of the perichondrium covering the larynx.

PERICHON'DRIUM, (F.) *Périchondre*, from *peri*, and *χονδρος*, 'a cartilage.' A membrane of a fibrous nature, which covers cartilages that are non-articular, and bears considerable analogy to the periosteum in organization and uses.

PERICHRISIS, Circumlitio, Liniment.

PERICHRISTON, Circumlitio, Liniment.

PERICLA'SIS, from *peri*, and *κλαω*, 'I break. A comminuted fracture, with denudation of the bone. — Galen, Foësius.

PERICLYMENUM, Lonicera periclymenum —p. Vulgare, Lonicera periclymenum.

PERICNE'MIA, from *peri*, and *κνημη*, 'the leg.' The parts surrounding the tibia;—the tibia itself.

PERICOLONI'TIS, *Pericoli'tis*, from *peri*, and *colonitis*. Inflammation of the areolar tissue surrounding the colon.

PERICOLPI'TIS, from *peri*, *κολπος*, 'vagina,' and *itis*, denoting inflammation. Inflammation of the areolar tissue surrounding the vagina.

PERICRANIŒDE'MA, from *pericranium*, and *οιδημα*, 'a swelling.' Œdema of the head, owing to fluid effused under the pericranium.

PERICRA'NIUM, *Pericra'nion*, *Pericra'nia*, (F.) *Péricrane*, from *peri*, and *κρανιον*, 'the cranium.' The periosteum, which covers the cranium externally.

PERICRASIS, Peribrosis.

PERICYSTI'TIS, from *peri*, *κυστις*, 'the bladder,' and *itis*, denoting inflammation. Inflam-

mation of the areolar tissue separating the bladder from the neighbouring parts.

PERIDER'IA, from *peri*, and *δερη*, 'the neck.' Twisting of the cord round the neck of the child.

PERIDES'MIC, *Perides'micus;* from *peri*, and *δεσμος*, 'a ligament.' Some nosologists have given this name to ischuria caused by a ligature round the penis or by stricture of the urethra.

PERIDES'MIUM, from *peri*, and *δεσμος*, 'ligament.' The delicate areolar tissue covering a ligament.

PERIDIASTOLE, see Diastole.

PÉRIDIDYME, see Testicle.

PERID'ROMUS, from *peri*, and *δρομος*, 'a course.' The extreme circumference of the hairs of the head.—Gorræus.

PERIESTICOS, Salutary.

PERIGLOTTIS, Epiglottic gland: see Tongue.

PERIG'RAPHÉ, from *περιγραφω*, (*περι*, and *γραφω*, 'I write,') 'I circumscribe.' The aponeurotic intersections of the rectus abdominis are so called.—Vesalius.

PERIHEPATITIS, see Hepatitis.

PERILARYNGI'TIS, from *peri*, *larynx*, and *itis*, denoting inflammation. Inflammation of the areolar tissue surrounding the larynx, which not unfrequently ends in *perilaryngeal abscess*.

PERILYMPH, Cotunnius, liquor of.

PERIMYELITIS, Meningitis, spinal.

PERIMYS'IUM, *Fas'cia*, from *peri*, and *μυς*, 'a muscle.' The areolar membrane or sheath — *vagi'na muscula'ris*—that surrounds a muscle, or its fasciculi. The sheath of the whole muscle is termed *Perimysium externum;* of the fasciculi, *Perimysium internum*.

PERIN, *Perin*, from *περα*, 'a sac or pouch.' With some, this means the scrotum; with others, the testicle; with others, the vagina; with others, the peritonæum; and with others, the anus.

PERINÆOCELE, Hernia, perineal.

PERINÆOR'RHAPHY, *Perinæorrhaph'ia*, from *περιναιον*, 'perinæum,' and *ραφη*, 'suture.' Suture of the perinæum, (F.) *Suture du Périnée*, in cases of laceration of the same.

PERINÆ'UM, *Interfemin'eum, Interfœmin'eum, Interfœmin'ium, Interfœ'mina, Iter femin'eum, Peris, Perin, Perineum, Gressu'ra, Plechas, Am'phiplex, Peche'deon, Meso'celon, Meso'celus, Perine'on, Perinæ'os, Perine'os, Tramis, Tauros, Interforamine'um, Cocho'nē, Plichos, Mesome'rion, Fœmen, Re'gio Perinæ'i*, (F.) *Périnée*, (*πηριν, πηρινος*, 'the scrotum' [?].) The space at the inferior region of the trunk, between the ischiatic tuberosities, anus, and genital organs. It is smaller in the female than in the male; has a triangular shape, and is divided into two equal parts by a median line, called *Raphē*. It is occasionally ruptured in labour. At times, it has been made to extend posteriorly as far as the os coccygis. The part between the pudendum and anus is sometimes called *ante'rior perinæ'um*, to distinguish it from that which extends from the anus to the coccyx, called *poste'rior perinæ'um*.

PERINÆUS, Perineal.

PERINE'AL, *Perinæ'us, Perinæa'lis, Perineo'lis*. That which relates or belongs to the perinæum; as *Perineal artery, P. hernia*, &c.

PERINEAL APONEUROSIS, P. Fascia.

PERINEAL ARTERY, *Arte'ria perinæa'lis, Superficial artery of the Perinæ'um*. A branch of the internal pudic distributed to the perinæum.

PERINEAL CUTANEOUS NERVE, see Sciatic nerve, lesser.

PERINEAL FAS'CIA, *Fas'cia Perinæ'i, Perinæ'al aponeuro'sis*. The fasciæ,—*superficial* and *deep-seated*—*Perine'al lig'ament*—*Camper's ligament, Trian'gular lig'ament*,—which belong to the perinæum.

PERINE'AL FOSSA, *Fossa perinæ'i, Ischio-rectal fossa*. A conical fossa, the base of which corresponds with the skin; is formed anterirly by the transversus perinæi muscle; behind, by the inferior border of the glutæus maximus; internally, by the levator ani; and externally, by the tuber ischii. It is filled up with fat and fibrous striæ.

PERINEAL ISCHURIA, *Ischu'ria Perinea'lis*. A name given by Sauvages to retention of urine, caused by a tumour seated in the perinæum.

PERINEAL LIGAMENT, see P. fascia.

PERINEAL NERVE. A branch of the internal pudic; which is mainly distributed to the perinæum and scrotum of the male; and to the vulva and perinæum of the female.

PERINEAL REGION, Perinæum.

PERINEAL SECTION, *Sec'tio perinæa'lis*. An incision into the perinæum for the cure of stricture of the urethra.

PÉRINÉE, Perinæum.

PERINEPHRI'TIS, (F.) *Phlegmon périnéphrétique*, from *peri*, *νεφρος*, 'kidney,' and *itis*, denoting inflammation. Inflammation of the external areolar and fibrous membranes of the kidney, or of their investing adipose areolar tissue.

PERINEPHRUS, see Kidney.

PERINEURION, Neurilemma.

PÉRINÈVRE, Neurilemma.

PERINYC'TIDES, *περι*, and *νυξ, νυκτος*, 'night.' An eruption appearing at night and disappearing by day.—Erotian.

PE'RIOD, *Pe'riodus, Periodei'a, Periodeu'sis, Stad'ium, Circu'itus*, (F.) *Période*, from *peri*, and *'οδος*, 'way;' *Circuit*. *Periods* are the different phases or revolutions of a disease,—the epochs which are distinguishable in the course of a disease. Three periods are commonly enumerated. I. The *augmentation, increase*, or *progress*, (*Incremen'tum;*) 2. The *acme* or height, (F.) *État* (*Status;*) and, 3. The *decline* (*Decrementum.*) Some authors reckon only the *invasion* and *termination*.

Period is sometimes used in describing an intermittent, for the time between the commencement of a paroxysm and that of the next, including the fit as well as interval.

PERIODS, MONTHLY, Menses.

PERIODEIA, Period.

PERIODEUSIS, Period.

PERIODEUTES, Charlatan.

PERIODIC''ITY, *Periodic''itas, Rhythm*, (F.) *Périodicité*. Same etymon. The aptitude of certain physiological and pathological phenomena, in health or disease, to recur at particular periods, after longer or shorter intervals, during which they cease completely. Diseases, thus recurring, are called *periodical* or *rhyth'mical*—*Typo'ses*.

PERIODOL'OGY, *Periodolog''ia*, from *περι οδος*, 'a course or circuit,' and *λογος*, 'a discourse.' The doctrine of periodicity in health and disease

PERIODONTI'TIS, (F.) *Périodontite, Inflammation de la Membrane alvéolo-dentaire*, from *peri*, and *οδους, οδοντος*, 'a tooth.' Inflammation of the membrane that lines the socket of a tooth.

PERIODONTITIS GINGIVARUM, Ulitis.

PERIOD'OSCOPE, from *περιοδος*, 'a period,' and *σκοπεω*, 'I view.' An instrument, proposed by Dr. Tyler Smith, for the ready calculation of the periodical functions of the sex. It consists of a movable circular dial, upon which the months and days are engraved, fixed on a pivot in the centre of a large plate on which are numbered the different conditions of the reproductive system, as conception, abortion, premature labour, hemorrhage, labour, &c. By a knowledge of the date of conception, say November 14th, and fixing

the movable plate opposite the point on the fixed plate which indicates conception, the observer is enabled, at once, to see, that, allowing 280 days for gestation, labour may be expected about the 20th of August. The dial is made of card-board, and is affixed to a small volume, in which its uses and applications are explained.

PERIODUS LUNARIS, see Menses — p. Morbi, Type — p. Sanguinis, Circulation.

PERIODYN'IA, from *peri*, and *ὀδυνη*, 'pain.' A violent and extensive pain.

PÉRIONE, Decidua.

PERIOR'BITA, *Perios'teum or'bitæ*, (F.) *Périorbite*, from *peri*, and *orbita*, 'the orbit.' An appellation used, by some, for the periosteum lining the orbit, which is a continuation of the dura mater. The inflammation of this periosteum is termed *Periorbi'tis* or *Periorbiti'tis*, and *Inflamma'tio perios'tei or'bitæ*.

PERIORBITIS, see Periorbita.

PERIORBITITIS, see Periorbita.

PERIOSTEITIS, see Periostitis.

PERIOS'TEOPHYTE, from *periosteum*, and *φυω*, 'I grow.' An osseous formation, commencing in the periosteum.

PERIOS'TEUM, *Perios'teon, Perios'teos, Perios'tium, Circumossa'lè, Membra'na ossis, Omen'tum os'sium, Circumossa'lis Membra'na*, (F.) *Périoste*, from *peri*, and *οστεον*, 'a bone.' The periosteum is a fibrous, white, resisting medium, which surrounds the bones every where, except the teeth at their coronæ, and the parts of other bones that are covered with cartilage. The external surface is united, in a more or less intimate manner, to the neighbouring parts by areolar tissue. Its inner surface covers the bone, whose depressions it accurately follows. It is united to the bone by small, fibrous prolongations; and, especially, by a prodigious quantity of vessels, which penetrate their substance. The periosteum unites the bones to the neighbouring parts. It assists in their growth, either by furnishing, at its inner surface, as M. Béclard demonstrated, an albuminous exudation, which becomes cartilaginous, and at length ossifies;—or by supporting the vessels, which penetrate them to carry the materials of their nutrition. See Medullary membrane.

PERIOSTEUM INTERNUM, Medullary membrane — p. Orbitæ, Periorbita.

PERIOSTI'TIS, *Periostei'tis, Inflamma'tio perios'tei*, from *periosteum*, and *itis*, denoting inflammation. Inflammation of the periosteum.

PERIOS'TO-MEDULLI'TIS, (F.) *Périostomédullite*, from *periosteum, medulla*, 'marrow,' and *itis*, a suffix denoting inflammation. Simultaneous inflammation of the periosteum and medulla spinalis. — Gerdy.

PERIOSTO'SIS, (F.) *Périostose*. Tumour of the periosteum. Tumours are so called which are developed on bones, and formed by their outer membrane. These tumours are more rapidly developed, have a less degree of consistence, and sooner disperse than exostoses, which they resemble greatly.

PERIOSTOSTEI'TIS, (F.) *Périostostéite*, from *periosteum*, *οστεον*, 'a bone,' and *itis*, denoting inflammation. Simultaneous inflammation of the periosteum and bone.— Gerdy.

PERIPHERAD, see Peripheral aspect.

PERIPH'ERAL, *Periph'eric, Periphe'rical*; from *peri*, and *φερω*, 'I bear.' Relating or appertaining to the periphery or circumference.

PERIPHERAL ASPECT. An aspect towards the circumference of an organ.—Barclay. *Periph'erad* is used by the same writer adverbially to signify 'towards the peripheral aspect.'

PERIPHERAL VASCULAR SYSTEM, Capillary system.

PERIPHIMOSIS, Paraphimosis.

PERIPLAST, Periblast.

PERIPLEUMONIA, Peripneumonia.

PERIPLOCA INDICA, Hemidesmus Indicus — p. Mauritiana, see Scammony.

PERIP'LYSIS, from *peri*, and *πλυσις*, 'the act of washing;' *Profluvium*. A copious discharge from any part, especially from the bowels.

PERIPNEUMO'NIA, *Peripleumo'nia, Peripneumoni'tis, True peripneu'mony*, from *peri*, and *πνευμων*, 'the lung.' Inflammation of the substance of the lungs. See Pneumonia.

PERIPNEUMONIA BILIO'SA. Inflammation of the lungs, accompanied with bilious fever.

PERIPNEUMO'NIA CATARRHA'LIS. Bronchitis or pulmonary catarrh, with pain in some part of the chest. Peripneumonia notha.

PERIPNEUMO'NIA NOTHA, *P. spu'ria* seu *pituito'sa* seu *catarrha'lis, Pneumo'nia notha, Pseudoperipneumonia, Pseudo-pneumonia, Pseudo-pneumoni'tis, Bronchoc'ace, Blennotho'rax, Obstruc'tio pulmo'num pituito'sa febri'lis, Bronchi'tis asthen'ica, False* or *Bastard Peripneu'mony*, (F.) *Péripneumonie bâtarde* ou *fausse, Fausse pneumonie*. An inexact name, under which some affections are comprised that resemble pneumonia; and, especially chronic bronchitis with pleurodynia. See Bronchitis (chronic.)

PERIPNEUMONIA PITUITOSA, P. notha.

PERIPNEUMONITIS, Peripneumonia.

PERIPNEUMONY, Pneumonia — p. Bastard, Peripneumonia notha.

PERIPNEUMONY, LATENT. Peripneumony whose symptoms are so obscure as to be recognised with difficulty.

PERIPROCTI'TIS, from *περι*, 'around,' and *πρωκτος*, 'the anus.' Inflammation of the areolar tissue surrounding the rectum.

PERIPSYXIS, Catapsyxis, Perfrictio.

PERIPYE'MA, from *peri*, and *πυον*, 'pus. Suppuration around an organ; — a tooth for example.

PERIRRHŒ'A, *Perir'rhoē*, from *peri*, and *ρεω*, 'I flow.' Afflux of fluids from every point of the body towards an organ which has to remove them from the economy. Also, enuresis.

PERIS, Perin.

PERISCELIS, *Jarretière*.

PERISCYPHISMUS, Periscythismus.

PERISCYTHIS'MUS, *Periscy'thisis, Periscytis'mus, Periscy'tisis, Periscy'phisis, Periscyphismus, Scalping*, from *peri*, and *Σκυθης*, 'a Scythian,' that is, 'scalping after the manner of the Scythians.' An operation described by Paulus of Ægina. It consisted of an incision made around the cranium, and was employed in habitual weakness of the eyes, pains of the head, &c.

PERISPHAL'SIS, *Circumduc'tio*, from *peri*, and *σφαλλω*, 'I move.' A circular motion impressed on a luxated bone, for the purpose of reducing it.

PERISSODACTYLUS, Polydactylus.

PERISPLENITIS, see Splenitis.

PERISTALTIC, Systaltic — p. Action, Peristole.

PERISTAPHYLINUS EXTERNUS, Circumflexus musculus — p. Inferior, Circumflexus musculus — p. Internus, Levator palati.

PERISTERA ANCEPS, Pelargonium anceps.

PERISTERIUM, Verbena officinalis.

PERISTER'NA, from *peri*, and *στερνον*, 'the sternum.' The lateral parts of the chest.

PERIS'TOLÉ, *Motus Peristal'ticus* seu *compresso'rius* seu *vermicula'ris* seu *testudin'eus*, from *peri*, and *στελλω*, 'I contract,' 'I close.' The *peristaltic action* of the intestines, *Motus peristal'ticus*, (F.) *Mouvement péristaltique*. It consists of a kind of undulation or vermicular movement,

in appearance irregular, but in which the circular fibres of the muscular membrane of the intestine contract successively, from above downwards, in proportion as the chyme advances in the alimentary canal; so that, being compressed above, it is pushed into the next portion of the intestine, whose fibres are in a state of relaxation. When the fibres contract inversely, they occasion an *antiperistaltic action*. The peristaltic action is involuntary, and is not under the immediate influence of either brain or spinal marrow. It continues for some time after death.

PERISTOMA, Peristroma.

PERISTOMIUM, Mouth.

PERISTRO'MA, *Peris'toma, Mus'cus villo'sus, Crusta membrana'cea* seu *vermicula'ris*, from *peri*, and *στρωννυμι*, 'to spread.' The villous or mucous coat of the intestines.—Castelli.

PERISYS'TOLE, from *peri*, and *συστολη*, 'contraction.' The interval that exists between the systole and diastole of the heart, which is only perceptible in the dying.—Bartholine.

PERITERION, *Trépan perforatif.*

PERITESTIS, Albuginea.

PÉRITOINE, Peritonæum.

PERITOME, Circumcision.

PERITONÆREX'IS, *Peritonæorex'is*, from *peritonæum*, and *ρηγνυμι*. 'to break.' Hernia formed by the rupture of the peritonæum.

PERITONÆ'UM, *Peritone'um, Peritonæ'on, Peritonei'on, Peritonæ'os, Peritoni'on, Peritone'os, Velamen'tum abdomina'lē, Tu'nica præten'sa* seu *Operimen'tum præten'sum* seu *Membra'na abdomi'nis, Pagos, Siphar, Syphar, Zepach, Ziphac*, (F.) *Péritoine*, from *peri*, and *τανω*, 'I stretch.' A serous membrane, which lines the abdominal cavity, *Peritonæ'um parieta'lē*, extends over the greater part of the organs contained there, *Peritonæum intestina'lē* seu *viscera'lē*, envelops them wholly or in part, and maintains their respective relations by means of different prolongations and ligamentous folds: — the *mesentery, epiploon, mesocolon*, &c. Like all the serous membranes, the peritoneum, except in the female, is a sort of sac without aperture, which covers the abdominal organs, without containing them within it, and the internal surface of which is smooth, and lubricated by a serous fluid. In the male fœtus, the peritonæum furnishes a prolongation, which accompanies the testicle at the time of its descent, and, in the female fœtus, forms the *Canal of Nuck*. Below the neck of the gall-bladder, the peritonæum has a triangular opening, called the *Foramen* or *Hiatus of Winslow*, through which it proceeds behind the stomach, to form a sort of secondary cavity, called the *posterior cavity of the peritonæum*, (F.) *Arrière cavité péritonéale* ou *Cavité des Épiploons.*

PERITONÆUM DUPLICATUM, Epiploon, gastrocolic.

PERITONE'AL, *Peritonæ'us.* That which appertains or relates to the peritoneum.

PÉRITONITE, Peritonitis — *p. Puerpérale*, see Peritonitis.

PERITONI'TIS, *Empres'ma* seu *Cauma Peritonitis, Peritonæi'tis, Inflamma'tio* seu *Phleg'monē Peritonæ'i, Phlegma'sia* or *Inflammation of the Peritonæ'um*, from *peritoneum*, and *itis*, denoting 'inflammation.' (F.) *Péritonite, Inflammation du Péritoine.* The characteristic signs of acute inflammation of the peritonæum are, — violent pain in the abdomen, increased by the slightest pressure, often by the simple weight of the bed-clothes. It generally occurs in the parturient state; *Lochoperitoni'tis*, and begins on the second or third day after delivery. At times, a malignant epidemic, and perhaps contagious, variety has made its appearance, and destroyed numbers of females. This has been described under the name *Puer'peral Fever, Metroperitoni'tis, Ene'cia Syn'ochus Puerpera'rum*, (F.) *Péritonite puerpérale, Métropéritonite puerpérale, Fièvre puerpérale, Typhus puerpéral, Erythemat'ic* or *Nonplas'tic Puerperal Peritonitis, Typhohæ'mic Peritoni'tis, Adynam'ic* or *Malig'nant Puer'peral Fever, Low Fever of Childbed.* It is, according to some, a malignant inflammation of the peritoneum and uterus; according to others, a *Uterine Phlebitis.* In any form it requires active treatment, early employed. The appearances on dissection are such as occur whenever a serous membrane has been inflamed, and such inflammation has produced death:—effusion of fluid with flakes of coagulable lymph in it; appearances of vascularity, &c., in the membrane. The treatment — in *active peritonitis*—must consist of the same course as recommended under Enteritis. In the *chronic* kind, symptoms must be combated as they arise, and it may be advisable to excite a new action in the system by means of mercury. In the epidemic and malignant variety, unless bleeding be freely employed at the very outset, it does harm. If used early, it is of decided advantage. Everything depends upon arresting the morbid process at the outset.

PERITONITIS, ERYTHEMATIC, see Peritonitis — p. Hepatica, see Hepatitis — p. Nonplastic, see Peritonitis — p. Puerperal, see Peritonitis — p. Typhohæmic, see Peritonitis.

PERITTOMA, Excrement.

PERITYPHLI'TIS; from *peri*, and *typhlitis*, inflammation of the cæcum. Inflammation of the areolar substance surrounding the cæcum. See Typhlo-enteritis.

PERI-UTERINE, *Peri-uteri'nus*, badly compounded from *peri*, and *uterus*. That which is situated around the uterus; hence "*periuterine* inflammation" or "*periuterine* phlegmon," — inflammation of the areolar tissue around the uterus.

PERIWINKLE, LESSER, Vinca minor.

PERIZO'MA, from *περιζωννυμι*, (*περι*, and *ζωννυμι*, 'to gird,) 'to gird around.' A bandage; a girdle. In Fabricius Hildanus, a truss. Herpes zoster. The diaphragm.

PER'KINISM. A therapeutical means, first employed by Dr. Elisha Perkins, of Norwich, Connecticut, towards the termination of the last century, and named after him. It consisted in drawing over affected or other parts the pointed extremities of two metallic rods, called *Metallic Tractors*, each made of a different metal. The success obtained, was through the influence of the imagination; and, consequently, as a remedial agent, it ranks as high as animal magnetism, but no higher. The operation was, also, called *Tractora'tion.*

PER'KINIST. A believer in and practiser of Perkinism.

PERKINIS'TIC. Relating or belonging to Perkinism.

PERLA, Pearl, Paralampsis.

PERLE, Pearl.

PERMISTIO, Coition.

PERMIXTIO, Coition.

PERMOTIO, Motion.

PERNICIEUX, Deleterious.

PERNICIOSUS, Deleterious.

PERNIO, Chilblain.

PERNOCTATIO, Insomnia.

PEROCEPH'ALUS, from *πηρος*, 'deficient,' and *κεφαλη*, 'head.' A monster with a defective head.

PEROCOR'MUS, from *πηρος*, 'deficient,' and *κορμος*, 'trunk.' A malformation in which the trunk is defective, and too short, from the ab-

sence of one or more vertebræ, — the head and limbs being normal.

PERODACTYLEUS, Flexor longus digitorum pedis profundus perforans.

PERODYNIA, see Cardialgia.

PEROMEL'IA, from πηρος, 'deficient,' and μελος, 'a limb.' Congenital misconstruction, or mutilation of the limbs. A genus in the nosology of Good.

PEROM'ELUS. A monster possessed of the deformity mentioned above.

PÉRONÉ, Fibula — *p. Col du*, Collum fibulæ.

PERONE'AL, *Peronæ'us, Fibula'ris, Fib'ular*, (F.) *Péronier*, from περονη, 'the fibula.' Belonging or relating to the fibula.

Peroneal Artery, *Fib'ular, A.*, arises from the popliteal, and is situate deeply in the posterior and outer part of the leg. It gives off branches of little importance. Near the outer ankle, it divides into two branches. 1. The *posterior peroneal*, which descends behind the lower joint of the fibula, on the outer surface of the calcaneum. 2. The *anterior peroneal*, which crosses the inferior extremity of the interosseous ligament, to be distributed on the dorsal surface of the foot.

Peroneal Muscles are three in number. 1. *Peronæus Brevis* seu *Secundus* seu *Anti'cus* seu *Me'dius, Semi-fibulæ'us*, (F.) *Grand-péronéo-sus-métatarsien, Court péronéo-latéral, Moyen Péronier.* A muscle, situate beneath the peronæus longus. It is attached above, to the outer surface of the fibula, and terminates, below, at the posterior extremity of the 5th metatarsal bone, after having been reflected beneath the malleolus externus. It extends the foot upon the leg, at the same time raising a little the outer edge. It may, also, act upon the leg, and extend it upon the foot. 2. *Peronæus Longus* seu *primus* seu *posti'cus* seu *max'imus* seu *poste'rior*, (F.) *Tibi-péronéo-tarsien, Long péronier latéral, Péronéo-sous-tarsien*, (Ch.) *Muscle grand péronier.* This muscle is situate at the outer part of the leg. It is long, thick, and triangular above; thin, narrow, and flat below. It is attached above to the outer edge of the upper extremity of the fibula, and to the upper third of the outer surface of that bone. Below, it terminates at the outer part of the posterior extremity of the first metatarsal bone. This muscle extends the foot on the leg, turning its point outward, and raising its outer edge. It acts, also, upon the leg, which it extends on the foot. 3. *Peronæus Tertius, Nonus Vesa'lii*, (F.) *Péronier antérieur, Petit péronéo-sus-métatarsien* (Ch.,) *Petit Péronier.* A muscle, situate at the anterior, outer, and inferior part of the leg. It is long and flat, and is attached, above, to the inferior third of the anterior margin and inner surface of the fibula; terminating, below, at the posterior extremity of the 5th metatarsal bone. This muscle bends the foot on the leg, by raising its outer edge. It can, also, bend the leg on the foot.

Peroneal Nerve, see Popliteal nerves.

Peroneal Vein follows the same course as the artery.

PERONEDACTYLIUS, Flexor longus digitorum pedis profundus perforans.

PÉRONÉO-LATÉRAL COURT, Peronæus brevis — *p. Phalangien du gros orteil*, Flexor longus pollicis pedis — *p. Sous-phalangettien du pouce*, Flexor longus pollicis pedis — *p. Sous-tarsien*, Peronæus longus — *p. Sus-métatarsien*, Peronæus tertius — *p. Sus-métatarsien, grand*, Peronæus brevis — *p. Sus-phalangettien du pouce*, Extensor proprius pollicis pedis — *p. Tibi-sus-phalangettien commun*, Extensor communis digitorum pedis — *p. Sus-phalangien du pouce*, Extensor proprius pollicis pedis.

PERONEUM, Fibula.

PÉRONIER, Peroneal.

PÉRONIER, GRAND, Peronæus longus — *p. Latéral, long*, Peronæus longus — *p. Moyen*, Peronæus brevis — *p. Petit*, Peronæus tertius.

PERONODACTYLIÆUS, Flexor longus digitorum pedis profundus perforans.

PERONODACTYLIUS, Flexor longus digitorum pedis profundus perforans.

PEROSO'MUS, from πηρος, 'deficient,' and σωμα, 'body.' A monster, whose whole body is imperfectly developed. — Gurlt.

PEROSPLANCH'NICA, from πηρος, 'deficient,' and σπλαγχνον, 'a viscus.' Congenital misconstruction of the viscera. A genus in the nosology of Good.

PERPENDICULUM HEPATIS, Suspensory ligament of the liver.

PERPERACU'TUS. 'Extremely acute.' An epithet applied to very violent and rapid diseases.

PERPLEXI MORBI, see Complication.

PERPLICA'TION, *Perplica'tio*; from *per*, 'through,' and *plico, plicatum*, 'to fold.' A method of tying arteries, which consists in making a small incision in the side of the artery, near its bleeding orifice, introducing a small pair of forceps, seizing the open extremity, and drawing it backward, through the aperture made in the side of the vessel, so as to form a kind of knot.

PERROSIN, see Pinus abies.

PERRY COUNTY WARM SPRINGS. These are in Pennsylvania, eleven miles from Carlisle, and fourteen from Harrisburg. Temperature 67°; impregnation not much. They are used for bathing.

PERSEA CAMFORA, see Camphor — p. Cassia, Laurus cassia — p. Cinnamomum, Laurus cinnamomum — p. Cubeba, Piper cubeba.

Per'sea Gratis'sima, *Laurus Persea, Palta tree, Avocado Pear.* A slender, very high tree of Peru, with a small dome-like top, which grows on the eastern declivity of the Andes, and rises, at times, to the height of more than 60 feet. Its fruit — (S.) *Palta* — which is pear-shaped, is generally much liked. It dissolves, like butter, on the tongue, and hence is called, in some of the French colonies, *beurre végétale.* The leaves are reckoned balsamic, pectoral and vulnerary. The seeds are very astringent.

Persea Pichurim, see Pichurim beans — p. Sassafras, Laurus sassafras.

PERSIAN FIRE, Anthracion.

PERSICA VULGARIS, Amygdalus Persica.

PERSICAIRE ÂCRE, Polygonum hydropiper — *p. Brulante*, Polygonum hydropiper — *p. Douce*, Persicaria — *p. Poivrée*, Polygonum hydropiper.

PERSICARIA, Polygonum Persicaria — p. Minor, Polygonum Persicaria — p. Mitis, Polygonum Persicaria — p. Urens, Polygonum hydropiper — p. Wandspiked, Polygonum Virginianum — p. Water, Polygonum amphibium.

PERSIL, Apium petroselinum — *p. d'Âne*, Chærophyllum sylvestre — *p. Faux*, Æthusa cynapium — *p. de Macédoin*, Bubon Macedonicum — *p. de Montagne*, Athamanta aureoselinum.

PERSIMMON, Diospyros Virginiana.

PERSOLATA, Arctium lappa.

PERSOLLATA Arctium lappa

PERSOLUTA, Arctium lappa.

PERSPICILLUM, see Spectacles.

PERSPIRABILE SANCTORIANUM, Perspiration.

PEPSPIRA'TION, *Perspira'tio, Transpira'tio, Diffla'tio, Diap'noë, Diapnœ'a, Diapneu'sis, Perspirabi'lis Sanctoria'num*, from *per*, 'through,

'd *spirare, spiratum*, 'to breathe, exhale.' The *insensible transpiration* or exhalation continually going on at the surface of the skin and membranes. Sensible perspiration is called *sweat*. The perspiratory fluid is secreted by an appropriate glandular apparatus, termed by Breschet, *diapnog''enous*, (F.) *Appareil diapnogène ; the sudorip'arous glands, Gland'ulæ sudorip'aræ, Or'gana sudorip'ara, sweat glands*, consisting of a convoluted tube, situate beneath the true skin, and of spiral ducts, which open obliquely under the scales of the epidermis. A certain portion of the perspired fluid is thrown off by ordinary physical evaporation.

The *Pulmonary exhalation* or *transpiration* is that which takes place into the bronchia, and is sent out with the expired air.

PERS'PIRATORY, *Perspirato'rius, Trans'piratory, Transpirato'rius*, (F.) *Perspiratoire, Transpiratoire*. Same etymon as the last. Relating or belonging to, or the product of, perspiration.

PERSUDATIO, Diapedesis.

PERSULTATIO, Diapedesis.

PERTE, Metrorrhagia — *p. d'Appetit*, Anorexia — *p. de la Mémoire*, Amnesia — *p. de l'Odorat*, Anosmia — *p. de Sang*, Hæmorrhagia — *p. de la Voix*, Aphonia — *p. de la Vue*, Cæcitas.

PERTÉRÉBRANT, *Perter'ebrans*, from *per*, 'through,' and *terebrare*, 'to bore.' The French give this epithet to an acute pain — *Douleur pertérébrante*—which occasions a sensation like that which would be produced by an instrument penetrating and lacerating a part; — the pain from whitlow, for example.

PERTES BLANCHES, Leucorrhœa — *p. de Sang*, Metrorrhagia — *p. Séminales*, Spermatorrhœa — *p. Utérines*, Metrorrhagia — *p. Utérines blanches*, Leucorrhœa — *p. Utérines rouges*, Metrorrhagia.

PERTICA PER SE, Penis.

PERTURBATIONES ANIMI, Affections of the mind.

PERTURBA'TRIX, (*Medici'na*) from *perturbare, perturbatum* (*per* and *turbare*) 'to disturb greatly.' *Per'turbating treatment*, (F.) *Méthode ou Medecine perturbatrice;* a mode of treatment in which very active means are employed, and such as impress upon diseases a different course from that natural to them. It is the antithesis to the *Medicina expectans*. Much evil has resulted from such treatment, especially in febrile diseases.

PERTUS'SIS, from *per*, and *tussis*, 'a cough,' 'a violent cough.' *Tussis feri'na* seu *convulsi'va* seu *pu'eros strang'ulans* seu *quinta* seu *stomacha'lis* seu *an'hela clamo'sa* seu *stran'gulans* seu *delas'sans* seu *suffocans* seu *amphemer'ina* seu *tussiculo'sa* seu *spasmod'ica* seu *asiui'na* seu *cani'na*, *Bronchi'tis convulsi'va*, *Bronchocephali'tis*, *Pneusis pertus'sis*, *Amphemer'ina*, *Orthopnœ'a tussiculo'sa* seu *clango'sa* seu *suffocati'va* seu *clamo'sa* seu *spasmod'ica*, *Morbus Cucul'lus* seu *cuculla'ris*, *Cucu'lus*, *Bechorthopnœ'a*, *Bex convulsi'va* seu *therio'des*, *Hooping-cough*, *Whooping-cough*, *Chincough*, *Kin-cough*, *Kind-cough*, (Germ. Kind, 'a child,') (Sc.) *Kink-host*, (Prov.) *Kinkhaust*, (F.) *Coqueluche*, *Catarrhe* ou *Bronchite convulsive*, *Toux convulsive* ou *quinteuse* ou *bleue*, *Maladie cuculaire*. A violent convulsive cough, returning by fits, (F.) *Quintes*, at longer or shorter intervals; and consisting of several expirations, followed by a sonorous inspiration or *whoop*. The fits of coughing generally recur more frequently during the night, morning, and evening, than in the day. It is esteemed to be contagious, and attacks the young more particularly. It is rare for it to affect an individual for the second time. The duration is various, — six or eight weeks or more. Although the paroxysms are very violent, it is not a dangerous disease. It may, however, give rise to other affections, as convulsions, pneumonia, &c., when the complication is very dangerous, as the cause cannot be removed. Those children suffer the least, who evacuate the contents of the stomach during the fit. In the treatment, all that can be done is to palliate. It must be borne in mind, that the disease will, in time, wear itself out. If there be such tensive pain of the head, or fever, bleeding may be required, but it is seldom necessary. Narcotics occasionally afford relief, but it is temporary. Gentle emetics, given occasionally, when the paroxysms are long and dry, give decided relief, and aid in the expectoration of the morbid secretions. After the disease has continued for some weeks, and persists in part from habit, change of air is essential, and this, even should the change be to an atmosphere that is less pure.

PERU, see Lima.

PERUNCTIO, Inunction.

PERVENCHE, Vinca minor.

PERVER'SION, *Perver'sio*, from *per* and *vertere, versum*, 'to turn.' *Dias'trophē, D'astrem'ma*. One of the four modifications of function in disease: the three others being augmentation, diminution, and abolition. The humourists used this term also to designate disorder or morbid change in the fluids.

PERVERSION DE LA TÊTE DES OS ET DES MUSCLES, Loxarthrus.

PERVIGILIUM, Insomnia, Coma vigil.

PES, genitive *Pedis*, πους, ποδος, *Ichnus*, (Sc.) *Fit*, (F.) *Pied*, 'the *foot*.' The inferior extremity of the abdominal member, representing a bony arch, an elastic vault, which transmits the weight of the body to the ground. It is divided into three parts; — the *tarsus, metatarsus*, and *toes*.

PES ALEXANDRINUS, Anthemis pyrethrum — p. Anserinus, Chenopodium bonus Henricus, Facial nerve — p. Cati, Antennaria Dioica — p. Equinus, Pes equinus, see Kyllosis — p. Hippocampi major, Cornu ammonis — p. Hippocampi minor, Hippocampus minor — p. Hippopotami major, Cornu ammonis — p. Hippopotami minor, Cornu ammonis — p. Leonis, Alchemilla.

PESANTEUR, Weight — *p. Spécifique*, Gravity, specific.

PÈSE-ACIDE, Acidometer — *p. Liqueur*, Areometer — *p. Sirop*, Saccharometer.

PESETTE, Cicer arietinum.

PESSAIRE, Pessary — *p. Intra-utérin*, Pessary, intra-uterine.

PES'SARY, *Pessa'rium*, from πεσσος, 'a small stone; a pessary,' *Pessus, Pessum, Pes'sulus, Penicil'lus, Talus, Nod'ulus uteri'nus, Suppositorium uteri'num, Glans, Lemnis'cus*, (F.) *Pessaire*. A solid instrument, composed of cork, ivory, or elastic gum, which is introduced into the vagina to support the uterus, in cases of prolapsus or relaxation of that organ; to keep vaginal hernia reduced, &c. The ancients made use of *medicated pessaries*, which they distinguished into emollient, astringent, aperient, &c., and they are still used. The form of pessaries is very variable; — round, oval, &c., according to circumstances.

PESSARY, EGYPTIAN, Ægyptius pessus.

PESSARY, INTRA-U'TERINE, *Stem pessary*, (F.) *Pessaire intra-utérin, Redresseur utérin*. An instrument for rectifying uterine displacements — as anteversion and retroversion, consisting of a stem which is introduced into the uterus; this stem is attached to a flattened ovoid bulb or ball, on which the cervix uteri rests.—Connected with this is an external part or wire frame, which is attached, at one extremity, to a flat tubular portion, passing into the vagina, to be fixed to the intra-uterine portion. The wire frame is made to

press upon the pubis, so that the pessary can be kept in position *in utero*. This is essentially the intra-uterine pessary of Professor Simpson of Edinburgh.

PESSARY, STEM, Pessary, intra-uterine.

PESSULUS, Pessary, Penis.

PESSUM, Pessary.

PESSUS, Pessary.

PEST, Plague.

PESTE, Plague — *p. Antonine*, Plague of Antoninus — *p. d'Athènes*, Plague of Athens — *p. Noire*, Death, black.

PESTICHIÆ, Petechiæ.

PESTICIÆ, Petechiæ.

PES'TILENCE, *Pestilen'tia, Pestil'itas*, from *pestis*, 'a pest.' A malignant spreading disease; — applied especially to plague.

PESTILENCE, CHOLERIC, Cholera spasmodica — p. Glandular, Plague — p. Hæmagastric, Fever, yellow — p. Septic, Plague.

PESTILENT-WORT, Tussilago petasites.

PESTILENTIA, Plague — p. Hæmagastrica, Fever, yellow.

PESTILENT'IAL, *Pestilentia'lis, Pestilentia'rius, Pestilentio'sus, Pestilen'tus*, (F.) *Pestilentiel*. Relating or appertaining to a pest or plague. *Pestilential diseases* are those that bear some resemblance to the plague in respect to mode of propagation, symptoms, danger, &c.

PESTILITAS, Plague.

PESTIS, Plague — p. Acutissima, Plague — p. Adeno-septica, Plague — p. Americana, Fever, yellow — p. Antoniniana, Plague of Antoninus — p. Bellica, Typhus — p. Britannica, Sudor Anglicus — p. PETAU'RUM. A seat suspended by ropes, in which a person taking the exercise sat, and was tossed about by assistants.—Juvenal and Martial.

PETE'CHIÆ, *Petic'ulæ, Pestich'iæ, Pestic''iæ, Punctic'ula, Pur'pura malig'na, Por'phyra Græco'rum*, (F.) *Pétéchies*. Small spots, similar in shape and colour to flea-bites, which occur spontaneously upon the skin, in the course of severe fevers, &c. They are, under such circumstances, signs of great prostration.

PETECHIÆ SINE FEBRE, Purpura simplex.

PETE'CHIAL, *Petechia'lis*; same etymon. Resembling or accompanied by petechiæ.

PETECHIAL SCURVY, Purpura simplex.

PETECHIANOSIS, Purpura hæmorrhagica.

PETER'S PILLS, Pilulæ Aloes et Cambogiæ — p. Worm lozenges, see Worm lozenges, Sherman's.

PETICULÆ, Petechiæ.

PETIGO, Impetigo.

PETINA, Sole.

PETIOLUS, *Pediolus*, diminutive of *pes*, 'a foot. A footstalk or leafstalk of a plant. A petiole.

PETIOLUS EPIGLOTTIDIS. The root of the Epiglottis.

PETIOLUS MALLEI, Manubrium mallei.

PETIT ARGENT, Platinum — *p. Courier*, Influenza — *p. Lait*, Serum lactis — *p. Lait d'Hoffmann*, Serum lactis Hoffmanni — *p. Mal*, see Epilepsy — *p. Sus-maxillo-labial*, Levator angull oris.

PETITE-POSTE, Influenza.

PETITS-LAITS, see Serum lactis.

PETRÆLEUM, Petroleum.

PETRÆUM, Solidago virgaurea.

PETRAPIUM, Bubon Macedonicum.

PÉTRÉOLE, Petroleum.

PÉTREUX, Petrous — *p. Os*, see Temporal bone.

PETRO DEL PORCO, Bezoar of the Indian porcupine.

PÉTROLE, Petroleum.

PETRO'LEUM, *Petrolæ'um, Petræ'leum, Petræoleum, Bitu'men Petroleum, Piselæ'um In'dicum, Rock Oil, Petroleum Barbaden'sē, Barbadoes Tar*, (F.) *Pétrole* ou *Pétréole*, from πετρος, 'rock,' and ελαιον, 'oil.' A bituminous substance flowing spontaneously from the earth, in various parts of the world; of a fetid odour, and bitter, acrid taste. It is semi-liquid, tenacious, semi-transparent; of a reddish-brown colour; insoluble in water and alcohol; combines with fixed and essential oils and sulphur; and is partially soluble in ether. The petroleum found at Gabian, near Béziers, in France, has been called *Oleum Gabia'num*, (F.) *Huile de Gabian, Petroleum rubrum*. It has been given as an excitant expectorant; and, mixed with tincture of assafœtida, in tapeworm. It is, also, used externally in chilblains, chronic rheumatism, affections of the joints and skin, and paralysis.

New York Petroleum, called *Sen'eca Oil*, is used externally in similar cases.

PETROLEUM BARBADENSE, Petroleum.

PETROLEUM SULPHURA'TUM, *Bal'samum Sulphuris Barbaden'sē*,—(Composed of *petrol, Barbad.* ℥xvj, *flor. Sulph.* ℥iv) has been used as a pectoral; and as a detergent to ulcers. It has been accounted antispasmodic and sudorific. Dose, gtt. x. to xxx. Externally, it is used as a stimulant and discutient.

PETRO-OCCIP'ITAL, *Petro-occipitalis*. Belonging to the petrous portion of the temporal bone and to the occipital bone.

PETRO-OCCIPITAL SUTURE is formed by the junction of the petrous portion of the temporal with the occipital bone. It is a deep groove separating the bones, which have between them a thin layer of cartilage.

PETRO-SALPIN'GO-PHARYNGEUS. A fleshy fasciculus, which extends from the sphenoid bone, from the petrous portion of the temporal bone, and from the Eustachian tube to the upper part of the pharynx. See Constrictor.

PETRO-SALPINGO-STAPHYLINUS, Circumflexus — p. Salpingo-staphylinus, Levator palati — *p. Staphylin*, Levator palati.

PETRO-SPHENOID'AL, *Petro-sphenoida'lis*. Belonging to the petrous portion of the temporal bone and to the sphenoid bone.

PETRO-SPHENOIDAL SUTURE; — a name given to the small suture which is formed by the anterior edge of the petrous portion of the temporal bone and the posterior edge of the sphenoid.

PETROSAL, Petrous.

PETROSELINUM, Apium petroselinum — p. Macedonicum, Bubon Macedonicum.

PETROSUM, OS, see Temporal.

PETROUS, *Petro'sus, Petro'sal*, (F.) *Pétreux, Pierreux*, from πετρα, and πετρος, 'a stone.' Resembling stone; having the hardness of stone. Relating or belonging to the petrous portion of the temporal bone.

PETROUS GAN'GLION, *Petro'sal Ganglion, Ganglion of Andersch*, is formed by the glosso-pharyngeal nerve, shortly after it emerges from the

jugular fossa. From this ganglion, M. Jacobson of Copenhagen traced an anastomosing loop through the cavity of the tympanum, which left branches there, and was thence reflected downwards to join the Vidian nerve. — See Otic Ganglion. This has been called the *Nerve of Jacobson*, *Tympan'ic branch of the glosso-pharyngeal*, and the inosculation, *Jacobson's Anastomo'sis*.

PETROUS PORTION OF TEMPORAL BONE, see Temporal Bone—p. Process, see Temporal Bone.

PETROUS SI'NUSES, *Petro'sal Sinuses*, are two venous sinuses of the dura mater, connected with the petrous portion of the temporal bone, and distinguished on each side, into : — 1. The *superior petrosal sinus*. It arises from the cavernous sinus ; follows the upper edge of the petrous portion which affords it a gutter ; passes into the great circumference of the tentorium cerebelli, and opens into the lateral sinus where the latter experiences a bend near the base of the pars petrosa. Its form is triangular. 2. The *inferior petrosal sinus* arises from the cavernous sinus at the same point as the last, with which it communicates at the moment of its origin. It descends between the inferior edge of the pars petrosa and the basilary process ; and terminates in the lateral sinus, at the sinus or gulf of the internal jugular vein. It is triangular, and broader at its extremities than at the middle,

PETUM, Nicotiana tabacum.

PETUN, Nicotiana tabacum.

PEUCE, Pinus sylvestris.

PEUCEA BALSAMEA, see Pinus abies.

PEUCED'ANUM, from πευκη, 'the pine tree,' its leaves resembling those of the pine; *P. officina'lē* seu *alsat'icum* seu *altis'simum* seu *paniculat'um* seu *terna'tum*, *Seli'num peuced'anum*, *Mar'athrum sylves'trē*, *Marathrophyl'lum*, *Pinastel'lum*, *Fœnic'ulum porci'num*, *Bonus Ge'nius*, *Hog's Fennel*, *Sulphurwort*, (F.) *Peucédan*, *Queue de Pourceau*, *Fenouil de Porc*. *Ord.* Umbelliferæ. *Sex. Syst.* Pentandria Digynia. The root has a strong, fetid smell — somewhat resembling that of sulphureous solutions — and an acrid, unctuous, bitterish taste. It has been recommended as antihysteric and nervine.

PEUCEDANUM ALSATICUM. Peucedanum—p. Altissimum, Peucedanum—p. Officinale, Peucedanum —p. Oreoselinum, Athamanta aureoselinum.

PEUCEDANUM PALUS'TRĒ, *Thysse'lium* seu *Seli'num palus'trē*, *Selinum sylves'trē* seu *thysseli'num* seu *lactes'cens*, *Thysseli'num*, *Olsnit''ium*, *Marsh seli'num*, a European plant, has been recommended as an anti-epileptic. In Courland, it has been a famous remedy in epilepsy.

PEUCEDANUM PANICULATUM, Peucedanum — p. Pratense, P. silaus.

PEUCEDANUM SI'LAÜS, *P. praten'sē*, *Ses'eli praten'sē*, *Sium* seu *Ligus'ticum* seu *Cnid'ium sil'aüs*, *Saxif'raga vulga'ris* seu *An'glica*, *Hippomar'athrum*, *Fœnic'ulum er'raticum*, *English* or *Meadow Sax'ifrage*, (F.) *Séséli des prés*. The roots, leaves, and seeds have been recommended as aperients, diuretics, and carminatves. Rarely used.

PEUCEDANUM TERNATUM, Peucedanum.

PEUPLIER, Populus — *p. Baumier*, Fagara octandra — *p. de la Caroline*, Fagara octandra — *p. Franc*, Populus — *p Noir*, Peucedanum.

PEXIS, Concretion.

PEY'ERI GLAN'DULÆ, *Pey'eri Plexus glandulo'si*, *Gland'ulæ Peyeria'næ* seu *muco'sæ coagmina'tæ* seu *agmina'tæ* seu *mucip'aræ racema'tim conges'tæ intestino'rum* seu *intestina'les plexifor'mes* seu *spu'riæ*, *Corpus'cula glandula'rum simil'ia*, *Gland'ulæ in agmen congrega'tæ intestino'rum*, *Enterade'nes*, *Peyer's Glands*, *Ag'minated* or *aggregate glands*. Small glands or follicles, situate beneath the villous coat of the intestines, called after Peyer, who well described them. They are clustered together, (F.) *Plaques de Peyer*, having a honey-comb appearance — *Plaques gaufrées* — and are extremely numerous. They occur most numerously in the lower portion of the ileum, and resemble, in their morphology and functions, the lymphatic ganglions. They are, evidently, concerned in the great function of lymphosis.

PEZA, πεζα, Doric and Arcadian for πους, 'a foot.' The foot : according to some, the sole of the foot ; and to others, the astragalus. The ankle.

PEZI'ZA seu PEZE'ZA AURIC'ULA, from πεζα, 'the sole of the foot,' *Tremell'a auric'ula Judæ*, *Auricula Judæ*, *Auricula'ria sambu'ci* seu *sambu'cina*, *Exid'ia auric'ula Judæ*, *Meru'lius auric'ula*, *Fungus sambu'cinus*, *Agar'icus Auric'ulæ formâ*, *Jew's Ear*. *Ord.* Fungi. This fungus is said to be astringent ; but has chiefly been used as a gargle in relaxed sore throat.

PFEFFERS or PFÄFFERS, MINERAL WATERS OF, *Thermæ Piperi'næ*, *Th. faba'riæ*. These springs, which are in the Swiss Alps, are simply thermal : temperature 100° of Fahrenheit.

PHACĒ, *Pha'cea*, *Phacus*, φακη, 'a grain of the lentil,' *Ervum lens*. Also, chloasma ; the crystalline lens ; and a flask for the application of heat, so called owing to its flattened lens-like shape.

PHACELLUS, Fasciculus.

PHACELUS, Fasciculus.

PHACHYMENITIS, Phacohymenitis.

PHACI, Ephelides.

PHA'CICUS, *Phaco'tus*, *Phaco'des* ; from φακη, 'lens.' Lens-shaped, lenticular.

PHACI'TIS, *Phacoï'dei'tis*, *Lenti'tis*, *Crystalli'tis*, *Cristalloïdi'tis*, *Gleni'tis*, from φακος, 'a lens,' and *itis*, a termination denoting inflammation. Inflammation of the crystalline lens [?]. Inflammation of the capsule of the lens is termed *Capsi'tis*, *Capsuli'tis*, and *Crystal'lino-capsuli'tis*.

PHACO'DES, Phacicus.

PHACOHYMENI'TIS, *Phakomeni'tis*, *Phachymeni'tis*, *Inflamma'tio cap'sulæ lentis* ; from φακος, 'a lens,' υμην, 'a membrane,' and *itis*, denoting inflammation. Inflammation of the capsule of the crystalline.

PHACOIDEITIS, Phacitis.

PHACOMALACIA, Cataract, soft.

PHAC'OPIS, *Phaco'tus* ; from φακη, 'lens,' and κοπις, 'a knife ;' *Scalpel'lum lenticula'rē*. A lenticular-shaped knife.

PHACOPS'IS, from φακη, 'lens,' and οψις, 'vision.' The state of one who has chloasma or freckles on the face.

PHACOPTIS'ANA, *Pha'cum* ; from φακη, 'lens,' and πτισανη, 'drink.' A drink of lentils. A poultice of lentils.

PHACOS, Ervum lens.

PHACOSCOTOMA, Cataract.

PHACOTUS, Phacicus, Phacopis.

PHACUS, Phace.

PHÆNIGMUS, Phenigmus.

PHÆNOMENOLOGIA, Semeiology.

PHÆNOMENON, Phenomenon.

PHAGÆNA, Boulimia.

PHAGEDÆNA, Boulimia. Phagedenic ulcer p. Sloughing, of the mouth, Cancer aquaticus—p. Gangrænosa, Hospital gangrene.

PHAGEDEN'IC, *Phagedæ'nicus*, *Depas'cens*, (F.) *Phagédénique*, *Rongeant*, from φαγω, 'I eat.'

PHAGEDENIC ULCER, *Nomē*, *Phagedæ'na*, *Ulcus depas'cens* seu *obam'bulans* seu *feri'num*, (F.) *Ulcère phagédénique* ou *rongeante*, is one which rapidly eats and corrodes the neighbouring parts.

Phageden'ic, in Materia Medica, is a substance

used for destroying fungous granulations in ulcers, &c.

PHAKOHYMENITIS, Phacohymenitis.

PHALACRA, Calvities.

PHALACROMA, Calvities.

PHALACROSIS, Calvities.

PHALACROTIS, Alopecia.

PHALÆNA PINGUINALIS, see Ectozoa.

PHALAIA. A barbarous term, employed by Basil Valentine to designate a universal medicine or panacea.

PHALAN'GAL, *Phalan'gian, Phalangia'nus*, from *φαλαγξ, φαλαγγος*, 'a phalanx.' Having relation to a phalanx.

PHALANGARTHRI'TIS, from *φαλαγξ, φαλαγγος*, 'a phalanx,' *αρθρον*, 'a joint,' and *itis*, denoting inflammation. Gout in the fingers. Inflammation of the joints of the fingers.

PHALANGE, Phalanx.

PHALANGES DES DOIGTS, see Phalanx—p. of the Fingers, see Phalanx—*p. des Orteils*, see Phalanx—p. of the Toes, see Phalanx.

PHALANGETTES, see Phalanx.

PHALANGETTIEN. Professor Chaussier uses this term for any thing relating to the third phalanx of the fingers or toes, — *Phalangien*, for what relates to the first, — and *Phalanginien*, to the second.

PHALANGIAN, Phalangal.

PHALANGIEN, see *Phalangettien*.

PHALANGINES, see Phalanx.

PHALANGINIEN, see *Phalangettien*.

PHALANGIUM ESCULENTUM, Scilla esculenta.

PHALANGO'SIS, *Hispid'itas*, from *φαλαγξ, φαλαγγος*, 'a phalanx,' 'a row of soldiers.' An affection of the eyelids in which the lashes are arranged in two or three rows. See *Trichiasis*. Also, dropping of the upper eyelid, from paralysis of the levator palpebræ superioris muscle.

PHALANX, *Phalan'gē, Phalango'ma*. Same etymon. A name given to the small bones which form the fingers and toes, because placed alongside each other like a phalanx. They are distinguished into the *Phalanges of the fingers, Ossa* seu *Ay'mina* seu *A'cies* seu *Artic'uli* seu *Scutic'ula* seu *Scu'tulæ* seu *Nodi* seu *Interno'dia* seu *Scytal'ides* seu *Con'dyli Digito'rum Manûs*; and the *Phalanges of the Toes, Ossa* seu *Artic'uli* seu *Interno'dia Digito'rum Pedis*. I. *Phalanges of the fingers*, (F.) *Phalanges des doigts*. They are, in each hand, fourteen,—three to each finger, and two to the thumb; and are situate one above the other. They are distinguished, numerically, reckoning from the base towards the tip of the finger. 1. The *first* or *metacarpal, Procon'dyli*, (F.) *Premières phalanges* ou *Phalanges métacarpiennes*, 2. The *second* or *middle phalanges*, (F.) *Secondes phalanges* ou *Phalanges moyennes, Phalangines*, (Ch.) 3. The *third phalanges, Metacon'dyli, Phalan'ges ad'gnium*. (F.) *Troisièmes phalanges* ou *Phalanges ungnéales* ou *unguifères* ou *unguinales, Phalangettes* (Ch.), which terminate each finger, and support the nail. II. *Phalanges of the toes*, (F.) *Phalanges des Orteils*. They are the same in number as those of the fingers, but much smaller, and of a very different shape.

The phalanges of a finger or toe are united with each other; and the first with the metacarpal or metatarsal bone. They are developed from two points of ossification; one for the superior extremity, and the other for the body and inferior extremity.

PHALARIS CANARIEN'SIS. *P. ova'ta*, (*φαλαρος*—from *φαω*, 'I shine,'—'bright, shining,' in application to the seed,) *Cultivated Canary Grass*, (F.) *Alpiste*. *Ord.* Gramineæ. *Sex. Syst.* Triandria Digynia. The seed of this grass, *Canary seed*, (F.) *Graines d'alpic*, afford a nourishing meal. The ancients recommended them for allaying pains in the kidney and bladder.

PHALARIS ZIZANOIDES, Andropogon muricatus.

PHALLAL'GIA, *Phallodyn'ia*, from *φαλλος*, 'the male organ,' and *αλγος*, 'pain.' Pain in the male organ.

PHALLANCYLOSIS, Chordee.

PHALLI'TIS, *Priapi'tis*, from *φαλλος*, 'the male organ,' and *itis*, a suffix denoting inflammation. Inflammation of the male organ.

PHALLOCAMPSIS, Chordee.

PHALLOCARCINO'MA, from *φαλλος*, 'the male organ,' and *καρκινωμα*, 'cancer.' Carcinoma or cancer of the penis.

PHALLODYNIA, Phallalgia.

PHALLON'CUS, from *φαλλος*, 'the male organ,' and *ογκος*, 'swelling.' Tumefaction of the male organ.

PHALLOPSOPH'IA, from *φαλλος*, 'the male organ,' and *ψοφος*, 'a noise.' Discharge of wind from the male urethra.

PHALLORRHAG''IA, from *φαλλος*, 'the male organ,' and *ρηγνυμι*, 'I break out.' Hemorrhage from the male urethra. Stimatosis.

PHALLORRHŒA, Gonorrhœa.

PHALLORRHOÏS'CHESIS, from *φαλλος*, 'the male organ,' *ροη*, 'discharge,' and *ισχειν*, 'to withhold.' Sudden arrest of a gonorrhœal discharge.

PHALLUS, Penis — p. Esculentus, Morchella esculenta.

PHANEROG'AMOUS, *Phanerogam'ic, Phanerogam'icus*, (F.) *Phanérogame*, from *φανερος*, (*φαω*, 'I shine,') 'evident,' and *γαμος*, 'marriage.' An epithet used by botanists for plants whose sexual organs are apparent. It is, consequently, the opposite to *cryptogamous*.

PHANTASIA, Delirium, Imagination.

PHANTASM, *Phantas'ma, Phanto'ma, Phasma*, from *φανταζω*, (*φαινω*, 'I bring to light,') 'I make appear.' A phantom, false appearance, apparition. Hallucination. Derangement of the sense of sight or of the intellectual faculties, causing objects to be perceived, which are not before the eyes.

PHANTASMA. Pseudoblepsia.

PHANTASMATICUS, Phantasticus.

PHANTASMATOSCOPIA, Metamorphopsia.

PHANTASMOSCOPIA, Metamorphopsia.

PHANTAS'TICUS, Inebriant. Creating phantasms — *phantasmat'icus*.

PHANTOM, Fantom—p. Tumour, see Fantom.

PHANTOMA, Phantasm — p. Obstetricium, Fantom.

PHARMACEIA, Poisoning

PHARMACEUM, Apotheca.

PHARMACEUS, Apothecary.

PHARMACEUTA, Apothecary.

PHARMACEU'TIC, *Pharmaceu'ticus, Pharmaceu'tical, Pharmaceutica'lis*, (F.) *Pharmaceutique*, from *φαρμακον*, 'a medicine.' An epithet for every thing belonging to pharmacy. Thus, we say, *Pharmaceutical preparations*, &c.

PHARMACEUTICE, Pharmacy.

PHARMACEUTIST, Apothecary.

PHARMACIEN, Apothecary.

PHARMACOCATAGRAPHOLOG''IA, *Catagraphiolog''ia, Ars for'mulas concinnan'di*, from *φαρμακον*, 'a medicine,' *κατα*, 'beneath,' *γραφη*, 'a writing,' and *λογος*, 'a description.' The art of writing prescriptions.—J. J. Plenck.

PHARMACOCHYMIA, Chymistry, pharmaceutical.

PHARMACODYNAM'ICS, from *φαρμακον*, 'a medicine,' and *δυναμις*, 'power.' *Pharmacodynam'icē, Dynam'ical Materia Medica, Pharmacodynam'ica doctri'na, Pharmacodynamiolog''ia*. A division of pharmacology, which considers the effects and uses of medicines.

PHARMACODYNAMIOLOGIA, Pharmacodynamics.

PHARMACOGNOS'IA, *Acognos'ia*, *Acognosi'a*, from *φαρμακον*, 'a medicine,' and *γνωσις*, 'knowledge.' A division of pharmacology, which treats of simples, or unprepared medicines.

PHARMACOLOGIA, Materia medica.

PHARMACOMA'NIA, from *φαρμακον*, 'a medicine,' and *μανια*, 'mania.' One who has a mania for prescribing or for taking medicine.

PHARMACON, Poison.

PHARMACOPŒ'IA, *Pharmacopœ'a*, *Codex medicamenta'rius*, (F.) *Pharmacopée*, from *φαρμακον*, 'a medicine,' and *ποιεω*, 'I make.' A work, containing a collection of formulæ for the preparation, &c., of medicines: generally published by authority. Formerly, a chemical laboratory, *Laborato'rium chym'icum* seu *pharmaceut'icum*.

PHARMACOPŒUS, Apothecary, Druggist.

PHARMACOPOLA, Apothecary, Druggist.

PHARMACOPOLE, Apothecary, Druggist.

PHARMACOPOLI'UM, *Apothe'ca*, *Offici'na*, *Taber'na Med'ica*. The shop of the druggist or apothecary, (F.) *Apothicairerie*, from *φαρμακον*, 'a medicine,' and *πωλεω*, 'I sell.'

PHARMACOPOS'IA, from *φαρμακον*, 'a medicine,' and *ποσις*, 'a potion.' A liquid medicine, especially one that is cathartic.

PHARMACO'SA MEDICAMEN'TA, from *φαρμακον*, 'a poison.' Medicines that contain poisonous substances. — Fallopius.

PHARMACOTHE'CA, *φαρμακοθηκη*, from *φαρμακον*, 'a medicine,' and *τιθημι*, 'I place.' A case for medicines. A medicine chest.

PHARMACOTHERAPI'A, from *φαρμακον*, and *θερατεια*, 'treatment.' Cure of diseases by remedies.

PHARMACTER, Apothecary.

PHARMACUM, Medicament, Poison — p. Ægyptiacum, Ægyptiacum—p. Amatorium, Philter.

PHAR'MACUM AD AURES, *Ægyp'tium Medicamen'tum ad Aures*. A name given to a medicine, composed of bitter almonds, white pepper, saffron, myrrh, opium, frankincense, castor, verjuice, sulphate of iron, vinegar, pomegranate-bark, unguentum nardinum, &c. It was believed to be useful for cleansing fetid ulcers in the ears.

PHARMACURGICUS, Apothecary.

PHARMACURGUS, Apothecary.

PHAR'MACY, *Pharmaci'a*, *Pharmaceu'tice*, *Pharmax'is*, from *φαρμακον*, 'a medicine.' The art which teaches the knowledge, choice, preservation, preparation, and combination of medicines. It was formerly divided into *Galen'ical* and *Chym'ical*. The former, called after Galen, embraced the operations undertaken on medicines without chymistry: — the latter, *Chymical Pharmacy* or *Pharmaceu'tic Chymistry*, *Pharmacochym'ia*, comprised the preparation of medicines, founded on the chymical action of their principles.

PHARMAXIS, Pharmacy.

PHARNA'CEUM LINEA'RE, called after Pharnaces, King of Pontus. A South African plant, *Nat. Ord.* Paronychiaceæ, employed at the Cape in pulmonary affections. It is generally given in infusion.

PHARUS, Pharynx.

PHARYGATHRON, Pharynx.

PHARYGETHRUM, Pharynx.

PHARYNGÆ'UM (SAL.), from *pharynx*, *pharyngis*. A compound of cream of tartar, nitrate of potassa, burnt alum, and distilled vinegar. It was formerly employed, united with honey and plantain-water, to make gargles, which were advised in quinsy.

PHARYNGÉ, Pharyngeal.

PHARYNGE'AL, *Pharyngæ'us*, (F.) *Pharyngé*, *Pharyngien*. Same etymon. That which relates to the pharynx. A name given to the muscles, vessels, and nerves of the pharynx.

PHARYNGEAL ARTERIES. These are two in number. The one—*superior* or *pterygo-palatine*, *Ramus Pharyngæ'us supe'rior* of Haller — arises from the internal maxillary at the base of the zygomatic fossa, passes through the pterygo-palatine canal, and proceeds to be distributed to the pharynx and the corresponding part of the Eustachian tube. The other — the *inferior* — *Pharyngæ'a ascen'dens* of Haller — arises from the external carotid, on a level with the facial. It ascends along the lateral and posterior part of the pharynx, and divides into two branches; the one — the *pharyngeal*, properly so called — is distributed to the pharynx; the other — the *meningeal* — gives its branches particularly to the dura mater.

PHARYNGEAL NERVE. A branch sent by the pneumogastric to the pharynx. It descends behind the internal carotid; communicates with the glosso-pharyngeal; and divides, opposite the middle constrictor of the pharynx, into a great number of filaments, which anastomose, in a multitude of different directions, with filaments of the glosso-pharyngeal nerve, of the superior laryngeal branch, and of the first cervical ganglion. These different nervous filaments united constitute the *pharyngeal plexus*, the irregular meshes of which send numerous ramifications to the pharynx.

PHARYNGEAL VOICE, see Voice.

PHARYNGEMPHRAX'IS, from *φαρυγξ*, *φαρυγγος*, 'the pharynx,' and *εμφραξις*, 'obstruction' Obstruction of the pharynx.

PHARYNGETHRON, Pharynx.

PHARYNGEURYSMA, Pharyngocele.

PHARYNGICUS, Pharyngeal.

PHARYNGIEN, Pharyngeal.

PHARYNGITE, Cynanche pharyngea — *p. Tonsillaire*, Cynanche tonsillaris.

PHARYNGITIS, Cynanche pharyngea.

PHARYNGITIS APOSTEMATO'SA. Abscess of the pharynx.

PHARYNGI'TIS, DIPHTHERIT'IC, *Angi'na pseudomembrana'cea* seu *membrana'cea* seu *pellicula'ris* seu *plas'tica* seu *diphtherit'ica* seu *malig'na* seu *pseudo-membrano'sa* seu *pestilentia'lis*, *Pharyngoc'acē*, *Pseudo-membranous Inflammation of the Throat*, (F.) *Angine couenneuse* ou *gutturale couenneuse* ou *pseudo-membraneuse* ou *plastique* ou *diphthéritique*. From *pharynx*, and *itis*, denoting inflammation. Diphtheritic inflammation of the pharynx. See Cynanche maligna.

PHARYNGI'TIS, FOLLIC'ULAR, *Follicular Inflammation of the Pharynx*, *Angi'na folliculo'sa of the Pharynx*, *Acne of the Throat*. Inflammation and enlargement of the follicles of the pharynx, occasionally extending to the larynx. Sometimes termed *Clergyman's Sorethroat*, *Tubercles of the Larynx* and *Fauces*, and *Tuber'cular Sorethroat*.

PHARYNGI'TIS, GANGRENOUS, Cynanche maligna.

PHARYNGOCACE, Pharyngitis, diphtheritic.

PHARYNGOCE'LE, *Pharyngeurys'ma*, *Diverti'culum* seu *Hernia* seu *Prolap'sus Œsoph'agi* seu *pharyn'gis*, *Œsoph'agus succenturia'tus*, from *φαρυγξ*, *φαρυγγος*, 'the pharynx,' and *κηλη*, 'a tumour.' An enlargement at the upper part of the gullet, in which the food sometimes rests in considerable quantity.

PHARYNGODYN'IA, from *φαρυγξ*, *φαρυγγος*, 'the pharynx,' and *οδυνη*, 'pain.' Pain in the pharynx.

PHARYNGOGLOSS'AL, *Glossopharynge'al*, *Pharyngoglossia'nus*. That which belongs to the pharynx and tongue.

PHARYNGOGLOSSAL NERVE, *Glossopharyngeal*

Nerve, Lingua'lis latera'lis, (F.) *Nerf Glossopharyngien, Pharyngoglossien* — a portion of the eighth pair—arises from the superior and lateral parts of the spinal marrow, between the facial and pneumogastric nerves, by several filaments, which soon unite into a single cord, that passes out of the cranium by the foramen lacerum anterius; goes downwards and forwards, and gains the posterior and inferior part of the tongue. Immediately after its exit from the cranium, it gives a branch to the meatus auditorius externus, and receives a filament from the facial, and another from the pneumogastric nerve. It then furnishes two other filaments, which descend upon the carotid artery, and unite at the bottom of the neck with branches from the cervical ganglions and cardiac nerves, and give two filaments to the stylo-pharyngeus muscle. The glossopharyngeus, after sending a twig or two to the tonsil, to the upper part of the pharynx and membrane of the epiglottis, divides into many branches which run partly to the margin, and partly to the middle of the root of the tongue; supplying, especially, the papillæ majores, and the parts in their neighbourhood.

By some, this nerve is regarded as the controller of the associated motions of the tongue and pharynx. By others, it is esteemed to be the special nerve of gustation.

PHARYNGOG'RAPHY, *Pharyngogra'phia*, from *φαρυγξ, φαρυγγος*, 'the pharynx,' and *γραφη*, 'a description.' An anatomical description of the pharynx.

PHARYNGOL'OGY, *Pharyngolog''ia*, from *φαρυγξ, φαρυγγος*, 'the pharynx,' and *λογος*, 'a discourse.' The part of anatomy which treats of the pharynx.

PHARYNGOLYSIS, Pharyngoplegia.

PHARYNGOPARALYSIS, Pharyngoplegia.

PHARYNGOPLE'GIA, from *φαρυγξ, φαρυγγος*, 'the pharynx,' and *πλησσω*, 'I strike.' *Dyspha'gia paralyt'ica* seu *tor'pida* seu *aton'ica, Angi'na paralyt'ica, Asthevi'a Deglutitio'nis, Pharyngol'ysis, Pharyngoparal'ysis, Paral'ysis Œsoph'agi, Gulæ Imbecil'litas.* Paralysis of the pharynx or œsophagus: commonly a symptom of general paralysis, or of approaching dissolution.

PHARYNGORRHAG''IA; from *φαρυγξ, φαρυγγος*, 'the pharynx,' and *ραγη*, 'rupture.' Hæmorrhage from the vessels of the pharynx.

PHARYNGOSPAS'MUS, from *φαρυγξ, φαρυγγος*, 'the pharynx,' and *σπασμος*, 'spasm.' Spasm or cramp of the pharynx.

PHARYNGOSTAPHYLINUS, Palato-pharyngeus.

PHARYNGOTOME, Pharyngot'omus, from *φαρυγξ, φαρυγγος*, 'the pharynx,' and *τεμνω*, 'I cut.' An instrument, invented by J. L. Petit, used to scarify inflamed tonsils, and to open abscesses, which form in the parietes of the pharynx. It is composed of a long, narrow blade with a lancet point, enclosed in a sheath or canula of silver slightly curved. This instrument is carried to the part to be cut, and the point of the blade is made to pass out of the sheath, by pressing on a button at the end of the pharyngotome. A spring causes the blade to re-enter as soon as the pressure is removed.

PHARYNGOT'OMY, *Pharyngotom'ia*; same etymon. Some authors have used this word synonymously with œsophagotomy. It means, also, scarification of the tonsils, or an incision made for opening abscesses there, &c.

PHARYNX, *φαρυγξ, Pharynx, φαρυξ, Pharus, Gula, Læmos, Fauces, Pharyng'ethrum, Pharyn'gethron, Pharyn'gethros, Pharygathron, Isthmos, Isth'mion, Inglu'vies, Princip'ium Gulæ, Os post'erum, Gurges*, (F.) *Arrière-bouche, Gosier, Gorge.* A species of musculo-membranous, symmetrical canal, on the median line, irregularly funnel-shaped, and situate between the base of the cranium and the œsophagus, in front of the vertebral column. It is very narrow above; but dilates in the middle, and again contracts below, at its junction with the œsophagus. Into the anterior parieæ of the pharynx open, successively, from above to below,—the posterior orifices of the nasal fossæ; the Eustachian tubes; the posterior aperture of the mouth, and the top of the larynx. The pharynx is formed, externally, of a muscular coat, and, internally, of a mucous membrane, which is continuous, above, with the Schneiderian membrane; and in the middle, with that of the mouth · below, with that of the œsophagus; and, at the sides, with that of the Eustachian tubes. This membrane has no villi, and presents only a few inequalities, which are owing to the presence of muciparous follicles. The muscular coat of the pharynx is composed of the constrictor muscles, stylopharyngei, and pharyngostaphylini. The vessels and nerves are called *pharyngeal.* The pharynx serves as a common origin for the digestive and respiratory passages. It gives passage to the air, during respiration; and to the food at the time of deglutition.

PHARYNX, FOLLICULAR INFLAMMATION OF THE, Pharyngitis, follicular.

PHARYX, Pharynx.

PHASELUS, Phaseolus

PHASE'OLUS, *φασηλος, φασηολος, φασιολος, P. Vulga'ris, Phasi'olus, Phasel'us, Fase'lus, Fase'olus, Bona, Boona, Faba; Kidney Bean; French Bean*; (F.) *Faséole, Haricot. Ord.* Leguminosæ. *Sex. Syst.* Diadelphia Decandria. When young and well boiled, this is easy of digestion, and delicately flavoured. It is less flatulent than the pea.

PHASEOLUS CRETICUS, *Cajan, Cayan.* A decoction of the leaves, according to Ray, restrains the hemorrhoidal flux when excessive.

PHASEOLUS VULGARIS, Phaseolus.

PHASIA'NUS GALLUS, so called from the river, *Φασις*, in Colchis, near the Black Sea: (F.) *Coq.* The parts of generation of the cock, dried and pulverized, were formerly regarded as proper for increasing the quantity of semen. The fat was used as emollient and resolvent; the brain, in diarrhœa; the gall, in freckles and diseases of the eyes. These phantasies are now abandoned.

PHASIOLUS, Phaseolus.

PHASMA, Phantasm.

PHATNE, Alveolus.

PHATNION, Alveolus.

PHATNORRHAG''IA, *Stomatorrhag''ia alveolo'rum*, from *φατνιον*, 'an alveolus,' and *ρηγνυμι*, 'I break forth.' Hemorrhage from the alveoli.

PHAUSIN'GES, *φαυσιγγες*, plural of *φαυσιγξ*, from *φαυζω*, 'I roast.' Spots or blisters on the legs, produced by heat; and, in a more extensive signification, by any other cause. Also, a pustule. — Foësius.

PHELLANDRE, Phellandrium aquaticum.

PHELLAN'DRIUM AQUAT'ICUM, *Phellandrium, Œuan'thē phellan'drium* seu *aquat'ica, Ligus'ticum phellan'drium, Fœnic'ulum aquat'icum, Cicuta'ria aquatica, Water Fennel, Fine-leaved Water Hemlock*, (F.) *Phellandre, Fenouil d'eau, Ciguë d'eau, Millefeuille aquatique. Ord.* Umbelliferæ. *Sex. Syst.* Pentandria Digynia. This plant is stimulant and narcotic. It haa been used in intermittents and dyspepsia. It has, also, been given in phthisis pulmonalis, and in cases of scrofulous atonic ulcers.

PHENE, Benzole.

PHENIG'MUS, *Phœnig'mus, Phœnig'mus*, from *φοινιξ*, 'red.' *Red Jaundice.* A cutaneous affection, consisting of redness diffused over the skin, without fever. Sauvages makes it a genus of his

order *Ieteritiæ*. Also, the act of irritating a part by a stimulating application.

PHÉNOMÈNE, Phenomenon.

PHENOM'ENON, *Phænom'enon*, (F.) *Phénomène*, from *φαινομαι*, 'I appear.' An extraordinary and unexpected event. In *Medicine*, it means any change, appreciable by our senses, which supervenes in an organ or function:—as the *phenomena*, of the circulation, respiration, &c. It is used in pathology, synonymously with symptom.

PHENYLE, HYDRURET OF, Benzole.

PHEUGOPHOBIA, Hydrophobia.

PHEUGYDRON, Hydrophobia.

PHI'ALA, A *Phial* or *Vial*, (F.) *Fiole*, *φιαλη*, *φιελη*, 'a vessel with a broad bottom.' A small bottle, in which apothecaries are in the habit of sending out their mixtures, draughts, &c.: hence called *Med'icine Vials*, (F.) *Fioles à Médecine*. They are usually sold in grosses, and assorted into vials of oz. 8; oz. 4; oz. 3; oz. 2; oz. 1½; oz. 1; and oz. ½.

PHILADYNAMICA, Debilitants.

PHILANTHROPUS, Galium aparine.

PHILETRON, Philter.

PHILETRUM, Lacuna labii superioris.

PHILIA'TER, *Philia'tros*, *φιλιατρος*, from *φιλεω*, 'I love,' and *ιατρικη*, 'medicine.' An amateur of medicine. One who studies medicine; *Studio'sus medici'næ*.

PHILOBIO'SIS, (F.) *Philobiosie*: from *φιλεω*, 'I love,' and *βιος*, 'life.' The love of life.

PHILŒ'NIA, from *φιλεω*, 'I love,' and *οινος*, 'wine.' Love of wine. Addiction to wine.

PHILOGYNIA, Muliebrositas.

PHILONIUM LONDINENSE, Confectio opii.

PHILOPATRIDALGIA, Nostalgia.

PHILOPATRIDOMANIA, Nostalgia.

PHILOSOPHER'S STONE, see Alchymy.

PHILOSOPHIA CORPORIS VIVI, Physiology — p. Hermetica, Alchymy — p. per Ignem, Chymistry.

PHILTER, from *φιλεω*, 'I love.' *Philtrum*, *Phil'etron*, *Phile'tron*, *Phar'macum* seu *Poc'ulum amato'rium*, *Amato'rium venefic''ium*, (F.) *Philtre*. A medicine or drink considered capable of causing love.

PHILTRUM, Lacuna labii superioris.

PHILYRA, Tilia.

PHIMA, Phyma.

PHIMOS, Capistrum.

PHIMO'SICUS. Relating to Phimosis.

Sauvages calls *Ischu'ria phimo'sica* seu *urethra'lis à phimo'si*, the retention of urine which depends upon phimosis.

PHIMO'SIS, *Phymo'sis*, *Capistra'tio*, *Epago'gium*, *Ligatu'ra glandis*, *Strictu'ra præpu'tii*, *Reduc'tio præpu'tii impedi'ta*, from *φιμοω*, 'I bind tight.' A disease which consists in a preternatural narrowness of the opening of the prepuce, so that it cannot be carried behind the corona glandis. This affection is most commonly congenital. Sometimes it is accidental, and dependent upon tumefaction of the glans, or of the prepuce, as occurs in syphilis. To remedy this state, the prepuce may be divided by means of a bistoury and director; or circumcision may be practised.

PHIMOSIS ADNATA seu CONGENITA seu PUERILIS, Congenital phimosis—p. Circumligata, Paraphimosis — p. Congenita, P. adnata.

PHIMO'SIS ŒDEMATO'DES, *Hydrophimo'sis*. Phimosis with œdematous swelling of the prepuce.

PHIMOSIS PUERILIS, Ph. adnata.

PHLASMA, Contusion.

PHLEBARTERIODIALYSIS, see Aneurism.

PHLEBECTA'SIA, *Phlebectasis*, from *φλεψ*, *φλεβος*, 'a vein,' and *εκτασις*, 'dilatation.' Dilatation of a vein, or of a portion of a vein.—Alibert.

PHLÉBECTIARCTIE. A mongrel term, from *φλεψ*, *φλεβος*, 'a vein,' and *arcto*, 'I contract.' Contraction of a vein.

PHLEBES, (Arteries.) See Artery.

PHLEBEURYSMA, Varix.

PHLEBI'ON, diminutive of *φλεψ*, *φλεβος*, 'a vein.' A vein.—Hippocrates. A small vein,—*Ve'nula*.

PHLEBIS'MUS, from *φλεψ*, *φλεβος*, 'a vein.' A term employed by Dr. Marshall Hall for the turgescence of veins, produced by impeded return of the blood. See Trachelismus.

PHLEBI'TIS, *Inflamma'tio vena'rum*, (F.) *Phlébite*, *Inflammation des veines*, from *φλεψ*, *φλεβος*, 'a vein,' and *itis*, the termination for inflammation. Inflammation of the inner membrane of a vein, *Endo-phlebi'tis*, which sometimes follows blood-letting, and extends from the small wound made in that operation to the neighbouring parts of the venous system. The symptoms are, first, inflammation in the punctured part; and, afterwards, a knotty, tense, painful cord, following the direction of the vessel, and accompanied with more or less fever, according to the extent of the inflammation, the nervous symptoms, &c. Phlebitis, also, sometimes supervenes on the ligature or excision of varices; after amputation, gun-shot wounds, delivery (*Uterine Phlebitis*, *Locho-metro-phlebi'tis*, *Metro-phlebi'tis puerpera'lis*, *Phlebi'tis uteri'na*, *Metri'tis veno'sa*), the ligature of the umbilical cord, &c. It may terminate by resolution, suppuration, ulceration, or gangrene.

PHLEBITIS, CRURAL, Phlegmatia dolens — p. Uterina, see Peritonitis, and Phlebitis.

PHLEBOG'RAPHY, *Phlebogra'phia*, from *φλεψ*, *φλεβος*, 'a vein,' and *γραφη*, 'a description.' A description of the veins.

PHLEB'OLITE, *Phlebol'ithus*, *Vein stone*, from *φλεψ*, *φλεβος*, 'a vein,' and *λιθος*, 'a stone.' A loose concretion, varying in size from that of a currant to that of a pea, occasionally found in the veins. It would seem to be formed in the blood.

PHLEBOLITHUS, Phlebolite.

PHLEBOL'OGY, *Phlebolog''ia*, from *φλεψ*, *φλεβος*, 'a vein,' and *λογος*, 'a discourse.' The part of anatomy which treats of the veins.

PHLEBOPA'LIA, from *φλεψ*, *φλεβος*, 'a vein,' and *παλλω*, 'I palpitate.' With the ancients, *pulsation*, which they conceived to be produced by the veins.. See Pulsus venarum.

PHLEBOPHTHALMOTOM'IA, *Ophthalmophlebotom'ia*, from *φλεψ*, *φλεβος*, 'a vein,' *οφθαλμος*, 'the eye,' and *τεμνω*, 'I cut.' Blood-letting in the eye.

PHLEBOPLEROSIS ECPHRACTICA, Inflammation.

PHLEBORRHAG''IA, from *φλεψ*, *φλεβος*, 'a vein,' and *ρηγνυμι*, 'I break out.' Rupture of the veins; and, in a more extensive sense, venous hemorrhage.

PHLEBORRHEX'IS, from *φλεψ*, *φλεβος*, 'a vein,' and *ρηξις*, 'rupture.' Rupture of a vein Also, hemorrhage from a vein, *Phleborrhag''ia*.

PHLEBOSTENO'SIS, from *φλεψ*, *φλεβος*, 'a vein,' and *στενωσις*, 'contraction.' Constriction or contraction of a vein.

PHLEBOT'OMIST, from *φλεψ*, *φλεβος*, 'a vein.' and *τεμνω*, 'I cut.' A bleeder. One who practises particularly the art of phlebotomy. See Blood-letting.

PHLEBOTOMUM, Fleam.

PHLEBOTOMY, see Blood-letting.

PHLEBS, Vein.

PHLEDONIA, Delirium.

PHLEGM, *Phlegma*, *φλεγμα*, *Pitui'ta*, *Pit'uite*,

Mucus, Mother, (F.) *Phlegme, Pituite.* One of the four natural humours of the ancients, which, according to them, was cold and moist, as atrabilis was cold and dry. It predominated, especially, in winter.

Pituita was afterwards applied to every aqueous or excrementitious humour, such as the saliva, nasal and intestinal mucus, serum, &c. The terms *phlegm* and *pituita* are no longer used in physiology, — the different humours having received particular names; but the vulgar still use *phlegm* to designate a stringy mucus, expectorated, or rejected by vomiting. The ancient chymists gave the name 'phlegm' to aqueous, insipid, and inodorous products obtained by subjecting moist vegetable matters to the action of heat.

PHLEGMA NARIUM CRASSUM, Nasal mucus — p. Vitrioli, Sulphuric acid (very dilute.)

PHLEG'MAGOGUE, *Phlegmago'gus;* from φλεγμα, 'phlegm,' and αγω, 'I expel.' A medicine, formerly believed capable of "*cutting*" or removing phlegm.

PHLEGMAPYRA, Fever, adeno-meningeal.

PHLEGMASIA, Inflammation, Phlegmon—p. Adenosa, Adenitis—p. Alba dolens puerperarum, Ph. dolens — p. Cellularis, Induration of the cellular tissue—p. Glandulosa, Adenitis—p. Myoica, Myositis — p. of the Peritoneum, Peritonitis.

PHLEGMA'TIA, from φλεγμα, φλεγματος, 'phlegm.' Œdema, Anasarca, Hydrops.

Phlegma'tia Dolens, *P. lac'tea* seu *dolens* seu *alba dolens* seu *Leucophlegmasi'a dolens* seu *Spargano'sis* seu *Sceleal'gia* seu *Œde'ma puerperarum, Scelon'cus, Anasar'ca sero'sa, Ecphy'ma œdemat'icum, Ecchymo'ma lymphat'icum, Is'chias a spargano'si, Œde'ma lacteum, Infare'tus lac'tei extremita'tum, Metas'tasis lactis, Hysteral'gia galac'tica, Hydrophlegma'sia textûs cellulo'si, Crural Phlebi'tis, White leg, Swelled leg, Milk leg, White swelling of lying in women,* (F.) *Œdème des nouvelles accouchées, Œdème douleureux des femmes en couche, Dépot laiteux sur la cuisse, Œdème actif des nouvelles accouchées, Enflure* ou *Engorgement des jambes et des cuisses de la femme accouchée, E. laiteux des membres abdominaux.* It occurs, for the most part, in the second or third week after delivery:—is limited to the lower extremity, and chiefly to one side; exhibiting to the touch a feeling of numerous irregular prominences under the skin. It is hot, white, and unyielding; and is accompanied, sooner or later, with febrile excitement. After a few days, the heat, hardness, and sensibility diminish, and the limb remains œdematous for a longer or shorter period. The disease frequently, if not generally, consists in the obstruction of the iliac or other veins. Owing to the pressure of the gravid uterus — the flow of blood being obstructed — the serous part of it is thrown out into the cellular membrane of the limb. Sometimes the vein is found completely obliterated.

The treatment consists in the use of antiphlogistics: — the application of leeches or cupping-glasses near the groin, fomentations to the limb, &c.; and, when the active state has subsided, the use of a roller, applied gently at first, but, afterwards, gradually tightened.

Phlegmatia Lactea, P. dolens.

PHLEGMATIÆ, see Empresma—p. Membranosæ et parenchymatosæ, Empresma.

PHLEGMAT'IC, *Phlegmat'icus,* from φλεγμα, 'phlegm.' Abounding in phlegm,—as the '*phlegmatic* or *lymphatic* temperament.'

PHLEGMATOCHEMY, see Chemistry.

PHLEGMATOPYRA, Fever, adeno-meningeal.

PHLEGMATORRHAG''IA, *Phlegmatorrhæ'a, Catarrh,* from φλεγμα, φλεγματος, 'phlegm,' and ρεω, 'I flow.' Stahl and his partisans gave this name to a copious secretion, by the nostrils, of a limpid and thin mucus, without inflammation. It is the *Cory'za Phlegmatorrhag'ia* of Sauvages. See Coryza.

PHLEGMHYMENITIS, Phlegmymenitis.

PHLEGMON, from φλεγω, 'I burn.' *Phlogo'sis phleg'monē, Phleg'monē, Phlegma'sia, Incen'dium, Inflamma'tio,* (Prov.) *Beal.* Inflammation of the areolar texture accompanied with redness, circumscribed swelling, increased heat and pain; which is, at first, tensive and lancinating; afterwards, pulsatory and heavy. It is apt to terminate in suppuration. It requires the antiphlogistic treatment, until suppuration seems inevitable, when the suppuration must be encouraged as the next favourable termination to resolution.

PHLEGMON PÉRINÉPHRÉTIQUE, Periphrenitis — p. Peri-uterine, see Peri-uterine.

PHLEGMONE, Inflammation — p. Mammæ, Mastodynia apostematosa—p. Mastodynia, Mastodynia apostematosa — p. Parotidæa, Parotis — p. Peritonæi, Peritonitis—p. Parulis, Parulis—p. Musculorum, Myositis — p. Ventriculi, Gastritis.

PHLEGMONEUX, Phlegmonous.

PHLEGMONODES, Phlegmonous.

PHLEGMONOID, Phlegmonous.

PHLEG'MONOUS, *Phlegmono'des, Phleg'monoid,* (F.) *Phlegmoneux,* from φλεγμονη, (φλεγω, 'I burn.') 'a phlegmon,' and ειδος, 'resemblance.' That which relates or belongs to or resembles phlegmon.

Phlegmonous Inflammation is the active inflammation of the areolar membrane; in contradistinction to erysipelatous inflammation, or that of the skin.

PHLEGMOPYRA, Fever, adeno-meningeal.

PHLEGMORRHAGIA, Blennorrhœa.

PHLEGMORRHAGIE PULMONAIRE, Bronchorrhœa.

PHLEGMORRHŒA, Blennorrhœa.

PHLEGMYMENI'TIS, *Phlegmhymeni'tis,* from φλεγμα, 'phlegm,' 'υμην, 'a membrane,' and *itis,* the termination for inflammation. Inflammation of a mucous membrane.

Phlegmymenitis Enterica, see Enteritis.

PHLEPS, Vein.

PHLOGIA, Inflammation.

PHLOGICUS, Inflammatory.

PHLOGISTIC, Inflammatory.

PHLOGISTICI, Empresma.

PHLOGISTON, Hydrogen.

PHLOGMUS, Verbascum thapsus.

PHLOGO'DES, from φλοξ, φλογος, (φλεγω, 'I burn,') 'flame,' and ειδος, 'resemblance.' *Inflam'med, Inflamma'tus, Inflammato'rius,* Inflammatory. An epithet employed particularly to express the red colour of the face.

PHLOGOGUS, Antiphlogistic.

PHLOGOPYRA, Synocha.

PHLOGOSED, Inflamed.

PHLOGO'SIS, *Incen'dium, Inflamma'tion,* from φλοξ, φλογος, 'flame.' Some writers use this word exclusively for external inflammation — phlegmon; others, for that which is superficial or erysipelatous.

PHLOGOT'ICA, *Inflammations.* The second order in the class *Hæmatica* of Good.

PHLOIOS, Cortex.

PHLOMUS, Verbascum thapsus.

PHLOOS, Cortex.

PHLOR'IDZINE, *Phloridzi'na, Phloridzin,* from φλοος, 'inner bark,' and ριζα, 'root.' The bitter or active principle of the root and trunk of the apple, pear, cherry, and plum tree. It is deposited from the decoction on cooling; crystallizes in silky spicula of a dead white colour when in masses, or in long slender prisms or tables,

when crystallized with care. 1000 parts of water, at a temperature of from 32° to 71°, only dissolve about one part; but at from 70° to 212°, it is dissolved in all proportions. It is very soluble in pure alcohol, but only slightly so in ether; s. g. 1.429. It has been administered successfully in intermittents,—10 to 20 grains being generally required to arrest the paroxysm. It may be given either in the form of pill or powder.

PHLOUS, Cortex.

PHLOX, Verbascum thapsus.

PHLYCTÆ'NA, *Phlyctæ'nis*, *Phlyctis*, *Phlyza'cion*, *Ampull'æ*, *Holophlyc'tides*, *Phlyc'tides*, *Phlysis*, from *φλυζω*, 'I boil.' Tumours formed by the accumulation of a serous fluid under the epidermis.

PHLYCTÆNULA, see Hydatid.

PHLYCTENOID, *Phlyctenoï'des*, from *phlyctæna*, and *ειδος*, 'resemblance.' Resembling phlyctænæ. An epithet for a variety of herpes.

PHLYCTEN'ULAR, same etymon as Phlyctæna. Of or belonging to phlyctænula, — as *phlyctenular ophthalmia*; inflammation of the eye, accompanied with phlyctænulæ on the cornea.

PHLYCTIDES, Phlyctæna.

PHLYCTID'IUM, same etymon. A circular or annular spot of inflammation of the corium, encircled by a red ring or zone, within which suppuration takes place. The genuine small-pox pustule, and that produced by the application of tartar emetic ointment, are examples of it.

PHLYCTIS, Phlyctæna.

PHLYSIS, *φλυσις*, same etymon. A cutaneous eruption. An ulcerative, subcutaneous tumour: flat, tensive, glabrous: diffused, hot, throbbing; at length fluctuating, with an acrid ichor.—Good.

Phlysis, Phlyctæna — p. Ecthyma, Ecthyma — p. Impetigo, Impetigo—p. Porrigo, Porrigo — p. Scabies, Psora.

PHLYZACIA, Ecthyma.

PHLYZACION, Phlyctæna.

PHOBODIPSON, Hydrophobia.

PHOCOM'ELUS, from *φωκη*, 'a seal,' and *μελος*, 'a limb.' A monster, in which the limbs are shortened; the hands and feet appearing to exist alone, and to be inserted immediately on the trunk, as in the seals and the herbivorous cetacea. — I. G. St. Hilaire.

PHŒNICINE, Hæmatin.

PHŒNICISMUS, Rubeola.

PHŒNIGMUS, Phenigmus — p. Petechialis, Purpura simplex.

PHŒNIX DACTYLIFERA, Date tree — p. Excelsa, Date tree.

PHŒNODINE, Hæmatin.

PHONA'TION, *Phona'tio*, from *φωνη*, 'voice.' The physiology of the voice.

PHONE, Voice.

PHO'NICA, *φωνικα*, from *φωνη*, 'voice.' The first order of the class *Pneumatica*, in Good's Nosology. Defined: diseases affecting the vocal avenues:—the passage of the voice impeded, or its power suppressed or depraved.

PHONON'OSI, *Phononu'si*, from *φωνη*, 'the voice,' and *νοσος*, 'a disease.' *Phonopathi'æ*, *Morbi vocis*. Diseases of the voice.

PHONOPATHIÆ, Phononosi.

PHORA, Gestation.

PHORBE, Pabulum.

PHORONOM'IA, from *φερω*, 'I move,' and *νομος*, 'law.' The doctrine of muscular motion.

PHOROUS, from *φερω*, 'I carry.' A suffix denoting conveyance. Hence, Galacto*phorous*, &c.

PHOS, Light.

PHOSPHAS, *Phosphate*. A salt formed by the union of phosphoric acid with a salifiable base.

Phosphas Calcicum Stibiatum, Antimonial powder — p. Calcis stibiatus, Antimonial powder —p. Natricum, Soda, phosphate of.

PHOSPHATE, Phosphas.

PHOSPHAT'IC, *Phosphat'icus*, from *Phosphorus*. Relating to the phosphates; hence the *Phosphat'ic Diath'esis* is the habit of body which favours the deposition of the phosphates from the urine.

PHOSPHÈNE, see Photopsia.

PHOSPHORE, Phosphorus.

PHOSPHORÉNÈSES. M. Baumes unites, under this generic name, diseases which he attributes to disordered phosphorization; i. e. to excess or deficiency of calcareous phosphates or its decomposition. Amongst these affections he ranks rachitis, osteo-malacia, and gout.

PHOSPHORES'CENCE, *Phosphorescen'tia*, *Luminos'ity*; from *phosphorus*. The properties possessed by certain bodies of being luminous in obscurity, or under particular circumstances. This phosphorescence has been occasionally witnessed in man, when suffering from some wasting disease, and near death.

PHOSPHORIC ACID, *Ac'idum phosphor'icum*, (F.) *Acide phosphorique*. Same etymon. A solid, colourless compound; highly sapid; very soluble in water, and vitrifiable by fire. It exists in bones combined with lime. It has been employed in medicine in the form of lemonade, in passive hemorrhage, typhus, phthisis, marasmus, &c., and in injection in cases of cancer of the uterus. It does not seem preferable to other acids. An *Acid'um phosphor'icum dilu'tum* is official in the London pharmacopœia.

PHOSPHORNECROSIS, see Phosphorus.

PHOSPHORURIA, Urine, phosphorescent.

PHOS'PHORUS, *Phos'phorum*, *Autophos'phorus*, *Ignis philosoph'icus*, *Lumen constans*, from *φως*, 'light,' and *φερω*, 'I carry.' (F.) *Phosphore*. 'A light carrier.' An elementary or undecomposed substance; not metallic; solid; transparent or semitransparent; colourless; brilliant; flexible; of a sensible garlic odour; very inflammable, and susceptible of combining with the oxygen of the atmosphere, at even the ordinary temperature. It does not exist pure in nature, but is found frequently united to other bodies. Its fumes in the manufacture of lucifer and Congreve matches have caused, it is said, necrosis of the lower jaw — *Phosphornecro'sis*, *phosphorus jaw disease*, *Lucifer-match-makers' Disease*.

Phosphorus has been used in medicine, dissolved in ether or suspended in the yolk of egg, as a stimulant; but the greatest precautions are necessary in its administration: hence it is rarely employed.

Phosphorus Jaw Disease, see Phosphorus.

PHOSPHURIA, Urine, phosphorescent. See Urine.

PHOTOCAMPSIS, Refraction.

PHOTOMA'NIA, from *φως*, *φωτος*, 'light,' and *mania*. Insane delirium induced by light.

PHOTOPHO'BIA, from *φως*, *φωτος*, 'light,' and *φοβος*, 'fear.' Aversion to light:—intolerance of light. Nyctalopia.

PHOTOPHOBICUS, Lucifugus.

PHOTOPHOBOPHTHALMIA, Nyctalopia.

PHOTOPHOBUS, Lucifugus.

PHOTOP'SIA, *Visus lu'cidus*, from *φως*, *φωτος*, 'light,' and *ωψ*, 'the eye.' A false perception of light, as of sparks, flashes of fire, &c., occasioned by certain conditions of the retina and brain, and by pressure on the eyeball. When pressure does not induce the luminous appearance, (F.) *Phosphène*, the existence of amaurosis may be inferred. See Metamorphopsia.

PHOTU'RIA, from *φως*, *φωτος*, 'light,' and *ουρον*, 'urine.' A luminous condition of the urine.

PHRAGMOS, *φραγμος*, 'a fence,' from *φρασσω*, 'I enclose.' A row of teeth.

PHRASIS, Voice, articulated.

PHRASUM, Marrubium.

PHREN, *φρην*, 'the mind.' Also, the diaphragm and scrobiculus cordis.

PHRENAUX'È, *Hypertroph'ia cer'ebri*, from *φρην*, 'the mind, the organ of mind,' and *αυξη*, 'increase.' Hypertrophy of the brain.

PHRENATROPH'IA, *Atroph'ia cer'ebri*, from *φρην*, 'the mind, the organ of mind,' *α*, priv., and *τροφη*, 'nourishment.' Wasting or atrophy of the brain.

PHRENES, Diaphragm.

PHRENESIA, Phrenitis.

PHRÉNÉSIE, Phrenitis.

PHRENESIS, Delirium, Phrenitis.

PHRENETIASIS, Delirium, Phrenitis.

PHRENETISMUS, Phrenitis.

PHRENIC, Diaphragmatic.

PHRE'NICA, from *φρην*, 'the mind.' Diseases affecting the intellect; characterized by error, perversion, or debility of one or more of the mental faculties, (*Phrenopathi'a.*) The first order of the class *Neurotica* of Good. Also, remedies that affect the mental faculties — *Phreu'ics.*—Pereira.

PHRENICS, see Phrenica.

PHRENICULA HYDROCEPHALICA, Hydrocephalus internus.

PHRENISMUS, Phrenitis.

PHRENI'TIS, *Phren'esis, Phrene'sia, Phreneti'asis, Phrenis'mus, Phrenetis'mus, Cephali'tis, Encephali'tis, Cerebri'tis, Cephalal'gia inflammato'ria, Karabitus* (Arab.), *Sibare, Sphacelis'mus cer'ebri, Empres'ma cephali'tis, Siri'asis, Seivi'asis, Sidera'tio, Inflamma'tio* seu *Cauma phreni'tis, Phrensy, Delirium, Brain Fever,* (F.) *Phrénésie, Cérébrite, Inflammation du cerveau et du cervelet*, from *φρην*, 'the mind,' and *itis*, denoting inflammation. A disease characterized by violent pyrexia, pain in the head, redness of the face and eyes, intolerance of light and sound, watchfulness, and delirium, either furious or muttering. Its causes are the same as those of other inflammations: sometimes, however, it is induced by a *Coup de soleil;* by inebriation; violent mental emotions, &c. Some authors have given the name *Phrenitis* and *Meningitis* to inflammation of the membranes of the brain; and that of *Cephalitis, Encephalitis,* or *Cerebritis* to inflammation of the substance of the brain; but there are no pathognomic symptoms, which can lead us to refer the seat of the disease to either of those parts exclusively. Phrenitis is, of course, a very dangerous affection, from the importance of the organ concerned. The most active treatment must necessarily be pursued. Repeated bleeding; purging; the application of ice to the shaved head; a position in which the head is raised; and the avoiding of irritation of every kind;—form the remedial means during the violent stage. After this has yielded, counter-irritants to the nape of the neck or to other parts of the body will be useful adjuvants. When the brain and meninges were affected only symptomatically, as in inflammation of the diaphragm, the disease was formerly called *Paraphrenitis.*

Hydrocephalus acutus is a variety of phrenitis.

PHRENITIS CALENTURA, *Coup-de-soleil*—p. Latrans, Hydrophobia—p. Potatorum, Delirium tremens—p. Verminosa, Vercoquin.

PHRENO-GLOTTISM, Asthma thymicum.

PHRENOLOGY, Craniology.

PHRENO-MAG'NETISM, *Phreno-mes'merism, Mes'mero-phrenol'ogy.* A term applied to the condition of a mesmerized person, in which, when any cerebral or phrenological organ—so called—is touched, the functions of the organ are manifested. It has been established, that no such phenomena can be elicited in children, or in those who have never seen a phrenological cast or picture.

PHRENOPARALYSIS, see Paralysis.

PHRENOPATHIA, see Phrenica.

PHRENOPATHI'A ÆTHE'REA. The aggregate of encephalic phenomena induced by the inhalation of ether.

PHRENSY, Phrenitis.

PHRICASMUS, Horripilation.

PHRICE, Horripilation.

PHRICIA, Horripilation.

PHRICIASIS, Horripilation.

PHRICO'DES (FEBRIS,) from *φρικη*, 'a shivering;' *Horrif'ica.* A fever in which the chill is very intense and prolonged.

PHRYAGMA, Shuddering.

PHRYCTE, Colophonia.

PHRYG''IUS (LAPIS). An earthy matter, found in Phrygia and Cappadocia, and formerly employed as an astringent.—Gorræus.

PHTHARMA CALIGO, Caligo—p. Cataracta, Cataract—p. Glaucoma, Glaucoma.

PHTHEIR, Pediculus.

PHTHEIRE'MIA, from *φθειρω*, 'I corrupt,' and *'αιμα*, 'blood.' A state in which the plastic powers of the blood are deteriorated.

PHTHEIRI'ASIS, *Phthiri'asis, φθειριασις*, from *φθειρ*, 'a louse;' *Morbus pediculo'sus* seu *pedicula'ris, Pruri'go pedicula'ris, Pedicula'tio, Malis pedic'uli, Peta'lê, Lousiness, Lousy disease,* (F.) *Maladie pédiculaire, Phthiriase.* A disease which consists in the excessive multiplication of lice on the human body, under conditions in which it does not ordinarily take place, and in spite of cleanliness. It has been asserted that the affection has often caused death. Simple and medicated baths have been recommended for its removal; lotions of the decoction or infusion of tobacco and stavesacre, mercurial frictions, &c.

PHTHEIRIUM, Delphinium staphisagria.

PHTHEIROCTONUM, Delphinium staphisagria.

PHTHINAS, Phthisis.

PHTHINODES, Phthisicus.

PHTHIRIASE, Phtheiriasis.

PHTHIRIASIS, Malis, Phtheiriasis.

PHTHIRIUM SCABIEI, see Psora.

PHTHIRIUS, Antiparasitic—p. Inguinalis, see Pediculus.

PHTHIROCTONUS, Abortive.

PHTHIROPORON, Autumn.

PHTHISES: same etymon as Phthisis. In the classification of Fuchs, diseases attended with ulceration, hectic fever, and emaciation.

PHTHISIC, Phthisis. Also, a slight tickling cough, (Prov.) *Tissick.*

PHTHISICAL, Phthisicus.

PHTHIS'ICUS, *Phthino'des, Phthis'ical, Tis'ical,* (F.) *Phthisique, Poitrinaire;* same etymon as phthisis. Belonging to phthisis. Also, one labouring under phthisis, or who is *consumptive.*

PHTHISIE, Phthisis pulmonalis—*p. Aiguë*, Consumption, galloping—*p. Calculeuse*, Calculi, pulmonary, see Lithiasis pulmonum—*p. Carcinomateuse*, Phthisis, cancerous—*p. Galopante*, Consumption, galloping—*p. avec Mélanose*, Anthracosis pulmonum—*p. Mésentérique*, Tabes mesenterica—*p. Trachéale*, see Phthisis laryngea—*p. Tuberculeuse*, Phthisis pulmonalis.

PHTHISIOL'OGY, *Phthisiolog''ia*, from *φθισις*, and *λογος*. A treatise on phthisis.

PHTHISIOSIS. Tubercular consumption.

PHTHISI-PNEUMONIA, Phthisis pulmonalis.

PHTHISIQUE, Phthisicus.

PHTHISIS, *Phthoë, Phthinas, Tabes, Te'ce-*

don, Consumption, Decline, Phthis'ic, Tis'ic, from *φθιω,* 'I waste away, I decay.' This word, taken in a general sense, means progressive emaciation of every part of the body. It is usually, however, restricted to phthisis pulmonalis.

Phthisis Acuta, Consumption, galloping — p. Black, see Anthracosis.

Phthisis, Bron'chial, *Phthisis bronchia'lis.* Phthisis occasioned by the pressure of enlarged tuberculous bronchial glands, which, not unfrequently, communicate with caverns in the lungs, or with the bronchia.

Phthisis Calculosa, Lithiasis pulmonum.

Phthisis, Can'cerous, *Scirrhus, Carcinoma et Fungus Pulmo'num, Med'ullary* or *Enceph'aloid Tumour of the Lung,* (F.) *Cancer du Poumon.* Cancer of the lung, which gives rise to carcinomatous phthisis, (F.) *Phthisie carcinomateuse,* of Bayle.

Phthisis Consummata, see Ph. pulmonalis—p. Dorsalis, Tabes Dorsalis — p. Dyspeptic, see Phthisis — p. Exulcerata, Ph. pulmonalis — p. Hepatica, Hepato-phthisis — p. Ischiadica, Ischio-phthisis.

Phthisis Laryngea, *Chronic Laryngi'tis, Laryngi'tis et Trachei'tis chron'ica, Tuberculo'sis laryn'gis et trache'æ, Laryn'go-et-Tracheophthisis, Laryngophthisis, Ul'cera seu Helco'sis Laryngis,* (F.) *Phthisie laryngée, Ulcère du larynx, Laryngite avec sécrétion de Pus,* is a species of consumption analogous to phthisis pulmonalis, produced by inflammation and ulceration of the interior of the larynx, and sometimes by caries of the cartilages. *Phthisis trachea'lis, Tracheophthi'sis,* (F.) *Phthisie trachéale,* is a similar affection, seated in the trachea. Chronic inflammation of the larynx and trachea may exist, however, without tubercles or phthisis.

Phthisis Meseraica, Tabes mesenterica — p. Nodosa, Ph. pulmonalis — p. Mucosa, see Bronchorrhœa — p. Notias, Tabes dorsalis — p. Pituitosa, see Bronchorrhœa.

Phthisis Pulmona'lis, *Ph. pulmo'num* seu *pulmona'ris* seu *nodo'sa pulmona'lis vera* seu *tuberculo'sa* seu *scrophulo'sa* seu *tuberculo-ulcera'ta* seu *purulen'ta exulcera'ta* seu *exulcera'ta, Maras'mus* seu *Hec'tica* seu *Hæmop'tysis phthisis, Passio vomicof'lua, Phthisi-pneumo'nia, Tabes pulmona'lis* seu *pulmo'num, Ulcus pulmonum, Helco'sis pulmona'lis, Pneumonophthi'sis, Pneumonoph'thoë, Pneumop'thoë, Pulmo'nia, Tuberculo'sis Pulmo'num, Gongrophthi'sis, Morbus Ang'licus, Tuberculous disease of the lungs, Pulmonary consumption, Consumption, Decline, Phthisic, Tisic,* (Sc.) *Teasick,* (F.) *Phthisie, P. pulmonaire* seu *tuberculeuse, Crachement de pus.* Occasionally, this formidable disease occurs accidentally: but, usually, it is caused by a conformation obtained from progenitors. This, at least, predisposes to it; and but a slight exciting cause may be required to rouse the predisposition into action. It is less a disease of the torrid zone; and in the temperate regions of the globe, its pathology is often intimately allied with that of scrofula. It consists in the formation of tubercles in the lungs, which sooner or later inflame and break down. In such a constitution, ulcerations of the lungs do not readily heal; and hectic fever — the universal attendant upon irritability and debility — is established. This persists, and gradually wears down the patient, till he ultimately expires, exhausted by the irritative fever. The chief symptoms are the following. The patient feels a sense of uneasiness in the chest, with severe fits of coughing, or a short and dry cough with dyspnœa. This may be considered the incipient stage. The cough then becomes extremely troublesome, especially in the morning; and dyspnœa is increased on the slightest exertion. The expectoration is evidently purulent, with fever in the evening, and circumscribed redness of the cheeks; wasting and colliquative sweats early in the morning. This must be considered the confirmed stage,—*Phthisis consumma'ta, Pneumophthi'sis.* In the third, or last stage, the hectic is constant, with small pulse, pungent heat, colliquative sweats, and diarrhœa. The weakness becomes extreme, and the patient exhausted. *Physical Signs.* — 1. In the first stage, whilst there are yet scattered miliary tubercles,—the only appreciable change at the exterior of the chest, and this is not constant, is a want of freedom in the movements under one or both clavicles. Percussion will generally discover a slight diminution of sound corresponding to the summit of one lung. In the same situation, auscultation shows that the inspiratory murmur is either weaker, rougher, or confused. The sound of expiration is more distinct. The voice and cough are rather more resonant, and wheezing or mucous *râles* are occasionally heard in the same region. 2. When the tubercular deposition has become more abundant, the motion of the chest is more markedly diminished under one or both clavicles. The loss of sound on percussion is more distinct, the inspiration, on auscultation, is bronchial, the expiration louder and more superficial, and the resonance of the voice and cough is increased. The rest of the lung is perhaps healthy, or the respiration may be peurile. 3. When the tubercles are undergoing softening, —in addition to the preceding signs, auscultation exhibits a subcrepitant *râle* around the apex of the lung, decreasing from above downwards. It is most distinct during or after the cough, and at the close of a deep inspiration. As the disease proceeds, the bubbling becomes successively larger, and ultimately *gargouillement* is heard. The inspiration and expiration are cavernous or tracheal. The voice and cough indicate unusual resonance and pectoriloquy. The intercostal spaces are often depressed locally, and percussion may become gradually clearer and even tympanitic as the cavern increases.

It is only in the incipient state of this formidable disease, that advantage can be expected from any plan of treatment; and of all means that can be devised, that of removing to a climate in which air and exercise can be daily enjoyed during the autumnal, winter, and spring months is the best. See Climate. If this be impracticable, the patient must be kept in a regulated temperature, taking care that the chamber is duly ventilated; and gestation in the open air be used, whenever the atmosphere, although cold, is dry. The other indications will be: 1. To moderate inflammatory action: 2. To support the strength; and, 3. To palliate urgent symptoms. The whole treatment indeed is palliative. Counter-irritants relieve pain: demulcents and mild opiates alleviate the cough: the mineral acids, united with opium, relieve the colliquative sweats: and chalk and opium the diarrhœa.

Dr. Wilson Philip has pointed out a particular species of phthisis, which is characterized, in the early stage, by a deranged state of the digestive organs; flatulent, irregular bowels; furred tongue; impaired appetite; unnatural fæces; and the epigastric region more or less full and tender on pressure. The affection of the lungs is here secondary. He calls it *Dyspeptic phthisis.*

Phthisis Pulmonalis Purulenta Exulcerata, Phthisis pulmonalis — p. Pulmonalis scrofulosa, Phthisis pulmonalis — p. Pulmonalis tuberculosa, Phthisis pulmonalis — p. Pulmonalis tuberculosa-ulcerata, Phthisis pulmonalis — p. Pulmonalis vera, Phthisis pulmonalis—p. Pupillæ, Synezisis—p. Pupillaris, Myosis—p. Scrophu-

osa, Phthisis pulmonalis — p. Sicca, Tabes dorsalis — p. Tuberculosa, Phthisis pulmonalis — p. Uterina, Metrophthisis — p. Vesicalis, Cystophthisis.

PHTHISIS WEED, Ludwigia palustris.

PHTHISURIA, Diabetes.

PHTHISURIE, Diabetes—*p. Sucrée*, Diabetes mellitus.

PHTHOË, Phthisis.

PHTHOIS, Pastil, Trochiscus.

PHTHOISCOS, Pastil, Trochiscus.

PHTHONGODYSPHORIA, Hyperacusis.

PHTHORA, Abortion, Corruption, Plague.

PHTHORIUS, Abortive.

PHTHOROCTONUS, Abortive.

PHUCAGROSTIS MINOR, Pila marina.

PHUSCA, Oxycrate.

PHYGANTHROPIA, Misanthropia.

PHYGETH'LON, *Panus, Phypella*, from *φυω*, 'I grow,' [?]. Inflammation of the superficial lymphatic glands, not ending in suppuration.

PHYLACTERION, Amuletum.

PHYLACTE'RIUM, *φυλακτηριον*, from *φυλασσω*, 'I preserve.' A *Phylac'tery*, (F.) *Phylactère*. An amulet: — a prophylactic.

PHYLAXIS, Conservation.

PHYLLAN'THUS URINA'RIA, *Binkohumla. Ord.* Euphorbiaceæ. A plant employed in Ceylon, in decoction, as a diuretic.

PHYLLITIS, Asplenium scolopendrium — p. Muraria, Asplenium ruta muraria — p. Rotundifolia, Asplenium trichomanoides.

PHYMA, *Phima*, from *φυω*, 'I grow.' With the ancients, this word was used with great latitude: sometimes, in the sense of phlegmon, for tumours larger than a boil, and perfectly suppurative. In the nosology of Sauvages, *Phymata* is an order of diseases, to which he refers erysipelas, œdema, phlegmon, emphysema, scirrhus, &c. In that of Dr. Good it is a genus, including hordeolum, furunculus, sycosis, and anthrax.

PHYMA ANTHRAX, Anthrax — p. Anthrax terminthus, Terminthus — p. Sycosis, Sycosis.

PHY'MATOID, *Phymatoï'des*, (F.) *Phymatoïde*, from *φυμα*, 'a tubercle,' and *ειδος*, 'resemblance.' A state of cancerous tissue, in which the dull yellow hue and the consistence resemble those of tubercle. — Lebert.

PHYMATO'SES, from *φυμα*, 'a hard tumour.' Tuberculous diseases. — Fuchs.

PHYMATOSIS, Excrescence—p. Cerebri, Encephalophymata — p. Elephantiasis, Elephantiasis — p. Lupus, Lupus — p. Verrucosa, Verruca.

PHYMOSIS, Phimosis.

PHYPELLA, Phygethlon.

PHYSA, Crepitation.

PHYSAGOGA, Carminatives.

PHY'SALIS, from *φυσα*, 'a bladder,' referring to the inflated calyx, *P. Alkeken'gi* seu *halicac'abum, Sola'num vesica'rium, Alchachen'gê, Alkeken'gi, Halicac'abum, Winter Cherry*, (F.) *Alkekenge, Coqueret. Ord.* Solanaceæ. *Sex. Syst.* Pentandria Monogynia. The berries are recommended as a diuretic, from 6 to 12 for a dose, in dropsical and calculous cases. It has been affirmed, that the whole plant—twigs, leaves, capsules and berries—possesses the antiperiodic virtues of Cinchona.

PHYSALIS ALKEKENGI, Physalis — p. Halicacabum, Physalis—p. Obscura, Ph. viscosa—p. Pennsylvanica, Ph. viscosa—p. Pubescens, Ph. viscosa —p. Stramonium, Anisodus luridus.

PHYSALIS VISCO'SA, *P. obscu'ra* seu *Pennsylvan'ica* seu *pubes'cens, Ground cherry*; indigenous. The berries are said to be diuretic and sedative.

PHYSCE, Abdomen, Colon.

PHYSCIA ISLANDICA, Lichen Islandica — p. Nivalis, Lichen caninus.

PHYSCO'NIA, from *φυσκων*, 'the paunch.' *Ventros'itas, Ecphy'ma physco'nia, Hyposar'ca, Emphrac'tica, Visco'nia, Hypersarchid'ios, Potbelly, Pendulous abdo'men, Swagbelly, Gorbelly*, (Prov.) *Gotchbelly, Pedbelly*. A generic term, under which Sauvages has comprised every large tumour developed in the abdomen, that is neither fluctuating nor sonorous. Linnæus calls it Hyposarca.

PHYSCO'NIA ADIPO'SA, *Obes'itas* seu *Polysar'cia vis'cerum*. Accumulation of fat in the intestines.

PHYSCONIA BILIOSA, Turgescentia vesiculæ felleæ.

PHYSCONIA EMPHYSEMAT'ICA. Accumulation of air in the areolar tissue, or between the coats of particular viscera.

PHYSCONIA LIENIS, Splenoncus — p. Mesenterica, Tabes mesenterica—p. Splenica, Ague cake.

PHYSCONIA STRUMO'SA, *Scrof'ula abdomina'lis inter'na*. Tumid abdomen from scrophulous enlargement of the glands.

PHYSCONIE MÉSENTÉRIQUE, Tabes mesenterica.

PHYSEMA, Tympanites, Physesis.

PHYSE'SIS, *Physe'ma*, from *φυσαω*, 'I inflate.' An emphysematous tumour. Tympanites.

PHYSETER MACROCEPHALUS, see Cetaceum.

PHYSIATRICE, Vis medicatrix naturæ.

PHYSIAUTOCRATIA, Vis medicatrix naturæ.

PHYSIC, Medicament, Medicina — p. Indian, Euphorbia corollata, Gillenia trifoliata—p. Root, Leptandra purpurea.

PHYSICAL, Medical—p. Signs, see Symptom.

PHYSIC''IAN, *Med'icus, Iatros, Aces'tor, Aces'ter, Altheus*, Παιων, *Pæon*, (Old Eng.) *Fesis'ian, Ficicion, Leche, Leech*, from *φυσις*, 'nature.' (F.) *Médecin, Docteur*. One who has received his degree from an incorporated Institution, as Doctor of Medicine. The French formerly used the word *physicien* in the same sense. It is now appropriated by them to the natural philosopher. *Physicist* has the same signification.

PHYSICIAN, FAMILY. One regarded as the regular attendant on a family.

PHYSICIAN, LEARNED, Iatrosophista—p. Practical, Iatrotechna — p. Priest, see Asclepiadæ.

PHYSICIEN, Physician.

PHYSICIST, see Physician.

PHYSICS, MED'ICAL, *Iatrophys'ics*. Physics directly applied to medicine, — either to the explanation of the vital phenomena, the preservation of individuals, or the treatment of disease.

PHYSIOAUTOCRATIA, Vis medicatrix naturæ.

PHYSIOG'NOMIST, *Physiogno'mon*, one who busies himself especially with, or pretends to be versed in, physiognomy.

PHYSIOG'NOMY, (Old Eng.) *Vis'nomy, Physiognom'ia, Physiognom'ica, Physiognom'icē, Physionom'ia, Physiognomon'ia, Physiognom'onē, Physiognomos'ynē, Physiognomosia, Anthroposcop'ia, Prosopomanti'a, Prosopolog''ia, Semiot'icē fa'ciei, Physiognomon'ica, Physiognom'ony, Metopos'copy, Prosopo'sis*, from *φυσις*, 'nature,' and *γνωμη*, 'knowledge.' The art of knowing the dispositions of men from their external appearance; especially from the features. Every inference of this kind must necessarily be extremely fallacious, and cannot be reduced to rule, as was attempted by Lavater and others. In infantile diseases, numerous shades of expression are evident, which experience teaches how to appreciate; and which afford useful guides in understanding the pathology of that period of existence.

PHYSIOLOGIA PATHOGENETICA, see Pathogenetic.

PHYSIOLOG''ICAL, *Physiolog''icus*, (F.) *Physiologique*. Relating or belonging to physiology.

PHYSIOLOGICAL ANATOMY, see Anatomy — p. Doctrine, Broussaism.

PHYSIOLOGICE, Physiology.

PHYSIOL'OGIST, *Physiol'ogus.* Same etymon as the next. One who occupies himself specially, or is well acquainted, with physiology.

PHYSIOL'OGY, *Physiolog''ia, Biol'ogy, Bion'omy, Biot'ice, Biophænomenolog''ia, Physiolog''icē, Œconom'ia anima'lis, Anatom'ia viva, Anat'omē anima'ta, Anthropolog''ia, Microcosmogra'phia, Microcos'mica scien'tia, Cognit''io physiolog''ica, Pars natura'lis medici'næ, Philosoph'ia cor'poris vivi ;* from *φυσις*, 'nature,' and *λογος*, 'a description.' Formerly, Physiology meant the same as Physics, in its extensive signification, now does. At the present day, it includes the science which treats of the functions of animals or vegetables; an acquaintance with the phenomena the aggregate of which eonstitute life. It is the *science of life.* It is divided into *animal—Zoöphysiologia*, or *Zoobiolog''ia ;* and *vegetable — Phytophysiolog''ia*, or *Phytobiolog''ia*, according as it considers the life of animals or of vegetables singly. *Comparative physiology* comprises both. Physiology is, also, *general* or *special*, according as it treats of life in the abstract or in some particular species. To the latter belongs the *Physiology of Man*,—called also, *Hygienic Physiology* to distinguish it from *Pathological Physiology* or *Pathology.*

PHYSIOLOGY, PATHOGENETIC, see Pathogenetic.

PHYSIONOMIA, Physiognomy.

PHYSIONOMIE ÉGARÉE, see Wild.

PHYSIS, Natura, Sex.

PHYSOCE'LĒ, *Pneumatoce'lē, Hernia vento'sa ; Oscheoce'lē flatulen'ta, Emphyse'ma Scroti*, from *φυσαω*, 'I insuflate,' and *κηλη*, 'a tumour.' An emphysematous tumour of the scrotum ; probably a case of intestinal hernia, containing much flatus.

PHYSOCEPH'ALUS, from *φυσαω*, 'I inflate,' and *κεφαλη*, 'the head.' (F.) *Physocéphale.* Emphysematous tumefaction of the head.

PHYSOCŒLIA, Tympanites.

PHYSO'DES ; from *φυσαω*, 'I inflate,' and *ειδος*, 'resemblance.' Full of air ; apparently full of air — applied to tumours, &c.

PHYSOME'TRA, *Emphyse'ma U'teri* seu *Uteri'num, Hysteroph'ysē, Hysteremphyse'ma, Hystremphyse'ma, Metremphyse'ma, Infla'tio U'teri, Tym'pany of the Womb, U'terine tympani'tes*, from *φυσαω*, 'I inflate,' and *μητρα*, 'the womb.' A light, tense, circumscribed protuberance in the hypogastrium, obscurely sonorous, with wind occasionally discharged through the os uteri with noise, *Hysteropsoph'ia, Ædœopsoph'ia uteri'na.*

PHYSON, Flatulence.

PHYSONCUS, Emphysema.

PHYSOPSOPH'IA ; from *φυσαω*, 'I inflate,' and *ψοφος*, 'a noise.' A discharge of air with noise.

PHYSOSPASMUS, Colica flatulenta.

PHYSOTHORAX, Pneumothorax.

PHYTEL'EPHAS MACROCAR'PA, from *φυτον*, 'a plant,' and *ελεφας*, 'an elephant.' A tree of South America, called, by Willdenow, *Elephantu'sia*, the dense albumen of whose unt, is the *vegetable ivory*, which is as durable and nearly as hard as the ivory of the elephant.

PHYTIVOROUS, Phytophagous.

PHYTOALOPECIA, Porrigo decalvans.

PHYTOBIOLOGIA, see Physiology.

PHYTO-CHYMISTRY, see Chymistry.

PHYTOLAC'CA DECAN'DRA, *P. vulgaris, Poke Weed, Amer'ican night shade, Cancer root, Poke, Skoke, Jucato Calleloe* [?], *Jalap, Pigeon Berry, Jalap cancer root, Sola'num racemo'sum America'num* seu *magnum Virginia'num rubrum, Blitum America'num, Garget*, (F.) *Raisin d'Amérique, Phytolaque à dix étamines, Morelle en grappes, Méchoacan du Canada. Ord.* Chenopodeacæ ; *Sex. Syst.* Decandria Decagynia ; from *φυτον*, 'a plant,' and *lacca ;* because the colour of the juice of the berries resembles that of lacca. The leaves, berries, and roots are employed. The young stems, when boiled, are sometimes eaten at table ; but when old, they must be cautiously used, as the plant is emetic and cathartic. It is most celebrated as a remedy in chronic rheumatism ; and is given in the form of tincture of the ripe berries. It is, also, used in cutaneous eruptions ; tinea capitis, itch, cancerous ulcers, &c.

The root is gathered and dried in the fall.

PHYTOLAQUE À DIX ÉTAMINES, Phytolacca decandra.

PHYTOLOGIA MEDICA, Botany, medical.

PHYTO-PARASITE, Epiphyte.

PHYTOPH'AGOUS, *Phytoph'agus ; Phytiv'orous, Phytiv'orus ;* from *φυτον*, 'a plant,' and *φαγω*, 'I eat.' Feeding or subsisting on vegetables.

PHYTOPHYSIOLOGIA, see Physiology.

PHYTOSPERM'ATA, (F.) *Phytospermes ;* from *φυτον*, 'a plant,' and *σπερμα*, 'sperm.' Particles similar to the spermatozoids of animals, observed in vegetables, and presumed to possess a similar agency in reproduction.

PHYTOTOMY, see Anatomy, (vegetable.)

PHYTOZOON, Zoophyte.

PIA MATER, *Pia* seu *mollis* seu *ten'uis Mater, Pia meninx, Meninx inte'rior* seu *vasculo'sa* seu *choroï'des, Inner lam'ina of the Méningine*, (Ch.), *Membra'na vasculo'sa Cer'ebri, M. Cer'ebri ten'uis* seu *mollis* seu *pro'pria*, (F.) *Pie mère, Méningette.* The pia mater is a very delicate membrane, which covers the brain immediately, penetrates into its anfractuosities, and envelops, also, the cerebellum and the spinal prolongation, &c. Bichat does not regard it as a membrane, properly so called, but as a net-work of blood-vessels, united by a lax areolar tissue. The *Pia Mater exterior* is the portion of membrane which covers the exterior of the encephalon, and faces the arachnoid externally. The *Pia Mater interior* is that which lines the cerebral fossæ, into which it penetrates by a cleft situate between the posterior part of the corpus callosum and the fornix; and by two other fissures, situate between the corpora fimbriata and thalami nervorum opticorum. The pia mater contains a great number of granulations similar to the *Glandulæ Pacchioni.*

PIA MATER TESTIS, Tunica vasculosa—p. Meninx, P. Mater.

PIAN, Frambœsia.

PIANS, MOTHER OF, Mama-pian.

PIAR, Fat.

PIARHÆ'MIA, *Piarrhæ'mia*, from *πιαρ*, 'fat, and *αιμα*, 'blood.' Fat in the blood. — Simon.

PICA, Malacia—p. Africanorum, Chthonophagia.

PICAC, Euphorbia corollata.

PICACISM'US, *Pica'tio*, from *pix, picis*, 'pitch.' Depilation by means of a pitch plaster. Also, Malacia.

PICATIO, Malacia, Picacismus.

PICEA, Pinus abies.

PICERON, Butter.

PICHU'RIM BEANS. The seed, *Faba Pichurim, F. Pechu'rei, Para nut, Sassafras nut, Puxiri, Brazil'ian nutmeg*, of a tree, supposed to be *Perse'a pichurim, Ocote'a pichu'rim* seu *Puchury, Tetranthe'ra pichurim, Nectan'dra puchury, Puchury* or *Puchyry* of the Brazilians, *Ord.* Lauraceæ, which grows in Brazil, Guiana, Venezuela, and other parts of South America. They are of an elliptical shape; flat on one side, convex on the other; of an aromatic odour between that of

nutmegs and sassafras, and of a spicy, pungent taste. The medical properties are the same as those of other aromatics. For the bark, see Pecburim cortex.

PICK, Emetic.

PICKERELWEED, SHOVEL, Unisema deltifolia.

PICOTE, Variola.

PICOTEMENT, Pricking.

PICOTIN, Arum maculatum.

PICRA, Pulvis aloës et canellæ.

PICRÆNA EXCELSA, Quassia.

PICRIA, Bitterness.

PICRIUM SPICATUM, Coutoubea alba.

PICROCHOLOS, Bilious.

PI'CROMEL, *Bilin*; from *πικρος*, 'bitter,' and *μελι*, 'honey.' A name given by Thénard to a colourless, soft substance, of an acrid, bitter, saccharine taste, nauseous smell, and very soluble in water, which is considered to be a *bilate of soda*. It is not an immediate principle, but a mixture of different substances. It forms part of the bile, and is generally classed amongst the animal immediate principles.

PICROPE'GÆ, *Pikrope'gæ*, from *πικρος*, 'bitter,' and *πηγη*, 'a spring.' Mineral waters; bitter from the presence of chloride of magnesium.

PICROS, Amarus.

PICROTOX'INE, *Picrotox'ina*, *Picrotox'in*, from *πικρος*, 'bitter,' and *toxicum*, 'poison.' A vegetable alkali, discovered by M. Boullay in the *Menispermum Cocculus*. It crystallizes in quadrangular, white, brilliant, semitransparent prisms; which are excessively bitter, soluble in three parts of alcohol, and in fifteen of boiling water.

The Cocculus Indicus owes its poisonous properties to this principle.

PIE MÈRE, Pia mater.

PIE-MÉRITE, *Inflamma'tio piæ matris*. A miserably compounded term, employed by M. Grisolle, to express inflammation of the pia mater:—from (F.) *pie mère*, 'the pia mater,' and *ite*, *itis*; a termination denoting inflammation.

PIÈCE, Hepatitis.

PIÈCES D'ANATOMIE ARTIFICIELLES, see Artificial.

PIED, Pes — *p. d'Alexandre*, Anthemis pyrethrum — *p. d'Alouette des champs*, Delphinium consolida — *p. Bot*, see Kyllosis — *p. de Chat*, Antennaria dioica — *p. de Cheval marin*, Cornu ammonis — *p. de Griffon*, Gryphius pes, Helleborus fœtidus — *p. de Lièvre*, Arum maculatum — *p. de Lion*, Alchemilla — *p. de Lit*, Origanum — *p. d'Ours*, Acanthus mollis — *p. Plat*, see Kyllosis — *p. de Veau*, Arum maculatum — *p. de Veau triphylle*, Arum triphyllum.

PIEIRON, Fat.

PIERRE, Calculus — *p. d'Aigle*, Ætites — *p. d'Aimant*, Magnet — *p. d'Azur*, Lapis lazuli — *p. Calaminaire*, Calamine — *p. à Cautère*, Potassa cum calce — *p. Divine*, Lapis divinus — *p. d'Écrevisse*, Cancrorum chelæ — *p. Infernale*, Argenti nitras — *p. Judaïque*, Judæus (lapis) — *p. au Lait*, Morochthus — *p. PIERRES CRAYEUSES, Calculi, arthritic — *p. au Fiel*, Calculi, biliary — *p. Stercorales*, Calculus of the Stomach and Intestines — *p. Urinaires*, Calculi, urinary.

PIERREUX, Petrous.

PIESTER, Press.

PIESTERION, Press.

PIESTRON, from *πιεζω*, 'I press.' An instrument recommended by Hippocrates for breaking the bones of the fœtal head when too large to be extracted otherwise.

PIGAMON JAUNÂTRE, Thalictron.

PIGEON BERRY, Phytolacca decandra — p Breasted, see Lordosis — p. Tree, Aralia spinosa.

PIGMENT CELLS, see Cell, pigment.

PIGMEN'TAL, *Pigmen'tary*, *Pigmenta'rius*, (F.) *Pigmentaire*, from *pigmentum*, (*pingere*, *pictum*, 'to paint,') 'paint.' Having relation to pigment or colouring matter.

PIGMENTAL APPARA'TUS, (F.) *Appareil pigmental*. The apparatus concerned in the coloration of the skin of the coloured varieties of man. — Flourens.

PIGMENTARIUS, Apothecary, Unguentarius.

PIGMENTARY, Pigmental — p. Nævi, see Nævus.

PIGMENTUM, Paint — p. Indicum, Indigo — p. Nigrum, see Choroidea tunica — p. Uracu, Terra Orleana.

PIGMY, Pygmy.

PIGNEROLE, Cantaurea calcitrapa.

PIGNON DE BARBARIE, Jatropha curcas — *p. d'Inde*, Jatropha curcas — *p. d'Inde, petit*, Croton tiglium.

PIGNUT, *Earthnut*, *Groundnut*. The bulbous root of *Bu'nium Bulbocas'tanum*. *Ord.* Umbelliferæ. Called *pignuts*, from the fondness of the pig for them. They have been considered to possess a styptic quality; and are deemed serviceable in atonic affections of the kidney. — Hooper.

PIGNUT, Bunium bulbocastanum.

PIG'S FLARE, Adeps suillus.

PIKROPEGÆ, Picropegæ.

PIKRY, Pulvis aloës et canellæ.

PILA, *Sphæra*, *Palla*, *παλλα*, *Ball*. A gymnastic exercise, much used by the ancients as well as moderns.—Galen. Also, a mortar and a pestle — *Ac'onē*.

PILA, Mortar, Pillar — p. Damarum, Ægagropila — p. Rupicaprarum, Ægagropila.

PILA MARI'NA, *Sphæra Marina* seu *Thalas'sia*, *Halcyo'nium rotun'dum*, (F.) *Pelote de Mer*, *Zostère*, *Algue marine*, *A. commune* ou *des Verriers*. Certain light, round, depressed, or oblong masses —inodorous and insipid—in which rushes, hairs, and the *débris* of shells are met with. These are found on the sea-shores, and have been regarded by Spielmann as consisting chiefly of the roots of the *Zoste'ra Mari'na* seu *Marit'ima*, *Alga Mari'na*, (*Big tangles*, *Ware*, *Wair*, *Sea-weare*,) *Phucagros'tis minor*. Iodine is detected in the ashes, which accounts for their success in goître. They have, also, been given as a vermifuge.

PILAIRE, Pileous.

PILAR, Pileous.

PILARE MALUM, Trichosis.

PILA'TIO, from *pilus*, 'a hair.' Fracture of the cranium in which the fissure is narrow, and has the appearance of a hair — a *capillary fissure*, (F.) *Fente capillaire*.

PILE, Hair.

PI'LEA PU'MILA, from *pilus*, 'a hair,' *pilosus*, 'hairy.' *Richweed*, *Clearweed*, *Coolweed*; indigenous; *Order*, Urticaceæ; flowering from July to September; has been used as a wash in poisoning by Rhus. It has a strong, grateful smell.

PILEOLUM, *Calotte*.

PILEOLUS, Caul, Pileus.

PI'LEOUS, *Pilo'sus*, *Pilose*, *Pilous*, *Pilar*, (F.) *Pileux*, *Pilaire*, from *pilus*, 'a hair.' That which relates to the hair. Hairy.

PILEOUS SYSTEM of Bichat is that formed by the hair. It comprises the different species of hair of the human body.

PILES, BLIND, Cæcæ hæmorrhoïdes, see Hæmorrhois.

PILEUS, 'a hat, cap, or bonnet for the head.' *Pile'olus*. A shield. A nipple-like instrument, formed of various materials, and used by females

for protecting the nipple during the child's sucking, when the part is painful. Also, a caul.

PILEUS, Cucupha — p. Hippocraticus, *Bonnet d'Hippocrate.*

PILEUX, Pileous.

PILEWORT, Ranunculus acris, and R. ficaria.

PILI CAPITIS, see Capillus — p. Cutis, Lanugo — p. Palpebrarum, Cilia — p. Pudendorum, Pubes.

PILIER, Piller.

PILIF'EROUS, *Pi'lifer*, from *pilus*, 'a hair,' and *fero*, 'I bear.' Pile or hair bearing, — as a '*piliferous* cyst,'— one containing hair.

PILIMICTIO, see Trichiasis.

PILL, Pilula—p. Abernethy's, see Pilulæ hydrargyri—p. of Aloes and Camboge, Pilulæ aloes et cambogiæ — p. of Aloes and cinchona, Pilulæ aloes et kinæ kinæ — p. of Aloes and colocynth, Pilulæ aloes et colocynthidis — p. of Aloes and fetid gums, Pilulæ de aloe et fœtidis—p. of Aloes and ginger, Pilulæ aloes et zingiberis — p. of Aloes and iron, Pilulæ aloes et ferri — p. Aloes and myrrh, Pilulæ aloes et myrrhæ—p. Aloetic, Pilulæ aloeticæ — p. Aloetic and assafœtida, Pilulæ aloes et assafœtidæ — p. Aloetic, compound, Pilulæ aloes compositæ — p. of Ammoniuret of copper, Pilulæ ammoniureti cupri—p. Analeptic, James's, see Analeptica — p. Anderson's, see Pilulæ aloes et jalapæ—p. Anodyne, Pilulæ opiatæ —p. Antibilious, Barclay's, Pilulæ antibiliosæ— p. Antibilious, Dixon's, Pilulæ antibiliosæ — p. Asiatic, Pilulæ Asiaticæ — p. Assafetida, Pilulæ Assafœtidæ—p. PILL, BLAIR'S. An empirical preparation of colchicum, much used in England in cases of gout.

PILL, BLAUD'S. These pills, proposed by M. Blaud as antichlorotic, are formed as follows: — Take of *gum tragacanth*, in powder, six grains; *water*, one drachm. Macerate in a glass or porcelain mortar, until a thick mucilage is formed, and if it be desired to prevent the formation of peroxide of iron, and to make the pill similar to those of Vallet, substitute a drachm of powdered sugar for the mucilage. Add afterwards of *sulphate of iron*, in powder, half an ounce. Beat well until the mixture is homogeneous, and add *subcarbonate of potassa*, half an ounce. Beat until the mass becomes of a deep-green colour, and of a soft consistence. Divide into 48 [?] pills. Dose, one a day; gradually increasing to two, and afterwards to three.

PILL, BLUE, Pilulæ hydrargyri—p. Brandreth's, Pilulæ aloes et cambogiæ — p. Calomel, Pilulæ hydrargyri chloridi mitis—p. Calomel, compound, Pilulæ hydrargyri submuriatis compositæ — p. Calomel and opium, Pilulæ calomelanos et opii—p. Camboge, Pilulæ cambogiæ compos.—p. Camboge, compound, Pilulæ cambogiæ compositæ — p. of Carbonate of iron, Pilulæ ferri carbonatis— p. Cathartic, compound, Pilulæ catharticæ compositæ—p. of Colocynth and henbane, Pilulæ colocynthidis et hyoscyami—p. of Colocynth, compound, Pilulæ colocynthidis compositæ—p. Common, Pilulæ aloes et myrrhæ—p. of ammoniated Copper, Pilulæ cupri ammoniati — p. of Digitalis and squill, Pilulæ digitalis et scillæ — p. Dinner, see Pilulæ aloes et kinæ kinæ, and Pilulæ rhej.

PILL, DINNER, OF MR. MAYO. This is composed of *P. Rhej*, gr. iv; *Sodæ Carb.* gr. j.

PILL, EVERLAST'ING. A pill once in vogue, and said to be composed of metallic antimony. It was believed to have the property of purging as often as it was swallowed. A lady having swallowed one of these pills, became seriously alarmed at its not passing. "Madam," said her physician, "fear not; it has already passed through a hundred patients without any difficulty."— Paris.

PILL, FEMALE, Pilulæ de aloe et fœtidis — p. Ferruginous, of Vallet, see Ferri protocarbonas —p. Fothergill's, see Pilulæ aloes et colocynthidis —p. Frank's, see Pilulæ aloes et kinæ kinæ—p. PILL, LARTIGUE'S, *Pil'ulæ Col'chici* et *Digita'lis*, (F.) *Pilules de Lartigue.* (*Ext. Coloc. c.* ℥ss; *Ext. Sem. Colchic. alcoholic., Extract. Digital. alcoholic.* ℞ gr. iss; f. massa in pilul. x dividend.) Dose, two, three, or more, in the 24 hours, in gout, until purging is induced.

This is a form that has been employed as a substitute for the *Pilules de Lartigue*, the composition of which is not known. M. Bouchardat recommends for the same purpose a combination of *Extractum colocynthidis compositum*, *Extractum colchici* and *Extractum opii*, which is almost identical with pills prescribed by Sir Henry Holford for the gout; the only difference being, that the latter substitutes *Dover's powder* for the *Extractum opii.*

PILL, OPIATE, OF LEAD, Pilulæ plumbi opiatæ.

PILL, LEE'S NEW LONDON, is composed of *scammony, gamboge, calomel, jalap, aloes, soap* and *syrup of buckthorn.*

PILL, LEE'S WINDHAM, consists of *gamboge, aloes, soap* and *nitrate of potassa.*

PILLAR, *Pil'la, Colum'na, Columel'la,* (F.) *Pilier.* A name given to several parts; as the *pillars of the velum palati, diaphragm,* &c.

PILLULA, Pilula.

PILNA, MINERAL WATERS OF, see Pülna.

PILON, Pilum.

PILOSELLA, Hieracium pilosella—v. Alpina, Hieracium pilosella.

PILOSUS, Pileous.

PILOUS, Pileous.

PIL'ULA, *Pill'ula,* plural *Pil'ulæ.* Diminutive of *pila,* 'a ball.' *Sphærid'ion, Catapo'tion, Catop'otum, Catapo'tia, Sphæ'rion, Gongyl'ion, Gon'gylis, Gongylid'ium, Sphæ'rula Gale'ni.* A pill. (F.) *Pilule.* A simple or compound medicine, weighing from one to five grains, of a firm consistence and spherical form; intended to be swallowed at once, without chewing. The *Pill* differs from the *Bolus,* the latter being softer and larger.

Medicines are often given in the form of pill, on account of their disagreeable taste and odour. *Pilula,* also, means a *Pilular mass.*

PILULÆ EX ALOE, P. aloes compositæ—p. de Aloe et cambogiâ, P. aloes et cambogiæ.

PILULÆ ALOËS, *P. Aloët'icæ* seu *ex Aloë et Sapo'nē, Aloet'ic Pill,* (F.) *Pilules d'aloes ou aloétiques.* (*Aloes in pulv.; saponis.* sing. ℥j; *syr.* q. s. to form 240 pills.—Ph. U. S.) Dose, gr. x. to xx, in habitual costiveness.

PILULÆ ALOES ET ASSAFŒ'TIDÆ, *Aloetic and Assafœtida Pills.* (*Aloes, assafœtidæ, saponis,* sing. ʒss; *aquæ,* q. s. to form 180 pills.—Ph. U. S.) Purgative and stomacic. Dose, gr. x.

PILULÆ ALOES ET CAMBO'GIÆ, *P. de Aloë et Cambo'giâ* seu *Hydrago'gæ Bon'tii, Pill of Aloes and Camboge.* (*Aloes, cambog., gum. ammoniac.,* āā p. æ. Make into a powder. Dissolve in vinegar; pass through a cloth; express the residuum strongly; and afterwards evaporate, in a water-bath, to a pilular consistence.—Ph. P.) Purgative; used in dropsy. Dose, gr. xij to xxx.

Peter's Pills,—a nostrum—are formed of *aloes, jalap, scammony,* and *camboge,* of each equal parts.

The basis of *Morrison's Pills,* often called *Hygiène Pills,* of *Brandreth's Pills,* and *Moffat's Pills,* is said to be aloes, with camboge, scammony, &c.

Rush's Pills were formed of *calomel, aloes,* and *camboge,* with *oil of mint.*

PILULÆ ALOES ET COLOCYN'THIDIS, *P. ex Colocynth'idē cum aloē* seu *Aloes cum Colocynthidē* seu *coc'einæ* seu *coc'chii* seu *colocyn'thidis compos'itæ* seu *coc'einæ mino'res, Pill of Aloes and Colocynth.,* (F.) *Pilules panchymagogues* ou *universelles, Pilules cochées.* (*Pulp. coloc.* ʒss; *aloes hepat., scammon.* āā ʒj; *sapon.* ʒij; *ol. caryoph.* ℥j; *syrup.* q. s.—Ph. D.) Cathartic. Dose, gr. v to x or more.

Foth'ergill's Pills consist of *aloes, scammony, colocynth,* and *oxide of antimony;* and *Harvey's Antibilious Pills,* and *Rudius's Pills* do not differ much from them.

PILULÆ ALOES COMPOS'ITÆ, *P. ex Aloë, Compound Aloetic Pills.* (*Aloes spic. extract.* cont. ℥j; *ext. gentianæ,* ʒss; *olei carui,* gtt. xl; *syr.* q. s.—Ph. L.) These are sometimes, also, called *Family pills, Antibilious pills,* &c.

PILULÆ ALOES ET FERRI, *Pills of aloes and Iron.* (*Ferri sulphat.* p. iij; *Aloës Barbad.* p. ℥j; *Pulv. arom.* p. vj; *Conserv. Rosæ,* p. viij.—Ph. Ed.) An atonic constipation. Dose, one to three pills.

PILULÆ DE ALOË ET FŒ'TIDIS, *P. Benedic'tæ Fulleri* seu *Ephrac'ticæ* seu *Aloës martia'les, Pills of aloes and fetid gums, Female pills,* (F.) *Pilules bénites de Fuller.* (*Aloes socotr., sennæ, assafœtidæ, galbani,* āā ℥ij; *myrrh.* ʒiv; *croci, macis,* āā ℥j; *ferri sulphat.* ʒiss. Reduce to powder separately, and add *ol. succin.* gtt. viij; *syr. artemisiæ,* q. s.—Ph. P.) Purgative, and given in hysteria. Dose, gr. xv to xx.

Whytt's Pills, given in similar cases, consisted of *chloride of iron, aloes, extract of horehound,* and *assafœtida.*

Stahl's Pills, much used as a tonic aperient in Germany, are made as follows:—*Ferri pulv.,* ℈ss; *Aloes pulv.,* ℈ij; *Ext. colcynth.,* ℈j; *mucilag. acaciæ* q. s. ut fiant pil xl.

PILULÆ ALOES ET JALAP'Æ, commonly called *Anderson's pills, Anderson's Scots' pills, Scotch pills.* (*Aloes Barbad.* ℔ij; *rad. helleb. nigr., rad. jalapæ, potassæ subcarb.* āā ℥j; *ol. anisi,* ℥iv; *syrup. simpl.* q. s.—Gray.) Dose, gr. x to xxx.

A committee of the Philadelphia College of Pharmacy recommend the following: *Aloes Barbadens.* ʒxxiv; *saponis.* ℥iv; *colocynthid.* ℥j; *cambogiæ,* ℥j; *ol. anis.* f ℥ss.

PILULÆ ALOES ET KINÆ KINÆ, *P. stomach'icæ* seu *ante cibum, Pill of aloes and cinchona,* (F.) *Pilules gourmandes.* (*Aloes socotr.* ʒvj; *ext. cinchon.* ℥iij; *cinnam.* ℥j; *syrup. absinth.* q. s.—Ph. P.) Stomachic and laxative. Dose, gr. x. to xx.

Lady Crespigny's pills, Lady Webster's pills, Lady Hesketh's pills; the *Pilules de Duchesne,* (*Quercetanus*), the *Grains de Vie* ou *Pilules de Clérambourg;* the *Pilules Indiennes stomachiques de De la Croix,* the *Pilules de Barbier,* and the *Pilulæ stomach'icæ Mesuës* (Ph. L. 1635), resemble these.

Frank's pills, much employed, also, as '*dinner pills,*' or,—to use the language of the eccentric Kitchener—as '*peptic persuaders,*' are said to be much used, under the name *Graines de santé,* in various parts of Europe. They consist of *aloes, jalap,* and *rhubarb,* with *syrup of wormwood* as an excipient.

PILULÆ ALOES MARTIALES, P. de aloe et fœtidis.

PILULÆ ALOES ET MYRRHÆ, *P. aloes cum myrrhâ* seu *de aloë et myrrhâ, P. Rufi* seu *Ruffi* seu *commu'nes, Rufus's* or *Ruffus's pills, Common pills, Pills of Aloes and myrrh.* (*Aloes,* ℥ij; *croci,* in pulv. ʒss; *myrrh.* ℥j; *syr.* q. s. to form 480 pills.—Ph. U. S.) Cathartic and emmenagogue. Dose, gr. x to xx.

Hooper's pills—possessed of similar properties—according to one of Gray's formulæ are made as follows: *Ferri sulph., aquæ,* āā ʒviij. Dissolve. Add *aloes Barbad.* ℔ij and ʒviij; *canellæ albæ,* ℥vj; *gum. myrrh.* ℥ij; *opopanacis,* ℥iv. The committee of the Philadelphia College of Pharmacy recommend the following form: *Aloes Barbadensis,* ʒviij; *ferri sulphatis exsiccat.* ℥ij, and ʒiss, vel *ferri sulph. crystall.* ℥iv; *ext. helleb. nigr.* ℥ij; *myrrh,* ℥ij; *saponis,* ℥ij; *canellæ,* in pulv. tritæ, ℥j: *zingib.* in pulv. trit. ℥j.

Speediman's pills consist of *aloes, myrrh, rhubarb, extract of chamomile,* and *essential oil of chamomile;* and the *Pills of Barthez,* of *aloes, myrrh, musk, camphor,* and *balsam of Peru.*

PILULÆ DE ALOE ET SAPONE, P. aloeticæ.

PILULÆ ALOES CUM ZINGIB'ERE, *Pills of aloes and ginger.* (*Aloes hepat.* ℥j; *rad. zingib.* in pulv. ℥j; *sapon. Hispan.* ʒss; *ol. ess. menthæ pip.* ℥ss.—Ph. D.) In habitual costiveness. Dose, gr. x to xx.

PILULÆ AMMONIURE'TI CUPRI, *P. Cupri, Pills of Ammo'niuret of copper,* (F.) *Pilules d'ammoniure de cuivre.* (*Ammoniur. cupri,* in pulv. ten. trit., gr. xvj; *micæ panis,* ℈iv; *aquæ carbonatis*

ammoniæ, q. s. Beat into a mass, and divide into xxxij pills.—Ph. E.) Tonic and antispasmodic, in epilepsy, &c. Dose, one pill twice daily; gradually increasing the dose.

Pilulæ Ante Cibum, P. aloes et kinæ kinæ.

Pilulæ Antibilio'sæ, *Barclay's Antibil'ious pills.* (*Extract of colocynth*, ℥ij; *resin of jalap.* ℥i; *almond soap*, ℥iss; *guaiac*, ℥iij; *emetic tart.* gr. viij; *oils of juniper, carraway, and rosemary*, ää iv drops; *syrup of buckthorn*, q. s. to form 64 pills.) Dose, two or three.

Dixon's Antibilious pills are formed of *aloes, scammony, rhubarb*, and *tartarized antimony.*

Pilulæ Antiherpeticæ, Pilulæ hydrargyri submuriatis comp.—p. Antihystericæ, P. galbani compositæ.

Pilulæ Antiscrophulo'sæ, *P. ex ox'ido stib'ii et hydrar'gyri sulphure'to nigro compos'itæ.* (*P. scammon., hydrarg. sulphur. nigr.* ää ℥ij; *antimonii oxidi albi, milleped., sapon. amygdalin.* ää ℥iij; *extract. glycyrrh.* ℥v. Make into a mass. —Ph. P.) Dose, gr. iv to xx.

Pilulæ Antispasticæ, P. galbani compositæ —p. Assafœtidæ compositæ, P. galbani compositæ.

Pilulæ Asiat'icæ, *Asiat'ic* or *Tanjore pills.* (*Acid. arsenios.* gr. lv; *piper. nigr.* pulv., ℥ix; *acaciæ*, q. s. ut fiant pil. 800. Each pill contains about one-fifteenth of a grain of arsenious acid. These pills are employed in India for the cure of syphilis and elephantiasis.

Pilulæ Assafœ'tidæ, *Assafet'ida pills.* (*Assafœtid.* ℥iss; *saponis*, ℥ss. Beat with *water* so as to form a mass to be divided into 240 pills.—Ph. U. S.)

Pilulæ Balsam'icæ, *P. Docto'ris Morton.* (*Milleped.* pulverisat. ℥xviij; *gum ammon.* ℥x; *acid. benzoic.* ℥vj; *croci, balsami Peruv.* ää ℥j; *balsam. sulph. anisat.* ℥vj. Mix.—Ph. P.) Tonic, expectorant, and balsamic.

Pilulæ Benedictæ Fulleri, P. de aloe et fœtidis.

Pilulæ Calomelanos Compositæ, P. Hydrargyri submuriatis compositæ.

Pilulæ Calomel'anos et Opii, *P. Hydrar'gyri chlor'idi et o'pii, Pills of Calomel and Opium.* (*Hydrarg. chlorid. mit.* p. iij; *Opii* p. j; *Confect. Ros.* q. s. To be divided into pills each containing two grains of calomel.—Ph. Ed.)

Pilulæ Cambo'giæ Compos'itæ, *P. de guttâ. gamandrâ* seu *hydrago'gæ* seu *gummi guttæ aloet'icæ, Gamboge pills, Compound camboge pills*, (F.) *Pilules de gomme gutte composées.* (*Cambogiæ contritæ, aloes spicat. extract. contriti., pulv. cinnam. comp.* sing. ℥j; *saponis*, ℥ij.—Ph. L.) Cathartic. Dose, gr. x to xx.

Morrison's Pills are said by Dr. Paris to be nothing more than the above, with the addition of a small portion of *cream of tartar.*

Pil'ulæ Cathar'ticæ Compos'itæ, *Compound cathartic pills.* (*Ext. colocynth. comp.* in pulv. ℥ss; *ext. jalapæ* in pulv., *hydrarg. chlorid. mit.* ää ℥iij; *gambog.* in pulv. ℈ij. M. Form into a mass with *water*, and make into 180 pills.—Ph. U. S.) Three for a dose.

Pilulæ Coccii, P. aloes et colocynthidis—p. Coccinæ minores, P. aloes et colocynthidis—p. Coccinæ, P. aloes et colocynthidis—p. Colchici et digitalis, P. Lartigue's—p. Colocynthidis compositæ, P. aloes et colocynthidis—p. ex Colocynthide cum aloe, P. aloes et colocynthidis.

Pilulæ Colocynth'idis et Hyoscy'ami, *Pills of Colocynth and Henbane.* (*Pil. Colocynth. comp.* p. ij; *Ext. Hyoscyam.* p. i.—Ph. E.) Dose, gr. v to gr. xx.

Pilulæ Communes, P. aloes et myrrhæ.

Pilulæ Conii Compos'itæ, *Compound Pill of Hemlock.* (*Ext. Conii* ℥v; *Ipecac.* pulv. ℥j; *Theriac.* q. s.—Ph. L.) Dose, gr. v three times a day.

Pilulæ Cupri, P. ammoniureti cupri.

Pilulæ Copa'ibæ, *Pills of Copaiba.* (*Copaibæ* ℥ij; *magnesiæ*, recenté præpar. ℥j. Mix, and set aside till it concretes into a pilular mass, to be divided into 200 pills.—Ph. U. S.) Each pill contains nearly five grains of copaiba. Two to six for a dose.

Pilulæ Cupri Ammonia'ti, *Pills of ammo'niated Copper.* (*Cupri ammon.* in pulv. p. j; *micæ panis*, p. vj; *Liq. ammon. carbonat.* q. s.—Ph. E.) Dose, one to six pills.

Pilulæ de Cynoglos'so, *P. de extrac'to o'pii.* (*Pulv. rad. cynoglossi., semin. hyoscyam. alb., extract. opii vinos.* ää ℥iv; *pulv. myrrh.* ℥vj; *oliban.* ℥v; *croci, castor.*, ää ℥iss; *syrup opii*, q. s.—Ph. P.) Anodyne. In cough, &c. Dose, gr. iv to gr. viij.

Pilulæ Depurantes, P. hydrargyri submuriatis compos.

Pilulæ Digita'lis et Scillæ, *Pills of Digitalis and Squill.* (*Digital., Scillæ*, ää p. j; *Elect. aromat.* p. ij.—Ph. E.) One or two pills for a dose.

Pilulæ Ecphracticæ, P. de aloe et fœtidis.

Pilulæ Ferri Carbona'tis, *Pills of carbonate of iron, Vallet's pills, Vallet's ferru'ginous pills.* (*Ferri sulph.* ℥viij; *sodæ carbonat.* ℥x; *Mel. despumat.* ℥ij; *sacchar.* ℥ij; *aquæ bullientis*, Oij; *syrup.* q. s. Dissolve the sulphate of iron and carbonate of soda, each in a pint of the water, and to each solution add a fluidounce of syrup; then mix the two solutions in a bottle just large enough to contain them; close it accurately with a stopper, and set it by, that the carbonate of iron may subside. Pour off the liquid, and having washed the precipitate with warm water, sweetened with syrup in the proportion of f℥j of the latter to Oj of the former, until the washings no longer have a saline taste, place it upon a flannel cloth, and express as much water as possible; then mix it with the honey and sugar. Lastly, heat the mixture in a water-bath, until it attains a pilular consistence.—Ph. U. S.)

Pilulæ Ferri Compos'itæ. *P. ferri cum myrrhâ, Compound pills of iron, Griffith's Pills*, (F.) *Pilules de fer composées.* (*Myrrh.* in pulv. ℥ij; *sodæ subcarb., ferri sulph.* ää ℥j; *syrup*, q. s. Mix, to form 80 pills.—Ph. U. S.) Tonic. Dose, gr. x to xx.

Pilulæ Ferri Iod'idi, *Pills of Iodide of iron.* (*Ferri sulphat.* ℥j; *Potass. iodid.* ℈iv; *tragacanth.* pulv. gr. x; *sacchar.* pulv. ℥ss. Beat with syrup into a mass, to form 40 pills.—Ph. U. S.) Dose, one to three where a tonic and eutrophic is indicated.

Pilulæ Ferri cum Myrrhâ, P. Ferri compositæ.

Pilulæ Ferri Sulpha'tis, *Pills of Sulphate of Iron.* (*Ferri sulph. exsicc.* p. ij; *Ext. Taraxac.* p. v; *Conserv. Rosæ* p. ij; *Glycyrrhizæ.* pulv. p. iij.—Ph. E.) Dose, gr. v to gr. xx.

Pilulæ Fœtidæ, P. galbani compositæ.

Pilulæ Gal'bani Compos'itæ, *P. assafœtidæ compos'itæ* seu *fœ'tidæ* seu *gummo'sæ* seu *e gummi* seu *antispas'ticæ* seu *antihyster'icæ* seu *myrrhæ compos'itæ, Compound gal'banum pill, Gum pill.* (*Galban., myrrhæ*, ää ℥vj; *assafœtidæ*, ℥ij; *syrup.* q. s. to form 240 pills.—Ph. U. S.) Antispasmodic and emmenagogue. Dose, gr. x to xx.

Pilulæ Gummi, P. galbani compositæ—p. Gummi guttæ aloeticæ, P. cambogiæ compositæ—p. Gummosæ, P. galbani compositæ—p. de Guttâ gamandrâ, P. cambogiæ compositæ.

Pilulæ ex Helleb'oro et Myrrhâ, *P. ton'icæ, Bacher's pills, Tonic pills of Bacher, Pills of hellebore and myrrh.* (*Ext. helleb. nig., myrrh.* ää ℥j; *fol. cardui benedict.* in pulv. ℥iij. M.—Ph. P.) Tonic and emmenagogue.

In dropsical, cutaneous, and verminous affections. Dose, gr. iv to gr. viij.

Matthews's pills, — Starkey's pills, are formed of *rad. helleb. nigr., rad. glycyrrh., sapon. Castill., rad. curcumæ, opii purif., syrup. croci,* āā ʒiv; *ol. tereb.* q. s. ut fiat massa. — Gray.

Pilulæ Hydragogæ, P. cambogiæ compositæ —p. Hydragogæ Bontii, Pilulæ aloes et cambogiæ.

Pilulæ Hydrar'gyri, *P. mercuria'les, Mercurial* or *Blue pill,* (F.) *Pilules de Mercure.* (*Hydrarg. purif.* ʒj; *conf. rosæ,* ʒiss; *glycyrrh.* pulv. ʒss. Rub the quicksilver with the confection, until the globules disappear; then add the liquorice powder, and beat the whole into a uniform mass, to be divided into 480 pills.—Ph. U. S.) Antisyphilitic; mercurial;—in large doses, purgative.

A purgative pill, much prescribed by Mr. Abernethy, and called *Abernethy's pill,* consisted of *pil. hydrarg.* gr. x; *jalap.* pulv. gr. xx; *syrup. rhamni,* q. s. ut fiant pil. vj. Two were given at night, and the next morning a wineglassful of *infusum sennæ.*

Pilulæ Hydrargyri Chloridi et Opii, P. Calomelanos et Opii.

Pilulæ Hydrar'gyri Chlo'ridi Mitis, *Pills of mild chloride of mercury, Calomel pills.* (*Hydrarg. chlorid. mit.* ʒss; *acaciæ,* in pulv. ʒj; *syrup.* q. s. ut fiant pil. 240. — Ph. U. S.) Each pill contains one grain.

Pilulæ de Hydrargyro, Scammo'nio et Aloe, vulgo Mercuria'les, (F.) *Pilules Mercurielles* ou *de Mercure, Scammonée et Aloes.* (*Hydrarg, purif.* ʒj; *mellis,* ʒxj. Rub until the globules disappear; then add *aloes Socot., scammon.* āā ʒij; *macis, cinnam.* āā ʒij. Make into a mass. — Ph. P.) *Usee,* same as the last, but they are more purgative. Dose, gr. viij to xxx. These pills are nearly the same as the *Pastilles de Renaudot.*

Pilulæ ex Hydrargyro Muriatico miti cum Sulphure Stibiato Aurantiaco, Pilulæ hydrargyri submuriatis compositæ.

Pilulæ Hydrargyri Submuriatis Compositæ, *P. ex stib'io et hydrar'gyro* seu *antiherpet'icæ* seu *ex hydrargyro muriat'ico miti cum sulphure stibia'to aurianticco* seu *resolven'tes cum mercurio* seu *depurantes* seu *hydrargyri submuriatis, Pilulæ Hydrar'gyri chlor'idi compo'sitæ, Pilulæ calomel'anos compos'itæ, Compound Calomel pill, Compound pills of submuriate of mercury, Calomel pills, Plummer's pills, Red pill.* (*Hydrarg. submur., antimon. sulphur. precipitat.* sing. ʒij; *guaiac. gum resin. contrit.* ʒiv; *spirit rect.* ʒss. Beat together. — Ph. L.) Mercurial, and reputed to be diaphoretic and alterative. Dose, gr. v to x.

Leake's pilula saluta'ria resembles these. It is used in syphilis.

Pilulæ Hydrargyri Submuriatis et Opii, P. Calomelanos et Opii.

Pilulæ Ipecacuan'hæ et Opii, *Pills of Ipecacuanha and Opium.* (*Pulv. Ipecac. et Opii,* p. iij; *Conserv. Rosæ,* p. j.—Ph. E.) One grain of opium in about thirteen grains.

Pilulæ Ipecacuan'hæ cum Scillâ, *Pills of Ipecacuanha with Squill.* (*Pulv. Ipecac. comp.* ʒiij; *Scillæ* pulv., *Ammoniac.* in pulv. āā ʒj; *Theriac.* q. s.—Ph. L.) Dose, gr. v to x.

Pilulæ Mercuriales, P. hydrargyri, P. de hydrargyro, scammonio et aloe—p. Doctoris Morton, P. balsamicæ—p. Myrrhæ compositæ, P. Galbani compositæ.

Pilulæ Opia'tæ, *Pilulæ Opii* (Ph. U. S.), *P. Theba'icæ, Opiate pills, Common night pills, Anodyne pills,* (Prov.) *Squatting pills, Nepen'thes opia'tum,* (F.) *Pilules opiacées.* (*Opii* pulv. ʒi; *sapon.* gr. xij; to be made into 60 pills.—Ph. U. S.) Each pill contains a grain of opium.

Pilulæ de Extracto Opii, P. de cynoglosso —p. ex Oxido stibii et hydrargyri sulphureto nigro compositæ, Pilulæ antiscrophulosæ.

Pilulæ Plumbi Opia'tæ, *O'piate Pills of Lead.* (*Plumb. acetat.,* p. vj; *Opii,* p. j; *Conserv. Rosæ,* p. j. To be made into four grain pills.—Ph. E.) Each pill contains three grains of acetate of lead.

Pilulæ Resolventes cum Mercurio, P. hydrargyri submuriatis compos.—p. de Rhabarbaro, Pilulæ rhei compositæ.

The stomachic nostrum, sold under the name of *Moseley's pills,* consists merely of *rhubarb* and *ginger.*

Pilulæ Qui'niæ Sulpha'tis, *Pills of sulphate of quinia.* (*Quin. sulph.* ʒj; *acaciæ,* in pulv. ʒij; *mel.* q. s. ut fiant pilulæ 480. — Ph. U. S.) Each pill contains a grain of the sulphate of quinia.

Pilulæ Rhej, *Pills of Rhubarb.* (*Rhej* pulv. ʒvj; *saponis,* ʒij. M. et fiant pil. 120.—Ph. U. S.) Each pill contains three grains of rhubarb. A good *dinner* or *stomachic pill* is made of *Rhej* pulv. ʒij; *Capsic.* pulv. ʒj; make into a mass with molasses, and divide into 60 pills. Dose, two or three before dinner.

Pilulæ Rhei Compos'itæ, *P. de Rhabar'baro, Compound rhubarb pills.* (*Rhei,* pulv. ʒj; *aloes,* pulv. ʒvj; *myrrh.* pulv. ʒiv; *ol. menthæ pip.* fʒss. Beat into a mass, with *syrup of orange-peel,* to form 240 pills.—Ph. U. S.) Laxative and stomachic. Dose, gr. x to xx.

Pilulæ Rhej et Ferri, *Pills of Rhubarb and Iron.* (*Ferri sulph.* exsiccat. p. iv; *Ext. Rhej,* p. x; *Conserv. Rosæ,* p. v. Make into five grain pills.) Dose, as a tonic and laxative, two or three pills.

Griffitt's pills, so called after Dr. S. P. Griffitts, of Philadelphia, who prescribed them as a tonic aperient, were formed as follows: — *Rhej,* pulv. ʒiss; *ferri sulph.* ʒss; *saponis,* ϑij; *aquæ,* q. s. ut fiat massa in pil. xl dividenda. Dose, three or four at bedtime.

Pilulæ Rufi, P. aloes et myrrhæ — p. Salutariæ, Leake's, see Pilulæ hydrargyri submuriatis compositæ — p. Saponaceæ, P. saponis cum opio — p. Saponis compositæ, P. saponis cum opio.

Pilulæ Sapo'nis Compos'itæ, *P. Sapona'ceæ* seu *sapo'nis compos'itæ, Pills of soap and opium,* (F.) *Pilules de savon et d'opium.* (*Opii,* ʒss; *sapon.* ʒij. M.—Ph. U. S.) Five grains contain one of opium.

The Pharmacopœia of the United States has a form for the *Pilulæ opii, Opium pills,* as well as for the *Pilulæ saponis compositæ;* the only difference between them being in the proportion of the ingredients. See Pilulæ opiatæ.

Pilulæ e Scillâ, P. scillæ compositæ.

Pilulæ Scillæ Compos'itæ, *P. scillit'icæ* seu *scillæ cum zingib'ere* seu *e scillâ, Compound squill pill.* (*Scillæ,* pulv. ʒj; *zingib.* pulv., *ammoniac.* pulv. āā ʒij; *saponis,* ʒiij; *syrup.* q. s. ut fiant pil. 120.— Ph. U. S.) Dose, two pills. Expectorant and diuretic. Dose, gr. x to xx.

Pilulæ Scillæ cum Zingibere, P. scillæ compositæ—p. Scillitieæ, P. scillæ compositæ—p. ex Stibio et hydrargyro, P. hydrargyri submur. compos.—p. Stomachicæ, P. aloes et kinæ kinæ.

Pilulæ Strych'niæ, *Pills of Strychnia.* (Very pure *strychnine,* 2 gr.; *conserve of roses,* ʒss. Make into 24 pills.) One or two for a dose.

Pilulæ Sty'racis, *P. S. Compos'itæ, Storax Pills.* (*Styracis pur.* ʒvi; *opii, croci,* sing. ʒij. — Ph. E.) Five grains contain one of opium.

Pilulæ Sublinguales, Hypoglottides.

Pilulæ de Terebin'thinâ, *Turpentine Pills.* Made of turpentine boiled in 3 times its weight of water, until, when thrown into cold water, it forms a soft paste, which has the properties of turpentine, and has been administered in gleet, &c.

PILULÆ THEBAICÆ, P. opiatæ—p. Tonicæ, P. ex Helleboro et myrrhâ.

PIL'ULAR, *Pilula'ris*, (F.) *Pilulaire*, from *pilula*, 'a pill.' Relating to pills,—as '*a pilular* mass,' '*pilular* form,' &c.

PILULES, Pilulæ—*p. Agrégatives*, see Aggregate—*p. d'Aloes* ou *aloëtiques*, Pilulæ aloeticæ—*p. d'Ammoniure de cuivre*, Pilulæ ammoniureti cupri—*p. de Barbier*, see Pilulæ Aloes et kinæ kinæ—*p. Bénites de Fuller*, Pilulæ de aloe et fœtidis—*p. Cochées*, Pilulæ aloes et colocynthidis—*p. de Duchesne*, see Pilulæ Aloes et kinæ kinæ—*p. de Fer composées*, Pilulæ ferri compositæ—*p. Ferrugineuses de Vallet*, see Ferri protocarbonas—*p. Gourmandes*, Pilulæ aloes et kinæ kinæ—*p. Indiennes stomachiques de Delacroix*, see Pilulæ aloes et kinæ kinæ—*p. de Lartigue*, Pill, Lartigue's—*p. de Mercure*, Pilulæ hydrargyri—*p. de Mercure*, &c., Pilulæ de hydrargyro, et scammonio et aloe—*p. Mercurielles*, Pilulæ de hydrargyro, scammonio et aloe—*p. Opiacées*, Pilulæ oplatæ—*p. Panchymagogues*, Pilulæ aloes et colocynthidis—*p. de Savon et d'Opium*, Pilulæ saponis cum opio—*p. Universelles*, Pilulæ aloes et colocynthidis.

PILULIER (F.), *Pill Machine.* An instrument for rolling and dividing pills. Also the earthen pot in which pills are preserved.

PILUM, *Pistil'lus*, *Pistillum*, *Hyp'eros*, *Cer'cis*, (F.) *Pilon.* A pestle. A wooden, iron, bell-metal, marble, agate, porcelain, or glass instrument for beating or dividing substances in a mortar.

A *spring pestle* is one attached above to a spring, so as to take off the weight, and thus lessen the labour of pounding.

PILUS, Capillus, Caul, Hair.

PIMELE, Fat.

PIMELECCHYSIS, Pimelorrhœa.

PIMELICUS, Fatty.

PIMELI'TIS, from πιμελη, 'fat,' and *itis*, denoting inflammation. Inflammation of the adipous tissue.

PIMELODES, Fatty.

PIMELO'MA, from πιμελη, 'fat.' A fatty swelling.

PIMELORRHŒ'A, *Pimelec'chysis*, from πιμελη, 'fat,' and ρεω, 'I flow.' A morbid discharge or disappearance of fat.

PIMELORTHOPNŒ'A, *Piorthopnœ'a*; from πιμελη, 'fat,' ορθος, 'upright,' and πνεειν, 'to breathe.' Dyspnœa, practicable only in the erect attitude, owing to fat.

PIMELO'SIS, *Obes'itas nim'ia*, from πιμελη, 'fat.' Conversion into, or formation of, fat,—as *Pimelo'sis hepat'ica*, 'fatty degeneration of the liver.'

PIMELOSIS HEPATICA, Adiposis hepatica—p. Nimia, see Polysarcia.

PIMENT, Capsicum annuum—*p. d'Eau*, Polygonum hydropiper—*p. Royal*, Myrica gale.

PIMENTA, see Myrtus pimenta.

PIMENTÆ BACCÆ, see Myrtus pimenta.

PIMENTO, see Myrtus pimenta.

PIMPERNEL, BLUE, Scutellaria lateriflora—p. Red, Anagallis—p. Scarlet, Anagallis arvensis—p. Water, Verouica beccabunga.

PIMPILIM, Piper longum.

PIMPINEL, (*bipinella* or *bipennula*, from the double pennate order of its leaves,) see Pimpinella.

PIMPINEL ITALIAN, Sanguisorba officinalis.

PIMPINELLA ALBA, P. saxifraga—p. Angelicæfolia, Ligusticum podagraria.

PIMPINEL'LA ANI'SUM, *Anise plant*, *Anisum* (Ph. U. S.), *A. officina'lē* seu *vulga'rē Sison ani'sum*, *A'pium ani'sum*, *Solo'men intestino'rum*, *Ane'sum*, (F.) *Anis*, *Boucage anis. Ord.* Umbelliferæ. *Sex. Syst.* Pentandria Digynia. A native of Egypt. The seeds, *Ani'seum*, (Ph. U. S.) *Semi'na Ani'si*, *An'iseed*, (Old Eng.) *Aneye*, have an aromatic odour; and a sweetish, warm, grateful taste. They are carminative, and used in dyspepsia and in tormina of infants. Dose, gr. xv to ʒj, bruised. The oil,—OLEUM ANI'SI, (F.) *Huile d'anis*—is officinal. Dose, gtt. v to xv. Most of the oil used in this country under the name of *Oil of Anise* is said to be obtained from *Illicium Anisatum.*

Aqua ani'si, *Anise water*, (Ph. D.) is made by mixing a fluidounce of *essence of anise*, with half a gallon (Imp. meas.) of *distilled water*, and filtering through paper.

PIMPINELLA, GREATER, P. magna—p. Hircina, P. Saxifraga—p. Laterifolia, Sion ammi.

PIMPINEL'LA MAGNA seu *nigra* seu *major* seu *rubra*; *Greater Pimpinel'la*; *Tragoseli'num magnum* seu *majus*, *Daucus*, *Cyan'opus*, (F.) *Boucage majeur.* The root has been extolled as diuretic and resolvent, as well as in erysipelatous ulcerations, tinea capitis, rheumatism, &c.

PIMPINELLA MAJOR, P. magna—p. Nigra, P. magna—p. Nostras, P. saxifraga—p. Officinalis, Sanguisorba officinalis—p. Rubra, P. magna.

PIMPINELLA SAXIF'RAGA, *Sax'ifrage*, *Burnet sax'ifrage*, *Pote'rium sanguisor'ba*, *Sorbastrel'la*, *Tragoseli'num*, *T. saxif'raga*, *Pimpinel'la hirci'na* seu *umbellif'era* seu *alba* seu *nostras*, (F.) *Boucage mineur*, *Petit B.*, *Pimprenelle*, *Rompt-pierre.* The root has an unpleasant smell, and hot, pungent, bitterish taste. It has been recommended as a stomachic; and as a stimulating gargle in paralysis of the tongue.

PIMPINELLA UMBELLIFERA, P. saxifraga.

PIMPLE, Papula.

PIMPLED, Papulose.

PIMPRENELLE, Pimpinella saxifraga—*p. Noire*, Sanguisorba officinalis.

PIN. Perhaps from *pennum*, low Latin; or from *spina* [?], *Spina fer'rea*, *Spi'nula*, *Acus capita'ta*, (F.) *Epingle.* An iron or brass instrument, generally of a small size, pointed at one extremity, and having a head at the other. It is used, in Surgery, to fix rollers and dressings; and occasionally in sutures.

PIN AND WEB, Caligo.

PIN À PIGNON, see Pinus picea.

PINASTELLUM, Peucedanum.

PINASTER, Pinus sylvestris.

PINBONE, Ischion.

PINCE, Forceps—*p. à Anneaux*, see Forceps—*p. à Dissection*, see Forceps—*p. à Ligature*, see Forceps—*p. Lithodrassique*, see Lithodrassic—*p. Pansement*, see Forceps.

PINCÉ, Pinched.

PINCÉE, Pugillus.

PINCERS, Forceps.

PINCETTE, Forceps.

PINCHED, *Contrac'tus*, *Retrac'tus*, (F.) *Pincé*, *Grippé.* An epithet applied to the face, when the features are contracted or shrunken; as in violent abdominal affections, or during intense pain.

PINCKNEY'A PUBENS, *P. Pubes'cens*, *Georgia Bark*, *Bitter Bark*, *Florida Bark*, *Fever tree.* This bark has been used in Georgia in the cure of intermittents, and successfully. It is a powerful bitter. Dose of the powder, ʒj.

PINDARS, Arachis Hypogea.

PINE APPLE, Bromelia ananas—p. Aphernousli, Pinus cembra—p. Ground, Lycopodium complanatum—p. Ground, stinking, Camphorosma Monspeliaca—p. Loblolly, Pinus tæda—p. Mountain, see Pinus mughos—p. Mugho, see Pinus mughos—p. Prince's, Pyrola umbellata—p. Sap, American, Hypopitys lanuginosa—p. Stone, Pinus pinea—p. Sugar, see Arrow Root—p. Yellow, Pinus palustris.

PINEA, Pinus pinea.

PINE'AL, *Pinea'lis*, from *pinus*, 'a pine.' That which resembles a pine-apple.

PINEAL GLAND, *Glandula pinea'lis, Cerebral epiph'ysis, Cona'rium, Conoï'des corpus, Corpus turbina'tum, Penis* seu *Virga* seu *Turbo cer'ebri*, is a small body, of a conical shape; pale red or grayish colour; and soft consistence; situate between the fornix and the tubercula quadrigemina. It almost always contains sabulous particles, *Sab'ulum cona'rii, Brain Sand, Pine'al Sand.* When these are grouped together over the base of the gland, they form the *Acer'vulus Cer'ebri* of Sömmering, *Acer'vuli* seu *Lapil'li glan'dulæ pinea'lis.* From its anterior parts arise two medullary striæ, which proceed over the posterior commissure; coast along the optic thalami, and unite at the anterior pillar of the fornix, — the *Habe'næ, Haben'ulæ* or *reins of the pineal gland —Pedunculi cona'rii*, see Peduncles of the Pineal Gland.

The uses of the pineal gland are unknown. Descartes supposed it to be the seat of the soul!

PINEAL SAND, see Pineal gland.

PINEI, see Pinus pinea.

PINEOLI, see Pinus pinea.

PINEUS PURGANS, Jatropha curcas.

PINEWEED, Hypericum sarothra.

PINGUEC'ULA, *Pterygʻium pinguē* seu *lard'aceum*, from *pinguis*, 'fat,' 'fatty.' A small, whitish-yellow tumour in the sclerotic conjunctiva and subjacent areolar tissue, close to the margin of the cornea on its nasal or temporal side; so called from its being supposed, but erroneously, to be of a fatty nature.

PINGUEDO, Fat — p. Renalis, Nephridion.

PINGUIC'ULA VULGA'RIS, (*pinguis*, 'fat,') *P. alpi'na, Sanic'ula monta'na* seu *Eboraceu'sis, Vi'ola palus'tris, Dodecath'eon Plin'ii, Butterwort, Yorkshire San'icle. Ord.* Lentibulaceæ. *Sex. Syst.* Diandria Monogynia. The unctuosity of this plant has caused it be applied to chaps, and as a pomatum to the hair. Decoctions of the leaves, in broths, are used by the common people in Wales as a cathartic.

PINGUID, Fatty.

PINGUIDINOUS, Fatty.

PINGUIN, Bromelia pinguin.

PINGUITUDO, Polysarcia adiposa.

PINHOLE PUPIL, see Pupil, pinhole.

PINHONES INDICI, Jatropha curcas.

PINK, CAROLINA, Spigelia Marilandica.

PINK DYE. *Stripped safflower*, ℥j, *subcarb. of potass.* gr. xviij, *spirit of wine*, ℥vij; digest for two hours; add *distilled water*, ℥ij; digest for two hours more, and add *distilled vinegar* or *lemon juice* q. s., to reduce it to a fine rose-colour. Used as a cosmetic.

PINK, GROUND, Silene Virginica — p. Indian, Spigelia Marilandica — p. Wild, Silene Virginica.

PINKROOT, Spigelia marilandica — p. Demerara, Spigelia anthelmia.

PINNA, Ala, Pavilion of the ear — p. Marina, see Bissus.

PINNACULUM FORNICIS GUTTURALIS, Uvula.

PINNÆ HEPATIS, Lobes of the liver — p. Naris, see Nasus.

PINNULA, *Aileron.*

PINNULÆ HEPATIS, Lobes of the liver.

PINO'LI (S.). A preparation used for subsistence on long journeys in the West. It is parched corn, beaten or ground very fine, and sweetened with sugar, to be used with water, and drunk on the march. It is the *cold flour* of the Indians, and early Western pioneers.

PIÑONCILLO TREE, Castiliognia lobata.

PINSWEAL, Furunculus.

PINT, Octarius.

PINTA, from (S.) *pintar*, 'to paint.' *Blue stain:* a disease, which is said to prevail in Mexico, and to be a variety of Pityriasis versicolor.

PINUS A'BIES. *P. excel'sa* seu *pice'a, A'bies, A. rubra* seu *excelsa* seu *picea, El'atē thelei'a, Pice'a, Norway Spruce Fir, Yew-leaved Fir. Nat. Ord.* Coniferæ. *Sex. Syst.* Monœcia Monadelphia. The tops are used in making *Spruce Beer.*

Essence of Spruce, Essen'tia Abie'tis, is a fluid extract, prepared by decoction from the twigs of this species of fir. From this is made *Spruce Beer.*

This fir affords the Burgundy pitch and common frankincense. 1. *Bur'gundy* or *White pitch, Pix Burgun'dica* seu *alba* seu *ar'ida* seu *abieti'na* seu *abie'tis* (Ph. U. S.), *Resi'na abie'tis hu'mida, R. alba humida, Pini abie'tis resina spontē concre'ta*, (F.) *Poix blanche* ou *grasse* ou *jaune* ou *de Bourgogne.* This prepared concrete juice is of a close consistence, rather soft, of a reddish-brown colour, and not unpleasant smell. It is very adhesive to the skin; and, consequently, forms excellent plasters for remaining upon the part for some time; — as in cases of affections of the chest. 2. *Abie'tis Resi'na* (Ph. L. since 1809), *Common Frankincense, Perrosin, Thus, Th. fœmini'num* seu *vulga're, Olivanum vulgarē* seu *sylves'trē, Resina abietis sicca, Resin of the Spruce Fir.* It is solid, dry, brittle; externally, brownish-yellow; internally, whitish. Used in plasters like the last.

PINUS ABIES, see P. picea — p. Alba, P. picea.

PINUS BALSAME'A, *A'bies balsame'a* seu *balsamif'era, Peu'cea balsame'a, Balsam fir.* The tree which affords the *Canada Balsam, Balsamum Canaden'sē* seu *de Can'ada, Resina strobili'na, Terebinth'ina Canaden'sis* seu *Pini balsame'æ, Canada Turpentine* or *Balsam, Balsam of Fir*, (F.) *Baume de Canada*, is one of the purest turpentines. It has the common properties of those substances.

PINUS CANADEN'SIS, *Abies Canaden'sis, Hemlock, Hemlock Spruce.* A tree, which is abundant in Canada, Nova Scotia, and the more northern parts of New England, and is found in the elevated and mountainous regions of the Middle States. The pitch — *Pix Canadensis, Canada Pitch, Hemlock Pitch* — obtained from it is commonly known under the name *Hemlock Gum.*

PINUS CANDICANS, P. Picea.

PINUS CEMBRA, *P. Monta'na, Aphernous'li Pine.* It yields an agreeably scented turpentine:—the *Carpa'thian Balsam, Bal'samum Carpath'icum* seu *Lib'ani, Carpath'icum, Briançon Tur'pentine.* The nuts, *Cembro nuts, Nu'clei Cembræ*, have an eatable kernel, and yield oil. The shoots yield *Riga Balsam* by distillation.

PINUS DAMAR'RA, *Ag'athis Damarra*, grows in the East India Islands. The juice speedily concretes into a very hard resin,—the *Damarra turpentine.*

PINUS EXCELSA, P. abies—p. Gallica, P. picea.

PINUS LARIX, *A'bies larix, Larix, L. commu'nis* seu *decid'ua* seu *Europæ'a* seu *pyramidu'lis.* The *Larch*, (F.) *Mélèze.* From this tree exudes *Or'emberg gum, Bri'ançon manna, Gummi lar'icis* seu *Oremburgen'sē* seu *Uralen'sē, Manna Brigantī'na* seu *larice'a.* It also yields, by boring, *Common Venice Turpentine, Resina Lar'icis, Terebinthina Ven'eta* seu *larici'na, Pini Lar'icis resi'na liq'uida*, (F.) *Térébenthine de Vénise* ou *de Mélèze.* It is usually thinner than the other sorts of turpentine.

PINUS MUGHOS. The *Mountain* or *Mugho Pine, Pinus Pumil'io.* From the extremities of the branches exudes the *Resi'na Strobili'na*, of the Germans, or *Hungarian Balsam.* It is also obtained, by expression, from the cones. By dis-

tillation, the Hungarian balsam affords the *Krumholz oil, Oleum Templinum.*

PINUS PALUSTRIS, see Pinus sylvestris.

PINUS PICE'A, *P. Abies, A'bies, A. pice'a* seu *pectina'ta* seu *Gal'lica* seu *alba* seu *can'dicans* seu *vulga'ris* seu *taxifo'lia, European Silver Fir Tree, Ev'atē,* (F.) *Sapin commun.* By piercing the tubercles of the bark of this fir, the *Strasburg Turpentine* is obtained: — the *Resi'na Abie'tis* (Ph. L. before 1809), *Oleum Abietis, Terebinth'ina Argentoraten'sis.*

PINUS PINASTER, see P. sylvestris.

PINUS PI'NEA, *Stone Pine, Pinea, Pinus, P. uber'rima* seu *sati'va.* The nuts, *Zirbel nuts, Pine nuts, Nu'clei Pi'neæ, Pinei, Pine'oli,* (F.) *Pin à pignons,* are eaten raw, or preserved like almonds. They are, also, used in emulsions.

PINUS PUMILIO, see Pinus Mughos — p. Sativa, P. pinea.

PINUS SYLVES'TRIS, *Pinas'ter, Peucē, Scotch Fir.* This pine, as well as *P. mari'tima* (*P. Pinaster*), and other species of Pinus, affords common turpentine and its oil, resin, tar, and pitch. 1. *Common Turpentine of Europe, Terebinth'ina, T. vulga'ris* seu *commu'nis, Resina pini, Bijon, Horse Turpentine, Bordeaux Turpentine,* (F.) *Térébinthine de Bordeaux, Térébinthine commune,* is obtained by wounding the tree in hot weather. It is used, chiefly, as a dressing for wounds, &c., in horses, and for the distillation of the oil, (see Oleum Terebinthinæ.) The *white Turpentine,* or *common Turpentine of America* — *Terebinth'ina,* Ph. U. S. — is produced chiefly from *Pinus palustris, Yellow pine,* and *P. tæda, Loblolly pine,* and perhaps from other species inhabiting the Southern States. When the oil is distilled with water, yellow resin, or *Rosin,* (*Resi'na,* Ph. U. S.)—*Resina flava*—is left, which is only used in the formation of ointments and plasters. If without the addition of water, the residuum is *common resin* or *Colophony.* 2. When the cold begins to check the exudation of the common turpentine, part of it concretes in the wounds. This is called, in France, *Gallipot, Barras;* and *White Rosin, Resina alba,* when hardened after long exposure to the air. 3. When the old trees are subjected to distillation, in a coarse manner, Tar is obtained — *Hygropissos, Pissa, Pix ce'dria* seu *liq'uida, Resi'na pini empyreumat'ica liq'uida, Terebinth'ina empyreumat'ica, Alchi'ram, Alchitu'ra, Cedria,* (F.) *Goudron, G. végétale, Poix liquide, Brai liquide. Tar water, Aqua Pice'a* seu *Picis, Infu'sum Picis liq'uidæ* seu *Picis empyreumaticæ liquidæ, Po'tio pice'a,* (F.) *Eau de Goudron,* which is made by mixing two pints of *tar* with a gallon of *water,* stirring with a wooden rod for fifteen minutes, and, when the tar has subsided, straining and keeping in well stopped bottles, was, at one time, a fashionable remedy in numerous complaints, and its use has been revived, since its virtues have been presumed to be owing to creasote. It is employed chiefly in pulmonary affections, and the vapour has been recommended in phthisis and other diseases of the lungs. It is used externally as a detergent. A *wine* or *beer of tar, Tarbeer, Jews'beer,* has been employed in Philadelphia in similar cases. It may be made by adding to *tar* enough *beer* to saturate it, mixing, and allowing them to macerate for three days, with occasional agitation. The dose is a tablespoonful. 4. *Common Pitch, Pix nigra, Black Pitch, Burnea, Burnia, Stone Pitch, Pix sicca, P. atra, P. nava'lis, Zopissa, Palimpis'sa, P. ar'ida* (Ph. L. before 1809), (F.) *Poix navale, P. noire,* is obtained by inspissating tar. It is used only as a resolvent in plasters.

PINUS TÆDA, see P. sylvestris — p. Taxifolia, P. picea — p. Uberrima, Pinus pinea — p. Vulgaris, P. picea.

PIONE, Pæonia.

PIONY, Pæonia.

PIORTHOPNŒA, Pimelorthopnœa.

PIOULQUES (F.). A kind of sucking-pump, invented by Louis, for extracting water that had entered internal cavities, in cases of drowning A useless instrument.

PIP, Syphilis.

PIPE-PLANT, Monotropa uniflora.

PIPER, πεπερι, see Piper nigrum.

PIPER ALBUM, *Leucop'iper, White Pepper,* is black pepper freed from its cuticle.

PIPER ANGUSTIFOLIUM, Matico — p. Aromaticum, P. nigrum—p. Betel, Betel—p. Brazilianum, Capsicum annuum — p. Calecuticum, Capsicum annuum.

PIPER CAPEN'SE, a South African species, has all the properties of the peppers, and, in appearance and taste, greatly resembles cubebs. It possesses, too, similar virtues.

PIPER CARYOPHYLLATUM, see Myrtus pimenta —p. Caudatum, P. cubeba—p. Chiapæ, see Myrtus pimenta.

PIPER CUBEB'A, *Perse'a* seu *Laurus cubeba, Litsæa cubeba* seu *piperi'ta. Ord.* Piperaceæ. A native of Java and Guinea. The odour of these berries — *Cubeba* (Ph. U. S.), *Com'peper, Compeba, Cubal sini, Piper cauda'tum, Baccæ Piperis glabri, Cubeb* or *Tailed Pepper, Cuma'mus,* (F.) *Poivre-à-queue, Quabebe*—is aromatic; taste at first cooling, afterwards pungent. The active principle is an essential oil — *Oleum Cubebæ,* oil of cubebs—which is officinal in the Pharm. U. S. The properties of the cubeb are stimulant and purgative. It is used only in gonorrhœa. Dose, from ℈j to ʒj, in powder, three or four times a day; of the volatile oil, 10 or 12 drops.

'*Turkey yellow berries,*'—the dried fruit of the *Rhamnus Catharticus* — are often substituted for cubebs.

PIPER ELONGATUM, Matico.

PIPER GUINEENSE, Capsicum annuum—p. Hispanicum, Capsicum — p. Indicum, Capsicum annuum — p. Jamaicense, see Myrtus pimenta.

PIPER LONGUM, *Macrop'iper, Acapat'li, Catutrip'uli, Pim'pilim, Chav'ica Roxburghii, Long Pepper,* (F.) *Poivre long.* As we receive the berries, they consist of the unripe fruit dried in the sun; and are small, round grains, disposed spirally on a cylindrical receptacle. They are stimulant, carminative, and tonic, like the other peppers. Dose, gr. v to ʒj.

PIPER LUSITANICUM, Capsicum annuum — p. Murale, Sedum.

PIPER METHISTICUM, see Ava.

PIPER NIGRUM, *Melanop'iper, Molagoco'di, Lada, Piper aromat'icum, Black Pepper,* (F.) *Poivre noir.* Black pepper, *Piper* (Ph. U. S.), is the unripe fruit dried in the sun. *Virtues,* same as those of the other peppers. When freed from its husk by mechanical trituration it constitutes *Fulton's decorticated pepper.*

PIPER ODORATUM JAMAICENSE, see Myrtus pimenta—p. Tabascum, see Myrtus pimenta—p. Turcicum, Capsicum annuum.

PIPERI'NA, *Piperi'num, Pip'erine, Piperin,* from *piper,* 'pepper.' A resinoid substance, obtained from the piper nigrum by M. Œrstädt, in which a part of the virtues of the pepper resides. It has been employed, like the quinia, in intermittents, and successfully.

PIP'EROID, *Piperoi'dum, Zingib'erin,* from *piper,* 'pepper,' and εἶδος, 'resemblance.' A yellow syrupy mass obtained by exhausting ginger root by ether. It is soluble in ether, alcohol, and oils, and may be given in tincture, sugar, lozenge, or syrup, in cases where ginger is indicated.

PIPEROPAS'TUS, from *πιπερι*, 'pepper,' and *πασσειν*, 'to strew.' Strewed with pepper,—socks, for example, where it is desirable to excite the surface of the feet.

PIPETTE. 'A small pipe.' In Pharmacy, a small tube terminating in a perforated point, which is passed into a liquid to be removed — from the surface of a precipitate, for example. The liquid is drawn into the tube by applying the mouth to the free extremity.

PIPIN'NA, *Men'tula parva*. A small penis.

PIPPERIDGE BUSH, see Oxycantha Galeni.

PIPSISSEWA, Pyrola umbellata—p. Spotted, Pyrola maculata — p. White, Pyrola maculata.

PIPTONYCHIA, Onychoptosis.

PIPTOSTEGIA OPERCULATA, see Batata de purga — p. Pisonis, Convolvulus mechoacan.

PIQUETÉ, see *Sablé*.

PIQURE, Puncture, Wound, punctured.

PIRTLING, Slavering.

PIRUS, see Pyrus malus.

PISA, (CLIMATE OF.) Pisa has long been celebrated as one of the most favourable climates in Italy for the consumptive. It is genial, but somewhat oppressive and damp. It is softer than that of Nice, but not so warm; less soft, but less oppressive than that of Rome.

PISCIARELLI, MINERAL WATERS OF. A spring at Monte Secco, in Italy, between Lake Agnano and Solfatara. It is thermal (100° Fahr.), sulphureous, and carbonated; and is chiefly used in old ulcers, leucorrhœa, chronic diarrhœa, and in cutaneous affections.

PISCID'IA ERYTHRI'NA, *Jamaica Dogwood*. *Ord.* Leguminosæ. A small branching tree, common in most of the West India Islands; Diadelphia Decandria of Linnæus. It is used in the West Indies to poison fish. It appears to be an acro-narcotic, and has been used in the form of a tincture of the bark of the root in toothache.

PISCINA, *Baignoire*.

PISCIV'OROUS, *Piscivorus, Ichthyoph'agous, Ichthyoph'agus*, from *piscis*, 'a fish,' and *voro*, 'I eat.' Feeding or subsisting on fish.

PIS'IFORM, *Pisiform'is*, from *pisum*, 'a pea,' and *forma*, 'shape.' Pealike, pea-shaped.

PISIFORM'E, Os, *Os lenticula're* seu *orbicula'rē* seu *extra or'dinem carpi*, (F.) *Os hors du rang*, is the fourth bone of the first row of the carpus. It is round, and gives attachment to the tendon of the cubitalis anterior, and to the anterior transverse ligament of the carpus. It is articulated, behind, with the os cuneiforme.

PISO, Mortar.

PISSA, see Pinus sylvestris.

PISSASPHAL'TUS, *Pissasphal'tum, Mineral Pitch*, from *πισσα*, 'pitch,' and *ασφαλτος*, 'bitumen.' (F.) *Poix minérale*. A thicker kind of *Petroleum* or *Rock oil*; formerly employed as a vulnerary. It is synonymous with *Glu'tinous bitu'men, Malta bitu'men*, and *Mineral tar*.

PISSELÆ'UM, *Oleum Pic''inum*, from *πισσα*, 'pitch,' and *ελαιον*, 'oil.' An oily matter obtained from boiling pitch, and used for the same purposes as tar.

PISSELÆUM INDICUM, Petroleum.

PISSEMENT DE PUS, Pyuria—*p. de Sang*, Hæmaturia.

PISSENLIT, Leontodon taraxacum.

PISSE-SANG, Fumaria.

PISSE'ROS, from *πισσα*, 'pitch.' Ancient name of a cerate, prepared of *olive oil, oil of roses*, and *dried pitch*. It was, also, called *Cera'tum pica'tum*, and *C. tetraphar'macum*. — Hippocrates.

PISSI'TES, *Vinum pica'tum*. Same etymon. A wine prepared from tar and the must of the grape. It was regarded to be stomachic.

PISSOSIS, Malacia.

PISSWEED, Anthemis cotula.

PISTACHIO NUTS, see Arachis hypogea, Pistacia vera.

PISTACIA CHIA, P. lentiscus.

PISTA'CIA LENTIS'CUS, *P. Chia, Terebin'thus lentiscus, Lentiscus vulga'ris*; the *Mastich Tree*. *Ord.* Terebinthaceæ. The wood of this tree abounds with the resinous principles of mastich; and a tincture made from it has been used in the cure of dyspeptic affections, gout, and dysentery. It yields, by incision, the resin *Mastich, Resi'na Lentis'cina, Men'frigē, Mas'tichē, Mastix, Pistaciæ Lentis'ci Resi'na*. This resin has an agreeable smell when heated: is almost insipid; in globular, irregular, yellowish, semi-transparent masses; soluble in ether; partially so in alcohol. It is stimulant, and has been used in old coughs, and gleet, and is chewed to sweeten the breath. It is sometimes, also, employed to stop holes in carious teeth.

Oil of Mastich, Mastichela'on, Oleum Mastich'inum, is mentioned by Dioscorides.

PISTACIA NARBONENSIS, P. lentiscus — p. Reticulata, P. lentiscus.

PISTACIA TEREBIN'THUS, *P. Narbonen'sis* seu *reticula'ta* seu *vera, Turpentine Tree, Hab-el-Kalimbat, Terebinthus vulga'ris, Terminthos*. The tree which affords the *Cyprus Turpentine, Resi'na Terebin'thi, Terebinth'ina vera* seu *Chia* seu *Cyp'ria*, (F.) *Térébinthine de Chio*. This substance is classed amongst the resins. It is procured by wounding the bark of the trunk. The best Chio turpentine is of about the consistence of honey; very tenacious, clear, and almost transparent; of a white colour inclining to yellow, and of a fragrant smell; moderately warm to the taste, but free from acrimony and bitterness. It resembles in virtues the other turpentines.

PISTACIA VERA, *πιστακια*. Name of the tree which affords the *Nux Pistacia*. *Pista'chio nuts* have a sweetish, unctuous taste, resembling that of sweet almonds. Like these, they afford an oil, and may be formed into an emulsion.

PISTILLUM, Pilum.

PISTOLOCHIA, Aristolochia pistolochia.

PISTORIENSIS GLADIUS, *Bistouri*.

PISUM, *πισον*, *P. sati'vum, Pea, Garden pea*, (F.) *Pois, P. cultivé*. The seeds of the pea, *Ord.* Leguminosæ, *Sex. Syst.* Diadelphia Decandria, are much employed as an aliment, both in the fresh and dried state. They are farinaceous, and, when dried, not easy of digestion.

PIT, Pock mark — p. of the Stomach, *Fossette du cœur*.

PITAY'A BARK. This bark of *Cincho'na pitay'a, Ord.* Cinchonaceæ, is preferred in Colombia to any other. It contains a new vegetable alkali, to which the name *Pitayine* has been given.

PITAYINE, see Pitaya bark.

PITCAITHLEY, MINERAL WATERS OF. These saline springs, at Pitcaithley, about four miles from Perth, Scotland, contain chlorides of sodium and calcium.

PITCH, Colophonia — p. Black, see Pinus sylvestris — p. Burgundy, see Pinus abies — p. Canada, see Pinus Canadensis.

PITCH CAP, see Depilatory.

PITCH, COMMON, Pinus sylvestris—p. Hemlock, see Pinus Canadensis—p. Jew's, Asphaltum — p. Mineral, Pissasphaltum.

PITCH PLASTER, see Depilatory, Emplastrum picis.

PITCH, STONE, see Pinus sylvestris — p. White, see Pinus abies.

PITHYRIASIS, Pityriasis.

PITHYRINUS, Acerosus, Furfuraceous.

PITTA'CIUM. A pitch plaster, from πιττα, 'pitch.'

PITTING, Pock mark.

PITTOSIS, Malacia.

PITTO'TA. Medicines in which pitch is the chief ingredient.

PITTSBURG, MINERAL WATERS OF. A chalybeate mineral spring, situate about four miles south-west of Pittsburg, in Pennsylvania. It contains chloride of sodium, chloride of magnesium, oxide of iron, sulphate of lime, and carbonic acid.

PITUITA, Mucus, Phlegm—p. Narium, Nasal mucus.

PITU'ITARY, *Pituita'rius*, (F.) *Pituitaire*, from *pituita*, 'phlegm.' Concerned in the secretion of mucus or phlegm. A name given to several parts.

PITUITARY BODY, P. Gland—p. Fossa, Sella turcica.

PITU'ITARY GLAND, *Glan'dula Pituito'sa* seu *pituita'ria* seu *basila'ris*, *Lacu'na* seu *Appendic'ula cer'ebri*, *Senti'na*, *Hypoph'ysis* seu *Appendix cer'ebri*, *Corpus pituita'rē*, *Pituitary body*; — *Appendice sus-sphénoïdale du cerveau*, (Ch.) A small, round body; the anterior portion of which is of a cineritious yellow hue, and the posterior, which is smaller, is whitish and pulpy. Its functions are unknown.

PITUITARY MEMBRANE, *Schneide'rian Membrane*, *Membra'na pituita'ria* seu *olfacto'ria*. The mucous membrane which lines the nasal fossæ, and extends to the different cavities communicating with the nose. In the nasal fossæ, the membrane appears formed of two layers, intimately united; — the one in contact with the bone is fibrous;—the other is free at one surface. The latter is a mucous membrane, on which papillæ are not easily distinguishable, but which contains them, as well as a number of very small mucous follicles, that open into the cavity of the nares. On penetrating the maxillary, frontal, sphenoidal, and ethmoidal sinuses, the membrane becomes very thin, transparent, less vascular, and seems reduced to its mucous layer. The pituitary membrane receives the impression of odours, by means of the expansion of the olfactory nerves upon it. It is the seat of smell.

PITUITE, Mucus.

PITU'ITOUS, *Pituito'sus*; from *pituita*, 'mucus or phlegm.' Consisting of, or resembling, or full of mucus or phlegm.

PITYRI'ASIS, from πιτυρον, 'bran;' *Lepido'sis Pityriasis*, *Pityris'ma*, *Pithyri'asis*, *Herpes furfura'ceus* seu *farino'sus*, *Porri'go* (of some), *Tin'ea furfura'cea* seu *porrigino'sa*, *Furfura'tio*, *Furfuris'ca*, *Dandriff*, *Dandruff*, (Sc.) *Luss*, (Prov.) *Room*, *Rummet*, (F.) *Teigne*, *Dartre*, *D. furfuracée volante*;—a very superficial affection; characterized by irregular patches of thin scales, which repeatedly exfoliate and recur; but which never form crusts, or are accompanied with excoriations. It is not contagious. It occurs under three or four varieties of form.

PITYRIASIS, Porrigo—p. Nigra, Melasma—p. Versicolor, Chloasma.

PITYRISMA, Pityriasis.

PITYROIDES, Furfuraceus.

PITYRON, Furfur.

PIVOINE, Pæonia.

PIV'OTING. In dentistry, an operation, which consists in fastening in a new crown upon the root of a tooth by means of a piece of gold wire, called 'a *pivot*.'

PIX, Sperm—p. Abietina, see Pinus abies—p. Abietis, see Pinus abies—p. Alba, see Pinus abies—p. Arida, see Pinus abies, and Pinus sylvestris—p. Atra, see Pinus sylvestris—p. Brutia, Brutia—p. Burgundica, see Pinus abies—p. Canadensis, see Pinus Canadensis—p. Cedria, see Pinus sylvestris—p. Græca, Colophonia—p. Liquida, see Pinus sylvestris—p. Navalis, see Pinus sylvestris—p. Nigra, see Pinus sylvestris—p. Sicca, see Pinus sylvestris.

PLACE'BO, 'I will please,' from *placeo*. A medicine, prescribed rather to satisfy the patient than with any expectation of its effecting a cure.

PLACEN'TA, πλακους, πλακουντος. A Latin word, signifying a *Cake*. *P. uteri* seu *uteri'na* seu *uteri car'nea*, *Hepar* seu *Jecur uteri'num*, *Caro* seu *Affu'sio orbicularis*, *Maza*. A soft, spongy, vascular body, adherent to the uterus, and connected with the fœtus by the umbilical cord. It is not in existence during the first period of the embryo state, but its formation commences perhaps with the arrival of the embryo in the uterus. It is generally considered to have two portions, one *fœtal*, and the other *maternal*. The fœtal consists of highly vascular villi and tufts, which contain the inosculating loops of the umbilical arteries and umbilical vein of the fœtus. The maternal portion is considered by Dr. Reid to consist, essentially, of a large sac formed by the inner coat of the vascular system of the mother, into which the maternal blood is poured by the curling arteries of the uterus, and from which it is returned by the utero-placental veins. The tufts and villi of the fœtal placenta are ensheathed by this inner coat of the maternal vascular system; and, according to Prof. Goodsir, two distinct sets of nucleated cells — one maternal and the other fœtal—separate the maternal and fœtal portions where they come in contact, one set of which are probably, he thinks, concerned in the separation of nutritive matter from the maternal blood, and the other destined to convey it into the vessels of the fœtus. The placenta is formed of several *lobes* or *cotyledons*, which can be readily distinguished from each other on the uterine surface; but towards the fœtal surface are confounded into one mass. It is composed of the umbilical vessels, areolar tissue, and whitish, resisting filaments, which are vascular ramifications obliterated. Lymphatic vessels have also been presumed to exist in it; and nerves have been traced, proceeding from the great sympathetic of the fœtus.

The main function of the placenta appears to be like that of the lungs in the adult. It admits of the blood of the fœtus being *shown* to that of the mother, and undergoing requisite changes. It may, also, be an organ for nutritive absorption, as observed above.

Animals, which have no placenta—as the Marsupialia—are called *implacental* and *nonplacental*.

PLACEN'TA CRUORIS, see Blood—p. Febrilis, Ague cake—p. Oblata, P. prævia—p. Obvia, P. prævia.

PLACENTA PRÆ'VIA, (from *præ*, 'before,' and *via*, 'way,') *P. ob'via* seu *obla'ta*. Presentation of the placenta; a condition which gives rise to *unavoidable hemorrhage* from the uterus. The safety of the female depends upon speedy delivery.

PLACENTA SANGUINIS, see Blood—p. Uteri Succenturiata, Decidua.

PLACEN'TAL, *Placenta'lis*, (F.) *Placentaire*. Relating, or appertaining to, the placenta. Possessed of a placenta,—as 'a *placental* mammal.'

PLACENTI'TIS, *Placeunti'tis*, *Placoï'tis*, *Inflamma'tio placen'tæ*. A hybrid word—from *placenta*, and *itis*, a suffix denoting inflammation. Inflammation of the placenta.

PLACEN'TULA, 'a little cake,' diminutive of *placenta*, 'a cake.' A rudimental placenta. The placenta of an abortion.

PLACOITIS, Placentitis.

PLACOUNTITIS, Placentitis.

PLADAROMA, Pladarosis.

PLADARO'SIS, *Pladaro'ma, Pladar'otes,* from πλαδαρος, 'soft.' A soft tumour on the eyelid, unaccompanied with redness or pain. Trachoma.

PLADAROTES, Pladarosis.

PLAFOND DES VENTRICULES DU CERVEAU, Corpus callosum.

PLAGA, Ictus, Wound.

PLAGIOBOL'IA, *Planobol'ia,* from πλαγιος, 'to one side,' and βαλλειν, 'to throw.' Imperfect emission of sperm into the vagina. Emission to one side; sometimes practised to render impregnation less probable.

PLAGUE, from πληγη, *plaga,* 'a stroke.' *Pestis, P. orienta'lis* seu *bubona'ria orientalis* seu *inguina'ria* seu *contagio'sa* seu *acutiss'ima* seu *sept'ica* seu *glandulo'sa* seu *ade'no-septica* seu *inguinaria, Pestil'itas, Ephem'era pestilentia'lis, E. mortif'era, Lues inguina'ria, Clades glandula'ria, Phthora, Pestilen'tia, Lues, Loimos, Febris ade'no-nervo'sa, Lœmos, Lœmē, Lœ'mia, Lœmop'yra, Chaosda, Anthra'cia Pestis, Anthracotyphus, Febris pes'tilens, Syn'ochus pestilentia'lis, Typhus pestis* seu *pestilentia'lis* seu *gravis'simus* seu *anthra'cicus* seu *bubon'icus, Exanthe'ma pestis,* the *Pest, Levant plague, Septic* or *glan'dular pes'tilence, The sickness,* (F.) *Peste, Typhus d'Orient, Fièvre du Lévant, F. adéno-nerveuse.* An eminently malignant disease; endemic in the Levant; frequently epidemic, and destroying at least two-thirds of those it attacks. It is a fever of the most aggravated kind, with affection of the lymphatic glands of the groins or axillæ, and carbuncles. Its miasmata—it has been conceived—adhere to different organic textures, to woollen goods, clothing and furniture; and may thus be transported to a considerable distance; but this is not certain. The mean duration of the disease is six or seven days; some die in twenty-four hours, others not till ten or twelve days. Pathological anatomy has afforded little light with respect to it. Various means have been used for arresting it, but none have seemed to be pre-eminently distinguished. The great point is, to watch the indications as they develop themselves; and to treat the case, in general, like one of typhus gravior. It is universally agreed that the suppuration of the buboes should be aided as far as practicable. For preventing the importation and spread of the plague, the *Quar'antine Laws* have been instituted; and when the disease has actually appeared, a *cordon sanitaire* has been drawn round the infected district, so as to prevent all communication.

PLAGUE OF ANTONI'NUS, *Pestis Antonini'na,* (F.) *Peste Antonine.* A severe febrile disease, which prevailed in the Roman empire, during the reign of Antoninus. It began in Asia, and passed westward. It resembled the Plague of Athens.

PLAGUE OF ATHENS, (F.) *Peste d'Athènes.* A febrile disease, which raged at Athens during the Peloponnesian war, in the 5th century before the Christian era; and a description of which is given in Thucydides. It was characterized by a cutaneous eruption, accompanied by small ulcerations, vomiting, affection of the respiratory organs, and diarrhœa. It began in the far East, and, before reaching Athens, ravaged Egypt, and the greater part of the Persian Empire.

PLAGUE, BLACK, Death, black.

PLAGUE, COLD. A severe form of congestive fever, seen in the Southern States. Bilious pneumonia, in which there is no reaction, has been, also, so called.

PLAGUE MARK, Plague token.

PLAGUE, PALI. A malignant fever, greatly resembling Plague, which prevailed in Rajpootana after July, 1836.

PLAGUE SPOT, Plague token.

PLAGUE TOKEN, *Plague mark, Plague spot.* A mark by which one struck with the plague was known. Perhaps the early stage of carbuncle in unfavourable cases. It is described as a small tubercle — *Bossa* — somewhat resembling a wart, callous and more or less deficient in sensibility, varying in size from that of a millet-seed to that of a bean.

PLAGULA, Compress, Pledget, Splint.

PLAIE, Wound — *p. d'Arme à feu,* Wound, gunshot — *p. d'Arquebusade,* Wound, gunshot — *p. Contuse,* Wound, contused — *p. Envenimée,* Wound, poisoned — *p. par Arrachement,* Wound, lacerated — *p. à Lambeaux,* see Flap.

PLAINTIVE, *Luctuous.*

PLANANTHUS FASTIGATUS, Lycopodium selago — p. Selago, Lycopodium selago.

PLANARIA LATIUSCULA, Distoma hepaticum.

PLANCHER (F.), 'floor.' In anatomy, the inferior wall or boundary of a cavity.

PLANCHER DU CERVEAU, Tentorium.

PLANCUS, Leiopus.

PLANE, Plexus.

PLANE, MESIAL, see Mesial.

PLANET-STRUCK, see Sideratio.

PLANE'TES, *Plane'ticus, Plan'icus, Errabun'dus, Errat'ic,* from πλανη, 'a wandering about.' An epithet given to diseases, whose returns are irregular — especially to intermittent fever; *Planetes Febris, F. Errat'ica, F. Erro'nea, F. Vaga.*

PLANETICA ARTHRITIS, Gout, wandering.

PLANICUS, Planetes.

PLANIPEDES, Steganopodes.

PLANITIES PEDIS, Sole.

PLANOBOLIA, Plagiobolia.

PLANTA NOCTIS, Hydroa, Sudamina — p Pedis, Sole — p. Prima pedis, Tarsus.

PLANTA'GO, *P. Major, Centinervia, Arnoglos'sum, Septinervia, Polyneuron, Heptaplevron, Planta'go latifo'lia* seu *major* seu *vulga'ris, Great plantain, Waybread,* (Sc.) *Wabran leaves,* (F.) *Plantain commun. Ord.* Plantaginaceæ. *Sex. Syst.* Tetrandria Monogynia. The leaves have been said to be refrigerant, attenuant, substyptic, and diuretic.

PLANTAGO AQUATICA, Alisma plantago.

PLANTAGO CORDA'TA, *Heart leaved plantain,* P LANCEOLA'TA, *Ribgrass,* and P. VIRGIN'ICA, *White plantain,* or *Ribwort,* indigenous; have properties like Plantago major.

PLANTAGO CORON'OPUS, *Coronopo'dium, Cornu cervi'num, Stella terræ, Plantago, Buckshorn Plantain.* Properties like the last.

PLANTAGO NITIDA, P. psyllium.

PLANTAGO PSYL'LIUM, *P. nit'ida, Psyl'lium, P. erec'tum, Pulica'ris herba, Crystal'lion, Cynomoi'a, Branching Plantain, Fleawort,* (F.) *Herbe aux puces commune.* The seeds have a nauseous, mucilaginous taste, and no remarkable smell. The decoction of the seeds is recommended in hoarseness and roughness of the fauces.

PLANTAGO VULGARIS, Plantago.

PLANTAIN DES ALPES, Arnica montana — p. Branching, Plantago psyllium — p. Buckshorn, Plantago coronopus — *p. Commun,* Plantago — *p. d'Eau,* Alisma plantago — p. Great, Plantago major — p. Heart leaved, Plantago cordata.

PLANTAIN MEAL, see Musa paradisiaca.

PLANTAIN, RATTLESNAKE, Goodyera pubescens — p. Robin's, Erigeron bellidifolium.

PLANTAIN TREE, Musa paradisiaca.

PLANTAIN, WATER, Alisma plantago, Unisema deltifolia — p. White, Plantago Virginica.

PLANTAIRE, Plantar muscle — *p. Grêle*, Plantar muscle.

PLANTAR, *Planta'ris*, (F.) *Plantaire*, from *planta*, 'the sole of the foot.' That which relates or belongs to the sole of the foot. This name has been given to several parts.

PLANTAR APONEURO'SIS, *P. fas'cia*. A thick, dense, resisting aponeurosis; of a triangular shape, and superficially situate, which occupies the middle and sides of the sole of the foot, and furnishes insertions to several of the muscles of the region, either directly or through the medium of septa, which it sends between them.

PLANTAR ARCH, see Plantar arteries.

PLANTAR ARTERIES. These are two in number, and arise from the extremity of the posterior tibial artery. They are distinguished into:—The *internal plantar artery*, situate above the abductor pollicis pedis. It extends from the termination of the posterior tibial to the trunk of one of the collaterals of that toe.—The *external plantar artery* is larger than the preceding, and ought to be considered as the termination of the posterior tibial. Situate above the flexor communis digitorum pedis, it extends from beneath the calcaneum to the posterior extremity of the last metatarsal space. When it has reached this part, it turns from without inwards; advances towards the posterior extremity of the first metatarsal bone, and anastomoses with the perforating branch of the *dorsalis tarsi*. In the first part of its course, it furnishes calcaneal, articular, muscular, and adipous branches. The second portion of the artery is called the *Plantar Arch* or *Cross*. It gives branches in all directions. The inferior and posterior have received no name. The superior — three in number — are the *posterior perforating arteries*. The anterior branches are larger, and there are commonly four. They furnish the *anterior perforating*, and the *collaterals* of the last four toes.

PLANTAR CROSS, see Plantar arteries—p. Fascia, P. aponeurosis.

PLANTAR LIGAMENTS. A name given to the inferior ligaments, which unite the bones of the tarsus and metatarsus, to distinguish them from the superior, called *dorsal*.

PLANTAR MUSCLE, *Planta'ris*, *P. grac''ilis*, *Tibia'lis grac''ilis*, *Exten'sor tarsi minor*, (F.) *Plantaire*, *P. Grêle*, *Jambier grêle*, *Petit fémoro-calcanien*, (Ch.) A muscle, situate at the posterior part of the leg. It is long, thin, and narrow. Above, it is attached to the posterior part of the external condyle of the os femoris: below, it terminates by a long tendon, which is attached to the posterior and inner part of the calcaneum. This muscle extends the leg on the foot, and conversely. It can, also, assist in the flexion of the leg on the thigh.

PLANTAR NERVES. These are two in number, and are furnished by the termination of the posterior tibial nerve. They are distinguished into — 1. The *internal plantar nerve*, which extends from the inferior part of the tibial nerve to both sides of the first three toes, and the inner side of the fourth. It furnishes, also, branches to the abductor of the great toe; to the short flexor of the toes; to the accessory; to the short flexor of the great toe, the lumbricales, &c. 2. The *external plantar nerve* proceeds from the termination of the posterior tibial to the posterior extremity of the 5th metatarsal bone, and gives branches to the flexor brevis digitorum pedis, the accessory and the abductor of the little toe. This trunk subsequently divides into two branches; — the one—*profunda*—is distributed to the short flexor of the great toe: the interosseus and abductor pollicis pedis: the other — *superficialis* — sends filaments to the short flexor of the little toe, the two sides of that toe, the outer side of the 4th, and the last lumbricalis.

PLANTAR REGIONS OR SURFACES are different regions or surfaces of the sole of the foot. Three are generally reckoned, — the *internal*, *middle*, and *external*.

PLANTAR VEINS follow an arrangement similar to that of the arteries.

PLANTARIA, Dengue.

PLANTARIS, Plantar, P. muscle—p. Superficies pedis, Sole — p. Verus, see Flexor longus digitorum pedis profundus perforans (accessorius.)

PLANTARIUM, Pubes.

PLANTE DU PIED, Sole.

PLANTI-SOUS-PHALANGIENS, Lumbricales pedis—*p. Tendino-phalangiens*, Lumbricales pedis.

PLANUM APONEUROTICUM DIAPHRAGMATIS. The tendinous expansion of the diaphragm.

PLANUM ORBITALE, see Maxillary bone (superior.)

PLANUM OS, from *planus*, 'soft, smooth.' The papyraceous or orbitar plate of the ethmoid bone — *Lam'ina papyra'cea*, *Lamell'a plana* — was formerly so called.

PLANUM PEDIS, Sole.

PLANUM SUPE'RIUS LINGUÆ. The upper surface of the tongue.

PLANU'RIA, from πλανος, 'wandering, false,' and ουρον, 'urine.' Discharge of urine through unwonted ways.

PLAQUEMINIER D'EUROPE, Diospyros lotus.

PLAQUES GAUFRÉES, Peyeri glandulæ—*p. Laiteuses*, see *Taches laiteuses* — *p. de Peyer*, Peyeri glandulæ.

PLASMA, Liquor sanguinis.

PLASMEXHIDRO'SIS, from *plasma*, the *liquor sanguinis*; ξξ, 'out of,' and 'ιδρωσις, 'perspiration.' Exudation of the plasma of the blood from the vessels.

PLASTER, Emplastrum — p. Adhesive, Emplastrum resinæ, Sparadrapum adhesivum — p. Adhesive, Baynton's, see Emplastrum resinæ—p. Adhesive, of pitch and resins, Emplastrum de pice et resinis glutinans — p. Ammoniacum, Emplastrum ammoniaci—p. Ammoniacum with mercury, Emplastrum ammoniaci cum hydrargyro—p. plastrum oxidi ferri rubri—p. Soap, Emplastrum saponis—p. of Spanish flies, compound, Emplastrum lyttæ compositum—p. Sticking, Emplastrum resinæ—p. Strengthening, Emplastrum ferri, Emplastrum oxidi ferri rubri—p. Warm, Emplastrum calefaciens—p. Wax, Emplastrum ceræ.

PLASTIC, *Plas'ticus, Formati'vus, Form'ative*, (F.) *Plastique*, from πλασσω, 'I form.' That which forms, or serves to form.

PLASTIC ELEMENT. One which bears within it the germs of a higher form.—Gerber. *Plastic* or *histogenet'ic* or *organoley'tic elements of nutrition* are those elements of food which go to the formation of organized tissue.—See Aliment.

PLASTIC FORCE. The generative or formative power in organized bodies. It is also called *Nisus formati'vus, Vis* seu *Virtus plas'tica* seu *formati'va* seu *essentia'lis* seu *reproducti'va, Fac'ultas forma'trix* seu *nutrix* seu *auctrix* seu *vegetati've; Blas alterati'vum, Motus assimilationis, An'ima vegetati'va, Plasticism'us, Virtus formatrix, Plastic''itas, Plastic''ity, Force of Nutrition, F. of assimilation, F. of Form'ation, F. of vegeta'tion, Puissance du moule intérieur* (Buffon), Bildungstrieb, *Germ-force* of the Germans.

PLASTIC LYMPH, Liquor Sanguinis—p. Surgery, Morioplastice.

PLASTICISMUS, Plastic Force.

PLASTICITAS, Plastic Force.

PLASTICITY, Plastic Force.

PLASTILYTIC, Antiplastic.

PLASTILYTICUM (HÆMATOLYTICUM), Spanæmic.

PLATA, Scapula.

PLATANO, Musa Sapientum.

PLATANTHE'RA ORBICULA'TA, *Large round-leaved Orchis*; indigenous. *Order*, Orchidaceæ; flowering in July. From πλατυς, 'wide,' and ανηρ, for 'anther.' The leaves are large, soft and fleshy, and are used, in certain places, for dressing blisters.

PLATANUS, Musa paradisiaca.

PLATEA, Bothriocephalus latus.

PLATE-BONE, Scapula.

PLATEIASMA, Platiasmus.

PLATES, MANSFORD'S, see Galvanism.

PLATIAS'MUS, *Plateias'ma*, from πλατυς, 'broad.' Excessive development of the lips, causing the articulation to be imperfect.

PLATINA, Platinum.

PLATINUM, *Plat'ina*, from (S.) *plata*, 'silver.' (F.) *Platine, Or blanc, Petit argent.* The preparations of platinum resemble in their therapeutical properties those of gold. The BICHLO'RIDE, *Plat'ini Bichlo'ridum*, made by dissolving *platinum* in *aqua regia*, and the DOUBLE CHLORIDE of PLATINUM and SODIUM, *So'dii chloroplat'inas, Chloroplat'inate of So'dium*, prepared by dissolving *bichloride of platinum* and pure *chloride of sodium*, in proper proportions, in water, evaporating and crystallizing,—are the preparations used. They are not much prescribed.

PLATULA, see Pediculus.

PLATYBREGMATE, see Cranium.

PLATYCORIA, Mydriasis.

PLATYCORIASIS, Mydriasis.

PLATYNO'SIS, from πλατυς, 'broad.' *Amplifica'tio.* Morbid extension of parts.

PLATYOPHTHALMON, Antimonium.

PLATYPOLIA, see Kyllosis.

PLATYPUS, see Kyllosis.

PLATYS'MA, from πλατυς, 'broad.' Anything broadly extended. A spread plaster.

PLATYS'MA MYOÏ'DES, *P. Myo'des, Mus'culus cuta'neus* seu *subcuta'neus* (Winslow), *Quadra'tus genæ* seu *latis'simus colli, Expan'sio musculo'sa, Tetrago'nus, Stomoman'icon*, (F.) *Thoraco-maxillo facial, Thoraco-facial* (Ch.), *Peaucier.* A muscle situate superficially on the lateral parts of the neck. It is flat, broad, and quadrilateral. Its fibres, which are all parallel to each other, pass obliquely upwards, and from without inwards. They arise from the areolar tissue, which covers the anterior and superior part of the chest; pass before the clavicle, and proceed to attach themselves at the interior part of the symphysis menti, at the external oblique line of the jaw, and at the commissure of the lips. The fibres of this last insertion form a distinct fasciculus, called by some anatomists *Mus'culus Riso'rius Santori'ni.* The platysma myoides depresses the commissure of the lips, and carries it outwards. It contribntes, also, to the depression of the lower jaw. When it contracts, it wrinkles the skin of the neck transversely.

PLATYSTER'NOS, from πλατυς, 'broad,' and στερνον, 'the sternum.' One who has a broad, well developed chest.—D. Pechlin.

PLATYS'TOMUS; from πλατυς, 'broad,' and στομα, 'mouth.' One who has a broad mouth.

PLAUTUS, Leiopus.

PLECHAS, Perinæum.

PLECTANÆ, Cornua uteri.

PLEC'TANÉ, *Plica, Plegma, Plexus.* From πλεκω, 'I twine.' A fold; a plexus. Also, a cornu of the uterus.

PLEC'TRUM. The styloid process of the temporal bone. Also, the uvula, and the tongue.—Castelli.

PLEDGET, (D.) Plaggh e, *Plumace'olus, Linteo'men, Plag'ula*, (F.) *Plumaceau, Plumasseau.* A small compress or *gâteau* of lint—(the filaments arranged parallel to each other)—flattened between the hands after the extremities have been cut off or folded down. It is applied over wounds, ulcers, &c., to preserve them from the contact of the air, to retain dressings *in situ*, and to absorb the discharges.

PLEGE, Blow, Ictus.

PLEGMA, Plectane, Plexus.

PLEGOMETER, Pleximeter.

PLEIN, (F.) 'Full.' The middle part of a roller.

PLEIOMASTHUS, Polymasthus.

PLEIOMAZIA, see Polymasthus.

PLENA MULIER, Pregnant.

PLENITUDE, Fulness.

PLENITUDO, Plethora.

PLENCK'S DEPILATORY, see Depilatory, Colley's.

PLEOMAZIA, see Polymasthus.

PLEONEC'TICUS, from πλεον, 'more,' and εχειν, 'to have.' Covetous. Desirous to acquire: hence *mania pleonectica.*

PLEONEC'TICA ATHYM'IA seu MELANCHOL'IA. A form of insanity characterized by a desire for gain or by covetousness.

PLERO'SIS, from πληρης, 'full;' also *Reple'tio, Refec'tio, Reple'tion.* Restoration of flesh after sickness. Plethora.

PLEROTICUS, Incarnans.

PLES'MONÉ, πλησμονη, *Plenitu'do, Sati'etas, Sati'ety.* Intemperance. A condition the opposite to that of hunger.

PLESSER, Plexor.

PLESSIMETER, Pleximeter.

PLESSIMÈTRE, Pleximeter.

PLETHOMER'IA, from πληθος, 'many,' and μερος, 'a part.' Superabundance of parts, as in the case of six fingers to one hand.

PLETHO'RA, from πληθω, 'I fill.' *Polyæ'mia, Polyhyperhæ'mia, Panhyperæ'mia, Polychym'ia sanguin'ea, Angeioplero'sis, Angioplero'sis, Erythræ'mia, Erythro'sis, Hæmatopletho'ra, Hæmopletho'ra, Plenitu'do, Multitu'do, Redundan'tia, Reple'tio, En'chyma, Comple'tio, Pleth'ory, Reple'tion, San'guineness, Fulness*, (F.) *Abondance, Rédondance.* The word *plethora*, which means

repletion, *Plero'sis*, expresses a superabundance of blood in the system, or in some part of it:—hence the division of plethora into *general* and *local;* the latter being called, according to its seat, *cerebral, pulmonary, uterine*, &c. The principal symptoms of plethora exist in the circulatory system; such as redness of the surface, swelling of the veins, increase in the fulness of the pulse, in the strength of the heart's pulsations, &c., with spontaneous hemorrhages occasionally. With these are usually united general heaviness, torpor, lassitude, vertigo, tinnitus aurium, flushes of heat, &c. The blood of plethoric persons differs from healthy blood in the smaller ratio of water which it contains, and especially in the augmentation of the red corpuscles.

The tendency to plethora, or its actual existence, must be obviated by purgatives, proper diet, exercise, &c.; and, if the danger from it be pressing, by blood-letting. This is, however, a doubtful remedy for general plethora, as it increases hæmatosis.

PLETHO'RA ARTERIO'SA is the form in which the blood is rich in fibrin and red corpuscles—the *arte'rial constitu'tion*.

PLETHORA, LOCAL, Hyperæmia — p. Partialis, Hyperæmia.

PLETHOR'IC, *Pletho'ricus, Polyæ'mic, Polyæ'micus, Sanguine, Sangui'neous*, (F.) *Pléthorique*. Same etymon. Full of blood. Relating to or affected with plethora.

PLETHORICUS, Plethoric.

PLETHORY, Plethora.

PLETHOS, Satiety.

PLEUMON, Pulmo.

PLEUMONIA, Pneumonia.

PLEURA, *Pleurum, Pleuro'ma*, 'the side, a rib.' *Membra'na pleuri'tica succin'gens* seu *costas succin'gens, M.* seu *Tu'nica costalis* seu *subcosta'lis, Hypopleu'rios, Hypezo'cus*, (F.) *Plèvre* ou *Pleure*. The pleuræ are two thin, diaphanous, perspirable membranes, which line each side of the chest, and are reflected thence upon each lung. Like all serous membranes — to which class they belong—each represents a sac without aperture. From the junction of the pleura of each side the mediastina are formed. That portion of the pleura which lines the parietes of the chest is called *Pleura Costa'lis;* the portion that covers the lungs, *Pleura Pulmona'lis*. The arteries of the pleuræ are from the intercostals, internal mammaries, phrenic, inferior thyroid, &c. The veins correspond with the arteries. They are, also, supplied with lymphatics, but nerves are not traceable in them.

Pleura is also used for *Cavity of the Pleura, Saccus Pleuræ*.

PLEURÆ. The sides of the chest.

PLEURAL, *Pleura'lis, Pleu'ricus, Pleu'rites*. That which concerns the pleura; — as a *pleural* fistula;—*pleural* cavity, *pleural* hemorrhage, &c.

PLEURALGIA, Pleurodyne.

PLEURAPOPHYSES, Costæ veræ, see Costa.

PLEURAPOSTEMA, Empyema.

PLEURARTHROC'ACE, from πλευρα, 'a rib,' αρθρον, 'a joint,' and κακος, 'bad.' Caries of the ribs.

PLEURE, Pleura.

PLEURESIA, Pleuritis.

PLEURÉSIE, Pleurisy — *p. Fausse*, Pleurodynia.

PLEURESIS, Pleuritis.

PLEURÉTIQUE, Pleuritic.

PLEURICUS, Pleural.

PLEURIS, Pleuritis.

PLEURISY, Pleuritis

PLEURISY, BILIOUS, *Pleuri'tis bilio'sa*. Pleurisy accompanied with bilious symptoms; — the effect of duodenitis or duodeno-hepatitis.

PLEURISY, FALSE, Pleurodynia.

PLEURISY, HEAD. A ridiculous term, occasionally used by the vulgar, in the Southern States especially, for bilious pneumonia before the pneumonitic phenomena are developed, and whilst the head is prominently affected.

PLEURISY, HEMORRHAGIC, Hæmathorax — p. Rheumatic, Pleurodynia — p. Root, Asclepias tuberosa.

PLEURISY, TYPHOID, *Pleuri'tis typhoï'des* seu *typho'des* seu *typho'sa*. Pleurisy accompanied by adynamic symptoms.

PLEURITES, Pleural.

PLEURIT'IC, *Pleurit'icus, Pleurit'ical*, (F.) *Pleurétique;* same etymon as *pleuritis*. Relating or appertaining to pleuritis — as '*pleuritic* pain.'

PLEURI'TIS, from πλευρα, 'the pleura;' *Morbus latera'lis* seu *pleurit'icus* seu *Costa'lis, Empres'ma* seu *Cauma Pleuritis, Pleuris, Pleure'sis, Pleure'sia, Pleuritis costa'lis* seu *vera, Pleurit'ica Febris, Passio pleurit'ica, Inflamma'tio Pleuræ, Pleurisy, Inflamma'tion of the Pleura*, (F.) *Pleurésie, Fièvre pleurétique, Inflammation de la Plèvre*, may be acute or chronic. Perhaps the most violent of all internal inflammations is the active form; known by acute, lancinating pain in one side of the chest, increased by inspiration, by coughing, and often by pressure; dyspnœa, the inspirations short and frequent; cough dry, or with little expectoration; and difficulty of lying on the affected side. Symptoms, attending the phlegmasiæ in general, strongly marked.

Physical Signs. There is seldom any perceptible alteration in the exterior of the chest. When effusion has taken place to a great extent, the signs will be similar to those of chronic pleurisy. The motion of the affected side is diminished, and the vibrations of the voice cannot be detected by the hand. There is more or less dulness of sound on percussion, the dulness diminishing or disappearing by change of position. On auscultation, the inspiration is feeble, distant, or inaudible; but change of position modifies it. Egophony is usually present, when the effusion is in moderate quantity, and is best heard over a portion of the thoracic parietes, represented by a band of three inches, running from below the inferior margins of the scapula in the direction of the ribs to the sternum. Simple pleurisy rarely attacks both sides at once: when such is the case, the presence of tubercles may be suspected.

Formerly, a *true pleurisy* meant one seated in the pleura: a *mediastinal pleurisy*, one situated in the anterior mediastinum; and *false pleurisy* or *rheumatismal pleurisy*, that which occupies the intercostal muscles. The last has received the name *Pleurodyn'ia;* that of *pleurisy* being exclusively appropriated to inflammation of the pleura. Pleurisy has also been distinguished into *dry* and *humid*, according as it is or is not accompanied by expectoration. *Humid* or *moist pleurisy* is now properly regarded as a complication of pleurisy with pulmonary catarrh. It is the *catarrhal pleurisy* of some. The majority of the species of pleurisy, admitted by Sauvages, consist of complications.

The causes of pleurisy are like those of other internal inflammations. It may terminate by resolution, effusion, or suppuration.

CHRONIC PLEURISY, which has been particularly described by Bayle, Broussais, and Laënnec, most commonly terminates by a serous or purulent effusion, which sometimes simulates hydrothorax; at others, phthisis pulmonalis. It

may form slowly, without evident symptoms; or it may succeed acute pleurisy. In the former case, vague pains are felt in the chest, with small, dry cough, oppression at intervals, shivering, irregular febrile symptoms, and hardness of pulse.

Physical Signs. The affected side is smoother, more rounded and motionless; the intercostal spaces are dilated and filled up, or may even protrude slightly. In very chronic cases, however, the affected side may be smaller. The triangular space above the clavicle and the depression immediately above the sternum are often drawn downwards on the diseased side. No vibration is experienced by the hand when the patient speaks. The parietes of the thorax are sometimes œdematous, and fluctuation may be occasionally felt between the ribs. On percussion the sound is dull, or if clear, only so in the upper portions of the chest. On auscultation, there is an absence of the usual sounds over the affected parts, excepting occasionally transmitted sounds. There are no physical signs that can enable us to know whether pus or serum is effused into the chest. The introduction of a grooved needle through the intercostal space, as recommended by Dr. Thomas Davies, would of course settle the question.

On *dissection* of those who have died of pleurisy, the pleura is found thickened, red, inflamed, and covered with membranous exudations or false membranes. Sometimes it seems cartilaginous and ossified. Its cavity frequently contains serous or sero-purulent effusions.

The acute form of the disease requires the most active treatment. General blood-letting, to such an extent as to make a very decided impression on the system, and repeated if necessary. This is the most important agent. After the violence of the disease has been got over, counter-irritants will be found highly beneficial; as well as when it has passed into the chronic state. The cough may be relieved by demulcents.

Sauvages has given the name Pleuri'tis Ventro'sa, and Pringle that of Pleurodyn'ia Ventro'sa, to a pain behind the false ribs, attributed to the presence of air in the intestines.

Pleuritis Biliosa, Pleurisy, bilious—p. Bronchialis, Bronchitis — p. Costalis, Pleuritis — p. Diaphragmatica, Diaphragmitis — p. Humida, Bronchitis—p. Muscularis, Pleurodynia — p. Notha, Pleurodynia—p. Pericardii, Pericarditis—p. Pulmonis, Pleuropneumonia — p. Rheumatica, Pleurodynia—p. Spuria, Pleurodynia—p. Spuria simulata, Pleurodynia — p. Typhoides, Pleurisy, typhoid — p. Vera, Pleuritis.

PLEUROCE'LĒ, from *πλευρα*, 'the pleura,' and *κηλη*, 'a tumour.' *Hernia of the pleura, Hernia pleu'rica et pulmona'lis.* This name, employed by Sagar, is inaccurate, as the pleura never protrudes alone. It only forms a hernia, when it serves as an envelope to the lung, to tumours, or to purulent collections, which have protruded from the thoracic parietes.

PLEUROCOLLE'SIS, from *πλευρα*, 'the pleura,' and *κολλαω*, 'I glue.' An adhesion between the pleura costalis and pleura pulmonalis.

PLEURODYNE, Pleurodynia.

PLEURODYN'IA, *Pleural'gia, Pseudo-pleuri'tis, Pseudo-pleurisy, Pleurod'ynē, Autal'gia doloro'sa, Parapleuri'tis, Stethorrheu'ma, Rheumatis'mus pec'toris, Pleuri'tis rheumat'ica* seu *muscula'ris* seu *notha* seu *spu'ria* seu *spu'ria simula'ta, Pneumo'nia exter'na, Lagonop'onos, Thoracod'ynē, Dolor Pec'toris exter'nus, Pain in the side, Stitch in the side, False, rheumat'ic* or *rheumatis'mal pleurisy,* (Old Eng.) *Shott,* (Sc.) *Caik,* (F.) *Point de côté, Douleur de côté, Pleurésie fausse;* from *πλευρα,* 'the side or pleura,' and *οδυνη,* 'pain.' A spasmodic or rheumatic affection, generally seated in the muscles of the chest, and, ordinarily, in the intercostals. It is usually augmented by outward pressure, inspiration, coughing, exertion, moving the thorax, and sometimes even the corresponding arm. It is unaccompanied by fever, cough, or dyspnœa, excepting under the form of a *stitch,* when dyspnœa exists. It is, generally, by no means obstinate, and yields promptly to warm applications and to cupping or leeches. If it still resists, a blister will, almost always, remove it.

Pleurodynia Ventosa, Pleuritis ventosa.

PLEUROMA, Costa, Pleura.

PLEUROPATHI'A, from *πλευρα,* 'the pleura,' and *παθος,* 'a disease.' A disease of the pleura.

PLEUROPERIPNEU'MONY, *Pleuroperipneumo'nia, Pleuropneumo'nia, Pneumonopleure'sis, Pneumonopleuri'tis, Pleuri'tis pulmo'nis, Pneumo'nia pleuritis.* Inflammation occupying the pleura and the lung at the same time. Pleurisy and peripneumony existing simultaneously. *Physical signs.* A dull sound is yielded by percussion for a variable extent over the more dependent portions of the affected side. The loss of sound is partially modified by change of position. The respiratory murmur on auscultation is very feeble or absent inferiorly; higher up, the crepitation or bronchial respiration of pneumonia may be detected; round the root of the lung, and near the inferior angle of the scapula, egophony is generally present. There is seldom much enlargement of the affected side, or displacement of the adjacent organs, as in the case of simple chronic pleurisy.

PLEUROPNEUMA, Pneumathorax.

PLEUROPNEUMONIA, Pleuroperipneumony.

PLEUROPNEUMONITIS, Pleuroperipneumony.

PLEUROPYESIS, Empyema.

PLEURORRHAGIA, Hæmatothorax.

PLEURORRHŒ'A, from *πλευρα,* 'the side,' and *ρεω,* 'I flow.' Accumulation of fluid in the pleura.

Pleurorrhœa Chylosa, Chylothorax—p. Lymphatica, Hydrothorax — p. Purulenta, Empyema —p. Sanguinea, Hæmatothorax—p. Serosa, Hydrothorax.

PLEURORTHOPNŒ'A, from *πλευρα,* 'the side,' *ορθος,* 'erect,' and *πνεω,* 'I respire.' Pain of the side, which does not permit the patient to breathe, except when in the vertical position.

PLEUROSO'MUS, from *πλευρα,* 'side,' and *σωμα,* 'body.' A malformation in which the fissure is somewhat lateral, with eventration extending chiefly upon the upper part of the abdomen and upon the chest; the upper extremity of the fissured side being more or less atrophied. —Vogel.

PLEUROSTO'SIS, from *πλευρα,* 'the pleura,' and *οστεον,* 'a bone.' Ossification of the pleura, or in the cavity of the pleura. *Osteopleu'ria.*

PLEUROTETANUS, Pleurothotonos.

PLEUROTHOT'ONOS, *Pleurot'onos, Pleurotet'anus, Tetanus latera'lis,* from *πλευροθεν,* 'laterally,' and *τονος,* 'tension.' A variety of tetanus, in which the body is curved laterally by the stronger contraction of the muscles of one side of the body.

PLEUROTONOS, Pleurothotonos.

PLEURUM, Costa, Pleura.

PLĒVRE, Pleura.

PLEXIM'ETER, *Plexom'eter, Plegom'eter,*

Plessim'eter, Anticoposcop'ium, Anticop'oscope, (F.) *Plessimètre*, from *πλησσω*, 'I strike,' and *μετρον*, 'measure,' 'a measure of percussion.' An ivory plate of a circular or ovoid shape, from an inch and a half to two inches in diameter, and about one-sixth of an inch in thickness. It has either a raised rim or edge, or projecting handles on its upper side, to permit its being held between the finger and thumb of the left hand, whilst it is struck with the right. It is used in percussion of the chest. A piece of metal, a coin, or the finger of the left hand may be used with equal advantage. — See Percussion, mediate.

PLEXOMETER, Pleximeter.

PLEXOR, from *πλησσω*, 'I strike.' *Plesser*. Any instrument employed in percussion. The ends of the fingers of the right hand brought together are the best *plexor*; as the finger of the left is, perhaps, the best *pleximeter*.

PLEXUS, *Plegma, Plec'tanē, Planē, Retē*, from *πλεκω, plecto*, 'I interlace,' 'I entwine.' (F.) *Lacis*. A network of blood-vessels or of nerves. The nervous plexuses, *Implicatio'nes reticula'res* seu *Textus nervorum* belong — *some* to the system of encephalic nerves—*others* to that of the great sympathetic; whilst some, as the pharyngeal, seem to be formed of the two sets. The plexuses represent complex networks, with more or less loose meshes, formed by the numerous and diversified anastomoses of the nervous filaments; from which proceed other branches, that are distributed to organs, or to other plexuses.

PLEXUS, CARDIAC, Cardiac plexus—p. Carotid, see Carotid nerve — p. Cavernosus, Bulbus vestibuli — p. Choroides, see Choroid — p. Choroideus Medius, Choroidea tela — p. Ciliaris, Ciliary ligament—*p. Cœliaque*, Cœliac plexus—p. Coronarius ventriculi, Gastric plexus—p. Coronary, see Cardiac plexus, and Coronary plexus — p. Ganglioformis semilunaris, Cœliac plexus — p. Ganglioformes, Ganglions, nervous — p. Glandiformes, Ganglions, nervous—p. Glandulosi Peyeri, Peyeri glandulæ — p. Hederaceus, Corpus pampiniforme — p. Hepaticus, Hepatic plexus — p. Infra-thyroideal, see Thyroideal veins—*p. Lombo-abdominal*, Lumbar plexus—p. Median, Cœliac plexus—p. Mesenterii proprius et maximus, Cœliac plexus —p. Nervorum anserinus, Facial nerve—*p. Opistogastrique*, Cœliac plexus — p. Pampiniformis, Corpus pampiniforme — p. Pharyngeal, see Pharyngeal nerve — p. Pneumogastricus, see Pneumogastric nerve — p. Retiformis, Corpus cavernosum vaginæ — p. Reticularis, Bulbus vestibuli, Choroides plexus — p. Solar, Cœliac plexus — *p. Sous-mésentérique*, Hypogastric plexus—*p. Testiculaire*, Spermatic plexus — *p. Trachélo-sous-cutané*, Cervical plexus — p. Vasculosus funiculi spermatici pampiniformis, Corpus pampiniforme.

PLICA, from *plico, πλεκω*, 'to fold,' *Tricho'sis plica, Tricho'ma, Trichono'sis plica, Tricæ, T. Incubo'rum* seu *Scrofo'rum, Plica Polonica* seu *Polon'ica Juda'ica* seu *Cachec'tica* seu *Saxon'ica* seu *caput Medu'sæ* seu *longicau'da latera'lis, Affec'tio Sarmat'ica, Lues Sarmat'ica* seu *Polon'ica* seu *Trichomat'ica, Helo'sis, Helo'tis, Cir'ragra, Cir'rhagra, C. Polono'rum, Ecphy'ma trichoma, Morbus Cirrho'rum, Coma Cæsa'rea, Kolto, Rhopalo'sis, Plica'tio, Plicatu'ra, Matted hair, Plaited hair, Trichom'atose hair*, (F.) *Plique, P. Polonaise*. A disease endemic in Poland, Lithuania, and other parts of Northern Europe; so called on account of its being characterized by interlacing, twisting, and agglutination or matting of the hair. By some it has been regarded as a real disease; by others, as the want of attention to cleanliness. However this may be, it generally appears upon the hair of the head, but sometimes in that of other parts, as the beard, the hair on the axilla, pubes, &c. Alibert admits three species of plica. 1. *Plica multiform'is* or *Plica caput Medu'sæ*, in which the hairs are mixed and agglutinated in greater or less masses; and this has been again subdivided into two varieties, according as the meshes are almost straight (*P. C. M. lacinia'ta*, (F.) *Plique en lanières*) or much twisted, (F.) *P. en vrilles.*) 2. *Plica longicau'da*, (F.) *Plique solitaire* ou *à queue*; when the hair is united into a single long mass, and 3. *Plica ceepito'sa*, (F.) *Plique en masse*, in which the hairs are matted into one large, shapeless mass. Pinel places this disease amongst the *Cutaneous phlegmasiæ*; but it is far from demonstrated, that it is the result of inflammation of the skin. Certain it is, however, that the tangling of the hair is symptomatic of an affection — *sui generis* — of the dermoid system. The idea that it is entirely owing to want of cleanliness, as has been conceived by some, is not tenable. It has been supposed to be produced by a fungous growth—a *mycoderma* or *trichomaphyte*.

PLICA, Plectane — p. Cachectica, Plica — p. Caput Medusæ, Plica — p. Centralis retinæ, see Optic nerve — p. Longicauda lateralis, Plica — p. Lunata, Valvula semilunaris — p. Polonica, Plica — p. Polonica Judaica, Plica—p. Saxonica, Plica — p. Semilunaris, Valvula semilunaris.

PLICÆ CONNIVENTES, Valvulæ conniventes—p. Semilunares, see Urinary bladder, and Uterus.

PLICATIO, Plica.

PLICATURA, Plica.

PLICATURÆ CEREBRI, Gyri cerebri.

PLICHOS, Perinæum.

PLIN'THIUM, *πλινθιον*. A machine invented by one Nileus, which was formerly employed in the reduction of fractures and luxations. Scultetus describes it in his *Armamentarium Chirurgicum*.

PLIQUE, Plica — *p. Polonaise*, Plica.

PLOCARIA CANDIDA, Fucus amylaceus — p. Helminthochorton, Corallina Corsicana.

PLOMB, Plumbum.

PLOMB (F.). The sulphuretted gas disengaged from privies, which proves fatal at times to the nightmen, (F.) *Vidangeurs*, engaged in emptying them.

PLOMB, ACÉTATE ACIDE DE, Plumbi superacetas — *p. Blanc*, Plumbi subcarbonas — *p. Blanc de*, Plumbi subcarbonas—*p. Carbonate de*, Plumbi subcarbonas — *p. Chlorure de*, Plumbi chloridum — *p. Iodure de*, Plumbi iodidum — *p. Nitrate de*, Plumbi nitras — *p. Oxide de, fondu*, Plumbi oxydum semivitreum—*p. Oxide rouge de*, Plumbi oxydum rubrum — *p. Oxide semi-vitreux de*, Plumbi oxydum semivitreum.

PLOMBAGE DES DENTS, Plugging.

PLOMBAGINE, Graphites.

PLOMBIÈRES, MINERAL WATERS OF. *Fontes medica'ti Plumba'rii, Thermæ Plumbariæ*. Plombiéres is a town in the department of the Vosges, 17 leagues from Nancy, and two from Remiremont. Here are several sources of thermal water. That which is called *Saponaceous* (F.) *Savonneuse*, is formed of the subcarbonate and sulphate of soda, chloride of sodium, silica, carbonate of lime, and much vegeto-animal matter. This last component, when held in solution by means of the subcarbonate of soda, gives to the water an unctuous character. This is the origin of its name. The waters of Plombiéres are employed as solvents in engorgements of the abdominal viscera, and as alteratives in chronic diseases of the skin.

PLORATIO, Lacrymatio.

PLORATUS, Lacrymatio.

PLOTUS, Leiopus.

PLOUK, Papula.

PLUGGING, (Sw.) *Plugg*, (F.) *Tamponnement.* The act of stopping a hole. The introduction of a plug or dossil of lint or rag into a wound or natural cavity—as the uterus or vagina—to arrest hemorrhage; or of some substance into a carious tooth to prevent toothache, (F.) *Plombage des dents.* See Filling.

PLUKE. Papula.

PLUM, Prunum, Prunus domestica—p. Assyrian, Sebestina.

PLUMA, Lanugo.

PLUMACEAU, Pledget.

PLUMACEOLUS, Pad, Pledget.

PLUMASSEAU, Pledget.

PLUMBAGO, Graphites, Persicaria.

PLUMBA'GO EUROPÆ'A, *P. lapathifo'lia* seu *undula'ta*, from *plumbum*, 'lead,' because covered with lead-coloured spots, *Denta'ria, Crepanel'la, Squama'ria, Dentela'ria, Leadwort*, (F.) *Dentelaire, Herbe au Cancer, Malherbe. Ord.* Plumbaginaceæ. *Sex. Syst.* Pentandria Monogynia. The root was formerly much esteemed as a cure for toothache, like the *Pel'litory of Spain*, which is also called *Dentaria.*

PLUMBI ACETAS, P. superacetas—p. Acetas dilutum alcoholicum, Liquor plumbi subacetatis dilutus—p. Acidulus siccus, Plumbi superacetas—p. Carbonas, P. subcarbonas.

PLUMBI CHLO'RIDUM, *Chloride of Lead*, (F.) *Chlorure de Plomb.* This salt of lead has been used in the form of lotion and ointment in cancerous ulcerations.

PLUMBI DEUTOXYDUM RUBRUM, P. Oxydum rubrum—p. Hydriodas, P. Iodidum—p. Iodhydras, P. Iodidum.

PLUMBI IOD'IDUM, *P. Iodure'tum* seu *Hydri'odas* seu *Hydroï'odas* seu *Iodhy'dras*, *Plumbum ioda'tum* seu *Hydroïod'icum*, *Iodide* or *Iod'uret of Lead*, (F.) *Iodure de Plomb, I. plombique.* This salt is formed by the double decomposition of *iodide of potassium* and *nitrate of lead.* It is used in scrofulous affections internally and externally; and is official in the Pharmacopœia U. S. 1851. Dose, gr. ss to gr. iij or iv.

PLUMBI IODURETUM, P. Iodidum.

PLUMBI NITRAS, *Plumbum ni'tricum, Nitras plumb'icus, Nitrum saturni'num, Nitrate of lead*, (F.) *Nitrate* ou *Azotate de Plomb.* A salt formed by the action of *diluted nitric acid* on *litharge.* Nitrate of lead has the same medical action as the other soluble salts of lead, and is a valuable antibromic. It has been used, also, as an excitant antiseptic to wounds, ulcers, &c., and is the basis of Ledoyen's disinfecting liquid.

PLUMBI NITROSAC'CHARAS, *Nitrosac'charate of lead.* (*Sacchar.* p. j; *Acid. nitric.* p. ij; *Aquæ* p. x.) Beat together in a porcelain dish as long as chemical action continues: dilute the liquor with water, neutralize with chalk, and to the filtered solution add acetate of lead so long as a precipitate is formed. Collect, wash, and dry the precipitate, which is saccharate of lead. Dissolve in dilute nitric acid, (one part acid to nineteen of water,) filter and evaporate to form crystals, which are transparent, of an amber colour, and in regular hexagonal plates or prisms.

Advised as a solvent of phosphatic calculi.

PLUMBI OXYDUM ALBUM, Plumbi subcarbonas—p. Oxydum carbonatum per acidum acetosum, Plumbi subcarbonas—p. Oxydum fusum, Pl. oxydum semivitreum.

PLUMBI OXYDUM RUBRUM, *Min'ium, Miltus, Deutox'ydum plumbi rubrum, Superox'ydum Plumbo'sum, Plumbum oxyda'tum rubrum* seu *super'oxydatum, Sandix, Sandyx, Red lead*, (F.) *Oxide de plomb rouge.* It is sometimes used to kill vermin.

PLUMBI OX'YDUM SEMIVIT'REUM, *Plumbum oxyda'tum, Lithar'gyrus, Lithargyrum, Lithargyr'ium, Oxydum plumbi fusum, Spuma argenti, Semi-vit'rified oxyd of lead or litharge, Calcineo'sa, Cath'mia*, (F.) *Oxide de plomb fondu, Oxide de plomb semivitreux*, (a yellow protoxyd of lead, prepared by heat, combined with carbonic acid.) It occurs in scales of a whitish-red colour, and semi-vitrified. It is employed for pharmaceutical purposes, as in the *Liquor plumbi acetatis, Emplastrum plumbi*, &c. Formerly, the *Litharge of gold, Chrysi'tis, Mas'sicot*, and *Litharge of silver, Almariab*, were distinguished in commerce. These were merely ordinary litharge, resembling gold or silver in colour.

PLUMBI SUBCAR'BONAS, *Car'bonas plumbi* seu *plumbicus, Plumbi Carbonas* (Ph. U. S.), *Plumbum carbonicum, Pl. oxyda'tum carbon'icum Magiste'rium plumbi, Oxydum plumbi album, Cerussa, Æru'go plumbi, Psimmyth'ion, Psym'mython, Simmitium, Flake white, Blanca, Gersa, Ij"fides, Subcar'bonate of lead, Cerusse, White lead*, (F.) *Carbonate de plomb, Blanc de plomb, Plomb blanc, Céruse, Blanc d'Argent, Blanc de Céruse, Blanc de Krems, B. de Crems, B. de Kremnitz, Craie de plomb*, (prepared by exposing spiral rolls of lead to the fumes of vinegar, in vessels placed in dung.) It is inodorous; has a sweet taste; is brittle; friable; snow white, and of a minute, scaly texture. It is astringent and sedative, and is sprinkled on parts affected with local inflammation, or to prevent chafing in children. It is also used in the formation of ointments and plasters.

PLUMBI SUPERACE'TAS, *Cerus'sa aceta'ta, Plumbi acid'ulus siccus, P. ace'tas* (Ph. U. S.), *Sal* seu *sac'charum Satur'ni, Plumbum ace'ticum, Dulce'do Satur'ni, Acetas plum'bicum crystallisa'tum, Sal plumbi, Sugar of lead, Superac"etate of lead, Protoac"etate of lead*, (F.) *Acétate acide de plomb, Sel* ou *sucre de Saturne.* (*Plumb. carb.* ℔j, *Acid acetic.* cong. 1½. Boil the lead with the acid till it is saturated; then strain through paper, and evaporate to a pellicle, that crystals may be formed. Wash the crystals and dry on blotting-paper. Ph. L.) The acetate of lead has a sweet, styptic taste; a very white colour, and silky lustre. It is astringent; and, in *weak* solution, cooling and sedative; in *strong*, stimulant. It is given internally, in visceral and other hemorrhages, combined with opium, and is used externally, in solution, in inflammation, burns, bruises, gonorrhœa, &c. Dose, gr. ss to iss.

PLUMBI TANNAS, see Tannin.

PLUMBICUM ACETAS CRYSTALLISATUM, Plumbi superacetas.

PLUMBOSUM SUPEROXYDUM, Plumbi oxydum rubrum.

PLUMBUM, *Molyb'dos, Molibdus, Saturn'us, Capricor'nus*, (F.) *Plomb.* Lead. A solid metal of a bluish white colour; more malleable than ductile; soft enough to be scratched by the nail; very fusible and oxydizable, when heated in the air, and existing, in nature, under a number of different shapes; the principal of which are those of sulphuret and oxyd. S. g. 11.352.

Its use is to form oxides and salts. In its metallic state, it has no action upon the body; but when oxydized or united with an acid, it acts, in large doses, as a powerfully astringent poison.

PLUMBUM ACETICUM, Plumbi superacetas—p. Album, Tin—p. Candidum, Tin—p. Carbonicum,

Plumbi subcarbonas — p. Cinereum, Bismuth, subnitrate of — p. Hydroiodicum, Plumbi Iodidum—p. Iodatum, Plumbi Iodidum—p. Nigrum, Graphites—p. Nitricum, Plumbi nitras—p. Oxydatum, Plumbi oxydum semivitreum—p. Oxydatum carbonicum, Plumbi subcarbonas — p. Oxydatum rubrum, Plumbi oxydum rubrum — p. Superoxydatum, Plumbi oxydum semivitreum.

PLUMIE'RA ALBA; *Order*, Apocynaceæ; a native of tropical America, has a milky juice which is cathartic.

PLUMIERA DRAS'TICA, is given in Brazil in jaundice, and chronic obstructions, [?] mixed with milk of almonds.

PLUMIERA PHAGEDÆ'NICA, is in repute in Brazil as an anthelmintic.

PLUMS, SEEDED, see Diospyros Virginiana — p. Winter, see Diospyros Virginiana — p. Yellow, see Diospyros Virginiana.

PLUNGE BATH, see Bath.

PLUNGING SIPHON, see Siphon.

PLUNKETT'S CAUSTIC FOR CANCERS, Plunkett's Ointment.

PLUNKETT'S OINTMENT, *Plunkett's Caustic for Cancers*. This empirical cancer remedy consists of *Arsenious acid*, *Sulphur*, and the powdered flowers of the *Ranunculus flammula* and *Cotula fœtida*; — levigated and made into a paste with the white of egg, and applied, on a piece of pig's bladder, to the surface of the cancer.

PLURAL BIRTH, see Multiparous.

PLU'TEA. Avicenna gives this name to duplicatures of the dura mater, such as the *Falx cerebri*.

PLUTONIUM, Barium.

PNEOBIOMANTIA, Docimasia pulmonum.

PNEOBIOMANTICA, Docimasia pulmonum.

PNEUMA, Air, Life. See Pneumatic Physicians.

PNEUMAPOSTE'MA, *Pneumonaposte'ma*, *Abscessus pulmo'num*; from πνευμων, 'the lung;' and αποστημα, 'abscess.' Abscess of the lung.

PNEUMARTHRO'SIS, from πνευμα, 'air,' and αρθρον, 'articulation.' Secretion of air into an articular cavity. Seen at times after acute rheumatism, but soon disappearing [?].

PNEUMATELECTASIS, Atelectasis pulmonum.

PNEUMATHÆ'MIA, *Pneumatæ'mia*, from πνευμα, πνευματος, 'air,' and 'αιμα, 'blood.' A morbid condition in which air is developed in the bloodvessels.—Cless.

PNEUMATHORAX, Pneumothorax.

PNEUMAT'IC, *Pneumat'icus*, *Pneumat'ical*, (F.) *Pneumatique*, from πνευμα, πνευματος, 'life, air.' Relating to pneuma, air or health.

PNEUMAT'IC PHYSICIANS, *Pneumat'ici*. Name given to a sect of physicians, at the head of whom was Athenæus, who made health and disease to consist in the different proportions of an element —which they called *Pneuma*, πνευμα—to those of the other elementary principles. This πνευμα was a fancied spiritual principle, which the Stoics regarded as an element, different from water, air, earth and fire; — the sole elementary principles previously admitted.

PNEUMAT'ICA, from πνευμα, πνευματος, 'air.' Appertaining to the breathing. Diseases of the respiratory function;—the second class in Good's system of nosology. Agents that act on the respiratory organs.—Pereira.

PNEUMATICAL, Pneumatic.

PNEUMATOCELE, Physocele.

PNEUMATO'DES, from πνευμα, 'wind,' and ειδος, 'resemblance.' One distended with air, or who breathes with difficulty, owing to an accumulation of flatus in the digestive tube; or, according to others, owing to emphysema.

PNEUMATOMETER, Spirometer.

PNEUMATOMPHALOCELE, Pneumatomphalus.

PNEUMATOM'PHALUS, *Pneumatom'phalus*, *Pneumatomphalo'cele*, from πνευμα, πνευματος, 'air,' and ομφαλος, 'the umbilicus.' Umbilical intestinal hernia, containing a considerable quantity of flatus.

PNEUMATOR'RHACHIS, from πνευμα, πνευματος, 'air,' and 'ραχις, 'the spine.' Accumulation of air in the vertebral canal.

PNEUMATOSE, Pneumatosis—*p. Péritonéale*, Tympanites.

PNEUMATO'SIS, *Aëro'sis*, from πνευμα, πνευματος, 'air.' *Flatus*, (F.) *Maladie venteuse*, *Pneumatose*. Flatulence. Flatulent distension of the stomach or bowels, or both. Sauvages uses the word synonymously with emphysema. It is now generally employed for every abnormous collection of gaseous matters in any part of the body.

PNEUMATOSIS, Emphysema — p. Abdominis, Tympanites — p. Enterica, Colica flatulenta — p. Pericardii, Pneumo-pericardium — p. Pulmonum, Emphysema of the lungs — p. Ventriculi, et Pneumatosis enterica, Flatulence.

PNEUMATOTHORAX, Pneumothorax.

PNEUMECTASIS, Emphysema of the Lungs.

PNEUMOCACE, Necropneumonia.

PNEUMOCE'LÉ, *Hernia pulmo'nis*, (F.) *Hernie du poumon*. Hernia of the lung through one of the intercostal spaces.

PNEUMOCHOLOSIS, Pneumonia (bilious).

PNEUMOCHYSIS, Œdema of the lungs.

PNEUMOËCTASIE, Emphysema of the lungs.

PNEUMOGAS'TRIC, *Pneumogas'tricus*, (F.) *Pneumogastrique*, from πνευμων, 'the lung,' and γαστηρ, 'the stomach.' Belonging to the lungs and stomach.

PNEUMOGASTRIC NERVES, *Eighth pair of nerves* (*Tenth pair*, of some,) *Par vagum*, *Pars vaga*, *Nervus vagus* seu *ambulato'rius* seu *pneumogas'tricus* seu *deci'mus* seu *sympath'icus me'dius*, *Middle sympathetic*, (F.) *Nerfs pneumogastriques* ou *vagues*; so called because it is distributed especially to the organs contained in the chest and abdomen. This nerve arises from behind the eminentiæ olivariæ and near the corpora restiformia by one or two rows of filaments, regularly arranged. These filaments unite to form a flat cord, which issues from the cranium by the foramen lacerum posterius; behind the glosso-pharyngeal nerve. At its exit from the cranium, the pneumogastric nerve has the appearance of a very compact plexus — *Plexus ganglifor'mis*, *Ganglion of the superior laryngeal branch*, of Sir Astley Cooper. It then descends along the neck, deeply seated on the outside of the carotid artery and the internal jugular vein. When it has attained the lower part of the neck, it enters the chest, gliding behind the subclavian vein, and passing on the right side, in front of the subclavian artery, and, on the left, before the arch of the aorta. It proceeds, at first, backwards, increasing in size. Afterwards, it passes from behind the bronchia to the œsophagus, which it accompanies through the diaphragm, and terminates on the stomach. In the neck, the pneumogastric nerve anastomoses with the spinal, glosso-pharyngeal, great hypo-glossal, and great sympathetic nerves; and furnishes, 1, a *pharyngeal branch*, 2, a *superior laryngeal*, 3, *cardiac branches*. In the chest, it

gives off, 1, the *inferior laryngeal*, or *recurrent*, 2, the *pulmonary plexus*, and, 3, the *œsophageal branches*. On entering the abdomen, the œsophageal branches, which terminate the pneumogastric, are distributed upon the stomach, and give numerous filaments to that viscus, to the hepatic, cœliac, gastro-epiploic, and solar plexuses. Some go, also, to the pancreas, liver, gall-bladder, duodenum, &c.

PNEUMOG'RAPHY, *Pneumogra'phia*, from πνευμων, 'the lung,' and γραφη, 'a description.' The part of anatomy that describes the lungs.

PNEUMOLITHI'ASIS, from πνευμων, 'lung,' and λιθιασις, 'formation of stone.' A morbid state in which calculi form in the lungs.

PNEUMOL'OGY, *Pneumolog''ia*, from πνευμων, 'the lung,' and λογος, 'a discourse.' An anatomical treatise on the lungs. An anatomical description of the lungs.

PNEUMOMETER, Spirometer.

PNEUMOM'ETRY, *Pneumomet'ria*, from πνευμων, 'the lung,' and μετρον, 'measure.' Measurement of the capacity of the lungs for air. See Spirometer.

PNEUMON, Pulmo.

PNEUMONALGIA, Angina pectoris.

PNEUMONATELECTASIS, Atelectasis pulmonum.

PNEUMONÉCROSIE, Necro-pneumonia.

PNEUMONECTASIS, Emphysema pulmonum.

PNEUMONEMPHRAX'IS, from πνευμων, 'the lung,' and εμφραξις, 'obstruction.' Congestion and infarction of the lungs.

PNEUMO'NIA, *Peripneumo'nia*, *Empres'ma pneumoni'tis*, *Pleumo'nia*, *Peripneumo'nia*, *Pneumoni'tis*, *Pulmo'nia*, *Pulmona'ria*, *Inflamma'tio pneumon'ica*, *I. pec'toris acu'ta* seu *pulmo'num*, *Pneumos'tasis*, *Fébris pneumon'ica*, *Pneu'mony*, *Peripneu'mony*, *Inflammation of the Lungs*, *Lung-fever* (vulgarly), (F.) *Inflammation des poumons*, *Fièvre pneumonique* ou *péripneumonique*, *Fluxion de poitrine*, *Inflammation du parenchyme pulmonaire*. From πνευμων, 'the lung.' The chief symptoms of pneumonia are: — pyrexia, accompanied by pain, sometimes obtuse, at others pungent,—in some part of the thorax; pulse more or less quick and hard, according to the violence and extent of the local disorder; pain, aggravated by the cough, which, with dyspnœa, exists throughout the disease. At first, the expectoration is difficult and painful; but, in the course of a few days, it becomes free, and the oppression of breathing is mitigated. When the inflammation, instead of going off by resolution, passes on to suppuration, rigors are experienced; the respiration becomes more oppressed, but less painful, and a sense of weight is felt in one of the pleuræ. Pneumonia may, also, terminate by gangrene—but this rarely happens,— by induration and by hepatization.

Physical Signs. First Stage, (F.) *Engouement.* Diminution of the sound is generally observed over the affected part on percussion; auscultation exhibits an equal, dry, crepitating *râle*, which is best heard at the close of a deep inspiration, and on coughing. The respiratory murmur is intermingled with the crepitant *râle*, or it may be absent. In the neighbourhood of the affected parts it is natural or puerile. The voice and cough are rather more resonant than usual. Second Stage, (F.) *Hépatisation rouge.* When *hepatization* has occurred, the motion of the affected side is impeded, and immediately above the sternum and in the corresponding triangular space on either side, there is often an evident depression. Percussion is dull over the affected part in every position of the patient. On auscultation, the crepitation is found to be replaced by bronchial respiration. The respiratory murmur is louder in the other portions of the lung, the voice and cough are more resonant, and the heart's action is more distinct. Third Stage, (F.) *Hépatisation grise.* When suppuration supervenes, the same signs persist; but usually the voice and cough are less resonant, and a coarse, mucous *râle* is heard. When gangrenous or suppurative cavities are formed, they present the ordinary signs.

The prognosis must be guarded. It is not a disease which we can always subdue. Great extent of inflammation; very considerable oppression; orthopnœa, and difficult expectoration are unfavourable symptoms. The most active treatment is of course necessary. General bleeding forms the sheet anchor,—employed so as to make a decided impression on the system, and repeated, if necessary; local blood-letting; nauseating doses of antimonials; purgatives; and when the violence of the inflammation has been got under, — counter-irritants, &c. Chronic pneumonia sometimes succeeds the acute, and, at others, occurs accidentally. It must be managed on general principles. Small bleedings, especially locally; and counter-irritants of all kinds are indicated.

Pneumonia Biliosa, P. bilious.

Pneumonia, Bil'ious, *P. bilio'sa*, *Pneumocholo'sis*. Inflammation of the lungs, accompanied by gastric fever, and not uncommonly by typhoid symptoms;—*Pneumotyphus*, *Pneumo'nia typhoï'des* seu *typho'des* seu *typho'ea*, *Putrid*, *typhoid*, *adynamic*, or *erysipel'atous pneumo'nia*.

Pneumonia, Erysipelatous, P. bilious — p. Gangrænosa, Necropneumonia — p. Hypostatica, Pneumonypostasis — p. Intermittens, Pneumotyposis—p. Lobular, see Lobular — p. Notha, Peripneumonia notha—p. Pleuritis, Pleuropneumonia —p. Putrid, P. bilious — p. Typhodes, P. bilious — p. Typhoid, P. bilious — p. Typhosa, P. bilious, Necropneumonia—p. Vesicular, Bronchitis, vesicular.

PNEUMONIC, Pulmonic.

PNEUMON'ICA. From πνευμων, 'the lung.' Diseases affecting the lungs, their membranes or motive power; characterized by irregular, impeded, or painful respiration. The second order of the class Pneumatica of Good.

PNEUMONIC'ULA, diminutive of pneumonia. A slight inflammation of the lung.

PNEUMONICUS, Pulmonic.

PNEUMONIE, Pneumonia — *p. Disséminée*, see Lobular — *p. Lobulaire*, see Lobular — *p. Mamelonnée*, see Lobular.

PNEUMONIE DES AGONISANTS, *Pneumonie hypostatique*. The hyperæmic engorgement, which takes place in the lungs during the last moments of life, has been so termed. It would seem to be hyperæmia rather than inflammation.

PNEUMONIT'IC, *Pneumonit'icus*. Of, or belonging to pneumonitis, or inflammation of the lungs.

PNEUMONITIS, Pneumonia.

PNEUMONOCARCINO'MA, from πνευμων, 'the lung,' and καρκινωμα, 'cancer.' Cancer of the lungs.

PNEUMONOCE'LE, from πνευμων, 'the lung,' and κηλη, 'rupture.' Hernia of the lung.

Pneumonoce'le Diaphragmat'ica Inter'na. Hernia of the lung through the diaphragm.

Pneumonocele Exter'na seu Thorac''ica. Hernia through the parietes of the chest.

PNEUMONOCELE THORACICA, Pn. externa.

PNEUMONŒDEMA, Œdema of the lungs.

PNEUMONOMELANOSIS, see Melanosis.

PNEUMONOMETER, Spirometer.

PNEUMONOPHTHISIS, Phthisis pulmonalis.

PNEUMONOPHTHOE, Phthisis pulmonalis.

PNEUMONOPLEURESIS, Pleuroperipneumony.

PNEUMONOPLEURITIS, Pleuroperipneumony.

PNEUMONORRHAGIA, Hæmoptysis.

PNEUMONORRHŒA, Hæmoptysis.

PNEUMONOSCIR'RHUS, from πνευμων, 'the lung,' and σκιρρος, 'induration.' Induration of the lungs.

PNEUMONOSES, Pneumoses.

PNEUMONY, Pneumonia.

PNEUMONYPOS'TASIS, *Pneumo'nia hypostat'ica.* Pneumonia in a depending portion of the lung, caused by lying on the back.

PNEUMOPÉRICARDE, Pneumo-pericardium.

PNEUMO-PERICARD'IUM, *Pneumo-pericarditis, Pneumato'sis pericard'ii,* (F.) *Pneumopéricarde,* from πνευμα, 'air,' and περικαρδιον, 'pericardium.' Laënnec designates, under this name, the effusion of air into the cavity of the pericardium.

PNEUMOPHTHISIS, Phthisis pulmonalis.

PNEUMOPHYMATA, Tubercles of the lungs.

PNEUMOPLEURESIS, Pleuroperipneumony.

PNEUMOPTHOE, Phthisis pulmonalis.

PNEUMORRHAGIA, Hæmoptysis — p. Interna, Hæmatothorax.

PNEUMOSEPSIS, Necropneumonia.

PNEUMOSES, from πνευμων, 'the lung.' A term under which Alibert comprises every morbid affection of the lungs.

PNEUMOTHO'RAX, *Pneumatho'rax, Pneumatotho'rax, Emphyse'ma pec'toris, Asthma aërium* seu *emphysemat'icum, Dyspnœ'a pneumat'ica* seu *physothorac''ica, Physotho'rax, Aërotho'rax, Aëropleurie* (Piorry), from πνευμα, 'air,' and θωραξ, 'the thorax.' An accumulation of air in the cavity of the pleura. A complaint generally sudden in its invasion and fatal in its character. In many instances, along with the air, a liquid is effused,—*Hydropneumothorax.* The disease may be spontaneous and simple, but in a large proportion of cases it is complicated with pleurisy and pulmonary tubercles. The signs vary according as there is, or is not, a communication between the pleura and the bronchia. The affected side gives a hollow, tympanitic sound, even where the thickness of the parietes of the thorax is great. When the effusion is considerable, the affected side is dilated, but there is no *râle* of any kind. When a gaseous and a liquid effusion are present at the same time, the sound on percussion is found to be clear at the superior part of the thorax, but dull inferiorly; hence, by varying the position of the patient, and by consequence that of the contained fluids, the seats of the clear and the dull sound will be varied. When the gaseous effusion is owing to a fistulous communication between the pleura and bronchia, the metallic respiration and resonances are heard; and if there be both gaseous and liquid effusion, with a fistulous communication, in addition to these signs there is the *tintement métollique.* The presence of liquid can always be ascertained by succussion. See Emphysema of the lungs.

PNEUMOT'OMY, *Pneumotom'ia,* from πνευμων, 'the lung,' and τεμνω, 'I cut.' Dissection of the lungs.

PNEUMOTYPHUS, Pneumonia, typhoid.

PNEUMOTYPO'SIS, *Pneumo'nia intermit'tens,* from πνευμων, 'the lung,' and τυπος, 'a stamp, a type.' Pneumonia characterized by periodicity.

PNEUOBIOMANTIA, Docimasia pulmonum.

PNEUSIOBIOGNOSIS, Docimasia pulmonum.

PNEUSIOBIOSCOPE, Docimasia pulmonum.

PNEUSIS, Respiration — p. Pertussis, Pertussis — p. Singultus, Singultus — p. Tussis, Tussis.

PNEUSOMETER, Spirometer.

PNIGALION, Incubus.

PNIGMOS, Orthopnœa, Strangulation.

PNIGOPHOBIA, Angina pectoris, Suffocation.

PNIX, Orthopnœa, Strangulation.

PNOE, Aura.

PNŒUM. A nostrum of Dr. Samuel Hahnemann, the founder of the 'Homœopathic System,' which consisted — it is said — of borax only!

PNOOCOLYTICUS, Asthmatic.

POAD-MILK, Colostrum.

POCHE DES EAUX, see Liquor Amnii, and Parturition.

POCK, from Teut. pocca, *'pock* or little pouch.' A pustule of smallpox.

POCK-ARR, Pock-mark, see Cicatrix — p. Kine, Vaccina.

POCKFRETTEN, see Pockmark.

POCKHOLE, Pockmark.

POCKMARK, *Pockhole,* (Prov.) *Pock-arr, Scrobic'ulus* seu *Cica'trix Vari'olæ.* The mark or *pit* or *pitting* left from a smallpox pustule. One pitted with smallpox is said to be *pockfretten* or *pockfredden.*

POCKY. Infected with, or appertaining to, or resembling, smallpox or syphilis.

POC'ULUM ABSINTHIA'TUM. This was regarded, in remote ages, as a wholesome beverage; the *absinthium,* or 'wormwood,' being supposed to act as an antidote to drunkenness.

POCULUM AMATORIUM, Philter — p. Diogenis, Palm — p. Emeticum, Goblet, emetic.

POD'AGRA, *Podarthri'tis, Podorrhew'ma, Podal'gia,* from πους, ποδος, 'the foot,' and αγρα, 'seizure.' Pain which attacks the feet. Gout, situate in the articulations of the foot. It has, also, been used in a more extensive signification synonymously with *gout.*

PODAGRA ABERRANS, Gout, (wandering) — p. Arthritis, Gout — p. Retrograda, Gout, (retrograde.)

PODAGRARIA. Ligusticum podagraria — p. Ægopodium, Ligusticum podagraria.

PODAG'RIC, *Podag'rical, Podag'ricus, Arthrit'icus, Arthrit'ic, Gouty,* (F.) *Goutteux.* Relating or belonging to gout. Affected with, or liable to gout.

PODALGIA, Gout, Podagra.

PODALYRIA TINCTORIA, Sophora tinctoria.

PODANENCEPHALIA, see Podencephalus.

PODARTHRITIS, Podagra.

PODARTHROC'ACĒ, from πους, ποδος, 'the foot,' αρθρον, 'an articulation,' and κακος, 'bad.' Caries of the articulation of the foot.

PODENCEPHALIA, see Podencephalus.

PODENCEPH'ĀLUS, *Podanencepha'lus,* from πους, ποδος, 'the foot,' and κεφαλη, 'the head.' A monster whose brain is placed outside the skull, and seems to be supported on a pedicle, which traverses the summit of the skull. This state of

monstrosity is termed *Podanencepha'lia*, or more properly, *Podencepha'lia*.—I. G. St. Hilaire.

PODEX, Anus, Nates.

PODŒDE'MA, from πους, ποδος, 'foot,' and οιδημα, 'a swelling.' Œdema of the foot.

PODOL'OGY, *Podolog''ia*, from πους, ποδος, 'the foot,' and λογος, 'a discourse.' A description of the foot. A treatise on the foot.

PODOPHYL'LUM PELTA'TUM, *Podophyll'lum, Anapodophyll'um Canadense, May-apple, Mandrake. Ord.* Berberidaceæ. *Sex. Syst.* Polyandria Monogynia; from πους, ποδος, 'a foot,' and φυλλον, 'a leaf,' in reference to the shape of the leaf. A common plant throughout North America. The fruit is eatable, and esteemed by many. The leaves are said to be poisonous. The root or rhizoma, *Podophyllum* (Ph. U. S.), is purgative in the dose of 20 grains. It has also been used as an anthelmintic.

PODOPHYLLUM MONTA'NUM, *Mountain May-apple, Mandrake, Wild Lemon, Duckfoot, Raccoon Berry, Yellow Berry, Ground Lemon*, has the same properties.

PODORRHEUMA, Podagra.

PODOTHE'CA, from πους, ποδος, 'a foot,' and θηκη, 'a receptacle, a sheath.' The cuticle of the foot. An anatomical preparation. *Chirothe'ca*, has been used for the cuticle of the hand.

POËLETTE, Cup, *Palette*.

POË'PHAGUS, from ποη, or ποα, 'a plant, an herb,' and φαγω, 'I eat.' One who subsists on herbs or vegetables. The act of subsisting or feeding on herbs or vegetables is called *Poëphag''ia*. Hence Strabo calls the Irish ποηφαγοι.

POGON, Beard.

POGONI'ASIS, *Pogo'nia*, from πωγων, 'the beard.' A female beard. Also, great strength or quantity of beard. A female having a beard —*Vira'go*.

POGO'NIUM, πωγωνιον, diminutive of πωγων, 'beard.' A weak or small beard.

POGONOL'OGY, *Pogonolog''ia*, from πωγων, 'a beard,' and λογος, 'a description.' A description of, or treatise on, the beard.

POGOSTEMON INTERMEDIUS, P. Patchouli.

POGOSTE'MON PATCHOULI, *P. Suavis* seu *interme'dius, Pucha-Pat, Patchouli. Nat. Ord.* Labiatæ. Native of Penang and the Malayan peninsula. The oil is used as a perfume. The distilled oil is used for the same purpose.

POGOSTEMON SUAVIS, P. Patchouli.

POHON ANTIAR, Upas—p. Upas, Upas.

POI. A favourite aliment in the Sandwich Islands. It is a sort of paste made from the root of the Kalo—*Arum esculen'tum*.

POIDS ET MÉSURES, Weights and measures.

POIGNÉE, Manipulus.

POIGNET, Carpus.

POIL, Galactocele, Hair.

POILETTE, Cup.

POILS, see Typha latifolia.

POING, Fist.

POINT, Stitch.

POINT, BLISTERING. A name given by Dr. Rush to an indeterminate period in the course of a continued fever, intermediate between the stages of high excitement and collapse, in which blisters will—he thought—usually produce unequivocally good effects.

POINT DE COTÉ, Pleurodynia.

POINTS LACRYMAUX, Lachrymalis puncta.

POIRE, see Pyrus communis.

POIREAU, Allium porrum, Verruca.

POIRIER, Pyrus communis.

POIS, Pisum—*p. à Cautère*, see Fonticulus—*p. Chiche*, Cicer arietinum—*p. Cultivé*, Pisum—*p. à Gratter*, Dolichos pruriens—*p. Patate*, Dolichos tuberosus.

POISON, *Phar'macon, Phar'macum, Tox'icum, Vene'num, Virus, Delete'rium, Venena'tion*, (F.) *Poison*. A generic name for all substances which, when introduced into the animal economy, either by cutaneous absorption, respiration, or the digestive canal, act in a noxious manner on the vital properties or the texture of organs. Hence we speak of *fever poison, cholera poison*, &c. Poisons exist in the three kingdoms of nature; but those which proceed from animals are often called *venoms*, as the venom of the viper, scorpion, tarantula, &c.; whilst those that are the products of disease have the name *virus*. In common parlance, therefore, *poison* is restricted to delcterious articles, furnished by the mineral and vegetable kingdoms. Orfila has divided poisons into four classes. 1. ACRID, IR'RITATING, CORRO'SIVE, or ESCHAROT'IC, such as the concentrated acids and alkalies; mercurial, arseniacal, cupreous, and antimonial compounds, cantharides, &c. 2. NARCOT'IC; those that act particularly upon the brain; as hyoscyamus, opium, &c., but without inflaming the organ with which they come in contact. 3. NARCOT'ICO-ACRID or ACRONARCOT'IC;—those that act on the brain, but, at the same time, irritate the parts to which they are applied; as aconite, belladonna, &c. 4. SEPTIC or PUTRES'CENT;—those furnished by the animal kingdom. See Venom and Virus. Various classifications, of a similar character, have been recommended by different toxicologists; but they are liable to the objection, that they throw substances together whose physiological action on the system is very different. It is, indeed, difficult to avoid unnatural compression of matters into places not properly belonging to them, in all such arrangements.

The following table, which exhibits a *coup d'œil* of the chief poisons, with most of the circumstances of importance connected with them, is not free from these objections

TABLE, EXHIBITING THE SYMPTOMS, TREATMENT, AND MODE OF DETECTING THE VARIOUS POISONS, MINERAL, VEGETABLE AND ANIMAL.

N. B. In all cases the Stomach-Pump should be used as soon as possible.

I. INORGANIC POISONS.

Poisons.	Symptoms.	Treatment.	Tests.
ACIDS. *Acetic Acid.* *Citric Acid.* *Muriatic Acid.* *Nitric Acid.* *Sulphuric Acid.* *Tartaric Acid.* *Oxalic Acid.*	The acids, generally, are strong corrosive poisons. Sour, acrid taste, burning in the throat, which is increased by pressure, swallowing, or coughing; eructation, and excruciating pain in the stomach; more or less corrugation of the lining membranes of the mouth and primæ viæ; excoriation about the mouth or such other parts of the skin as the acid may have touched. The matter vomited effervesces with carbonate of lime. The countenance becomes glazed, extremities cold and clammy; convulsions and death. Nitric acid occasions yellow stains, and sulphuric acid, black.	The carbonates of soda, potassa, lime and magnesia, are all antidotes to the acids; calcined magnesia also. They are to be used with the following restrictions: for the acetic, citric, muriatic, sulphuric, and tartaric acids, they may be used indiscriminately. For the nitric and oxalic, carbonates of magnesia and lime can alone be employed with safety. In the case of sulphuric acid, water should not be drunk, on account of the great heat which is produced by their mixture. Subsequent inflammation to be treated by ordinary means. The carbonates of the alkalies and of magnesia and lime have the inconvenience, that a large quantity of gas is extricated in the stomach.	*Sulphuric acid* is known by a white precipitate with any salt of baryta, insoluble in nitric acid. *Muriatic acid* is known by a white precipitate with nitrate of silver, insoluble in nitric acid, which turns black by the action of light. *Nitric acid* gives rise to orange-coloured fumes, when copper is placed in it, and an ability to dissolve gold when mixed with muriatic acid. *Acetic acid* exhales the odour of vinegar. *Citric acid* blackens when heated. *Tartaric acid* precipitates crystals, with a solution of potassa; and a white precipitate is thrown down by lime-water. *Oxalic acid* gives a white precipitate with lime-water, which, when heated, is converted into carbonate of lime.
Prussic Acid. *Oil of Bitter Almonds.* *Laurel Water.*	Is a sedative poison; nausea, giddiness, debility, hurried pulse, weight and pain in the head; eructations having the flavour of the acid; spasms, tetanus, contractile pupil; convulsions, death.	Ammonia is an antidote; but it should not be employed in a very concentrated form. Liquid chlorine has also been found efficacious. The cold *douche* to the head has been recommended.	*Prussic acid* exhales the odour of peach-kernels; forms a white precipitate with nitrate of silver neutralized with an alkali, gives a blue precipitate with the persalts of iron.
ALKALIES and their SALTS. Ammonia, *Strong Liquor* or *Water of.* *Muriate of Ammonia* or *Sal Ammoniac.* Potassa. *Caustic Potassa*, and *Liquor Potassæ.* *Carbonate of Potassa*, or *Pearl Ash*, and *Salt of Tartar.* *Nitrate of Potassa* or *Saltpetre.* *Sulphuret of Potassium* or *Liver of Sulphur.* Soda.	Violent, caustic, acrid taste; great heat in the throat, with destruction of its lining membrane; difficult and painful deglutition; vomiting of bloody matter, which turns the yellow of turmeric brown; acute pain in the stomach; cold sweats, weakness, hiccough; violent colic pains, with purging of bloody stools and membranous flakes; death. The nitrate of potassa will not manifest the effect with turmeric paper. The carbonates, when vomited, will effervesce with acids; and the liver of sulphur will give rise to eructations of sulphuretted hydrogen.	The vegetable acids, such as vinegar, lemon juice, citric and tartaric acid in solution are antidotes to the alkalies and their carbonates. The fixed oils, such as castor, linseed, almond and olive, form soaps with the free alkalies, and therefore destroy their caustic effects. Poisoning by nitrate of potassa to be treated on general antiphlogistic principles; mucilaginous drinks. Liver of sulphur is said to be decomposed and neutralized by common salt. The liquid chloride of soda will also decompose it.	The alkalies are known by their action on turmeric paper: restoring the colour of litmus, which has been reddened by an acid. Carbonates are known by their effervescence with an acid; some of them affect the turmeric paper. Sal ammoniac gives out the pungent odour of ammonia, when mixed with quicklime. Nitrate of potassa decrepitates and deflagrates when thrown on hot coals. Liver of sulphur emits the odour of sulphuretted hydrogen when dissolved, or when treated with an acid.
EARTHS and COMPOUNDS. Baryta. *Carbonate of Baryta.* *Chloride of Barium.* *Nitrate of Baryta.* Lime.	Analogous to those of the corrosive metals. Violent burning in the stomach, vomiting, gripes, diarrhœa; excessive muscular debility, headache, convulsions, death. Lime differs from baryta in being a pure irritant.	The sulphates of soda and magnesia are prompt and effective antidotes to all the poisonous salts of baryta. Phosphate of soda will also counteract their effects. Lime may be neutralized by dilute acids. Carbonic acid, in soda-water, effervescing draught or yeast, it is supposed, would answer a good purpose. The fixed oils may be employed either for baryta or lime, when not in a compound state.	Baryta and its salts invariably give a white precipitate, insoluble in acid, with a soluble sulphate, Lime, when dissolved, gives a white precipitate with oxalic acid. Also with carbonic acid or a soluble carbonate. The same of baryta.

Poisons.	Symptoms.	Treatment.	Tests.
ALCOHOL. *Brandy, Wines, and all Spirituous Liquors.*	Intoxication, and when taken very freely, complete insensibility, with apoplexy or paralysis of one side; the countenance swollen and of a dark-red colour; the breathing difficult, and often stertorous, with a peculiar puffing out of the lips; the breath smells of liquor, which will distinguish the symptoms from those of spontaneous apoplexy.	A powerful emetic of white vitriol, or tartar emetic, should be got into the stomach as soon as possible; and if the person has lost the power of swallowing, a flexible catheter or tube should be the means of conveying it thither. The vomiting should be encouraged as much as possible with warm water; and large and active glysters of salt and water should be thrown up. The patient should be placed erect, and if the countenance and other appearances be not improved after these means have been used, the jugular vein may be opened, and cold wet cloths applied to the head, particularly if the body be hotter than natural. If the extremities become cold, warmth and friction should be perseveringly used.	
VOLATILE OILS. *Creasote.* *Dippel's Animal Oil.* *Oil of Tar.* *Oil of Tobacco.* *Oil of Turpentine.* *Fusel Oil.*	General action, that of irritant poisons. Burning pain, vomiting, pungent taste, purging, &c. The oils of turpentine and tobacco affect the nervous system; the peculiar odour of each oil will be manifested in the matter vomited.	Creasote is immediately coagulated by albumen. Dippel's animal oil may be counteracted with dilute acids and the fixed oils. The other oils have no particular antidotes, and their effects must, therefore, be counteracted upon general principles.	No better mode of recognizing these substances exists, than that derived from their peculiar odour. Dippel's oil has the pungent odour of ammonia; creasote and oil of tar, a peculiar smell of smoke; the odour of tobacco and turpentine are well known; and fusel oil has a peculiar, offensive, suffocating odour.
GASES. *Carbonic Acid*, or *Fixed Air.* *Carbonic Oxide.* *Fumes of Burning Charcoal.* *Chlorine.* *Sulphuretted Hydrogen.*	Chlorine produces, when inhaled, violent irritation of the organs of respiration; cough, bloody expectoration, inflammation of the lungs, and permanent pulmonary disease. The other gases, although producing some effect on the respiratory organs, act as poisons, in consequence of their sedative agency. The symptoms, therefore, are those of apoplexy, or narcotic poisoning.	The antidotes to chlorine are the cautious inhalation of ammonia, or sulphuretted hydrogen. The inflammatory symptoms from chlorine to be treated on general principles. For the other gases, cold affusions to the head, blood-letting, artificial respiration.	Chlorine is recognized by its peculiar odour and bleaching properties. Sulphuretted hydrogen, by its fetid smell, and the rapid blackening of lead. Carbonic acid, by its occasioning turbidness in lime-water placed in its atmosphere. Carbonic oxide, by the blue colour of its flame.
IODINE. *Iodide of Potassium.*	Irritant symptoms; burning pain in the throat, lacerating pain in the stomach, and fruitless efforts to vomit; suffusion of the eyes; excessive pain and tenderness of the epigastrium.	Iodine combines with starch, and forms an insoluble compound. The prompt administration of starch, wheat flour, or other vegetable matter containing fecula, beat up in water, is recommended. Iodide of potassium has no antidote. Vomiting should be promoted by draughts of warm water, and inflammation be subdued by general treatment.	Iodine is known by its odour, and the formation of a blue precipitate, when brought in contact with a cold solution of starch. Iodide of potassium gives a crystalline precipitate, with tartaric acid in excess. The supernatant fluid will give the blue colour to starch.
METALS. Antimony. *Tartar Emetic.* *Chloride*, or *Butter of Antimony.* *Oxide of Antimony.*	Vomiting. If vomiting do not occur promptly, violent irritant effects are produced. Burning pain in the pit of the stomach; Purging; colicky pains, sense of tightness in the throat, violent cramps; repeated recurrence of vomiting.	If vomiting have not been produced, it should be brought about by tickling the fauces, and administering copious draughts of warm water. Astringent infusions, such as of galls, oak bark, Peruvian bark, act as antidotes, and should be given promptly; powdered yellow bark may be used, until the infusion is prepared.	Antimony in solution is best distinguished by the peculiar orange-red precipitate, which it forms with sulphuretted hydrogen or solutions of the hydrosulphates. Free alkalies produce white precipitates. The muriate is known by a white precipitate, when it is poured into water. In its solid forms, it may be known by the formation of white fumes, when heated, which redden litmus. It may also be converted into chloride, and then precipitated by adding water.

Poisons.	Symptoms.	Treatment.	Tests.
Arsenic. *Arsenious Acid, or White Arsenic.* *Orpiment, or Yellow Sulphuret of Arsenic.* *King's Yellow.* *Realgar, or Red Sulphuret of Arsenic.* *Fly Powder.* *Fowler's Solution.* *Arsenical Paste.* *Arsenical Soap.* *Arsenite of Copper, Scheele's Green.*	Violent burning pain in the region of the stomach and bowels; tenderness on pressure; retching: vomiting; sense of dryness and tightness in the throat; thirst; hoarseness and difficulty of speech; the matter vomited, greenish or yellowish, sometimes streaked with blood; diarrhœa; tenesmus; sometimes excoriation of the anus; urinary organs occasionally affected with violent burning pains and suppression; convulsions and cramps; clammy sweats; lividity of the extremities; countenance collapsed; eyes red and sparkling; delirium; death.	The hydrated peroxide of iron diffused through water; or the precipitated carbonate; or the rubigo ferri, in very fine powder, to be administered every five or ten minutes, until relief is obtained. This is particularly efficacious when the *white arsenic* has been swallowed. If the arsenic have been taken in the form of Fowler's Solution, lime-water, in copious draughts, may be given. For either of the other forms, emetics of sulphate of zinc; diluents; demulcents, such as flaxseed tea, infusion of slippery elm, &c. Counter-irritants may be used to relieve the spasm, and violent pain in the stomach. Bleeding, as promoting absorption, should not be employed until the stomach is completely evacuated.	If the suspected substance can be obtained free from organic matter, the presence of arsenic may readily be shown by boiling it in distilled water, filtering, and testing with, 1st. Ammoniaco-sulphate of copper. 2d. Ammoniaco-nitrate of silver. (*Hume's Test*) 3d. Sulphuretted hydrogen gas. The first will produce a *green* precipitate; second, a *pale yellow* precipitate; third, a *bright yellow* precipitate, if arsenic be present. A portion of the powder, or one of these precipitates, carefully and thoroughly dried, is then to be mixed with charcoal and exsiccated carbonate of soda, to be placed in a small glass tube, closed at one end, and then to be heated to a red heat in the flame of a lamp. The arsenic will be reduced, and sublime in the upper part of the tube, forming a dark crust, having considerable lustre on its exterior surface, resembling polished steel. By gently heating this crust in a very small flame, crystals of white arsenic will be formed, having a high adamantine lustre. If organic matter be present, it must be entirely destroyed, by heating the substance with nitro-muriatic acid. After this has been done, and a clear, transparent solution in distilled water has been obtained, the subsequent process is as above indicated. If arsenious acid be submitted to the action of nascent hydrogen, it is deoxidized, and the metallic arsenic, thereby obtained, combining with hydrogen, forms arsenuretted hydrogen gas. (*Marsh's Test.*) Add to a suspected solution a few drops of pure chlorohydric acid, and place in it a slip of bright copper; no change occurs until the liquid is brought to the boiling point, when, if arsenic be present, even in small quantity, the copper acquires an iron-gray coating, from the deposit of that metal. Remove the slip of copper; wash it in water, dry it and gradually heat it in a reduction tube, when arsenious acid will be sublimed in minute octohedral crystals. The test succeeds with powdered arsenic, the arsenites, arsenic acid, the arseniates, and orpiment. It will even separate the arsenic from arsenite of copper, and from common lead-shot. *Reinsch's Test.*
Bismuth. *Nitrate of Bismuth.* *Pearl Powder.* *Oxide of Bismuth.*	Similar to those produced from other irritant poisons. General inflammation of the whole alimentary canal; suppression of urine; hiccough, disagreeable metallic taste; vomiting; cramps; delirium: death.	Milk, and sweet mucilaginous drinks are recommended. Leeches, general bleeding; glysters; fomentations to be employed on the general principles of treatment for inflammatory symptoms.	Bismuth is known by the formation of a white precipitate, when its solution in nitric acid is poured into water; and by the formation of a black precipitate with sulphuretted hydrogen gas, and hydrosulphates in solution.
Copper. *Sulphate of Copper Blue Vitriol.* *Acetate of Copper, Verdigris.* *Carbonate of Copper, Blue Verditer.* *Arsenite of Copper Scheele's Green.* *Food cooked in dirty copper vessels, or pickles made green by copper.*	Very similar to those produced by arsenic. Coppery eructations and taste. Fatal cases are generally terminated by convulsions, palsy, insensibility.	Albumen to be administered in either of its forms which can be most readily obtained, as milk or whites of eggs. Vinegar should *not* be given. The inflammatory symptoms are to be treated on general principles, and so of the nervous.	The presence of copper is readily shown in solutions. By ammonia a beautiful bluish precipitate is thrown down, which dissolves in an excess of the precipitant, and the solution has a rich blue colour. A bright iron bar, introduced into solutions of copper, occasions the separation of the copper, in a metallic form, which deposits itself upon the iron.

Poisons.	Symptoms.	Treatment.	Tests.
Gold. *Chloride of Gold.* *Fulminating Gold.*	Very analogous to those of other irritant poisons. This substance communicates a pink stain to the flesh, and patches of that colour may be found about the lips, and inside the mouth.	The salts of gold are decomposed by sulphate of iron; and this has, therefore, been recommended as an antidote. Inflammatory symptoms to be treated on general principles.	Chloride of gold is very readily decomposed, and the gold separated in a metallic state. Protosulphate of iron, nitrate of silver and protochloride of tin, all answer this purpose. The precipitated powder will be found insoluble, except in nitro-muriatic acid.
Iron. *Sulphate of Iron, Copperas, Green Vitriol.* *Chloride of Iron.*	Symptoms of irritant poisoning; colic pains, constant vomiting and purging. Violent pain in the throat, tension of the epigastrium, coldness of the skin, and feebleness of the pulse.	Carbonate of soda would be a most excellent antidote to either of these substances. Mucilaginous drinks might also be employed; and particular symptoms relieved by general treatment.	Iron is recognised by a bluish-black precipitate, with tincture of galls; rich blue, with prussiate of potassa; and a greenish or reddish precipitate, with the free alkalies or their carbonates.
Lead. *Acetate of Lead, Sugar of Lead.* *Carbonate of Lead, White Lead.* *Red Oxide, or Red Lead.* *Litharge.* *Wines sweetened by Lead.* *Water which has been kept in Leaden vessels.* *Acid food, cooked, or left standing in vessels glazed with Lead.*	Irritation of the alimentary canal; spasm; nervous symptoms; paralysis, either partial or complete. When taken for some time, in small quantity, violent and obstinate colic; rigidity of abdominal muscles, cramps; remission of pain; obstinate constipation, urine diminished, saliva increased; countenance anxious and gloomy. If relief be not promptly obtained, giddiness, debility, torpor, coma, convulsions and death. The paralysis affects generally the upper extremities.	Sulphate of magnesia and phosphate of soda are both good antidotes for the soluble salts of lead. For the solid forms, dilute sulphuric acid may be drunk. These are applicable to the irritant forms of poisoning by lead. In the chronic form, or colica pictonum, purgatives and anodynes are resorted to; venesection; and external applications to relieve the cramps. The use of strychnia is recommended for the paralysis.	Soluble salts of lead yield a white precipitate with sulphates and carbonates in solution. Salts of chromic acid and iodide of potassium occasion a yellow precipitate. Sulphuretted hydrogen, a black precipitate. If solid, the lead may be converted into a state of solution by nitric acid, and the dilute solution be tested as above.
Mercury. *Corrosive Sublimate.* *Cyanide of Mercury.* *Nitrate of Mercury.* *White Precipitate.* *Red Oxide*, or *Red Precipitate.* *Sulphate*, or *Turbith Mineral.* *Vermilion*, or *Red Sulphuret.*	Violent symptoms of irritant poisoning; harsh metallic astringent taste; burning pain in the stomach; vomiting and purging frequently of bloody matter; often irritation of the urinary organs, and sometimes suppression; tightness and burning in the throat, occasionally so great as to prevent speech; countenance not always pale, but sometimes flushed; tendency to doze; stupor, convulsions and death.	Albumen, in some form, must be promptly administered; either white of eggs beaten up with water, milk, or wheat flour beaten up. The inflammatory symptoms to be counteracted by the usual means. Gold, finely mixed in dust, with fine iron filings. (?)	The free alkalies differ in their precipitates from solutions of mercury. Potassa gives, with corrosive sublimate, a yellowish one; ammonia, a white; lime-water, an orange; and sulphuretted hydrogen, a black. If a drop of the solution be placed on a piece of gold, and touched with a knife or key, the mercury will be reduced, which amalgamates with the gold, producing a white spot. The nitrate of mercury gives a black precipitate with the free alkalies. All the solid forms of mercury are volatile, and may be reduced by heating them in a glass tube with charcoal and carbonate of soda, when the metallic mercury will sublime, and may be collected in a globule.
Silver. *Nitrate of Silver*, or *Lunar Caustic.*	Those of other irritant poisons.	Chloride of sodium, or common salt, immediately decomposes this substance, and destroys its activity. Antiphlogistic treatment is to be employed for the inflammatory symptoms.	Nitrate of silver is distinguished by the formation of a white precipitate, insoluble in nitric acid, with chloride of sodium; a gray precipitate with ammonia, which is redissolved in an excess of ammonia; yellow precipitate with phosphate of soda. The precipitate of chloride of silver, obtained by adding muriate of soda to the nitrate of silver, is readily reduced, and the metallic silver obtained, by mixing it with dilute sulphuric acid and granulated zinc.
Tin. *Chloride of Tin.* *Solution of Tin, used by Dyers.* *Oxide of Tin*, or *Putty Powder.*	The same as those from other irritant poisons, and a peculiar tanned appearance of the villous coat of the stomach.	Milk to be given copiously, and the subsequent treatment to be regulated by the symptoms.	The chloride precipitates vegetable colouring matter; also albumen and gelatin. The white oxide is precipitated from its solution by free alkalies; with sulphuretted hydrogen gas, a brown precipitate.
Zinc. *Sulphate of Zinc, White Vitriol.* *Acetate of Zinc.*	Violent vomiting; astringent taste, burning pain in the stomach; pale countenance; cold extremities; dull eyes; fluttering pulse. Death seldom ensues, in consequence of the emetic effects.	The vomiting may be relieved by copious draughts of warm water. Carbonate of soda, administered in solution, will decompose the sulphate of zinc. Milk and albumen also act as antidotes. General principles to be observed in the subsequent treatment.	A white precipitate is thrown down by the free alkalies from the soluble salts of zinc, which becomes yellow when strongly heated—recovering its white colour on cooling. Sulphuretted hydrogen occasions a white precipitate.

Poisons.	Symptoms.	Treatment.	Tests.
PHOSPHORUS.	Symptoms of irritant poisoning; pain in the stomach and bowels; vomiting, diarrhœa, tenderness and tension of the abdomen.	An emetic to be promptly administered; copious draughts containing magnesia in suspension; mucilaginous drinks; general treatment for inflammatory symptoms.	Phosphorus is known by its ready inflammability, luminousness at ordinary temperatures, and alliaceous odour.
GLASS or ENAMEL.	If taken in very coarse powder, it produces irritation and inflammation of the bowels.	Large quantities of crumb of bread should be eaten, to envelop the particles. (?) An emetic of sulphate of zinc should then be given, and vomiting be promoted by demulcent drinks.	

II. ORGANIC POISONS.

I. VEGETABLE POISONS.

Irritant Poisons.	Symptoms.	Treatment.
Anemone *pulsatilla*. Wind Flower. Arum *maculatum*. Wake Robin. Bryonia *dioica*. Bryony. Caladium *seguinium*. Dumbcane. Calla *palustris*. Water Arum. Caltha *palustris*. Marsh Marigold. Chelidonium *majus*. Celandine. Clematis *vitalba*. Virgin Bower. Convolvulus *jalapa*. Jalap. Convolvulus *scammonia*. Scammony. Croton *tiglium*. Purging Croton. Cucumis *colocynthis*. Colocynth. Cyclamen *Europæum*. Sow Bread. Daphne *gnidium*. Spurge Flax. Daphne *mezereum*. Mezereon. Delphinium *staphisagria*. Stavesacre. Dioica *palustris*. Swamp leather-wood. Equisetum *hyemale*. Scourgrass. Euphorbia *officinarum*. Euphorbium. Spurge. Gratiola *officinalis*. Hedge Hyssop. Hippomane *mancinella*. Mauchineel. Hura *crepitans*. Sand Box. Hydrocotyle *vulgaris*. Marsh Pennywort. Jatropha *curcas*. Indian Nut. Jatropha *manihot*. Cassada. Juniperus *sabina*. Savin (oil of). Juniperus *Virginiana*. Bed Cedar (oil of.) Momordica *elaterium*. Squirting Cucumber. Narcissus *pseudo-narcissus*. Daffodil. Pastinax *sativa*. Common Parsnep. Pedicularis *palustris*. Marsh Lousewort. Phytolacca *decandra*. Poke. Piper *cubeba*. Cubebs. Plumbago *Europæa*. Cerbera, three species. Cerbera. Chærophyllum *sylvestre*. Bastard Hemlock.	The general effects of this class of vegetable poisons are; — an acrid pungent taste, with more or less of bitterness, excessive heat, great dryness of the mouth and throat, with sense of tightness there; violent vomiting, the efforts being continued even after the stomach is emptied; purging, with great pain in the stomach and bowels; pulse strong, frequent, and regular; breathing often quick and difficult; appearances of intoxication; the pupil of the eye frequently dilated, insensibility resembling death; the pulse becomes slow and loses its force, and death closes the scene. If applied externally, many of them produce violent inflammation of the skin, with vesications or eruptions of pustules.	If vomiting have been occasioned by the poison, and the efforts are still continued, they may be rendered easier by large draughts of warm water, or thin gruel; but if symptoms of insensibility have come on without vomiting, it ought to be immediately excited by the sulphate of zinc, or some other active emetic substance, and after its operation a sharp purgative should be given. After as much as possible of the poison is got rid of, a very strong infusion of coffee, or vinegar diluted with water, may be given with advantage. Camphor mixture with ether may be taken frequently, and if insensibility be considerable, warmth, frictions, and blisters, may be employed. If inflammation or other dangerous consequences have been induced, they are to be treated upon general principles. The fruit of Feuillea Cordifolia has been recommended as a powerful antidote against vegetable poisons; it is to be used in as recent a state as possible. (?) N. B. Bromine, chlorine, and iodine are said to be antidotes to the alkaloids generally.

Veratrum *viride*. American Hellebore. Woorara. War Poison of Guiana. Zea *mays*. Maize (diseased).	The narcotic vegetable poisons, if taken into the stomach or applied to a wound, occasion the following effects:—stupor; numbness; heaviness in the head; desire to vomit, slight at first, but afterwards insupportable; a sort of intoxication, stupid air, pupil of the eye dilated; furious or lively delirium, sometimes pain; convulsions of different parts of the body, or palsy of the limbs. The pulse is variable, but at first generally strong and full; the breathing is quick, and there is great anxiety and dejection, which, if not speedily relieved, soon ends in death.	**The stomach to be effectually evacuated by giving four or five grains of tartar emetic, or from ten to twenty of the sulphate of zinc, repeated every quarter of an hour, till the full effect is produced. These means may be assisted by tickling the throat with a feather or the finger. Large and strong glysters of soap dissolved in water, or of salt and gruel, should be speedily administered, to clear the bowels, and assist in getting rid of the poison; and active purgatives may be given after the vomiting has ceased. When as much as possible of the poison has been expelled, the patient may drink, alternately, a tea-cupful of strong hot infusion of coffee, and vinegar diluted with water. If the drowsiness, which is sometimes extreme, and the insensibility bordering on apoplexy, be not remedied by these means, blood may be taken from the jugular vein, blisters may be applied to the neck and legs, and the attention be roused by every means possible. If the heat declines, warmth and frictions must be perseveringly used. Vegetable acids are on no account to be given *before* the poison is expelled, and it is desirable that but little fluid of any kind should be administered.** **N. B. Bromine, chlorine, and iodine are said to be antidotes to the alkaloids generally.**

Champignon.	**Nausea, heat, and pain** in the stomach and bowels, with vomiting and purging, thirst; convulsions, and faintings; pulse small and frequent; delirium; dilated	**The stomach and bowels to be cleared** by an emetic of tartarized antimony, followed by frequent doses of Glauber's or Epsom salt, and large, stimulating glysters. After the poison is evacuated, ether may be administered, with smal

Poisons.	Symptoms.	Treatment.
	pupil, and stupor; cold sweats, and death. Poisonous mushrooms may be distinguished from the edible by their botanical characters, and by the following criteria. The former grow in wet, shady places, have a nauseous odour; are softer, more open, and porous; have a dirty-looking surface, sometimes a gaudy colour, or many very distinct hues, particularly if they have been covered with an envelope; they have soft, bulbous stalks, grow rapidly, and corrupt very quickly.	quantities of brandy and water; but if inflammatory symptoms manifest themselves, such stimuli should be omitted, and other appropriate means be had recourse to.

2. ANIMAL POISONS.

	Symptoms.	Treatment.
POISONOUS FISH. Balistes *monoceros*. Old wife. Cancer *astacus*. Crawfish. Cancer *ruricolus*. Land Crab. Clupea *thryssa*. Yellow-billed Sprat. Coracinus *fuscus major*. Gray Snapper. Coracinus *minor*. Hyne. Coryphæna *splendens*. Dolphin. Mormyra. Blue Parrot Fish. Muræna *major*. Conger Eel. Mytilus *edulis*. Mussel. Ostracion *globellum*. SmoothBottleFish. Perca *major*. Barracuda. Perca *venenosa*. Grooper. Perca *venenata*. Rock Fish. Physalia. Portuguese Man of War. Scomber *cæruleus*. Spanish Mackerel. Scomber *maximus*. King Fish. Scomber *thynnus*. Bonetta. Sparus *chrysops*. Porgee. Tetrodon *scleratus*. Tunny. Tetrodon *ocellatus*. Blower.	In an hour or two, or often in a much shorter time, after the fish has been eaten, a weight at the stomach comes on, with slight vertigo and headache, sense of heat about the head and eyes, considerable thirst, and often an eruption of the skin (urticaria), and in many cases death.	An emetic should be speedily administered, or, in the absence of it, vomiting may be excited, by tickling the throat with the finger, and taking large draughts of warm water. After full vomiting, an active purgative should be given, to remove any of the noxious matter that may have found its way into the intestines. Vinegar and water may be drunk after the above remedies have operated, and the body may be sponged with the same. Water, made very sweet with sugar, to which ether may be added, may be drunk freely as a corrective, and a very weak solution of alkali has been recommended to obviate the effects of the poison. If spasm ensue; after evacuations, laudanum, in considerable doses, is necessary. If inflammation should occur, the usual means of removing it must be employed.
POISONOUS SERPENTS. Boa *crotaloides*. Copperhead. Cenchris *mockeson*. Mockeson. Cerastes *nasicornis*. Horned Viper of Western Africa. Coluber *berus*. Viper. Coluber *prester*. Black Viper. Crotalus, (5 species) Rattle Snake Scytale *piscivorus*. Water Viper.	A sharp pain in the wounded part, which soon extends over the limb or body; great swelling, at first hard and pale, then reddish, livid, and gangrenous in appearance; faintings, vomitings, convulsions, and sometimes jaundice; pulse small, frequent, and irregular; breathing difficult, cold sweats, the sight fails, and the intellectual faculties are deranged. Inflammation, and often extensive suppuration and gangrene, followed by death.	A cupping-glass to be applied over the wound, or a moderately tight ligature above the bites, and the wound left to bleed after being well washed with warm water; the actual cautery, lunar caustic, or butter of antimony, to be then applied freely to it, and afterwards covered with lint, dipped in equal parts of olive oil and spirit of hartshorn. The ligature to be removed if the inflammation be considerable. Warm, diluting drinks, and small doses of ammonia or hartshorn, to cause perspiration; the patient to be well covered in bed, and a little warm wine given occasionally. If gangrene be threatened, wine may be given more freely, and the bark should be had recourse to. Arsenic, the principal ingredient in the Tanjore Pill, has been strongly recommended.
CANTHARIS VESICATORIA. Spanish, or Blistering Fly. Lytta *vittata*. Potato Fly.	Nauseous odour of the breath; acrid taste; burning heat in the throat, stomach, and abdomen; frequent vomitings, often bloody, with copious bloody stools; excruciating pain in the stomach; painful and obstinate priapism, with heat in the bladder, and strangury or retention of urine; frightful convulsions, delirium and death.	Vomiting to be excited by drinking sweet oil, sugar and water, milk, or linseed tea, very freely. Emollient glysters should be administered, and if symptoms of inflammation of the stomach, kidney, or bladder supervene, they must be subdued by appropriate treatment. Camphor dissolved in oil may be rubbed over the belly and the thighs.
VENOMOUS INSECTS Tarantula. Scorpio. Scorpion. Vespa *crabro*. Hornet. Vespa *vulgaris*. Wasp. Apis *mellifica*. Bee. Culex *pipiens*. Gnat. Œstrus *bovis*. Gad-fly	In general, the sting of these insects occasions only a slight degree of pain and swelling; but occasionally the symptoms are more violent, and sickness and fever are produced by the intensity of the pain.	Hartshorn and oil may be rubbed on the affected part, and a piece of rag, moistened in the same, or in salt and water, may be kept upon it till the pain is removed. A few drops of hartshorn may be given frequently in a little water, and a glass or two of wine may be taken. The sting may, in general, be removed by making strong pressure around it with the barrel of a small watch-key.

	Symptoms.	Treatment.
SALIVA OF THE RABID DOG.	At an uncertain interval after the bite, generally, however, between the twentieth day and three or four months, pain or uneasiness occurs in the bitten part, though the wound may have been long healed. Anxiety, uneasiness, languor, spasms, horror, disturbed sleep, difficult respiration succeed, and are soon very much increased; violent convulsions affect the whole body, hideously distorting the muscles of the face; the eyes are red and protruded, the tongue swells and often hangs out, and viscid saliva flows from the mouth; there is pain in the stomach, with bilious vomitings, a horror of fluids, and impossibility of drinking them. All these symptoms are aggravated till the sufferer is relieved by death.	Hydrophobia is more easily prevented than cured; indeed, it is doubted whether it ever has been cured. Mercury, arsenic, opium, musk, camphor, acids, wine, vegetable and mineral alkali, oil, various herbs, and many other remedies whose effects are quite opposite, have been employed, but none can be relied on. Large blood-lettings, the warm and cold bath, and almost every other remedial agent, have been tried without success. The bitten part should be completely cut out, even after it has healed, if the symptoms have not yet come on; the part should then be immersed in warm water, or be washed with it as long as it will bleed, and, after the most persevering ablution, caustic should be applied to every part of the surface, and then the wound covered with a poultice, and suffered to heal by granulation. No milder discipline can ensure safety.

The most energetic poisons are used therapeutically, and often with considerable advantage. They have, of course, to be administered in extremely small doses, to avoid producing poisoning.

POISONING, *Venefic''ium, Toxica'tio, Intoxica'tio, Entoxis'mus, Entoxicis'mus, Pharmacei'a, Malefic''ium, Venena'tion*, (F.) *Empoisonnement, Intoxication*. The art of applying a poisonous substance to any of the textures in a dose capable of occasioning more or less serious symptoms. Rigorously speaking, therefore, if a physician, in treating any case, employs a deleterious medicine in a small dose, which, owing to particular circumstances, produces unpleasant symptoms, he may be said to have poisoned. The term is, however, generally restricted to poisoning by design.

Poisoning has also been used, by a few, to denote the series of symptoms resembling those produced by certain poisons, which occasionally follow the use of substances that are generally innoxious. Overloading the stomach with indigestible food, has, for example, given occasion to symptoms resembling those produced by a narcotic poison, and the effect has been termed *poisoning*.

Secret poisoning was, at one time, practised as an art. It consisted in administering medicines, which should act as *slow poisons*, and gradually undermine the strength and life. Its agency was far from being so extensive as was imagined.

POI'SONOUS, *Tox'ical, Nox'ius*, (F.) *Toxique, Vénéneux*. Having the qualities of a poison.

POLANIS'IA GRA'VEOLENS, *Clammy weed, Stinkweed, Wormweed, Clammy Mustard, False mustard*, from πολυς, 'many,' and ανισος, 'unequal,' in reference to its stamens. An indigenous plant, *Ord.* Capparidaceæ, *Sex. Syst.* Dodecandria Monogynia, which blossoms in summer, and is found in every part of North America. To the whole plant have been ascribed anthelmintic properties.

POLAR PLANT, Silphium laciniatum.

POLECAT WEED, Dracontium fœtidum.

POLEMO'NIUM REPTANS, *False Jacob's Ladder, Greek Vale'rian, Sweat-root. Order*, Polemoniaceæ; indigenous, flowering in May; has been used as a diaphoretic and expectorant.

POLENTA, Alphiton.

POLES, Chalazæ.

POLEY MOUNTAIN, OF CANDY, Teucrium Creticum — p. Mountain of Montpelier, Teucrium capitatum.

POLIA'TER, from πολις, 'a town,' and ιατρος, 'a physician.' A physician exercising his profession in a town, by the appointment of the government. — Castelli.

POLICE', MED'ICAL, *Politi'a med'ica, Politobiotherapi'a, Medici'na polit'ica, Ordo medic''ina'lis, Polit'ical med'icine*, (F.) *Police médicale* ou *sanitaire*. Hygienic rules established, or which ought to be established, for the prevention of disease, and to contribute to the progress of medicine. The salubrity of districts, especially during the existence of spreading disease, is greatly ensured by an efficient medical police.

POLICLIN'ICA, from πολις, 'a town,' and κλινη, 'a bed.' Treatment of diseases in a town.

POLIO'SIS, *Tricho'sis polio'sis, Spilo'sis poli-*

o'sis, Pol'iotes, Canit'ies, from πολιος, 'hoary, gray.' Hair prematurely gray or hoary. The state of becoming gray, *gray-haired, Poliot'richos.*

POLIOTES, Poliosis.

POLIOTRICHOS, see Poliosis.

POLITIA MEDICA, Police, medical.

POLITOBIOTHERAPIA, Police, medical.

POLIUM CAPITATUM, Teucrium capitatum — p. Creticum, Teucrium Creticum — p. Montanum, Teucrium capitatum.

POLL, Head.

POLLEN, (L.) *Pollen, Pollis*, παλη, 'dust.' The fecundating dust contained in the anthers of flowers, which is dispersed on the stigma. It is conveyed to the ovary through the stigma by the *Pollen tube, Tubus pollin'icus*, (F.) *Boyau pollinique.*

POLLEX, genitive *Pol'licis, An'ticheir, Prom'anus, Dig''itus primus* seu *magnus, Allus pollex, Thumb*, (Prov.) *Thame, Tom-toe*, from *pollere*, 'to have much strength.' (F.) *Pouce.* The first of the fingers in size and strength. It is asserted that the term *poltroon* is derived from *pol'licē trunca'to;* — the Romans who were desirous of being exempted from military service being accustomed to cut off the thumb, and thus render themselves unfit to handle arms.

POLLEX, see Digitus.

POLLEX PEDIS, *Hallus, Hallux.* The great toe.

POLLINC'TOR, *Pollinc'ter*, (L.) In antiquity, an anointer, dresser, or embalmer of the dead.

POLLINCTURA, Embalming.

POLLIS, Pollen.

POLLOCK, see Oleum jecoris aselli.

POLLOD'IC, *Pollod'icus;* from πολυς, 'many,' and 'οδος, 'a way.' An epithet proposed by Dr. Marshall Hall for a course of nervous action proceeding from one point, in many directions, to every other.

POLLOM, LITTLE, Polygala paucifolia.

POLLU'TION, *Pollu'tio*, from *polluo, pollutum*, 'to profane.' The excretion of the seminal liquor or sperm, or the production or orgasm in male or female, at other times than during coition. When occasioned by a voluntary act, it is called simply *Pollution* or *Masturbation*, (F.) *Souillure;* when excited during sleep, by lascivious dreams, it takes the name *Nocturnal pollution, Exoneiro'sis, Oneiroy'mos, Oneiroy'onos, Oneirogonorrhœ'a, Exoneiroy'mus, Spermatoclem'ma, Spermatoclep'sis, Spermatolep'sis, Spermatolip'sis, Gonorrhœa dormien'tium* seu *oneiroy'onos* seu *vera* seu *libidinuo'sa, Profluvium semi'nis, Spermatorrhœ'a, Paroniri'a solita, Night pollution*, (F.) *Pollution involontaire.*

POLLUTION INVOLONTAIRE, Pollution — p. Nocturnal, Pollution — p. Self, Masturbation — p. Voluntary, Masturbation.

POLONYCH'IA, *Polyonych'ia*, from πολυς, 'many,' and ονυξ, ονυχος, 'a nail.' The condition of having supernumerary nails,—a rare congenital monstrosity.

POLT-FOOT, see Kyllosis.

POLY, *Polys*, πολυς, 'many, much, full.' Hence:

POLYACTIUM TRISTE, Pelargonium triste.

POLYÆMIA, Plethora.

POLYÆMIC, Plethoric.

POLYÆMICUS, Plethoric.

POLYANHÆMIA, Anæmia.

POLYANHÉMIE, Anæmia.

POLYANTH'ES TUBERO'SA, *Amarucachu. Ord.* Liliaceæ. The root is cut into slips and laid upon the bites of serpents by the Peruvian Indians.

POLYBLEN'NIA, from *poly*, and βλεννα, 'mucus.' Excessive secretion of mucus.

POLYBREPHIA, Pregnancy, complex.

POLYCARP'Æ, from *poly*, and καρπος, 'fruit.' A division of cutaneous diseases of the family Eczematosen, of Fuchs, including Psoriasis, Lichen, Herpes, and Impetigo.

POLY'CERAS, from *poly*, and κερας, 'horn.' A monstrous animal having many horns.—Gurlt.

POLYCHOL'IA, *Perichol'ia, Hypercholi'a*, from *poly*, and χολη, 'bile.' Superabundance of bile; such as is supposed to exist in bilious fevers.

POLYCHREST'US, from *poly*, and χρηστος, 'useful.' Having many virtues. An ancient name for certain medicines considered to be useful in many diseases.

POLYCHRONIUS, Chronic.

POLYCHY'LIA, from *poly*, and χυλος, 'juice.' *Polychy'mia.* Fulness of juices.

POLYCHYMIA, Polychylia — p. Sanguinea, Plethora.

POLYCLIN'ICA, from *poly*, and κλινη, 'bed.' Provided with many beds; — as an hospital.

POLYCOR'IA, from *poly*, and κορη, 'the pupil.' The state in which there is more than one pupil.—Von Ammon.

POLYCRINOSES, see Profluvium.

POLYCYE'SIA, *Polycye'sis*, from *poly*, and κυησις, 'pregnancy.' Frequent or quickly recurring pregnancies: also, compound pregnancy.

POLYCYTHÆ'MIA, from *poly*, κυτος, 'a cell,' and 'αιμα, 'blood.' A condition of the blood in which there is an increase of the red corpuscles.

POLYDAC'TYLUS, *Perissodac'tylus*, from *poly*, and δακτυλος, 'a finger.' One who has a supernumerary finger or fingers, or toes.

POLYDIP'SIA, from *poly*, and διψη, 'thirst;' *Sitis morbo'sa* seu *inten'sa*, *Polypo'sia, Dipso'sis avens, Excessive thirst*, (F.) *Soif excessive.* A constant desire for drinking, with a sense of dryness in the mouth and throat. It is mostly symptomatic of fever, inflammation, dropsy, excessive discharges, &c., and is so much a part of diabetes, that it has been called Polydipsia.

POLYG'ALA, from *poly*, and γαλα, 'milk;' *P. vulga'ris, Common Milkwort. Ord.* Polygalaceæ. *Sex. Syst.* Diadelphia Octandria. The leaves are bitter, and are used in the same cases as the Polygala amara.

POLYGALA AMA'RA, *P. amarel'la* seu *vulga'ris, Bitter Milkwort.* A powerful bitter; and, consequently, tonic. Its reputed virtues are balsamic, demulcent, and corroborant. The *Polygala rubel'la*, or *Bitter Polygala* of the United States, has the same virtues.

POLYGALA AMARELLA, P. amara — p. Bitter, see P. amara — p. Grandiflora, P. senega.

POLYG'ALA PAUCIFO'LIA, *Triclisper'ma grandiflo'ra, Dwarf Milkwort, Little Pollom, Evergreen Snakeroot*, (F.) *Polygale naine*, possesses the same properties as P. Senega.

POLYG'ALA SEN'EGA, *P. Virginia'na* seu *grandiflo'ra, Sen'eka, Rattlesnake Milkwort, Senega* or *Rattlesnake root*, (F.) *Polygale de Virginie* ou *de Seneka.* The bark is the active part of the root, *Senega* (Ph. U. S.). Its taste is at first acrid, and afterwards very hot and pungent. It was once esteemed to be specific against the poison of the rattlesnake and in pleurisy, pneumonia, &c., after the inflammatory action had been got under. It has been given also in humoral asthma, chronic rheumatism, dropsy, croup, amenorrhœa, &c. According to Peschier, it contains three particular principles, *Polyg'aline* or *Sen'egine, Isol'usine*, and *Polyg'alic Acid.* Dose, gr. 30 to 40 of the powder.

POLYGALA SERPENTA'RIA. A shrub of Caffraria, the root of which is considered by the natives as a sure antidote against the bites of venomous serpents.

Polygala Virginiana, P. senega — p. Vulgaris P. amara.

POLYGALAC'TIA, *Polyga'lia*, from *poly*, and γαλα, γαλακτος, 'milk.' Superabundant secretion of milk; galactia.

POLYGALE NAINE, Polygala paucifolia — *p. de Virginie*, Polygala Virginiana.

POLYGALIA, Polygalactia.

POLYGALINE, see Polygala senega.

POLYGONATUM, Convallaria polygonatum —p. Anceps, Convallaria polygonatum—p. Canaliculatum, Convallaria canaliculata—p. Latifolium, Convallaria canaliculata — p. Multiflorum, Convallaria multiflora — p. Pubescens, Convallaria pubescens — p. Uniflorum, Convallaria polygonatum — p. Vulgare, Convallaria polygonatum.

POLYG'ONUM, *P. avicula're*, from *poly*, and γονυ, 'a knee or joint.' *P. centino'dium* seu *erec'tum*, *Centino'dia*, *Centumno'dia*, *Sanguina'lis Corrig''iola*, *Sanguina'ria*, *Knotgrass*, *Knotweed*, *Bindweed*, *Doorweed*, (F.) *Renouée*, *Trainasse*, *Centinode*. *Ord.* Polygonaceæ. *Sex. Syst.* Octandria Trigynia. This grass is said to be a feeble astringent.

Polygonum Acre, P. hydropiper.

Polygonum Amphib'ium, *P. coccin'eum*, *Water Persica'ria*, of Europe and this country. The roots have been used like sarsaparilla, especially in diseases of the skin.

Polygonum Bistor'ta, *P. bistortoï'des*, *Bistorta*, *Colubri'na*, *Offic''inal Bistort*, *Great Bistort* or *Snakeweed*, (F.) *Bistorte*, *Couleuvrine*, *Serpentaire rouge*. The root is a powerful astringent and tonic; and, as such, has been used in internal hemorrhage, atonic diarrhœa, ague, &c. Dose, gr. xv to ʒj.

Polygonum Bistortoides, P. bistorta—p. Centinodium. P. aviculare.

Polygonum Coccineum, P. amphibium.

Polygonum Divarica'tum; *Eastern Buckwheat plant*. The roots, reduced to a coarse meal, are said to be much used as an article of diet by the Siberians.

Polygonum Erectum, P. aviculare.

Polygonum Fagop'yrum, *Fagop'yrum*, *F. esculent'um*, *Trit'icum Fagi'num*, *Buckwheat*, (F.) *Sarrasin*, *Blé noir*. The grain of this plant constitutes a principal article of food with the inhabitants of Russia, Germany, and Switzerland. It is much used in the United States.

Polygonum Hydrop'iper, *P. acrē* seu *hydropiperoïdes* (Pursh) seu *puncta'tum*, *Hydrop'iper*, *Persica'ria urens*, *Mercu'rius terrestris*, *Poor Man's Pepper*, *Biting Arse-smart*, *Smartweed*, *Lakeweed*, *Water-pepper*, (F.) *Poivre d'eau*, *Persicaire poivrée* ou *brûlante* ou *âcre*, *Piment d'eau*, *Curage*, *Renouée âcre*. The leaves of this plant have an acrid, burning taste, and resemble those of the arum. They have been recommended as possessing antiseptic, aperient, and diuretic virtues. The fresh leaves have been applied externally as a stimulating cataplasm.

Polygonum Hydropiperoïdes, P. Hydropiper, P. punctatum. *Polygonum hydropiperoïdes* of Michaux, *mild waterpiper*; indigenous; has no acrid properties.

Polygonum Persica'ria, *Persicaria*, *P. minor* seu *mitis*, *Plumba'go*, *Lady's Thumb*, *Heart's ease*, (Prov.) *Redshanks*, (F.) *Persicaire douce*. This plant is said to possess vulnerary and antiseptic qualities. It has been given in wine to arrest gangrene.

Polygonum Puncta'tum, *P. hydropiperoï'des*, *Water pepper* of America, *Smartweed*, possesses similar properties to Polygonum hydropiper, and is occasionally used internally in gravel, and externally in chronic ulcers. A fluidrachm of the saturated tincture has been extolled in amenorrhœa. See Polygonum hydropiper.

Polyg'onum Virginia'num, *Wand-spiked Persica'ria*, *Virgin'ia Bistort*; indigenous; is astringent, diuretic, and tonic.

POLYGROMA, Staphyloma.

POLYHI'DRIA, *Polyï'dria*, *Polyïdro'sis*, from *poly*, and ἱδρως, 'sweat.' Excessive sweating.

POLYHYDRIA, Hydrops.

POLYHYPERHÆMIA, Plethora.

POLYIDRIA, Polyhidria.

POLYIDROSIS, Polyhidria.

POLYLYMPHIA, Anasarca.

POLYMASTH'US, *Pleioma'sthus*, from *poly*, and μαζος, 'breast.' A monster having several breasts. — Gurlt. The condition has been called *Polyma'zia*, *Pleioma'zia*, and *Pleoma'zia*.

POLYMAZIA, see Polymasthus.

POLYMEL'IAN, (F.) *Polymélien*, from *poly*, and μελος, 'a limb.' An epithet given to monsters characterized by the insertion, in a well formed subject, of one or more accessory limbs, accompanied, at times, by the rudiments of certain other parts.—I. G. St. Hilaire.

POLYMERIA, Polymerismus — p. Promiscua translativa, Transposition of the viscera.

POLYMERIS'MUS, *Polymer'ia*, from *poly*, and μερος, 'a part.' A monstrosity, which consists in the existence of supernumerary organs; as a sixth finger of the hand.

POLYNEURON, Plantago.

POLYONYCHIA, Polonychia.

POLYOP'SIA, *Pol'yopy*, from *poly*, and οψις, 'sight.' Vision is so called, when multiple or manifold.

POLYOPY, Polyopsia.

POLYOREX'IA, from *poly*, and ορεξις, 'appetite.' Excessive appetite or hunger. A genus in the Gastroses of M. Alibert.

POLYPE'RIA, from *poly*, and πηρος, 'mutilated.' Congenital misconstruction of various parts or organs. — Good.

POLYPHA'GIA, *Multivora'tia*, from *poly*, and φαγω, 'I eat.' Voracity. Faculty of eating or subsisting on many kinds of food. See Boulimia.

POLYPH'AGOUS, *Polyph'agus*, *Multiv'orous*, (F.) *Polyphage*. Relating or appertaining to polyphagia.

POLYPHARMACI'A, *Polypharm'acy*; from *poly*, and φαρμακον, 'a medicine.' The prescribing of too many medicines. A prescription, consisting of a number of medicines; hence the name *Polyphar'macus*, (F.) *Polypharmaque*, given to one who is in the habit of prescribing a number of medicines, and whose prescriptions are loaded with ingredients. The term is taken in bad part.

POLYPHARMAQUE, see Polypharmacia.

POLYPHYSIA, Flatulence.

POLYPIFORM CONCRETIONS, see Polypus.

POLYPIONIA, see Polysarcia — p. Infantum, see Polysarcia.

POLYPIOSIS, see Polysarcia.

POLYPLAS'TIC, *Polyplas'ticus*, from *poly*, and πλασσω, 'I form.' That which has many shapes.

Polyplastic Element, in histology, is one which does not retain its primary shape; but undergoes transformation into others. — Gerber.

POLYPODI'TES. Wine impregnated with polypody.

POLYPO'DIUM, *P. Vulga'rē* seu *Virginia'num* seu *pinnatifi'dum*, *Filic'ula dulcis*, *Common Pol'ypody*, *Fern root*, *Rock Brake*, *Brake root*, (F.) *Fougère douce*. *Ord.* Filices. From *poly*, and πους, ποδος, 'a foot,' owing to its many roots. This fern grows in the clefts of rocks, walls, &c., in both hemispheres. It was formerly regarded as

a cholagogue, and was given in head diseases. It is not used now.

Polypodium Adiantiforme, see Calagualæ radix — p. Ammifolium, see Calagualæ radix —p. Argenteum, see Calagualæ radix — p. Cetaræcinum, P. incanum — p. Calaguala, Calagualæ radix — p. Coriaceum, see Calagualæ radix — p. Dentatum, Asplenium filix fœmina — p. Filix fœmina, Asplenium filix fœmina.

Polypo'dium Filix Mas, *Aspid'ium* seu *Athyr'ium* seu *Nephro'dium* seu *Polys'ticum Filix Mas*, *A. depas'tum* seu *ero'sum*, *Filix pinna'ta*, *Pteris*, *Blechnon*, *Polyrrhi'zon*, *Blancnon Oriba'sii*, *Lonchi'tis*, *Filic'ula*, *Filix Mas*, *F. non ramo'sa denta'ta*, *Nephro'dium crenatum*, *Polys'ticum callip'teris*, *Male Polypody* or *Fern*, (F.) *Fougère mâle*. The rhizoma of this plant, *Filix Mas*, Ph. U. S., has been much extolled as an anthelmintic, and in cases of tænia. It was the basis of a once celebrated remedy—*Madame Nouffer's*—but, perhaps, more of the efficacy was to be attributed to the active purgatives by which it was followed than to the fern. Dose, ʒij to ʒiij of the powdered solid part of the root; followed in the morning by a strong cathartic of camboge or jalap. An ethereal extract has been proposed by Dr. Peschier, of Geneva.

Polypo'dium Inca'num, *P. cetaræ'cinum*, *Acros'tichum polypodioïdes*, *Pol'ypody*, *Rock Brake*; indigenous; has been considered demulcent, cathartic and anthelmintic.

Polypodium Incisum, Asplenium filix fœmina —p. Molle, Asplenium filix fœmina—p. Pennatifidum, P. vulgare — p. Politum, see Calagualæ radix — p. Trifidum, Asplenium filix fœmina — p. Virginianum, P. vulgare — p. Vulgare, Polypodium.

POLYPODY, Polypodium incanum—p. Common, Polypodium vulgare—p. Male, Polypodium filix mas.

POL'YPOID, *Polypoï'des*; from *polypus*, and *εἶδος*, 'form.' Having the shape of, or resembling, a polypus.

POLYPORUS IGNIARIUS, Boletus igniarius —p. Officinalis, Boletus laricis.

POLYPO'SIA, *πολυτροσια*, from *poly*, and *ποσις*, 'drink.' Great thirst — desire for drink. Polydipsia.

POL'YPOTOME, *Polypot'omus*, *Polypus knife*, from *polypus*, and *τεμνειν*, 'to cut.' An instrument for the removal of polypus by excision.

POL'YPOUS, *Polypo'sus*: same etymon as the next. Relating, or belonging to, or resembling polypus.

POL'YPUS, *Pseudometamorpho'sis polypo'sa*, from *πολυς*, 'many,' and *πους*, *ποδος*, 'a foot.' A name given to tumours, which occur in mucous membranes especially; and which have been compared to certain zoophytes. Polypi may form on every mucous membrane. They are most commonly observed in the nasal fossæ, pharynx, and uterus; more rarely in the stomach, intestines, bronchial tubes, bladder, and meatus auditorius externus. They vary much in size, number, mode of adhesion, and intimate nature. Accordingly, they have received various appellations; *mucous*, *soft*, *vesic'ular*, when their substance has been soft, spongy, vesicular, and, as it were, gorged with fluid. Others have been called *hard*; and these have been distinguished into *fibrous* or *fleshy*, and into *scirrhous* or *cancerous*. *Fibrous* polypi, *Pol'ypi fibro'si*, *Inopol'ypi*, are of a dense, compact texture, and whitish colour. They contain few vessels, and do not degenerate into cancer. The *scirrhous* or *carcinom'atous* are true cancerous tumours, painful and bleeding. They present all the pathological changes which belong to cancerous affections, and the prognosis is of course unfavourable.

The mode of treating polypi must differ according to their character. The means used to destroy them have been, 1. To subject them to the action of certain astringent powders or solutions, to obtain their resolution. 2. *Cauterization* or the application of the actual cautery or caustics. 3. *Excision* or ablation with a cutting instrument. 4. *Extirpation* with the fingers or with the polypus forceps. 5. A *ligature*, put round them so as to prevent their nutrition. A seton has, also, been sometimes used to gradually destroy the pedicle.

The term Polypi, *Pseudopol'ypi*, *Cardi'tis polypo'sa*, *Pol'ypiform Concre'tions*, (F.) *Concrétions polypeuses* ou *polypiformes* ou *sanguines du Cœur*, *Hémocardioplastics*, (Piorry,) has likewise been applied to collections of blood—fibrinous concretions — found in the heart or great vessels after dissolution. These were once, erroneously, regarded as morbid. The presence of these concretions may be suspected, when in the course of an acute or chronic affection of the heart, or at the close of chronic diseases in general—especially those of the lungs — the heart's action becomes suddenly tumultuous, obscure, and accompanied with a soft bellows' murmur, whilst the general symptoms indicate the effects of obstructed circulation. The right cavities are most frequently affected.

Pol'ypus Bronchia'lis, *Bronchlemmi'tis*, *Bronchi'tis membrana'cea* seu *exsudati'va* seu *croupo'sa*, *B. plastic*, *Bronchial Croup*, *Chronic Croup* [?], *Pseudo-mem'branous Bronchitis*, (F.) *Bronchite pseudo-membraneuse*. A membraniform secretion in the bronchial tubes of a diphtheritic character, having the shape, when unexpectorated, of the bronchia. It is the result of inflammation of the lining membrane of those tubes.

Polypus Carnosus, Sarcoma—p. Fibrosus, see Polypus — p. Uteri, Metropolypus.

POLYRRHIZON, Polypodium filix mas.

POLYRRHŒA, Profluvium.

POLYSAR'CIA, *Polysarco'sis*, from *poly*, and *σαρξ*, *σαρκος*, 'flesh.' *Carnos'itas*, *Polysoma'tia*, *Adelipa'ria*, *Corpulen'tia*, *Steati'tes*. Excessive corpulency. Authors have distinguished two varieties of this: — Polysarcia Carno'sa, *Corpulency*, and P. Adipo'sa, *Polypio'nia*, *Polypio'sis*, *Pimelo'sis nim'ia*, *Pachys'mus*, *Pachyn'sis*, *Obes'itas*, *Hyperpim'elē*, *Lipa'ria*, *Adipo'sis*, *Polysar'cia fagino'sa*, *Empyme'lium polysar'cia*, *Baryso'mia*, *Barysomat'ica*, *Lipo'sis*, *Lipar'otes*, *Lipas'ma*, *Pinguitu'do*, *Pin'guitude*, *Obes'ity*, (F.) *Obésité*, *Embonpoint excessif*. A severe regimen and exercise are the best preventives. Children are occasionally met with of unusual fatness, in spite of every care. This morbid disposition has been termed *Polypio'nia infan'tum*, and *Chloro'sis gigante'a*.

Polysarcia Viscerum, Physconia adiposa.

POLYSARCOSIS, Polysarcia.

POLYSCEL'IA, from *poly*, and *σκελος*, 'a leg.' A monstrosity, characterized by the presence of one or more supernumerary legs.

POLYSIA'LIA, from *poly*, and *σιαλον*, 'saliva. Excessive discharge of saliva.

POLYSOMATIA, Polysarcia.

POLYSO'MIA, from *poly*, and *σωμα*, 'body. A monstrosity characterized by the existence of more bodies than one.

POLYSPAS'TON, from *poly*, and *σπαω*, 'I draw.' A powerful instrument for reducing luxations. — Gorræus.

POLYSPER'MIA, from *poly*, and *σπερμα*, 'sperm.' Richness or fulness of sperm.

POLYSTICUM CALLIPTERIS, Polypodium filix mas—p. Filix Mas, Polypodium filix mas.

POLYSTOMA PINGUICOLA, see Worms — p. Venarum, see Worms.

POLYTRIC, Asplenium trichomanoides.

POLYTRICHIA, see Polytrichus.

POLYT'RICHUM, from *poly*, and θριξ, τριχος, 'hair,' *P. vulga'rē*, *Polyt'richon*, *Adian'tum aur'reum*, *Golden Maiden-hair*, (F.) *Perce-mousse. Ord.* Musci. It is possessed of astringent properties, and was formerly given in diseases of the lungs, and in calculous affections.

POLYTRICHUM COMMUNE, Asplenium trichomanoides.

POLYTRICHUM JUNIPERI'NUM, *Haircap moss*, *Robbin's Rye*, common in New England, is said to possess powerful diuretic properties.

POLYT'RICHUS; same etymon as *Polytrichum*. Very hairy. One that has much hair. The condition is termed *Polytrich'ia*; although this term is, at times, employed for the growth of hair on parts not usually having it.

POLYTROPH'IA, from *poly*, and τρεφω, 'I nourish.' Abundant or excessive nutrition.

POLYURESIS, Diabetes.

POLYURIA, Diabetes.

POLYU'RICUS, from *poly*, and ουρον, 'urine.' Sauvages calls—*Ischu'ria polyu'rica*—a kind of ischuria, caused by accumulation of urine in the bladder.

POMA, Drink—p. Chinensia, see Citrus aurantium.

POMACEUM, Cider.

POMA'TUM, *Pomma'tum*, from *poma*, 'apples,' which formerly entered into its composition. (F.) *Pommade*, *Liparolé*, *Stéarolé*. A pharmaceutical preparation, employed only externally, which differs but little from an ointment, except in having generally less consistence. It is usually scented and coloured to render it more agreeable. Apples formerly entered into the composition of the *pomatum*; hence its name.

Common Pomatum is made of *lard*, 12℔s; *suet*, 4℔s; *essence*, ℥viij.

POMATUM AD LABIA DEMULCENDA, Cerate for the lips—p. Epispasticum flavum, Unguentum lyttæ medicatum aliud—p. Epispasticum viride, &c., Unguentum lyttæ medicatum—p. for the Lips, Cerate for the lips—p. Nitricum seu oxygenatum, Unguentum acidi nitrosi—p. Saturni, Unguentum plumbi superacetatis.

POMBALEA IPECACUANHA, see Ipecacuanha.

POMEGRANATE, Punica granatum.

POMILIUS, see Nanus.

POMMADE, Pomatum—*p. d'Alyon*, Unguentum acidi nitrosi—*p. Antisporique de Josser*, Unguentum sulphuris compositum—*p. d'Autenrieth*, Unguentum antimonii tartarizati—*p. de Cyrillo*, Unguentum muriatis hydrargyri oxygenato medicatum—*p. Épispastique jaune*, Unguentum lyttæ medicatum aliud—*p. Epispastique verte*, Unguentum lyttæ medicatum—*p. de Garou*, Unguentum epispasticum de daphne gnidio.

POMMADE DE GONDRET, *P. ammoniacale de Gondret* (F.), *Gondret's Counterirritant*, *Gondret's ammoniacal Caustic*. (*Liq. ammon.* p. ij; *Sevi*, p. j; *Ol. amygdal.* p. j; M.) Used to excite a speedy revulsion in cases of chronic affections of the brain, incipient cataract, amaurosis, &c., as well as to cauterize the integuments deeply.

The above formula, is that of the French Codex, but, according to M. Trousseau, it is much too hard for use, unless the weather is warm. He proposes *two formulæ*, one for summer, the other for winter. In the *former* he directs three parts of *lard*, one of *suet*, and four of *liquor ammoniæ*; in the *latter*, equal parts of *lard* and *liquor ammoniæ*.

POMMADE POUR LES LÈVRES, Cerate for the lips—*p. Ophthalmique* (Regent's.) Unguentum ophthalmicum—*p. Oxygénée*, Unguentum acidi nitrosi—*p. Stibiée*, Unguentum antimonii tartarizati.

POMME, see Pyrus malus—*p. d'Adam*, Pomum Adami—*p. d'Amour*, Solanum lycopersicum—*p. Épineuse*, Datura stramonium—*p. de Merveille*, Momordica balsamica—*p. Mousseuse*, Bedegar—*p. de Terre*, Solanum tuberosum.

POMMES HÉMORRHOÏDALES, see Viscum album.

POMMETTE, see Malæ os.

POMMIER, Pyrus malus.

POMPE POUR L'ESTOMAC, Stomach pump.

POMPHOLYGE'RON, πομφολυγηρον, from πομφολυγοω, 'to raise blisters.' The name of a plaster employed by the ancients.—Castelli.

POMPH'OLYX, from πομφος, 'a bladder.' A small vesicle on the skin. An eruption of *bullæ* or *blebs*, appearing without any inflammation around them, and without fever. It is the *Ecphlysis Pompholyx* of Good. See Pemphigus.

POMPHOLYX, Tutia, Zinci oxydum.

POMPHUS, Wheal.

POMPION, Cucurbita pepo.

POMUM ADA'MI, *Eminen'tia thyreoïdea*, (F.) *Pomme d'Adam*, *Adam's Apple*. The projection formed by the thyroid cartilage in the neck—of males particularly. It is so called from a notion that it was caused by the apple sticking in the throat of our first parent.

POMUM AMORIS, Testicle—p. Hierosolymitanum, Momordica balsamina—p. Melongena, see Solanum melongena—p. Mirabile, Momordica Balsamina—p. Spinosum, Datura stramonium.

PONCTION, Puncturing.

POND SHOVEL, Unisema deltifolia.

PONDERA ET MENSURÆ, Weights and measures.

PONDUS, Pudibilia—p. Pharmaceuticum, see Weights and measures.

PONGITIF, Pungent.

PONS CEREBELLI, Pons Varolii—p. Hepatis, see Lobulus anonymus—p. Sylvii, Quadrigemina Tubercula—p. Tarini, Tarini pons.

PONS VARO'LII, *P. Cerebel'li*, *Corpus annula'rē*, *Proces'sus annularis*, *Prominen'tia annula'ris cer'ebri*, *Eminen'tia annularis*, *Nodus enceph'ali* seu *Cer'ebri*, *Protuberan'tia basila'ris*, *Protuberan'tia annula'ris Willis'ii*, *Varo'li's bridge*, *Cer'ebral protu'berance*, (F.) *Protubérance cérébrale* ou *annulaire*, *Mésencéphale*, *Mésocéphale*, *Pont de Varole*, *Annular protuberance*. An eminence at the upper part of the medulla oblongata, first described by Varolius. It is formed by the union of the crura cerebri and crura cerebelli.

PONS ZYGOMATICUS, Zygomatic arch.

PONT DE TARIN, Tarini pons—*p. de Varole*, Pons Varolii.

PONTE, see Parturition—*p. Périodique*, see Parturition.

PONTEDERIA CORDATA, Unisema deltifolia.

PONTICUM ABSINTHIUM, Artemisia Pontica.

POOK, Abdomen.

POPLAR, AMERICAN, Liriodendron—p. Balm of Gilead, Populus Candicans—p. Black, Populus—p. Tree, Liriodendron—p. Tulip-bearing, Liriodendron.

POPLES. *Gare'tum*, *Garretum*, *Ignys*, *Ig'nyē*, *Suffra'go*. *Fossa genu*, *Fossa poplitæ'a*, the *Ham*, *Hough*, *Hoff*, *Hock*, (F.) *Jarret*, from *post*, and *plico*, 'I fold.' The posterior part of the knee joint. The ham forms what is called the *popliteal region* or *space*.

POPLESY, Apoplexy.

POPLITÆUS, Popliteal muscle.

POPLITÉ, Poplitæus muscle.

POPLITEAD, see Popliteal aspect.

POPLITE'AL, *Poplitæ'us, Poplit'ic,* (F.) *Poplité,* from *poples,* 'the ham.' That which relates to the ham. A name given to various parts.

POPLITEAL ARTERY — *Popliteal portion of the crural,* — (Ch.), is really a continuation of the femoral, which changes its name on passing through the adductor magnus muscle. It descends a little obliquely outwards into the hollow of the ham, and extends from the commencement of the lower third of the thigh to the end of the upper quarter of the leg, where it terminates by dividing into the *posterior tibial* and *peroneal* arteries. In the ham, it gives off the three *superior articular arteries;* and, at the top of the leg, the arteries of the gemini muscles or *gemini branches,* (F.) *branches jumelles,* the *two inferior articular arteries,* and the *tibialis antica.*

POPLITEAL ASPECT. An aspect towards the side on which the *poples* or ham is situated. (Barclay.) *Poplite'ad* is used by the same writer adverbially, and signifies 'towards the popliteal aspect.'

POPLITEAL FOSSA, Poples.

POPLITE'AL GLANDS, *Glan'dulæ poplitæ'æ.* Lymphatic glands, four in number, seated in the popliteal region or space.

POPLITEAL MUSCLE, *Poplitæ'us Muscle, Subpoplitæus,* (F.) *Muscle poplité, Muscle Jarretier, Fémoro-popliti-tibial,* (Ch.), is seated in the popliteal region. It is triangular, long, flat; and is inserted, on the one hand, by means of a strong tendon, into the tuberosity at the outer condyle of the femur, terminating below at the upper part of the posterior surface of the tibia. This muscle bends the leg on the thigh, and, reciprocally, the thigh on the leg. When the leg is bent, it causes it to turn, in rotation, inwards.

POPLITEAL NERVES. They result from the bifurcation of the sciatic, and are two in number, viz. 1. The *external popliteal, Peroneal nerve, Branche péronière,* (Ch.) It is smaller than the internal; turns to the outside of the fibula at the upper part of the leg, and divides into the *musculo-cutaneous branch, nerf prétibio-digital,* (Ch.) and the *anterior tibial, nerf prétibio-susphalangétaire,* (Ch.) 2. The *inter'nal poplite'al nerve, Branche tibiale* (Ch.), which is larger than the other, and seems to be the real continuation of the sciatic nerve. It descends vertically into the hollow of the ham; and passes beneath the aponeurotic arch of the solaris muscle, beyond which it takes the name *tibial nerve.* It furnishes the *external saphena nerve,* and a number of branches, that are distributed to the posterior muscles of the leg. It then passes to the sole of the foot to be divided into two branches, called *Plantar nerves.*

POPLITEAL REGION, Poples — p. Space, Poples.

POPLITEAL VEIN has the same arrangement as the artery behind which it is situate.

POPLITIC, Popliteal.

POPONAX, see Pastinaca opoponax.

POPPY, CELANDINE, Stylophorum diphyllum — p. Corn, red, Papaver rhœas.

POPPY HEADS, see Papaver.

POPPY, HORN, Stylophorum diphyllum.

POPPY JUICE, Meconium — p. Pill, Opium.

POPPY, PRICKLY, Argemone Mexicana — p. Spotting, Cucurbalus Behen — p. Thorn, Argemone Mexicana — p. White, Papaver — p. White, capsule, see Papaver.

POP'ULUS, *P. nigra, Ægei'ros, Achero'is, Black poplar,* (F.) *Peuplier, P. noir* ou *franc.* The young *buds, oculi* or rudiments of the leaves, which appear in the beginning of spring, were formerly used in an officinal ointment — the *unguen'tum popule'um.* It was, also, recommended in chronic affections of the lungs.

The bark of *Pop'ulus Tremuloï'des, American aspen,* of P. TREM'ULA seu *pen'dula, European aspen,* and of POPULUS CAN'DICANS, *Balm of Gilead Poplar,* is antiperiodic, and furnishes *salicin* and *populin,* in which the properties probably reside.

POPULUS BALSAMIFERA, see Fagara octandra — p. Candicans, see Populus — p. Pendula, P. tremula — p. Tacamahaca, see Fagara octandra — p. Tremula, see Populus — p. Tremuloides, see Populus.

PORCELAINE, Essera, Urticaria.

PORCELET, Hyoscyamus.

PORCELIA TRILOBA, see Carica papaya.

PORCELLIO, Oniscus.

PORCELLUS, Oniscus.

PORCULUS, Oniscus.

PORCUPINE DISEASE, Ichthyosis.

PORCUPINE MEN, *Echinoder'mi.* Persons have been so called in whom the cuticle is produced in the form of pointed prolongations, as if it had been moulded on the papillæ, like the shorter and blunter quills of the porcupine.

PORCUS, Vulva.

PORDE, Crepitation.

PORE, *Porus, In'terstice,* πορος, 'a passage.' Anatomists have given this name to the openings at the extremities of vessels at the surface of different membranes. EXHALANT PORES have been supposed to exist in the exhalants, to transmit the fluids exhaled. — ABSORBENT PORES are employed in taking up parts that have to enter the circulation. Pores exist in the cuticle; yet Humboldt, with a powerful magnifying-glass, was unable to observe them. The pores of the skin have also been called *spira'cula.*

POREBLIND, Myopic.

PORED MILK, Colostrum.

PORI BILIA'RII, *Ductus bilia'rii* seu *bilif'eri, Canalic'uli bilif'eri, Snr'culi fell'ei.* Ducts which receive the bile from the penicilli of the liver, and convey it to the hepatic duct.

PORI CUTA'NEI, *P. Exhalan'tes* seu *Sudorif'eri* seu *Resorben'tes, Mea'tus cuticula'res.* The pores of the skin.

PORI EXHALANTES, P. cutanei — p. Pulmonum, Cellules, bronchic — p. Resorbentes, P. cutanei — p. Sudoriferi, P. cutanei.

PORNOG'RAPHY, *Pornograph'ia;* from πορνη, 'a prostitute,' and γραφω, 'I describe.' A description of prostitutes or of prostitution, as a matter of public hygiene.

POROCE'LE, from πωρος, 'callus,' and κηλη, 'a tumour.' A hard tumour of the testicle or its envelopes.

POROMA, Induration.

POROMPHALOCELE, Poromphalon.

POROM'PHALON, *Poromph'alus, Poromphaloce'lē,* from πωρος, 'hard,' and ομφαλος, 'the navel.' Umbilical hernia with hard and thickened parietes.

POROS, Canal.

POROSIS, Chalaza, Induration.

POROT'IC, *Porot'icus,* (F.) *Porotique,* from πωρος, 'callus.' A remedy believed to be capable of assisting the formation of callus.

PORPHYRA, Purpura — p. Græcorum, Petechiæ — p. Hæmorrhagica, Purpura hæmorrhagica — p. Laciniata, Ulva umbilicalis — p. Umbilicalis, Ulva umbilicalis.

PORPHYRISMA, Scarlatina.

PORPHYRISMUS, Scarlatina.

PORPHYRIZATION, Levigation.

PORPHYROTYPHUS, see Typhus.

PORPHYRU'RIA, *Porphyu'ria;* from πορφυρα, 'purple,' and ουρον, 'urine.' A state of the urine — *pur'puric urine* — in which it deposits the remarkable colouring matter — *Pur'purine, Urro'sacine, Rosac'ic acid, Urocr'ythrin, Uro'rhodine, Ur'rhodine* — in association with urate of ammonia.

POR'PHYRY, *Porphyri'tes,* from πορφυρα,

'purple.' A species of very hard, compound rock, susceptible of considerable polish, and used in the fabrication of mortars and slabs for the apothecary.

PORPHYRY, BLACK, Ophites.

PORPHYURIA, Porphyruria.

PORRACÉ, Porraceous.

PORRA'CEOUS, *Porra'ceus*, *Pra'sinus*, from *porrum*, 'a leek.' (F.) *Porracé*. Having the green colour of the leek. An epithet given to certain excreted matters, — the sputa, bile and fæces particularly.

PORREAU, Allium porrum.

PORRECTUM, Lever.

PORRET, Allium porrum.

PORRIDGE, ATHOL, see Mahogany.

PORRIGINE, Porrigo favosa.

PORRIGINEUX. Porriginous.

PORRIGINOSUS, Porriginous.

PORRIG''INOUS, *Porrigino'sus*, (F.) *Porrigineux*. Appertaining to porrigo.

PORRI'GO (L.), 'scurf or scall in the head.' *Tin'ea*, *Favus*, *Furfura'tio*, *Fur'fures*, *Ecpye'sis* seu *Phlysis porrigo*, *Trichono'sis*, *Scalled head* in general, *Scallard*; from *porrigere*, 'to spread.' (F.) *Teigne*, *Rache*. Some of the varieties are contagious. It is principally characterized by an eruption of the pustules, called favi and achores, unaccompanied by fever.

PORRIGO CONFERTA, P. scutulata.

PORRIGO DECAL'VANS, *Tricho'sis a'rea*, *Area*, *Alope'cia area'ta* seu *partia'lis* seu *circumscrip'ta*, *Phytoalope'cia*, *Trichono'sis furfura'cea*, *Tyr'ia*, *Tyro'ma*, *Ophi'asis*, *Tin'ea tondens*, *Herpes tonsu'rans*, *Squarra tondens*, *Limited* or *partial Baldness*, consists of patches of baldness without decay or change of colour in the surrounding hair, the exposed parts of the scalp being glabrous, white, and shining. The morbid condition sometimes spreads, so that the patches coalesce, rendering the baldness extensive. To a vegetable growth, found at the roots of the hair in Tinea tondens, Gruby gives the name *Micros'poron Audouï'ni*. It is, also, called *Tricoph'yton* seu *Trichom'yces tonsu'rans*. The treatment consists in keeping the scalp cleared by constant shaving, and in the steady application of some stimulating liniment or ointment.

PORRIGO FAVO'SA, *Ce'rion*, *Favus*, *Ecpye'sis porrigo favosa*, *Tinea favosa*, *Sca'bies cap'itis favosa*, *Melice're*, *Melice'rum*, *Melice'ria*, *Mellifa'vium*, *Porrigoph'yta*, *Honey-comb Scall* or *Tetter*, (F.) *Teigne faveuse*, *Porrigine*. This consists in an eruption of pustules common to the head, trunk, and extremities, pea-sized, flattened at the top, in clusters, often uniting; discharge, fetid; scabs, honey-combed; the cells filled with fluid. It occurs both in early and adult life. Modern researches have satisfied some observers, that the crusts of favus are of vegetable nature, and formed of a parasitic plant, belonging, according to Gruby, to the obsolete genus *mycoderm'a*. MM. J. Müller and Lebert refer it to the genus *Oïdium*, and call it *Oïd'ium Schönlei'ni*, whilst Remak assigns it to a new genus under the name *Achorion Schönleinii*. The point is not, however, settled. The treatment of this variety must consist in the exhibition of laxatives and the mildest stimulating ointments, such as the *Ung. zinci*, *Ung. hydrargyri præcipitat. alb.*, &c. Eczema of the hairy scalp is often confounded with Porrigo.

PORRIGO FUR'FURANS, *Ecpyesis porrigo furfura'cea*, *Tinea* seu *Tricho'sis furfuracea* seu *porrigino'sa*, *Pityri'asis*, *Teigne furfuracée* (Alibert), commences with an eruption of small achores, the fluid of which soon concretes and separates in innumerable thin, laminated scabs, or scale-like exfoliations. It is attended with a good deal of itching and some soreness of the scalp, to which the disease is confined. It occurs chiefly in adults. In the treatment, the scalp must be kept shaved. The part must be washed repeatedly with soap and water, and an oiled silk cap worn. The nature of the ointments used must vary according to the period of disease and the irritability of the part affected. *Zinc ointment*; — one made with the *Cocculus indicus*; — the *Sulphur ointment*; — *Citrine ointment*; *Ung. hydrargyri nitrico-oxydi*; *Tar ointment*, and *Nitric acid ointment* have all been found useful. Should inflammation or discharge arise, these applications must of course be intermitted.

PORRIGO LARVALIS, P. lupinosa.

PORRIGO LARVA'LIS, *Crusta lac'tea*, *Ecpye'sis Porrigo crusta'cea*, *Menti'go*, *Achor*, *Tin'ea lac'tea* seu *Fa'ciei*, *Lactu'men*, *Lacti'go*, *Milky scall* or *Tetter*, *Milkblotch*, (F.) *Croûte de lait* ou *laiteuse*, *Feux volages*, *La Graine*. This is, almost exclusively, a disease of infancy. It commonly appears first on the forehead and cheeks, in an eruption of numerous, minute, whitish achores on a red surface. These break and discharge a viscid fluid, which becomes incrusted in thin, yellowish, or greenish scabs. The patches spread, until the whole face becomes, as it were, enveloped in a mask; hence the epithet *larvalis*. The disease is rather a variety of Eczema. Sometimes the eruption appears on the neck and breast; and, occasionally, on the extremities. In general, the health of the child does not suffer, but the eruption is always attended with much itching and irritation. The treatment consists in mild, tepid ablution, and the application of gently stimulating ointments, as the oxydum zinci. The bowels must be kept in a soluble state by small doses of calomel, or by rhubarb and magnesia.

PORRIGO LUPINO'SA, *Tin'ea lupi'na*, *Favus disper'sus*, *Scabies cap'itis*, *Ecpye'sis porrigo lupino'sa*, *Porri'go larva'lis*, *Impeti'go figura'ta*, *Tin'ea granula'ta* seu *muco'sa*, *Crusta lactea* (of some), *Ment'agra infan'tum*, (F.) *Teigne*, *Dartre crustacée flavescente*, *Favus disséminé*, consists of minute pustules in small patches, mostly commencing on the scalp; the patches terminate in dry, delving scabs, resembling lupine seeds; the interstices often covered with a thin, whitish and exfoliating incrustation. It occurs chiefly in early life, and requires the same treatment as the last.

PORRIGO SCUTULA'TA, *P. confer'ta*, *Tin'ea granula'ta* seu *fico'sa*, *Ecpye'sis porrigo galea'ta*, *Acho'res* seu *Sca'bies cap'itis*, *Favus confer'tus*, *Ringworm of the Scalp*, *Scalled head*, (F.) *Teigne annulaire*, *T. en anneau*, *T. nummulaire*, *Favus en groupes*. It commences with clusters of small, light, yellow pustules, which soon scab off; and, if neglected, become hard by accumulation. If the scabs be removed, the surface is left red and shining, but studded with slightly elevated points. If not attended to, it involves the whole head. It occurs in children three or four years of age, and is very unmanageable. The rules laid down under *Porrigo furfurans* must be here still more perseveringly enforced. The whole tribe of stimulating ointments may be used in succession. No one will always succeed, and hence the necessity of change, provided advantage should not seem to follow any particular application. The *Unguentum ad Scabiem* of Banyer sometimes cures, when others fail.

PORRIGOPH'YTA, *Porrigo favosa*. *Porrigophyte* means the plant of favus or of porrigo favosa.

PORRILLON, Narcissus pseudonarcissus.

PORRUM, Allium porrum, Thymion.

PORRUS, Sarcoma, Thymion.

PORTA, πυλη, *Pylē*, (F.) *Porte*, 'a gate.' The

part of the liver or other organ—*hilus*—where its vessels enter as by a gate. See Liver. Also, the Vulva.

Porta Hepatis, see Liver — p. Jecoris, see Liver — p. Lienis, see Spleen.

Porta Vena, *Vena portæ, V. porta'rum* seu *ad portas* seu *porta'lis* seu *magna* seu *quæ ad portas est* seu *stelechia'a* seu *lac'tea* seu *ostia'ria* seu *arterio'sa* seu *arteriu'lis, Rama'lis vena, Jan'itrix, Manus Jec'oris* seu *he'patis, Veno ad portas*. The *System of the vena porta* or the *Abdomi'nal venous system* or *Portal system*, (F.) *Veine porte, Porte veine*, is a vascular apparatus of black blood, situate in the abdomen, and resulting from two distinct orders of vessels, united into one common trunk. 1. One of these trunks, much more extensive than the other, has received the name *Vena porta abdomina'lis*, because it arises from all the organs enclosed in the cavity of the abdomen, except the kidneys and bladder; and, in the female, the uterus. The *Abdominal vena porta* has two principal roots, the *splenic vein* and the *superior mesenteric*, which have their ramifications in all the digestive organs. 2. The other trunk, destined solely to the liver, has been called the *Hepat'ic vena porta*. It appears to be a continuation of the abdominal vena porta, and proceeds towards the inferior surface of the liver. Opposite the transverse fissure of that organ, it divides, like an artery, into two branches, which, by their union, seem to form a canal or duct, called by some the *Sinus of the vena porta*, or *of the portal vein*. These branches are distributed in the substance of the liver, whither they are accompanied by a prolongation of the fibrous capsule of that organ, — the capsule of Glisson. The different branches of the vena porta are devoid of valves. See Liver.

PORTAL, from *porta*, 'a gate.' Relating to the porta of the liver, — as the *portal* system, or system of the vena porta. By extension, the term has been applied to an analogous system of vessels in the kidney. See Kidney.

Portal Fissure, see Liver — p. Fossa, see Liver—p. System, see Porta Vena—p. System of the Kidney, see Kidney—p. Vein, Porta Vena—p. Veins of the Kidney, see Kidney.

PORTE-AIGUILLE, Acutenac'ulum, Needle-carrier, Needle-bearer, from (F.) *porter*, 'to carry,' and *aiguille*, 'a needle.' An instrument for accurately laying hold of a needle, and giving it greater length, when it is so fine and small that it cannot be held by the fingers. It is of steel or silver, about two inches long, and throughout the whole, almost, of its length, divided into two branches, so as to form a kind of forceps, capable of being closed by means of a sliding ring. A modification of this instrument was devised by Dr. Physick for taking up deep-seated arteries beyond the reach of a tenaculum or common needle. It consists of a forceps so constructed as to hold in its extremity a needle armed with a ligature. The handles of the forceps are fastened together, temporarily, by a spring or catch; and, when the needle is fairly deposited beneath the vessel, it is disengaged from the forceps and drawn out, leaving the ligature behind, which can be tied without difficulty.

PORTE-BOUGIE (F.). A silver canula similar to that of a trochar, except that it is longer. It is used for conducting bougies into the urethra.

PORTE-CAUSTIQUE, Porte-pierre — p. *Feuille*, Subscapularis.

PORTE-LAQ. An instrument for carrying the laq or fillet over the limb of the fœtus whilst in utero, when turning is necessary.

PORTE-LIGATURE, from *porter*, 'to carry,' and *ligature*. An instrument for conveying a ligature to deep-seated parts.

PORTE-MÈCHE (F.), from *porter*, 'to carry,' and *mèche*, 'a tent.' An instrument for carrying tents or *mèches* deeply into fistulous openings, or sinuses, to the bottom of ulcers, &c. It is a wire of silver or steel, four or five inches long, having a notch at one extremity, and a button at the other.

PORTE-MOXA (F.). A small instrument for keeping the moxa applied to a part to be cauterized. It consists of a metallic ring—separated from the skin by three supports of ebony — to which a handle is adapted.

PORTE-NŒUD (F.), from *porter*, 'to carry,' and *nœud*, 'a knot.' An instrument for carrying a ligature round the base or pedicle of a tumour.

PORTE-PIERRE (F.), *Porte-caustique, Caustic bearer*. An instrument similar to a *porte-crayon* for carrying lunar caustic.

PORTE-SONDE (F.). An instrument resembling a porte-crayon, employed for holding the style or *sonde*, and inserting it more readily into the nasal duct, during the operation for fistula lacrymalis.

PORTE VEINE, Porta vena.

PORTENTUM, Monster.

PORTER, Cerevisia.

PORTIO DURA, Facial nerve — p. Inter duram et mollem, Portio Wrisbergii—p. Intermedia Wrisbergii, Portio Wrisbergii — p. Media inter portionem duram et portionem mollem, Portio Wrisbergii.

Portio Mollis, Auditory nerve.

Por'tio Wrisber'gii, *P. interme'dia Wrisber'gii* seu *media inter portionem duram et portionem mollem* seu *inter duram et mollem*, (F.) *Faisceau intermédiare de Wrisberg, Intermédiaire de Wrisberg*. A small, white fasciculus, intermediate between the portio mollis and portio dura of the seventh pair of nerves, which was first described by Wrisberg. The Chorda Tympani is supposed by some to emanate from this nerve.

PORTION COSTO-TRACHÉLIENNE DU SACRO-SPINAL, Longissimus dorsi—*p. Écailleux* ou *squameux du temporal*. Squamous portion of the temporal — *p. Lombaire du plexus crural*, Lumbar plexus.

PORTION GODRONNÉ DE LA CORNE D'AMMON. A name given by Vicq d'Azyr to a small, denticulated cord, of a compact tissue and granular appearance, which unites the cornu ammonis to the paries of the lateral ventricle.

PORTONARIUM, Pylorus, Duodenum.

PORTULA'CA, *P. olera'cea, Andrach'nē, Al'lium Gal'licum, Purslane*, (F.) *Pourpier cultivé*. This plant abounds with a watery and somewhat acid juice; and is often put into soups or pickled with spices. It is regarded as antiseptic and aperient.

PORUS, Callus, Meatus — p. Acusticus, Auditory canal, internal.

Porus Op'ticus. An opening in the centre of the cribriform lamella of the sclerotic, through which the central artery of the retina enters the eyeball.

POSCA, Oxycrate.

POSE, Coryza.

POSIMOS, Potable.

POSITION, FALSE, False position.

POSOL'OGY, *Posolog''ia, Dosiolog''ia*, from *ποσος*, 'quantity,' and *λογος*, 'a discourse.' Indication of the doses in which the different articles of the materia medica ought to be exhibited. (F.) *Dosage*.

POSOQUERIA DUMETORUM, Randia Dumetorum.

POSSÉDÉ, Possessed.

POSSESS'ED, *Dæmoni'acus*, (F.) *Possédé*. One

affected with epilepsy, or other strange neurotic affection, was formerly supposed to be 'possessed' by a demon. Hence, exorcism and various religious ceremonies, at one time employed to drive off the intruder.

POSSET, *Posse'tum*, from (L.) *posca*, 'sour wine and water' [?]. Milk curdled with wine, or any acid, or treacle. A preparation of beer and milk; *Zythog'ala*.

POSSET, SACK, see Sack—p. Sago, see Sago.

POSSETTING, Regurgitation (of Infants).

POSTBRACHIALE, Metacarpus.

POSTCARPIUM, Metacarpus.

POSTE'RIOR ANNULA'RIS. An external, interosseous muscle, which arises from the corresponding sides of the metacarpal bones of the ring-finger and little finger, and is inserted into the inside of the tendon on the back of the ring-finger. Its use is to draw the ring-finger inwards.

POSTERIOR AURIS, Retrahens auris.

POSTERIOR IN'DICIS MANÛS. An internal, interosseous muscle, which arises from the inner or ulnar side of the metacarpal bone of the fore-finger, and is inserted into the inside of the tendon on the back of the fore-finger. Its *use* is to draw the fore-finger inwards.

POSTERIOR INDICIS PEDIS, *Abduc'tor Indicis Pedis*. An external, interosseous muscle, which arises from the contiguous sides of the metatarsal bones of the fore-toe, and second of the small toes, and is inserted into the outside of the root of the first bone of the fore-toe. Its *use* is to pull the fore-toe outwards.

POSTERIOR MI'DII DIG''ITI MANÛS. An external, interosseous muscle, which arises from the corresponding sides of the metacarpal bones of the middle and ring-fingers; and is inserted into the inside of the tendon on the back of the middle finger. Its *use* is to draw the middle finger inwards.

POSTERIOR MEDII DIG''ITI PEDIS. *Abductor medii digiti pedis*. An external, interosseous muscle, which originates from the contiguous sides of the metatarsal bones of the second and third of the small toes, and is inserted into the outside of the root of the first bone of the second of the small toes. Its *use* is to pull the toe outwards.

POSTERIOR TER'TII DIG''ITI, *Adduc'tor tertii digiti*. An external, interosseous muscle, which arises from the contiguous sides of the metatarsal bones of the third and fourth of the small toes, and is inserted into the outside of the root of the first bone of the third of the small toes. Its *use* is to pull the toe outwards.

POSTHE, Penis, Prepuce.

POSTHET'OMIST, *Posthet'omus*, from *ποσθη*, 'prepuce,' and *τομη*, 'incision.' One who performs the operation of circumcision.

POSTHETOMY, Circumcision.

POSTHIA, Hordeolum.

POSTHIOPLAS'TIC, *Posthioplas'ticus*, from *ποσθη*, 'the prepuce,' and *πλασσω*, 'I form.' An epithet applied to the operation for restoring the prepuce.

POSTHI'TIS, *Acrobysti'tis*, *Acroposthi'tis*, from *ποσθη*, 'the prepuce, the penis,' and *itis*, the termination for inflammation. Inflammation of the prepuce.

POSTHIUM, Prepuce.

POSTHON'CUS, from *ποσθη*, 'the prepuce or penis,' and *ογκος*, 'a tumour.' Swelling of the prepuce or penis.

POSTHOPLAS'TICA, from *ποσθη*, 'prepuce,' and *πλαστικος*, 'formative.' The art of making a new prepuce.

POST'HUMOUS, from *post*, 'after,' and *humus*, 'the ground.' Occurring after death.

POSTHUMOUS CHILD. One born after the death of its father, or taken from the dead body of its mother, as by the Cæsarean section.

POSTIME, Abscess.

POST-MORTEM. 'After death;' as '*a post mortem* or necroscopic examination.'

POST-NATUS. 'Born after.' In the old law writers, the second son.

POST-PARTUM. 'After delivery.' As '*post partum* hemorrhage.'

POSTPOSIT''IO, (*post*, 'after,' and *ponere*, *positum*, 'to place,') 'a postponement.' Delay in the return of a paroxysm. It is opposed to *anticipatio*, which means the return of a paroxysm earlier than its accustomed hour.

In this sense, we speak of an *anticipating*, and a *postponing* (*Febris hysteret'ica*) intermittent.

POSTREMA, Uterus.

PO'TABLE, *Potab'ilis*, from *potare*, 'to drink.' *Pot'imos*, *Potos*, *Pos'imos*, 'drinkable.' Water is said to be potable, when it contains atmospheric air; is not brackish; and has no mineral impregnation of consequence.

POTASH. So called from the pots or vessels in which it was made;—*Vegetable alkali*, *Gastrinum*. Also, Potass.

POTASH OF COMMERCE, *Potassa impu'ra*, *Impure potassa*, *Alu'men cati'num*, *Cin'eres Rus'sici*, *Subcar'bonas potas'æ impu'rus*, *Potas'æ car'bonas impurus*, *Lix'ivus cinis*, the *Pearlash* of commerce, is prepared from the ashes of landplants by calcination, solution in water, filtration, and evaporation. It usually consists of subcarbonate of potassa, sulphate of potassa, chloride of potassium, silex, oxide of iron, &c.

From the ashes of lees of wine, and from vine-twigs, a much purer alkali is obtained. It is called *Cinis infecto'rius* seu *fœcum*, *Cin'eres clavella'ti* seu *gravella'ti*, *Alu'men fœcum*, (F.) *Cendres gravelées* ou *de sarment*.

Another variety of the alkali is afforded by burning argol in a crucible; afterwards powdering and calcining it, till it is nearly white; then dissolving in water, filtering, and evaporating. It is called *Salt of Tartar*, *Sal Tar'tari*, *Kali præpara'tum e tar'taro*, *K. e tartaro*, *Subcar'bonas potassæ puris'simus*, *Potas'æ subcar'bonas e tar'taro*. Lastly, when wormwood is burnt to ashes, dissolved in water, filtered, and evaporated to dryness, it affords another variety of vegetable alkali, the *Sal absin'thii* or *Salt of wormwood*.

Impure potash is used for preparing the subcarbonate for medical use.

POTASS, Potassa fusa, Potash. The protoxide of potassium.

POTASSA, ACETATE OF, Potassæ acetas—p. Bichromate of, Potassæ bichromas—p. Bisulphate of, Potassæ supersulphas—p. Bitartrate of, Potassæ supertartras—p. Carbonate of, Potassæ carbonas—p. Carbonate of, pure, see Potassæ subcarbonas—p. Caustica cum calce, Potassa cum calce—p. Chlorate of, Potassæ murias hyperoxygenatus—p. Chromate of, Potassæ chromas—p. Chromate of, neutral, Potassæ chromas—p. Chromate of, yellow, Potassæ chromas.

POTAS'SA CUM CALCE, *P. opē calcis para'ta et ignē fusa*, *Potassa caust'ica cum calce*, *Potass with lime*, *Calx cum kali puro*, *Caus'ticum commu'nē for'tius*, *Lapis infernal'lis* sive *sep'ticus*, *Kali caus'ticum cum calcē*, *Lapis caus'ticus*, (F.) *Potasse préparée avec la chaux*, *P. à la Chaux*, *Pierre a cautère*. (*Potassæ*, *Calcis* ää ℥j. Rub together, and keep in a well-stopped bottle.—Ph. U. S.) Used for the same purposes as the next, but more manageable; being less deliquescent.

POTASSA, EUCHLORATE OF, Potassæ murias hyperoxygenatus—p. Ferrocyanate of, Potassii ferrocyanuretum—p. Ferroprussiate of, Potassæ cyanuretum

Potassa Fusa, *Potassa, Kali caus'ticum* seu *purum, Fused potass, Al'kali vegetab'ile fixum caus'ticum, Caus'ticum commu'nĕ acer'rimum, C. alkali'num* seu *commu'nĕ* seu *potentia'lĕ* seu *Sali'num, Hydras ka'licum, H. potas'sæ puræ fusæ, Potassæ hydras, Lapis caus'ticus* seu *causticus chirurgo'rum* seu *inferna'lis alcali'nus* seu *sep'ticus, Rupto'rium commu'nĕ, Fixed veg''etable alkali, Hydrate of Potassa*, (F.) *Potasse caustique.* (Prepared by evaporating solution of potass to dryness in an iron vessel.) This preparation is generally run into cylindrical moulds, covered with paper, and kept in well-corked vessels. It is powerfully escharotic, and is used for forming issues, curing strictures, &c.

Potassa, Fused, Potassa fusa—p. Hydriodate of, Potassæ hydriodas—p. Hydrobromate of, see Bromine—p. Hydrocyanate of, Potassii cyanuretum—p. Hypermanganate of, Potassæ hypermanganas—p. Hyperoxalas, Potass, oxalate of—p. Hypertartras, P. supertartras—p. Impura, Potash of commerce—p. and Iron, tartrate of, Ferrum tartarizatum—p. with Lime, Potassa cum calce—p. Liquida, Liquor potassæ—p. Mephite of, Potassæ subcarbonas—p. Monochromate of, Potassæ chromas—p. Muriate of, Potassæ murias—p. Nitrate of, Potassæ nitras—p. Ope calcis parata et igne fusa, Potassa cum calce—p. Oxymuriate of, Potassæ murias hyperoxygenatus—p. Permanganate of, Potassæ permanganas—p. Prussiate of, Potassii ferrocyanuretum—p. and Soda, tartrate of, Soda, tartrate of—p. Subcarbonate of, Potassæ subcarbonas—p. Sulphate of, Potassæ sulphas—p. Sulphate of, acid, Potassæ supersulphas—p. Sulphuret of, Potassæ sulphuretum—p. Supercarbonate of, Potassæ carbonas—p. Supersulphate of, Potassæ supersulphas—p. Supertartrate of, Potassæ supertartras—p. Tartrate of, Potassæ tartras.

Potas'sæ Ace'tas, *Oxytar'tarus, Acetas kali* seu *lixiv'iæ* seu *ka'licum, Al'kali tar'tari ace'to satura'tum, A. vegetab'ilĕ cum aceto, Magiste'rium tartari purgans, Terra folia'ta Tartari, Kali aceta'tum, Sal diuret'icus* seu *Senner'ti, Area'num tartari, Ac''etate of potass*, (F.) *Acétate de potasse.* (*Acid. acetic.* Oj, *Potassæ carbon*, q. s. Mix and add, by degrees, enough acetic acid to saturate the alkali; then filter and evaporate till a pellicle is formed, which is to be dried upon bibulous paper; evaporate again in a water-bath, and, removing the pellicles, dry.—Ph. U. S.)

It is cathartic and diuretic. Dose, ʒj to ʒij, or more.

Potassæ et Aluminæ Sulphas, Alumen—p. Biantimonias, Antimonium diaphoreticum—p. Bicarbonas, Potassæ carbonas.

Potas'sæ Bichro'mas, *Kali chro'micum rubrum* seu *ac''idum* seu *bichro'micum, Bichro'mate of potas'sa.* Procured by adding *sulphuric, nitric*, or *acetic acid* to a solution of the *neutral chromate*, and setting it aside to crystallize. It is a violent irritant poison; and has been used as a caustic in cases of morbid growths, in the proportion of from half a drachm to a drachm of the salt to from an ounce to an ounce and a half of water.

Potassæ Bisulphas, P. supersulphas—p. Bitartras, P. supertartras.

Potassæ Car'bonas, *Kali aëra'tum, Bicar'bonas potassæ, Potas'sæ bicar'bonas* (Ph. U. S., L., E., & D.), *Deutocarbonas potassii, Carbonate, bicar'bonate* or *supercar'bonate of potassa.* This is not caustic, like the subcarbonate of potass, and hence, has been preferred to relieve acidity. (*Potass. carbon.* lbiv, *Aquæ destillat.* Ox. Pass carbonic acid through the solution until it is saturated, and filter. Evaporate at a heat not exceeding 160°, and dry the crystals on bibulous paper. Carbonic acid is obtained from marble by the addition of dilute sulphuric acid.—Ph. U. S.) Dose, gr. x to ʒss. It is used in forming the soda powders, as well as for its antacid properties.

Distillers and brewers prepare this salt with great facility by suspending a solution of the *purified carbonate of potassa* in the fermenting tun. The alkaline salt is thus surrounded by an atmosphere of carbonic acid; and by absorbing it, it crystallizes into bicarbonate. The salt in powder is called *sal aëratus.* Its composition is betweer that of a carbonate and of a bicarbonate.

Potassæ Carbonas, P. subcarbonas—p. Carbonas e Lixivo Cinere, P. subcarbonas—p. Carbonas impurus, P. subcarbonas—p. Carbonas purus, Pure carbonate of potassa, see P. subcarbonas—p. Chloras, P. murias hyperoxygenatus—p. Chloruretum oxydatum, P. murias hyperoxygenatus.

Potas'sæ Chromas, *Kali chro'micum flavum* seu *neutra'lĕ, Neutral yellow Chromate* or *Monochromate of potassa.* Prepared by igniting a mixture of four parts of native *chromite of iron* (chrome iron ore) and one part of *nitre*; dissolving out the chromate of potassa by *water*, and crystallizing. It has been used as an emetic, expectorant and diaphoretic. Dose, as an emetic, from two to four grains; as an expectorant, from ⅛th to ½ grain. In the proportion of one drachm to 32 ounces of water, it has been used as an antiseptic wash—called by Jacobson, *Liquor conserva'trix.*

Potassæ Citras, *Citrate of potassa.* (*Acid. citric.* ʒx, *Potass. bicarb.* ʒxiv, *Aq.* q. s. Dissolve the acid in the water; and after effervescence has ceased, strain and evaporate to dryness. The salt is deliquescent, and must be kept in well-stopped bottles. Ph. U. S.) It possesses the refrigerant properties of the neutral salts, and may be given in fever, when to do little or nothing is the most advisable course. Dose, gr. x to ʒss.

Potassæ et Ferri Tartras, Ferri tartarizatum—p. Hydras, Potassa fusa.

Potassæ Hydri'odas, *Potassæ Protohydri'odas, Potas'sii protox'idi hydri'odas, Kali Hydriodin'icum* seu *Hydriod'icum, Hydriodas Ka'licus, Hydri'odate of potass*, (F.) *Hydriodate de potasse.* If a solution of potass be poured on iodine, an iodate and hydriodate are formed. These may be separated by means of alcohol, which only dissolves the latter of these salts. The hydriodate, or rather the *Iodide of Potas'sium, Kalium Ioda'tum, Potassii Iodure'tum* seu *Io'didum*, (F.) *Iodure de potassium*, may be obtained by evaporation. When the *Iodide of potassium* is dissolved in water, it becomes the *Hydriodate of Potassa.* The following is the formula in the Ph. U. S. *Potass.* ʒvj; *Iodin.* in pulv. ʒxvj; *Carbon. ligni* in pulv. subtiliss. ʒij; *Aq. bullient.* Oiij. Dissolve the potassa in the water: add the iodine gradually, stirring until the solution becomes colourless, and continue the additions until the liquid remains slightly coloured from excess of iodine. Evaporate to dryness, stirring in the charcoal towards the close. Rub to powder, and heat to dull redness in an iron crucible, keeping up the temperature for 15 minutes. When cool, dissolve out the saline matter with pure water, filter the solution, evaporate and set aside to crystallize. By evaporating and crystallizing as before, an additional quantity of crystals may be obtained. Virtues, —those of iodine.

Potassæ Mu'rias, *Sal Digesti'vus* seu *febrif'ugus Syl'vii, Spir'itus salis mari'ni coagula'tus, Muriate of Potass.* Bitter and refrigerant.

Potassæ Mu'rias Hyperoxygena'tus, *Potassæ Chloras* seu *oxymu'rias, Oxymu'riate, Hyperoxymu'riate, Chlorate* or *Euchlo'rate of potass*,

Protochlo'rate of potas'sium, Alcali vegetab'ilē salī'to-dephlogistica'tum, Chloruret'um potas'sæ oxyda'tum, Halōī'dum oxygena'tum, Oxyge'no-Chlorure'tum potas'sii, Kali chlo'ricum, Chloras Ka'licus depura'tus, (F.) *Chlorate de potasse.* It has been regarded as antineuropathic, and as an alterative purifier of the blood and humours. It is of doubtful efficacy. Dose, 3 to 6 grains or more.

Potassæ Nitras, *Nitrate of Potass, Nitrum, N. prismat'icum, Sal nitrum, Nitre, Saltpetre, Sal petra, Salse'do mucrum, Sanguin'ea, Berenic''ium, Haliwi'trum, Protonī'trate of Potas'sium, Nitrate of protox'ide of Potassium, Kali ni'tricum, Nitras ka'licus* seu *lixiv'iæ, Ax'otas potas'sicus*, (F.) *Nitrate* ou *Azotate de potasse.* Obtained from the putrefaction of animal matters, in contact with calcareous or alkaline earths, by elixiviation; adding, if necessary, wood-ashes to supply the alkaline basis. It is formed, in an impure state, by nature, in warm climates.

It is diuretic and refrigerant, and, in large doses, purgative; externally, cooling and detergent. Dose, gr. x to ʒj. In large doses it is an acrid poison.

Potassæ Nitras Fusus Sulpha'tis Paucil'lo Mixtus, *Sal prunel'læ, Crystal'lus minera'lis, Nitras potas'sæ cum sul'phurē fusus, Nitrum tabula'tum, Lapis Prunel'læ, Anod'yuum minera'lē, Sore-throat salt, Min'eral crystal.* Nitrate of potass, mixed with a little sulphate of potass and run into moulds. Its properties are those of nitre.

Potassæ Ox'alas, *Ox'alas Acid'ulum Potas'sæ* seu *Potas'sæ acid'ulus* seu *ba'sicus, Superox'alas ka'licum* seu *Potassæ, Hyperoxalas Potassæ, Sal Acetosel'læ, Oxa'lium, Kali oxal'icum acid'ulum, Ox'alas subpotas'sicus, Superox'alate of Protox'ide of Potas'sium, Oxalate of Potass, Salt of Sorrel*, (F.) *Sel d'oseille, Sel à détacher.* Prepared from the juice of wood sorrel. It is refrigerant, and is used to make lemonade, &c.

Potassæ Oxalas Acidulum, Potass, oxalate of — p. Oxymurias, P. murias hyperoxygenatus.

Potassæ Perman'ganas, *Perman'ganate of potas'sa, Hyperman'ganate of potassa*, has been given in cases of diabetes. Dose, from gr. ij to gr. v, three times a day. It has been prescribed, also, in obstinate dyspepsia.

Potassæ Protohydriodas, P. hydriodas — p. Puræ fusæ hydras, Potassa fusa — p. et Sodæ tartras, Soda, tartrate of.

Potassæ Subcar'bonas, *P. Car'bonas* (Ph. U. S.), *P. carbonas e Livi'vo Cin'erē, Subcar'bonas Kali, Car'bonas Potassæ, Kali præpara'tum, Sal Herba'rum* seu *Planta'rum* seu *Tar'tari* seu *Absin'thii, Calca'reous Tartar, Subcarbonate* or *Mephite of Potass*, &c. (See Potash.) A filtered solution of the *impure subcarbonate, Potas'sæ car'bonas impu'rus* (Ph. U. S.), *Pearl-ash* (see Potash), evaporated to dryness. This deliquescent salt is given in the same cases as the potassæ carbonas, than which it is more caustic and disagreeable.

The Parisian codex has a *Subcar'bonas Potas'sæ ex tar'taro combus'to*, vulgo *Sal Tartari* or *Salt of Tartar* — (it is the *Potassæ carbonas purus, Pure Carbonate of Potassa*, Ph. U. S.); a *Subcarbonas Potassæ ex deflagran'tibus simul tar'tratē acid'ulo et Nitrate Potassæ paratus*, vulgo *Nitrum ex tartaro fixum*; and a *Subcarbonas potassæ ex deflagran'tē cum Carbon'ibus Nitra'tē Potassæ paratus*, vulgo *Nitrum fixum.* They are all used like the preceding.

Potassæ Subcarbonas Impurus, Potash of commerce.

Potassæ Sulphas, *Kali vitriola'tum* seu *sulphu'ricum, Sulphas Kali Lixiv'ia vitriola'ta, Nitrum vitriolatum Schroederi, Sal Sapien'tiæ* seu *Tar'tari Sulphura'tum* seu *Polychres'tus, Specif'icum Paracel'si, Spi'ritus vitrioli coagula'tus Mynsichti, Al'kali vegeta'bilē vitriolatum, Sal de duobus, Arca'num duplica'tum, Tar'tarum vitriolatum, Panace'a Ducis Holsa'tiæ* seu *duplica'ta, Sulphate of Potass, Protosulph'ate of Potas'sium*, (F.) *Sulfate de potasse.* (The salt, that remains after the distillation of nitric acid, dissolved; the excess of acid saturated with subcarbonate of potass and crystallized.) Purgative and diuretic. Dose, ʒss to ʒj as a laxative. In a large dose it has proved an irritant poison.

Potassæ Sulphas cum Sul'phurē, *Sal Polychres'tus Glase'ri, Lixiv'ia Vitriola'ta Sulphu'rea.* (Formed by deflagrating nitrate of potass with sublimed sulphur.) Same virtues as the last. Dose, gr. xv to xxx.

Potassæ Sulphuretum, Potassii sulphuretum — p. Superoxalas, Potassæ oxalas.

Potassæ Supersul'phas, *P. Bisulphas, Sal enix'um* seu *febrif'ugus of Lem'ery, Supersulphate of Potass, Acid Sulphate* or *Bisulphate of Potass, Super-protosulphate of Potas'sium*, (F.) *Bisulfate de Potasse.* (The salt remaining after the distillation of nitric acid, dissolved, strained, and crystallized.) It is refrigerant and purgative. Dose, ʒss to ʒij.

Potassæ Supertar'tras Impu'rus, *Tar'tarus crudus, Tar'tarum, Lapis vini, Magneti'nus, Pedagra, Tartar*, (F.) *Tartre cru* ou *brut.* It is called, also, *Tartarum rubrum* and *Red Argol*, when obtained from red wines; *Tartarum album* or *White Argol*, when from white wines. Tartar is the saline deposit from wines as they become aged; which attaches itself to the sides of the casks and bottles in which they are kept. It consists of a considerable quantity of acidulous tartrate of potass, tartrate of lime, silica, alumen, oxyd of iron, manganese, and a red colouring matter, if the wine be red. It is chiefly used for the preparation of cream of tartar.

Potassæ Supertar'tras, *P. hypertar'tras, P. Bitar'tras* (Ph. U. S.) seu *tartras ac''ida, Crystal'li Tar'tari, Tartras Acid'ulus Potassæ purus, T. superpotas'sicus, T. subpotas'sicus, Supertar'trate of Protox'ide of Potas'sium, Bitartrate* or *Supertartrate of Potass, Crystals of Tartar, Cremor Tar'tari, Cream of Tartar* (when in powder), *Supertar'trate of Potass*, (F.) *Tartrate acide de potasse, Crème de Tartre.* (The tartar of wine purified.) It requires 60 parts of water at 60° to dissolve it. It is mildly purgative, refrigerant and diuretic. Dissolved in water, with a small quantity of white wine, some sugar and lemon-peel, it forms an agreeable beverage in febrile diseases, under the name of *Imperial.* Dose, as a diuretic, ʒj to ʒij; as a purgative, ʒss to ʒj.

Potassæ Tartras, *Kali tartariza'tum, Al'cali fixum tartarisatum, Tar'tarum solu'bilē, Tartarus tartariza'tus, Lixiv'ia Tartarisa'ta, Sal Panchres't'um, Tartras Kali'nus* seu *lixiv'iæ, Sal vegetab'ilis, Alkali vegetab'ilē tartarizatum, Tartrate of Potass. Soluble Tartar*, (F.) *Tartrate de Potasse.* (*Potassæ carbon.* ʒxvj; *Potassæ Bitartrat.* in pulv. subtiliss. ℔ij, vel q. s., *aquæ bullientis*, cong. Dissolve the carbonate of potassa in the water, add the bitartrate to saturation, and boil; filter, evaporate till a pellicle forms, and set aside to crystallize. Pour off the liquid; dry the crystals on bibulous paper, and keep in closely-stopped bottles. — Ph. U. S.) A saline cathartic in the dose of ʒij to ʒj.

Potassæ Tartras Acida, P. supertartras — p. Tartras acidulus purus, P. supertartras — p. Tartras stibialis seu stibiosus, Antimonium tartarizatum.

Potasse, acétate de, Potassæ acetas — *p. Bisulphate de*, Potassæ supersulphas — *p. Caustique*, Potassa fusa — *p. à la Chaux*, Potassa cum calce — *p. Chlorate de*, Potassæ murias hyperoxygenatus — *p. Hydriodate de*, Potassæ hy-

driodas—*p. Liquide*, Liquor potassæ—*p. Nitrate de*, Potassæ nitras—*p. Préparée avec la chaux*, Potassa cum calce—*p. et de Soude, tartrate de*, Soda, tartrate of—*p. Sulfate de*, Potassæ sulphas—*p. Sulfure de*, Potassii sulphuretum—*p. Tartrate de*, Potassæ tartras—*p. Tartrate acide de*, Potassæ supertartras.

POTAS'SII BRO'MIDUM, *Potas'sæ hydrobro'mas, Bromide of potassium*, (F.) *Bromure de Potassium*. (*Bromin*, ℥ij; *Ferri fili*, ℥j; *Potass. carbon.* ℥ij and ℥j, vel q. s.; *Aq. destillat.*, Oiv. Add the iron filings and bromine to a pint and a half of the water; stirring for half an hour. Apply a gentle heat, and when the liquor assumes a greenish colour, add gradually the carbonate of potassa, dissolved in Oiss of the water, until it ceases to cause a precipitate. Continue the heat for half an hour, and filter. Wash the precipitate with the remaining water, boiling hot, and filter. Mix the liquors and crystallize by evaporation.—Ph. U. S.) Virtues:—those of iodide of iron.

Potassii Cyanidum, P. Cyanuretum.

Potassii Cyanure'tum, *P. Cyan'idum, Cyanuret of Potassium, Hydrocy'anate of Potassa.* (*Potassii Ferrocyanur.*, in pulv. ℥viij; *Potass. Carbonat.* exsiccat., ℥iij. Mix intimately and throw into a deep iron crucible, heated to redness; keep up the heat till effervescence ceases, and the fused mass concretes, of a pure white colour, upon a warm glass rod dipped into it; then pour out the liquid carefully into a shallow dish to solidify, stopping before the salt becomes contaminated with the precipitated iron. Break up the mass whilst warm, and preserve in well-stopped bottles.—Ph. U. S.) Used in the same cases as the hydrocyanic acid. Dose, a quarter of a grain.

Potassii Deuto-carbonas, Potassæ carbonas.

Potassii Ferrocyanure'tum, *P. Ferrocyan'idum, Ferrocy'anide* or *Ferrocyan'uret of Potassium, Ferrocy'anate* or *Ferroprussiate* or *Prussiate of Potassa*, (F.) *Protocyanure jaune de fer et de potassium, Cyanure de fer et de potassium*. The yellow double cyanuret of potassium and iron, the salt from which the cyanuret of potassium is obtained by calcination. It is not much used in medicine. It has been advised as an astringent in the colliquative sweats of phthisis, in leucorrhœa, &c.; but it does not seem to be possessed of much activity. Dose, 10 or 15 grains every four or five hours.

Potassii Hydrar'gyro-iod'idum, *Potassæ Iodohydrar'gyras, Hydrargyrum biiodatum cum kalio iodato, Kalium iodatum hydrargyratum, Iodhydrar'gyrate* or *Hydrargyro-iodide of Potassium*. This salt is made by the combination of *iodide of potassium* with *red iodide of mercury*. Its properties are similar to those of the iodides of mercury, but in a less degree.

Potassii Iodidum, Potassæ hydriodas—p. Iduretum, Potassæ hydriodas—p. Oxygeno-chloruretum, Potassæ murias hyperoxygenatus—p. Protoxidi hydriodas, Potassæ hydriodas.

Potassii Sulpho-cyanure'tum, *Sulpho-cyan'uret of Potas'sium*. This salt has been prepared as a substitute for hydrocyanic acid, and cyanuret of potassium, on the ground of its possessing their advantages without their inconveniences.

Potassii Sulphure'tum, *Potas'sæ Sulphure'tum* seu *tersulphure'tum, Kali sulphuretum, Hepar Sulph'uris, H. sulphuris sali'num* seu *sulph'uris vulga'ris, Sulphure'tum lixiv'iæ* seu *ka'licum, Liver of Sulphur, Sulphuret of Potass*, (F.) *Sulfure de potasse, Sulfure de potassium sulfaté, Foie de Soufre*. (*Sulphur.* ℥j. *Potassæ carb.* ℥ij. Rub them together, and place the mixture in a covered crucible upon the fire until they unite. It has been employed in affections of the chest, as an expectorant, in the dose of from ℥ss to ℥j, largely diluted; but it is chiefly used as a bath or wash in cases of itch, tinea capitis, and other cutaneous affections.)

Potassii Tersulphuretum, Potassii sulphuretum.

POTASSIUM. Same etymon as potash. The metallic base of potassa.

POTASSIUM, BROMURE DE, see Bromine—p. Cyanuret of, Potassii cyanuretum—p. Ferrocyanide of, Potassii ferrocyanuretum—p. Ferrocyanuret of, Potassii ferrocyanuretum—p. Iodide of, Potassæ hydriodas—p. Iodohydrargyrate of, Potassii hydrargyro-iodidum—*p. Iodure de*, Potassæ hydriodas—p. Oxide of, Potass—p. Protoarsenite of, Arsenite of protoxide of potassium—p. Protochlorate of, Potassæ murias hyperoxygenatus—p. Protonitrate of, Potassæ nitras—p. Protoxide of, Potass—p. Protoxide of, nitrate of, Potassæ nitras—p. Protoxide of, superoxalate of, Potass, oxalate of—p. Protoxide of, supertartrate of, Potassæ supertartras—p. Protosulphate of, Potassæ sulphas—*p. Sulfure de, sulfaté*, Potassii sulphuretum—p. Sulphuret of, Potassii sulphuretum—p. Superprotosulphate of, Potassæ supersulphas.

POTATO, Solanum tuberosum.

Potato Fly, Lytta vittata.

Potato, Hog, Convolvulus panduratus.

Potato Oil, Oil, fusel. By distilling potato oil with anhydrous phosphoric acid, a volatile colorless oily liquid is procured, which is lighter than water, and boils at 102°. This is *Am'ylene* or *Am'ylen*, (F.) *Amylène*. It is best prepared from fusel oil by the action of chloride of zinc. The vapour has been employed as an anæsthetic.

Potato, Spanish, Convolvulus batatas—p. Sweet, Convolvulus batatas.

Potato Vine, Wild, Convolvulus panduratus.

Potato, Wild, Convolvulus panduratus.

POTBELLY, Physconia.

POTECARY, Apothecary.

POTELÉE, Hyoscyamus.

POTENTIA, Force.

Poten'tia seu Potes'tas Coëun'di, Capability of copulation.

Potentia Generan'di. The power of procreation.

Potentia Irritans, Stimulus.

POTEN'TIAL, *Potentia'lis*, (F.) *Potentiel*; from *potens*, 'able.' An epithet for remedies which, although energetic, do not act till sometime after their application. The caustic alkalies, for instance, are called *Potential cauteries* in contradistinction to the hot iron, which is termed *actual*.

POTENTILLA, P. reptans.

Potentil'la Anseri'na, *P. argenti'na* seu *impo'lita* seu *neglec'ta, Argenti'na vulga'ris, Fraga'ria anseri'na, Ar'gentine, Chenobos'con, Argenta'ria, Anseri'na, Silver Weed, Wild Tansy, Moorgrass*, (F.) *Argentine, Potentille, Herbe aux oies. Ord.* Rosaceæ. The leaves are mildly astringent and tonic.

Potentilla Argentina, P. anserina—p. Impolita, P. anserina—p. Neglecta, P. anserina.

Potentilla Norveg''ica, *Norway Cinque-foil*, an indigenous plant, is possessed of similar properties.

Potentilla Palustris, Comarum palustre.

Potentil'la Reptans, *Pentaphyl'lum, Fraga'ria pentaphyl'lum, Potentil'la, Quinquefo'lium, Q. majus, Common cinquefoil*, (F.) *Potentille rampante, Quintefeuille*. The roots are possessed of astringent properties.

Potentilla Tormentilla, Tormentilla.

POTENTILLE, Potentilla anserina—*p. Rampante*, Potentilla reptans.

POTENTIZING, see Dynamic.

POTERIUM SANGUISORBA, Pimpinella saxifraga.

POTESTAS COEUNDI, Potentia coeundi—p. Generandi, Potentia generandi.

POTEX, Anus.

POTHOMOR'PHA PELTA'TA, *Pothomor'phē pelta'ta*, (*pothos*, and *μορφη*, 'shape,') *Caapeba* [?]. A Brazilian plant, *Order*, Piperaceæ, which is possessed of diuretic properties, and has been given in strangury.

POTHOMORPHA UMBELLA'TA, also called *Caapeba* [?], is used in Brazil to modify nutrition, as in glandular affections, in which it is also given externally in the form of decoction.

POTHOS FŒTIDA, Dracontium fœtidum—p. Putorii, Dracontium fœtidum.

POTIMOS, Potable.

POTIO, Drink, Haustus, Potion — p. Calcis carbonatis, Mistura cretæ — p. Effervescens antiemetica, Potion of Riverius — p. Leniens, Looch ex ovo — p. Oleosa, Looch ex ovo — p. Picea, see Pinus sylvestris.

POTION (F.), *Potio;* from *poto*, 'I drink.' *Hydrolé, Hydrolite.* A liquid medicine, from 4 to 8 ounces or more in quantity, the composition of which varies, and which is administered in divided doses. It corresponds to the English *mixture.* See Mistura.

POTION PECTORALE, Looch ex ovo.

POTION OF RIVE'RIUS. A mixture of *Lemon Juice* and *Subcarbonate of Potass*, — generally given in a state of effervescence. It is the *Potio efferves'cens anti-emet'ica dicta Rive'rii*, of the Parisian codex. The name in the codex indicates its use.

POTIONIS DESIDERIUM, Thirst.

POTIRON, Cucurbita pepo.

POTIUNCULA, Haustus.

POTOPARANŒA, Delirium tremens.

POTOS, Potable.

POTOTROMOPARANŒA, Delirium tremens.

POTTINGAR, Apothecary.

POTT'S CURVATURE, Vertebral disease.

POTT'S DISEASE, Vertebral disease.

POTUS, Drink — p. Hippocraticus, Claret.

POU, Pediculus.

POUCE, Pollex, see Digitus.

POUCHED, Encysted.

POUCHES, LARYNGEAL, see Laryngeal pouches.

POUDRE, Powder, Pulvis — *p. Absorbante et anti-acide*, Pulvis de magnesiâ compositus — *p. d'Alun composée*, Pulvis sulphatis aluminæ compositus — *p. Antiarthritique amère*, Pulvis de amaris compositus — *p. Antiasthmatique*, Pulvis de sulphure et scillâ—*p. Antimoniate composée* ou *de James*, Antimonial powder — *p. Incisive*, Pulvis de sulphure et scillâ—*p. d'Ipecacuanha et opium*, Pulvis ipecacuanhæ compositus — *p. de Jalap composée*, Pulvis jalapæ compositus — *p. de Kino composée*, Pulvis kino compositus — *p. de la Mirandole*, Pulvis Ducis Portlandiæ—*p. de Pérard*, Pulvis de sennâ, scammoneâ et lignis — *p. de Quercetanus*, Pulvis e gummi guttâ—*p. de Rousselot*, Powder, arsenical, of Côme — *p. de Saint Ange*, Pulvis asari compositus—*p. de Savon végétale*, Pulvis gummosus alkalinus—*p. de Scammonée composée*, Pulvis scammoneæ compositus—*p. de Sedlitz*, Powders, Seidlitz — *p. de Séné composée*, Pulvis sennæ comp. — *p. de Sentinelli*, Magnesiæ carbonas — *p. Styptique*, Pulvis sulphatis aluminæ compositus.

POUDRE SUBTIL DE DELCROIX. A fashionable depilatory "for removing superfluous hair in less than ten minutes." It is said to consist of *Quicklime* and *Sulphuret of Arsenic*, with some vegetable powder.— Paris.

POUDRE TEMPÉRANTE DE STAHL, Pulvis de sulphate potassæ compositus — *p. de Tennant*, Calcis chloridum—*p. de Valentini*, Magnesiæ carbonas—*p. Vermifuge mercurielle*, Pulvis e sulphureto hydrargyro nigro et scammonio—*p. Vermifuge sans mercure*, Pulvis ex helminthocorto compositus.

POUDRE DE ZWINGER, Magnesiæ carbonas.

POUGUES, MINERAL WATERS OF. These alkaline waters are in the department of Nièvre, France. They contain carbonic acid, carbonates of soda, lime, and magnesia; chloride of sodium; alumina, and silica, with protoxide of iron.

POUKE, Papula.

POULAIN, Bubo.

POULET, VIN DE (F.) *Pullet Wine.* A disgusting preparation, made by infusing the excrement of the pullet in white wine. According to Nysten, it is employed by the vulgar in France in a number of diseases, and especially in falls, contusions, &c.

POULIOT, Mentha pulegium.

POULS, Pulse—*p. Abdominal*, Pulsus inferior —*p. des Adultes*, Pulse, natural—*p. Agité*, Pulsus fortis — *p. Bas*, Pulse, low — *p. Capital*, Pulse, nasal—*p. Combiné*, Pulse, complex—*p. POULTICE, Cataplasm. For different poultices, see Cataplasm and Cataplasma.

POUNCE, Sandarac.

POUND, *Libra, Litra, λιτρα, Pondo, Bage'dia* (of twelve oz.), *Barda'dia*, (F.) *Livre*, from *pondere*, 'to weigh.' A weight, consisting of twelve ounces Troy,—sixteen ounces avoirdupois. See Weights and Measures.

POURD-MILK, Colostrum.

POURPIER CULTIVÉ, Portulaca.

POURPRE, Purpura—*p. Blanc*, Miliary fever—*p. de Cassius*, Purple of Cassius.

POURRITURE, Putrefaction—*p. d'Hôpital*, Hospital gangrene.

POUS, Pes.

POUSSE, Pursiness.

POUSSÉE, Lichen.

POUSSIÈRE TUBERCULEUSE (F.), 'Tuberculous Dust.' A name given by MM. Rilliet and Barthez to fine white or yellow minute points of tuberculous matter occurring in myriads, so as to be likened to dust.

POUSSIF, see Pursiness.

POW, Head.

POWDER, Pulvis.

POWDER OF ÆTHIO'PIA, GUY'S. A once celebrated anthelmintic, which consisted of pure *rasped tin, mercury*, and *sulphur*, triturated together.

POWDER OF ALOES, COMPOUND, Pulvis aloes compositus, Pulvis sulphatis aluminæ compositus—p. of Aloes with canella, Pulvis aloes cum canellâ—p. Alum, compound, Pulvis sulphatis aluminæ compositus—p. Antimonial, Chenevix's, Antimonial powder—p. Aromatic, Pulvis cinnamomi compositus.

POWDER, ARSEN'ICAL, OF CÔME, *Côme's powder*, (F.) *Poudre caustique du frère Cosme* ou *de Rousselot*—a caustic—is formed of *arsenious acid*, gr. x; *red sulphuret of mercury*, gr. xl; powdered *animal charcoal*, gr. x. It is made into a paste with mucilage.

POWDER, ARSEN'ICAL, OF JUSTAMOND, is made by melting *sulphuret of antimony* 16 parts; *arsenious acid* 1 part, in a crucible. When the mass is cold it must be reduced to powder, and five parts of *extract of opium* be added.

POWDER OF ARUM, compound, Pulvis de aro compositus—p. of Asarabacca, compound, Pulvis asari compositus—p. of Bladder-wrack, yellow, Pulvis quercûs marinæ—p. Bleaching, Calcis chloridum—p. Camboge, Pulvis e gummi guttâ—p. Cardinal del Lugo's, Cinchona—p. Castillon, see Powders, Castillon—p. of Catechu, compound, Pulvis Catechu compositus—p. of Chalk. compound, Pulvis cretæ compositus—p. of Chalk with opium, compound, Pulvis cretæ compositus cum opio—p. of Cinnamon, compound, Pulvis cinnamomi compositus—p. Côme's, Powder arsenical of Côme—p. of Contrayerva, compound, Pulvis contrayervæ compositus—p. Countess's, Cinchona—p. Countess of Kent's, Cantianus pulvis—p. Cyprus, Hibiscus abelmoschus—p. Dover's, Pulvis ipecacuanhæ compositus.

POWDER OF DUPUYTREN (CAUSTIC;) (F.) *Poudre de Dupuytren*, formed of 1 part of arsenious acid and 200 parts of mild chloride of mercury. A mild and manageable caustic for causing an eschar on exposed surfaces, and in lupus, &c.

POWDER, EARL OF WARWICK'S, Pulvis cornachini—p. of Ethiopia, Powder of Æthiopia.

POWDER OF FAYNARD. A celebrated powder for arresting hemorrhage, said to be nothing more than the charcoal of beech wood finely pulverized.

POWDER, FEVER, SCHWANBERG'S, Antimonial powder.

POWDER-FOLDER, In Pharmacy, an apparatus by which papers containing powders are folded of the desired length.

POWDER, GINGER-BEER, see Amomum zingiber—p. Gout, Duke of Portland's, Pulvis Ducis Portlandiæ—p. Gray, Hydrargyrum cum cretâ—p. of burnt Hartshorn with opium, Pulvis cornu cervi cum opio—p. of Ipecacuanha, compound, Pulvis ipecacuanhæ compositus—p. of Jalap, compound, Pulvis jalapæ compositus—p. James's factitious, Antimonial powder—p. Jesuit's, Cinchona—p. of Kino, compound, Pulvis kino compositus.

POWDER, KNOX'S. A disinfecting preparation, composed of eight parts of *chloride of sodium*, and three parts of *chlorinated lime*. An ounce, dissolved in a tumblerful of water, forms a solution of proper strength.

POWDER OF LEMONADE, see Lemonade—p. of Magnesia, compound, Pulvis de magnesiâ compositus—p. of the Marquis, Marchionis pulvis—p. Mead's, against the bite of a Mad dog, Pulvis antilyssus—p. Myrrh, compound, Pulvis myrrhæ compositus—p. Portland, Pulvis Ducis Portlandiæ—p. of Rhubarb, compound, Pulvis rhei compositus—p. Saline, compound, Pulvis salinus compositus—p. of the three Sanders, see Diatrium—p. Scammony and aloes, Pulvis scammonii cum aloe—p. Scammony, compound, Pulvis scammoniæ compositus—p. of Senna, compound, Pulvis sennæ compositus—p. Sneezing, see Veratrum album—p. Spruce beer, see Spruce beer—p. of Sympathy, Sympathetic powder—p. Talbor's, Cinchona—p. Tennant's, Calcis chloridum—p. Tonquin, Pulvis cobbii—p. Tooth, Dentifrice—p. Tragacanth, compound, Pulvis tragacanthæ compositus.

POWDER, VIEN'NA, is composed of equal parts of quicklime and potassa cum calce. In using it, it is made into a paste—*Vienna paste*, (F.) *Caustique de Vienne, Pâte Caustique de Vienne*—with spirits of wine, and is applied on the diseased part, previously circumscribed by a hole cut in a sticking plaster.

To be left on from 10 to 20 minutes, according to the depth of the eschar required. Used in cases of lupous ulceration.

By fusing the potass and lime, and raising the heat so as to cause ebullition, the caustic may be run into cylinders:—when it is called *Caustique-Filhos, Caus'ticum Viennen'sè fusum Filhos*, from the name of the author of the process.

POWDERS, CASTILLON, or CASTILHON, so called from the name of the physician who first proposed them. They are formed of *sago*, in powder; *salep*, in powder; *tragacanth*, in powder, each, four parts; *prepared oyster-shells*, one part, *cochineal*, half a part, divided into powders of one drachm each; one of which is given three or four times a day as a demulcent in diarrhœa and dysentery. Dorvault makes *poudre de Castilhon* synonymous with arrow root.

POWDERS, SODA, *Pulveres effervescen'tes*, (F.) *Poudres gazifères simples*. (*Sodæ carb.* ℥ss, in each *blue* paper; *tartaric acid*, gr. xxv, in each *white* paper; for half a pint of water.) A pleasant, cooling drink; taken during the effervescence.

Seidlitz Powders, (F.) *Poudres gazifères laxatives* ou *Poudres de Sedlitz*, contain one or two drachms of tartrate of potassa and soda, added to the alkali in blue paper.

POWER, Faculty—p. Inherent, Irritability—p. Sensorial, see Sensorial—p. Tonic, Irritability.

POX, Syphilis, Variola—p. Chicken, Varicella.

POX DOCTOR, Syphilidiater.

POX, FRENCH, Syphilis—p. Grease, see Grease—p. Horn, see Varicella—p. Noddle, Syphilomania—p. Small, Variola—p. Swine, see Varicella—p. Water, see Varicella.

POZZUOLI, MINERAL WATERS OF. Pozzuoli is in the neighbourhood of Naples. The springs are, 1. *Aqua della pietra*, Temp. 91° Fah. 2. *Aequa di Cavalcanti*, Temp. 100°. *A. di subveni homini*, Temp. 102°; *A. del cantarello*, Temp. 86 to 89°; and that of the Temple of Serapis in Pozzuoli, Temp. 102 to 107°. The last contains carbonic acid, carbonates of lime, magnesia, alumina, and iron, carbonate of soda, chloride of sodium, sulphate of lime, and silica.

PRACTICE OF PHYSIC, Therapeutics.

PRACTITIONER, GENERAL, Surgeon apothecary—p. Irregular, see Irregular—p. Regular, see Regular — p. Routine, Routinist.

PRÆ. In composition, means 'before.'

PRÆBIUM, Dose.

PRÆCAUTIO, Prophylaxis.

PRÆCIPITANS, Absorbent — p. Magnum, Sepia.

PRÆCIPITATUM ALBUM, Hydrargyrum præcipitatum.

PRÆCIPITATUS RUBER, Hydrargyri nitrico-oxydum.

PRÆCISIO PRÆPUTII, Circumcision.

PRÆCOCIA, Prunus Armeniaca.

PRÆCOCITY, Precocity.

PRÆCOGNITIO, Prognosis.

PRÆCORD'IA, from *præ*, and *cor, cordis*, 'the heart.' The diaphragm; also, the thoracic viscera, and the epigastrium.

PRÆCOR'DIAL or PRECORDIAL REGION, *Regio præcordiaca* seu *præcordia'lis*, is the epigastric region. Also, and more properly, the region of the heart. A line drawn from the inferior margins of the third ribs across the sternum, passes over the valves of the pulmonary artery a little to the left of the mesial line, and those of the aorta are behind them, but about half an inch lower down. A vertical line, coinciding with the left margin of the sternum, has about one-third of the heart, comprising the upper portion of the right ventricle, on the right, — and two-thirds, comprising the lower portion of the right ventricle and the whole of the left, on the left. This is the præcordial region.

PRÆCORDIUM, *Fossette du cœur* — p. Pedis, Metatarsus.

PRÆCOX MATURITAS, Precocity.

PRÆCUSTODIA, Prophylaxis.

PRÆDIASTOLICUS, Prediastolic.

PRÆDICTIO, Prognosis.

PRÆDISPOSITIO, Predisposition.

PRÆDIVINATIO, Mantia.

PRÆDOMIN'IUM, from *præ*, and *domo, domitum*, 'I subdue.' Predominance of one thing over another.

PRÆDOMIN'IUM AQUÆ. A predominance of watery fluid, — *Tenu'itas aquo'sa*.

PRÆDOMINIUM SAN'GUINIS ARTERIO'SI. A predominance of arterial blood, *Arterios'itas sanguinis*.

PRÆDOMIN'IUM SAN'GUINIS VENO'SI, *Venos'itas San'guinis*. Predominance of venous blood.

PRÆFOCATIO, Orthopnœa, Suffocation — p. Faucium, Angone—p. Matricis, Angone—p. Uterina, Angone.

PRÆFOCATION, Strangulatio uterina.

PRÆFORMATIO, Preformation.

PRÆGNANS, Pregnant.

PRÆGNAS, Pregnant.

PRÆGNATIO, Fecundation, Pregnancy.

PRÆGNATUS, Fecundation, Pregnancy.

PRÆGNAX, Pregnant.

PRÆGUSTATIO, *Avant-gout*.

PRÆHENSIO, Prehensio.

PRÆLIN'GUA. The anterior part or tip of the tongue.

PRÆLIUM, Coition, Press, Tourniquet — p. Arteriale, Tourniquet.

PRÆLUMBARIS, Prelumbar.

PRÆNOTIO, Prognosis.

PRÆNUNTIATIO, Prognosis.

PRÆPARATIO, Preparation—p. Chyli, Chylification.

PRÆPARATUM, Preparation.

PRÆPOTEN'TIA, from *præ*, and *potens*, 'powerful,' Great power or strength.

PRÆPOTEN'TIA VIRI'LIS. Great, or too great procreative power on the part of the male.

PRÆPOTIO, Propotismus.

PRÆPUTIALIS, Preputial.

PRÆPUTIUM, Prepuce.

PRÆSAGIUM, Mantia.

PRÆSCIENTIA, Prognosis.

PRÆSCITIO, Prognosis.

PRÆSCRIPTIO, Prescription.

PRÆSCRIPTUM, Prescription.

PRÆSEPIOLUM, Alveolus.

PRÆSEPIUM, Alveolus.

PRÆSERVATIO, Prophylaxis.

PRÆSERVATIVUM, Amuletum.

PRÆSERVATO'RIA INDICA'TIO. A preservative indication; one proper for preventing the development of disease.

PRÆSERVATORIUS, Prophylactic.

PRÆSPINALIS, Prespinal.

PRÆTIBIALIS, Pretibial.

PRAIRIE BUSH, STINKING, Ptelea trifoliata — p. Pines, Liatris.

PRASINUM VIRIDE, Cupri subacetas.

PRASINUS, Porraceous.

PRASI'TES, from *prasium*, 'horehound.' Wine in which the leaves of horehound have been infused.

PRASIUM, Marrubium.

PRASUM, Allium prasum.

PRAXIS, Action.

PRAXIS MED'ICA. The practical exercise of the healing art.

PREASER, Rennet.

PRECIPITATE, RED, Hydrargyri nitrico-oxydum — p. White, Hydrargyrum præcipitatum.

PRECIPITA'TION, *Præcipita'tio*, (F.) *Précipité*, from *præcipitare*, *præcipitatum*, (*præ*, and *caput*, 'the head,') 'to throw *headlong*.' The action by which a body abandons a liquid in which it is dissolved, and becomes deposited at the bottom of the vessel. The matter, so thrown down or precipitated, is called a *precipitate*.

PRÉCIPITATION DE LA MATRICE, Procidentia uteri.

PRÉCIPITE BLANC, Hydrargyrum præcipitatum—*p. Noir*, see Hydrargyri oxydum cinereum—*p. Oxydum per se*, Hydrargyri nitrico-oxydum—*p. Rouge*, Hydrargyri nitrico-oxydum.

PRECOC''ITY, *Preco'ciousness*, (F.) *Précocité*, *Præcox matu'ritas*, *Matu'rity preco'cious*, from *præ*, 'before,' and *coquere*, 'to cook.' Rapid development before the usual time. See Præotia.

PRECORDIAL, Præcordial.

PRECUR'SORY, *Præcurso'rius*, (F.) *Précurseur*, from *præ*, and *curro*, *cursum*, 'I run.' That which precedes.

PRECUR'SORY or PREMON'ITORY SIGNS or SYMPTOMS, (F.) *Signes précurseurs* ou *prémonitoires*, *S. avant coureurs*, are those which indicate an approaching disease.

PREDIAS'TOLIC. *Prædiastol'icus*, from *præ*, and *diastole*. That which precedes the diastole of the heart,—as '*prediastolic* friction sound.'

PREDISPONENT or PREDISPOSING CAUSES, see Causes, predisponent.

PREDISPOSIT''ION, *Prædisposit''io*, *Semin'ia morbo'rum* (Gaubius); from *præ*, and *disponere*, *dispositum*, 'to dispose.' (F.) *Imminence morbide*. That constitution or condition of the body, which disposes it to the action of disease

under the application of an exciting cause. Thus, in hereditary diseases, the conformation is such, that but a slight exciting cause may be required to produce them. When the disease arises solely from the predisposition, or under the additional influence of an extremely slight exciting cause, it is, by some, termed a *disposition*.

PRÆDOR'SAL, *Prædorsa'lis*, from *præ*, and *dorsum*, 'the back.' That which is in front of the back.

PRÆDORSAL REGION of the vertebral column is the anterior surface of the dorsal region.

PRÉ-DORSO-ATLOÏDIEN, Longus colli.

PRÉ-DORSO-CERVICAL, Longus colli.

PRE-EXISTENCE OF GERMS, see Preformation.

PREFORMA'TION, *Præforma'tio*, from *præ*, 'before,' and *formatio*, 'forming.' An ancient theory of generation, which maintained that the germ of every part exists, but not visibly, before fecundation, and that fecundation occasions their development. It was the doctrine of *pre-existence of germs*.

PREG'NANCY, *Prægna'tio, Prægna'tus, Imprægna'tio, Ingravida'tio*, from *præ*, and *genere*, 'to beget;' *Hysterocye'sis, Gravid'itas, G. uteri'na, Eu'cymon, Cye'sis, Eucye'sis, Eu'cysis, Encymo'sia, Cyopho'ria, Gesta'tion, Fœta'tion, Ingravida'tion, Utero-gesta'tion*; (F.) *Grossesse*. The state of a female who has within her a fecundated germ, which gradually becomes developed in or out of the uterus. When placed in the cavity of the uterus,—by virtue of the vital principle which animates it, it becomes attached to the inner surface of that viscus, and obtains from it indirectly the nutriment necessary for its gradual development, during the space of ten lunar months or two hundred and eighty days—the ordinary *term* or *duration* of *gestation*, although the period may be protracted to 300 days or upwards, — at the expiration of which parturition occurs. Pregnancy is commonly limited to a single fœtus: at times, the uterus contains two or three.—See Reproduction. Occasionally, one or two moles—the degenerated products of conception—alone occupy the uterus:—at other times, a fœtus likewise exists. In certain cases, and owing to accidental circumstances, the fecundated ovum remains in the ovarium, or is arrested in the Fallopian tube. Pregnancy has, accordingly, been distinguished into, 1. *Natural* or *uterine*, when the fœtus is carried in the cavity of the womb: and, 2. *Preternatural* or *extra-uterine, Exfœta'tion, Conceptio vitio'sa, Paracye'sis* seu *Eccye'sis, Ecthysterocye'sis, Echthysterocye'sis, Dysto'cia, Dyscye'sis* seu *Gravid'itas extra-uteri'na*, (F.) *Grossesse contre-nature*,—when it occurs in the ovarium, tube, or cavity of the abdomen.

During pregnancy, the female experiences remarkable changes in the condition of her organs and functions. The genital apparatus is, of course, most affected. The uterus changes its shape, situation, size, and texture. The usual signs of pregnancy are,—suppression of the catamenia; the abdomen gradually enlarging and forming a hard tumour; the umbilicus prominent in the latter months; the breasts increasing in size; the areola round the nipple becoming darker and the follicles more developed; kyestein in the urine from an early period; a bluish tint of the vagina after the fourth week; about the fifth month, the evidence by *ballottement*, the placental *souffle*, and the sound of the fœtal heart heard on auscultation; the motion of the fœtus perceptible, and the neck of the uterus diminishing in length at the advanced periods.

PREGNANCY, ABDOM'INAL, *Eccye'sis abdomina'lis, Cœliocye'sis, Gravid'itas abdomina'lis*, (F.) *Grossesse abdominale*. That in which the ovum has escaped into the cavity of the abdomen.

PREGNANCY, AFŒ'TAL, *Pregnancy without a fœtus*, (F.) *Grossesse afœtale* ou *sans fœtus*. Pregnancy produced by a false or degenerate conception, or any other affection, which has given place to unusual development of the uterus. Madame Boivin includes in this class, *sarco-hysteric, hydro-hysteric, gazo-hysteric*, and *hemato hysteric pregnancies*.

PREGNANCY, BIGEM'INAL, (F.) *Grossesse bigéminale, Double pregnancy*. Pregnancy in which there are twins in utero. — Madame Boivin.

PREGNANCY, COMPLEX, (F.) *Grossesse complexe, G. inter-extra utérine*, is when the womb, besides a fœtus, contains much water, hydatids, a mole, &c.

PREGNANCY, COMPOUND, *Polybreph'ia, Polycye'sia, Polycye'sis*, (F.) *Grossesse composée*, is when there are two or three fœtuses in the cavity of the uterus.

PREGNANCY, DOUBLE, Pregnancy, bigeminal—p. Duration of, see Pregnancy—p. Extra-uterine, see Pregnancy.

PREG'NANCY, FALSE, *Gravid'itas spuria*, (F.) *Grossesse fausse* ou *apparente, Pseudocye'sis*. Authors have thus called different affections of a more or less serious character, which resemble pregnancy; so as, at times, to impose upon the best-informed practitioners. These diseases may be seated in the uterus or its dependencies, in the intestines or some other part of the abdomen. They may be; — a mole, hydatids, water, blood, or polypus distending the parietes of the uterus; — chronic enlargement of the uterus; development of tumours, &c., in its substance;—scirrhus; dropsy of the ovaria; ascites; tympanites, &c.

PREGNANCY, FŒTAL, (F.) *Grossesse fœtale*. Pregnancy in which there is a fœtus, or more than one, in the uterus or out of it. Madame Boivin puts in this class—the *solitary, bigeminal, trigeminal*, and *sarco-fœtal* pregnancies, which form the first order; and the *tubal, ovarial*, and *abdominal*, which constitute the second.

PREGNANCY, GAZO-HYSTER'IC, (F.) *Grossesse Gazo-hystérique*. Afœtal pregnancy, caused by development of air or gas in the cavity of the womb. — Madame Boivin.

PREGNANCY, HÆMATO-HYSTERIC, (F.) *Grossesse hémato-hystérique*. Afœtal pregnancy, caused by accumulation of blood in the uterus.—Madame Boivin.

PREGNANCY, HYDRO-HYSTERIC, (F.) *Grossesse hydro-hystérique*. Afœtal pregnancy, occasioned by the secretion and accumulation of serous fluid in the uterus.

PREGNANCY, INTERSTIT'IAL, *Gravid'itas in uteri substan'tiâ* seu *interstitia'lis*. The development of the embryo in the proper substance of the uterus. The case generally terminates fatally at an early period of gestation; the thin external paries of the uterus being ruptured, and the ovum passing into the abdominal cavity.

PREGNANCY, MORBID, *Paracye'sis, Dysto'cia, Dyscye'sis*. The progress of pregnancy disturbed or endangered by the supervention of general or local disorder. — Good.

PREGNANCY, OVA'RIAN, (F.) *Grossesse ovarienne* ou *de l'ovaire, Eccye'sis ova'ria, Oäriocye'sis, Oöcye'sis, Gravid'itas u'teri* seu *extra-uteri'na in ova'rio*. Pregnancy in which the fœtus is developed in the interior of the ovary.

PREGNANCY, PLEA OF. A plea, which a woman, capitally convicted, may set up in arrest of execution until she is delivered. See Jury of Matrons, and De ventre inspiciendo.

PREGNANCY, PRETEND'ED. The criminal act of a female, who, not having been delivered, presents an infant as having been born of her. (F.)

Supposition de part. (This term, in French, likewise includes the case of a female, who, having been delivered of a dead child, substitutes for it a living child which is not hers.)

Pregnancy, Sarco-fœtal, (F.) *Grossesse sarco-fœtale.* Pregnancy in which there are one or more fœtuses, and one or more moles.—Madame Boivin.

Pregnancy, Sarco-Hysteric, (F.) *Grossesse sarco-hystérique.* A fœtal pregnancy formed by moles, hydatids, or a false conception.—Madame Boivin.

Pregnancy, Sol'itary, (F.) *Grossesse solitaire* ou *simple.* Pregnancy in which there is a single fœtus. — Madame Boivin.

Pregnancy, Trigem'inal, (F.) *Grossesse triféminale* ou *triple.* Pregnancy in which there are three fœtuses in the cavity of the uterus. — Madame Boivin.

Pregnancy, Tubal, (F.) *Grossesse tubaire, Ecye'sis tuba'lis, Gravid'itas tubx'ria.* Pregnancy where the fœtus remains and is developed in the Fallopian tube.

Pregnancy, Uterine, see Pregnancy.

Pregnancy, Utero-abdom'inal, (F.) *Grossesse utéro-abdominale.* Pregnancy consisting of two fœtuses; one in the uterus—the other in the abdominal cavity. — Madame Boivin.

Pregnancy, Utero-ova'rial, (F.) *Grossesse utéro-ovarienne.* Pregnancy with two fœtuses, one in the womb, the other in the ovary.

Pregnancy, Utero-tubal, (F.) *Grossesse utéro-tubaire.* Pregnancy in which there is at the same time a fœtus in the womb and another in the Fallopian tube.

PREGNANT, *Prægnans, Prægnas, Prægnax, Fetus, Fœtus, Encar'pos, Grav'ida, Plena mu'licr, Incinc'ta, Gravid, Breeding,* (Old Eng.) *Bealing.* Same etymon. (F.) *Enceinte.* One in a state of pregnancy ; — one with child.

PREHENSIO, Catalepsy, Epilepsy.

PREHEN'SION, *Prehen'sio,* from *prehendere, prehensum,* 'to lay hold of.' The act of laying hold of.

Prehension of Food is the act of seizing and carrying it to the mouth, and introducing it into that cavity. It is, also, called *Assump'tio, Prosle'psis, Pros'phora.*

PRÊLE, Hippuris vulgaris.

PRÉLOMBAIRE, Prelumbar.

PRÉLOMBO-PUBIEN, Psoas parvus — *p. Trochantin,* Psoas magnus.

PRELUM, Press — p. Arteriale, Tourniquet.

PRELUM'BAR, *Prælumba'ris,* (F.) *Prélombaire,* from *præ,* and *lumbi,* 'the loins.' That which is placed before the loins. The prelumbar surface of the spinal column is the anterior surface of the lumbar portion.

PREMIÈRES VOIES, Primæ viæ.

PREMOLAR, see Molar teeth.

PREMONITORY, see Precursory.

PRENAN'THES, *Gall of the Earth, Dewitt Snakeroot, Lion's Foot.* There are many species of this indigenous plant, whose root and milky juice are very bitter. They are used in popular practice in dysentery; and in the form of cataplasm to bites of serpents.

Prenanthes Alba, Nabalus albus—p. Serpentaria, Nabalus albus.

PRENDRE INSCRIPTION, see Matriculate.

PRÉPARATE (VEINE), see Facial vein.

PREPARA'TION, *Præpara'tio,* from *præ,* and *parare, paratum,* 'to get ready.' The act of making ready any substance whatever that has to be employed for any purpose.

Also, the product of any pharmaceutical operation ; — *Præpara'tum.*

Any part of the human body, preserved for the uses of the anatomist, is so called.

PREP'UCE, *Præpu'tium, Epago'gium, Posthē Pella, Pos'thium, Pu'tium, Foreskin.* The prolongation of the integuments of the penis, which covers the glans. The prepuce is composed of two membranous layers: one external or cutaneous; the other internal or mucous, separated by areolar membrane. The mucous membrane lines the inner surface of the cutaneous layer till beyond the glans, when it is reflected over the latter; forming, behind the corona, a small *cul-de-sac* above the corpora cavernosa, which is interrupted by a triangular duplicature of the mucous membrane, called the *frænum,* fixed in the furrow at the inferior part of the glans, and terminating at a little distance from the orifice of the urethra. The clitoris is covered by a semilunar fold formed by a continuation of the skin of the labia. It is called *Præpu'tium clitor'idis.*

PREPU'TIAL, *Præputia'lis.* Belonging or relating to the prepuce; — as the 'preputial secretion,—or that which takes place from the lining of the prepuce covering the glans.

PRESBYODOCHIUM, Gerocomium.

PRESBYON'OSI; from πρεσβυς, 'old,' and νοσος, 'disease.' Diseases of old age.

PRES'BYOPE, *Presby'tes,* (F.) *Presbyte,* from πρεσβυς, 'old,' and ωψ, 'the eye.' One who is long-sighted or affected with presbyopia.

PRESBYOPIA, Presbytia.

PRESBYO'PIC, *Presbyo'picus, Presbyt'ic, Presby'ticus.* Relating or belonging to presbyopia or long-sightedness.

PRESBYSPHACELUS, Gangrene of old people.

PRESBY'TIA, *Presbyo'pia, Amblyo'pia proximo'rum, Visus seni'lis, Pres'byopy,* (F.) *Vue longue ;* from πρεσβυτης, 'an old person.' A very high degree is termed *Hyperbresby'tia.* A condition of vision, common in old persons, which consists in the circumstance of near objects being confusedly seen, whilst those at a greater distance are clearly distinguished. It is supposed to depend generally on diminution of the convexity of the cornea; whence results an alteration in the convergency of the rays, so that they form a focus behind the retina. This defect is remedied by the use of convex glasses, which augment the convergence of the luminous rays. It is, also, called *Long-sightedness, Far-sightedness, Parop'sis longin'qua, Dysopia proximo'rum.*

PRESBYTIC, Presbyopic.

PRESCRIP'TION, *Præscrip'tio, Anag'raphē,* from *præ,* and *scribere, scriptum,* 'to write;' *For'mula, F. med'ica, Sched'ula, Præscrip'tum, Præscrip'tio med'ica, Recep't'um,* (F.) *Formule, Ordonnance.* The formula which the physician writes for the composition of medicines adapted to any case of disease. A prescription should be as simple as possible, and should bear upon its face the evidence of the objects to be fulfilled by it. No article should form part of it, unless adapted for serving some useful purpose. A compound prescription has been divided into four parts: — the *basis* or principal ingredient of the prescription; the *ad'juvans,* or that which is designed to promote the action of the former; the *cor'rigens,* or that intended to correct its operation, or obviate any unpleasant symptom which it may be apt to produce; and the *constit'uens, excip'iens* or *vehic'ulum, Constitu'ent, Excip'ient* or *ve'hicle,* the substance which gives to the other ingredients consistence or form. All these are seen in the following formula for cathartic pills:

Aloes.....	ʒj	.....*Basis.*
Hyd. Chlorid. Mit.	gr. x.	.....*Adjuvans.*
Olei Carui.....	gtt. v.	.....*Corrigens.*
Syrupi.....	q. s.	.....*Constituens.*

M. et fiant pilulæ xx. See Symbol.

It is obvious, however, that most prescriptions are more simple than this. The basis, for example, may require neither adjuvant, corrigent, nor constituent.

Dr. Paris has given the following synopsis of the principles of medicinal combination, *Iamatotaxiolog''ia, Iamatosyntaxiolog''ia, Ars form'ulas med'icas concinnan'di*, which may serve as an instructive guide to the prescriber:—

OBJECT I.

TO PROMOTE THE ACTION OF THE BASIS.

A. By combining the several different forms or preparations of the *same substance*. *B.* By combining the basis with substances which are of the same nature; i. e., which are individually capable of producing the same effects, with less energy than when in combination with each other. *C.* By combining the basis with substances of a *different nature*, and which do not exert any chemical influence upon it, but are found by experience, or inferred by analogy, to be capable of rendering the stomach or system more susceptible of its action.

OBJECT II.

TO CORRECT THE OPERATION OF THE BASIS BY OBVIATING ANY UNPLEASANT EFFECTS IT MIGHT BE LIKELY TO OCCASION, AND WHICH WOULD PERVERT ITS INTENDED ACTION, AND DEFEAT THE OBJECT OF ITS EXHIBITION.

A. By *chymically* neutralizing or *mechanically* separating the offending ingredient. *B.* By adding some substance calculated to guard the stomach or system against its deleterious effects.

OBJECT III.

TO OBTAIN THE JOINT OPERATION OF TWO OR MORE MEDICINES.

A. By uniting those medicines which are calculated to produce the *same ultimate* results, but by modes of operation totally different. *B.* By combining medicines which have entirely different powers; and which are required to obviate different symptoms, or to answer different indications.

OBJECT IV.

TO OBTAIN A NEW AND ACTIVE REMEDY, NOT AFFORDED BY ANY SINGLE SUBSTANCE.

A. By combining medicines which excite different actions in the stomach and system, in consequence of which *new* or *modified results* are produced. *B.* By combining substances which have the property of acting *chymically* upon each other; the results of which are:—*a.* The formation of new compounds; *b.* The decomposition of the original ingredients, and the development of the more active elements. *C.* By combining substances, between which no other change is induced than a diminution or increase in the *solubility* of the principles in which their medicinal virtues reside. *a.* By the intervention of substances that act *chymically*. *b.* By the addition of ingredients whose operation is entirely *mechanical*.

OBJECT V.

TO AFFORD AN ELIGIBLE FORM.

A. By which the *efficacy* of the remedy is enhanced. *B.* By which its *aspect* or *flavour* is rendered more agreeable, or its mode of administration more convenient. *C.* By which it is *preserved* from the spontaneous decomposition to which it is liable.

[The vocabulary in the author's "Medical Student" Philad., 1844, will aid the student not only in translating, but in writing his prescriptions *more solito*.]

PRESENTA'TION, from (Lat.) *præsens*, (*præ*, 'before,' and *ens, entis*, 'being.') The part of a fœtus which is felt *presenting*, on examination *per vaginam*. When the head presents, and especially the vertex, or the feet, knees, or breech, the presentation is said to be *natural*; when any other part, *preternatural*; and the labour is styled *perverse* or *preternatural, Parodyn'ia* seu *Dysto'cia perver'sa, Cross-birth*, (F.) *Accouchement contre nature*. When any part besides the head, feet, knees, or breech presents, the operation of *turning* becomes necessary. See Parturition.

PRESERVATIVE, Prophylactic.

PRESIS, Swelling.

PRĒSLE, Hippuris vulgaris.

PRESMA, Swelling.

PRESPI'NAL, *Præspina'lis*, from *præ*, and *spina*, 'the spine.' That which is situate before the spine. The prespinal surface of the vertebral column is the anterior surface.

PRESS, *Præ'lium, Præ'lium, Presso'rium, Pi-ëster, Pieste'rion*, (F.) *Pressoir, Presse*, from *premere, pressum*, 'to squeeze.' An instrument for subjecting matters to considerable pressure, for the purpose of separating the liquid from the solid portion.

PRESS OF HEROPHILUS, Torcular Herophili.

PRESSE-ARTÈRE, Serre-nœud de Deschamps, Serre-Artère. An instrument invented by Deschamps for the immediate compression of arteries. It is composed of a plate six or seven lines long, and three broad, and of a rod or stem two inches long, placed perpendicularly above the plate and riveted. At each extremity of the plate is a hole, through which each of the ends of the ligature, to be placed upon the artery, is passed. The ligature is then to be tightened by drawing the ends, and fixing them to the perpendicular rod. This *presse-artère* or *serre-artère*, surrounded with charpie, remains in the wound, until there is no longer danger of hemorrhage. The ligature is then cut, and the instrument withdrawn. It is an unnecessary instrument.

PRESSE-URÈTHRE, Jugum Penis. A kind of forceps of elastic iron, the branches of which, padded, may be approximated or separated by means of a screw. The penis is introduced between the branches, one of them being applied to the urethra, and the screw is tightened so as to exercise a degree of pressure sufficient to bring the parietes of the canal in contact. This instrument is sometimes used in incontinence of urine, to prevent the constant discharge of that fluid.

PRESSIO, Pressure.

PRESSION ABDOMINALE, Pressure, abdominal.

PRESSOIR, Press—*p. d'Hérophile*, Torcular Herophili.

PRESSORIUM, Press.

PRESSURE, *Pres'sio*, from *premere, pressum*, 'to press.' The action of pressing.

PRESSURE, ABDOM'INAL, (F.) *Pression abdominale*. A mode of examination by means of which the sensibility, size, suppleness, or hardness of any morbid abdominal viscus may be compared, in these respects, with its healthy condition. Bichat proposed, with the view of exploring the state of the thoracic organs, to exert a pressure from below upwards on the abdominal organs, so as to crowd them upon the diaphragm, and thus to diminish the dimensions of the cavity of the chest, noticing to what extent respiration was affected by this action. No great information can of course be derived from it.

PRESYS'TOLIC, *Præsystol'icus*, from *præ*, 'before,' and *systole*. That which precedes the

contraction of the heart—as "*presystolic* friction sound."

PRETENDED DISEASES, Feigned diseases.

PRETIB'IAL, *Prætibia'lis*, from *præ*, and *tibia*, 'the tibia.' That which is situate before the tibia; as the *ilio-pretibial* and *ischio-pretibial* muscles.

PREVENTIVE, Prophylactic.

PREVEN'TIVE, ROYAL, from *prævenire*, *præventum*, (*præ*, and *venire*,) 'to come before.' An empirical preparation, used as a prophylactic against the venereal virus. It is a solution of *acetate of lead*,—the Liquor Plumbi Subacetatis dilutus.

PREVER'TEBRAL APONEURO'SIS. The aponeurosis which covers the muscles of the prevertebral region.

PREVERTEBRAL ARTERY, (F.) *Artère prevertébrale* ou *méningienne postérieure*. A ramus of the meningeal branch, and sometimes even of the trunk, of the pharyngeal artery, which is distributed to the prevertebral region.

PREVERTEBRAL MUSCLES, see Cervical region, anterior—p. Region, Cervical region, anterior.

PRIAPEIA, Nicotiana rustica.

PRIAPIS'COS. Same etymon as the next. Name of a piece of wood which forms part of the *scamnum Hippocraticum*. Paulus of Ægina calls thus a tent of linen shaped like a penis.

PRIAPIS'MUS, *Tenti'go; T. Penis, Pri'apism, Horn-colic* (vulg.), *Enta'sia Priapis'mus, Rhopalis'mus, Satyri'asis, Stymа, Stysis*, from Πριαπος, 'Priapus.' Constant and distressing erection, without any voluptuous idea or desire for venery. It is often symptomatic; and sometimes the immediate result of morbific causes,—of the action of cantharides, for example. The application of cold liquids to the penis, and the internal use of opium and camphor, are the means usually had recourse to for its removal.

PRIAPITIS, Phallitis.

PRIA'PUS, *Mutun'nus*. In ancient mythology the deity who presided over gardens and the parts of generation, so called *propter deformitatem et membri virilis magnitudinem*.

PRIAPUS, Penis—p. Cervi, see Cervus—p. Ceti, Leviathan penis.

PRICKET, Sedum acre.

PRICKING, Sax. prıccian, (D.) pricken, (F.) *Picotement*. A variety of pain, compared to that which pointed bodies would occasion.

PRIDE OF CHINA, Melia azedarach—p. of India, Melia azedarach—p. Tree, Melia azedarach.

PRIDEWEED, Erigeron Canadense.

PRIEST-PHYSICIANS, see Asclepiadæ.

PRIEST'S PINTLE, Arum maculatum.

PRIM, Ligustrum vulgare.

PRIMA CELLA COLI, Cæcum.

PRIMÆ VIÆ, (F.) *Premières voies*. 'The *first passages*.' The stomach and intestinal canal:—the lacteals being the *secun'dæ vi'æ* or '*second passages*.' See Ways, digestive.

PRIMARY CELL, see Cell.

PRIMEVÈRE, Primula veris.

PRIMIP'ARA, *Primipartu'riens*, (F.) *Primipare*, from *primus*, 'first,' and *parere*, 'to bring forth.' A name given to a female who brings forth for the first time.

PRIMIPARTURIENS, Primipara.

PRIMI-STERNAL, *Primi-sterna'lis*, from *primus*, 'the first,' and *sternum*, 'the sternum.' M. Béclard has called *os primi-sternal* ou *clavi-sternal*, the bony portion of the sternum.

PRIMIT''IÆ, from *primus*, 'first.' The *first waters*, or *the waters* discharged before the extrusion of the fœtus.

PRIMITIVE BAND, see Nerve fibres—p. Streak, Groove, primitive.

PRIMORDIAL CELL, see Cell.

PRIMORDIUM, Arche.

PRIMROSE EVENING, Œnothera biennis—p. Tree, Œnothera biennis.

PRIMULA OFFICINALIS, P. veris—p. Variabilis, P. veris.

PRIM'ULA VERIS, *P. officina'lis* seu *variab'ilis*, from *prim'ulus*, 'first.' So called, because it flowers in the beginning of the spring. *Verbas'culum*, *Paral'ysis*, *Herba paralys'eos* seu *paralyt'ica*, the *Cowslip*, *Paigil* or *Peagle*, *Herb Peter*, *Paleyweort*, (PROV.) *Cow-striplings*, *Cow-stropple*, *Crewel*, (F.) *Primevère*, *Herbe à la paralysie*, *Fleur de coucou*, *Oreille d'ours*, *Brairette*; *Ord.* Primulaceæ. *Sex. Syst.* Pentandria Monogynia. The flowers have been considered to be mildly tonic, antispasmodic, and anodyne.

PRIMULA VULGA'RIS. The leaves and roots of this plant have been used as sternutatories.

PRINCE ARTHUR'S FARINACEOUS FOOD, see Farinaceous.

PRINCEPS, Rectum.

PRINCEPS CERVI'CIS (*Artery*) *Cervical Artery*. A branch of the occipital artery, which descends between the splenius and complexus muscles, and may be followed down to the lower part of the neck.

PRINCEPS POL'LICIS (*Arteria*), *Arte'ria magna pol'licis*. When the two collateral arteries of the thumb take origin from a common trunk—the trunk is the *Princeps pollicis*.

PRINCIPE CRYSTALLIZABLE DE DÉROSNE, Narcotine—*p. de la Mélanose*, see Choroïdea tunica.

PRINCIPES IMMÉDIATS, Principles, immediate.

PRINCIPIUM, Arche, Element—p. Acidificans, Oxygen—p. Adstringens, Tannin—p. Byrsodepsicum, Tannin—p. Coriacum, Tannin—p. Hydrogeneticum, Hydrogen—p. Hydroticum, Hydrogen—p. Oxygenans, Oxygen—p. Salivale, see Saliva—p. Scytodepsicum, Tannin—p. Urinosum, Urea.

PRIN'CIPLE, COL'OURING, OF THE BLOOD. A name, given to the immediate principle in animals, to which the blood owes its red colour. It is solid, inodorous, and insipid. When recently separated from blood, it has a purple-red colour. When distilled, it furnishes, amongst other products, a purple oil. It is insoluble in water; but, if diluted with that liquid, acquires a vinous-red hue. It communicates a red colour to the albumen of the blood, and affords, on analysis, iron, to which the colour has been ascribed. See Hæmaphæin, and Hæmatin.

PRINCIPLE, DIGESTIVE, Pepsin—p. Vital, see Vital principle.

PRINCIPLES, IMME'DIATE, (F.) *Principes immédiats*, *Matériaux immédiats*. A name given to a considerable number of substances, composed of at least three elements, and which are obtained from animals and vegetables without alteration, by simple processes, and, in some measure, *immediately*.

PRINCIPLES, IMMEDIATE, OF ANIMALS, *Proximate principles*, *Organic Elements*, *Compounds of Organization*. These are divided into acid principles, fatty principles, and principles which are neither fat nor acid. The first include the *uric*, *rosacic*, *purpuric*, *allantoic*, *caseic*, *butyric*, &c. The fatty principles are:—*stearin*, *elain*, *cholesterin*, &c.; and the last division includes the most important compounds of organization:—*fibrin*, *gelatin*, *albumen*, *casein*, *osmazome*, &c.

PRINCIPLES, PROXIMATE, P. immediate.

PRINOS (of the ancients), Ilex aquifolium.

PRINOS, *P. verticilla'tus*, *Alcan'na major latifo'lia denta'ta*, *Aquifo'lium fo'liis decid'uis*, *Prinos Grono'vii* seu *padifo'lius*. *Black Alder*, *Vir-*

ginia or *Whorled Winterberry, Feverbush,* (F.) *Apalachine à feuilles de Prunier. Ord.* Aquifoliaceæ. *Sex. Syst.* Hexandria Monogynia. The bark of this common shrub of the United States —*Prinos,* (Ph. U. S.)—is astringent, bitter, and pungent. The berries are, likewise, bitter. The bark has been used as a substitute for the cinchona, in intermittents, and as a tonic.

PRINOS GLABER, see P. lævigatus—p. Gronovii, Prinos.

PRINOS LÆVIGA'TUS, *Smooth Winterberry,* and PRINOS GLABER, *Inkberry.* Indigenous; have the same properties as

PRINOS PADIFOLIUS, Prinos.

PRION, Saw.

PRIONO'DES, from πριων, 'a saw,' and εἰδος, 'shape.' *Serra'ted.* Applied to the sutures of the head.

PRIOR, 'first, foremost,' as

PRIOR ANNULA'RIS, *Interos'seus quartus* of Winslow. An internal interosseous muscle which arises from the outside of the metacarpal bone of the ring-finger, and is inserted into the outside of the tendon on the back of the ring-finger. Its use is to draw the ring-finger outwards.

PRIOR IN'DICIS, *Exten'sor ter'tii interno'dii in'dicis,* (F.) *Sous-métacarpo-latéri-phalangien.* It arises from the outer or radial side of the metacarpal bone of the fore-finger, and is inserted into the outside of the tendon on the back of the fore-finger. *Action:* — to draw the finger outwards, towards the thumb.

PRIOR INDICIS PEDIS, *Adductor In'dicis pedis.* An external, interosseous muscle of the foot, which arises from the contiguous sides of the metatarsal bones of the great and fore toes, and is inserted into the inside of the root of the first bone of the fore-toe. *Action:* — to pull the fore-toe inwards.

PRIOR MEDII, Prior medii digiti.

PRIOR ME'DII DIG''ITI, *Prior Medii, Second interos'seous* of Douglas. An external, interosseous muscle of the hand, which arises from the corresponding sides of the metacarpal bones of the fore and middle fingers, and is inserted into the outside of the tendon on the back of the middle finger. *Action:* — to draw the middle finger outwards.

PRIOR MEDII DIGITI PEDIS, *Adductor medii digiti pedis.* An internal, interosseous muscle of the foot, which arises from the inside of the metatarsal bone of the middle toe, and is inserted into the inside of the root of the first bone of the middle toe. *Use:* — to pull the middle toe inwards, or towards the inner side of the foot.

PRIOR MIN'IMI DIGITI, *Adduc'tor min'imi dig''iti.* An internal, interosseous muscle of the foot, which originates from the inside of the metatarsal bone of the little toe, and is inserted into the inside of the root of the first bone of the little toe. *Action:* — to pull the little toe inwards.

PRIOR TERTII DIGITI PEDIS, *Adduc'tor tertii dig''iti pedis.* An internal, interosseous muscle of the foot, which arises from the inner and under part of the metatarsal bone of the third of the small toes, and is inserted into the inside of the root of the first bone of the third of the small toes. *Action:* — to pull the third of the small toes inwards.

PRISIS. Brygmus, Trepanning.

PRISMA, Scobs.

PRYSMUS, Brygmus, Trepanning.

PRIVATE PARTS, Genital organs.

PRIVET, Ligustrum vulgare.

PRIVITIES, Genital organs.

PRIVY, Ligustrum vulgare—p. Members, Genital organs — p. Parts, Genital organs.

PRO, προ, 'before.' A common prefix to words, as in *Procataretic, Prostate,* &c.

PROAGOREUSIS, Prognosis.

PROBANG, *Sponge-probang, Detruso'rium ex bale'na.* Allied to *probe.* A long slender rod of whalebone, with a piece of sponge at its extremity, intended to push down extraneous bodies, arrested in the œsophagus, into the stomach. A similar instrument is called by J. L. Petit, *Repoussoir d'arêtes.*

PROBARBIUM, Geneias.

PROBASCANIUM, Amuletum.

PROBASCANTIUM, Amuletum.

PROBE, Catheterize, Specillum—p. Eyed, see Specillum.

PROBING, see Melosis.

PROBOLE, Processus.

PROCARDIUM, Scrobiculus cordis.

PROCÉDÉ, Process.

PROCEDURE, *Procédé.*

PROCEPHALI, Capitones.

PROCERUS NASI, Pyramidalis nasi.

PROCÈS, Process — *p. Ciliaires,* Ciliary processes.

PROCESS, Apophysis, Processus.

PROC''ESS, *Ratio,* (F.) *Procédé,* from *procedere, processum,* 'to march forwards.' Procedure, — method of performing any operation, chemical, pharmaceutical, or surgical.

PROCESS, CUNEIFORM, Basilary process — p. Modelling, see Modelling Process — p. of Ran, see Malleus — p. Vertical superior longitudinal, Falx cerebri.

PROCES'SUS. *A process;* same etymon; *Projectu'ra, Prob'olè,* (F.) *Procès.* An apophysis or eminence of a bone; see Apophysis. Also, any part which seems prolonged beyond others with which it is in connexion; as the *Ciliary processes.*

PROCESSUS ANCONEUS, Olecranon — p. Annularis, Pons Varolii — p. Ascendens, see Maxillary bone, (superior)—p. Belenoides, see Belenoid—p. Blumenbachii, Unciform process — p. Caudatus, Lobulus caudatus — p. à Cerebello ad medullam oblongatam, Corpora restiformia—p. Cerebelli ad pontem, Peduncles of the cerebellum — p. Cerebelli ad testes, Peduncles of the cerebellum — p. Cerebri lateralis, Cornu ammonis — p. Ciliares, Ciliary processes — p. Clavatus, see Funiculi graciles—p. Cochleariformis, see Tympanum—p. Cuneiformis ossis occipitis, Basilary process—p. Ensiformes, see Sphenoid bone—p. Enteroidei cerebri, Convolutions (cerebral) — p. Falciformis cerebelli, Falx cerebelli — p. Falciformis duræ matris, Falx cerebri—p. Frontalis, see Maxillary bone, (superior)—p. Gracilis of Rau, see Malleus — p. Laterales uteri, Tubæ Fallopianæ — p. Mamillares, Papillæ of the kidney, Olfactory nerves —p. Mamillares cerebri, Mamillary tubercles—p. Mastoïdeus, Mastoid process — p. Nasalis, see Maxillary bone (superior) — p. Olivaris, Olivary Process — p. Orbicularis cerebri, Infundibulum of the brain — p. Papillares, Olfactory nerves—p. Papillarum, Olfactory nerves — p. Rachidianus, Medulla spinalis—p. Sterni xiphoïdeus, Xiphoid.

PROCES'SUS TER'ETES, *Eminen'tiæ* seu *Fascie'uli ter'etes.* Two slightly convex bodies forming the anterior wall or floor of the fourth ventricle of the brain. They are separated by a longitudinal groove, which is continuous, inferiorly, with the sulcus longitudinalis posterior of the spinal cord. They are crossed transversely by several white and gray fasciculi—*lineæ transver'sæ, striæ medulla'res*— the origin of the auditory nerves.

PROCESSUS AD TESTES, see Valvula Vieussenii — p. Transversus duræ matris, Tentorium — p. Uncinatus, Olecranon, Unciform process, see Coracoid process — p. Uvifer, Uvula—p. Ventriculi, Duodenum — p. Xiphoides, Xiphoid cartilage —

p. Xipho-sternalis, Xiphoid cartilage — p. Zygomaticus, Zygomatic process.

PROCHEÏLA, Antelabia.

PROCHEILIDION, Procheilon.

PROCHEI'LON, *Procheilid'ion, Prola'bium, Antela'bium*, from *pro*, and *χειλος*, 'a lip.' The extreme projecting part or margin of the lips.

PROCHEUMA, Parenchyma.

PROCIDENCE DE L'ŒIL, Exophthalmia.

PROCIDENTIA, Prolapsus — p. Ani, Proctocele—p. Intestini recti, Proctocele—p. Iridis, Staphyloma of the Iris — p. Oculi, Exophthalmia — p. Sedis, Proctocele — p. Uteri, Prolapsus uteri.

PROCNEME, Tibia.

PROCNEMIUM, Tibia.

PROCŒ'LIUS, *Procœ'lus*, from *pro*, and *κοιλια*, 'belly.' One who has a large pendulous abdomen.

PROCŒLUS, Procœlius.

PROCON'DYLUS, *προκονδυλος*, from *pro*, and *κονδυλος*, 'a knot.' The first joint of the fingers; the second being called *κονδυλος*; the third *μεσακονδυλος*.

PROCREATIO, Generation — p. Sanguinis, Hæmatosis.

PROCREATION, Fecundation, Generation.

PROC'TAGRA, from *πρωκτος*, 'anus,' and *αγρα*, 'seizure.' Gout in the rectum. Proctalgia.

PROCTAL'GIA, *Proc'tica simplex, Proc'tagra, Dolor ani, Proctodyn'ia*, from *πρωκτος*, 'the anus,' and *αλγος*, 'pain.' Pain in the anus: generally symptomatic of disease, as of hemorrhoids, scirrhus, &c.

PROCTALGIA, Clunesia — p. Hæmorrhoidalis, Hæmorrhois — p. Inflammatoria, Rectitis — p. Intertriginosa, Chafing — p. Rheumatica, Proctorrheuma.

PROCTATRE'SIA, *Imperfora'tio ani*, from *πρωκτος*, 'the anus,' and *ατρησια*, 'imperforation.' Imperforate state of the anus.

PROC'TICA, from *πρωκτος*, 'the anus.' Pain or derangement about the anus, without primary inflammation. A genus in the class *Cœliaca*, order *Enterica*, of Good.

PROCTICA EXANIA, Proctocele — p. Marisca, Hæmorrhois — p. Simplex, Proctalgia—p. Tenesmus, Tenesmus.

PROCTISIS, Proctitis.

PROCTI'TIS, *Proc'titis, Archi'tis, Clune'sia, Cysso'tis*, from *πρωκτος*, 'the anus,' and *itis*, denoting inflammation. Inflammation of the anus and rectum. Rectitis.

PROCTITIS GANGRÆNOSA, Proctocace.

PROCTOC'ACĒ, *Procti'tis gangræ'nosa*, from *πρωκτος*, 'the anus,' and *κακος*, 'evil.' A disease of the rectum, so called by Fuchs, which, according to him, is common in Peru, in the neighbourhood of Quito and Lima, on the Honduras and Mosquito coasts, in Brazil, and on the Gold coast, &c. It is called by the Portuguese, *Bicho*, and *Bicho di Culo*; by the people of Quito, *Mal del Valle*, from its prevalence in the valleys; and in Africa, *Bitios de Kis*. It is an adynamic, inflammatory condition, frequently ending in gangrene. It has been attributed to bad food, and the use of spices.

PROCTOCE'LE, from *πρωκτος*, 'the anus,' and *κηλη*, 'hernia.' *Prolap'sus Ani, Proctopto'ma, Proctopto'sis, Procta'sis, Hedroce'lē, Archeopto'ma, Archecpto'ma, Archopto'ma, Archecoce'lē, Archopto'sis, Exa'nia, Hæmor'rhois proce'dens* seu *ab exa'nia, Procident'ia Ani* seu *intesti'ni recti* seu *sedis, Ecto'pia Ani, Sedes procid'ua, Falling down of the Fundament, Coming down of the Body*, (F.) *Chute du rectum, C. du Fondement, Renversement du rectum*. Inversion and prolapse of the mucous coat of the rectum, from relaxation of the sphincter, with more or less swelling. In the treatment, the application of cold water and astringent lotions must be recommended: and if other means fail, one of the radii of skin, which converge at the anus, may be snipped off. On cicatrizing, the verge of the anus will be contracted, and the cure probably complete. In the way of palliation, the parts may be retained by an appropriate bandage.

PROCTOCYSTOTOMIA, see Lithotomy.

PROCTODYNIA, Proctalgia.

PROCTON'CUS, from *πρωκτος*, 'anus,' and *ογκος*, 'swelling.' Swelling of the anus.

PROCTOPARAL'YSIS, *Proctople'gia, Paral'ysis Intesti'ni Recti*, from *πρωκτος*, 'the anus,' and *παραλυσις*, 'paralysis.' Paralysis of the muscles of the rectum.

PROCTOPLEGIA, Proctoparalysis.

PROCTOPTOMA, Proctocele.

PROCTOPTOSIS, Proctocele.

PROCTORRHAGIA, Hæmorrhoidal flux.

PROCTORRHEU'MA, from *πρωκτος*, 'anus.' and *ρευμα*. 'defluxion.' Rheumatism of the anus.

PROCTORRHŒ'A, from *πρωκτος*, 'the anus,' and *ρεω*, 'I flow.' A discharge of blood or slime from the anus. See Hæmorrhois.

PROCTOS, Anus.

PROCTOSIS, Proctocele.

PROCTOSPASMUS, Tenesmus.

PROCTOSTENOSIS ORGANICA, Stricture of the rectum.

PROCTOTOREU'SIS, from *πρωκτος*, 'anus,' and *τορυειν*, 'to perforate.' Perforation of a closed anus.

PROCTUS, Anus.

PROCURATIO ABORTŪS. The promotion of abortion.

PRODIAGNO'SIS, from *pro*, and *diagnosis*. Prognostication of a disease to come, — a diagnosis by anticipation.

PROD'ROMIC, *Prodrom'icus*, (F.) *Prodromique*. Same etymon as the next. Relating, or belonging, to the prodromus of a disease.

PROD'ROMUS, *Propath'ia*, from *pro*, and *δρομος*, 'course,' (F.) *Prodrome. Sta'dium opportunita'tis* seu *prodromo'rum*: in contagious diseases, *Sta'dium laten'tis conta'gii*. The period immediately preceding an attack of disease; in which the *precursory signs* occur.

PROD'UCT, from *producere, productum*, (*pro*, and *ducere*, 'to lead,') 'to bring forth.' (F.) *Produit*. The result sought to be attained by any pharmaceutical operation.

PRODUCTIO, Prolapsus—p. Uvulæ à pituitâ, Staphylœdema.

PRODUC'TION, *Produc'tio*; same etymon. This word is used, especially by the French, synonymously with *prolongation*. The mesentery is, in this sense, a production of the peritoneum.

PRODUCTION ACCIDENTELLE. An accidental or adventitious structure.

PRODUCTIVITAS, Fecundity.

PRODUIT, Product.

PROÆGUMENÆ CAUSÆ, Causes, predisponent.

PRŒLIUM, Press, Tourniquet.

PROĔM'INENT, *Proĕm'inens*, from *pro*, and *eminere*, 'to project.' Some anatomists call the 7th cervical vertebra the *proeminent vertebra*, on account of the length of its spinous process, which passes the level of that of the neighbouring vertebræ.

PROENCEPH'ALUS, (F.) *Proencéphale*; from *pro*, and *εγκεφαλος*, 'encephalon.' A monster, whose encephalon is situated, in a great measure, out of, and in advance of, the cranium, which is open in the frontal region.

PRŒOT'IA, *Proïotes, πρωιοτης* or *πρωιοτης*, from *πρωι*, 'early.' 'Precocity.' *Præcox matu'ritas, Præco'cious matu'rity*. Premature development of sexual organization or power. — Good.

PROFLUVII CORTEX, Nerium antidysenteri-cum.

PROFLU'VIUM, *Discharge, Fluxus, Polyrhœ'a, Flux;* from *profluo*, (*pro*, and *fluo*,) 'I flow forth.' A term under which—in the plural, *Profluvia, Polyerino'ses*—some nosologists have comprised all morbid discharges or fluxes: — others, increased excretions attended by fever.

PROFLUVIUM ALVI, Diarrhœa—p. Genitale muliebre, Menses—p. Mucosum urethræ, Gonorrhœa—p. Muliebre, Leucorrhœa, Menses—p. Sanguinis, Hæmorrhagia—p. Sanguinis è Renibus, Nephrorrhagia—p. Sanguinis ex Ore, Stomatorrhagia—p. Sanguinis ex Utero, Metrorrhagia—p. Seminis, Pollution—p. Ventris, Diarrhœa.

PROFOND, Profundus.

PROFUN'DUS, (*pro*, and *fundus*, 'bottom.') *Altus*, 'having a deep base.' (F.) *Profond*. A name given to different parts, which are seated profoundly as regards others.

PROFUNDA ARTE'RIA FEM'ORIS, *A. vasta posterior* seu *muscula'ris fem'oris, Artère-grande musculaire de la cuisse.* (Ch.) This large branch arises commonly from the posterior part of the erural, between the pubis and lesser trochanter. It descends deeply, situate before the adductors; passes through the third adductor above the opening in it for the trunk of the femoral; and terminates in the short portion of the biceps. The *muscularis profunda* gives off, 1. The *external circumflex*: 2. The *internal circumflex*: and, 3. The three *perforantes*.

PROFUNDA ARTE'RIA HU'MERI, *P. supe'rior, Arte'ria spira'lis*, (F.) *Artère humérale profonde, A. collatérale externe, Grand musculaire du bras*, (Ch.) Its origin is variable. When it arises from the brachial artery, it is given off opposite the groove of the humerus destined for the radial nerve, and descends backwards between the three portions of the triceps, accompanied by the nerve; giving branches to that muscle and to the humerus. When it reaches the posterior part of the bone, it divides into two branches, which are distributed to the triceps, supinator longus, &c.

PROFUNDA ARTERIA INFERIOR seu MINOR is often a branch of the last; but, commonly, is given off from the brachial, near the middle of the arm. It gives off branches to the muscles, &c., about the inner side of the os humeri. It is, also, called *large communicating ulnar* or *profundo-ulnar*.

PROFUNDA ARTERIA PENIS. Chaussier has given this name to the *cav'ernous ar'tery*, which arises from the artery of the penis, furnished by the internal pudic.

PROFUNDA ARTERIA SUPERIOR, Profunda humeri.

Certain muscles are distinguished by the names *profound* or *deep-seated*, and *superficial*. Thus, we speak of the *superficial* and *deep-seated* muscles of the neck, &c.; the *Flexor profundus perforans*, &c.

PROFUSIO, Hæmorrhagia.

PROFUSIO AQUÆ. The discharge or breaking of the waters at birth.

PROFUSIO SANGUINIS, Hæmorrhagia—p. Seminis, Ejaculation—p. Subcutanea, Purpura simplex.

PROGAS'TOR, from *pro*, and *γαστηρ*, 'belly.' One who has a pendulous belly.

PROGENIES, Epigone.

PROGENY, Epigone.

PROGLOS'SIS, from *pro*, and *γλωσσα*, 'the tongue;' *Apex linguæ*. The extremity or tip of the tongue.

PROGNA'THOUS, from *pro*, and *γναθος*, 'the jaw.' Having a projecting jaw. A term applied to the form of the head in which there is a prolongation or forward extension of the jaws, as in the negro.

PROGNO'SIS, *Proägoreu'sis, Prorrhe'sis, Præcognit''io, Prognos'ticē, Præno'tio, Præmunitia'tio, Præscien'tia, Præscit''io, Pronoe'a, Propē'aasis, Prædic'tio*, (F.) *Prognostic, Pronostic*, from *pro*, and *γνωσις*, 'knowledge.' A judgment formed by the physician regarding the future progress and termination of any disease.

PROGNOSIS, GENERAL. The opinion formed of a disease in the abstract. Thus, the *General prognosis* of *Cynanche tonsillaris* is favourable; — of *Phthisis pulmonalis*, unfavourable, &c.

PROGNOSIS, PARTICULAR. The opinion formed of any particular case of disease. The *particular prognosis* of one case of typhus, for example, may be favourable, whilst that of another may be unfavourable.

PROGNOSIS EX LINGUÂ, Glossomantia.

PROGNOSTIC, Prognosis.

PROGNOSTICE, Prognosis.

PROGRESSIO, Augmentation.

PROGRESSION, Walking.

PROGRESSUS, Augmentation.

PROIOTES, Præotia.

PROJECTURA, Process.

PROLABIUM, Procheilon.

PROLAP'SUS, from *prolabor, prolapsus*, (*pro*, and *labor, lapsus*, 'to slide,') 'I slip down.' *Prociden'tia, Delap'sio, Delap'sus, Hypor'rhysis, Propto'ma, Propto'sis, Produc'tio, Propenden'tia, Prominen'tia, Ptosis, Casus*, (F.) *Chute; a protrusion; a falling down.* A genus of diseases in the class *Locales* and order *Ectopiæ* of Cullen, distinguished by the falling down of a part through the orifice with which it is naturally connected.

PROLAPSUS ANI, Proctocele—p. Bulbi oculi, Exophthalmia—p. Cornææ, Staphyloma of the cornea—p. Iridis, Ptosis iridis—p. Linguæ, Glossocele, Paraglossa—p. Œsophagi, Pharyngocele—p. Palpebræ, Blepharoptosis—p. Pharyngis, Pharyngocele—p. Umbilici, Exomphalus.

PROLAPSUS U'TERI, *Exome'tra, Metropto'sis, Metropropto'sis, Orthysteropto'sis, Orthysteropto'ma, Falling down of the womb, Ædopto'sis* seu *Procidentia u'teri, Hysteropto'sis, Hysteroce'lē nnda*, (F.) *Abaissement* ou *Chute* ou *Descente* ou *Précipitation de la matrice.* Some use the term 'Procidentia Uteri' for a minor degree of the affection than prolapsus; — *Relaxatio uteri* expressing the slightest state of all. A falling down of the uterus, owing to relaxation of the parts about the utero-vaginal region. In the treatment, the horizontal posture must be insisted upon; the injection of astringent substances *per vaginam* be advised; and if the affection be not remedied by these means, a pessary may be employed as a palliative, or the operation of *Episiorraphy* be performed.

PROLAPSUS UVULÆ, Staphylœdema.

PROLAPSUS VAGI'NÆ, *Hysteropto'sis* seu *Prolapsus Ædoptosis Vaginæ, Coleopto'sis, Colpopto'sis, Elytropto'sis* — Protrusion of the upper part of the vagina into the lower. This, like the descent of the uterus, may be *relaxation, procidentia, prolapsus*, or complete *inversion*.

PROLAPSUS VESICÆ, Exocyste.

PROLECTA'TIO; from *pro*, and *legere, lectum*, 'to gather.' Action of separating the finer parts of a body from the grosser.

PROLEP'TICS, *Prolep'ticē*, from *pro*, and *λαμβανω*, 'I seize hold of.' A term proposed by Dr. Laycock to signify the art and science of predicting in medicine.

PROLEPTICUS, Anticipating.

PROLES, Epigone.

PROL'ICIDE, *Prolicid'ium*, from *proles* (*pro*, and *olescere*, 'to grow,'), 'offspring,' and *cædere*, 'to kill.' Destruction of offspring: a term which includes fœticide as well as infanticide.

PROLIF'IC, *Prolif'icus*, (F.) *Prolifique*, from *proles*, 'offspring,' and *facio*, 'I make.' That which has the faculty of engendering. Applied to man, and animals, and to their sperm or seed; as well as to remedies, which, by strengthening the genital organs, increase the secretion of sperm.

PROLIG''EROUS, *Pro'liger*, *Prolig''erus*, from *proles*, 'offspring,' and *gero*, 'I carry.' That which is connected with carrying the offspring.

PROLIGEROUS DISC or LAYER, *Discus prolig''erus* seu *vitell'inus*, *Stratum prolig''erum*, *Gonostro'ma*, (F.) *Disque proligère*. A granular layer, situate generally towards the most prominent part of the ovarian vesicle, in the centre of which the true ovum or ovule exists.—Von Baer.

PROLONGEMENT RACHIDIEN, Medulla spinalis — p. *Sous-occipital*, Basilary process.

PROMALACTE'RIUM, from *pro*, and μαλασσω, 'I soften.' The room, in the ancient gymnasium, in which the body was softened and anointed. One of the operations in bathing.

PROMANUS, see Digitus, Pollex.

PROMETOPIDIA, Frontal bandages.

PROMETO'PIS, *Prometopid'ion*, from *pro*, and μετωπον, 'the forehead.' The skin of the forehead.

PROMINENTIA, Prolapsus, Protuberance — p. Annularis Cerebri, Pons Varolii — p. Cornea, Ceratocele — p. Ossis Continua, Apophysis.

PROMINENTIÆ ALBICANTES, Mammillary tubercles—p. Semiövales Medullæ Oblongatæ, Corpora olivaria.

PROMONTOIRE, Promontorium.

PROMONTORIUM, Promontory — p. Faciei, Nasus — p. Ossis Sacri, see Sacrum.

PROM'ONTORY, *Promonto'rium*, (F.) *Promontoire* (from *pro* and *mons*, *montis*, 'a mountain,') seu *Tuber* seu *Tuberos'itas Tymp'ani*. A small projection at the inner paries of the cavity of the tympanum, which corresponds to the external scala of the cochlea, and especially to the outer side of the vestibule.

PROMONTORY OF THE SACRUM, see Sacrum.

PRONATEUR CARRÉ, Pronator radii quadratus—*p. Grand* ou *rond*, Pronator radii teres—*p. Petit*, Pronator radii quadratus.

PRONA'TION, *Prona'tio*, from *pronus*, 'inclined forwards.' Anatomists understand, by pronation, the motion by which the inferior extremity of the radius passes before the ulna, and thus causes the hand to execute a kind of rotation from without inwards.

PRONA'TOR. That which produces the motion of pronation. This name has been given to two of the muscles of the forearm.

PRONATOR OBLIQUUS, P. radii teres — p. Quadratus, P. radii quadratus.

PRONATOR RA'DII QUADRA'TUS, *P. quadratus* seu *transvers'us* (Winslow) seu *radii brevis* seu *radii quadratus* (Cowper), *Quadratus ra'dii*, (F.) *Cubito-radial* (Ch.), *Petit* ou *carré pronateur*. This muscle is situate at the anterior, inferior, and profound part of the forearm. It is flat and square, and is attached, within, to the inferior quarter of the anterior surface of the ulna; and, without, to the inferior quarter of the anterior surface of the radius. It produces the motion of pronation.

PRONATOR RADII TERES, *P. teres* sive *obli'quus* (Winslow), (F.) *Épitrochlo-radial* (Ch.), *Grand* ou *rond pronateur*. A muscle seated at the upper and anterior part of the forearm. It is long, flat, and larger above than below. It is attached, above, to the inner tuberosity of the humerus and to the coronoid process of the ulna. Thence it passes obliquely downwards and outwards, and terminates at the middle of the outer surface of the radius. It causes the radius to turn on the ulna, to produce the motion of pronation. It can, also, bend the forearm on the arm, and conversely.

PRONATOR TERES, P. radii teres.

PRONAUS, Vestibulum.

PRONERVATIO, Aponeurosis, Tendon.

PRONŒA, Prognosis.

PRONONCIATION, Pronunciation.

PRONOSTIC, Prognosis.

PRONUNCIA'TION, *Pronuncia'tio*, (F.) *Prononciation*, from *pro* and *nunciare*, 'to tell.' The mode of articulating or giving accent or utterance to words.

PROPATHIA, Prodromus.

PROPENDENTIA, Prolapsus.

PROP'ERTIES, PHYSICAL, OF THE TISSUES. These are *flexibility*, *extensibility*, *elasticity*, *racornissement* and *imbibition*.

PROPERTIES, VITAL. Those which depend upon the vital force, as *contractil'ity*.

PROPHASIS, Prognosis.

PROPHYLAC'TIC, *Prophylac'ticus*, *Diaphylac'tic*, *Diasos'tic*, *Syneret'icus*, *Præservato'rius*, (F.) *Prophylactique*, from *pro*, and φυλασσω, 'I defend.' A preservative or preventive.

PROPHYLACTIC MEDICINE, Hygiene.

PROPHYLAX'IS, *Prophyl'acē*, *Prophylac'tice*, *Syntere'sis*. Same etymon. *Præserva'tio*, *Præcau'tio*, *Præcusto'dia*. Preservative or preventive treatment.

PROP'OLIS, from *pro*, and πολις, 'city;' literally, 'that which is before the city.' *Cerunthe'mus*, *Commo'sis*, *Bee-bread*. A red, resinous matter, with which the bees cover the bottom of the hive. Its fume has been esteemed antiasthmatic.

PROP'OMA, from *pro*, and πομα, 'a drink.' Ancient name of a medicine, composed of seven parts of *honey* and four of *wine*. It was drunk before a meal.—Paulus of Ægina.

PROPORTIO, Symmetry.

PROPOSITUM, Intention.

PROPOTISMA, Mistura.

PROPOTIS'MUS, προποτισμος. Same etymon. *Præpo'tio*. An ancient name for medicines which were given to the patients before purging them, and, in some sort, to prepare them.

PROPRIUS AURIUS EXTERNÆ, Retrahens auris.

PROPTOMA, Prolapsus.

PROPTO'MA AURICULA'RUM, *Paræsthe'sis audi'tûs flacca*, *Flap Ear*. Lobe of the ear broad, loose, and pendent from birth.—Good.

PROPTOMA SCROTI, Rachosis.

PROPTOSIS, Prolapsus — p. Palpebræ, Blepharoptosis — p. Uvulæ, Staphylœdema.

PROPTYSIS, Expectoration.

PRORA, Occiput.

PRORRHESIS, Prognosis.

PRORUPTIO SANGUINIS, Hæmorrhagia.

PROS, προς. In composition, this prefix generally signifies 'in addition to,' 'over and above,' 'besides.'

PROSARTHROSIS, Diarthrosis.

PROSBOLE, Impression.

PROSCHYSIS, Affusion.

PROSCOLLESIS, Adherence, Agglutination.

PROSECTEUR, Dissector.

PROSECTIO, Anatomy.

PROSECTOR, Dissector.

PROSLEPSIS, Prehension.

PROSODOS, Aditus.

PROSOPALGIA, Neuralgia, facial.

PROSOPANTRA, Frontal sinuses.

PROSOPANTRI'TIS, from *prosopantra*, the

frontal sinuses, and *itis*, denoting inflammation. Inflammation of the frontal sinuses.

PROSOPARALYSIS, Palsy, Bell's.

PROSO'PIS DULCIS, *Ord.* Leguminosæ. A tree of rather large size, native of Peru. The fruit — *Pacay* — is a pod, from 20 to 24 inches long, containing black seeds imbedded in a white, soft, flaky substance; which last is eaten by the Limenos with pleasure.—Tschudi.

PROSOPODYNIA, Neuralgia, facial.

PROSOPODYSMOR'PHIA, from *προσωπον*, 'the face,' *δυς*, 'with difficulty,' and *μορφη*, 'shape.' Malformation or atrophy of the face, — as where the process of nutrition suffers from diminished nervous influence.

PROSOPOLOGIA, Physiognomy.

PROSOPOMANTIA, Physiognomy.

PROSOPON, Face.

PROSOPORRHEU'MA, *Rheumatis'mus fa'ciei*, from *προσωπον*, 'face,' and *ρευμα*, 'defluxion,' 'rheumatism.' Rheumatism affecting the face.

PROSOPOSIS, Physiognomy.

PROSOPOSPASMUS, Canine Laugh.

PROSOPOSTERNODYMIA, see Cephalosomatodymia.

PROSPERITAS VALETUDINIS, Sanitas.

PROSPHORA, Prehension.

PROS'PHYSIS, *Adnascen'tia, Coalit''io*, 'adhesion, adherence, connexion,' from *pros*, and *φυω*, 'I grow.' In a more limited sense, this word means morbid adhesion of the eyelids, either between themselves, or with the globe of the eye; *Ankyloblepha'ron*.

PROS'TASIS, *προστασις*, from *προ*, and *στασις*, 'station,' 'superiority, preponderance;' same etymon as *Prostate*. A predominance or abundance of excrementitious humour.—Hippocrates.

PROSTATA, Prostate — p. Adenoides, Prostate — p. Bartholini, Cowper's glands in the female—p. Glandula, Prostate—p. Muliebris, Cowper's glands in the female.

PROSTATÆ, Prostate — p. Adenoides, Prostate—p. Glandulosæ, Prostate.

PROSTATAL, Prostatic.

PROSTATAL'GIA, from *προστατης*, 'the prostate,' and *αλγος*, 'pain.' Pain in the prostate.

PROSTATAUXĒ, Prostatoparectasis.

PROSTATE, *προστατης*, from *προ*, 'before,' and *ιστημι*, 'I stand.'—*Pros'tata, P. glandu'la, Pros'tatæ, P. glandulo'sæ* seu *adenoïdes, Paras'tata adenoïdes* seu *glandulo'sa, Adstans, Paras'tatæ, P. gland'ulæ, Testis minor, Corpus glandulo'sum* seu *glando'sum* seu *adeniformē* seu *glandiformē* seu *glandulo'sum* seu *adenoï'des, Assisten'tes glandulæ, Ads'tites glandulo'si*; the *Prostate gland*. A glandular, cordiform body, of the size of a chestnut, situate before the neck of the bladder, behind the symphysis pubis, and surrounding the first portion of the urethra. Its excretory outlets, to the number of 10 or 12, open into the part of the urethra that traverses it, and pour into it a whitish viscid humour — *Liquor prostat'icus* — intended to lubricate the interior of the urethra, and to serve as a vehicle for the sperm in its ejaculation.

PROSTATE, ANTERIOR, see Cowper's glands.

PROSTATELCO'SIS, from *προστατης*, 'prostate,' and *ελκος*, 'an ulcer.' Ulceration of the prostate.

PROSTATES INFÉRIEURES, Cowper's glands — *p. Petites*, Cowper's glands.

PROSTAT'IC, *Prostat'icus, Pros'tatal*, (F.) *Prostatique*. That which belongs or relates to the prostate. Winslow has named — *Superior Prostatic Muscles* — ligaments which pass from the pubis to the lateral parts of the prostate. He, also, calls—*Inferior prostatic muscles*—the fleshy fibres, which, from the lateral parts of the urethra, near its membranous portion, pass to be inserted into the pubis.

PROSTATIC BISEC'TOR. An instrument employed by Dr. Stevens, of New York, in the bilateral operation of lithotomy. In form it resembles a large olive, with a beak at the extremity, cutting edges at the sides parallel to its longest axis, and with a straight handle.

PROSTATIC LIQUOR, *Liquor prostat'icus*. The fluid secreted by the prostate, which mixes with sperm during emission.

PROSTATIC PORTION OF THE URETHRA. The part of the canal of the urethra included by the prostate: it is about 15 lines long.

PROSTATIC SINUS, see Sinus, prostatic.

PROSTATICUS SUPERIOR, Compressor prostatæ.

PROSTATIQUE, Prostatic.

PROSTATI'TIS, *Inflamma'tio Pros'tatæ*, from *προστατης*, 'the prostate,' and *itis*, denoting inflammation. Inflammation of the prostate; when accompanying gonorrhœa, it is the *gonorrhoprostati'tis*.

PROSTATOCELE, Prostatocele.

PROSTATON'CUS, *Prostatoce'lē, Tumor prostatæ, from προστατης*, 'the prostate,' and *ογκος*, 'a tumour.' Swelling of the prostate.

PROSTATOPAREC'TASIS, from *προστατης*, 'prostate,' and *παρεκτεινειν*, 'to extend.' Enlargement of the prostate; also, induration of the same, *Prostatoscir'rhus, Prostataux'ē*.

PROSTATOSCIRRHUS, see Prostatoparectasis.

PROSTERNID'IUM, from *προ*, 'before,' and *στερνον*, 'the sternum.' Any agent applied to the anterior part of the chest; a plaster to the breast.

PROSTHESIS, Prothesis.

PROSTHETA, Subdita.

PROSTHIUM, Penis.

PROSTOM'IA, *Commissu'ra labio'rum*; from *προ*, 'before,' and *στομα*, 'mouth.' The commissure of the lips.

PROSTRA'TION, *Prostra'tio vi'rium*, (F.) *Prostration des forces, Abattement*. Great depression of strength. Almost total loss of power over the muscles of locomotion.

PRO'TEA MELIF'ERA. A South African plant, *Nat. Ord.* Proteaceæ, whose involucra and flowers, at the time of inflorescence, are filled with a sweet watery liquid, which contains a great deal of honey. By inspissation it forms a delicious syrup—*Syr'upus Pro'teæ*, which is much used in pulmonary affections.

PROTEA LEPIDOCARPON, and some other Proteæ, supply the same kind of juice.

PRO'TEAN, *Pro'teiform, Proteiform'is*, from *Proteus*, who could assume various shapes. Assuming different shapes.

PROTEIFORMIS, Protean.

PROTEIFORM'IS MORBUS. A disease which assumes various characters.

PRO'TEÏN, *Proteine, Protei'na*, from *πρωτευω*, 'I take first rank.' A product of the decomposition of albumen, &c., by potassa. When animal albumen, fibrin or casein is dissolved in a moderately strong solution of caustic potassa, and the solution is exposed for some time to a high temperature, these substances are decomposed. The addition of acetic acid causes, in all three, the separation of a gelatinous translucent precipitate which has exactly the same characters and composition. This is protein.—Mulder.

Protein is the basis of animal and vegetable fibrin, albumen, and casein, and of gluten, which have been, consequently, classed under the "proteinaceous alimentary principle," by Dr. Pereira.

PROTEINACEOUS, Proteinous.

PRO'TEINOUS, *Proteina'ceous, Proteino'sus*,

(F.) *Protéineux*. Of, or belonging to protein; — as "a proteinous alimentary principle."

PROTÉINEUX, Proteinous.

PROTENSIONES GLANDULARES, Mammillary eminences.

PROTH'ESIS, *Pros'thesis, Adjunc'tio, Adjec'tio, Apposi''tio*, 'addition, application;' from *προς*, 'in addition to,' and *τιθημι*, 'I put.' That part of surgery whose object is to add to the human body some artificial part, in place of one that may be wanting, as a wooden leg, an artificial eye, &c.

PROTMESIS, Umbilicus, Kidney.

PROTOÁZOTATE DE MERCURE, Hydrargyri nitras.

PROTOGALA, Colostrum.

PROTOIATROS, Archiater.

PROTOMEDICUS, Archiater.

PROTOMUS, Dissector.

PROTOPATHIA, Idiopathia.

PRO'TOPHYTE, *Protoph'yton*, from *πρωτος*, 'first,' and *φυτον*, 'a plant.' A vegetable production at the foot of the scale; as a cryptogamous plant, — a fungus.

PRO'TOPLAST, from *πρωτος*, 'first,' and *πλασσω*, 'I form.' A primary formation. A first formed organized body — the parent of all others.

PROTOSPÓROS, Os uteri.

PROTOZÖ'ON, from *πρωτος*, 'first,' and *ζωον*, 'an animal.' An animal lowest in the scale; — as a monad.

PROTRAHENS LENTIS, Ciliary muscle.

PROTRUSION. Prolapsus.

PROTU'BERANCE, *Protuberan'tia, Extubera'tio, Prominen'tia, Excrescen'tia, Extuberan'tia*, from *pro*, 'before,' and *tuber*, 'a projection.' (F.) *Bosse*. A name given to rough, unequal protuberances, seen at the surface of certain organs; the *parietal protuberances, occipital protuberances, annular protuberances*, &c.

PROTUBERANCE, ANNULAR, Pons Varolii — p. Cerebral, Medulla oblongata, Pons Varolii — *p. Cylindroïde*, Cornu ammonis.

PROTUBERANTIA, Eminence—p. Annularis Willisii, Pons Varolii—p. Basilaris, Pons Varolii —p. Cylindrica, Cornu ammonis.

PRÓTRUSOR, Detrusor urinæ.

PROULIMATESIS. A word employed by Forestus for hernia of the stomach [?].

PROUNE, Prunus domestica.

PROVENTRIC'ULUS, *Bulbus glandulo'sus, Infundib'ulum, Second stomach;* from *προ*, 'before,' and *ventriculus*, 'the stomach.' A bulbous expansion at the termination of the œsophagus, immediately above the gizzard of birds, the walls of which are thickly studded with a layer of glands or follicles which secrete a digestive fluid.

PROVERBS, MED'ICAL. A proverbial expression frequently contains sound sense in its directions. In medicine, the greatest collection is in the *Regimen of Health of the School of Salernum*, composed in the 11th century, by John of Milan. Yet, although good sense is often inculcated, we frequently meet with the reverse.

Most of the proverbs are hygienic. The following are a few.

1. *Qu' après la soupe un coupe d'excellent vin Tire un écu de la poche du médecin.*
2. *Surge quintâ, prande nonâ, cœna quintâ, dormi nonâ, nec est morti vita prona.*
3. *Nunquam recte corpus exerceri sine animo, neque animum sine corpore posse.*
4. *Viande bien machée est à demi digérée.*
5. *Optimum condimentum fames.* Appetite is the best sauce.
6. *Plures occidit gula quam gladius.*
7. Early to bed and early to rise, Makes a man healthy, wealthy, and wise.
8. One man's meat 's another man's poison.
9. An ounce of prevention is better than a pound of cure.

PROVERSIO, Anteversion.

PROVINS, MINERAL WATERS OF. Chalybeate springs in the department of Seine et Marne, France, which contain carbonic acid and iron.

PROVOCATORIUS, Intercalary.

PROXIMAD, see Proximal aspect.

PROXIMAL, from *proximus*, 'next.' Proximate; nearest; next.

PROXIMAL ASPECT. An aspect towards the trunk, in the course of an extremity. — Barclay. *Prox'imad* is used by the same writer adverbially to signify 'towards the trunk.'

PRUNA, Anthrax.

PRUNE, Prunum.

PRUNE JUICE EXPECTORA'TION OF SPUTA. The sputa resembling prune juice, which occur in the third or purulent stage of pneumonia.

PRUNEAU, Prunum.

PRUNELLA, Angina pectoris, Aphthæ, Cynanche, Pupil.

PRUNEL'LA, *P. vulga'ris* seu *officina'lis, Brunel'la, Consol'ida minor, Sym'phytum minus, Self-heal, Heal-all, Bugle*, (F.) *Prunelle, Brunelle; Ord.* Labiatæ. *Sex. Syst.* Didynamia Gymnospermia. This plant has been recommended as an astringent, in hemorrhages and fluxes; and, also, in gargles against aphthæ, and in inflammation of the fauces.

PRUNELLÆ SAL, Potassæ nitras fusus sulphatis paucillo mixtus.

PRUNELLE, Prunella, Pupil.

PRUNELLIER, Prunus spinosa.

PRUNELLOE, Prunum Brignolense.

PRUNEOLA SYLVESTRIS, Prunus spinosa.

PRUNES, see Prunum — p. Pulp of, Pruni Pulpa.

PRUNI PULPA, *Pulp of prunes*. Take of *prunes* a sufficient quantity, soften them in the vapour of boiling water, and having separated the stones, beat the remainder in a marble mortar and press through a hair-sieve. — Ph. U. S.

PRUNIER, Prunus domestica — *p. Sauvage*, Prunus spinosa.

PRUNUM. A dried *Plum*, a *Prune*. (F.) *Pruneau*. Three sorts of Prunes have been usually ranked amongst the articles of the materia medica. 1. The *Prunum Brignolen'sē;* the *Brignole plum* or *Prunel'loe;* from Brignole in Provence. It is of a reddish-yellow colour; and has a very grateful, sweet, subacid taste. 2. The *Prunum Gal'licum, Prunum* (Ph. U. S.), the *French Prune;* and 3. The *Prunum Damasce'num* or *Damson, Brab'ylon*. All these possess the same general qualities as the other summer fruits. They are emollient and laxative.

PRUNUM STELLATUM, Averrhoa carambola.

PRUNUS ACACIA, Prunus padus.

PRUNUS ARMENI'ACA, *Armeni'aca vulga'ris* seu *epiro'tica*. The *A'pricot, Apricock, Bericoc'cē, βερικοκκη, Præcoc'ia*, (F.) *Abricotier. Ord.* Rosaceæ. *Sex. Syst.* Icosandria Monogynia. The apricot, *Melum Armeniacum*, (F.) *Abricot*, when ripe, is easily digested, and considered as a great delicacy.

PRUNUS A'VIUM, *P. cer'asus* seu *sylvest'ris* seu *macrophyll'la, Cer'asus A'vium* seu *nigra* seu *dulcis, Black Cherry Tree*, (F.) *Merisier*. The fruit is eaten; and a gum exudes from the tree, the properties of which are similar to those of gum Arabic.

PRUNUS CAPULIN, (S.) *Capulies*, grows in the

open fields of Peru; and is cultivated in gardens in the towns. The fruit is acid, and not often eaten; but on account of its agreeable odour it is used in making *Pucheros de flores;* or with odoriferous flowers to perfume linen. — Tschudi.

Prunus Cer'asus, *Cer'asus ac''ida* seu *horten'sis* seu *vulga'ris* seu *rubra.* The *Red Cherry Tree;* (F.) *Cerisier.* The fruit *Cer'asum, Cera'-sion,* has a pleasant, acidulous sweet flavour. It is wholesome. See Prunus avium.

Prunus Domes'tica. The *Plum* or *Damson tree, Coccyme'lea, Proune,* (F.) *Prunier ordinaire.* The damson, when perfectly ripe, affords a wholesome fruit for pies, tarts, &c. It is gently laxative. See Prunum.

Prunus Hortensis, P. cerasus.

Prunus Insi'tia. The *Bullace Plum Tree.* The fruit of this tree is used like the damson.

Prunus Lauro-Cer'asus, *Cer'asus lauro-cera-sus, Padus lauro-cerasus, Poison Laurel, Cherry Laurel, Common Laurel, Lauro-cerasus,* (F.) *Laurier-cerise, L. amandier, L. de Trébisonde.* The leaves, *Lauro-cer'asus,* (Ph. E. and D.) have a bitter, styptic taste, with the flavour of bitter almonds. The flowers have a similar flavour. The powdered leaves, applied to the nostrils, excite sneezing. The flavour of the leaves has given occasion to their being employed in tarts, custards, &c.; but in large quantities they are poisonous. The poisonous principle is the prussic acid. The distilled water, called *Laurel-water,* is poisonous. (See Poisons, Table of.) An Aqua Lauro-cer'asi, *Cherry Laurel-water,* is officinal in the Edinburgh and Dublin Pharmacopœias. Dose, ♏ xxx to f℥j.

Prunus Macrophylla, P. avium.

Prunus Padus, *Padus, P. a'vium, Cer'asus Padus* seu *racemo'sus sylves'tris, Wild cluster* or *Bird Cherry Tree,* (Sc.) *Hagberry, Hack-berry,* (Prov.) *Heckberry,* (F.) *Cerisier à grappes, Bois puant.* The bark of the tree has a fragrant smell, and a bitter sub-astringent taste, somewhat similar to that of bitter almonds. It has been recommended in intermittents, &c., in the form of decoction. The berries have been used in dysentery.

Prunus Sebastina, Sebastina.

Prunus Spino'sa. The *Sloe Tree, P. sylves'-tris* seu *Aca'cia, Agriococcime'lea, Agru'na, Agrume'la,* (F.) *Prunellier, Prunier sauvage.* The fruit—the *sloe*—is sometimes employed in gargles, and was formerly much used in hemorrhage, owing to the astringent properties. The *Aca'cia nostras* seu *German'ica* seu *vulga'ris, Prune'ola sylves'tris, Succus acaciæ nostra'tis, S. Acaciæ Germanicæ inspissa'tus* is obtained from this.

Prunus Sylvestris, P. Avium, P. Spinosa.

Prunus Virginia'na, *Cer'asus sero'tina* seu *Virginia'na, Choke cherry, Wild Cherry Tree,* (F.) *Cerisier de Virginie.* The bark of this tree has been found useful in intermittents. The leaves are poisonous to certain animals, and the berries intoxicate different kinds of birds. The Indians use the bark in the cure of syphilis. It is bitter and astringent, and possesses some aromatic warmth, and likewise a sedative quality. It is stimulant and tonic. The leaves contain prussic acid. The distilled oil of the bark is very nearly identical with that of the bitter almond. A strong decoction of the bark is anthelmintic.

Prunus Vulgaris, P. Padus.

PRURIG''INOUS, *Prurigino'sus,* (F.) *Prurigineux.* Same etymon as the next. Relating, or belonging to, or resembling prurigo.

PRURI'GO, *Pruri'tus, Chris'ma;* from *prurio, pruritum,* 'to itch.' The word is often used synonymously with *itching.* Willan and Bateman use the term for a genus of cutaneous diseases, the characteristic symptoms of which are a severe itching, accompanied by an eruption of papulæ of nearly the same colour as the adjoining cuticle; *Cnesmos, Scabies papuliform'is, Ecor'mia pruri'go.* It affects the whole surface of the skin, under three varieties of form; — the *P. mitis, P. formi'cans, P. seni'lis,* &c., as well as some parts of the body, as the *P. pod'icis,* and *P. puden'di mulie'bris, Puden'dagra pru'riens, Pruri'tus vulvæ,* (F.) *Prurit de la vulve.*

Prurigo, Heat — p. Pediculars, Phtheiriasis.

PRURIT, Itching — *p. de la Vulve,* see Prurigo.

PRURITUS, Gargalus, Itching, Prurigo — p. Vulvæ, see Prurigo.

PRUSSIAN BLUE, *Ferrum Zoët'icum* seu *Boru'sicum* seu *Cyanogena'tum* seu *oxydula'tum hydrocyan'icum, Ferri Ferrocy'anas* seu *Ferrocyanure'tum* seu *Cyanure'tum* seu *Percyan'idum, Borus'sias* seu *Prussias* seu *Hydrocy'anas Ferri, Cœru'leum Borus'sicum* seu *Berolinen'sē, Tritohydro-ferrocy'anate* or *Ferrocyanuret* or *Ferroprus'siate of iron,* (F.) *Bleu de Prusse, B. de Berlin.* In the Pharmacopœia of the United States, the pure salt—*Ferri ferrocyanuretum*—is directed to be made as follows: *Ferri Sulph.* ℥iv, *acid sulph.* f℥iiiss, *acid nitric.* f℥vj or q. s., *potassii ferrocyanuret.* ℥ivss, *aquæ,* Oij. Dissolve the sulphate in a pint of water, and having added the sulphuric acid, boil the solution. Pour into it the nitric acid, in small portions, boiling the liquid for a minute or two after each addition, until it no longer produces a dark colour; then allow the liquid to cool. Dissolve the ferrocyanuret of potassium in the remainder of the water, and add this solution gradually to the first liquid, agitating the mixture after each addition; then pour it upon a filter. Wash the precipitate with boiling water until the washings pass tasteless. Lastly, dry and rub into powder. This salt is chiefly used in the preparation of the hydrocyanic acid and the cyanuret of mercury. It has been advised in the treatment of intermittents, and in epilepsy and scrophulosis. Externally, it has been applied to ill-conditioned ulcers. (℥j to ℥j. of cerate.) Dose, four to six grains.

PSALIDIUM, Fornix.

PSALIS, Fornix, Scissors.

PSALTERIUM. Lyra.

PSAMMA, see Gravel.

PSAMMIS'MUS, *Ammis'mus, Gammis'mus,* from ψαμμος, 'sand.' *Arena'tio.* The application of sand to any part of the body for the cure of disease. — Paulus.

PSAMMODES, Sabulous.

PSAMMUS, see Gravel.

PSAUTIER, Omasum.

PSELLIS'MUS, Ψελλισμος, *Psellotes,* ψελλοτης, from ψελλιζω, 'I stutter.' Imperfect or depraved state of the articulation. A genus in the class *Pneumatica,* order *Phonica,* of Good.

Psellismus Nasitas, Rhinophonia — p. Rhotacismus, Rotacism.

PSELLOTES, Balbuties.

PSEUDACACIA ODORATA, Robinia pseudacacia.

PSEUDAC'OË, *Pseudacoë'a, Pseudecoë'a,* from ψευδης, 'false,' and ακοη, 'audition.' *Pseudacu'sis.* False hearing.

PSEUDACORUS, Iris pseudacorus.

PSEUDÆSTHE'SIA, *Sensus perver'sus,* from ψευδης, 'false,' and αισθανομαι, 'I feel.' αισθησις, 'feeling.' *Parapsis illuso'ria, Pseuda'phē. Pseudaph'ia,* (F.) *Pseudesthésie.* Depraved feeling. Imaginary sense of touch or general feeling in organs that have no existence. Common to those who have suffered amputation; and to hypochondriacs and the insane.

PSEUDALEI MORBI, Feigned diseases.

PSEUDANGUSTURINUM, Bruc'ne.

PSEUDAPHE, Pseudæsthesia.

PSEUDARTHRO'SIS, *Pseudarticula'tio, Pseudartie'ulus, Articula'tio notha* seu *artificia'lis*, from ψευδης, 'false,' and αρθρον, 'a joint.' A false joint or articulation; *Artic'ulus nouus* seu *spu'rius* seu *præternatura'lis*, (F.) *Articulation surnuméraire.*

PSEUDARTICULATIO, Pseudarthrosis.

PSEUDECOIA, Pseudacoe.

PSEUDENCEPH'ALUS, *Paraceph'alus*, from ψευδης, 'false,' and εγκεφαλον, 'the encephalon.' A monster, whose cranium is open in its whole extent, from before to behind, its base supporting a vascular tumour. — I. G. St. Hilaire.

PSEUDESTHÉSIE, Pseudæsthesia.

PSEUDO, False — p. Asthma, Dyspnœa.

PSEUDOBLEP'SIA, *Pseudoblepsis, Pseudora'sis, Suffu'sio oc'uli*, from ψευδης, 'false,' and βλεψις, 'sight.' *Pseudops'ia, Parop'sis illuso'ria, Suffu'sio, Phantas'ma, False sight.* A generic name, used by Cullen for perversion of vision. See Metamorphopsia.

PSEUDOBLEPSIS, Paropsis.

PSEUDOCARCINOMA LABII, Cancer aquaticus.

PSEUDOCHROMIA, Achromatopsia.

PSEUDOCROUP, Asthma thymicum.

PSEUDOCYESIS, Pregnancy, false — p. Cyesis molaris, Mole.

PSEUDOENCEPHALITIS, Hydrencephaloid disease.

PSEUDO-FEVER, Irritation, morbid.

PSEUDOGEU'SIA, *Pseudogeu'sis, Pseudogeus'tia*, from ψευδης, 'false,' and γευσις, 'taste.' *Hallucina'tio gustûs.* False taste.

PSEUDOGEUSTIA, Pseudogeusia.

PSEUDOHELMINTHES, Ectozoa.

PSEUDOLI'EN, *Pseudosplen*, from ψευδης, 'false,' and *lien*, 'spleen.' Glands situate in the neighborhood of the spleen; probably, lymphatic glands.

PSEUDOMECHOACANA, Convolvulus panduratus.

PSEUDOMEDICUS, Charlatan.

PSEUDOMELANOTIC FORMATIONS, see Anthracosis.

PSEUDOMELANOTIC MENINX, Membrane, false — p. Metamorphosis polyposa, polypus.

PSEUDOMEMBRANA, Membrane, false.

PSEUDOMEMBRANE, Membrane, false.

PSEUDONARCISSUS, Narcissus pseudonarcissus.

PSEUDONOMA'NIA, from ψευδης, 'false,' and *mania*. A form of insanity, which is characterized by a morbid propensity for lying.

PSEUDO-PARASITES, Ectozoa.

PSEUDOPERIPNEUMONIA, Peripneumonia notha.

PSEUDOPHLOGOSIS VENTRICULI RESOLUTIVA ET COLLIQUATIVA, Gastromalacia.

PSEUDOPHTHI'SIS. 'False phthisis.' Emaciation occasioned by other cause than organic lesion of the lungs.

PSEUDOPLAS'MATA, from ψευδης, 'false,' and πλασσω, 'I form.' A term applied to malignant heterologous tumours. — Vogel.

PSEUDOPLEURITIS, Pleurodynia — p. Polypi, see Polypi — p. Pyrethrum, Achillea ptarmica — p. Spleen, Pseudolien.

PSEUDOPNEUMONIA, Peripneumonia notha.

PSEUDOPNEUMONITIS, Peripneumonia notha.

PSEUDOPSIA, Pseudoblepsia.

PSEUDORASIS, Pseudoblepsia.

PSEUDOREX'IA, *Pseudorex'is*, from ψευδης, 'false,' and ορεξις, 'appetite.' False appetite.

PSEUDO-RHONCHUS, from ψευδης, 'false,' and ρογχος, 'rattle.' A sound heard during respiration, which appears to be produced, like the ordinary rhonchi, in the air-tubes, but is exterior to them—as in the case of *pleural pseudorhonchi*. See Rattle, and *Râle*.

PSEUDOSCOP'IC, *Pseudoscop'icus*, from ψευδης, 'false,' and σκοπεω, 'I view.' Conveying false impressions to the eye; as where projecting surfaces are seen depressed, and conversely.

PSEUDOS'MIA, *Pseudosphre'sia, Pseudosphre'sis*, from ψευδης, 'false,' and οσμη, 'smell.' False sense of smell.

PSEUDOSPHRESIA, Pseudosmia.

PSEUDOSYPHILIS, Syphilis pseudosyphilis.

PSEUDOTHANATOS, Asphyxia.

PSEUDOVARIOLÆ, Varicella.

PSEUDYMEN, Membrane, false.

PSID'IUM POMIF'ERUM. The *Apple Guava, Guava, Guayava. Ord.* Myrtaceæ. This plant and *P. Pyrif'erum* bear fruits; those of the former like apples,—of the latter like pears. The apple kind has an acid flavour, the other is sweet. Of the inner pulp of either, the natives of the Indies make jellies; and, of the outer rind, tarts, marmalades, &c. They are somewhat astringent; this quality, indeed, exists in every part of the tree, and abundantly in the leaf-buds, which are occasionally boiled with barley and liquorice as an excellent drink in diarrhœa. A simple decoction of the leaves is said to be useful in the itch, and most cutaneous eruptions.

PSILOSIS. Depilation.

PSILOTHRUM, Bryonia alba, Depilatory.

PSIMMYTHON, Plumbi subcarbonas.

PSOA, Dysodia.

PSOÆ, *Psoiæ, Psyæ, ψοαι*, see *Lumbi*, 'the loins.' The psoæ muscles; *Alop'eces, Nephro me'træ, Neurome'teres.*

PSOAS MAGNUS, *Psoas* seu *lumba'ris inter'nus, Femur moven'tium sextus, Pré-lombo-trochantin, Pré-lombo-trochantinien* (Ch.). A muscle, seated on the lateral parts of the lumbar portion of the vertebral column; and passing down to the superior and anterior part of the thigh. It is long, fusiform, and attached, above, to the body and transverse processes of the first four lumbar vertebræ, and last dorsal. Below, it terminates, by a very thick tendon, common to it and the iliacus muscle, — which is inserted into the top of the lesser trochanter. This muscle bends the thigh upon the pelvis, and carries it in rotation outwards. It may, also, bend the pelvis on the thigh, and the loins on the pelvis. It acts considerably in station and progression.

PSOAS PARVUS, *Pré-lombo-pubien*, (Ch.) A muscle situate anteriorly to the last. It is long, thin, flat, and narrow; and is attached, above, to the body of the last dorsal vertebra, and below, to the linea ileo-pectinea, by means of a slender tendon, which furnishes two expansions — one to the *Iliac aponeurosis*, and the other to the *pelvis*. This muscle bends the vertebral column on the pelvis; and, reciprocally, the pelvis on the vertebral column.

PSODYMUS, Gastrodidymus.

PSOLÆ, Psoæ.

PSOÎTE, Psoitis.

PSOÏ'TIS, *Inflamma'tio mus'culi Psoas, Lumba'go inflammato'ria spoamod'ica*, (F.) *Psoïte, Inflammation du muscle Psoas.* From ψοαι, 'the loins,' 'the psoæ muscles,' and *itis*, denoting inflammation. Inflammation of the psoas muscles and of the parts situate before the lumbar vertebræ: accompanied, from its commencement, by considerable fever, violent pains in the part affected and in the thigh of the same side, which remains commonly half bent. Psoitis may terminate by suppuration, and form a lumbar abscess.

PSOLÉ, ψωλη, 'the male organ.' Also, the glans when uncovered.

PSOLON, Membrosus.

PSOLON'CUS, from *psole*, and *ογκος*, 'a tumour.' Swelling of the glans, or of the penis generally.

PSOLUS, from *psole*. One who has the glans uncovered. One who has been circumcised.

PSOPHOMETER, Stethoscope.

PSOPHOS, *ψοφος*, 'a noise.' A loud noise; a hollow sound.

PSORA, from *ψαω*, 'I rub gently.' *Sca'bies, Phlysis* seu *Ecpye'sis Scabies, Scabiola, Itch, Scratch, Scotch fiddle,* (Prov.) *Ichet, Scrat,* (Sc.) *the Reif, Youk, Yuke,* (F.) *Gale, Mal Saint-Main, Rogne.* A contagious eruption of very minute pimples—pustular, vesicular, papular, intermixed, and alternating, itching intolerably and terminating in scabs. It seems to be connected with an insect of the genus *Acarus*; — the *Ac'arus* seu *Sarcop'tes* seu *Sarcop'tus* seu *Phthi'rium* seu *Cheyle'tus Scabiei, Ac'arus Ciro, Itch-insect, Itch-animal'cule, Itch mite,* (F.) *Ciron.* The itch occupies, particularly, the spaces between the fingers, the back of the hands, wrists, elbows, axillæ, groins, hams, &c., and rarely affects the face. The best applications, for its cure, are, — the *Unguentum Sulphuris* or *Ung. Sulph. comp.* night and morning; but the unpleasant smell of the sulphur has given occasion to the use of other means;—as the *White Hellebore, Potass in deliquescence, Muriate of Ammonia, Sulphuric Acid,* &c. The repugnance to the smell of sulphur ought not, however, to be regarded; especially as, in the course of four or five days, it will, in almost all cases, produce a perfect cure.

Psora Agria, Psoriasis inveterata.

Psora Ebrio'rum, *Drunkard's Itch.* An eruption, attended by afflicting itching, to which elderly people, who have been much addicted to drinking alcoholic liquors, are liable.—Darwin.

Psora Leprosa, Psoriasis—p. Squamosa, Psoriasis.

PSORALEA, Psoralea pentaphylla.

Psora'lea Glandulo'sa, from *ψωραλεος* 'scurfy or scaly,' in reference to its scurfy glands or dots. *Alvaquil'la. Ord.* Leguminosæ. *Sex. Syst.* Diadelphia Decandria. A shrub, used in Chili as a vulnerary. The Paraguay tea is referred to it by M. Lenoble, of Montevideo. See Ilex Paraguensis.

Psora'lea Pentaphyl'la, *Psora'lea, Contrayer'va nova, Mex'ican Contrayer'va.* The root is little, if at all, inferior to the contrayerva in its medical properties; which, by the by, are unimportant.

PSORENTERIA, Cholera.

PSORI'ASIS, (same etymon as Psora,) formerly, the state of being affected with *Ψωρα. Lepido'sis psori'asis, Serpe'do, Serpi'go, Impeti'go* (of some), *Sca'bies sic'ca* seu *feri'na, Psora lepro'sa* seu *squamo'sa, Scaly Tetter, Dry Scale, Dry Scall,* (F.) *Dartre squameuse lichenoïde, D. écailleuse, Gratelle, Gale miliare, G. canine ou sèche.* A cutaneous affection, consisting of patches of rough, amorphous scales; continuous, or of indeterminate outline; skin often chappy. Psoriasis occurs under a considerable variety of forms. The surface, under the scales, is more tender and irritable than in lepra, which psoriasis, in some respects resembles. Dr. Willan has given names to eleven varieties of psoriasis: the chief of which are the *Psoriasis gutta'ta, P. diffu'sa* (one form of which is the *Baker's Itch* and *Grocer's Itch;* and another, the *Washerwoman's Scall*), the *P. gyra'ta,* and *P. invetera'ta* seu *Psora a'grria.* The treatment of irritable psoriasis must be antiphlogistic, with the internal use of the fixed alkalies, sulphur, &c. They do better without any local application. The more local and less inflammatory are ameliorated by emollient and soothing applications; or by slightly stimulating means, sea-bathing, the *Ung. hydrarg. nitrico-oxyd., Ung. oxidi zinci,* &c.

PSORIC, *Pso'ricus,* (F.) *Psorique, Galeux;* from *ψωρα,* 'itch.' That which has the nature of itch. A medicine for curing the itch.

PSOROCOMI'UM, from *Ψωρα,* 'the itch,' and *κομεω,* 'I take care of.' An hospital for those affected with itch.

PSOROPHTHALMIA, Ophthalmia tarsi — p. Neonatorum, see Ophthalmia (purulenta infantum).

PSYÆ. Psoæ.

PSYCHAGOGA, Psychagogica.

PSYCHAGO'GICA, *Psychago'ge,* from *ψυχη,* 'life,' 'soul,' and *αγω,* 'I lead.' Medicines which resuscitate, when life seems extinct; as in syncope and apoplexy.

PSYCHE, Anima.

PSYCHIA'TER. Same etymon as the next. One who treats diseases of the mind — a *Maddoctor,* (F.) *Médecin de fous, Aliéniste.*

PSYCHIATRI'A, from *Ψυχη,* 'mind,' and *ιατρεια,* 'healing.' Treatment of diseases of the mind.

PSY'CHICAL, *Psy'chicus,* from *ψυχη,* 'mind.' That which relates to the mind or mental endowments. *Psycholog''ical* is not unfrequently used with the like signification.

PSYCHOLOGICAL, see Psychical.

PSYCHOL'OGY, *Psycholog''ia,* from *ψυχη,* 'mind,' and *λογος,* 'discourse.' A treatise on the intellectual and moral faculties. Also, the intellectual and moral faculties or sphere.

PSYCHONOSOL'OGY, *Psychonosolog''ia,* from *ψυχη,* 'mind,' *νοσος,* 'disease,' and *λογος,* 'a description.' The doctrine of, or a treatise on, diseases of the mind.

PSYCHOPATHIES, Psychoses.

PSYCHOR'AGES, *Agoni'zans, Moribun'dus, Mor'ibund, Fey, Fee, Fie,* from *ψυχη,* 'mind, 'life,' and *ραγη,* 'rupture.' Dying; *in Articulo Mortis,* "in the article of death;" *in extre'mis. Moribund* means, also, one who is dying.

PSYCHORAGIA, Agony, Death.

PSYCHORRHAGIA, Agony, Death.

PSYCHOS, Cold.

PSYCHO'SES, from *ψυχη,* 'mind.' Neuroses of the intellect. Diseases of the mind. *Psychop'athies.*

PSYCHOTHERAPEI'A, from *ψυχη,* 'mind,' and *θεραπευω,* 'I attend upon the sick.' Treatment of disease through the mind.

PSYCHOTICA, Analeptica.

PSYCHOTRIA, Analeptica — p. Crocea, Palicourea crocea — p. Emetica, Ipecacuanha.

PSYCHOTROPHUM, Betonica officinalis.

PSYCHROLU'SIA, *Psychrolu'tron,* from *ψυχρος,* 'cold,' and *λουω,* 'I wash.' A cold bath.

PSYCHROPHOB'TA, from *Ψυχρος,* cold,' and *φοβος,* 'fear.' Dread of cold, especially of cold water. Impressibility to cold.

PSYCHTICA, Refrigerants.

PSYDRA'CIA, *quasi, ψυκρα 'υδρακια,* 'cold drops,' from *ψυδραξ, ψυδρακος,* 'a small blister or pimple.' The ancients sometimes used this term for *pimples;* at others, for *vesicles.* Willan and Bateman define *Psydracium* to be, a small pustule, often irregularly circumscribed, producing but a slight elevation of the cuticle, and terminating in a laminated scab. Many of the psydracia usually appear together, and become confluent; and, after the discharge of pus, they pour out a thin, watery humour; which frequently forms an irregular incrustation. Frank limits the term to a psoriform eruption, which differs from itch in not originating from an insect, and is not contagious;—perhaps the lichen. Authors have differed regarding its acceptation.

PSYDRACIA ACNE, Acne.

PSYLLIUM, Plantago psyllium—p. Erectum, Plantago psyllium.

PTARMICA, Achillea ptarmica—p. Montana, Arnica montana.

PTARMICUM, Errhine, Sternutatory.

PTARMOS, Sneezing.

PTELEA, Ulmus.

PTELEA TRIFOLIA'TA, *Shrubby trefoil, Swamp dogwood, Stinking ash, Stinking prairie bush, Wingseed;* indigenous. *Order,* Xanthoxylaceæ. Flowering in June. Is said to be possessed of antiperiodic virtues, and to be anthelmintic.

PTERIS, Polypodium filix mas.

PTERIS AQUILI'NA, (πτερυξ, 'a wing,' from the shape of its leaves.) *Pter'ia, Thelyp'teris, Filix Nymphæ'a* seu *fœmin'ea, Asple'nium aquili'num, Common Brake* or *Female Fern; Eagle Fern, Bracken,* (F.) *Fougère femelle, La grande Fougère. Nat. Ord.* Filices. The root is considered to be anthelmintic; and as efficacious as that of the male fern in cases of tapeworm.

PTERIS PALUSTRIS, Asplenium filix fœmina.

PTERNA, Calcaneum.

PTERNIUM, Calcaneum.

PTERNOBATES, Calcigradus.

PTEROCARPUS ERINACEA, see Kino — p. Marsupium, see Kino — p. Sandalinus, P. Santalinus.

PTEROCAR'PUS SANTALI'NUS, *P. Sandali'nus,* (πτερον, 'a wing,' and καρπος, 'fruit,') *San'talum* seu *San'dalum Rubrum, Red Sanders* or *Saunders Tree,* (F.) *Santal rouge. Ord.* Leguminosæ. *Sex. Syst.* Diadelphia Decandria. Red Saunders wood, *San'talum,* (Ph. U. S.,) *Lignum sandali'num* is used only as a colouring matter: it gives to rectified spirit a fine deep red. The juice of this tree, like that of *P. Draco,* affords a species of *Dragon's Blood.*

PTEROCAULON PYCNOSTACH'YUM, *Cony'za pycnostach'ya, Black root;* indigenous. *Order,* Compositæ. The root is used as an alterative in the form of decoction. It is said to be possessed of cathartic properties.

PTEROSPORA ANDROMEDE'A, (πτερον, 'a wing,' and σπορα, 'seed,' in allusion to the singular wing borne by the seeds,) *Scaly Dragon claw, Dragon root, Fever root, Albany beechdrop.* An indigenous plant. *Nat. Ord.* Monotropeæ, *Sex. Syst.* Decandria Monogynia:—found in the State of New York, which blossoms in July. The root has been regarded as an anthelmintic, diuretic, emmenagogue, &c.: but is not used.

PTERYG'ION, *Pteryg'ium, Ala,* from πτερυξ, πτερυγος, 'a wing.' A small wing. *Web, Onyx, Pyo'sis, Unguis,* (F.) *Drapeau, Onglet.* A varicose excrescence of the conjunctiva, of a triangular shape, and commonly occurring at the inner angle of the eye; whence it extends over the cornea. Sometimes two or three pterygia occur on the same eye, and cover the whole cornea with a thick veil, which totally prevents vision. According to Scarpa, the ancients gave the name *Pannic'ulus* to this last complication. If the pterygion cannot be dispelled by means of discutient collyria, it must be removed by the scissors.

PTERYGIUM, Pterygion, Scapula—p. Digiti, Paronychia—p. Lardaceum, Pinguecula—p. Pingue, Pinguecula.

PTER'YGO, in the composition of anatomical terms, means relating, or appertaining, to the pterygoid processes.

PTERYGO-ANGULI-MAXILLAIRE, Pterygoideus internus—*p. Colli-maxillaire,* Pterygoideus externus—*p. Maxillaire, grand,* Pterygoideus internus — *p. Maxillaire, petit,* Pterygoideus externus — p. Palatine canal, Pterygoid canal — p. Pharyngeus, Constrictor pharyngis — p. Staphylinus, Circumflexus.

PTER'YGO-PAL'ATINE, *Pterygo-Palati'nus.* That which belongs to the pterygoid process and palate.

PTERYGO-PALATINE ARTERY or *Superior pharyngeal* is a very small artery, and is given off by the internal maxillary at the bottom of the zygomatic fossa: after having passed through the pterygo-palatine canal, it is distributed to the superior part of the pharynx, the sphenoid bone, and the Eustachian tube.

PTERYGO-PALATINE CANAL. A small canal, formed by the internal ala of the pterygoid process, and the palate bone. It gives passage to the vessels of the same name.

PTERYGO-STAPHYLINUS INTERNUS, Levator palati—*p. Syndesmo-staphyli-pharyngien,* Constrictor pharyngis.

PTERYGODES, Alatus.

PTER'YGOID, *Pterygoï'des, Pterygoïde'us, Alifor'mis;* from πτερυξ, πτερυγος, 'a wing,' and ειδος, 'form.' A name given to two *processes* at the inferior surface of the sphenoid bone; the two laminæ which form them having been compared to wings. These *alæ* or *wings* or *processes,—Proces'sus aliform'es,*—have been distinguished, according to their position, into *internal* (*ento-pterygoid*) and *external.*

PTERYGOID ARTERY, *Vid'ian Artery, Ram'ulus Ductûs Pterygoïde'i, Arte'ria pharynge'a supre'ma,* arises from the internal maxillary artery, at the bottom of the zygomatic fossa, and enters the pterygoid canal with the nerve of the same name, to proceed to be distributed on the Eustachian tube and velum palati. The name, *pterygoid arteries,* is likewise given to the branches, which the internal maxillary and some of its divisions, as the meningea media, and posterior temporalis profunda, furnish to the pterygoid muscles, behind the neck of the lower jaw.

PTERYGOID BONE, Sphenoid.

PTERYGOID CANAL, *Vid'ian canal, Ductus pterygoïdeus, Cana'lis Vidia'nus,* (F.) *Conduit ptérygoïdien* ou *Vidien, Pterygo-palatine canal,* is a narrow channel, which traverses, in a direction from before to behind, the base of the pterygoid process, and gives passage to the pterygoid nerve. The *foramina* of the sphenoid, which terminate the canals, have the same epithets applied to them.

PTERYGOID FOSSA, *Fossa Pterygoïde'a,* (F.) *Fosse ptérygoïdienne* ou *ptérygoïde,* is the depression which separates the two laminæ or ale of the pterygoid process.

PTERYGOID MUSCLES, *Ala'res mus'culi, Aliform'es mus'culi,* are two in number. 1. The *Pterygoideus externus* seu *minor,* (F.) *Ptérygocolli-maxillaire, Petit Ptérygo-maxillaire* (Ch.), *Petit ptérygoïdien, Ptérygoïdien externe,* is a thick, short muscle, which arises, by short aponeuroses, from the outer surface of the external ala of the pterygoid process, and from the outer surface of the great ala of the sphenoid bone: and is inserted at the anterior part of the neck of the lower jaw-bone, and the corresponding part of the inter-articular fibro-cartilage. This muscle draws the condyle of the lower jaw and the inter-articular ligament forwards. It carries the chin forwards, and to the opposite side. If the two external pterygoids act together, the jaw is carried directly forwards. 2. The *Pterygoïdeus internus* seu *major, Masse'ter intern'us, Latens in Orè,* (F.) *Grand Ptérygo-maxillaire, Ptérygoanguli-maxillaire, Grand Ptérygoïdien* ou *Ptérygoïdien interne.* A thick, quadrilateral muscle, which is attached by short and very strong aponeuroses; above, to the pterygoid fossa, whence it proceeds downwards, backwards, and outwards, to be inserted into the inner surface of the ramus of the lower jaw, near its angle. This muscle

raises the lower jaw, and carries it a little forwards. It also performs the grinding motion.

PTERYGOID NERVES. These are two in number. I. The *Pterygoid* or *Vid'ian Nerve*. It arises from the posterior part of the sphenopalatine ganglion; traverses the Vidian canal of the sphenoid; and, beyond, divides into two filaments. 1. A *superior* or *cranial*, *Nervus superficia'lis* sive *petro'sus*, which ascends into the cranium, and enters the hiatus of Fallopius to unite with the facial nerve. 2. An *inferior* or *carotid*, *Nervus profundus* sive *major*, which traverses the carotid canal, and unites with the ascending branches of the superior cervical ganglion of the trisplanchnic. II. The *Pterygoid Nerve*, properly so called, *Nervus muscu'li pterygoï'dei*, is given off by the inferior maxillary branch of the 5th pair.

PTERYGOID PROCESSES, see Pterygoid.

PTERYGOÏDIEN GRAND ou *INTERNE*, Pterygoideus internus—*p. Externe*, Pterygoideus externus—*p. Petit*, Pterygoideus externus.

PTERYGO'MA, from πτερυξ, πτερυγος, 'a wing: a projecting or pendulous body.' A swelling of the vulva, which prevents coition.—M. A. Severinus.

PTERYX, Ala.

PTILOSIS, Deplumatio, Madarosis.

PTISANA, Tisane—p. Communis, Decoctum hordei compositum—p. Hippocratica, Decoctum hordei.

PTISSANA, Tisane.

PTOCHIA'TER, *Ptochia'trus*, from πτωχος, 'poor,' and ιατρος, 'a physician.' A physician to the poor, or to an establishment for the poor.

PTOCHIATRI'A. Practice amongst the poor. Also, an institution for the treatment of the diseases of the poor.

PTOCHOCOMI'UM, from πτωχος, 'a poor person,' and κομεω, 'I take care of;' *Ptochodochi'um*, *Ptocheï'um*, *Ptochotrophe'um*. An almshouse. An hospital for the poor.

PTOCHODOCHIUM, Ptochocomium.

PTOCHOTROPHEUM, Ptochocomium.

PTOMA, Cadaver.

PTOSIS, πτωσις, Prolapsus—p. Bulbi oculi, Exophthalmia.

PTOSIS I'RIDIS, *Iridoce'lē*, *Her'nia* seu *Prolapsus Fridis*, *Iridopto'sis*, from πτωσις, 'a falling.' A prolapsus of the iris through a wound of the cornea. It is known by a blackish tubercle, which projects a little from the cornea in various forms.

PTOSIS PALPEBRÆ, Blepharoptosis.

PTYALAGOGUE, Sialogogue.

PTYALIN, see Saliva.

PTYALISM, Salivation.

PTYALISME, Salivation—*p. Mercuriel*, Salivation, mercurial.

PTYALISMUS, Salivation—p. Acutus mellitus, see Salivation—p. Acutus sympatheticus, see Salivation—p. Hydrargyratus, Salivation, mercurial—p. Iners, Slavering—p. Mercurialis, Salivation, mercurial—p. Pyrosicus, Pyrosis.

PTYALOGOGUE, Sialogogue.

PTYALON, Saliva.

PTYASMAGOGUE, Expectorant, Sialogogue.

PTYELON, Saliva, Sputum.

PTYSIS, Exspuition.

PTYSMA, Saliva, Sputum.

PTYSMAGOGUE, Sialogogue.

PTYSMATIS'CHESIS, *Ptysmatos'chesis*, from πτυσμα, 'sputum,' and εχειν, 'to retain.' Suppression of pulmonary expectoration.

PTYSMATOSCHESIS, Ptysmatischesis.

PUANTEUR, Dysodia.

PUBENS, Ephebus.

PUBER, Ephebus.

PU'BERAL; same etymon as Puberty. Relating or appertaining to the age of puberty—as 'a *puberal* disease.'

PUBÈRE, Ephebus.

PUBERTAS, Ephebia.

PU'BERTY, *Pubertas*, *Hebē*, *Pubes*, *Aphrodis'ia*, *Ephebi'a*, *Ephe'bia*, *Ephe'botes*, *Ephebo'synē*, *Pubes'cence*, from *pubescere*, 'to begin to have hair on the chin and sexual organs.' The period of life at which young people of both sexes are *pubes'cent* or nubile. According to the civil law, puberty occurs at 12 years in females, and 14 in males. The period varies somewhat in different climates, and in different individuals of the same climate.

PUBES, *Pubis*, *Epis'ch'ion*, *Cteis*, *Pecten*; the *Pubic region*. Same etymon. The middle part of the hypogastric region; so called, because it is covered with hair, in both sexes, at the period of puberty. The hair is also called *Pubes*, *Lanu'go* seu *Pili*, *Pudendo'rum*, *Planta'rium*; and, of old, *Epicten'ion* and *pubertas* signified the same. See Tressoria.

PUBES, Puberty.

PUBESCENCE, Puberty.

PUBESCENT, see Puberty.

PUBIÆUS, Pubic.

PUBIC, *Pu'bian*, *Pu'bicus*, *Pubia'tus*, (F.) *Pubien*. That which belongs to or concerns the pubis.

PUBIC ARCH, *Arch of the Pubis*, (F.) *Arcade pubienne*. The arch at the anterior part of the inferior circumference of the pelvis. It is more expanded in the female than in the male; to correspond with the additional functions which she has to execute.

PUBIC ARTICULA'TION, *Sym'physis Pubis*, results from the junction of the ossa pubis. The medium of union is cartilage.

PUBIC LIG'AMENTS are two very solid, fibrous fasciæ, situate before and beneath the symphysis pubis, which they strengthen. The one is called the *anterior pubic ligament*; the other the *inferior* or *subpubic*.

PUBIC REGION, *Re'gio Pubis*. The region of the pubes.

PUBIEN, Pubic.

PUBIO-COCCYGIEN-ANNULAIRE, Pubio-coccyge'us annula'ris. Dumas gave this name to the levator ani and ischio-coccygeus, which he considers a single muscle.

PUBIO-COCCYGIEN-ANNULAIRE, Levator Ani—*p. Fémoral*, Pectinalis—p. Femoralis, Adductor longus femoris—*p. Ombilical*, Pyramidalis abdominis—p. Prostaticus, Compressor prostatæ—*p. Sous-ombilical*, Pyramidalis abdominis—*p. Sternal*, Rectus abdominis—p. Urethral, see Compressor Urethræ.

PUBIS, Pubes.

PUBIS Os, *Os Pec'tinis*, *Episei'on*, *Episi'on*, *Epis'chion*, *Share Bone*, *Bar-bone*, (Sc.) *Arkbein*. The anterior part of the os innominatum; so called because it corresponds to the genital organs and pubic region. The *angle of the pubis* is formed by the union of the body and rami of each side.

PUB'LICÆ PARTES. 'Public parts.' Those organs are so called, the object of whose functions is the nutrition of all the others. Such are the digestive and respiratory organs.

PUCCOON, Sanguinaria Canadensis—p. Red, Sanguinaria Canadensis—p. Yellow, Hydrastis Canadensis.

PUCE, Pulex irritans—*p. de Bourgogne*, see Anthrax—*p. Maligne*, see Anthrax—*p. Pénétrante*, *Chique*.

PUCELAGE, Virginity.

PUCELLE, Virgin.

PUCHA-PAT, Pogostemon patchouli.

PUCHURY, see Pichurim beans.

PUCHYRY, see Pichurim beans.

PUCKLE, Papula.

PUDDING-GRASS, Mentha pulegium.

PUDDING-PIPE TREE, Cassia fistula.

PUDENDA, Genital organs—p. Virorum, Pudibilia.

PUDEND'AGRA. A hybrid word; from *pudenda*, (*pudere*, 'to be ashamed,') 'the genital organs,' and the Greek *αγρα*, 'a seizure.' According to some, this term means pain in the genital parts: *Dolor pudendo'rum, Men'tulagra, Ædœodyn'ia*; according to others, it is synonymous with syphilis.

PUDENDAGRA PRURIENS, Prurigo pudendi muliebris.

PUDEN'DAL, *Pudenda'lis*. Relating or appertaining to the pudenda.

PUDEN'DAL HER'NIA. Hernia, which descends between the vagina and ramus ischii, and forms an oblong tumour in the labium; traceable in the pelvis as far as the os uteri.

PUDENDALIS, Pudendal.

PUDENDALIS LONGUS INFERIOR, see Sciatic nerve, lesser.

PUDENDUM, FEMALE, Vulva—p. Muliebre, Vulva.

PUDENDUS, Pudic.

PUDIBIL'IA; from *pudere*, 'to be ashamed.' The male genital organs; *Genita'lia Viri, Virili'a, Pensili'a, Instrumen'ta, Puden'da viro'rum, Pondus*.

PUDIC, *Pudi'cus, Puden'dus*, (F.) *Honteux*. Same etymon. That which causes shame. A name given to the genital organs as well as to different other parts.

PUDIC ARTERIES are distributed to the organs of generation. They are,—1. The *internal Pudic, Arteria Pudi'ca, A. puden'da commu'nis*, (F.) *Artère honteuse interne, A. Sous-pubienne* (Ch.), *Geu'ital Ar'tery*. It is furnished by the hypogastric, and divides into two branches; the one — the *inferior* or *perineal* — which gives off the inferior hemorrhoidal and the artery of the septum; the other — the *superior*, (F.) *Ischiopénienne* — which furnishes the transverse perineal artery, and divides into two branches; the *artery of the corpus cavernosum*, and the *dorsalis penis*. This latter, in the female, has the name *Dorsa'lis Clitor'idis*. 2. The *external Pudic Arteries*, (F.) *Artères scrotales* ou *vulvaires* (Ch.), *A. honteuses externes*, which are two in number. The one is *superficial* or *subcutaneous*, and the other *deep-seated* or *subaponeurotic*. They are given off from the femoral artery, or some one of its branches; and are distributed to the external parts of generation.

PUDIC NERVE, (F.) *Nerf honteux* ou *ischio-pénien* ou *Ischio-clitorien*, is a branch furnished by the sacral plexus, which is distributed to the genital organs; and, especially, to the penis in man, and the clitoris in the female.

PU'ERILE, *Pueri'lis*, from *puer*, 'a child,' (F.) *Puéril*. Appertaining or relating to childhood.

Respiration puérile ou *exagérée* ou *supplémentaire* ou *hypervésiculaire*:—a term applied to the respiration when it is heard loud through the stethoscope, as in healthy children.

PUERILITAS, Dementia of the aged.

PUERITIA, see Age.

PUER'PERA, from *puer*, 'a child,' and *parere*, 'to bring forth.' *Tokas, Lochos, Enix'a, Lecho*, a *lying-in woman*, (F.) *Femme en Couche, Accouchée*. A female in child-bed. One recently delivered.

PUER'PERAL, *Puerpera'lis*; from *puerpera*. Relating to parturition and its consequences.

PUERPERAL CONVULSIONS, Eclampsia gravidarum et parturientium.

PUER'PERAL FEVER. Any fever occurring during the puerperal state—*Febris puerpera'rum, Lechop'yra, Lochiocelii'tis, Lochiop'yra, Lochop'yra, Child-bed fever*. Most commonly restricted to a malignant variety of peritonitis.

PUERPERIUM, Child-bed state.

PUERPEROUS, Parturient.

PUFF, Lycoperdon.

PUFF, VEILED, see Cavernous respiration.

PUFF-BALL, Lycoperdon, Leontodon taraxacum.

PUF'FINESS, from (D.) poffen, 'to blow:' *Infla'tio, Suffla'tio, Tumefac'tio mollis*, (F.) *Bouffissure, Boursouflure*. A soft intumescence, without redness, which may be partial or general, and be produced by accumulation of serous fluid, extravasation of blood, effusion of air into the subcutaneous areolar tissue, &c. Puffiness is most frequently seen in the face and legs; and sometimes appears around a wound.

PUGIL'LUS, *Drax, Dra'chion*, diminutive of *pugnus*, 'the fist.' *Dragma, Dragmis*, (F.) *Pincée*. The quantity of any substance, which may be taken with the ends of two or three fingers. The eighth part of a handful.

PUGTEETH, Canine teeth.

PUISSANCE DU MOULE INTÉRIEUR, Plastic force.

PUKE, Emetic.

PUKEWEED, Lobelia inflata.

PUKING, Vomiting, Regurgitation.

PULEGIUM, Mentha pulegium—p. Cervinum, Mentha cervina.

PULEX IRRI'TANS. The *common flea*, (F. *Puce*. A parasitic insect found on the bodies of man and animals.

PULEX PENETRANS, *Chique*.

PULICARIA DYSENTERICA, Inula dysenterica.

PULICA'RIS, *Pulicula'ris*, (F.) *Pulicaire*, from *pulex, pulicis*, 'a gnat.' An epithet given to cutaneous eruptions resembling gnat-bites;—and, also, to diseases in which such eruptions occur.

PULICARIS HERBA, Plantago psyllium.

PÜLLNA, PILNA or BILNA, MINERAL WATERS OF. These well known bitter Bohemian springs contain sulphates of soda and magnesia, and chloride of magnesium.

PULMO, (pl.) *Pulmo'nes*; by transposition of the letter *l* from *pleumon, πλευμων*; *Pneumon, Pleumon, Spiramen'tum an'imæ, Ergaste'rion spir'itûs, Flabell'um et ventila'brum cordis, Lights*. The essential organ of respiration, which is double, and occupies the two sides of the chest. The lungs, which are of a spongy, soft, flexible, compressible, and dilatable structure, fill exactly the two cavities of the thorax, and are separated from each other by the mediastinum and the heart. The right lung, which is shorter and broader than the left, is divided, by two oblique fissures, into three unequal lobes, *Lobi* seu *Alæ pulmo'num*. The left has only two lobes, and consequently only one fissure. At the internal surface of those organs, which is slightly concave, there is, about the middle, a pedicle, formed by the bronchia and pulmonary vessels, and called, by anatomists, the *root of the lungs*, (F.) *Racine des Poumons*. Essentially, the lungs are composed of prolongations and ramifications of the bronchia, and of the pulmonary arteries and veins,—the divisions of which are supported by a fine, areolar tissue.

When the surface of the lungs is examined in a clear light, we may see, even through the pleura, that their parenchyma is formed by the aggregation of a multitude of small vesicles, of an irregularly spheroid or ovoid shape, full of air, and separated by white and opake septa, constituting lozenge-shaped spaces, which are called *lobules*—

lob'uli seu *in'sulæ pulmona'les* — and which are separated by interlobular areolar tissue. These lobules do not communicate with each other. The vesicles are called *Air-cells*, *Spiramen'ta* seu *Spiram'ina* seu *Cell'ulæ Pulmo'num*. Along the partitions or septa is deposited, in greater or less quantity, *black pulmonary matter*, (F.) *Matière pulmonaire noire*, as it has been called, which seems to be natural. Sometimes it is seen in points; at others, in spots. The colour of the lungs varies according to age and other circumstances. In youth, it is more red; and afterwards, grayish or bluish; often, as if marbled. The pleura pulmonalis is their investing membrane. The air is carried to the lungs by means of the trachea and bronchia. The black venous blood, which requires oxygenation, is conveyed to them from the heart, by the pulmonary artery; and when it has undergone this change, it is returned to the heart by the pulmonary veins. The blood-vessels inservient to the nutrition of the lungs are the *bronchial* arteries and veins. The pulmonary lymphatics are very numerous. Some are superficial; others, deep-seated. They pass, for the most part, into the *bronchial ganglions* or *glands*. The nerves are furnished by the pulmonary plexus.

PULMOMETER, Spirometer.

PULMOMETRY, see Spirometer.

PULMONAIRE, Pulmonaria — *p. en Arbre*, Lichen pulmonaria — *p. de Chêne*, Lichen pulmonaria — *p. des Français*, Hieracium murorum.

PULMONA'RIA, *P. Officina'lis* seu *Macula'ta* seu *Maculo'sa*, *Lungwort*, *Spotted Lungwort*, *Jerusalem Cowslip*, *Jerusalem Sage*, *Spotted Comfrey*, (F.) *Pulmonaire*, *Sauge de Jerusalem*. *Ord.* Boraginaceæ. *Sex. Syst.* Pentandria Monogynia. The leaves of this plant have been used as demulcents and pectorals; partly from their resemblance to lungs — hence the name, from *pulmo*, *pulmonis*, 'the lung' — and partly because they have a slightly mucilaginous taste. The plant is not worthy of notice.

PULMONARIA, Pneumonia — p. Arborea, Lichen pulmonarius — p. Gallica, Hieracium murorum — p. Officinalis, Pulmonaria — p. Virginica, Mertensia Virginica.

PUL'MONARY, *Pulmona'ris*, *Pulmona'lis*, from *pulmo*, *pulmonis*, 'the lung.' That which relates or belongs to the lungs. A name given to various parts.

PULMONARY ARTERY, *Arte'ria pulmona'ris*, *Vena arterio'sa*, arises from the upper and left part of the right ventricle of the heart; whence it passes obliquely upwards and to the left side; dividing into two trunks, opposite the second dorsal vertebra — one passing to each lung. At its origin, it is furnished with three sigmoid or semilunar valves. It carries the blood to the lungs for aeration.

PULMONARY MATTER, BLACK, see Pulmo.

PULMONARY PLEXUS, *Plexus pulmona'ris*. A considerable nervous network, situate behind the bronchia, which is formed by the filaments of the pneumogastric nerve or par vagum, and by other filaments from the inferior cervical ganglion and the first thoracic ganglia. This plexus forms a kind of areolar web, with numerous meshes of different sizes, in which vessels are lodged, surrounded by much areolar tissue. This plexus sends filaments to the bronchia, which they accompany to their extremities.

PULMONARY VEINS, *Venæ pulmona'res*, *Arteriæ venu'sæ*. These arise in the lungs from the final terminations of the arteries of the same name; collect in ramusculi and rami of greater and greater size, and ultimately unite in four trunks; two of which issue from each lung to open into the left auricle of the heart. The pulmonary veins have the same structure as the other veins of the body; from which they differ, in conveying arterial blood, as the pulmonary artery differs from the others in conveying venous blood. They carry the blood back to the heart after aeration.

PULMONES TARTARIZATI, Lithiasis pulmonum.

PULMONIA, Phthisis pulmonalis, Pneumonia.

PULMON'IC, *Pulmon'icus*, *Pneumon'icus*, *Pulmona'rius*, *Pneumon'ic*, (F.) *Pulmonique*, *Pneumonique*. Same etymon as Pulmonary. One affected with phthisis — one labouring under diseases of the lungs. Any thing relating or belonging to the lungs. A medicine for the lungs.

PULP, *Pulpa*, *Pulpa'men*, *Sarx*, (F.) *Pulpe*, *Pulpolite*. The soft and parenchymatous parts of vegetables reduced to a paste by the operation of pulping. Applied, also, to parts of the human body, which have the characters of, or resemble a pulp.

PULP OF THE FINGERS, (F.) *Pulpe des doigts*. The fleshy extremity of the fingers.

PULP OF THE TOOTH, Dental pulp.

PULPA CASSIÆ, see Cassia fistula — p. Dentis, Dental pulp — p. Pili, see Hair — p. Pruni, see Pruni pulpa — p. Prunorum sylvestrium condita, Conserva pruni sylvestris — p. Tamarindi, see Tamarindi pulpa.

PULPA TESTIS, *Paren'chyma testis*. The parenchyma of the testis.

PULPAMEN, Pulp.

PULPATION, Pulping.

PULPE, Pulp — *p. Cérébrale*, see Cerebrum — *p. Dentaire*, Dental pulp — *p. des Doigts*, Pulp of the fingers.

PULPEUX, Pulpy.

PULPEZIA, Apoplexy.

PULPING, *Pulpa'tion*, *Pulpa'tio*. An operation — the object of which is to reduce certain vegetable substances to a pulp. For this purpose, they are bruised in a mortar, and then passed through a hair sieve, by the aid of a wooden spatula, called a *Pulper*, (F.) *Pulpoire*.

PULPOIRE, see Pulping.

PULPOLITE, Pulp.

PULPY, *Pulpo'sus*, (F.) *Pulpeux*. Full of pulp.

PULQUE, see Agave Americana.

PULS EX OVIS et LACTE, Oogala.

PULSATIF, Throbbing.

PULSATILLA NIGRICANS, Anemone pratensis — p. Patens, Anemone patens — p. Pratensis, Anemone pratensis — p. Vulgaris, Anemone pulsatilla.

PULSATILLE NOIRE, Anemone pratensis — *p. des Prés*, Anemone pratensis.

PULSATIO, Pulsation — p. Cordis, Palpitation.

PULSA'TION, *Pulsa'tio*, *Sphygmos*, *Sphyxis*, *Pede'sis*, *Pedeth'mos*, (F.) *Battement*. The beating of the heart and arteries. Also, the beating felt in an inflamed part.

PULSATIVUS, Throbbing.

PULSATORY, Throbbing.

PULSE, from *pulso*, 'I beat;' *Pulsus*, *Pulsa'tio*, *Pulsus* seu *Ictus cordis et arteria'rum*, *Incur'sus arteria'rum*, *Sphygmos*, *Sphygma*, *Diaphyx'is*, (F.) *Pouls*. Beating of the arteries, produced by the afflux of the blood propelled by the heart in its contractions. For the sake of convenience, we choose the radial artery at the wrist to detect the precise character of the pulse. These characters relate to the number of pulsations in a

given time; to their degrees of quickness; hardness and strength; to the equality or inequality either of the pulsations themselves or of their intervals; to the development or fulness of the artery, and to the different impressions it may produce on the finger.

The following estimates have been made of the pulse at various ages:

Ages.	*Number of Beats per minute, according to*		
	Heberden.	Sömmering.	Müller.
In the embryo	.....	.....	150
At birth	130 to 140	.....	Do.
One month	120		
One year	120 to 108	120	115 to 130
Two years	108 to 90	110	100 to 115
Three years	90 to 80	90	90 to 100
Seven years	72	.....	85 to 90
Twelve years	70		
Puberty	.....	80	80 to 85
Adult age	.....	70	70 to 75
Old age	.....	60	50 to 65

It does not appear that the pulse of the aged is less frequent, but the contrary. In general it is more frequent in females and in irritable persons, than in males and those of an opposite temperament. In the healthy state, the pulse, besides having the proper number of pulsations, is neither hard nor unusually soft; it is moderately developed; of a medium strength; and perfectly equal, both as regards the pulsations and their intervals. In diseases it wanders, more or less, from these physiological conditions. The different characters of the pulse that have been recorded, are remarkably numerous. In a dictionary, it is necessary to detail them, although many of them are not now regarded, and some are ridiculous.

Pulse, Ardent, *Pulsus ardens*, (F.) *Pouls ardent, Pouls élevé.* One which seems to raise itself to a point in order to strike the finger.

Pulse, Cap'rizant, *Pulsus Capri'zans* seu *dorcadis'ans* seu *gazell'aus* seu *fusa'lis, Goatleap pulse*, (F.) *Pouls caprisant.* One which seems to leap, as it were; an imperfect dilatation of the artery being succeeded by a fuller and a stronger one.

Pulse, Complex, (F.) *Pouls combiné* ou *composé, P. compliqué.* A pulse which has the character of several critical pulses united.

Pulse, Contract'ed, (F.) *Pouls serré* ou *concentré.* One whose pulsations are narrow, deep, and slightly hard.

Pulse, Convul'sive, *Pulsus convulsi'vus*, (F.) *Pouls convulsif.* That which is unequally frequent or unequally hard; in short, which resembles the irregular pulsations of a muscular fibre in a state of convulsion.

Pulse, Crit'ical, *Pulsus crit'icus.* A pulse which, after having possessed the characters of irritation, becomes free, open, soft, &c.

Pulse, Decurtate, Pulsus myurus: see, also, Myurus.

Pulse, Deep, *Pulsus profun'dus*, (F.) *Pouls profond.* One which cannot be felt without difficulty, and without strong pressure by the finger.

Pulse, Defic''ient, *Pulsus defic''iens* seu *an'nuens et circum'nuens, P. Flickering*, (F.) *Pouls défaillant, P. insensible.* One which seems, every instant about to cease.

Pulse, Depressed, *Pulsus depressus*, (F.) *Pouls déprimé.* That which is deep and weak.

Pulse, Devel'oped, (F.) *Pouls développé.* That which is broad, full, strong, and frequent.

Pulse, Dicrot'ic, *Pulsus Di'crotus* seu *bi'crotus* seu *intestina'lis* seu *bifa'riens* seu *malleat'ris* seu *intercri'ens* seu *duplex*, (F.) *Pouls dicrote* ou *redondissant* ou *redoublé.* That in which the finger is struck twice at each pulsation; once lightly, the other time more strongly.

Pulse, Equal, *Pulsus æqua'lis.* That in which the pulsations resemble each other, and return at equal intervals.

Pulse, Febrile, *Pulsus febri'lis.* One very frequent.

Pulse, Feeble, *P. Weak, Pulsus deb'ilis*, (F.) *Pouls faible.* One which strikes the finger feebly.

Pulse, Fil'iform, *P. thready.* One which resembles a thread slightly vibrating.

Pulse, Flickering, Pulse, deficient.

Pulse, Form'icant, *Pulsus formi'cans.* (F.) *Pouls formicant.* One which resembles, by being small and scarcely perceptible, the motion of an ant.

Pulse, Frequent, (F.) *Pouls agité* ou *précipité.* One which strikes more frequently than usual in a given time.

Pulse, Full, *Pulsus plenus*, (F.) *Pouls plein.* One which gives the notion of great repletion in the vessel.

Pulse, Goat-leap, P. Caprizant.

Pulse, Gut'tural, *Pulsus guttura'lis*, (F.) *Pouls guttural.* A pulse which has been supposed to indicate the termination of affections of the throat.

Pulse, Hard, *Pulsus durus*, (F.) *Pouls dur.* That in which the pulp of the finger seems to yield to the pulsation.

Pulse, Hectic, *Pulsus hec'ticus.* The weak, frequent pulse observed in hectic fever.

Pulse, Hemorrhoid'al, (F.) *Pouls des Hémorrhoïdes.* A critical pulse, announcing the appearance of the hemorrhoidal flux. It is described as unequal;—the pulsations not being alike in force, and still less the intervals.

Pulse, Hepat'ic, (F.) *Pouls du Foie.* A pulse imagined to indicate affections of the liver. It is not worthy of description.

Pulse, Infe'rior, (F.) *Pouls inférieur* ou *abdominal* ou *ventral.* One supposed to announce evacuations below the diaphragm.

Pulse, Intercur'rent, *Pulsus intercur'rens* seu *intercri'dens.* One in which a superfluous pulsation seems to occur from time to time.

Pulse, Intermittent, (F.) *Pouls intercadent.* One in which the pulsations fail from time to time.

Pulse, Intes'tinal, (F.) *Pouls des intestins, P. de la diarrhée.* A critical pulse, presumed to announce an evacuation by the intestines.

Pulse, Is'tricate, *Pulsus intrica'tus*, (F.) *Pouls embarrassée.* That which is but little developed and unequally slow.

Pulse, Irreg'ular, *Pulsus anorma'lis.* One

whose pulsations are unequal, and return at unequal intervals.

Pulse of Irrita'tion, *Pulsus ab irritatio'nĕ* seu *nervi'nus* seu *acrit'icus*. One which is frequent, hard, and contracted.

Pulse, Jarring, P. vibrating — p. Jerking, Pulse, sharp.

Pulse, Languid, (F.) *Pouls languissant*. A slow and feeble pulse.

Pulse, Large, *Pulsus crassus* seu *magnus*, (F.) *Pouls grand, P. large*. That which is large and full.

Pulse, Long. One which strikes the finger to a great extent in length.

Pulse, Low, *Pulsus hu'milis*, (F.) *Pouls bas*. One in which the pulsations are scarcely perceptible.

Pulse, Nasal, (F.) *Pouls nasal* ou *capital* ou *du Nez*. One supposed to announce the end of an irritation in the nasal fossæ.

Pulse, Nat'ural, (F.) *Pouls naturel des adultes* ou *parfait* ou *des adultes* ou *modéré*. One that is equal and regular in strength and frequency; compressible, and devoid of hardness.

Pulse, Organ'ic, (F.) *Pouls organique*. One which indicates the affected organ, or the organ by which an evacuation will take place.

Pulse, Pec'toral, (F.) *Pouls de l'expectoration*. A critical pulse, announcing the termination of some pulmonary irritation.

Pulse, Quick. One which strikes sharply, but not forcibly, against the finger.

Pulse, Reg'ular, *Pulsus norma'lis* seu *regula'ris*. One whose pulsations are equal, and succeed each other at equal intervals.

Pulse, Resist'ing, (F.) *Pouls résistant*. One a little tense, a little hard.

Pulse, Sharp, (F.) *Pouls prompt* ou *vite* ou *vif*. One which strikes the finger sharply, rapidly. When to a greater extent, it is called a *jerking pulse*.

Pulse, Sharp-tailed, Pulsus myurus: see Myurus.

Pulse, Simple, *Pulsus simplex*. A critical pulse, indicating an evacuation by one organ only.

Pulse, Slow, *Pulsus tardus* seu *rarus*, (F.) *Pouls lent* ou *tardif* ou *rare*. One which strikes the finger slowly.

Pulse, Small, *Pulsus parvus*, (F.) *Pouls petit*. One whose pulsations are slender and weak.

Pulse, Soft, *Pulsus mollis*, (F.) *Pouls mou*. One which yields under the finger.

Pulse, Stom'achal, (F.) *Pouls stomacal* ou *de l'estomac*. One supposed to announce an evacuation by the stomach.

Pulse, Strong, *Pulsus fortis*, (F.) *Pouls fort, P. véhément*. One which strikes the finger strongly.

Pulse, Supe'rior, *Pulsus Superior*, (F.) *Pouls supérieur*. A critical pulse, supervening on irritation of organs situate above the diaphragm.

Pulse, Supple, *Pulsus elas'ticus*, (F.) *Pouls souple*. One in which the pulsations have strength without hardness.

Pulse of Sweat, *Pulsus Sudora'lis*, (F.) *Pouls Sudoral* ou *de la sueur*. A critical pulse, indicating an approaching perspiration.

Pulse, Tense, *P. Cordy, Pulsus tensus*, (F.) *Pouls tendu, P. roide*. One in which the artery resembles a cord fixed at its two extremities. When resembling a wire, it is called *wiry*.

Pulse, Thready, P. filiform.

Pulse, Trem'ulous, *Pulsus trem'ulus*, (F.) *Pouls tremblant* ou *palpitant*. One in which each pulsation oscillates.

Pulse, Un'dulating, *Pulsus fluctuo'sus* seu *fluens* seu *inci'dens Sola'ni*, (F.) *Pouls ondulant* ou *ondoyant*. One which resembles, in its movements, those of the waves.

Pulse, Une'qual, *Pulsus inæqua'lis*, (F.) *Pouls inégal*. One whose pulsations are not alike, or return at unequal intervals.

Pulse, U'rinal, *Pulsus urina'lis*, (F.) *Pouls de l'Urine*. A critical pulse, fancied to denote an approaching evacuation of urine.

Pulse, U'terine, *Pulsus uteri'nus*, (F.) *Pouls Utérine* ou *de la Matrice* ou *des Régles*. One which indicates the flow of the menses, or the occurrence of metrorrhagia.

Pulse, Vag''inal, *Pulsus vagina'lis*. The pulsation of the arteria vaginalis, which is increased in pregnancy, during abortion, labour, &c.

Pulse, Venous, Pulsus venarum.

Pulse, Vermic'ular. That which imitates the movement of a worm.

Pulse, Vi'brating, *Jarring Pulse*. One in which the artery seems to vibrate like a musical string.

Pulse, Wiry, see Pulse, tense.

PULSELESS, *Asphyc'tos*, Devoid of pulsation.

PULSELESSNESS, Asphyxia.

PULSEY, Cataplasm.

PULSIF'IC, *Pulsif'icus*; from *pulsus*, 'pulse.' That which causes or excites pulsation.

PULSILE'GIUM, *Pulsilo'gium, Pulsim'eter*, from *pulsus*, 'the pulse,' and *lego*, 'I read.' *Sphygmole'gium, Sphygmom'eter, Sphygmoscop'ium*. Any instrument for measuring the quickness or force of the pulse.

PULSIMANTI'A, from *pulsus*, and *μαντεια*, 'divination.' The art of predicting or prognosticating by the pulse.

PULSIMETER, Pulsilegium.

PULSUS, Pulse — p. Aceriticus, Pulse of irritation — p. Æqualis, Pulse, equal — p. Annuens et circumnuens, Pulse, deficient — p. Anormalis, Pulse, irregular — p. Bicrotus, Pulse, dicrotic — p. Biferiens, P. dicrotic — p. Caprizans, Pulse, caprizant — p. Cordis, see Heart — p. Crassus, Pulse, large — p. Debilis, Pulse, feebie — p. Deficiens, Pulse, deficient — p. Dicrotus, Pulse, dicrotic — p. Dorcadissans, Pulse, caprizant — p. Duplex, Pulse, dicrotic — p. Durus, Pulse, hard — p. Elasticus, Pulse, supple — p. Fluctuosus, Pulse, undulating — p. Fluens, Pulse, undulating — p. Formicans, Formicant, and Pulse, formicant — p. Fortis, Pulse, strong — p. Fusalis, Pulse, caprizant — p. Gazellans, Pulse, caprizant — p. Heterochronicus, see Heterochronicus — p. Humilis, Pulse, low — p. Incidens Solani, Pulse, undulating — p. Intercidens, Pulse, intercurrent — p. Mallearis, Pulse, dicrotic — p. Intercisus, Pulse, dicrotic — p. Intercurrens, Pulse, intercurrent — p. Intestinalis, Pulse, dicrotic — p. Intricatus, Pulse, intricate — p. Magnus, Pulse, large — p. Mollis, Pulse, soft.

Pulsus Myu'rus, *Pulse decurtate* or *sharp-tailed*, (F.) *Pouls myure*. One which goes on diminishing. See Myurus.

Pulsus Nervinus, Pulse of irritation — p. Normalis, Pulse, regular — p. Parvus, Pulse, small — p. Plenus, Pulse, full — p. Rarus, Pulse, slow.

Pul'sus Serri'nus, (F.) *Pouls serrin* ou *serratile*. One which strikes, sometimes strongly, at others feebly, and recalls the idea of a saw.

Pulsus Striatus, (F.) *Pouls étroit*. One that strikes the finger to a small extent in breadth.

Pulsus Sudoralis, Pulse of sweat — p. Tardus, Pulse, slow — p. Urinalis, Pulse, urinal — p. Uterinus, Pulse, uterine.

Pulsus Vac'uus, (F.) *Pouls vide*. One which gives the idea of emptiness of the artery.

Pulsus Vaginalis, Pulse, vaginal.

Pulsus Vena'rum, *Venous Pulse, Phlebopa'lia*. A pulsation occasionally noticed in the jugular veins. It is owing to some of the blood of the right ventricle reflowing into the right auricle,

and communicating an impulse to the venous blood arriving in the auricle through the descending cava. It is often a sign of impediment to the flow of blood along the pulmonary artery.

PULTA'CEOUS, *Pulta'ceus*, (F.) *Pultacé*, from *puls*, *pultis*, 'pap,' or from *pultare*, *pultatum*, 'to beat.' Resembling pap. Having a softened, semifluid appearance.

PULTATIO, Atheroma.

PULTISE, Cataplasm.

PULTICULA, *Bouillie.*

PULVERES EFFERVESCENTES, Powders, soda.

PULVERI'ZABLE, *Pul'verable.* From *pulvis*, *pulveris*, 'dust.' Capable of being reduced to powder.

PULVERIZA'TION, *Pulverisa'tio*, *Pulvera'tio*, *Coniosto'sis*, (F.) *Pulvérisation.* The operation of dividing substances, so as to reduce them to powder.

Most drugs are reduced to powder by persons who make it a special business, and who are called *drug grinders.* This is done on a large scale in *drug mills*; and the implements used are the *grinding mill* and the *stamping mill.* In the shop of the apothecary, pulverization is effected by the pestle and mortar, and the sieve.

Where substances require the addition of other bodies to facilitate their reduction to powder,—as where camphor needs a few drops of alcohol—the process is called *pulverization by mediation.*

PULVÉROLÉS, see Pulvis.

PULVER'ULENT, *Pulverulen'tus*; from *pulvis*, *pulveris*, 'dust.' Reduced to the state of a fine powder. Covered, as it were, with dust. An epithet applied to the eyes when they appear dirty, and, as it were, sprinkled with dust, by reason of granulations or grayish striæ, resulting from thickening of the mucous fluid of the conjunctiva. —Nysten.

PULVILLUS, Pad, *Bourdonnet*— p. e Linamentis confectus, *Bourdonnet*— p. Rotundus, *Bourdonnet.*

PULVI'NAR, *Pulvina'rium.* A pillow.

PULVINAR HUMULI, see Humulus lupulus.

PULVINAR MEDICA'TUM seu MEDICINA'LE, *Sac'culus medicina'lis.* A medicated pillow; as of hops.

PULVINAR PARVUM, Pad—p. Ventriculi, Pancreas.

PULVIS, *Conis*, *Powder*, (F.) *Poudre.* A substance, reduced into small particles by pulverization. *Simple powders* are those of a single substance; *compound*, those which result from a mixture of several different powders. An *impalpable powder* is one which is so fine that it can scarcely be felt under the finger. Compound powders have been called *Species*, (F.) *Espèces*, *E. pulvérulentes*, *Pulvérolés.*

PULVIS ABSORBENS, P. de magnesiâ compos.—p. Adspersorius, Catapasma—p. Alexiterius, P. contrayervæ comp. — p. Alexiterius, P. ipecacuanhæ compositus — p. Algarothi, Algaroth.

PULVIS ALOES COMPOS'ITUS, *P. Aloës cum Guai'aco*, *P. aloët'icus cum Guaiaco*, *Compound powder of Aloes.* (*Aloës*, ℥iss, *guaiac. res.* ℥j, *pulv. cinnam. comp.* ℥ss. Rub the aloes and guaiacum separately, then mix the whole. *Ph. L.*) Cathartic, stomachic, and sudorific. Dose, gr. x to ℈j.

PULVIS ALOES CUM CANEL'LÂ, *P. aloës et canellæ*, (Ph. U. S.), *P. Aloët'icus*, *Powder of Aloes with Canella*, *Species Hi'eræ picræ*, *Hi'era picra*, vulg. *Hi'kry pi'kry*, *Picra*, and *Pi'kry.* (*Aloës* ℔j, *canell.* ℥iij. Rub separately into a powder, and mix. *Ph. U. S.*) A warm cathartic. Dose, gr. x to ℈j.

PULVIS ALOES CUM GUAIACO, P. A. compositus—p. Aloeticus, P. aloes cum canellâ—p. Aloeticus, Hiera picra — p. Aluminosus, P. sulphatis aluminæ compositus—p. Aluminis compositus, P. sulphatis aluminæ compositus—p. Aluminis kinosatus, see P. sulphatis aluminæ compositus.

PULVIS DE AMA'RIS COMPOS'ITUS, *P. antiarthrit'icus ama'rus*, (F.) *Poudre antiarthritique amère.* (*Gentian.*, *aristoloch. rotund.*, ää p. 3, *flor. centaur. min.* p. 4, *fol. chamædr.*, *chamæpith.* manipul.—f. pulvis, *Ph. P.*) In gouty affections, dyspepsia, &c. Dose, gr. xx.

PULVIS ANGELICUS, Algaroth — p. Anodynus, P. ipecacuanhæ comp. — p. Antiacidus, P. cretæ compositus — p. Antiacidus, P. de magnesiâ compos. —p. Antiarthriticus amarus, P. de amaris compositus—p. Antiarthriticus purgans, P. de sennâ, scammoneâ et lignis—p. Antiasthmaticus, P. de sulphure et scillâ.

PULVIS ANTILYS'SUS, *Mead's powder against the bite of a mad dog.* It consisted of *ash-coloured liverwort* in powder, with an equal quantity of *black pepper*; a drachm and a half of the two forming a dose for an adult.

PULVIS ANTIMONIALIS, Antimonial powder.

PULVIS DE ARO COMPOS'ITUS, *Compound Powder of Arum*, (F.) *Poudre de Birckmann*, (*Rad. ari*, *acori veri*, *pimpinell. saxifrag.* ää 40 p., *oculcancror. ppt.* 12 p., *cinnam.* 7 p., *potassæ sulph.* 6 p., *ammoniæ muriat.* 2 p. — f. pulv. *Ph. P.*) Sternutatory.

PULVIS AROMATICUS, P. cinnamomi compositus.

PULVIS AS'ARI COMPOS'ITUS, *P. sternutato'rius* seu *errhi'nus* seu *capita'lis Sancti An'geli* seu *cephal'icus*, *Cephal'ic snuff*, *Compound powder of Asarabac'ca*, (F.) *Poudre d'asarum composée* dite *sternutatoire*, *P. de Saint-Ange.* (*Asar. Europ.* p. 3, *origan. majoranæ*, *lavand.*, sing. p. 1. Rub into powder. *Ph. L.*) Sternutatory.

PULVIS AURI, see Gold — p. e Bolo compositus cum opio, P. cretæ compositus cum opio — p. e Bolo compositus sine opio, see P. cretæ compositus — p. Cambogiæ compositus, P. e. gummi guttâ—p. Capitalis Sancti Angeli, Pulvis asari compositus — p. Carbonatis calcis compositus, P. cretæ compositus — p. Cardiacus, P. contrayervæ comp. — p. Carthusianorum, Antimonii sulphuretum rubrum.

PULVIS CAT'ECHU COMPOS'ITUS, *Compound Powder of Catechu.* (*Catechu*, *kino*, ää ℥ij; *cinnam.*, *myrist.*, ää ℥ss.) Dose, as an astringent, gr. xv to xxx.

PULVIS CATHARTICUS, P. scammoneæ comp.—p. Cephalicus, P. asari compositus.

PULVIS CINNAMO'MI COMPOS'ITUS, *Compound Powder of Cin'namon*, *Pulvis seu Spe'cies Imperato'ris*, *Pulvis aromat'icus* (Ph. U. S.), *P. vitæ Imperato'ris seu Diaro'maton*, *Species diacinnamo'mi* seu *lætifican'tes Rhazis* seu *Diam'bræ sine odora'tis* seu *aromat'icæ*, *Tra'gea aromat'ica*, *Aromatic powder*, (F.) *Poudre de canelle composée* ou *aromatique.* (*Cinnam.*, *zingib.* ää ℥ij, *cardam.*, *myrist.* ää ℥j. Rub to a fine powder. *Ph. U. S.*) Stimulant and carminative. Dose, gr. x to ℈j.

PULVIS COBBII seu TUNQUINEN'SIS. The famous *Tonquin powder*, introduced into England by a Mr. Cobb. It was composed of 16 grains of *musk*, and 48 grains of *cinnabar*; and was mixed in a gill of *arrack.* It was formerly regarded as a specific in hydrophobia.

PULVIS COMITIS WARWICENSIS, P. Cornachini —p. Comitissæ, Cinchona.

PULVIS CONTRAYER'VÆ COMPOS'ITUS, *P. cardi'acus* seu *alexite'rius* seu *Mantua'nus*, *Lapis contrayervæ*, *Contrayerva balls*, *Compound Powder of Contrayer'va.* (*Contrayerv. contrit.* ℥v, *test. præp.* ℔iss. Mix. *Ph. L.*) Stimulant and sudorific. Dose, gr. xv to ℥ss.

PULVIS CORNACHI'NI, *P. Ox'ydi Stib'ii com-*

pos'itus seu *Com'itis Warwicen'sis* seu *de Tribus* seu *Scammo'nii antimonia'lis, Diacelitates'sou Paracelsi, Earl of Warwick's Powder, Cer'berus Triceps,* (F.) *Poudre Cornachine.* (*Scammon., potass. supertart., antim. diaph.* āā p. æ. f. pulvis, *Ph. P.*) Cathartic. Used chiefly in cutaneous diseases. Dose, ℥ss to ʒj.

Pulvis Cornu Usti Cum O'pio, *P. opia'tus, Powder of Burnt Hartshorn with opium,* (F.) *Poudre de corne brulée avec l'opium.* (*Opii duri* cont. ʒj, *corn. ust. præp.* ʒj, *coccor.* cont. ʒj. Mix. *Ph. L.*) Ten grains contain one of opium. Anodyne.

Pulvis Cretaceus, P. cretæ compositus.

Pulvis Cretæ Compos'itus, *P. Carbona'tis Calcis compositus* seu *creta'ceus* seu *antac''idus* seu *terres'tris, Spe'cies e Scor'dio sine opio, S. Diacre'tæ, Compound Powder of Chalk, Dioscord'ium;* (with Bole Armeniac in place of chalk—the *Pulvis e Bolo compositus sine opio;*) (F.) *Poudre de craie composée.* (*Cretæ ppt.* ℔ss, *cinnam.* ℥iv, *tormentill., acaciæ,* sing. ℥iij, *pip. long.* ℥iv. Reduce separately to a fine powder, and mix. *Ph. L.*) Antacid, stomachic, absorbent. Dose, gr. xx to ʒij.

Pulvis Cretæ Compos'itus cum O'pio, *Compound Powder of Chalk with opium, P. e Cretâ compositus cum opio;* (with Bole Armeniac instead of chalk—*P. e Bolo compositus cum opio;*) *Species e Scordio cum opio,* (F.) *Poudre de craie composée avec l'opium.* (*Pulv. cret. c.* ℥vjss, *opii duri* cont. ℈iv. Mix. *Ph. L.*) Contains one grain of opium in 40. Anodyne and absorbent. Dose, ʒj to ʒij.

Pulvis Diaphoreticus, P. ipecacuanhæ comp. —p. Diapnoicus, P. ipecacuanhæ comp.—p. Diaromaton, P. cinnamomi compositus—p. Diasenæ, P. sennæ compos.—p. Diaturpethi compositus, P. jalapæ compositus.

Pulvis Ducis Portlan'diæ, *Duke of Portland's Gout Powder,* (F.) *Poudre du Due de Portland* ou *de la Mirandole.* (*Rad. aristoloch., gentianæ, summit. chamædr., centaur. min.* āā p. æ.) Dose, ℥ss to ʒj.

Pulvis Emmenagogus, P. myrrhæ compositus — p. Epilepticus Marchionum, P. de magnesiâ compositus — p. Errhinus, P. asari compositus—p. Galactopœus, P. de magnesiâ compos.

Pulvis e Gummi Guttâ, *P. Cambo'giæ compositus* seu *hydrago'gus, Camboge Powder,* (F.) *Poudre hydragogue* ou *de gomme gutte* ou *de Querceta'nus.* (*Rad. jalap,* 24 p., *rad. mechoacan.* 12 p., *cinnam., rhei.* āā 8 p., *gum. cambog.* 3 p., *fol. boldanellæ* sioc. 6 p., *semin. anisi* 12 p., fiat pulvis. *Ph. P.*) A drastic cathartic. In anasarca and in worms. Dose, gr. xv to xxx.

Pulvis Gummo'sus Alkali'nus, *Sapo vegeta'bilis,* (F.) *Poudre de savon végétal.* (*Guaiac. pulv.* 32 p., *potass. carb.* 4 p. Make into a powder. *Ph. P.*) Antacid.

Pulvis ex Helminthocort'o Compos'itus, *P. vermif'ugus absque mercu'rio,* (F.) *Poudre vermifuge sans mercure.* (*Fuc. helminthocort., sem. contra., summitat. absinth., tanaceti, fol. scordii, sennæ, rhei.* āā p. æ, fiat pulvis. *Ph. P.*) Dose, ʒj to ʒij.

Pulvis Hydragogus, P. e gummi guttâ — p. Hydrargyri cinereus, see Hydrargyri oxydum cinereum — p. Hypnoticus, Hydrargyri sulphuretum nigrum — p. Imperatoris, P. cinnamomi compositus—p. Incisivus, P. de sulphure et scillâ —p. Pro infantibus, P. de magnesiâ compos.—p. Infantum, P. de magnesiâ compos.—p. Infantum antacidus, P. de magnesiâ compositus.

Pulvis Ipecacuan'hæ Compos'itus, *P. alexite'rius* seu *anod'ynus* seu *diaphoret'icus* seu *diapno'icus* seu *sudorif'icus Dove'ri* seu *Ipecacuanhæ et Opii* (Ph. U. S.), *Compound Powder of Ipecacuanha, Dover's Powder,* (F.) *Poudre de Dover* ou *d'ipecacuanha et d'opium* ou *de Dower.* (*Ipecacuanh. pulv., opii pulv.,* sing ʒj, *potassæ sulphat.* ʒj. Mix. Diaphoretic. Dose, gr. v to gr. xij.

Pulvis Ipecacuanhæ et Opii, P. ipecacuanhæ compositus.

Pulvis Jalap'æ Compos'itus, *P. Dioturpe'thi compositus* seu *laxans* seu *purgans* seu *laxati'vus vegetab'ilis* seu *laxans cum sale* seu *Jalap'æ sali'nus* seu *Jalap'æ tartar'icus, Species Diajalapæ, Compound Powder of Jalap,* (F.) *Poudre de jalap composée.* (*Pulv. jalap.* ʒj, *potass. bitart.* ʒij. Mix.) Cathartic. Dose, ʒj to ʒij.

Pulvis Jalapæ Salinus, P. jalapæ compositus — p. Jalapæ tartaricus, P. jalapæ compositus — p. de Jalapâ et scammonio compositus, P. scammoneæ comp.—p. Jamesii, Antimonial powder—p. Jesuiticus, Cinchona—p. Joannis de Vigo, Hydrargyri nitrico-oxydum.

Pulvis Kino Compos'itus, *Compound Powder of kino,* (F.) *Poudre de kino composée,* (*Kino* ʒxv, *cinnam.* ʒiv, *opii duri* ʒj. Rub each to powder, and mix. *Ph. L.*) Astringent. Dose, gr. v to xx.

Pulvis Laxans, P. jalapæ compositus — p. Laxans cum sale, P. jalapæ compositus—p. Laxativus vegetabilis, P. jalapæ compositus.

Pulvis de Magne'siâ Compos'itus, *P. Galactopœ'us* seu *Nutri'cum* seu *Infan'tum* seu *Infantum antac''idus* seu *pro Infan'tibus* seu *antac''idus* seu *absor'bens* seu *epileptic Marchio'num, Compound Powder of Magne'sia,* (F.) *Poudre absorbante et anti-acide.* (*Magnesiæ, sacchar.* āā p. æ. Mix. *Ph. P.*)

Pulvis Mantuanus, P. contrayervæ comp. — p. Marchionis, Marchionis Pulvis—p. Mercurialis cinereus, Hydrargyri oxidum cinereum — p. ad Mucum pulmonalem liberius ciendum, P. de sulphure et scillâ.

Pulvis Myrrhæ Compos'itus, *P. e Myrrhâ compositus* seu *ad ul'cera tend'inum* seu *emmenagogus, Compound Myrrh Powder,* (F.) *Poudre Balsamique.* (*Myrrhæ, sabinæ, rutæ, castor. Russ.* āā ʒj.) A stimulant, antispasmodic, and emmenagogue. Dose, gr. xv. to xl.

Pulvis Nutricum, P. de magnesiâ compositus —p. Opiatus, P. cornu usti cum opio — p. Oxydi stibii compositus, P. cornachini — p. ad Partum, Ergot — p. Parturiens, Ergot — p. de Phosphate calcis et stibii compositus, Antimonial powder — p. Principis, Hydrargyri nitrico-oxydum—p. Purgans, P. jalapæ compositus — p. Quercetanus, Hydrargyri submurias.

Pulvis Querc\u016bs Mari'næ, *Powder of Yellow Bladder-Wrack.* (The wrack in fruit, dried, cleaned, exposed to a red heat in a crucible with a perforated lid, and then reduced to powder. *Ph. D.*) Virtues dependent on iodine: used, consequently, in bronchocele, &c. Dose, gr. x to xl. See Fucus vesiculosus.

Pulvis Rhei Compos'itus, *Compound Powder of Rhubarb.* (*Magnes.* ℔j, *zingib. pulv.* ʒij, *rhei pulv.* ʒiv. M. *Ph. E.*) An antacid and laxative. Dose, ʒj to ʒij.

Pulvis Sali'nus Compos'itus, *Compound Saline Powder.* (*Sodii chlorid., magnesiæ sulphat.,* āā ℥iv, *potas. sulphat.* ʒiij. *Ph. E.* Dose, as an aperient. two or three drachms dissolved in water.

Pulvis Scammo'neæ Compos'itus, *P. e Scammonio compositus* seu *Scammonii* seu *de Jalapâ et Scammo'nio compositus* dictus *Cathar'ticus, Compound Powder of Scammony,* (F.) *Poudre cathartique* ou *Poudre de Scammonée composée.* (*Scammon., ext. jalap. dur.,* sing., ʒij, *zingib.* ʒss. Rub separately to powder, and mix. *Ph. L.*) Cathartic. Dose, gr. viij to gr. xv.

Pulvis Scammo'nii cum Aloë. *P. e Scammonio cum Aloë, Scammony and Aloes Powder.* (*Scammon.* ʒvj, *ext. jalap. dur., aloës Socotr.* āā ʒiss, *zing.* ʒss.) Cathartic. Dose, gr. x to xv.

Pulvis Scammonii Antimonialis, P. cornachini.

Pulvis Sennæ Compos'itus, *P. e Sennâ compositus* seu *e Senâ compositus* seu *Diase'næ, Compound Powder of Senna*, (F.) *Poudre de séné composée.* (*Sennæ, potas. supertart.*, sing., ℥ij, *scammon.* ℥ss, *zingib.* ℥ij. *Ph. L.*) Cathartic, hydragogue. Dose, ℈j to ℥j.

Pulvis de Sennâ, Scammo'neâ et Lignis Compos'itus *dictus* Antiarthrit'icus Purgans, (F.) *Poudre de Pérard.* (*Gum Arab., potass. supertart., fol. sennæ, chinæ*, āā 4 p., *scammon., rad. sarsapar., chinæ, guaiac. lign.* āā 2 p., fiat pulvis. *Ph. P.*) Purgative. Used to obviate gout. Dose, ℥j.

Pulvis Stanni, see Tin—p. Sternutatorius, P. asari compositus—p. Stibiatus, Antimonial powder — p. Stypticus, P. Sulphatis aluminæ compositus—p. Sudorificus, P. ipecacuanhæ comp.—p. Sudorificus Doveri, P. ipecacuanhæ compositus.

Pulvis Sulpha'tis Alu'minæ Compos'itus, *P. alumino'sus* seu *alu'minis kinosa'tus* seu *styp'ticus* seu *aluminis compositus, Alu'men kinosa'tum, Compound Alum Powder*, (F.) *Poudre styptique* ou *d'alum composée.* (*Sulphatis aluminæ*, p. iv, *kino*, p. 1. *Ph. E.*) Astringent. In intestinal hemorrhage and diarrhœa. Dose, gr. x to xv.

Pulvis de Sul'phurē et Scillâ, *P. antiasthmat'icus* seu *incisi'vus* seu *ad mucum pulmonal'em libe'rius cien'dum*, (F.) *Poudre incisive* ou *anti-asthmatique.* (*Sacchar.*, p. 3, *sulphur. lot.* p. 2, *scillæ.* siccat. p. j. *Ph. P.*) Dose, gr. v to ℈ss.

Pulvis de Sulpha'tē Potas'sæ Compos'itus, *P. tem'perans Stahl'ii*, (F.) *Poudre tempérante de Stahl.* (*Potassæ. sulph., P. nitrat.* āā 9 p., *hydrarg. sulph. rubr.* 2 p. Mix. *Ph. P.*) As an antiphlogistic, and in acidity of the first passages. Dose, ℈j to ℈ij.

Pulvis e Sulphure'to Hydrar'gyri Nigro et Scammo'nio, *dictus* Vermif'ugus Mercuria'lis, (F.) *Poudre vermifuge mercurielle.* (*Pulv. cornachin., hydrarg. sulphuret. nigr.* recent. præp., āā p. æ. Mix. *Ph. P.*) Dose, ℈j to ℥ss.

Pulvis Sympatheticus, Sympathetic powder —p. Temperans Stahlii, P. de sulphate potassæ compositus — p. Terrestris, P. cretæ compositus.

Pulvis Tragacan'thæ Compos'itus, *P. e Tragacan'thâ compositus, Species Diatragacan'thæ frig''idæ, Compound Powder of Tragacanth*, (F.) *Poudre de gomme adragant composée.* (*Tragacanth.* contus., *acaciæ* cont., *amyli*, sing., ℥iss, *sacch. purif.* ℥iij. *Ph. L.*) Demulcent. In coughs, &c. Dose, ℥ss to ℥iij.

Pulvis de Tribus, P. cornachini—p. Tonquinensis, P. Cobbii — p. ad Ulcera tendinum, P. myrrhæ compositus—p. Vermifugus absque mercurio, Pulvis ex helminthocorto comp.—p. Vermifugus mercurialis, P. e sulphureto hydrargyri nigro et scammonio—p. Vitæ Imperatoris, P. cinnamomi compositus.

PUMEX, *Lapis pu'micis, Pumice*, (F.) *Pierre Ponce.* This was formerly employed as a desiccative and dentifrice.

PUMICE, Pumex.

PUMILIO, Nanus.

PUMILUS, see Nanus.

PUMMEL-FOOT, Kyllosis.

PUMP, BREAST, Antlia lactea —p. Stomach, Stomach pump.

PUMPKIN, Cucurbita pepo.

PUNA, (S.) *Veta, Soracco, Soroche, Mareo; Hypson'osus, Mountain Sickness*, (F.) *Mal de Montagne.* A sickness common in the elevated districts of South America and elsewhere, which attacks those unaccustomed to breathe the rarefied atmosphere. It strongly resembles seasickness, with a most acute and depressing throbbing in the head. It does not often affect the respiration greatly.

PUNAISE, Cimex.

PUNAISIE, Ozæna.

PUNCH, *Rhi'zagra*, from *pungere, punctum*, 'to prick.' *Repulso'rium*, (F.) *Repoussoir.* A surgical instrument used for extracting the stumps of teeth. See Lever.

Also, an agreeable alcoholic drink, made of spirit, wine, sugar, lemon juice, and water. Milk is sometimes substituted in part for the water: it then forms *Milk Punch.*

PUNCTA OSSIFICATIONIS, Ossification, points of.

PUNCTÆ MUCOSÆ, see Acne.

PUNCTICULA, Petechiæ.

PUNCTIO, Paracentesis, Puncture—p. Nervi, Neuronygme.

PUNCTUM, Stitch.

Punctum Au'reum, *Punctu'ra au'rea.* Formerly, when an intestinal hernia was reduced by an incision made through the integuments down to the upper part of the spermatic vessels, a golden wire was fixed and twisted, so as to prevent the descent of any thing down the tunica vaginalis. Hence the term.

Punctum Cæcum, see Optic nerve — p. Lacrymale, Lachrymal punctum.

Punctum Sa'liens, *P. sanguin'eum sa'liens, Globu'lus sanguin'eus, Punctus ruber sa'liens.* The first moving *point* which makes its appearance after the fecundation of the germ. It has been generally, but erroneously, applied to the heart of the embryo.

PUNCTURA, Paracentesis — p. Aurea, Punctum aureum.

PUNCTURE, *Punctu'ra, Punc'tio, Cente'sis, Paracente'sis, Nyxis*, from *pungere, punctum*, 'to prick:' *Tresis Punctura*, (F.) *Piqure.* A wound made by a pointed instrument, as a sword, bayonet, needle, thorn, &c. A puncture is, generally, of trifling consequence; but, sometimes, it becomes important from the parts implicated, and the after consequences.

PUNCT'URING. Same etymon. *Compunc'tio, Paracente'sis.* (F.) *Ponction.* The operation of opening, by means of a trocar, lancet, &c., any natural or accidental cavity, with the view of evacuating any fluid, effused or accumulated therein. *Paracentesis* is a sort of puncturing.

PUNCTUS RUBER SALIENS, Punctum saliens.

PUNGENT, (F.) *Pongitif.* Same etymon. Pain is said to be pungent, when it seems as if a pointed instrument were forced into the suffering part.

PU'NICA GRANA'TUM. The *Pomegranate, Rhoa, Rhœa, Grana'tum, Malograna'tum*, (F.) *Grenadier: Ord.* Myrtaceæ. *Sex. Syst.* Icosandria Monogynia. The rind of the fruit, called *Malicho'rium, Malacorium, Malicorium, Grana'ti Fructûs Cortex* (Ph. U. S.); and the flowers — called *Balaustine flowers* — are used in medicine. They have been employed both internally and externally as astringents. The seeds are called *Cocco'nes, κοκκωνες.* The portion, however, of the plant, that has attained most celebrity, is the bark of the root, *Grana'ti Radi'cis Cortex* (Ph. U. S.), which appears to be very efficacious in tænia. It is given in decoction, (*Granat. rad. cort.* ℥ij; *Aquæ* Oij, boiled to Oiss.) Dose, f℥ij, every half hour. Three or four doses are usually sufficient to expel the worm.

The bark contains a peculiar matter called *Grenadin.*

PUNK, Boletus igniarius.

PUOGENIA, Pyogenia.

PUPIL, *Pupil'la, Pu'pula, Pupil'io, Vis'io*,

Opsis, Corē, Cora, Rhox, Fenes'tra seu *Nigrum* seu *Fora'men Oc'uli, Prunel'la, Lumen, Gleuē, Sight* or *Apple* or *Ball of the eye*, (Sc.) *Blak of the Eie*, (Prov.) *Candle*, (F.) *Pupille, Prunelle*. The aperture of the iris, through which the rays of light pass that have to impress the image of an object on the retina. This aperture can be dilated or contracted so as to allow a greater or smaller quantity of luminous rays to penetrate. The pupil, in man, is round, and by it the anterior and posterior chambers of the eye communicate with each other. In the fœtus, during the first six months of gestation, it is closed by the pupillary membrane.

PUPIL, CLOSURE OF THE, Synezizis.

PUPIL, PINHOLE. A condition of the pupil in typhus, in which it is so contracted as to resemble a pinhole. It indicates a dangerous form of brain affection.

PUPILLÆ VELUM, Pupillary membrane.

PUPILLARIS HERBA, Lapsana.

PU'PILLARY, *Pupilla'ris*, (F.) *Pupillaire*. That which belongs to the pupil.

PUPILLARY MEMBRANE, *Membra'na Pupilla'rie, Pupil'læ velum, Membra'na Wachendorfia'na*. The central aperture of the iris is closed, in the fœtus, during a certain period of gestation, by a very thin membrane. It disappears in the seventh month.

PUPPET ROOT, Veratrum viride.

PUPPIS OS, Frontal bone.

PUPULA, Pupil.

PU'PULÆ, *A'pices digito'rum*. The pulps or extremities of the fingers.

PURBLIND, Myopic.

PURBLINDNESS, Myopia.

PURGAMENT, Purgative.

PURGAMENTA, Excrement — p. Alba, Leucorrhœa — p. Infantis, Meconium — p. Puerperii, Lochia — p. Uteri, Lochia.

PURGANS MEDICAMENTUM, Cathartic.

PURGATIO, Catharsis — p. Alvi, Catharsis — p. Muliebris alba, Leucorrhœa — p. Puerperii, Lochia.

PURGATION, Catharsis.

PURGATIONES, Menses — p. Menstruæ, Menses.

PURGATIONS, Menses.

PUR'GATIVE, *Purgati'vus, Purgans, Moch'licus, Catoret'icus, Catoter'icus, Cathar'tic, Pur'gament, Purge*, (F.) *Purgatif*, from *purgare, purgatum*, 'to cleanse.' A medicine which operates more powerfully on the bowels than a laxative, stimulating the muscular, and exciting increased secretion from the mucous coat.

PURGE, Purgative — p. Root, Euphorbia corollata.

PURGING, Diarrhœa.

PURIF'ICANS, *Purif'icus*, from *purificare*, 'to make pure or clean.' Purifying; hence: —

PURIFICANTIA, Medicines that cleanse or purify the blood.

PURIFICUS, Purificans.

PU'RIFORM, *Puriform'is*, from *pus, puris*, and *forma*. Having the appearance of pus.

PURL. A medicated malt liquor, in which wormwood and aromatics are infused.

PURO-HEPATITIS, see Hepatitis.

PURO-MUCOUS, *Puro-muco'sus*, from *pus, puris*, and *mucus*. Having the character or appearance of pus and mucus.

PURPLE OF CASSIUS, (F.) *Pourpre de Cassius*. A precipitate, obtained by adding the protochloride of tin to a dilute solution of gold; or by dipping rods of tin in a solution of gold in diluted chlorohydric acid. Used in syphilis.

PURPLES, Purpura hæmorrhagica.

PUR'PURA, *Por'phyra*, 'a purple colour.' This word has been employed in many senses. It generally means, livid spots on the skin from extravasated blood, with languor and loss of muscular strength, pains in the limbs. — (F.) *Pourpre*.

In PURPURA SIMPLEX, *Porph'yra simplex, Petechiæ sinē febrē, Pelio'sis, Phœnig'mus Petechia'lis, Profu'sio subcuta'nea, Pete'chial Scurvy*, the spots are numerous, but small and flea-bite-shaped; chiefly on the breast, arms, and legs; with paleness of countenance. At times, the affection is accompanied by severe pains in the extremities, constituting *Pelio'sis rheumat'ica*.

In PURPURA HÆMORRHAG''ICA, *Porph'yra hæmorrhag''ica, Stomac'ace universa'lis, Hæmorrhagia universa'lis, Petechiano'sis, Morbus maculo'sus hæmorrhag''icus Werlhof''ii, Pelio'sis hæmorrhag''ica, Scorbu'tus, Schorbu'tus, Hæmorrhœ'a petechia'lis, Hæmatospil'ia, Land Scurvy, Purples*, (F.) *Scorbut, S. de Terre, Maladie de Werlhof, Hémacélinose, Péliose hémorrhagique* — the spots are circular, and of different sizes; often in stripes or patches, irregularly scattered over the thighs, arms, and trunk; with occasional hæmorrhage from the mouth, nostrils, or viscera, and great debility and depression of spirits.

In PURPURA NAU'TICA, *Porphyra nautica, Scorbu'tus, Pechytyrbē, Gingibra'chium, Gingipe'dium, Scelotyr'bē, Stomac'acē, Scorbu'tus nau'ticus, Sea scurvy*, (Sc.) *Scrubie*, (F.) *Scorbut*, there are spots of different hues, intermixed with the livid, principally at the roots of the hair; the teeth are loose; the gums are spongy and bleeding; the breath is fetid, and the debility universal and extreme. This occurs chiefly at sea, after exposure to a moist, cold, foul atmosphere; with long use of one kind of food and of stagnant water.

All these varieties of purpura considerably resemble each other. In the first two, however, there seems, at times, to be some excitement, which has led to the employment of purgatives, and even of bleeding, with advantage. They are dependent upon a peculiar diathesis, which has been termed *Scorbu'tic Cachex'ia, Lues Scorbu'tica*, and *Cacochym'ia Scorbu'tica*. Generally speaking, the use of the mineral acids will be indicated; and, in sea scurvy, vegetable acids must be regarded as the best antiscorbutics. Nitre is, also, a good antiscorbutic, and in cases of great prostration it may be united with cinchona or turpentine. Tamarinds and cream of tartar, made into drink, are also serviceable. But the great remedy is change from low to cheerful spirits; from filth to cleanliness; and from a cold and damp, to a temperate and dry climate, with change of food, and especially the use of green vegetables.

The general principles of management are the same in sea, as in land scurvy.

PURPURA, Scarlatina — p. Alba benigna et maligna, Miliary fever — p. Maligna, Petechiæ — p Miliaris, Miliary fever — p. Puerperarum, Miliary fever — p. Urticata, Urticaria.

PURPURIC URINE, see Porphyruria.

PURPURINE, see Porphyruria.

PURPURISSUM, Hydrargyri sulphuretum rubrum.

PURRING TREMOR, *Frémissement cataire*

PURSE, Scrotum — p. Shepherd's, Thlaspi bursa.

PUR'SINESS, *Dyspnœ'a pinguedino'sa*, (F.) *Pousse*. Dyspnœa accompanied with oppressive fatness. The word is, also, applied to dyspnœa of every kind. One so affected is said to be *pursy*, or *short-winded*, (Prov.) *Short-of-puff, Thick-listed*, (F.) *Poussif*.

PURSLAIN, Purslane.

PURSLANE, Portulaca — p. Milk, Euphorbia corollata and E. maculata — p. Speedwell, Ve-

rvica peregrina — p. Water, Ludwigia palustris, Veronica beecabunga.

PURSY, see Pursiness.

PURULENCE, Pus, Suppuration.

PURULENCY, Pus, Suppuration.

PU'RULENT, *Purulen'tus, Em'pyos, Pyo'des, Py'icus*, from *pus, puris*. That which has the character of pus or consists of pus; as *purulent matter, a purulent collection*, &c.

PURULENT DEPOSIT, Pus.

PURULENTIA, Suppuration.

PURVAIN, Verbena officinalis.

PUS, *Humor purulen'tus, Pyon, Pyono'ma, Matter, Pu'rulent depos'it, Pu'rulence, Pu'rulency*, (Sc.) *Wourum, Worsum*. A secretion from inflamed textures, and especially from the areolar membrane. It is, almost always, of the same nature, whatever may be the part it proceeds from. Pus of a good quality,—*laudable pus, Pus bonum* seu *laudab'ile* seu *nutriti'vum* seu *verum*, (F.) *Pus louable*, — is of a yellowish-white colour, opake, inodorous, and of a creamy appearance. Heat, acids, and alcohol coagulate it. When analyzed by Schwilgué, it afforded albumen and water, a particular extractive substance, and a small quantity of soda, phosphate of lime, and other salts. Normal pus consists essentially of two distinct parts, *pus corpuscles* or *pus globules, Cytoid corpuscles*, (Henle) — and a colourless, aqueous fluid, *liquor puris*, in which the corpuscles are suspended. A variety of the pus corpuscles is described by M. Lebert under the name *pyoid*. Fully formed pus is aplastic.

PUS BONUM, see Pus — p. Corpuscles, see Pus — p. Corrosivum, Sanies — p. Globules, see Pus — p. Laudable, see Pus — *p. Louable*, see Pus — p. Malignum, Ichor — p. Malignum, Sanies — p. Nutritivum, see Pus — p. Verum, see Pus.

PUSH, Pustule.

PUSILLA'TUM, *Pusula'tum*, from *pusillus*, 'small' [?]. A coarse powder.

PUSILLUS, Nanus.

PUSKILE, Pustule.

PUSTULA, Pustule — p. Ardens, Eczema — p. Oris, Aphthæ — p. Gangrænosa, see Anthrax — p. Livida Esthoniæ, see Anthrax.

PUSTULÆ SICCÆ, Lichen.

PUSTULAR, *Pustulous, Pustula'ris, Pustulo'sus*, (F.) *Pustuleux*. Of or belonging to pustules. Affected with pustules.

PUSTULA'TION, *Pustula'tio*, from *pustula*, 'a pustule.' The formation of pustules.

PUSTULE, *Puskile, Push, Pus'tula*, from *pus. Ecpye'sis, Ecthy'ma, Benath, Bubē, Epanas'tasis*. An elevation of the cuticle, with an inflamed base, containing pus. Willan and Bateman reckon four varieties of pustules, *Phlyza'cium, Psydra'cium, Achor*, and *Favus*. The variolous pustule is often called, by the French, *Grain*; by us, *Pock*.

PUSTULE MALIGNE, see Anthrax.

PUSTULOUS, Pustular.

PUSULATUM, Pusillatum,

PUT TO BED, Deliver.

PUTAMEN OVI, see Membrana putaminis.

PUTIUM, Prepuce.

PUTREDO, Hospital Gangrene, Putrefaction.

PUTREFAC'TION, *Putrefac'tio, Putrescen'tia, Sepsis, Sup'rotes, Se'pedon, Putrid* or *Putrefact'ive fermentation*, from *putris, putre*, 'rotten,' and *facere*, 'to make.' A decomposition, experienced by animal substances, when deprived of life, and placed under special circumstances. The presence of water is indispensable, the temperature most favourable to it, is from 60° to 90° of Fahrenheit. The most common products of putrefaction are, water, carbonic acid, acetic acid, ammonia, carburetted hydrogen, and a semi-putrid substance, which is volatilized, and has an infected odour. It has been supposed that something like putrefaction may occur in the living body, as in case of putrid fever. To this condition, Piorry has given the name *Typhohæ'mia*, conceiving it to be owing to alteration of the blood by putrid animal matters. *Putrefaction* signifies the state of becoming putrid: whilst *Putridity, Putre'do, Putrid'itas, Pu'tridness*, (F.) *Pourriture*, is the state of rottenness.

PUTRESCENT, Hyposaprus — p. Poison, see Poison.

PUTRESCENTIA, Putrefaction — p. Uteri gravidi, Hystero-malacia.

PUTRID, *Pu'tridus, Sapros, Sepedono'des*. (F.) *Putride*, from *putreo*, 'to rot.' An epithet for some affections, in which the matters excreted and the transpiration itself exhalo a smell of putridity. It is particularly applied to typhus.

PUTRIDITAS, see Putrefaction.

PUTRIDITY, see Putrefaction.

PUTRILA'GO, *Putror*, (F.) *Putrilage*. Same etymon. The pultaceous matter or *slough*, which forms in certain gangrenous and other ulcers, and is thrown off.

PUTROR, Putrilage.

PUTZOCHILL, see Myroxylon Peruiferum.

PUXIRI, see Pichurim beans.

PYÆMIA. Pyohæmia.

PYAR'THRUM, from πυον, 'pus,' and αρθρον, 'joint.' A suppurated joint.

PYCNAN'THEMUM INCA'NUM, (πυκνος, 'dense,' and ανθεμον, 'a blossom.') *Clinopod'ium inca'num, Common Mountain Mint, Wild Basil*. An indigenous plant of the mint *family* — *Ord.* Labiatæ — which flowers in August. It has the aromatic properties of the mints.

PYCNAN'THEMUM LINIFO'LIUM, *Virginia Thyme*, has like virtues.

PYCNICMASTICA, Incrassantia.

PYCNOSIS, Inspissatio.

PYCNOTICA, Incrassantia.

PYEC'CHYSIS, from πυον, 'pus,' and εκχυσις, 'effusion.' An effusion of pus.

PYELI'TIS, (F.) *Pyélite*, from πυελος, 'pelvis,' and *itis*, denoting inflammation. Inflammation of the pelvis and calices of the kidney.

PYELOMETER, Pelvimeter.

PYELONEPHRI'TIS, from πυελος, 'pelvis,' νεφρος, 'kidney,' and *itis*, denoting inflammation. Inflammation of the kidney, and of the pelvis and calices,

PYELOS, Pelvis.

PYEMESIS, Pyoemesis.

PYESIS, Suppuration.

PYETIA, Colostrum, Rennet.

PYGE, Nates.

PYGMÆUS, Pygmy.

PYGME, Fist, Forearm.

PYGMÉE, Pygmy.

PYGMY, *Pigmy, Pygmæ'us*, (F.) *Pygmée*, from πυγμη, 'the fist; as big as the fist.' A dwarf. The Pygmæi were a fabulous nation of dwarfs in the extreme parts of India; or, according to others, in Ethiopia.

PYGODID'YMUS, *Did'ymus symphyoperinæ'us, Pygop'agus*, from πυγη, 'the nates,' and διδυμος, 'a twin.' A monstrosity, in which twins are united by the sacrum and coccyx.

PYGOM'ELES, (F.) *Pygomèle*, from πυγη, 'the nates,' and μελος, 'unprofitable.' A monster with excessive growth on the nates or rump.

PYGOPAGES, Pygodidymus.

PYICUS, Purulent.

PYLE, Porta.

PYLEMPHRAX'IS, from πυλη, '*porta*,' 'a gate,' and εμφραξις, 'obstruction.' Obstruction of the vena porta.

PYLEPHLEBI'TIS, from πυλη, 'porta,' φλεψ,

φλεβος, 'a vein,' and *itis*, denoting inflammation. Inflammation of the vena porta.

PYLOR'IC, *Pylor'icus*, (F.) *Pylorique*. Same etymon as pylorus. That which relates to the pylorus. An epithet given to different parts.

PYLORIC ARTERY, *Arte'ria Corona'ria dextra*, (F.) *Petite artère gastrique droite*, arises from the hepatic, and is distributed to the pylorus and to the lesser curvature of the stomach, anastomosing, particularly, with the A. coronaria ventriculi and A. gastro-epiploïca dextra.

PYLORIC VEIN follows the same distribution as the artery.

PYLORIQUE, Pyloric.

PYLO'RUS, *Jan'itor*, *Portona'rium*, from πυλη, 'a gate,' and ουρος, 'a guardian.' *Os'tium ventric'uli duodena'lē* seu *pylor'icum* seu *dextrum* seu *infe'rius*, *Orific''ium dextrum* seu *inferius* seu *Egres'sus* seu *Os infe'rius* seu *An'nulus* seu *Sphincter ventric'uli*, *Ostia'rius*, *Hostia'rius*, (F.) *Pylore*. The lower or right orifice of the stomach—*Orifice intestinal* (Ch.)—is called *Pylorus*, because it closes the entrance into the intestinal canal, and is furnished with a circular, flattened, fibro-mucous ring, which occasions the total closure of the stomach during digestion in that organ. This ring has been called the *Valve of the Pylorus*, *Sphincter Pylo'ri*, *Pylo'rus propriè sic dictus*, (F.) *Valvule du pylore*. It is a fold of the mucous and muscular membranes of the stomach; and is the *Pyloric muscle* of some authors.

PYO, in composition, means 'pus,' from πυον, 'pus.'

PYOBLENNICUS, Mucopurulent.

PYOBLENNORRHŒ'A, from *pyo*, and βλεννα, 'mucus,' and ρεω, 'I flow.' A discharge of puriform mucus.

PYOCENO'SIS, from *pyo*, and κενωσις, 'evacuation.' Evacuation of pus.

PYOCHEZ'IA, *Diarrhœ'a purulen'ta*, from *pyo*, and χεζω, 'I go to stool.' Discharge of pus by stool. Purulent diarrhœa.

PYOCŒ'LIA, *Ascit'es purulen'tus*, from *pyo*, and κοιλια, 'the belly.' Pus in the abdominal cavity.

PYOCYSTIS, Vomica.

PYODES, Purulent.

PYŒDE'MA, from *pyo*, and οιδημα, 'swelling.' Tumefaction of the surface owing to effusion of pus.

PYOÉM'ESIS, *Pyem'esis*, *Vom'itus purulent'us*, from *pyo*, and εμεσις, 'the act of vomiting.' Vomiting of pus.

PYOGENESIS, Pyogenia.

PYOGE'N'IA, *Puogen'ia*, *Pyogen'esis*, *Pyopoë''sis*, from *pyo*, and γενεσις, 'generation.' Generation of pus. The theory or mechanism of the formation of pus. Some have believed that pus is formed by the arterial system, and is deposited, by way of excretion, in the inflamed parts; others, that it is formed by the destruction of solid parts. It seems to be owing to a degeneration of the liquor sanguinis and exudation corpuscles.

PYOGENIA CORROSIVA, Ulceration—p. Simplex, Suppuration.

PYOGEN'IC, *Pyogen'icus*. Same etymon. Having relation to the formation of pus.

PYOHÆ'MIA, *Pyæ'mia*, (F.) *Pyohémie*, from *pyo*, and αιμα, 'blood.' Alteration of the blood by pus, giving occasion to the *Diath'esis* seu *Infec'tio purulen'ta*.

PYOID CORPUSCLES or GLOBULES, see Pus.

PYOME'TRA, *P. purulen'ta*, from *pyo*, and μητρα, 'womb.' A collection of pus in the uterus.

PYOMETRA PURULENTA, Pyometra.

PYON, Pus.

PYONÉPHRITE, see Nephritis.

PYONOMA, Pus.

PYOÖTORRHŒA, Otirrhœa.

PYOPERICAR'DIA, *Pyopericar'dium*, from *pyo*, περι, 'about,' and καρδια, 'the heart.' A collection of pus in the pericardium.

PYOPHTHALMIA, Hypopyon — p. Neonatorum, see Ophthalmia (purulenta infantum).

PYOPLEURITE, Empyema.

PYOPOËSIS, Pyogenia.

PYOP'TYSIS, from *pyo*, and πτυω, 'I spit. Spitting of pus.

PYORRHAG''IA, from *pyo*, and ραγη, 'violent rupture.' A sudden discharge of a large collection of matter.

PYORRHŒ'A, from *pyo*, and ρεω, 'I flow.' A discharge of pus.

PYORRHŒA ALVINA, Pyochezia — p. Aurium, Otirrhœa — p. Nasalis, Ozæna — p. Palpebræ, Blepharopyorrhœa—p. Urinalis, Pyuria — p. Viarum lacrymalium, Dacryopyorrhœa.

PYOSIS, Hypopyon, Pterygion, Suppuration — p. Pectoris, Empyema.

PYOTHORAX VERUS, Empyema.

PYOTORRHÉE, Otirrhœa.

PYOTURIA, Pyuria.

PYR, Fever.

PYRA, Anthrax—p. Crustumina, Crustuminatum — p. Crustumerina, Crustuminatum.

PYR'AMID, *Pyr'amis*, πυραμις, πυραμιδος, *Eminen'tia pyramida'lis tym'pani*, from πυρ, 'flame,' which has a conical appearance [?]. A small bony projection in the cavity of the tympanum, which is excavated, to lodge the muscles of the stapes. The *Centre-pin* of the trephine. A small, obtusely pointed eminence of the inferior vermiform process of the cerebellum.

PYRAMID, see Calumba—p. of Malacarne, Vermiform process, inferior.

PYRAMIDAL DE L'ABDOMEN, Pyramidalis abdominis — *p. de la Cuisse*, Pyramidalis — *p. du Nez*, Pyramidalis nasi — *p. Stapédien*, Stapedius.

PYRAMIDALE, (OS,) Cuneiform, (bone.)

PYRAMIDA'LIS ABDOM'INIS, *Mus'culus Fallo'pii* seu *succenturia'tus* seu *auxilia'rius*, (F.) *Pubio-ombilical*, *Pubio-sous-ombilical* (Ch.), *Pyramidal de l'abdomen*. A small, fleshy, pyramidal fasciculus, whose existence is not constant; and which is inserted, by its base, into the upper part of the pubis, and terminates, by its summit, at the inferior part of the linea alba. When it contracts, it stretches the linea alba.

PYRAMIDA'LIS, *P. Fem'oris*, *Ili'acus exter'nus*, *Pyriform'is*, *Piriformis*, *Primus et superior quadrigem'inus*, (F.) *Sacro-trochantérien* (Ch.), *Pyramidal de la cuisse*. A flat, triangular muscle, situate at the posterior part of the pelvis. By its base, it is attached to the anterior surface of the sacrum; to the corresponding surface of the great sacro-sciatic ligament and to the posterior part of the ilium. It terminates by a tendon, which is attached to the inner surface of the great trochanter. This muscle is a rotator of the thigh outwards, or of the pelvis in an opposite direction.

PYRAMIDALIS FEMORIS, Pyramidalis.

PYRAMIDA'LIS NASI, *Proc''erus nasi*, *Nasum dila'tans*, (F.) *Fronto-nasal* (Ch.), *Pyramidal du nez*. A thin, triangular muscle, which has its summit upwards. Above, it is continuous with the occipito-frontalis. It descends vertically before the root of the nose, on which it terminates, becoming confounded with the transversalis. This muscle wrinkles the skin of the root of the nose transversely, and stretches that which covers the tip.

PYRAMIDES, Corpora pyramidalia.

PYRAMIDES ANTÉRIEURES, Corpora pyramidalia — p. Ferreini, Ferrein, pyramids of

—p. Malpighianæ, Papillæ of the kidney—*p. Postérieures du cervelet*, Corpora restiformia.

PYRAMIDS OF MALPIGHI, Papillæ of the kidney—p. of Ferrein, see Ferrein—p. Posterior, Corpora restiformia — p. of Wistar, Sphenoidal cornua.

PYRAMIS, Penis, Pyramid—p. Cochleæ, Modiolus — p. Trigona, see Temporal bone.

PYRCÆA, Incendium.

PYREC'TICA, 'febrile;' from *πυρετος*, 'fever,' and *εχω*, 'I have.' Fevers: the first order in the class *Hæmatica* of Good.

PYRÉLAINES, Olea empyreumatica.

PYRENOIDES, Odontoid.

PYRÈTHRE, Anthemis pyrethrum.

PYRETHRUM, Anthemis pyrethrum, Urtica—p. Parthenium, Matricaria parthenium—p. Sylvestre, Achillea ptarmica.

PYRETICO'SIS, from *πυρ*, 'fire,' *πυρετος*, 'fever;' *Morbus febri'lis*. A febrile affection.

PYRETICUS, Febrifuge, Febrile.

PYRETOGENETIC, Stimulant.

PYRETOGRAPH'IA, from *πυρετος*, 'fever,' and *γραφη*, 'a description.' A description of fever.

PYRETOL'OGY, *Pyretolog''ia*, from *πυρετος*, 'fever,' and *λογος*, 'a discourse.' *Pyrol'ogy*. A treatise on fevers. A title sometimes given to a monograph on fever.

PYRETOS, Fever.

PYRETOTYPOSIS, Intermittent.

PYREX'IA, *Pyrex'ie*, *πυρεξις*, (*πυρ*, 'fire.') Fever. The febrile condition. Also, a paroxysm of fever — *Paroxysmus febri'lis*.

Pyrex'iæ, *Febrile diseases*. The first class of Cullen's Nosology.

PYRI MARTIALES, Ferrum tartarizatum.

PYRIA, Fomentation, Vaporarium.

PYRIATERIUM, Vaporarium.

PYRICAUSTUM, Burn.

PYRIFORMIS, Pyramidalis.

PYRIPH'LEGES, *πυριφλεγης*, *Pyriphlectos*, *πυριφλεκτος*, from *πυρ*, 'fire,' and *φλεγω*, 'I burn.' One who has a burning fever.

PYRITES, IRON, Ferri sulphuretum.

PYRMONT, MINERAL WATERS OF. A celebrated mineral spring on the Weser, in Westphalia, four leagues from Hamelet. The waters are tonic, and contain chlorides of sodium and magnesium, sulphates of soda and magnesia, and carbonates of iron, lime, and magnesia dissolved in carbonic acid, with some resinous [?] principles. It is a highly carbonated chalybeate.

Artific''ial Pyrmont Water may be formed of *Epsom salt*, gr. xv; *common salt*, gr. v; *magnesia*, gr. x; *iron-filings*, gr. v; *water*, Oij. Impregnated with the gas from *marble-powder* and *sulphuric acid*, ãã ʒvij.

PYRŒNUS, Spiritus rectificatus.

PYR'OLA, *P. rotundifo'lia*, *Round-leaved Pyrola* or *Wintergreen*; *Skin leaf*. *Ord.* Ericaceæ. Diminutive of *Pyrus*, a pear tree, from a fancied resemblance of the foliage. This plant was once used as a gentle astringent and tonic.

Pyr'ola Macula'ta, *Chimaph'ila Macula'ta*, *Spotted Pipsis'sewa*, *Spotted Wintergreen*, *Whiteleaf*, *White Pipsissewa*, *King cure*, *Ground holly*, *Rheumatism weed*, &c., has similar properties.

Pyrola, Roundleaved, Pyrola.

Pyrola Umbella'ta. *Chimaph'ila* seu *Chimoph'ila umbella'ta*, *C. Corymbo'sa*, *Ground-holly*, *Pipsis'sewa*, *Wintergreen*, *Rheumatism weed*, *Prince's pine*, *Herbe a pisser* (Canada). This common American plant is allied to the uva ursi, in botanical as well as medical qualities. It is tonic and diuretic. The bruised leaves irritate the skin. From the decoction or infusion an agreeable beverage may be formed by adding sugar, ginger to flavour it, and yeast to produce fermentation. Under the name *Pipsis'sewa Beer* it has been used in scrofulous affections.

PYROLEUM OSSIUM RECTIFICATUM, Oleum animale Dippelii.

PYROLIG'NEOUS ACID, *Ac''idum pyroligne'ticum* seu *pyrolig'neum* seu *pyroligno'sum* seu *pyroxyl'icum* seu *ligni pyro-oleo'sum* seu *ace'ticum empyreumat'icum* seu *lig'neum* seu *ligno'rum empyreumat'icum*, *Pyrolig'nic acid*, (F.) *Acide pyroacétique* ou *pyroligneux* ou *pyroligneux*, *Vinaigre de bois*. An acid, obtained by distillation from wood, coal, &c., which was once believed to be of a peculiar character. It is now known to be formed of acetic acid and an empyreumatic oil, from which it may be freed; and, in this state, is sold in commerce for *Acetum distillatum*, *Acetic acid of commerce*, *Ac''idum ace'ticum e Ligno vena'li*. It is used for similar purposes as distilled vinegar, and for preserving animal substances. It has also been used as an antiseptic in gangrene and sphacelus, and to foul ulcers; wherever indeed creasote is indicated.—The dose of the impure pyroligneous acid internally is from five to thirty drops, three or four times a day.

PYROMA'NIA, *Incen'diary monoma'nia*, from *πυρ*, 'fire,' and *mania*. Insanity, with an irresistible desire to destroy by fire.

PYROPH'AGUS, *Igniv'orus*, from *πυρ*, 'fire,' and *φαγω*, 'I eat.' One who eats fire. A juggler, who eats bodies in a state of ignition.

PYROS, Triticum.

PYRO'SIS, from *πυρ*, 'fire,' 'the act of burning.' *Ptyalis'mus pyroso'icus*, *Limo'sis cardial'gia sputato'ria*, *Ardor* seu *Ebullit''io stom'achi* seu *ventric'uli*, *Cardial'gia sputato'ria*, *Pyrosis Suec''ica*, *Apoceno'sis vom'itus pyrosis*, *Dyspepsi'sia pyrosis*, *Chiromoreg'mia*, *Orex'is* (of some), *Soda*, *Waterbrash*, *Waterqualm*, *Waterpang*, *Black-water*, (F.) *Ardeur de l'estomac*, *Fer chaud*, *Cremason*, *Gorgosset*. This affection consists of a hot sensation in the stomach, with eructations of an acrid, burning liquid, that canses a distressing sensation in the parts over which it passes. Attention to diet, and the use of bitter absorbents, will usually relieve, when the disease is functional. Occasionally, it is symptomatic of organic disease of the stomach.

Pyrosis also signified, of old, inflammation, gangrene, and a burn.

Pyrosis Suecica, Pyrosis.

PYROSOPHIA, Chymistry.

PYROTECHNIA, Chymistry.

PYR'OTECHNY, *Pyrotech'nē*, *Pyrotech'nia*, from *πυρ*, 'fire,' and *τεχνη*, 'art.' Art of making fire-works, &c. Also, chymistry. M. Percy has used the term *Pyrotechnie Chirurgicale* for the art of applying fire or the actual cautery in surgery.

PYROTHONIDE, from *πυρ*, 'fire,' and *οθονη*, 'linen.' *Liquor pyro-oleo'sus e lin'teo para'tus*. A kind of pyrogenous or empyreumatic oil, produced by the combustion of textures of hemp, linen, or cotton in a copper vessel. The brown product is acid. Its medical properties probably resemble those of creasote. Diluted with three or four times its weight of water, it has been used as a gargle in cynanche tonsillaris, but is not now employed.

It is said, also, to be a popular remedy for toothach and skin diseases. When prepared from rags, it is called *Rag oil*; when from paper, *Paper oil*, (F.) *Huile de Papier*.

PYROTICUS, Caustic.

PYROXYLIN, Gun cotton, see Collodion.

PYRUS AMERICANA, Sorbus Americana.

Pyrus Cydo'nia, *Cydo'nia malifor'mis* seu *vulga'ris*, *Sorbus Cydo'nia*, *Cydo'nia*, *Coto'nia*,

Quince Tree, (F.) *Cognassier, Cognassier. Ord.* Rosaceæ. *Sex. Syst.* Icosandria Pentagynia. The fruit is termed *Cydo'nium malum, Malum cænum* seu *coto'neum, Melum cydo'nium, Quince*, (F.) *Coign.* Quince-seeds—*Cydo'nium* (Ph. U. S. 1851)—are sometimes used in decoction as a demulcent. The fruit makes a pleasant preserve.

PYRUS DOMESTICA, Sorbus domestica.

PYRUS MALUS, *Malus, M. dasyphyl'la* seu *commu'nis* seu *sylves'tris, Sorbus malus, Melea*, the *Apple Tree*, (F.) *Pommier*. The apple—(F.) *Pomme*—is an agreeable fruit when ripe. When unripe, it disagrees, especially with those of weak digestive powers. The same may be said of the *pear*, (F.) *Poire*; the fruit of *Pyrus commu'nis, P. Sorbus* seu *Sati'va, Pirus, A'pios*, (F.) *Poirier*.

Apple Brandy is a spirituous liquor obtained from the juice of the apple, and much used in the United States.

PYTIA, Colostrum, Rennet.

PYTISMA, Sputum.

PYUL'CON, *Pyul'cum*, from πυον, 'pus,' and ἑλκω, 'I extract.' (F.) *Tire-pus*. A surgical instrument for extracting pus from any cavity. Many pyulca have been employed, all of which act as exhausting syringes.

PYU'RIA, *Pyotu'ria, Pyorrhœ'a urina'lis*, (F.) *Pyurie, Pissement de Pus*, from πυον, 'pus,' and ουρον, 'urine.' Discharge of purulent urine: a symptom which occurs in many diseases; particularly in cases of renal calculi, and in organic affections of the bladder. It receives various epithets, according to the part whence the pus proceeds:—as *Pyuria urethra'lis, P. rena'lis*, and *P. vesica'lis*.

PYURIA CHYLOSA, Chyluria—p. Lactea, Chyluria—p. Mucosa, Cystirrhœa—p. Serosa, Cystirrhœa—p. Viscida, Cystirrhœa.

PYXIS, πυξις. A box; a pill-box. Also, an emollient ointment.—Aëtius, and Paulus.

PYXIS, *Boîte*, see Cotyloid.

Q.

Q., see Abbreviation.

QUABEBE, Piper cubeba.

QUACK, Charlatan.

QUACK-MEDICINE, Arcanum.

QUACKSALVER, Charlatan.

QUADRANS, *Quarta pars libræ*. A quarter of a pound. Three ounces (Troy.)

QUADRA'TUS, (F.) *Carré*, from *quadrus*, 'square.' A name for muscles whose figure approaches a square. Depressor Labii inferioris, Quadratus femoris.

QUADRATUS DORSI, Q. lumborum.

QUADRA'TUS FEM'ORIS, *Quadratus*, *Quartus quadrigem'inus quadratus*, (F.) *Tuber-ischio-trochantérien* (Ch.), *Ischio-sous-trochantérien. Carré de la Cuisse*. A muscle situate at the posterior and upper part of the thigh. It is thin, flat, and quadrilateral, and is attached to the outer part of the tuberosity of the ischium; whence it proceeds transversely to the inferior part of the posterior margin of the great trochanter. It rotates the limb, turning the toe outwards.

QUADRATUS GENÆ, Platysma myoides—q. Radii, Pronator radii quadratus.

QUADRATUS LUMBO'RUM, *Quadratus* seu *Lumba'ris externus, Q. dorsi, Flectens par lumbo'rum*, (F.) *Ilio-costal*, (Ch.) *Ilio-lombi-costal, Carré des lombes*. A flat, somewhat thick, irregularly quadrilateral muscle, situate in the loins, at the sides of the vertebral column. It is attached, below, to the crista ilii and ilio-lumbar ligament; and above, to the inferior margin of the last rib; and besides, to the base of the transverse processes of the last four lumbar vertebræ. This muscle inclines the loins to its side; depresses the last rib, and is thus a muscle of respiration. It can also raise the hip.

QUADRIGA, Cataphracta.

QUADRIGEM'INA TUBER'CULA, *Eminentiæ Quadrigem'inæ* seu *Bigem'inæ, Optic Lobes, Optic Ganglia, Pons Syl'vii, Cor'pora quadrigem'ina* seu *bigem'ina, Nates et Testes*, (F.) *Tubercules quadrijumeaux* ou *bijumeaux, Éminences bigéminées, Lobes optiques* ou *bijumeaux*. Four medullary tubercles, situate at the posterior surface of the tuber annulare. They are white, externally; gray, internally; oblong; rounded; connected by pairs, and separated by two grooves, which divide them crucially. Of these tubercles—the superior called *Nates, Na'tulæ, Tuber'cula anterio'ra, Glu'tia*, are larger and more prominent than the lower, called *Testes, Tuber'cula poste rio'ra*. The pineal gland corresponds exactly to the point of intersection of the two furrows that separate them.

QUADRIGEMINUS PRIMUS ET SUPERIOR, Pyramidalis—q. Quartus quadratus, Quadratus femoris—q. Secundus et tertius, Ischiotrochanterianus.

QUADRIJUMEAUX (*TUBERCULES*), Quadrigemina Tubercula.

QUADROON, see Mulatto—q. Black, see Mulatto.

QUAFADIL, Melanthium Virginicum.

QUAHOIL, Cacao.

QUAIL, Tetrao coturnix.

QUAMASH, EASTERN, Scilla esculenta.

QUANDROS. Ancient name for a precious stone, believed to exist in the brain of the vulture; and to which was attributed the property of augmenting the secretion of milk, and preserving from deadly accidents. No such stone exists.

QUAR'ANTINE, *Quar'entine, Quarentaine*, from (L.) *Quaranti'na*, itself from *quaranta*, 'forty.' (F.) *Quarantaine*. The time during which travellers, returning from a country where the plague or any other pestilential disease exists, are compelled to remain on board ship or in a lazaretto. They, as well as the ship, are said '*to perform quarantine*.' Quarantine is sometimes extended beyond forty days, whilst its duration is frequently much less. It is sometimes enforced by land; for example, when contagious diseases require the establishment of *cordons sanitaires*, and when persons are desirous of leaving infected districts. During quarantine, no communication is allowed between the travellers and the inhabitants of the country. Quarantine is a great impediment to commerce; and is, doubtless, very frequently enforced when there is but little danger of contagion. The evils, however, that might arise from the introduction of a widely-spreading contagious disease, are so disastrous, as to induce

legislators to maintain these laws in perhaps an unnecessary degree of rigour.

QUARTAN, from *quartus*, 'the fourth.' *Quarta'na Febris, An'etus Quarta'nus, Tetartæ'us, Quartan Ague*, (F.) *Quarte*. An intermittent, the paroxysms of which recur every fourth day, leaving between them two days' interval. We speak also of the *Quartan Type*. A *Double Quartan*, (F.) *Double quarte*, is one in which one paroxysm occurs on the third and another on the second day, so that there is only one day of apyrexia and two of paroxysms in succession; — the paroxysms of every fourth day resembling each other. A *Triple Quartan* is one in which there is a paroxysm every day; and on every three days the paroxysms correspond. A *redoub'ling* or *repeat'ing quartan*, (F.) *Fièvre quarte doublée*, is one in which there are two paroxysms every fourth day. See Intermittent.

QUARTANUS REMITTENS, Tetartophia.

QUARTA'RIUS. An ancient measure, equal to one-fourth of the sextarius. See Weights and Measures.

QUARTE, Quartan.

QUARTERON, see Mulatto — q. Black, see Mulatto.

QUARTIO, Astragalus.

QUARTI-STERNAL, *Quadristerna'lis*. The fourth osseous portion of the sternum, corresponding to the fourth intercostal space. — Béclard.

QUASSATIO, Conquassation.

QUASSATURA, Conquassation.

QUAS'SIA, *Q. oma'ra* seu *excel'sa, Picræ'na excel'sa, Febrif'ugum lignum, Quassy, Lofty Bitterwood Tree, Bitter-ash*, (F.) *Quassie, Bois amer. Ord.* Simarubaceæ. A West India tree, from which is obtained the *Lignum Quassiæ, Quassia* (Ph. U. S.) It is an intensely durable bitter, without astringency; and has been employed as a tonic and stomachic. It is generally given in the form of infusion. The bitter principle is called *Quassin*.

QUASSIA SIMAROU'BA, *Simarouba, Simaru'ba, S. officina'lis, Euon'ymus, Bitter Simaruba, Mountain Damson*. The bark of the root, *Simaru'ba*, (Ph. U. S.), is bitter, and not unpleasant. Both water and alcohol extract its virtues. It is not astringent. It is exhibited wherever a simple tonic is required.

QUASSIN, see Quassia.

QUATERNIO, Astragalus.

QUATRE ÉPICES, see Myrtus pimenta.

QUATRIO, Astragalus.

QUEASINESS, Nausea.

QUEEN OF THE MEADOW, Spiræa lobata — q. of the Prairie, Spiræa ulmaria.

QUEEN'S DELIGHT, Stillingia — q. Root, Stillingia.

QUELLES, Elixir.

QUENOUILLE D'EAU, Typha latifolia.

QUERCERA, Epialos.

QUERCINI HERBA, Lichen plicatus.

QUERCULA MINOR, Teucrium chamædrys.

QUERCUS ALBA, *White Oak;* QUERCUS ROBUR, *Common Oak;* Q. TINCTO'RIA, *Black Oak;* Q. RUBRA MONTA'NA, *Red Oak* or *Spanish Oak. Ord.* Cupuliferæ. *Sex. Syst.* Monœcia Polyandria; (F.) *Chêne*. The bark of all these varieties is, probably, alike in medicinal properties. It is powerfully astringent and tonic, and has been used internally in intermittents, and externally in decoction, as an astringent wash, where such is indicated.

*Acorus, Ceces, Nuces Querc*ûs, (F.) *Glands*, were at one time much used as food; and a decoction of them was once recommended in dysentery and diarrhœa, in glandular obstructions, &c. A pessary made of them has been advised in immoderate flow of the menses. They are not now used.

QUERCUS INFECTO'RIA. A tree of Asia Minor, which affords *Turkey* or *Nut Galls, Gallæ Turcicæ* seu *Querci'næ* seu *Tincto'riæ, Nux Gallæ, Galla max'ima orbicula'ta, Cicis, Cassenoles, Gallæ, Galls, Gall-nut*, (F.) *Noix de Galle, Galle de chêne*. The *nut-gall* — *Galla* (Ph. U. S.) — is a morbid protuberance or tubercle, produced by the puncture of the *Diplo'lepis* seu *Cynips Gallæ Tincto'riæ, Cynips Quercûs folii*. It is powerfully astringent and tonic, and has been employed in diarrhœa, intestinal hemorrhage, and intermittents: but is chiefly used, externally, in gargles and injections. The powder, made into an ointment with lard, is used in piles. The ordinary nutgalls of the shops are procured from the Levant. The large *Mecca* or *Bussorah galls*, at times called *Dead Sea apples, Mad apples* and *apples of Sodom*, are produced on Quercus infectoria.

There are upwards of thirty species of oak in the United States, all of which are probably more or less astringent and tonic.

QUERCUS COCCIFERA, see Kermes — q. Marina, Fucus vesiculosus — q. Suber, see Suber.

QUERQUERA, Epialos.

QUEUE DE CHEVAL, Hippuris vulgaris Cauda equina, see Medulla spinalis — *q. de la Moëlle épinière*, Cauda equina — *q. de Pourceau*, Peucedanum — *q. de Rat*, Sium lunare.

QUICK-IN-THE-HAND, Impatiens.

QUICKEN TREE, Sorbus acuparia.

QUICK'ENING, from Sax. cpiccan, 'to make alive.' The period of gestation when the motion of the fœtus first becomes perceptible. This usually occurs about the eighteenth week, and was at one time erroneously believed to mark the time at which the fœtus becomes alive—*Anima'tio fœtûs*. It need scarcely be said, that it possesses the principle of life from the moment of the union of the materials furnished by the sexes as a fecundating copulation. When the motion is felt, the female is said to be 'quick with child.'

QUICKENS, Triticum repens.

QUICKLIME, Calx viva.

QUICKSILVER, Hydrargyrum.

QUIES, Acinesia.

QUINA, Quinine — *q. de Campo*, Strychnos pseudo-china — q. Quina, Cinchona.

QUINÆ ACETAS, SULPHAS, &c., see Quiniæ Acetas, &c.

QUINCE, Scrofula, see Pyrus cydonia — q. Tree, Pyrus cydonia.

QUINIA, Quinine — q. Acetate of, Quiniæ acetas — q. Amorphous, see Quinia, extract of, and Chinioidine — q. Arseniate of, Quiniæ arsenias — q. and Cinchonia, tannate of, Quiniæ et Cinchoniæ tannas — q. Arsenite of, Quiniæ arsenis — q. Citrate of, Quiniæ citras.

QUINIA, EXTRACT OF, *Qui'niæ sulphas impu'rus*. A preparation which consists in evaporating the liquor poured off the crystals of sulphate of quinia, to the consistence of a pilular mass.

It has the properties of sulphate of quinia, and its active principle appears to be amorphous quinia or chinioidine. Twenty-four grains will generally arrest ague.

QUINIA, FERROCYANATE, OF, Quiniæ ferrocyanas — q. Hydriodate of, Quiniæ hydriodas — q. Impure sulphate of, Quinia, extract of — q. Iodhydrate of, Quiniæ hydriodas — q. Iodide of, Quiniæ hydriodas — q. Iodide of iodhydrate of, see Quiniæ hydriodas — q. Ioduret of, Quiniæ hydriodas — q. and Iron, Hydriodate of, see Quinia, Iodide of Iodhydrate of — q. Lactate of, Quiniæ lactas — q. and Mercury, protochloride of, Hydrargyri et Quiniæ Protochloridum — q. Muriate of, Quiniæ murias — q. Nitrate of, Quiniæ nitras — q. Phosphate of, Quiniæ phosphas — q. Sulphate of, Quinine, sulphate of.

QUI'NIÆ ACE'TAS, *Chi'nium ace'ticum, Ace'tas Chi'nii* seu *Chini'ni* seu *Chi'nicus* seu *Qui'niæ* seu *Quinæ* seu *Quini'ni* seu *Kini'ni, Quina ace'tica, Acetate of Qui'nia* or of *Quinine*. Prepared by saturating *Quinia* with diluted *acetic acid*. Has the properties of the other salts of Quinia.

QUINIÆ ARSEN'IAS, *Quini'næ* seu *Qui'næ Arsen'ias, Chini'num Arsenico'sum* seu *Arsenic'icum, Arseniate of Quinia* or *of Quina* or *of Quinine*, (F.) *Arséniate de quinine*. Formed by the union of *arsenic acid* and *quinia*. Employed as an antiperiodic in the dose of from three quarters of a grain to a grain and a half in the twenty-four hours.

QUINIÆ AR'SENIS, *Q. Diar'senis, Ar'senite of Qui'nia*. A salt resulting from the double decomposition of *arseniate of potassa* and *sulphate of quinia*. It has been used in chronic cutaneous diseases; and as an antiperiodic in ague, neuralgia, &c. Dose, one-third of a grain, three times a day.

QUINIÆ CITRAS, *Quinæ* seu *Chini'ni citras, Citras chi'nicus* seu *qui'nicus, Chi'nium* seu *Chini'num Ci'tricum, Citrate of Quinia* or *Quina* or of *Quinine*. Formed from the union of *citric acid* and *quinia*. It has the same properties as the sulphate.

QUINIÆ ET CINCHO'NIÆ TANNAS, *Chini'num* seu *Chi'nium tan'nicum, Tannate of Quinia* and *Cincho'nia*. This salt has the same properties as the salts of quinia in general.

QUINIÆ DIARSENIS, Quiniæ Arsenis.

QUINIÆ FERROCY'ANAS, *Chi'nium ferrocyanogena'tum* seu *ferrohydrocyan'icum, Ferrocy'anate* or *hydrocyanoferrate of Quinia* or of *Quinine*. This salt is obtained by the decomposition of *sulphate of quinia* by means of a solution of *ferrocyanuret of potassium*. It has all the properties of sulphate of quinia, and, according to some, in a superior degree.

QUINIÆ HYDRI'ODAS, *Chini'num hydriod'icum, Hydriodate* or *Iodhydrate of Quinia;* called, also, *Iodure'tum* seu *Iod'idum Qui'niæ, Iod'uret* or *Iodide of Qui'nia*, (F.) *Hydriodate* ou *Iodhydrate* ou *Iodure de Quinine*. This is formed by precipitating *sulphate of quinia* by means of *iodide of potassium*. Given in scrofulous affections; half a grain to a grain, three times a day, to a child.

An *iodide* and a *biniodide* have been formed; the latter made by mixing double the quantity of the iodide of potassium with the sulphate of quinia.

AN IODIDE OF IODHY'DRATE OF QUI'NIA, (F.) *Iodure d'Iodhydrate de Quinine*, is prepared by pouring into an acid solution of *quinia* a solution of *iodide of iron*, containing a slight excess of iodine. The precipitate is treated with boiling alcohol: the liquor filtered, and crystals suffered to form. The salt possesses all the properties of the other salts of quinia. Under the name, *Hydriodate of iron and Quinia*, a preparation has been introduced by Mr. Battley. It is possessed of tonic and antiperiodic virtues.

QUINIÆ IODIDUM, Quiniæ hydriodas — q. Iodure tum, Quiniæ hydriodas.

QUINIÆ LACTAS, *Quinæ lactas, Chini'num lac'ticum, Lactate of Qui'nia* or of *Quinine*, (F.) *Lactate de quinine*. Made by the action of *lactic acid* on *quinia*. Used in the same cases as the other salts of quinia.

QUI'NIÆ MU'RIAS, *Chi'nium muriat'icum* seu *sali'tum* seu *hydrochlo'ricum, Mu'rias chi'nicus, Muriate of Quinia* or of *Quinine*. May be prepared by dissolving *quinia* in dilute *muriatic acid*. Given as an antiperiodic. Dose, half a grain to a grain.

QUINIÆ NITRAS, *Chi'nium* seu *Chini'num ni'tricum, Nitrate of Quinia* or of *Quinine*, (F.) *Nitrate* ou *Azotate de quinine*. May be formed by the addition of *nitric acid* to *quinia*. Its properties are those of the sulphate of quinia.

QUINIÆ PHOSPHAS, *Chi'nium* seu *Chini'num phosphor'icum, Phosphate of Quinia* or of *Quinine;* may be prepared by the addition of dilute *phosphoric acid* to *quinia*. It is thought by many to be next to the sulphate of quinia in its remedial powers.

QUINIÆ SULPHAS, Quinine, sulphate of.

QUINIÆ VALERIA'NAS, *Chini'num* seu *Chi'nium Valerian'icum, Valerianate of Quinia*, of *Quina*, or of *Quinine;* may be formed by the union of *valerianic acid* with *quinia*. It has the properties of the salts of quinia.

QUI'NICINE, *Quinici'na, Quinic''ia*. When a salt of quinia is exposed to heat with certain precautions, the alkaloid is changed into another isomeric with it, to which this name has been given.

Quinicine, and its sulphate, possess the same medical properties as quinia and its salts. Dose, gr. v to gr. xv.

QUINID'IA, *Quinidi'na, Qui'nidine, Chi'nidine, Cin'chotin*. An alkaloid of the cinchonas —of many of the genuine at least—obtained from them by the same process as that by which quinia is obtained from the barks that yield it. Its sulphate is more soluble however than the sulphate of quinia, and it is left, therefore, in the mother waters.

The salts of quinidia are markedly antiperiodic. From gr. x to gr. xxx will usually arrest a paroxysm.

QUININE, *Qui'nia, Quina, Kini'num, Ki'nium, Sal essentia'lē cor'ticis Peruvia'ni, Chini'num, Quinina*. An alkaline, uncrystallizable substance; under the form of a porous, whitish mass; almost insoluble in water, soluble in alcohol and ether. It forms, with acids, salts that are in general soluble. It is obtained from different cinchonas, but chiefly from the yellow, and is the active principle of those valuable drugs.

QUININE, ACETATE OF, Quiniæ acetas — q. Arseniate of, Quiniæ arsenias—q. Arsenite of, Quiniæ arsenis — q. Azotate of, Quiniæ nitras — q. Citrate of, Quiniæ citras — q. Ferrocyanate of, Quiniæ ferrocyanas — *q. Hydriodate de*, Quiniæ hydriodas — *q. Iodhydrate de*, Quiniæ hydriodas — q. Iodide of, Quiniæ hydriodas — *q. Iodure de*, Quiniæ hydriodas — *q. Iodure d'iodhydrate de*, Quinia, iodide of iodhydrate of — q. Lactate of, Quiniæ lactas—q. Muriate of, Quiniæ murias—q. Nitrate of, Quiniæ nitras—q. Phosphate of, Quiniæ phosphas.

QUININE, QUINA OF QUINIA, SULPHATE OF, *Quiniæ* seu *Qui'næ* seu *Quini'næ Sulphas, Quinæ Disul'phas, Chi'nium* seu *Chini'num Sulphu'ricum*, (F.) *Sulfate de Quinine* — the salt usually employed in medicine — occurs in needles of a pearly and satiny appearance. It is employed with great success in the treatment of intermittents; and is available in many cases, where the bark in substance could not be retained, or would be injurious. Dose, as a tonic from 3 to 10 grains in the 24 hours. As an antiperiodic it may be carried much farther. Its action, in a large dose, is decidedly sedative. It is obtained, by treating the yellow bark with sulphuric acid. The following form is adopted in the Pharmacopœia of the United States,—*Cinchon. flav.* in pulv. *crass.* ℔iv; *Acid. muriat.* f℥iij; *Calcis.* in pulv. ℥v; *Aquæ*, cong. v; *Acid. Sulphur., Alcohol; Carbon. animal*, ää q. s. Boil the bark in one-third of the water mixed with one-third of the muriatic acid, and strain through linen. Boil the residue twice successively with the same quantity of acid and water as before, and strain. Mix the decoctions, and, while the liquor is hot, gradually add the lime, previously mixed with two pints of

water, stirring constantly, until the quinia is completely precipitated. Wash the precipitate with distilled water, and having pressed and dried it, digest it in boiling alcohol. Pour off the liquor and repeat the digestion several times, until the alcohol is no longer rendered bitter. Mix the liquors, and distil off the alcohol, until a brown viscid mass remains. Upon this substance, removed from the vessel, pour about half a gallon of distilled water, and having heated the mixture to the boiling point, add as much sulphuric acid as may be necessary to dissolve the impure alkali. Then add an ounce and a half of animal charcoal; boil for two minutes; filter the liquor while hot, and set it aside to crystallize. Should the liquor, before filtration, be entirely neutral, acidulate it very slightly with sulphuric acid. Should it, on the contrary, change the colour of litmus paper to a bright red, add more animal charcoal. Separate the crystals from the liquor, dissolve them in boiling water slightly acidulated with sulphuric acid, add a little animal charcoal, filter and set aside to crystallize. Wrap the crystals in bibulous paper, and dry with a gentle heat. The mother-waters may be made to yield an additional quantity of sulphate of quinia by precipitating the quinia with solution of ammonia, and treating the precipitated alkali with water, sulphuric acid, and animal charcoal, as before.

QUININE, TANNATE OF, Quiniæ et cinchoniæ tannas — q. Valerianate of, Quiniæ valerianas.

QUI'NINISM, *Quininis'mus, Quinism, Cinchonism*, (F.) *Inebriation* ou *Ivresse quinique*. The aggregate of encephalic or neuropathic phenomena induced by over-doses of quinia.

QUINOIDINE, Chinioidine.

QUINQUEFOLIUM, Potentilla reptans — Quinquefolium majus, Potentilla reptans.

QUINQUINA, Cinchona—*q. Aromatique*, Croton cascarilla — q. Bicolor, Cinchonæ Caribææ cortex — *q. Faux de Virginie*, Cusparia febrifuga —*q. Gris de Loxa*, Cinchonæ lancifoliæ cortex—*q. Jaune*, Cinchonæ cordifoliæ cortex—*q. Orange*, Cinchonæ lancifoliæ cortex—*q. Piton*, Cinchonæ Caribææ cortex—*q. Rouge*, Cinchonæ oblongifoliæ cortex.

QUINQUINO, Myroxylon peruiferum.

QUINSY, Cynanche, C. tonsillaris—q. Nervous, Angone—q. Wolf, Lycanche.

QUINTAN, *Febris quinta'na* seu *pempta'a* seu *quinta*; from *quintus*, 'a fifth.' A fever whose paroxysms return only every five days inclusively; and between which there are, consequently, three days of apyrexia.

QUINTE, (F.) This word is used synonymously with *paroxysm* or *fit*, when speaking of cough,—as *une Quinte de Toux*—'a fit of coughing,' (Sc.) *Kink*. Also, the influenza.

QUINTEFEUILLE, Potentilla reptans.

QUINTERON, see Mulatto — q. black, see Mulatto.

QUINTES, see *Quinte*, and Pertussis.

QUINTES'SENCE, *Quinta Essen'tia*. A name formerly given to alcohol, impregnated with the principles of some drug. It was, consequently, often synonymous with *Alcohol'ic tincture*. The most volatile principles of bodies were, also, called *Quintes'sences*.

QUINTISTERN'AL. The fifth osseous portion of the sternum. It corresponds to the 5th and 6th intercostal spaces.

QUINUA, Chenopodium quinoa.

QUOTID'IAN, *Quotidia'nus, Ephe'merus*, (F.) *Quotidien* — itself from *quotidie*, 'daily.' That which takes place every day.

QUOTID'IAN FEVER, *Q. ague, Febris quotidia'na* seu *hemere'sia* seu *heme'rina* seu *ephe'mera* seu *metheme'rina* seu *metheme'ria, An'etus quotidia'nus, Cathe'merus, Cathemer'inus, Methemer'inos, Amphemer'inos, Amphimer'inus, Amphe'merus, Quotidia'nus*, (F.) *Fièvre quotidienne*, is an intermittent, the paroxysms of which recur every day.

A *simple, double*, or *triple quotidian*, is a quotidian, which has one, two, or three paroxysms in the 24 hours.

R.

R or ℞ is placed at the commencement of a prescription, as a contraction of *Rec"ipē*. (See Abbreviation.) Originally, it was the sign ♃ of Jupiter, and was placed at the top of a formula, to propitiate the king of the gods, that the compound might act favorably.

RABDOIDES, (SUTURA,) Sagittal suture.

RABID, *Rab'idus*, (F.) *Rabique, Rabiéique*, from *rabies*, (*rabo*, 'I am mad or furious,') 'canine madness.' That which belongs to hydrophobia: as *rabid virus*, &c. Rabid also means affected with hydrophobia, (F.) *Enragé*.

RABIÉIQUE, Rabid.

RABIES CANINA, Hydrophobia.

RABIQUE, Rabid.

RACAHOUT, *Am'ylum quer'neum*. A name given by the Arabs to the starch prepared from an edible acorn obtained from *Quercus Ilex*, but, according to Plagge, the so called *Racahout* of the Arabs, sold in Paris, is a compound of potatoe starch, chocolate, and aromatics, — as vanilla.

RACCOON BERRY, Podophyllum montanum.

RACE, from *radice*, abl. of *radix*, 'root,' breed. The union or aggregate of individuals whose conformation or particular condition differs perceptibly from those of neighbouring varieties. In the human species, several races are designated. See Homo.

RACÉMEUX, Racemosus.

RACEMO'SUS, *Rac"emous, Rac"emose*, (F.) *Racémeux*. In clusters, like grapes.

RAC"EMUS. A cluster — as of grapes.

RACHAMEL'CA, from Hebr. רחם (*rechem*), 'the womb,' and מלך (*molech*), 'a king:' *Rechamal'ca*. A peculiar formative principle, supposed, by Dolæus, to exist in the uterus.

RACHE, Porrigo.

RACHIÆI, Rhachitæ.

RACHIALGIA, Colic, metallic, Rhachiodynia. Vertebral disease—r. Mesenterica, Tabes mesenterica—r. Pictoniensium, Colic, metallic—r. Pictonum, Colic, metallic.

RACHIALGIE MÉSENTÉRIQUE, Tabes mesenterica.

RACHIALGITIS, Rhachialgitis.

RACHIDIAN, Spinal.—r. Arteries, Spinal arteries—r. Bulb, see Medulla oblongata—r. Canal, Vertebral canal.

RACHIDIEN, Spinal.

RACHIOPHYMA, Rachiphyma.

RACHIPHY'MA, *Rhachiphy'ma*, *Rachiophyma*, *Tumor Dorsi*, from 'ραχις, 'the spine,' and φυμα, 'a tumour.' A tumour on the spine or on the back.

RACHIS, Vertebral column.

RACHIS'AGRA, *Rhachis'agra*, *Rhach'iagra*, *Rhach'eagra*, *Rhachid'agra*, *Rhachi'tis spina'lis*, from 'ραχις, 'the spine,' and αγρα, 'a seizure.' A gouty or rheumatic affection of the spine.

RACHITÆ, Rhachitæ.

RACHIT'IC, *Rachit'icus*, *Rhachit'icus*, (F.) *Rachitique*. Same etymon as the next. Relating or appertaining to, or affected with rickets. Weak, feeble in the joints; defective in development.

RACHI'TIS, *Rhachi'tis*, from 'ραχις, 'the spine,' and *itis*, a suffix denoting inflammation. Inflammation of the spine. Also, *Cyrto'sis Ra'chia*, *Cyrton'osus*, *Morbus Ang'licus*, *Osteomala'cia Infan'tum*, *Tabes pector'ea*; *Innutritio ossium*, *Spina nodo'sa*, *Rachitis'mus*, *English disease*, *Rickets*; from 'ραχις, 'the spine,' (F.) *Rachitisme*, *Nouure*. A disease characterized by crookedness of the long bones; swelling of their extremities; crooked spine; prominent abdomen; large head; and often precocity of intellect. It is accompanied by leanness, general debility, indigestion; and frequently induces atrophy and hectic. Rickets occurs, particularly, during the first years of existence, in weakly children, born of rickety or scrofulous parents; brought up in damp or confined situations; who are badly nourished, and do not take sufficient exercise. The progress and termination of the disease are very variable. Some children gradually recover their health: others become more and more deformed, and ultimately die of consumption, dropsy, or other organic disease. The treatment is almost wholly *hygienic*. Pure air; a healthy situation; nourishing diet; exercise; sea or common cold bathing, and tonics, afford the best prospect of success.

RACHITIS ADULTORUM, Mollities ossium.

RACHITISME, Rachitis.

RACHITOME, from ραχις, 'spine,' and τεμνειν, 'to cut.' An anatomical instrument for opening the medullæ spinalis without injuring the medulla.

RACHO'SIS, *Rhacho'sis*, *Rako'sis*, from 'ραχοω, or 'ρακοω, 'I wrinkle.' A relaxation of the scrotum. *Propto'ma* seu *lax'itas Scroti*, *Scrotum pen'dulum*. An excoriation of the relaxed scrotum.

RACINE À BECQUET, Geranium moschatum—*r. de Bengal*, Cassumuniar—*r. Brésilienne*, Ipecacuanha—*r. de Charcie*, Dorstenia contrayerva—*r. de Chine*, Smilax china—*r. de Dracke*, Dorstenia contrayerva—*r. des Philippines*, Dorstenia contrayerva—*r. de Safran*, Curcuma longa—*r. de Saint Esprit*, Angelica—*r. Salivaire*, Anthemis pyrethrum—*r. de Turbeth*, Convolvulus turpethum.

RACINES DU CERVELET, Corpora restiformia.

RACLURES DES BOYAUX, Ramenta intestinorum.

RACORNISSEMENT (F.), from *racornir*, (*cornu*, 'horn,') 'to make hard as horn.' *Cornification*. A physical property, possessed by animal substances, which consists in a kind of contractility, accompanied with sudden corrugation and curling. It is produced by heat, and by chemical agents, especially by the strong mineral acids.

RADCLIFFE'S ELIXIR, see Tinctura aloes composita.

RADESYGE, Radzyge.

RADEZYGE, Radzyge.

RADIAD, see Radial aspect.

RA'DIAL, *Radia'lis*, from *radius*, 'a bone of the forearm.' That which relates to the radius.

RADIAL ANTÉRIEUR, Palmaris magnus.

RADIAL ARTERY, *A. extern'a Cu'biti*. It arises from the brachial, at the upper and anterior part of the forearm; descends on the outer side as far as the lower part of the radius, and proceeds downwards and backwards towards the superior extremity of the space which separates the first two metacarpal bones. It then buries itself in the palm of the hand, where it forms the *profound* or *radial* palmar arch. The radial artery gives off the *recurrent radial*, several *radio-muscular* branches, the *transverse palmar radio-carpal artery*, the *external superficial artery of the palm of the hand*, the *external dorsal of the thumb*, the *dorsalis carpi*, *dorsal interosseous artery of the index*, &c.

RADIAL ASPECT. An aspect towards the side on which the radius is situated.—Barclay. *Radiad* is used by the same writer, adverbially, to signify 'towards the radial aspect.'

RADIAL EXTERNE PREMIER, see Radialis—*r. Externe second*, see Radialis—*r. Grand*, see Radialis.

RADIAL NERVE, *Radio-digital* (Ch.), *Spiral Nerve*, *Spiral muscular N.*, *Musculo-spiral nerve*, arises from the four inferior branches of the brachial plexus. It is, at first, situate behind the other nerves of the plexus. It then becomes engaged between the three portions of the triceps brachialis, passes behind the humerus, and descends between the supinator longus and brachialis internus, as far as opposite the upper extremity of the radius. In its course it gives numerous filaments to the triceps, supinator longus, extensor carpi radialis longior, and to the integuments. Opposite the upper extremity of the radius it divides into two branches;—the one *posterior*, which turns backwards into the substance of the supinator brevis, and when it has reached the space between the two layers of muscles on the posterior surface of the forearm, divides into a great number of filaments, which are distributed to those muscles, and to the integuments of the hand. The other branch is *anterior*: it descends before the supinator brevis and the radius; until, near the inferior third of that bone, it engages itself between the tendons of the supinator longus and extensor carpi radialis longior; and, becoming afterwards subcutaneous, divides into two branches, whose filaments are distributed to the integuments of the thumb, index, middle finger, to the outside of the ring finger, and to the first interosseous muscle of the back of the hand.

RADIAL PETIT, see Radialis.

RADIAL VEINS, DEEP-SEATED, follow the same course as the radial artery.

RADIA'LIS EXTER'NUS BRE'VIOR, *Exten'sor Carpi Radialis Bre'vior*, *Radialis secundus*, (F.) *Second radial externe*, *Petit radial*, *Épicondylo-sus-métacarpien*, (Ch.) An extensor muscle of the wrist, situate beneath the extensor carpi radialis longior. It is attached, above, to the external tuberosity of the humerus, and terminates below, by a long tendon, inserted into the posterior part of the upper extremity of the third bone of the metacarpus. It has the same uses as the next muscle.

RADIA'LIS EXTER'NUS LON'GIOR, *Extensor Carpi Radia'lis Lon'gior*, *Radialis externus primus*, (F.) *Premier radial externe*, *Grand radial*, *Huméro sus-métacarpien*, (Ch.) It is seated at the outer part of the forearm; is thin, but thicker on the outside than on the inside. It is attached, above, to the inferior part of the outer edge, and

to the corresponding tuberosity, of the humerus; and terminates, below, by a long tendon, which is attached to the superior extremity of the second bone of the metacarpus. It extends the hand on the forearm.

Radialis Externus Primus, R. Externus longior — r. Extensor longior, R. Externus longior—r. Internus, Palmaris magnus—r. Secundus, R. Externus longior.

RAD'IATED, *Radia'tus*, from *radius*, 'a ray;' (F.) *Rayonné*. That which is arranged in rays; in lines, diverging from a common centre. An epithet given to several ligaments, &c.; as to those which unite the ribs to the sternum; those which unite the tibia and fibula at their inferior extremity, &c.

Radiated Substance of the Kidney, see Kidney.

RAD'ICAL, *Radica'lis*, from *radix*, *radicis*, 'a root.' A *radical cure*, *cura radica'lis*, is one in which the disease is destroyed, as it were, from the root. It is used in opposition to *palliative cure*.

Radical Moisture, Humidum radicale.

Radical Vessels, *Vas'cular Rad'icles*, (F.) *Radicules vasculaires*, are the small vessels that take their origin in the tissues, and by their union form larger vessels.

RADICES OSSIS HYOIDEI, Cornua ossis hyoidei.

RADICIS'ECA, from *radix*, *radicis*, 'a root,' and *secare*, 'to cut.' One employed in collecting and preparing plants was formerly so called.

RADICULA, Raphanus hortensis.

RADICULES VASCULAIRES, Radical vessels.

Radii Ciliares, Ciliary processes.

Radii Frontis. The folds or wrinkles of the forehead.

RA'DIO, from *radius*. In composition, relating or belonging to the radius, a bone of the forearm.

Radio-Carpal, *Radio-carpia'nus*. That which relates to the radius and carpus.

Radio-Carpal Articulation is the *wrist joint*, or articulation of the os scaphoides, os semilunare, and os cuneiforme of the carpus with the inferior surface of the radius, and the fibro-cartilage, situate below the ulna. It is strengthened by lateral, anterior, and posterior ligaments.

Radio-Carpal Transverse Palmar Artery, (F.) *Artère Radio-carpienne-transversale-palmaire*. A transverse branch, given off by the radial artery, opposite the lower edge of the pronator quadratus, which sends several branches to the anterior or palmar surface of the carpus.

RADIO CUTANÉ (NERF), see Cutaneous—r. *Phalangettien du pouce*, Flexor longus pollicis manus.

RADIOLUS, Sound.

RADIO-MUS'CULAR, *Radio-muscula'ris*. A name given to the branches sent off from the radial artery to the muscles of the forearm in the first part of its course; as well as to the nervous filaments which the radial nerve sends to the same muscles.

RADIS, Raphanus hortensis — r. *de Cheval*, Cochlearia armoracia.

RADISH, Raphanus hortensis—r. Water, Nasturtium amphibium.

RADIUS, 'a spoke:'—so called from its shape. *Cercis*, *Foe'ile minus* seu *superius*, *Canna minor*, *Os ad cubita'lē*, *Additamen'tum ulnæ*, *Manu'brium manûs*, *Parape'chyon*, *Arun'do bra'chii minor*, (F.) *Os du Rayon*. A long, prismatic bone, the upper and lesser extremity of which is called the *head*. This is supported by a *cervix* or *neck*. At the part where the neck is confounded with the *body* of the bone is the *tubercle* or *bicipital tuberosity* or eminence for the insertion of the biceps. The radius is articulated, above, with the os humeri and with the lesser sigmoid cavity of the ulna: below, with the scaphoides, semilunare, and the head of the ulna. Its inferior extremity, which is larger than the superior, is flattened before and behind: is irregularly quadrilateral; and has, below, a double facette to be articulated with the first two bones of the carpus. On the outer side is the styloid process; and, on the inner, a concave facette, which joins the ulna. Behind, are grooves for the passage of the extensor tendons. The radius is developed from three points of ossification; one for the body, and one for each extremity.

RADIUS, COL DU, Collum radii.

RA'DIX, genitive, *radicis*, *Rhiza*. A root: also, the male organ.

Radix, *Root* or *fang* of a tooth, is the part contained in the alveolus. The *radix* or *root* of the nail is the portion hidden under the skin, &c. Surgeons give the name to prolongations, sent by scirrhous, cancerous, or other tumours into the neighbouring parts.

Five Aperient Roots, *Quinque radi'ces aperien'tes*, were, of old, asparagus, butchers' broom, fennel, parsley, and smallage.

Five Lesser Aperient Roots, *Quinque radi'ces aperien'tes mino'res*, were caper, dandelion, eryngo, madder, and rest-harrow.

Radix Asclepiadis Crispa, see Gomphocarpus crispus — r. Braziliensis, Ipecacuanha.

Radix Cordis, *Basis Cordis*. The base of the heart.

Radix Ginseng, see Panax quinquefolium — r. Indica Lopeziana, Lopez radix — r. Linguæ, see Tongue — r. Lopeziana, Lopez radix — r. Ninsi, Panax schinseng, Sium ninsi—r. Rubra, Rubia—r. Serpentum, see Ophiorrhiza mungos — r. Unguis, Nail, root of — r. Ventris, Umbilicus.

RADULA, Raspatorium.

RADZYGE, *Radzygin*, *Radesyge*, *Radezyge*, *Thæ'ria*, (properly *Therîa*, from θηρίον, (τλιος,) 'a malignant ulcer.') *Lepra borea'lis* seu *Norveg''ica*, *Norwe'gian Lep'rosy*. A name given, in Norway, to a disease, bearing considerable analogy to the yaws. Some have esteemed it a species of lepra or elephantiasis.

Another form — the *Spedalske*, or *Spedalskhed* — of Norway, appears to be a variety of tubercular lepra. Under the epithelial scales, numerous acari have been found; and the affection has been called *Sca'bies crusto'sa*, and *Sca'bies Norveg''ica Boeck'ii*, after Boeck, who well described a case of it.

RAFFLE'SIA ARNOLD'I. A plant of Java. *Order*, Rafflesiaceæ, a decoction of which is employed there as an astringent in relaxed conditions of the genito-urinary apparatus.

RAFRAÎCHISSANT, Refrigerant.

RAGE, *Ira*, *Furor brevis*, *Orgē*, *Thymos*, (F.) *Colère*, *Rage*. Violent passion, characterized by contraction of the muscles of the face, violence in every movement, extreme irritation of the nervous system, acceleration of the blood's motion, and, generally, redness and swelling of the face.

Rage, Rhage.

RAGE, Hydrophobia, Rage.

RAGE DE TÊTE. An epidemic and fatal malady, which prevailed in France in 1481. It was presumed to be epidemic meningitis.

RAGWEED, Ambrosia elatior — r. Golden, Senecio aurens — r. Great, Ambrosia trifida.

RAGWORT, Senecio Jacobæa.

RAIA BATIS, and R. CLAVATA, see Oleum jecoris aselli.

RAIDEUR, Rigidity — r. *Cadavérique*, Rigor mortis.

RAIFORT, Raphanus hortensis — *r. Sauvage*, Cochlearia armoracia.

RAINBOW WORM, Herpes iris.

RAINURE, Groove — *r. Digastrique*, Mastoid groove.

RAISIN, see Vitis vinifera — *r. d'Amérique*, Phytolacca decandra — *r. de Bois*, Vaccinium myrtillus — *r. d'Ours*, Arbutus uva ursi — *r. de Renard*, Paris.

RAISING. Expectoration.

RAISINIÈRE (F.), from *raisin*, 'a grape.' A name given to a small granular, brownish or blackish tumour, which forms occasionally at the surface of the cornea, in consequence of ulcers or accidental wounds of that membrane. — Nysten.

RAISINS, Uvæ passæ, see Vitus vinifera — *r. de Corinthe*, see Vitus Corinthiaca.

RAISON, Reason.

RAKASIRA. An American balsam; of a brownish or brownish-red colour; semi-transparent; brittle; softening and becoming tenacious by heat; inodorous when cold, but exhaling a very agreeable smell when heated; and possessing a balsamic and slightly bitter taste. The precise vegetable that furnishes it is not known. It has been used chiefly as a balsam in gonorrhœa and urinary affections.

RAKE-TEETH. A term, used in the North of England for teeth which are wide apart, and similar to those of a rake.

RAKIA, see Spirit.

RAKOSIS, Rachosis.

RÂLE (F.), *Rattle, Rhonchus, Rhenchus, Rhenxis*, from (D.) Ratel; *Rhoncus, Cerchnus, Rhogmos:* (probably an example of onomatopœia.) Noise produced by the air in passing through mucus, of which the lungs are unable to free themselves. This condition is chiefly observed at the approach of death, and is commonly called, "*the rattles.*"

The term *Râle* has been given to different sounds during respiration, caused by the air in connection with fluid contained in the bronchi, or areolæ of the pulmonary tissue; which are perceived by the stethoscope.

RÂLE BRONCHIQUE SEC, Râle sonore — r. Bronchique humide, R. muqueux — r. Caverneux, Gurgling — *r. Cavernulenx*, see Gurgling — *r. Crépitant, Rhonchus crep'itans*, see Crepitant — *r. c. Redux*, see Crepitant.

RÂLE MUQUEUX, R. bronchique humide, Rhon'cus muco'sus, Hygrobronchiorrhon'chus, Mucous Rattle. The sound produced by the passage of air through mucus accumulated in the larger bronchi or trachea, or through softened tubercular matter. This *râle* occurs in catarrh, and in softened tubercle. When carried to a very high degree, it constitutes *gurgling*, (F.) *Gargouillement*. The *subcrep'itant rhonchus*, (F.) *Râle sous-crépitant*, is produced by the bubbling of air through liquid of variable consistence in the minute bronchial tubes. When heard at the base of both lungs, it is a sign of capillary bronchitis. When heard at one base only, it is generally connected with tuberculosis higher up.

RÂLE SIBILANT, Rhon'chus sib'ilus seu *sib'ilans, Sib'ilant Rattle.* A slight, though prolonged, whistling sound, occurring either at the commencement of inspiration, or of expiration, owing to the presence of mucus, thin and viscid, but not abundant, which obstructs, more or less completely, the smaller bronchial ramifications. It is seated in the small tubes, and occurs in the first stage of bronchitis. The *clicking* and *whistling* varieties differ, in the former being short, the latter prolonged. The former is a quick, sharp sibilus or whistle, which ceases almost instantaneously; the latter a prolonged sibilus, of less sharpness, lasting almost the whole time of the movement which it accompanies. To these may be added the *hissing* varicty, the name sufficiently indicating its character.

RÂLE SONORE, R. bronchique sec ou *ronflant, Rhonchus sono'rus, Sono'rous Rattle.* A sound resembling at times the snoring—(F.) *Ronflement*—of a person asleep; at others the sound of the bass string of an instrument when rubbed with the finger, and not unfrequently the cooing —(F.) *Roucoulement*—of a dove. It seems to be caused by a contraction of the bronchial tubes, and is characteristic of chronic catarrh.

RÂLE SOUS-CRÉPITANT, see *Râle muqueux — r. Vésiculaire*, see Crepitation.

RAMEAU, Ramus.

RAMBERGE, Mercurialis.

RAMEN'TA INTESTINO'RUM, *Scrapings of the Intestines*, (F.) *Raclures des Boyaux.* The shreds or scrapings, as it were, of the mucous membrane of the bowels, often discharged in malignant dysentery. The evacuation in which these are contained has been termed *Diachore'ma xymato'des.*

RAMENTUM, Fragment, Scobs.

RAMEX, Hernia—r. Varicosus, Varicocele.

RAMIFICA'TION, *Ramifica'tio*, from *ramus*, 'a branch,' and *fio*, 'to become.' A division of arteries, veins, or nerves into branches. Also, a branch itself.

RAMILLE, Ramusculus.

RAMOLLISSEMENT, Mollities — *r. du Cerveax*, Mollities cerebri — *r. du Cœur*, Cardiomalacia — *r. de l'Estomac*, Gastromalacia — *r. du Foie*, Hepatomalacia — *r. Gris*, see Hepatization — *r. de la Moelle épinière*, Mollities medullæ spinalis — *r. Rouge*, see Hepatization — *r. de l'Intestin*, Entero-malacia — *r. des Os*, Mollities ossium.

RAMPANT (F.), from *ramper*, 'to climb.' *Repens, Reptans.* That which creeps or crawls. The French *Bandage rampant* has the folds arranged spirally around the part, leaving intervals between them. It is a retentive bandage, but is easily displaced, and, therefore, not employed.

RAMPES DU LIMAÇON, Scalæ of the cochlea.

RAMPHOS, Rostrum.

RAMULUS, Ramusculus.

RAMUNCULUS, Ramusculus.

RAMUS, *Clados*, a *branch*, (F.) *Rameau.* A division of an artery, vein, or nerve. Also, the male organ.

RAMUS DURIOR SEPTIMÆ CONJUGATIONIS, Facial nerve.

RAMUS'CULUS, *Ram'ulus, Ramun'culus, Sur'culus, Cladis'cos*, diminutive of *ramus*, 'a branch.' A division of a ramus. (F.) *Ramuscule, Ramille.*

RANA ESCULEN'TA, 'esculent frog,' (F.) *Grenouille.* This frog and the bull-frog, *Rana Tauri'na* — are eaten as delicacies. They are nutritious, and easily digested.

RANA, Ranula.

RANCE, Rancid.

RANCID, *Ran'cidus, Sapros*, (F.) *Rance*, from *rancere*, 'to be stale.' An epithet given to fatty bodies, which have become acrid from age or the contact of air. Mild ointments may thus become very irritating, and unfit for the purpozes for which they were originally intended.

RAN'DIA DUMETO'RUM, *R. Spino'sa, Can'thium Corona'tum, Garden'ia* seu *Posoque'ria Dumeto'rum* seu *Spino'sa.* A Coromandel shrub; *Ord.* Cinchonaceæ: the fruit of which, bruised and thrown on the water, intoxicates, or even

kills fish. In the form of powder, it is a powerful emetic.

RANDIA SPINOSA, R. dumetorum.

RANINE, *Rani'na*; from *Rana*, 'a frog.' The termination of the lingual artery is so called; that is, the portion of the artery which advances horizontally between the genio-glossus and lingualis muscles as far as the point of the tongue. The ranine vein follows the same course as the artery, and opens into the internal jugular or into the superior thyroid.

RANTREE, Sorbus aucuparia.

RAN'ULA, diminutive of *rana*, 'a frog,' so called from its resemblance; *Dysphag'ia Ranula, Emphrag'ma saliva'rē, Ba'trachos, Batra'chium, Hydroglos'sa, Hypoglossis, Hypoglossum, Hypoglot'tis, Hypoglos'sium, Rana, Frog Tongue*, (F.) *Grenouillette*. A small, soft, fluctuating, and semi-transparent tumour, which forms under the tongue, owing to the accumulation of saliva in Wharton's duct. In order to give exit to the accumulated fluid, and to establish a permanent opening for the discharge of the saliva, the cyst may be punctured, and the opening maintained by a minute cylinder, with a button at each extremity, as has been recommended by Dupuytren; or a portion of the cyst may be removed by the scissors, and the mouth be frequently washed by any astringent lotion. Sometimes, the salivary duct is found plugged by a small calculus.

RANULA LAPIDEA, see Calculi, salivary.

RANUN'CULUS, (F.) *Renoncule*, (Sc.) *Yellow gowan, Ord.* Ranunculaceæ; *Sex. Syst.* Polyandria Polygynia. Diminutive of *rana*, 'a frog,' because found in marshy places where frogs abound. A genus of plants, most of the species of which, when taken internally, act as acrid poisons. See Poison. They are, also, acrid and vesicant, when applied to the skin, and have accordingly been often used as counter-irritants. The following species answer to this description.

RANUNCULUS ABORTIVUS, *Small-flowered Crowfoot, Chicken-pepper.*

RANUNCULUS ACRIS, *R. pratensis* seu *Steven'ii* seu *ru'fulus* seu *sylvat'icus* seu *Sic'ulus, Upright Meadow* or *Tall Crowfoot, Butter Cups*, (Prov.) *Craisey, Guilty Cups, Yellow-weed, Blister-weed, Pilewort, Burwort, Meadow-bloom, Yellows*, (F.), *Bouton d'or.*

RANUNCULUS ALBUS, Anemone nemorosa.

RANUNCULUS AQUATICUS, R. sceleratus.

RANUNCULUS BULBO'SUS, *R. lætus, Ranunculus* (Ph. U. S.), *Bulbous* or *Bulbous-rooted Crowfoot, Butter Cups*, (F.) *Renoncule bulbeuse, Bassinet.*

RANUNCULUS DIGITATUS, R. sceleratus.

RANUNCULUS DECLINATUS, R. flammula.

RANUNCULUS FICA'RIA, *R. vernus* seu *præcox, Chelido'nium minus, Scrophula'ria minor, Ficaria ranunculoi'des* seu *verna* seu *commu'nis, Chelido'nia rotundifo'lia minor, Cureu'ma hæmorrhoida'lis herba, Ægole'thron, Lesser celandine, Pilewort*, (F.) *Petite Chélidoine, Petite Éclaire, Ficaire, Herbe aux hémorrhoïdes.* The leaves and root have been used medicinally;—the leaves as an antiscorbutic; the root as a cataplasm in piles.

RANUNCULUS FLAM'MULA, *R. declina'tus, Flammula, Surrec'ta alba, Smaller Water Crowfoot, Lesser Spearwort*, (F.) *Petite Douve.*

RANUNCULUS ILLYRICUS.

RANUNCULUS LINGUA.

RANUNCULUS LÆTUS, R. bulbosus — r. Nemorosus, Anemone nemorosa — r. Palustris, R. sceleratus — r. Pratensis, R. acris.

RANUNCULUS PENNSYLVANICUS, *Bristly Crowfoot.*

RANUNCULUS PRÆCOX, R. ficaria.

RANUNCULUS PUBES'CENS. Grows in ditches and marshes in South Africa. The expressed juice is used by the Cape Colonists in cancerous ulcers.

RANUNCULUS REPENS, Creeping Crowfoot—r. Rufulus, R. acris.

RANUNCULUS SCELERA'TUS, *R. Palus'tris* seu *umbella'tus* seu *digita'tus* seu *aquat'icus, Risus A'pium, Herba Sardo'nia, Herba Scelera'ta, Hecato'nia palus'tris, Marsh* or *Crushed* or *Celery-leaved Crowfoot.*

RANUNCULUS SICULUS, R. acris — r. Stevenii, R. acris — r. Umbellatus, R. sceleratus — r. Vernus, R. ficaria — r. Virginianus, Lobelia syphilitica.

RAPA NAPUS, Brassica rapa — r. Rotunda, Brassica rapa.

RAPE, Brassica napus, Stuprum.

RAPHANE'DON, from *'ραφανις*, 'a radish, like a radish.' *Rhaphanedon.* A transverse fracture of a long bone, leaving no splinters; — what has been called, in France, *Fracture en rave.*

RAPHA'NIA, *Convul'sio Raphania, Rhapha'nia, Morbus spasmod'icus malig'nus* seu *popula'ris* seu *Sile'siacus, Eclamp'sia typho'des, Synclonus Raphania.* Linnæus gives this name to a convulsive disease, not uncommon in Germany and Sweden, and which has been attributed to the seeds of the *Raph'anus Raphanis'trum* seu *sylves'tris, Raphanis'trum seg"etum* seu *arvensē, Rapistrum*, being mixed with the corn. The convulsions are seated in the limbs, and are attended with acute pain. See Convulsio cerealis.

RAPHANIA MAÏZTICA, Pellagra.

RAPHANIS, Raphanus hortensis — r. Magna, Cochlearia armoracia.

RHAPHANISTRUM ARVENSE, see Raphania.

RAPHANUS, R. hortensis.

RAPH'ANUS HORTEN'SIS, *Raphanus, R. sati'vus* seu *niger, Raph'anis, Rhaph'anus, Radic'ula, Rhaphys, Raphys, Rhaps, Rapys, Radish*, (F.) *Raifort, Radis. Ord.* Cruciferæ. *Sex. Syst.* Tetradynamia Siliquosa. The root of this plant is a common esculent. It has, also, been given as a diuretic in calculous affections. The juice, made into a syrup, is exhibited to relieve hoarseness. Radishes have long been celebrated as anti-scorbutics.

RAPHANUS MARINUS, Cochlearia armoracia — r. Raphanistrum, see Raphania — r. Rusticanus, Cochlearia armoracia — r. Sylvestris, see Raphania.

RAPHĒ, *Rhaphē, 'ραφη*, 'a suture.' A name given to prominent lines resembling a raised stitch. Such is the raphe or *tramis* which divides the scrotum into two parts, and which extends from the anterior part of the anus to the extremity of the penis. The name *Raphē* seu *Raphē supe'rior* seu *Linea Media'na* seu *Satu'ra corporis callo'si exter'na* seu *chorda longitudina'lis Lancis'ii* is, also, given to two prominent lines which are longitudinal and parallel, and are seen at the upper surface of the corpus callosum, extending from the anterior to the posterior extremity of that commissure.

RAPHEX, Chenopodium vulvaria.

RAPHIANKIS'TRON, from *'ραφιον*, 'a needle,' and *αγκιστρον*, 'a hook.' An instrument employed in the formation of artificial pupil.

RAPHION, Needle.

RAPHIS, Needle.

RAPHYS, Raphanus hortensis.

RAPISTRUM, see Raphania.

RAPONTIC, Rheum rhaponticum.

RAPPORT (F.), *Rela'tio, Renuncia'tio*, 'a report.' A deposition made by a physician or surgeon, to prove the condition of a person, the nature of a disease, the existence or non-existence of pregnancy, sudden or violent death, &c

Formerly, there were the *Rapports dénonciatifs*, made at the desire of the injured or their friends, and intended to point out to the judges the details of the crime or misdemeanor,—the *Rapports provisoires*, the object of which was to obtain *provisions* for the injured individual, both as regarded food and medicine, and to defray the expenses of prosecution;—and *Rapports mixtes*, or those which were both *dénonciatifs* and *provisoires*. At present, reports or depositions are generally divided into *judiciary*, or those which serve to throw light on the subject matter of any civil or criminal cause; and *administrative*, which afford information on subjects relating to any branch of the public administration, as on the nuisance, or otherwise, of certain establishments, the character of any epidemic, &c.

RAPPORT, Eructation, Regurgitation.

RAPTUS POST-TERGANEUS, Opisthotonos.

RAPUM MAJUS, Brassica rapa.

RAPUNTIUM SYPHILITICUM, Lobelia syphilitica.

RÂPURE, Rasura.

RAPYS, Raphanus hortensis.

RAQUETTE, Cactus opuntia.

RAREFA'CIENS, *Rarifa'ciens, Arœot'icus*, (F.) *Raréfiant*, from *rarus*, 'rare,' and *facere*, 'to make.' Medicines were so termed, which were supposed to be possessed of the power of giving more bulk or extension to the blood or other humours.

RARÉFIANT, Rarefaciens.

RARIFACIENS, Rarefaciens.

RA'RITAS, (F.) *Rareté*. Rarity; scantiness; fewness.

RARITAS DEN'TIUM. A large space between the teeth, which appear to be, and may be, too few.

RASCATIO, Excreation.

RASCETA, Carpus, Malleolus — r. Pedis, Tarsus.

RASCHA, Carpus, Malleolus.

RASETA, Carpus, Malleolus.

RASETTA, Carpus, Malleolus.

RASH, Exanthem — r. Fever, Scarlatina — r. Canker, see Cynanche maligna — r. Lichenous, Lichen — r. Mercurial, Eczema mercuriale — r. Mulberry, see Typhus — r. Nettle, Urticaria — r. Rose, Roseola—r. Summer, Lichen tropicus — r. Tooth, Strophulus—r. Wildfire, Ignis sylvaticus.

RASOIR, Razor.

RASO'RISM. The Italian medical doctrine of contro-stimulus, of which Rasori was the founder.

RASORIUM, Raspatorium.

RASPATO'RIUM, *Raso'rium, Rat'ula, Scalprum roso'rium, Xyster, Xyste'rium, Xystrum, Rod'ula, Runci'na, Runcin'ula, Scalprum*, (F.) *Rugine, Grattoir*. An instrument used for rasping bones, to detach the periosteum, — either in certain surgical operations, or for anatomical purposes.

RASPBERRY, Rubus idæus — r. Black, see Rubus strigosus—r. Ground, Hydrastis Canadensis — r. Wild, Rubus strigosus.

RASPING, Eructation.

RASPS, Rubus fruticosus.

RASSETA PEDIS, Tarsus.

RASTETA, Carpus, Malleolus.

RASU'RA, *Xysma, Xysmos*, (F.) *Râpure*, from *radere, rasum*, 'to scrape.' A rasure, or scratch, or erosion. Also, the rasping or shaving of any substance; as *Rasu'ræ Cornu Cervi, Hartshorn shavings*.

RASURA, Scobs.

RATAFI'A, (F.) *Alcoolé sucré, Saccharo-alcoolé*. A liquor prepared by imparting to ardent spirits the flavour of various kinds of fruits, adding sugar.

RATANHY, Krameria ratanhia—r. of the Antilles, Krameria ixina.

RATE, Spleen.

RATELEUX, Splenetieus.

RÂTELIER, see *Dentier*.

RATIO, *Rationa'litas*, from *reor, ratus*, 'to think.' A reason, a cause, an explanation, a mode or manner; as *Ratio symptom'atum*, an explanation of the symptoms,— *Ratio meden'di, Genus curatio'nis, Via curandi*; the reason, mode or manner of cure.

RATIO, Reason — r. Medendi, see Ratio — r. Symptomatum, see Ratio.

RAT''IONAL, *Rationa'lis*, (F.) *Rationnel*. Same etymon as *Ratio*. That which is conformable to reason. This epithet is often opposed to *empirical*; as *rational treatment*. The French, also, say *Signes rationales*, in opposition to *Signes sensibles*. See Organic.

RATIONALITAS, Ratio.

RATSBANE, Arsenious acid.

RATTLE, *Râle*.

RATTLES, THE, see *Râle*.

RATTLEBUSH, Sophora tinctoria.

RATTLESNAKE, Crotalus horridus—r. Leaf, Goodyera pubescens—r. Plantain, Goodyera pubescens—r. Root, Nabalus albus, Polygala senega, Trillium latifolium—r. Weed, Hieracium venosum.

RATTLESNAKE'S MASTER, Agave Virginica, Liatris scariosa, Nabalus albus.

RATTLEWEED, Actæa racemosa.

RATULA, Raspatorium.

RAUCE'DO, *Rau'citas, Parapho'nia rauca, Asper'itas Arte'riæ as'peræ, Vox rauca, Branchus, Hoarseness*, (Sc.) *Roup*, (Prov.) *Rawp*, (F.) *Enrouement, Raucité*, from *raucus*, 'hoarse.' A change in the voice, which loses its smoothness and becomes low and obscure. It is a common symptom in diseases of the larynx and trachea.

RAUCEDO CATARRHA'LIS. Hoarseness from cold.

RAUCITAS, Raucedo.

RAUCITÉ, Raucedo.

RAUCOUS, *Raucus*. 'Hoarse;' as a raucous voice — *Vox rauca* seu *raucis'ona*.

RAVE, Brassica rapa.

RAVERY, Delirium.

RAWP, Raucedo.

RAY, Diarrhœa.

RAYONNÉ, Radiated.

RAYONS SOUS-IRIENS, Ciliary processes

RAZOR, *Culter Tonsor'ius, Machæ'ris, Novae'ula, Xyrum, Xyrus*, (F.) *Rasoir*, from *radere, rasum*, 'to shave.' An instrument for shaving. Used in surgery to remove hairs, where they would interfere with any operation.

REACHING, Vomiturition.

REAC'TION, *Reac'tio*, from *re*, 'again,' and *agere, actum*, 'to act.' An action of resistance to a power applied. A species of vital movement or excitement, tending to prevent or destroy the effects of any noxious power applied to the animal economy, and which, by some, has been attributed to the *vis medicatrix naturæ*. It is certainly dependent on the organic instinctive actions of the frame. It is the state of activity which succeeds the action on the nervous system of certain morbific influences.

READ, Rennet.

REAL'GAR, *Realgal, Arlada, Arladar, Auripigmen'tum rubrum, Arsen'icum rubrum facti'' tium, Abessi, Sandara'cha Græco'rum, Red Sulphuret of Mercury*. A violent poison. See Poison.

REAM, Cream.

REASON, *Ra'tio, Logos,* (F.) *Raison.* Same etymon as Ratio. The faculty or property of the mind by means of which man perceives the distinction between right and wrong, in physics as well as in morals. *Reason* is a just conclusion resulting from the comparison of two ideas, by virtue of which we form a judgment.

REBOLEA, Mummy.

REBONA, Mummy.

REBOUTEUR, Renoueur.

RECEIV'ER, *Ampulla,* (F.) *Ballon, Récipient,* from *recipere, receptum,* (*re,* and *capere,* 'to take,') 'to take, to receive.' In pharmacy, a wide-necked globular vessel, the neck of which widens gradually outwards, to receive the tapering beak of the retort in distillation. Like the retort, the receiver may be *plain* or *tubulated.*

A *quilled receiver* is one that has a tapering tube from its lower surface, which is inserted into a graduated bottle through a cork joint, when it is desirable to know accurately the amount of fluid that has passed over.

RECEPTACULA DURÆ MATRIS, Sinuses of the dura mater.

RECEPTAC'ULUM CHYLI, 'receptacle of the chyle;' *R. Pecquet'i* seu *Pecquetia'num, Diverso'rium* seu *Stagnum chyli, Sac'culus chy'lifer* seu *ro'rifer* seu *lac'teus, Al'veus ampullo'sus* seu *ampullesce'ns, Utric'ulus lacteus, Vesic'ula chyli, Ampul'la chylif'era* seu *chyli, Cister'na lumba'ris* seu *Chyli, Chylo-ys'tis, Chylodochi'um, Lat'ices lactei, Lumbar cistern, Reservoir of Pecquet,* (F.) *Réservoir du chyle, R. de Pecquet, Citerne lombaire.* A considerable dilatation of the thoracic duct, in front of the lumbar region of the vertebral column. It is the commencement of the duct.

RECEPTAC'ULUM COTUN'NII. A triangular space, formed by a separation of the two laminæ of the dura mater of the internal ear, near the middle of the posterior surface of the pars petrosa of the temporal bone, where the aquæductus vestibuli terminates. It is always filled with the *Fluid of Cotugno.*

RECEPTACULUM PECQUETI, R. Chyli — r. Sellæ equinæ lateribus appositum, Cavernous sinus.

RECEPTIV'ITY, *Receptiv'itas,* (F.) *Réceptivité.* Same etymon as Receiver. A word used by Tissot to express the susceptibility of certain organs to receive morbific impressions.

RECEPTUM, Prescription.

RECESSIO, Paroxysm.

RECESSUS, Abscess, Sinus — r. Sulciformis, see Fovea vestibuli.

RECHAMALCA, Rachamelca.

RECHUTE, see Relapse.

RECIDIVA MORBI, Relapse.

RÉCIDIVE, see Relapse.

REC''IPÉ, (L.) (*re,* and *capere,* 'to take.') A Latin word which signifies 'take.' (F.) *Prenez,* and with which prescriptions are commenced. It is, often, represented by R, ℞, and was formerly by ℥, the symbol of Jove. See Abbreviation.

RÉCIPIENT, Receiver.

RECIPROCATION, VIBRATIONS OF, see Sound.

RECLINATIO, Reclination — r. Palpebrarum, Ectropion.

RECLINA'TION, *Reclina'tio,* from *reclinare, reclinatum,* (*re,* and *clinare,* 'to bend,') 'to bend back.' A mode of operating for the cataract, which consists in applying the needle in a certain manner to the anterior surface of the cataract and depressing it into the vitreous humour, in such a way, that the front surface of the cataract is the upper one and its back surface the lower one.

RECLUSOR PALPEBRARUM, Levator palpebræ superioris.

RECOMPOSITION, Metasynchrisis.

RECONVALESCENTIA, Convalescence.

RECORDATIO, Memory.

RECORDATUS, Memory.

RECORPORATIVUS, Metasyncritic.

RECOVERY, Restauratio.

RECREATIO, Restauratio.

REC'REMENT, *Recremen'tum,* from *re,* and *cernere, cretum,* 'to sift.' A humour, which, after having been separated from the blood, is again returned to it; such as the saliva, the secretion of serous membranes, &c. Such fluids are said to be *recrementit''ial,* (F.) *Récrémenteux, Récrémentitiel; Humo'res inquili'ni.*

RECREMENTA VESICÆ, Urine.

RECREMENTIAL FLUIDS, see Recrement.

RECREMEN'TO-EXCREMENTIT''IAL. Applied to secreted fluids, as the saliva, bile, &c., which are in part reabsorbed and in part excreted.

RECREMENTUM, Recrement.

RECRUDESCEN'TIA, *Polincote'sis, Recrudes'cence,* from *re,* 'again,' and *crudus,* 'raw.' An increase of a disease after a temporary remission.

RECTAL, *Recta'lis.* Appertaining, or relating to, the rectum, — as *'rectal* tube.' See Tube, rectal.

RECTIFICA'TION, *Rectifica'tio,* from *rectum facere,* 'to make right.' An operation by which certain liquids are purified by distilling them, either singly or after admixture with other substances.

RECTI'TIS. A hybrid word, from *rectum,* and *itis,* denoting inflammation; properly *architis,* or *proctitis.* Inflammation of the rectum. *Proctal'gia inflammato'ria.*

RECTO, in composition, signifies relating or belonging to the rectum.

RECTOCELE, Cystocele.

RECTOSTENOSIS, Stricture of the rectum.

RECTO-U'TERINE, *Recto-uteri'nus,* from *rectum,* and *uterus.* Appertaining, or relating, to the rectum and uterus.

RECTO-UTERINE FOLDS, see Uterus.

RECTO-VAG''INAL, *Recto-vagina'lis.* That which relates or belongs to the rectum and vagina.

RECTO-VAGINAL FISTULA is owing to a preternatural communication between the rectum and vagina through the above septum.

RECTO-VAGINAL SEPTUM, (F.) *Cloison recto-vaginale,* is formed by the junction — back to back — (or by what the French term *adossement*) of the rectum and vagina. It separates these two canals from each other.

RECTO-VES'ICAL, *Recto-vesica'lis.* Having relation to the rectum and bladder; as the "*recto-vesical fold* or *pouch*" of the peritoneum, between the rectum and bladder. See Urinary Bladder.

RECTUM, from *rectus,* so called from a notion that it is straight. It is not so. *Intesti'num Rectum, Apeuthys'menos, Euthyen'teron, Longaon, Longas, Longanon, Archos, Cys'saros, Princeps, Monoco'lon* [?], *Bum-gut,* (Prov.) *Jot-gut.* The third and last portion of the great intestine. It forms the continuation of the sigmoid flexure of the colon, occupies the posterior part of the pelvis, and extends from the left side of the sacro-vertebral articulation to the coccyx, before which it opens outwards by the orifice called the *anus.* It is cylindrical, but *saccated,* as it were, at its inferior portion, where it is consequently larger, and is attached to the sacrum by the mesorectum.

Like the other portions of the canal it is formed of three membranes. Towards the lower extremity, some parallel and longitudinal wrinkles are observable on its inner surface: these are the *Columnæ, Colum'næ car'neæ of the Rectum* or *of Morgagni*, (F.) *Colonnes du rectum* ou *de Morgagni*. They are merely folds of the mucous membrane, between which is a number of *Lacunæ*. The arteries of the rectum are numerous. They proceed from the inferior mesenteric, hypogastric, and internal pudic, and are called *hemorrhoïdal*. The veins open, partly into the hypogastric vein, partly into the inferior mesenteric. The nerves proceed from the sciatic and hypogastric plexuses. The rectum receives the fæcal matters, as they pass from the colon, which serves as a reservoir for them.

RECTUS, 'straight.' (F.) *Droit*. A term, used in anatomy for parts that pursue a straight course; — as

Rectus Abdom'inis, (F.) *Pubio-sternal, Sterno-pubien* (Ch.), *Droit de l'abdomen*. A long flat muscle, situate at the anterior part of the abdomen, and separated from that of the opposite side by the linea alba. It is attached, above, to the cartilages of the last three true ribs; and, below, to the pubis by a very strong tendon, the outer edge of which is continuous with the fascia transversalis. This muscle is enclosed in an aponeurotic sheath; and, in its course, has three or four transverse aponeurotic intersections. It bends the chest on the pelvis, and conversely.

Rectus Anterior Brevis, Rectus capitis internus minor — r. Anterior longus, R. capitis internus major — r. Capitis anticus longus, R. c. internus major.

Rectus Capitis Internus Major, *R. internus major* seu *anterior longus* seu *capitis anti'cus longus*, (F.) *Trachélo-basilaire, Grand droit antérieur de la tête*. This muscle is long in proportion to its breadth, flat, and broader above than below. It is situate at the anterior and lateral part of the neck, and arises from the transverse processes of the third, fourth, fifth, and sixth cervical vertebræ. It is inserted into the basilary process of the occipital bone.

Rectus Capitis Internus Minor, *R. internus minor* seu *anterior brevis, Ren'uens, An'nuens*, (F.) *Petit trachélo-basilaire, Petit droit antérieur de la tête*. This is situate deeper than the last. It is thin, flattened, irregularly quadrilateral, and passes from the anterior surface of the body of the first vertebra, near the origin of the transverse process, to be inserted into the basilary process.

Rectus Capitis Latera'lis, *R. lateralis* seu *latera'lis Fallo'pii, Transversa'lis anti'cus primus*, (F.) *Trachélo-atloïdo-basilaire, Atloïdo-sous-occipital* (Ch.), *Droit latéral de la tête*. There is a muscle of this name on each side of the head. It is flat, quadrilateral, and passes from the transverse process of the atlas to the occiput, behind the jugular fossa. It inclines the head to one side.

Rectus Capitis Posti'cus Major, *R. Major* seu *Capitis posti'cus minor* (Albinus), *Spini-axoïdo-occipita'lis*, (F.) *Azoïdo-occipitale* (Ch.), *Grand droit postérieur de la tête*. A flat, triangular muscle, situate at the posterior and superior part of the neck. It extends from the spinous process of the second cervical vertebra to the external surface of the lower semicircular ridge of the occipital bone. This muscle extends the head, inclines it to one side, and causes it to experience a rotary motion, which directs the face to its side.

Rectus Capitis Posti'cus Minor, *R. minor*, (F.) *Tuber-atloïdo-occipital, Atloïdo-occipital* (Ch.), *Petit droit postérieur de la tête*. A flat, triangular muscle, situate beneath the last, which passes from the posterior arch of the atlas to the occipital bone. It extends the head.

Rectus Capitis Posticus Minor, R. c. p. major — r. Cruris, R. femoris.

Rectus Externus Oc'uli, *Abductor oculi, Indignabun'dus, Indignato'rius, Iracun'dus, Oc'ulum movens secun'dus, Orbito-extus-scléroticien*. All the recti muscles of the eye, four in number, arise from the bottom of the orbit, and are inserted into the sclerotic coat of the eye. The *Rectus externus*, (F.) *Droit externe, Iracible* ou *Abducteur*, is divided, at its posterior extremity, into two portions, one of which is attached to the outer part of the foramen opticum, and the other to the sphenoid bone.

Rectus Fem'oris, *Rectus* seu *Grac''ilis anterior* seu *cruris*, (F.) *Ilio-rotulien, Droit antérieur de la cuisse*. A straight muscle, seated at the anterior part of the thigh. It extends from the anterior and inferior spine of the ilium and the cotyloid cavity of the patella. This muscle extends the leg upon the thigh, and conversely. It can, also, bend the thigh upon the pelvis or carry the pelvis forward.

Rectus Inferior Oculi, *Depres'sor oculi, Tim'idus, Dep'rimens, Hu'milis, Oc'ulum movens quartus*, (F.) *Sous-optico-sphéno-sclératicien, Droit inférieur* ou *abaisseur de l'œil, Muscle humble*, arises below the optic foramen, from the sphenoid bone. It depresses the eye.

Rectus Internus Oc'uli, *Addu'cens oculi, Bibito'rius, Oculi adductor, Oculum movens primus*, (F.) *Orbito-intus-sclératicien, Droit interne de l'œil* ou *adducteur* ou *buveur*. It arises from the sphenoid at the inferior part of the foramen opticum. It turns the eye towards the nose.

Rectus Superior Oculi, *Attol'lens oculi* seu *oc'ulum, Leva'tor seu Eleva'tor oculi, Superbus, Oculum movens tertius*, (F.) *Sus-optico-sphéno-sclératicien, Droit supérieur* ou *Élévateur de l'œil, Dédaigneux*, is attached to the circumference of the foramen opticum.

All the recti muscles are concerned in the voluntary motions of the eye. The oblique muscles have been supposed by Sir C. Bell to execute the involuntary.[?]

Rectus Inferior Femoris, Gracilis — r. Internus major, R. capitis internus major — r. Internus minor, R. capitis internus minor — r. Lateralis, R. capitis lateralis — r. Lateralis Fallopii, R. capitis lateralis — r. Major, R. capitis posticus major — r. Minor, R. capitis posticus minor.

RECUBITORIUM, Anaclinterium.

RECUPERATION, Restauratio.

RECU'PERATIVE, *Recu'peratory*, from *recuperatio*, 'recovery.' Restorative. Recovering. Belonging to recovery.

RECUR'RENT, *Recur'rens*, from *recurrere*, (*re*, and *currere*), 'to run back.' A name given to several arterial and nervous branches, which seem to re-ascend towards the origin of the trunk whence they emanate.

Recurrent Arteries. This name has been given to several arteries of the forearm, and to one of the leg. In the *forearm*, there are, 1. The *Radial recurrent, Artère récurrente de l'épicondyle* (Ch.), which arises from the superior part of the radial, and ascends between the supinator longus, s. brevis, and the brachialis internus. 2. The *anterior cubital recurrent, A. récurrente de l'épitrochlée* (Ch.), which arises from the upper and inner part of the cubital, and ascends between the pronator teres and brachialis internus. 3. The *posterior cubital recurrent*, which arises from the preceding artery, or from the cubital itself, and ascends between the oleranon and internal tuberosity of the humerus. 4. The *posterior radial recurrent, A. récurrente olécranienne*

(Ch.). It arises from the posterior interosseous, and ascends between the posterior cubital and anconeus muscles. In *the leg*, — the *Arteria recurrens tibia'lis*, *A. récurrente du genou* (Ch.), is furnished by the anterior tibial, and ascends to the tibialis anticus muscle.

RECURRENT BANDAGES are formed by convolutions of bandages, which make a kind of cap for the part—as the head—to which they are applied.

RECURVATIO, see Hump.

RECUTITUS, Apella.

REDBEAN, Abrus precatorius.

REDBERRY, Arbutus uva ursi, Gaultheria, Panax quinquefolium—r. Bitter, Cornus Florida —r. Swamp, Vaccinium oxycoccos.

REDGOWN, Strophulus.

RED HEAD, Asclepias Curassavica.

REDMAILKES, Papaver rhœas.

REDROD, Cornus sericea.

RED ROOT, Celastrus, Lachnanthes tinctoria, Sanguinaria Canadensis.

REDSHANKS, Polygonum persicaria.

RED WATER TREE, see Sassy Bark.

REDIMICULUM, Diadema.

REDINGOTES ANGLAISES, see Condom.

REDINTEGRATIO, Regeneration, Restauratio.

REDIVIA, Paronychia.

RÉDONDANCE, Plethora.

REDOUBLEMENT, Exacerbation, Paroxysm.

REDRESSEUR UTÉRIN, Pessary, intrauterine.

REDS, Menses.

REDUCTIO, Reduction, Taxis — r. Præputii Impedita, Phimosis.

REDUC'TION, *Reduc'tio*, *Reposit''io*, *Restitu'tio*, *Diop'tasis*, *Diaplas'mus*, *Syntax'is*, from *reducere*, *reductum*, (*re*, and *ducere*, *ductum*, 'to lead,') 'to bring back.' A surgical operation, the object of which is to restore displaced parts to their original situation. Thus, we say the reduction of a luxation, when the displaced parts are again brought to their proper relative situation. The reduction of a hernia is the restoration of the protruded parts to the cavity of the abdomen. This is, also, called *Taxis*.

In pharmacy, the process of restoring oxides, chlorides, sulphurets, &c., to the metallic state.

REDUNDANTIA, Plethora.

REDUVIA, Paronychia.

REED MACE, Typha latifolia.

REFECTIO, Restauratio.

REFECTIVA, Analeptica.

REFECTUS, Restauratio.

REFICIENTIA, Analeptica.

REFLECTION, *Reflex'io*, (*re*, and *flecto*, *flectum*, 'to bend.') A bending or turning back. Duplicature.

REFLEC'TOR EPIGLOT'TIDIS. A muscle, which arises from the arytennid cartilage and inner part of the thyroid, and is inserted into the lateral edges of the epiglottis.

REFLEX MOVEMENTS, see Motion—r. System of nerves, see Excito-motory, and Nerves.

REFLEXIO, Reflection—r. Palpebrarum, Ectropion.

RÉFORME, Invaliding.

REFRAC'TION, *Refrac'tio*, *Photocamp'sis*, *Dia'clasis*, from *re*, and *frangere*, *fractum*, 'to break.' The change of direction which rays of light experience when they pass obliquely from one medium into another of different density. If the light passes from a rarer to a denser medium, it approaches the perpendicular raised at the point of immersion. The contrary occurs, when it goes from a denser to a rarer medium. The theory of lenses, telescopes, and of the eye, rests entirely on this property of light.

RÉFRIGÉRANT, see Alembic.

REFRIG''ERANTS, *Refrigeran'tia*, *Psych'tica*, *Antither'mo*, *Frigefacien'tia*, (F.) *Rafraîchissants*, *Réfrigératifs*, *Desaltérants*, from *re*, and *frigere*, 'to cool.' Medicines which depress the morbid temperature of the body. The chief reputed refrigerants are the Potassæ Nitras [?], the Sodæ Boras [?], but chiefly the abstraction of caloric by ice and ice-drinks, cold water, cold lemonades, soda-water, and effervescing draughts internally; and externally, cool air, cold water, evaporating lotions, and frigorific mixtures.

RÉFRIGÉRATIFS, Refrigerants.

REFRIGERATOR, see Alembic.

REGENERATIO, Reproduction.

REGENERA'TION, *Regenera'tio*, *Palingen'esis*, *Redintegra'tio*, from *re*, and *generare*, *generatum*, 'to beget.' Reproduction of a part of the body, which has been destroyed.

REG''IMEN, (F.) *Régime*, from *regere*, 'to govern.' The rational and methodical use of food, and of everything essential to life; both in a state of health and disease. It is often restricted, in its meaning, to *Diet*. It is sometimes used synonymously with hygiene.

RÉGIME SANITAIRE and *SYSTÈME SANITAIRE*, mean the measures and regulations adopted to prevent the development and propagation of diseases reputed to be pestilential, — especially plague, yellow fever, and cholera.

REGINA PRATI, Spiræa ulmaria.

REGIO, Region.

REGIO AURICULARIS. The region of the ear.

REGIO BUCCA'LIS. The region of the cheek.

REGIO CARDIACA, Epigastric region.

REGIO CERVICA'LIS. The region of the neck The cervical region.

REGIO EPIGASTRICA, Epigastrium.

REGIO FACIA'LIS. The facial region.

REGIO FRONTALIS. The frontal region.

REGIO GASTRICA, Umbilical region — r. Hypogastrica, see Hypogastrium — r. Hypochondriaca, Hypochondre — r. Iliaca, Iliac region — r. Inguinalis, Inguinal region — r. Ischiadica, Ischiadic region — r. Jugalis, Jugal region — r. Lumbalis, Lumbi—r. Mentalis, Mental region—r. Mesogastrica, Umbilical region—r. Nasalis, Nasal region —r. Nuchæ, Nuchal region—r. Nuchalis, Nuchal region—r. Occipitalis, Occiput—r. Occipitalis inferior, Nuchal region — r. Perinæi, Perinæum — r. Præcordiaca, Præcordial region — r. Pubis, Pubic region — r. Stomachalis, Epigastric region —r. Stomachica, Epigastric region—r. Temporalis, Temple — r. Umbilicalis, Umbilical region.

RE'GION, *Re'gio*. Same etymon. Anatomists have called *regions*, determinate spaces on the surface of the body or of different organs. Thus, the abdomen has been divided into several; to which different names have been given. See Abdomen, Epigastrium, Hypochondrium, Hypogastrium.

RÉGION OMBILICALE, Umbilical region.

REGIONAL ANATOMY, see Anatomy.

RÈGLES, Menses — r. *Déviés*, Menstruation, vicarious — r. *Difficiles*, Dysmenorrhœa.

RÉGLISSE, Glycyrrhiza.

RÉGNE ANIMAL, see Animal.

REG'ULAR, *Regula'ris*, from *regula*, (*regere*, 'to govern,') 'a rule.' According to rule. Applied to the types of a disease, and to the pulse, when according to rule.

REGULAR PRACTIT''IONER. One who practises his profession according to the rules established by law or custom.

REGULUS ANTIMONII, Antimonium.

REGURGITA'TION, *Regurgita'tio*. The act by which a canal or reservoir throws back sub-

stances accumulated in it. *Mitral regurgitation*, for example, means the reflux of blood through the left auriculo-ventricular opening, during the contraction of the left ventricle. Regurgitation is also applied to the *puking* or *possetting* of infants; and to the *rising* of solids or fluids into the mouth in the adult, — from *re*, and *gorge*, (*gurges*), 'the throat.' (F.) *Rapport*. What is called "vomiting at pleasure" is regurgitation.

The substances brought into the mouth by regurgitation, the French call *Renvois*.

REIF, Psora.

REIN, Kidney.

REINE DES PRES, Spiræa ulmaria.

REINERZ, MINERAL WATERS OF. Reinerz is a small town in Silesia, three German miles from Glatz. The waters are acidulous chalybeates. The principal springs are the tepid drinking spring, the cold spring, and three bathing springs.

REINFORCE'MENT, FASCIC'ULUS OF, *F. Cuneu'tus*. A band of fibres from the *corpus innominatum*, or lateral part of the antero-lateral column of the medulla, which is continued up behind and around the corpus olivare, is lined on its inner or central surface with cineritious substance, enlarges as it ascends, passes over the upper surface of the pons Varolii, and is expanded into the optic thalamus. It thus forms, in its course, the anterior paries of the fourth ventricle, and is brought into view by brushing away the *tuberculum cinereum* or gray matter of the ventricle. The band has received these names owing to its constantly increasing as it ascends, and being mixed up with gray matter on its inner face, from which its seems to derive new fibres.

REINS, Kidneys, Lumbi.

REJEC'TIO, *Anago'gē*, from *rejicere, rejectum*, (*re*, and *jacere*, 'to cast,') 'to cast back.' Every excretion by the mouth,—spitting, expectoration, regurgitation, or vomiting.

REJECTIO SANGUINIS E PULMONIBUS, Hæmoptysis.

REJUVENES'CENCE, *Rejuvenescen'tia*, from *re*, 'again.' and *juvenescens*, 'growing young:' (*juvenis*, 'a youth'.) A renewal of youth. The state of being young again. The assumption of the characteristics of youth by the aged.

RELÂCHANT, Relaxant.

RELÂCHEMENT, Relaxation.

RELAPSE, *Hypot'ropē, Epis'trophē, Hypos'trophē, Morbi recidi'va, Hypotropias'mus*, from *re*, 'again,' and *labor, lapsus*, 'I fall down.' The return of a disease, during, or shortly after, convalescence. The French use *Rechute* in this sense; and *Récidive* (*Morbus recidi'vus*) for the return of a complaint, at a greater or less period after the complete recovery of health.

The terms *Relapsing fever, Short fever, Five-day fever, Seven-day fever, Bil'ious Remitt'ent fever, Remitting Ic'teric fever*, and *Mild Yellow fever*, (F.) *Fièvre à rechute*, have been given to a form of continued fever, which has occasionally appeared epidemically, as in Edinburgh, in 1843 and 1847, and was generally attended with ieteric symptoms. The main phenomena disappeared at about the end of a week; but in many cases a relapse occurred about the end of a fortnight. Few died of the affection.

RELAPSING FEVER, see Relapse.

RELATIO, *Rapport*.

RELATION, FUNCTIONS OF, see Function.

RELAX'ANT, *Laxans, Malact'icum, Chalas'ticum, Paret'icum*, (F.) *Relâchant*, from *re*, and *laxare*, 'to loosen.' A medicine which diminishes the tension of organs. Mucilaginous and fatty substances are relaxants.

RELAXANTIA, Emollients.

RELAXATIO CORDIS ET ARTERIARUM, Diastole.

RELAXA'TION, *Relaxa'tio*. Same etymon. *Chala'sis, Chalas'mos*, (F) *Relâchement*. In *Physiology*, relaxation is opposed to contraction. In *Pathology*, it means great looseness of a part.

RELÈVE-PAUPIÈRE. An instrument for raising the eyelid.

RELEVEUR DE L'ANUS, Levator ani — *r. de la Lèvre inférieure*, Levator labii inferioris — *r. du Menton*, Levator labii inferioris — *r. de l'Omoplate*, Levator scapulæ — *r. de la Prostate*, Levator prostatæ — *r. de l'Urèthre*, Levator urethræ.

RELIG''IOUS DISEASES, (F.) *Maladies religieuses*. Diseases affecting the nervous system, and arising from the excitment of religious emotions. See *Convulsionnaire*.

RELIQUAT, (F.) The *remnant* or remains of a disease.

REMAK FIBRES, see Fibres, Remak.

REMANSIO MENSIUM, Amenorrhœa.

REMÈDE, Clyster, Medicament — *r. du Capuchin*, Liquor hydrargyri nitrici — *r. de Durande*, Liquor anodynus terebinthinatus — *r. du Duc d'Antin*, Liquor hydrargyri nitrici.

REMEDIAL, Medicinal.

REMEDIATE, Medicinal.

REMEDILESS, Incurable.

REMEDIUM, Juvans, Medicament — r. Dentifricium, Dentifrice.

REMEDY, Medicament — r. English, Cinchona.

REMISSIO, Decline, Remission — r. Cordis et Arteriarum, Diastole — r. Morbi, Remission — r. Vitium, Atony.

REMIS'SION, *Remis'sio, Epan'esis, An'esis, Submis'sio, Aph'esis, En'dosis, Meio'sis*, from *remittere*, (*re*, and *mittere, missum*, 'to send'), 'to relax.' In a more extensive signification, a temporary diminution of the symptoms of a disease, either acute or chronic, *Remis'sio morbi*. Diminution in the febrile symptoms, such as occurs in a remittent fever between the exacerbations.

REMETIC, Medicament.

REMITTENS ICTERODES, Fever, yellow.

REMIT'TENT, *Remit'tens*. Same etymon. Any disease which presents *remissions*.

REMITTENT OF CHILDREN, Fever, infantile remittent.

REMITTENT FEVER, *Febris remit'tens, Epan'e tus, Exac''erbating, paroxysmal, sub-continual, endem'ic, endem'ial* or *endem'ical fever*, (F.) *Fièvre rémittente*, is one which strikingly exacerbates and remits, but without intermission. The ordinary bilious fever of the United States is a simple remittent—*Epanetus mitis*, (F.) *Fièvre rémittente simple*.

REMITTENT FEVER, BILIOUS, Remittent fever, see Relapse.

REMITTING ICTERIC FEVER, see Relapse.

REM'ORA, from *remorari*, (*re*, and *mora*, 'delay,) 'to arrest.' Stoppage, stagnation, — as of blood. Also, the name of two surgical instruments, intended to retain parts *in situ*. The one was used, formerly, in castration, to prevent the intestines from protruding at the inguinal ring; the other, called *Remora Hilda'ni*, (F.) *Arrêt d'Hildan, Echene'is*, was employed to maintain fractures and luxations reduced. It is not now used.

REMORA ARATRI, Ononis spinosa.

REN, Kidney.

RENAL, *Rena'lis*, from *Ren*, 'the kidney.' That which relates to the kidney.

RENAL ARTERIES, *Emulg''ent Arteries*, are very large and short, and commonly two in number—one to each kidney. They arise from the sides of the abdominal aorta, forming with it a right angle. The left is commonly a little more anterior and elevated than the right. After a short course, they arrive at the fissure of the kidney, where they divide, before entering it, into three or four very considerable branches.

RENAL CAPSULE, Capsule, renal—r. Nerve, see Splanchnic Nerves.

RENAL PLEX'USES, *Emulg''ent Plexuses*. These are two:—one on each side. They proceed from fasciculi of the solar and cœliac plexuses; from the outer side of the semilunar ganglion and the final expansion of the small splanchnic nerves. These plexuses begin by three or four ganglions, situate at the commencement of the renal artery; and they give off from their circumference many fine, straight filaments, which do not anastomose, and which enter the kidney with the divisions of the renal artery. These divisions they accompany.

RENAL VEINS, *Emulgent Veins*. These are very large. Their roots follow the same course as the arteries in the substance of the kidney. In the fissure or pelvic portion of the kidney, they unite into a single trunk, which passes transversely inwards, and opens at the side of the vena cava descendens.

RENCHUS, Snoring, Stertor.

REN'CULUS, *Renic'ulus*, *Ren'ulus*, diminutive of *Ren*, 'a kidney.' A small kidney. A lobe of the kidney.

RENDLES, Rennet.

RENEAL'MIA EXALTA'TA, *Alpin'ia exalta'ta* seu *tubula'ta*. A plant of British Guiana, which is possessed of diaphoretic and diuretic properties; and, in large doses, is emetic. It is much used there in dropsy, rheumatism, dysentery, &c. The bruised rhizoma is the part employed.

RENES SUCCENTURIATI, Capsules, renal.

RENICULUS, Renculus.

RENIFORM. Nephroid.

RENNES, MINERAL WATERS OF. Thermal salines in the department of Aube, France, containing carbonic acid and chloride of magnesium. Temperature 103 to 121°, of Fahr.

RENNET, *Runnet*, *Coäg'ulum*, *πυτία*, *πυετία*, *Pytia*, *Pyet'ia*, from (G.) gerinnen, 'to coagulate' [?], (F.) *Caille-lait*. When the fourth stomach or *Abomasus* of the calf is salted and dried, it possesses the property of coagulating milk, when a portion of it is soaked in water, and the infusion — *Rennet*, *Rendles*, *Running*, (Prov.) *Earning*, *Preaser*, *Read*, *Running*, *Steep* — is added to milk.

RENNET WHEY, see Serum lactis.

RENONCULE, Ranunculus—r. *Bulbeuse*, Ranunculus bulbosus.

RENOUÉE, Polygonum aviculare — r. *Âcre*, Polygonum hydropiper.

RENOUEUR, (F.) *Rebouteur*, *Rhabilleur*, from *re*, and *nouer*, (*nodus*, 'a knot,') 'to tie or knit again.' A *bone-doctor*: — a *bone-setter*. One who makes a *trade* of reducing fractures and dislocations.

RENOVATIO, Ananeosis.

RENSSELAERIA VIRGINICA, Peltandra Virginica.

RENUENS, Rectus capitis internus minor.

RENULUS, Renculus.

RENUM ATONIA, Nephratonia — r. Paralysis, Nephratonia.

RENUNCIATIO, *Rapport*.

RENVERSEMENT DE LA LANGUE, Paraglossa — r. *de la Matrice*, Uterus, inversion of the—r. *des Paupières*, Ectropion—r. *du Rectum*, Proctocele—r. *de la Vessie*, Exocyste, Exstrophia of the bladder.

RENVOIS, see Regurgitation,

REPANDATIO, Lordosis.

REPARATION, Restauratio.

REPAR'ATIVE, *Repar'atory*. Having the power of restoring or repairing.

REPELLENTIA, Repellents.

REPEL'LENTS, *Repellen'tia*, *Reperentien'tia*, *Apocrus'tica*, *Repercus'sives*, (F.) *Répercussifs*, from *re*, and *pellere*, 'to drive.' Medicines which, when applied to a tumefied part, cause the fluids, that render it tumid, to recede, as it were, from it. Astringents, cold water, ice, &c., are repellents.

RÉPERCUSSIFS, Repellents.

REPERCUSSIO, Contra-fissura, Repercussion.

REPERCUS'SION, *Repercus'sio*, *Anac'lasis*, from *re*, and *percutio*, *percussum*, (*per*, and *quatere*, 'to shake or batter,') 'I strike back.' Disappearance of a tumour or cutaneous eruption, in consequence of the application of a repellent. The action of a repellent remedy. The French writers use the term *Délitescence*, *Delitescen'tia*, for the sudden disappearance of a tumour, inflammation, eruptive disease, or purulent collection, without the disease occurring in any other part of the body: in this respect delitescence differs from metastasis: *Délitescence* of an inflammation or 'sudden disappearance' is distinguished by certain French pathologists from *Resolution*. Repercussion also means *Ballottement*.

REPERCUSSIVES, Repellents.

REPERCUTIENTIA, Repellents.

REPLETIO, Fulness, Plethora.

REPLI LONGITUDINAL DE LA MÉNINGE, Falx cerebri.

REPOSITIO, Anaplasis, Reduction, Taxis.

REPOUSSOIR, Punch—r. *d'Arêtes*, Probang.

REPRIMENS, Epischetieus.

REPRODUC'TION, *Reproduc'tio*, *Regenera'tio*, from *re*, and *producere*, *productum*, (*pro*, and *ducere*.) The function by which living bodies produce bodies similar to themselves. See Generation. As a general remark, it will be found true, that the larger animals are uniparous, and the smaller, which are more exposed to destruction, multiparous. The mammalia being of the same natural class as man, it may be useful to compare them in this respect.

COMPARATIVE TABLE OF REPRODUCTION IN THE CLASS MAMMALIA.

Species.	Age capable of engendering.	Duration of gestation.	Number of young at each birth.	Period of cessation of the function.
Primates.				
Man	14 years	9 months	1 to 3	At a somewhat advanced age.
Monkeys (large)	3 years	7 months	Do.	
Do. (long tailed)	2 years	6 months	Do.	
Carnivora.				
Bear	2 years	112 days	1 to 4	25 to 30 years.
Badger			3 to 4	20 to 25 years.
Hedgehog	1 year	1 mo. and 10 days	3 to 5	
Ferret	11 months	Do.	5 to 9 twice a year	Produces during life.
Otter		3 months	3 to 4	
Pole-cat, Marten, Weasel, and Ermine, Didelphus,	before 1 year	56 days	3 to 6	8 to 10 years.
Opossum, and Philander,			4 to 6	10 years. (?)
Lion	2 years	3 to 4 months	3 to 4	20 to 25 years.
Tiger, Leopard	Do.	3 months	4 to 5	Do.
Lynx		9 weeks	3 to 4	
Wild Cat	before 1 year	56 days	4 to 6	9 years.
Wolf	2 years	73 days	5 to 9	15 to 20 years.
Dog, in the most natural state,	10 months	63 days	3 to 6	15 years.
Fox	1 year	2 months	Do.	10 or 12 years.
Jackall		Do.	5 to 8	
Isatis		63 days	6 to 7	
Phoca		3 months (?)	2 to 3	
Rodentia.				
Squirrel	1 year	45 days	3 to 4 twice a year	Produces during life
Flying Squirrel			3 to 4	Do.
Ondatra			3 to 5	Lives 6 years.
Beaver		4 months	2 to 3	
Hare	1 year	30 days	2 to 4 several times a year	Lives 8 years.
Rabbit	6 months	Do.	4 to 8 do.	Lives 8 or 9 years.
Rat	Do.	5 or 6 weeks	5 to 6 do.	Produces during life.
Mouse	Do.	1 month	Do.	Do.
Marmot		6 weeks	2 to 4	Do.
Guinea Pig	5 to 6 weeks	3 weeks	5 to 8 times a year	Do.
Dormouse	1 year		3 to 5	
Edentata.				
Armadilla			4 times a year	7 to 8 years. (?)
Ruminantia.				
Camel	4 years	11 months or 1 y'r	1	40 to 50 years.
Dromedary	Do.	Do.	1	Do.
Buffalo	3 years	9 months	1	15 to 18 years.
Beef	2 years	Do.	1 to 2	9 years.
Lama	3 years		Do.	12 years.
Reindeer	2 years	8 months	1	Lives 16 years.
Buck and Doe	1½ year	Do.	1 to 2	Lives 25 or 30 years.
Roebuck	Do.	5 months	Do.	Lives 12 or 15 years.
Saiga (Antelope)	1 year	Do.	Do.	Lives 15 or 20 years.
Chamois and Wild Goat	Do.	Do.	1, 2, and 3	Lives 18 or 20 years.
Goat	Do.	Do.	Do.	7 years.
Musimon	1½ year	Do.	1 to 2	8 or 10 years.
Sheep	1 year	Do.	Do.	8 years.
Solipedes.				
Horse	2½ years	290 days	1 to 2	25 or 30 years.
Ass	Do.	Do.	Do.	Do.
Zebra	Do.	Do.	Do.	Do.
Pachydermata.				
Hog	9 months or 1 year	4 months	10 to 20	15 years.
Elephant	16 years (?)	9 to 11 months	1 or 2	Lives 70 years. (?)
Rhinoceros	5 years (?)		1 or 2 (?)	Lives 60 years. (?)
Hippopotamus			1	
Morse		9 months	1	

REPRODUCTION MÉRISMATIQUE, see Generation.

REPULSORIUM, Punch,

REPURGA'TIO, *Anacathar'sis*, from *re*, and *purgare*, 'to cleanse.' According to Castelli — purgation by transpiration or by expectoration. Medicines producing this effect are called *Repurgan'tia*.

REQUIES, Acinesia.

REQUIETIO, Acinesia.

RES CONTRA-NATU'RAM. 'Things against nature,' (F.) *Choses contre-nature*, are those things which tend to destroy man; — as disease, and every thing connected with it.

RES CULINARIA, Culinary art — r. Medica, Medicina.

RES NATURA'LES, (F.) *Choses naturelles*. Those things, which, by their union, were conceived to constitute the nature of man; such as the elements, temperaments, humours, spirits, &c.

RES NON NATURA'LES, (F.) *Choses non-naturelles.* Those things which, anciently, formed the matter of hygiene. See Non-naturals.

RES VENEREA, Coition—r. Vestiaria, Vestitus.

RÉSEAU, Rete, Reticulum — *r. Admirable,* Rete mirabile—*r. Intermédiare,* see Corpus spongiosum urethræ — *r. Merveilleux,* Rete mirabile.

RESECTIO, Resection — r. Articulorum, see Resection.

RESEC'TION, *Resec'tio,* from *resecare, resectum, (re,* and *secare,)* 'to cut off.' A name, given, especially by the French surgeons, to operations in which the carious extremities of long bones, or the unconsolidated extremities of fractured bones forming irregular joints, are removed with the saw. —*Resectio articulo'rum, Decapita'tio articulo'rum.*

RESECTION, see Amputation.

RESEDA CRISPATA—r. Luteola—r. Lanceolata — r. Luteola.

RESE'DA LUTE'OLA, *R. lanceola'ta* seu *crispa'ta, Lute'ola. Weld, Dyer's Weed.* A European plant naturalized in the United States, which was at one time used as a diaphoretic and diuretic.

RESERANS, Aperient,

RESERVE AIR, see Respiration.

RÉSERVOIR DE LA BILE, Gall-bladder — *r. du Chyle,* Receptaculum chyli — *r. des Larmes,* Lachrymal sac—r. of Pecquet, Receptaculum chyli—*r. de Pecquet,* Receptaculum chyli—r. of the Thymus, see Thymus.

RESIDENTIA, Sediment.

RESIDUAL AIR, see Respiration.

RESIMUS, Camus.

RESIN, *Resi'na, Rheti'nē,* (F.) *Résine.* A vegetable product, commonly dry and concrete, more or less brittle, inodorous or slightly odorous, insipid, or of an acrid warm taste; of a smooth, glassy fracture, heavier than water, inflammable, insoluble in water, soluble in alcohol, ether, and yolk of egg, and negatively electrifiable by friction. Many resins are used in medicine; the greater part are purgative and irritating. Some act like acrid poisons.

RESIN, ACAROID, see Xanthorrhœa—r. Botany Bay, see Xanthorrhœa—r. Cayenne, Caoutchouc — r. of New Holland, see Xanthorrhœa — r. of the Spruce fir, see Pinus abies — r. of Xanthorrhœa, see Xanthorrhœa.

RESINA, Resin — r. Abietis, see Pinus abies, Pinus picea — r. Abietis humida, see Pinus abies — r. Abietis sicca, see Pinus abies—r. Acaroides, see Xanthorrhœa—r. Alba, see Pinus sylvestris—r. Alba humida, see Pinus Abies—r. Cayennensis, Caoutchouc—r. Copal, Copal—r. Elastica, Caoutchouc — r. Flava, see Pinus sylvestris—r. Fluida Canadensis, see Pinus balsamea—r. Jalapæ, Extractum jalapæ resinosum—r. Juniperi, Sandarac — r. Laricis, see Pinus larix — r. Lentiscina, see Pistachia lentiscus — r. Liquida pini balsameæ, see Pinus balsamea — r. Liquida pini laricis, see Pinus larix — r. Lutea Novi Belgii, see Xanthorrhœa — r. Nigra, Colophonia — r. Pini, see Pinus sylvestris — r. Pini empyreumatica liquida, see Pinus sylvestris—r. Pini abietis sponte concreta, see Pinus abies—r. Strobilina, see Pinus balsamea, and Pinus mughos — r. Terebinthi, see Pistacia terebinthus.

RESINA'TUM, *Rhetino'ton.* An epithet for wine impregnated with resin, and used by the ancients as a stomachic.

RÉSINE, Resin — *r. de Cayenne,* Caoutchouc — *r. Élastique,* Caoutchouc — *r. de Gaïac,* see Guaiacum—*r. Gomart,* see Bursera gummifera—*r. de Lierre,* see Hedera helix.

RÉSINOCE'RUM, *Rhetinoce'ron,* from ρητινη, 'resin,' and κηρος, 'wax.' A mixture of resin and wax. — Galen.

RESINOSA, in Pharmacy, resinous substances.

RÉSOLUTIFS, Discutients.

RESOLUTIO, Resolution—r. Membrorum, Paralysis.

RESOLUTIO MORBI. The resolution or disappearance of a disease; especially when without any critical evacuation.

RESOLUTIO ET DIABROSIS VENTRICULI, Gastromalacia—r. Nervorum, Paralysis — r. Ventriculi autopeptica, Gastromalacia—r. Virium, Dialysis.

RESOLU'TION, *Resolu'tio, Discus'sio,* from *resolvere,* (*re* and *solvere, solutum,* 'to loosen.') Removal or disappearance, as of a disease. Resolution is one of the terminations of inflammation, in which the inflamed part returns gradually, and without suppuration, to the healthy condition.

RÉSOLUTION DES MEMBRES, Paralysis.

RESOLVENTIA, Discutients.

RES'ONANCE, (F.) *Retentissement, Résonnance, Résonnement,* from *re,* 'again,' and *sono,* 'I sound.' 'A return of sound.' A resounding; a reverbernation of sounds. A thrilling of the voice more loud than natural; or its existence in a part where it is not heard in health, — as detected by auscultation. A thickened and hardened state of the lungs, caused either by a mass of crude tubercles, or by inflammation, is generally considered to produce this phenomenon, by rendering the lung a better conductor of the murmur of the voice in the bronchi. Hence the origin of the term *Bronchoph'ony,* from βρογχος, 'bronchus,' and φωνη, 'the voice;' (F.) *Voix bronchique, Voix tubaire, V. bourdonnante.*

Resonance is also used in the sense of resounding; as when the chest is said to be resonant on percussion.

RESONANCE, VESIC'ULO-TYMPANIT'IC, see Vesiculo-tympanitic—r. Vibrations of, see Sound.

RESONITUS, Contra-fissura.

RES'ONANT, *Res'onans, Res'onus,* (F.) *Retentissant, Résonnant.* Resounding. See Resonance.

RÉSONNANCE, Resonance.

RESONNEMENT, Resonance.

RESORBENS, Absorbent.

RESORPTIO, Absorption, Resorption — r. Cutanea, see Absorption — r. Cutis, see Absorption.

RESORP'TION, *Resorp'tio,* from *resorbere, resorptum, (re,* 'again,' and *sorbere,)* 'to absorb again.' Absorption of a fluid which has been previously deposited in a part by the exhalants, as of pus, blood, serum, &c.

RES'PIRABLE, *Respirab'ilis.* Same etymon as Respiration. Capable of being breathed. Adapted for respiration.

RESPIRAMEN, Respiration.

RESPIRAMENTUM, Respiration.

RESPIRATEUR, Respirator, Respiratory.

RESPIRATIO, Respiration — r. Abolita, Apnœa—r. Brevis, Dyspnœa—r. Difficilis, Dyspnœa — r. Stertens, Stertor — r. Stertuosa, Stertor.

RESPIRA'TION, *Respira'tio, Anap'noē,* from *respiro, (re,* and *spiro,)* 'I take breath.' *Anapneu'sis, Pneu'sis spira'tio, Respira'men, Respiramentum, Respira'tus, Respir'itus, Spir'itus.* A function proper to animals, the object of which is, to place the materials of the blood—the mixture of the venous blood with lymph and chyle—in contact with atmospheric air, in order that it may acquire the vivifying qualities which belong to arterial blood. The organs for executing this function are, in the mammalia, birds, and reptiles, the *lungs.* In man, the respiration consists of mechanical and chymical phenomena. The mechanical are *Inspiration* and *Expiration.* The evident chymical phenomena consist in the formation of a certain quantity of carbonic acid, the absorption of a part of the oxygen of the air, and

the disengagement of a quantity of water in the state of vapour. In the healthy condition the respiration is easy, gentle, regular, and without noise. In man, the respirations are generally about 35 per minute in the first year of life; 25 during the second; 20 at puberty; and 18 in the adult age.

The air of respiration has been divided into *first*, the *residual air*, or that which cannot be expelled from the lungs, but remains after a full and forcible expiration, estimated at 120 cubic inches: *secondly*, the *supplementary* or *reserve* air or that which can be expelled by a forcible expiration, after an ordinary outbreathing, valued at 130 cubic inches: *thirdly*, the *breath*, *tidal* or *breathing* air, valued at 26 cubic inches: and *fourthly*, the *complementary* or *complemental* air, or that which can be inhaled after an ordinary inspiration, which amounts to 100 cubic inches. This estimate gives 250 cubic inches as the average volume of air which the chest contains after an ordinary expiration.

RESPIRATION BRONCHIQUE, see Murmur, respiratory.

RESPIRATION, BRONCHO-VESIC'ULAR. A morbid modification of the respiratory murmur, having more or less of the characters of the bronchial and the vesicular respiration combined. It denotes incomplete solidification of the lung, as from the presence of tubercle. — Flint.

RESPIRATION OF THE CELLS. Murmur, respiratory — r. Cogged-wheel, Respiration, jerking — r. *Entrecoupée*, Respiration, jerking — r. *Exagérée*, see Puerile — r. *Hyperésiculaire*, see Puerile.

RESPIRATION, JERKING, *Cogged-wheel*, or *Wavy respiration*, (F.) *R. Saccadée* ou *Entrecoupée*. When the murmur of inspiration, in place of being continuous, is interrupted as by starts, it is called 'jerking.' It is a concomitant of incipient pleurisy, pleurodynia, spasmodic asthma, and tuberculosis of the lung with corresponding pleuritic adhesion. — Walshe.

RESPIRATION, LUCTUEUSE, see *Luctueux* — r. Metallic, *Tintement métallique* — r. *Nulle*, see Murmur, respiratory.

RESPIRATION PROOF, Docimasia pulmonum.

RESPIRATION, PUERILE, see Puerile — r. *Râpeuse*, see Murmur, respiratory — r. *Rude*, see Murmur, respiratory — r. *Silencieuse*, see Murmur, respiratory — r. *Saccadée*, R. jerking — r. *Soufflante*, Murmur, respiratory — r. *Supplémentaire*, see Puerile — r. Tubal, see Murmur, respiratory — r. Wavy, Respiration, jerking.

RESPIRATOIRE, Respiratory.

RESPIRA'TOR, (F.) *Respirateur*. Same etymon. Various instruments, under this name, have been devised for the purpose of tempering the air before it reaches the lungs in winter. One of the best is that of Jeffrey, which is made of several layers of fine wire tissue.

RESPIRATORIUM VENTRIS, Diaphragm.

RESPIRATORIUS, Respiratory.

RES'PIRATORY, *Respirato'rius*, (F.) *Respirateur*, *Respiratoire*. Appertaining to respiration. An epithet applied to the *murmur* heard by auscultation in a healthy adult, during inspiration and expiration. It marks the entrance of the air into the cells, and its passage out of them. See Murmur.

RESPIRATORY, EXTERNAL, NERVE, see Thoracic nerves.

RESPIRATORY GANGLIA, see Encephalon.

RESPIRATORY, INTERNAL, NERVES, Diaphragmatic Nerves — r. Nerve of the face, Facial Nerve — r. Superior, nerve, Spinal Nerve.

RESPIRATORY TRACT, *Tractus respirato'rius*. The middle column of the spinal marrow, described by Sir Charles Bell as that whence the respiratory nerves originate. See Nerves.

RESPIRATUS, Respiration.

RESPIRITUS, Respiration.

RESSERRÉ, (*VENTRE*,) Constipation.

RESTA BOVIS, Ononis spinosa.

RESTAGNATIO, Eructation.

RESTAURANS, Analeptic, Corroborant.

RESTAURA'TIO, *Refec'tio*, *Refec'tus*, *Analep'sis*, *Anatrep'sis*, *Anacom'idē*, *Analte'sis*, *Anacte'sis*, *Apocatas'tasis*. Restoration of strength, after disease or great fatigue; *Epanortho'sis*, *Recrea'tio*, *Redintegra'tio*, *Restaura'tio virium*. Return of the organs to their normal condition. *Recov'ery*, *Recupera'tion*, *Repara'tion*.

RESTAURATIO VIRIUM, see Restauratio.

REST HARROW, Ononis spinosa.

RESTIFORM'IS, from *restis*, 'a rope,' and *forma*, 'shape.' Shaped like a rope, as the 'Corpora *restiformia*.'

RESTIFORMIS PROCESSUS, Coracoid.

RESTITUTIO, Reduction — r. Organica, Morioplastice — r. Partium deperditarum, Morioplastice.

RESTLESSNESS, Agitation.

RESTORATION, Restauratio.

RESTORATIVE, Analeptic, Corroborant.

RESTRICTIO INTESTINI RECTI seu ANI, Stricture of the rectum.

RESUMPTI'VUS, *Resumpto'rius*; from *re*, 'again,' and *sumere*, *sumptum*, 'to take.' Causing to resume. *Resumpti'vum*. Any agent calculated to restore flesh and strength to one who has been reduced.

RESUMPTORIUS, Resumptivus.

RESURRECTION-MAN, Resurrectionist.

RESURRECTIONIST, *Resurrection-man*, *Body snatcher*: from *re*, and *surgere*, *surrectum*, 'to arise.' An individual who violates the sanctuary of the grave to obtain subjects for dissection.

RESUSCITA'TION, *Resuscita'tio*, from *resuscita're*, (*re*, and *suscitare*, *sursum citare* seu *ciere*,) 'to move up,' 'to stir up anew.' *Revivifica'tion*. The restoration of persons, apparently dead, to life. See Asphyxia and Suffocation.

RETCHING, Vomituration.

RÊTE, Plexus — r. Malpighii, Corpus mucosum.

RETE, 'a net;' (*Retic'ulum*, 'a small net,') *Dict'yon*, (F.) *Réseau*. A name given to the interlacing and decussation of blood-vessels, lymphatics, fibres, and nerves when they form a kind of network.

RETE has also been applied to the *epiploon*. — Castelli.

RETE MAJUS, Epiploon, gastro-colic.

RETE MIRAB'ILE, (F.) *Réseau admirable*, *R. merveilleux*. A name given to the ramifications and anastomoses of the internal carotid and vertebral arteries at the base of the brain.

RETE MIRABILE seu RETE VASCULO'SUM MALPIG'HII is the plexus formed on the cells of the lungs by the minute ramifications of the pulmonary artery.

RETE MUCOSUM, Corpus mucosum.

RETE TESTIS, *Rete Vasculo'sum Testis* seu *Halleri*. An irregular plexus or network, formed by the communication of the *Vasa recta*, *Tu'buli* seu *Duc'tuli recti*, at the upper and back part of the testicle. These Vasa recta are sent out at the back part of the testicle, from the convoluted seminal tubes. The Rete Vasculosum testis sends out from twelve to eighteen straight tubes, called *Vasa efferentia*, which convey the semen from the testes to the epididymus.

RETENTIO, Retention — r. Aerea, Dyspnœa — r. Alvina, Constipation — r. Bilis, Ischocholia.

RETENTIO FLUXUS HÆMORRHOIDALIS. Suppression of the hæmorrhoidal flux.

RETENTIO FŒTUS, Dystocia — r. Lactis, Ischogalactia — r. Lochiorum, Ischiolochia — r. Mensium,

see Amenorrhœa — r. Spermatis, Ischospermia — r. Sudoris, Hydroschesis.

RETEN'TION, *Reten'tio, Apolep'sia, Apolep'sis,* from *retinere, retentum, (re,* and *tenere,)* 'to hold back.' Accumulation of a solid or liquid substance, in canals intended for its excretion, or in a reservoir, intended to contain it for a short period.

RETENTION OF URINE; *Paru'ria Retentio'nis vesica'lis, Ischu'ria vesica'lis, Retentio Uri'næ,* (F.) *Rétention d'urine.* A disease in which the urine accumulated in the bladder cannot be evacuated; or, at least, cannot be passed without extreme difficulty. In the former case, the retention is said to be *complete;* in the latter, *incomplete.* Many writers have distinguished three degrees of this affection, to which they have given the names *Dysury, Strangury,* and *Ischury.* Retention of urine may depend upon loss of contractility, paralysis of the bladder, &c., or on some obstacle to the passing of the urine, as in cases of pressure of the womb on the bladder, of tumours in its vicinity, foreign bodies in its cavity, inflammation of the urethra, swelling of the prostate, stricture, &c. The pain is extremely violent, and the bladder may be found distended above the pubis. The treatment consists in introducing the catheter, or puncturing the bladder, and in combating the cause, which has produced the retention, by particular means adapted to each case.

RETENTISSANT, Resonant.

RETENTISSEMENT, Resonance — *r. Autophonique,* see Autophonia.

RETIA UTERI, see Uterus.

RETIC'ULAR, *Re'tiform, Reticula'ris, Ret'inus, Amphiblestroï'des, Dyctoï'des, Rctifor'mis,* from *rete,* (diminutive *reticulum,*) 'a net.' That which resembles a net. An epithet applied to many structures in the body.

RETICULAR BODY, Corpus mucosum — r. Substance, Cellular tissue.

RETICULARIA OFFICINALIS, Lichen pulmonarius.

RETIC'ULUM: diminutive of *rete,* 'a net.' The *Bonnet* or *Honeycomb bag* or *stomach,* (Sc.) *Kingshood,* (F.) *Bonnet, Réseau* — the second stomach of the ruminant animal. See also, Epiploon, and Rete.

RETICULUM CUTANEUM, Rete mucosum — r. Mucosum, Rete mucosum.

RETIFORM, Reticular.

RET'INA, from *rete,* 'a net;' *Tu'nica ret'ina* seu *reticula'ris* seu *retifor'mis* seu *in'tima* seu *ner'vea ocu'li, Involu'crum reti compara'tum, Vericula'ris membra'na, Amphiblestroï'des membrana,* (F.) *Rétine.* A soft, pulpy, grayish, semi-transparent, very thin membrane; extending from the optic nerve to the crystalline, embracing the vitreous humour, and lining the choroid; without, however, adhering to either of those parts. It terminates by a defined edge — *margo denta'tus* — at the posterior extremities of the ciliary processes. It is constituted, according to most anatomists, by the expansion of the optic nerve. The retina appears to be formed of several laminæ; so joined together, that it is difficult to discriminate them. The one — the innermost — is medullary, and pulpy; the other — the outer — is stronger, and fibro-vascular. The retina is the essential organ of vision; on it the images of objects are impressed. Both it and the optic nerve are devoid of general sensibility. They may be punctured or lacerated without pain being experienced. The nerve of general sensibility distributed to the eye is the fifth pair.

RETINACULA, see Retinaculum — r. Morgagnii, see Frænа of the valve of Bauhin.

RETINAC'ULUM, from *retinere, (re,* and *tenere,)* 'to hold back.' A surgical instrument, formerly used in the operation of castration; and in that of hernia, to prevent the intestines from falling into the scrotum. — Scultet. *Retinacula* are also band-like extensions of a cellulo-membranous structure, which seem to suspend the ovum in the Follicle of De Graaf. They appear to correspond to the chalazæ of the egg of the bird.

RETINACULUM, *Bride.*

RETINAC'ULUM TEN'DINUM PERONEO'RUM, *Vagi'na malleola'ris extern'a.* The ligamentous sheaths that retain in situ at the outer ankle the tendons of the peroneal muscles.

RET'INAL, *Retina'lis.* Relating or appertaining to the retina.

RÉTINE, Retina.

RETINI'TIS, *Inflamma'tio Ret'inæ, Amphiblestroidi'tis, Dictyi'tis,* (F.) *Rétinite,* from *retina* and *itis,* a suffix denoting inflammation,—a term of hybrid formation. Inflammation of the retina; an uncommon affection, except as an accompaniment of other forms of ophthalmia.

RÉTINOÏDE, see *Rhétinoïde.*

RÉTINOLÉ, see *Rhétinolé.*

RETINOS'COPY, *Retinoscop'ia,* from *retina,* and σκοπεω, 'I view.' Examination of the retina.

RETINUS, Reticular.

RETORT', *Retor'ta, Batia, Cornu, Cornu'ta, Cornes'ta, Cornumusa,* (F.) *Cornue,* from *retorqueo, (re.* and *torqueo, tortum,)* 'I bend back.' A vessel, commonly of glass or earthenware, employed in distillation. It may be *plain,* or have a *tubulure* for admitting substances whilst the distillation is going on. In the latter case, it is said to be *tubulated,* (F.) *Cornue tubulée.*

RETRAC'TION, *Retrac'tio,* from *retrahere, (re,* and *trahere, tractum,)* 'to draw back.' State of a part, when drawn towards the centre of the body or backwards; — as retraction of the testicles. Sometimes it is used synonymously with *shortening* or *drawing up;* as in *retraction* of the thigh.

RÉTRACTION DE LA MATRICE, Retroversio uteri.

RETRACTOR ANGULI ORIS, Buccinator.

RET'RAHENS AURIS, *Poste'rior* seu *Triceps Auris, Tricauda'lis, Retrahens Auric'ulæ* seu *Auriculam, Secun'dus propri'orum Auric'ulæ, Bicauda'lis, Dep'rimens Auric'ulæ, Proprius Auris externæ,* (F.) *Mastoïdo-conchinien, Mastoïdo-auriculaire* (Ch.), *Auriculaire postérieur.* It consists of one or more small fasciculi or fleshy, thin, somewhat irregular fibres, situated behind the ear. These are attached to the mastoid process, and pass horizontally forwards, to terminate at the convexity formed by the concha of the ear. If this muscle had any use, it would carry the ear backwards.

RETRAIT VENTRICULAIRE, Heart, hypertrophy of the.

RÉTRÉCISSEMENT, Arctatio, Stricture — *r. de l'Urèthre,* Urethrostenosis.

RETRIMENTA VESICÆ, Urine.

RETRIMENTUM, Excrement

RETROCES'SION, *Retroces'sio, Retroces'sus, Retrogres'sus,* from *retrocedere, retrocessum, (retro,* 'backwards,' and *cedere,* 'to give place.') The act of going back. A disappearance or metastasis of a tumour, eruption, &c., from the outer part of the body to the inner.

RETROCESSUS, Retrocession.

RETROFLEXIO UTERI, see Retroversio uteri.

RETROGRESSUS, Retrocession.

RETROPHARYNGE'AL, *Retropharynge'us,* from *retro,* 'backwards,' and *pharynx,* 'the pharynx. Relating to parts behind the pharynx,—

as '*retropharyngeal* abscess,'—an abscess behind the pharynx.

RÉTROPULSION DE LA MATRICE, Retroversio uteri

RETRO-U'TERINE, *Retro-uteri'nus*, (F.) *Rétro-utérin*, from *retro*, and *uterus*. Behind the uterus, as *retro-uterine abscess*, (F.) *Abcès rétro-utérin*; — an abscess seated behind the uterus.

RETROVACCINA'TION, from *retro*, 'backwards,' and *vaccination*. Vaccination with matter obtained from the cow, after inoculating the animal with vaccine matter from the human subject.

RETROVER'SIO U'TERI, (*retro*, 'backwards,' and *vertere, versum*, 'to turn.') *Retroversion of the Uterus, Ædopto'sis Uteri retrover'sa, Anapol'isis* seu *Anapodis'mus Uteri*, (F.) *Rétroversion, Rétraction, Obliquité* ou *Rétropulsion de la Matrice*. A change in the position of the uterus, so that the fundus of the organ is turned towards the concavity of the sacrum, whilst the neck is directed towards the symphysis pubis. This displacement is commonly attended with constipation, tenesmus, and retention of urine. Its usual period of occurrence is between the third and fourth months of pregnancy; before the uterus has escaped above the superior aperture of the pelvis. In the treatment, the catheter must be regularly used twice a day, until the uterus, by its growth, rises above the pelvis. The catheter should be small, flat, and curved considerably more than common, in consequence of the distorted course of the urethra. The bowels must be kept open; and absolute rest, in a recumbent posture, be enjoined. Should it be impracticable to draw off the urine, attempts must be made to replace the uterus. The woman being on her hands and knees, the fore and middle fingers of the accoucheur's left hand are to be passed up the rectum to the fundus uteri; which they must elevate, whilst the cervix uteri is carefully depressed by two fingers of the right hand in the vagina. Should the fingers employed to elevate the fundus not be long enough to effect this object, a piece of whalebone may be substituted, having a small piece of sponge attached to one extremity as a pad.

A simple inclination, or bending of the uterus, backwards, is termed *Retroflex'ion of the U'terus, Retroflex'io Uteri*: not unfrequently, however, this is used synonymously with Retroversion of the Uterus.

RÉTROVERSION DE LA MATRICE, Retroversio uteri.

REUNIO, Synthesis—r. Partium separatarum, see Synthesis — r. per Primam intentionem, see Intention—r. per Secundam intentionem, see Intention — r. Vasorum, Anastomosis.

RÉUNION PRIMITIVE, see Intention — *r. Secondaire*, see Intention.

REVACCINATION, see Vaccina.

REVALENTA ARABICA, see Ervum.

RÉVASSERIE, Incoherence; see Somnium.

RÊVE, Somnium.

RÉVEIL, see Sleep—*r. en Sursaut*, see Sleep.

REVELLENT, Derivative.

RÊVERIE, Aphelxia.

REVERY, Aphelxia.

REVIVIFICATION, Resuscitation.

RÉVULSIF, Derivative.

REVUL'SION, *Revul'sio*, from *re*, and *vellere, vulsum*, 'to pluck;' *Antis'pasis*. The act of turning the principle of a disease from the organ in which it seems to have taken its seat. Rubefacients, vesicatories, bleeding in the foot, &c., are often used for this purpose. See Derivation.

REVULSIVE, Derivative — r. Bleeding, see Bloodletting.

REVULSORIUS, Derivative.

REX AMARORUM, Soulamen amara—r. Metallorum, Aurum.

REYNOLDS'S SPECIFIC, see Vinum colchici.

REZZLE, Wheeze.

RHA, Rheum.

RHABARBARUM, Rheum — r. Album, Convolvulus mechoacan — r. Antiquorum, Rheum Rhaponticum—r. Dioscoridis, Rheum Rhaponticum — r. Monachorum, Rumex patientia — r. Nigrum, Convolvulus jalapa—r. Pauperum, Thalictron—r. Sibericum, Rheum—r. Tartaricum, Rheum — r. Turcicum, Rheum.

RHABARBE, Rheum — *r. Blanche*, Convolvulus mechoacan — *r. Fausse*, Thalictron — *r. des Indes*, Convolvulus mechoacan — *r. des Moines*, Rumex Alpinus — *r. Sauvage*, Rumex patientia.

RHABDOIDES (SUTURA), Sagittal suture.

RHABILLEUR, *Renouer*.

RHACHETÆ, Rachitæ.

RHACHETRUM, Medulla spinalis.

RHACHIÆI, Rhachitæ.

RHACHIAGRA, Rachisagra.

RHACHIALGIA, Rachialgia, Rhachiodynia, Spinal irritation.

RHACHIALGITIS, Spinal irritation, Myelitis.

RHACHIDAGRA, Rachisagra, Rachialgia, Rhachiodynia.

RHACHIOCYPHOSIS, Gibbositas.

RHACHIODYN'IA, from '*ραχις*, 'the vertebral column,' and *οδυνη*, 'pain;' *Rhachial'gia*. Pain in the vertebral column.

RHACHIOMYELITIS, Myelitis.

RHACHIOPLEGIA, Paraplegia.

RHACHIOSCOLIOMA, Scoliosis.

RHACHIOSCOLIOSIS, Scoliosis.

RHACHIOSTROPHO'SIS, from '*ραχις*, 'the vertebral column,' and *στρεφω*, 'I turn;' *Contortio colum'næ vertebra'lis*. Deviation of the vertebral column.

RHACHIOT'OMUS, *Rhachiot'omum*, from '*ραχις*, 'the vertebral column,' and *τομη*, 'incision.' An instrument for opening the vertebral column.

RHACHIPA'GIA, *Rachipa'gia*, from '*ραχις*, 'the spine,' and *πηγω*, 'I fasten.' A monstrous union of two fœtuses, in which they are connected at the spine.

RHACHIPARALYSIS, Paraplegia.

RHACHIPHYMA, Rachiphyma.

RHACHIRRHEUMA, Lumbago.

RHACHIS, Vertebral column — r. Nasi, see Nasus.

RHACHISAGRA, Rachisagra.

RHACHI'TÆ, from '*ραχιτης*, appertaining or relating to '*ραχις*, 'the vertebral column;' *Rhachiæ'i, Rachi'tæ, Rhache'tæ*, or *Rachiæ'i*. The muscles of the spine.

RHACHITES, Medulla spinalis.

RHACHITICUS, Rachiticus.

RHACHITIS, Rachitis — r. Adultorum, Mollities ossium — r. Spinalis, Rachisagra.

RHACHITISMUS, Rachitis.

RHACHOSIS, Rachosis.

RHACHUS, *Rhacus, Rhagus*, from '*ραγω*, or '*ρηγνυμι*, 'to break.' A wrinkle. A laceration of the skin. A lacerated ulcer—*ulcus lac'erum*.

RHACUS, Rhachus, Wrinkle.

RHÆBOCRANIA, Torticollis.

RHAG'ADES, '*ραγαδες*, *Rhaga'dia*, from '*ραγω* or '*ρηγνυμι*, 'to break or rend;' *Scissu'ræ, Fissu'ræ, Fimæ*. Ruptures, chaps, or narrow and long ulcers, which form near the origin of mucous membranes, especially around the anus, and which are generally owing to the syphilitic virus.

RHAGADES, see Fissure.

RHAGĒ, *Ragē*, '*ραγη*. Same etymon. A suffix denoting violent rupture or discharge, as in Hemorr*hage*, Menorr*hagia*, &c.

RHAGE, Fissure.

RHAGES, Uvæ passæ.

RHAGICUS, Rhagoides.

RHAGODEITIS, Uveitis.

RHAGOÏ'DES, *Rhago'des, Rhagoïdeus, Rha'gicus*, from *'ραξ, 'ραγος*, 'a berry,' 'a grape.' Grape-like; as *Tunica Rhagoides*: the uvea. Also, the choroid coat of the eye.

RHAGUS, Rhachus, Wrinkle.

RHAMNI BACCÆ, see Rhamnus—r. Succus, see Rhamnus.

RHAMNUS, *'ραμνος, R. cathar'ticus, Spina cervi'na* seu *domce'tica* seu *infecto'ria, Rhamnus soluti'vus, Cervispi'na, Buckthorn, Purging buckthorn*, (F.) *Nerprun purgatif, Bourgépine, Épine de cerf. Family*, Rhamnaceæ. *Sex. Syst.* Pentandria Monogynia. The berries — *Rhamni Baccæ*—have a faint and disagreeable odour; and bitterish, nauseous taste. Their juice — *Rhamni Succus* — is cathartic, and apt to excite griping, which must be obviated by the use of diluents.

RHAMNUS ALATER'NUS, *R. Hispan'icus, Alater'nus latifo'lius, Common alaternus*, (F.) *Alaterne*. The leaves have been used as detergents and astringents, in the form of gargle especially.

RHAMNUS FRAN'GULA, *Black Alder, Frangula Alnus, Alnus Nigra*, (F.) *Aune noir, Bourdane, Bourgène*. All the parts of this tree, as well as of the common alder, are astringent and bitter. The bark is most so. The inner, yellow bark of the trunk or root acts as a cathartic. It has also been employed as an anthelmintic.

RHAMNUS HISPANICUS, R. alaternus—r. Jujuba, see Jujube—r. Lotus, see Jujube—r. Ziziphus, see Jujube.

RHANTER, Canthus, (greater.)

RHAPHANEDON, Raphanedon.

RHAPHANIA, Raphania.

RHAPHANIS, Raphanus hortensis.

RHAPHANUS, Raphanus hortensis.

RHAPHE, Raphe, Suture.

RHAPHOSYMPH'YSIS, from *ραφη*, 'suture,' and *συμφυσις*, 'union.' Union by suture,—as of the bones of the cranium.

RHAPHYS, Raphanus hortensis.

RHAPONTICUM, Rheum Rhaponticum — r. Vulgare, Centaurea centaurium.

RHAPONTIQUE, Rheum rhaponticum.

RHAPS, Raphanus hortensis.

RHAPYS, Raphanus hortensis.

RHATANIA, Krameria ratanhia.

RHAX, see Vitis vinifera.

RHEGE, Cramp, Contusion, Laceration.

RHEGMA, Cramp, Contusion, Laceration, Rhexis — r. Ligamentare, Apospasma.

RHEGMUS, Cramp, Contusion, Laceration.

RHEMBASMUS, Somnambulism.

RHEMBÉ, *Rhembus*, 'a wandering about,' from *'ρεμβειν*, 'to wander about.' Irregularity in the return of febrile paroxysms.

RHEMBUS, Rhembe.

RHENCHUS, Rattle, Snoring.

RHENXIS, Rattle, Snoring.

RHEON, Rheum.

RHETINE, Resin.

RHETINOCERON, Resinatum.

RHÉTINOLÉ. A name given by M. Béral to a medicine, which results from the union of a resin with other medicinal substances. The *Rhétinolés* of Béral differ from the *Rhétinoïdes* in containing but one resin, whilst in the latter there are several.

RHÉTINOÏDES, see *Rhétinolé*.

RHETINOTON, Resinatum.

RHEUM, (pronounced *room*,) *Rheu'ma, 'ρευμα*, (F.) *Rhume*; from *'ρεω*, 'to flow.' Any thin watery discharge from mucous membranes or skin; as the thin discharge from the air passages arising from cold.

RHEUM, SALT. A popular name in the United States, like 'tetter,' for various cutaneous affections of the eczematous and herpetic forms more especially. It is at times applied to a kind of chronic psoriasis; and likewise to cutaneous affections in those who immerse the hands in metallic or acid solutions. Webster defines it "a vague and indefinite popular name, applied to almost all the non-febrile cutaneous eruptions which are common among adults, except ringworm and itch."

RHE'UM, *Rhabar'barum, Rheon, Rha, Rhœum, Lap'athum oriental'e* seu *Chinen'se, Rhabar'barum ve'rum* seu *Tartar'icum* seu *Siber'icum* seu *Tur'cicum, Rhubarb*, (F.) *Rhabarbe, Rhubarbe*. From *Rha*, now called Wolga, a river in Russia from which it was first brought. *Ord.* Polygonaceæ. *Sex. Syst.* Enneandria Trigynia. The root—*Rhei'im*—is the part used in medicine. Its odour is aromatic, peculiar, and rather nauseous; taste, somewhat aromatic, subacrid, bitterish, and astringent. It colours the saliva and the urine yellow. It is easily pulverized, and forms a powder of a bright buff-yellow colour. Both water and spirit extract its virtues. Rhubarb root is purgative, stomachic and astringent. [?] It is chiefly used for the properties first mentioned. Externally, the powder is sometimes sprinkled over ulcers, to assist their granulation. Dose, ℈j to ʒss of the powder. In a smaller dose, it is stomachic.

Numerous species of Rheum, *Rh. palmatum, Rh. undulatum*, and *Rh. compactum*, have purgative roots.

The rhubarbs most used in the United States are the *Chinese* or *India Rhubarb* — *Rheum Sinen'se* seu *In'dicum*; the *Russian, Turkey* or *Bucharian Rhubarb*—*Rheum Rus'sicum* seu *Tur'cicum*; and *European Rhubarb*.

RHEUM COMPACTUM, Rheum — r. Indicum, see Rheum — r. Palmatum, Rheum.

RHEUM RHAPON'TICUM, *Rhapon'tic Rhubarb; Rhapon'ticum, Rhabar'barum Dioscor'idis* seu *Antiquo'rum*, (F.) *Rhapontique, Rhapontic, Rapontic*. The root of this seems to have been the rhubarb of the ancients. It is more astringent than that of the rheum palmatum, and less purgative; for the latter purpose, two or three drachms being required for a dose. *French, Rhapontic*, or *Krimea Rhubarb*, is obtained from this species, as well as from *Rh. undulatum*, and *Rh. compactum*.

RHEUM RUSSICUM, see Rheum—r. Sinense, see Rheum—r. Turcicum, see Rheum—r. Undulatum, see Rheum.

RHEUMA, Catarrh, Diarrhœa, Rheum, Rheumatism. Also, inflammation of a fibrous tissue, as in rheumatism and gout. — Fuchs.

RHEUMA CATARRHALE, Bronchitis, (chronic) —r. Epidemicum, Bronchitis, chronic, Catarrh, epidemic — r. Pectoris, Catarrh — r. Uteri, Leucorrhœa.

RHEUMAPYRA, Rheumatism, acute.

RHEUMARTHRITIS, see Rheumatism, acute.

RHEUMARTHROSIS, see Rheumatism, acute.

RHEUMATALGIA, Rheumatism, chronic—r. Arthritica, see Rheumatism, acute.

RHEUMAT'IC, *Rheumat'icus, Rheumatis'mal*, (F.) *Rhumatismal, Rhumatique*. Belonging to rheumatism; as rheumatic fever. Also, applied to one affected with rheumatism; (F.) *Rhumatisant*.

RHEUMAT'IC DIATH'ESIS, *Diath'esis rheumat'ica*. The special condition of the body that gives occasion to rheumatism. It may exist without presenting the usual phenomena in the joints; whilst the heart may be seriously affected.

RHEUMATICS, Rheumatism.

RHEU'MATISM, *Catarrhœ'a* from *'ρευμα, 'ρευματος*, 'a defluxion, catarrh.' *Dolor Rheumat-*

ieus et arthrit'icus, (Hoffman,) *Rheumato'sis Myo'sitis, Rheuma, Myodyn'ia*, (vulg.) *Rheu'matiz, Rheumat'ice*, (F.) *Rhumatisme*. A kind of shifting phlegmasia or neuralgia, sometimes seated in the muscles, sometimes in the parts surrounding the joints; and at others, within them. Hence the names *Muscular, Articular*, and *Synovial*, which have been applied to it. The disease may be *acute*, or *chronic*.

Rheumatism of the Abdomen, Cœliorrheuma.

Rheumatism, Acute, *Rheumatis'mus acu'tus* seu *articulo'rum acu'tus* seu *universa'lis febri'lis* seu *inflammato'rius* seu *hyperesthen'icus, Arthro'sia acuta, Rheumatop'yra, Rheumap'yra, Febris rheumat'ica inflammato'ria, Syn'ocha rheumat'ica, Myoso'tis, Myi'tis, Cauma* seu *Arthri'tis rheumatismus, Arthro-rheumatis'mus, Synovi'tis rheumatisma'lis, Hæmo-arthri'tis, Rheumat'ic Fever*, (F.) *Rheumatisme aigu, Rh. articulaire aigu, Fièvre rhumatismale*, usually comes on with the ordinary symptoms of fever: soon after which, or simultaneously, or even before the appearance of febrile signs, excruciating pains are felt in different parts of the body, particularly in the larger joints, which are more or less red and swollen; the pain shifting from one to the other, at times with great rapidity. The disease rarely terminates in less than six weeks, during the greater part of which period the febrile symptoms remain severe; and what is peculiar to the disease, the skin may be covered daily with a profuse perspiration, although it feels extremely hot, and the pulse appears in no way modified by it. It is one of the essential symptoms of the affection, and consequently affords no relief. The only danger to be apprehended from acute rheumatism, notwithstanding the apparent severity of the symptoms, is the translation or extension of the disease (*metastat'ic rheu'matism*) to some internal part, especially to the heart. This tendency must always be borne in mind. *Acute* rheumatism seldom terminates in *chronic;* they who are liable to the former are rarely so to the latter, and conversely. The disease will generally run its course in spite of treatment. The usual antiphlogistic plan had better be pursued during the first days of the disease. Blood-letting may be employed, if the vigour of the patient and of the disease seem to require it; but, although the blood is generally buffy, bleeding does not usually seem to afford much relief. The bowels must be kept open; effervescent draughts be administered, and opium be given in full doses to allay pain. This is, generally, all that is necessary during the first week; after which, advantage will usually be obtained from the exhibition of the sulphate of quinia with sulphuric acid. It does not augment the excitement, and will be found proper in almost all cases. Rheumatic inflammation is very different from other varieties, and this may account for the anomaly. After a few weeks, the disease usually goes off, but leaves the patient very liable to a recurrence on slight exposures or errors of diet. At times, acute rheumatism of the joints puts on the appearance of gout, and seems to be a complication of the two affections. It is then called *Gouty* or *Arthrit'ic rheumatism* or *Rheumatic gout, Rheumatal'gia arthrit'ica, Rheumarthro'sis, Rheumarthri'tis, Arthri'tis rheumat'ica* seu *juveni'lis*.

Rheumatism of the Arm, Brachiorrheuma—r. Arthritic, see Rheumatism, acute—r. of the Bladder, Cystorrheuma—r. of the Bowels, Enterorrheuma.

Rheumatism. Cap'sular, *Rheumatis'mus capsula'ris*. Rheumatism seated in the lining membrane of the joints and bursæ of the tendons. The parts most liable to its attacks are the feet and hands, where it is generally easily recognised by the enlargement of the joints; but the peculiar characters of the disease are, perhaps, most strikingly seen when it attacks the knee.

Rheumatism of the Chest, Pleurodynia.

Rheumatism, Chronic, *Arthro'sia chron'ica, Rheumatismus chronicus* seu *nonfebri'lis* seu *vulga'ris* seu *invetera'tus* seu *habitua'lis* seu *frig''idus, Rheumatal'gia, Rhumatal'gia, Rheumatodyn'ia, Arthrodyn'ia, Arthritis arthrodynia*, (F.) *Rhumatisme chronique, Rhumatalgie*. is attended with pains in the hips, shoulders, knees, and other large joints. These are at times confined to one joint; at others, shift from one to another, without occasioning inflammation, or fever. In this manner, the complaint often continues for a great length of time, and then goes off. There is no danger attendant upon it; but the patient may become lame, and is always liable to painful recurrences. Neither variety generally terminates in suppuration; but effusion of coagulable lymph is apt to occur, so as to occasion permanent thickening of the parts. The great preventive of chronic rheumatism, and one of the most valuable cnrative agents, is flannel, worn next the skin. The whole class of rubefacients may, also, be used with advantage. The warm bath, especially the natural warm bath, the temperature of which does not vary, is perhaps the most successful remedy of all.

Rheumatism of the Extremities, Acrorrheuma—r. of the Face, Prosoporrheuma—r. Gouty, see Rheumatism, acute—r. of the Heart, Cardiorrheuma—r. Lead, see Lead rheumatism—r. of the Leg, Sceiorrheuma—r. of a Limb, Merorrheuma—r. Local, Merorrheuma—r. of the Loins, Lumbago—r. Metastatic, see Rh. acute—r. of the Neck, Torticollis—r. Partial, Merorrheuma.

Rheumatism, Preabdom'inal, (F.) *Rhumatisme pré-abdominal*. Rheumatism of the muscles of the anterior and lateral portions of the abdomen; supposed by MM. Génest and Requin to be the same as the *nervous affection of the peritoneum* of Gooch.

Rheumatism Root, Jeffersonia Bartoni.

Rheumatism of the Skin, see Dermaigia—r. Topical, Merorrheuma—r. of the Uterus, Metrorrheuma.

Rheumatism, Visceral. Rheumatism affecting the muscular or fibrous tissues of the viscera.

Rheumatism Weed, Pyrola maculata, P. umbellata.

RHEUMATISMAL, Rheumatic.

RHEUMATISMUS ABDOMINIS, Coeltorrheuma—r. Acutus, Rheumatism, acute—r. Articulorum acutus, Rheumatism, acute—r. Brachii, Brachiorrheuma—r. Cancrosus, Neuralgia faciei—r. Cervicis, Torticollis—r. Colli, Torticollis—r. Cordis, Cardiorrheuma—r. Cruris, Sceiorrheuma—r. Dorsalis, Lumbago—r. Extremitatum, Acrorrheuma—r. Faciei, Prosoporrheuma—r. Febrilis, Dengue—r. Membrorum singulorum, Merorrheuma—r. Non febrilis, Rheumatism, acute—r. Partialis, Merorrheuma—r. Pectoris, Pleurodynia—r. Phlegmonodes, Myositis—r. Spurius nervosus, Neuralgia—r. Universalis febrilis, Rheumatism, acute—r. Uteri, Metrorrheuma—r. Vesicæ urinariæ, Cystorrheuma—r. Vulgaris seu inveteratus seu habitualis seu frigidus, Rheumatism, chronic.

RHEUMATIZ, Rheumatism.

RHEUMATODYNIA, Rheumatism, chronic.

RHEUMATOPHTHAL'MIA, *Rheumophthal'mia*; from 'ῥευμα, 'ῥευματος, 'rheumatism,' and ὀφθαλμια, 'inflammation of the eyes.' Rheumatic ophthalmia.

RHEUMATOPYRA, Rheumatism, acute.
RHEUMATOSIS, Rheumatism.
RHEUMOPHTHALMIA, Rheumatophthalmia, Sclerotitis.
RHEXIS, *'ρηξις, Rhegma, Dirup'tio, Rup'tio, Ruptu'ra, Rupture.* From *'ρηγνυμι,* 'to break.' Rupture of a vessel or organ. Spontaneous opening of an abscess.
RHEXIS OC'ULI. Bursting of the eye from any cause; spontaneous or excited.
RHICNO'SIS, from *'ρικνοομαι,* 'to become wrinkled;' *Cutis corruga'tio.* Wrinkling of the skin from extenuation of the body; opposed to *εγκαισις,* or distension from repletion.
RHIGOS, Rigor.
RHIN, Nasus.
RHINAL'GIA, *Rhinodyn'ia,* from *'ρινι,* 'the nose,' and *αλγος,* 'pain.' Pain in the nose.
RHINAL'GIA AB INTRU'SIS. Pain in the nose from foreign bodies.
RHINAL'GIA VERMINO'SA. Pain in the nose from worms.
RHINAN'CHONE, *Rhinan'gia, Rhinostegno'sis;* from *'ρινι,* 'the nose,' and *αγχονη,* 'narrowness.' Contraction of the nose. Snuffles.
RHINANGIA, Rhinanchone, Snuffles.
RHINCHOS, Rostrum.
RHINENCEPHALIA, Cyclopia.
RHINEN'CHYSIS, *Rhinenchys'ia,* from *'ρινι,* 'the nose,' *εν,* 'in,' and *χυω,* 'I pour.' An infusion or injection, made into the nostrils, with a syringe called *Rhinen'chites.*
RHINES, Nares.
RHINI'TIS, *Nasi'tis,* from *'ρινι, 'ρινος,* 'the nose,' and *itis,* denoting inflammation. Inflammation of the nose. Coryza.
RHINITIS ULCEROSA, Ozæna.
RHINOBLENNORRHŒA, Rhinorrhœa.
RHINOC'ACE, *Cory'za scarlatino'sa;* from *'ονι, 'ρινος,* 'the nose,' and *κακος,* 'evil.' The offensive discharge from the nose, and other symptoms indicating a morbid condition of the Schneiderian membrane, that accompany the worst forms of scarlatina.
RHINOCATARRHUS, Coryza.
RHINOCNES'MUS, from *'ρινι, 'ρινος,* 'the nose,' and *κνησμος,* 'itching.' Itching of the nose.
RHINODYNIA, Rhinalgia.
RHINOPHO'NIA, from *'ρινι, 'ρινος,* 'the nose,' and *φωνη,* 'the voice.' A nasal voice, called, also, *Dysphonia immodula'ta nasa'lis, Porapho'nia nasa'lis* seu *res'onans, Psellis'mus na'sitas, Mycteropho'nia, Na'sitas, Vox* seu *Parala'lia nasa'lis.* Speaking through the nose.
RHINOPLAS'TIC, *Rhinoplas'tica* (ars), *Rhi'noplasty,* from *'ρινι, 'ρινος,* 'the nose,' and *πλασσω,* 'I form.' An epithet applied to the operation for forming a new nose. The *Taliacotian operation,* so called because described by Tagliacozzi. It consists in bringing down a portion of flesh from the forehead, and causing it to adhere to the anterior part of the remains of the nose.
RHINOP'TIA, from *'ρινι,* 'the nose,' and *οπτομαι,* 'I see.' The act of seeing over the nose. Squinting over the nose.
RHINORRHAGIA, Epistaxis.
RHINOR'RHAPHY, *Rhinorrhaph'ia,* from *'ρινι, 'ρινος,* 'nose,' and *'ραφη,* 'a suture.' An operation for the removal of epicanthis, which consists in pinching up a longitudinal fold of the skin, including this fold in two elliptical incisions, removing it, and bringing together the edges of the wound by harelip suture.
RHINORRHŒ'A, *Rhinoblenorrhœ'a,* from *'ρινι, 'ρινος,* 'the nose,' and *'ρεω,* 'I flow.' A discharge of limpid mucus from the nose without any inflammatory symptom. A gleet from the nose.
RHINO'SIS, from *'ρινος,* 'a skin, leather,' or from *ρικνος,* 'rugous.' The state of looseness and excess of skin observed in phthisis.—Vogel.
RHINOSTEGNOSIS, Rhinanchone.
RHIPTASMOS, Jactation.
RHIPTOLUSIA, Affusion.
RHIS, Nasus.
RHIZA, Radix.
RHIZAGRA, Punch.
RHIZO'MA, *Rhizome,* from *'ριζα,* 'a root.' The part of the root of a plant, which consists of wood or flesh, as in the carrot.
RHIZOPH'AGUS, from *'ριζα,* 'a root,' and *φαγω,* 'I eat.' One who lives on roots.
RHIZOTOMIST, see Simples.
RHIZOTOMUS, Apothecary.
RHOA, Punica granatum.
RHODELÆ'ON, *Oleum rosa'rum.* Oil of roses, or oil impregnated with roses.
RHO'DIA, *Rhodi'ola ro'sea, Rosea, Rosewort,* (F.) *Rhodiole,* from *'ροδον,* 'a rose,' owing to its odour. *Sex. Syst.* Dicœcia Octandria. The root, *Roseroot,* when dry, has a very pleasant smell, and is slightly astringent. It is not used.
RHO'DINUS, *'ροδινος, Rho'dius, Rosa'ceus, Ro'seus, Rosa'tus,* (F.) *Rosat,* Rosy. Formed of, or containing, roses.
RHODIOLA ROSEA, Rhodia.
RHODIOLE, Rhodia.
RHODITES VINUM. Wine in which roses have been macerated.
RHO'DIUM LIGNUM, *Rhodium* or *Rosewood,* from *'ροδον,* 'a rose.' The wood or root of a tree supposed to be *Genis'ta Canarien'sis* of Linnæus. (F.) *Bois de rose, Bois de Chypre. Ord.* Leguminosæ. *Sex. Syst.* Diadelphia Decandria. The essential oil is a perfume, and possesses cordial and tonic virtues. Its smell is attractive to fish, rats, &c.
RHODIUS, Rhodinus.
RHODODAPHNE, Nerium oleander.
RHODODAPHNIS, Nerium oleander.
RHODODEN'DRON CHRYSAN'THEMUM, *R. chrysan'thum* seu *au'reum* seu *officina'le, Oleander, Rose-bay, Yellow rhododendrum, Mountain Laurel,* (F.) *Rosage, R. chrysanthe, Rose de Sibérie,* from *'ροδον,* 'a rose,' and *δενδρον,* 'a tree.' *Nat. Ord.* Ericaceæ. *Sex. Syst.* Decandria Monogynia. This plant has been recommended in rheumatism, gout, and syphilis. In an overdose, it produces acro-narcotic symptoms.
RHODODEN'DRON MAX'IMUM, *Great Laurel, American Rose-bay.* An indigenous shrub, *Ord.* Ericaceæ, which flowers in July. It is stimulant and astringent, and has been used by the Indians in gout and rheumatism.
RHODODENDRON PUNCTA'TUM. Indigenous; has similar properties.
RHODOM'ELA PALMA'TA, (*'ροδον,* 'a rose, and *μελι,* 'honey,') *Dulse, Sac'charine Fucus.* One of the Algæ, eaten in large quantities throughout the maritime countries of the north of Europe, and in the Grecian Archipelago.
RHODOMELI, Mel rosæ.
RHODON, Rosa, Rosa centifolia.
RHODOSACCHARUM, Confectio rosæ gallicæ.
RHODOSTACTON, Mel rosæ.
RHODOSTAGMA, Aqua rosæ.
RHŒA, Punica granatum.
RHŒAS, see Papaver rhœas.
RHOEBDESIS, Absorption.
RHŒUM, Rheum.
RHOGMOS, Rattle.
RHOI'TES, *'ροιτης,* a wine impregnated with the pomegranate: from *'ροα,* the *Pomegranate,* — Dioscorides. A confection, made by boiling the

juice of the pomegranate in honey. — Paulus of Ægina.

RHOMBOÏDE'US, from 'ῥομβος, 'a rhombus,' whose sides are equal, with two obtuse and two acute angles. *Rhomboïdeus major* and *minor*, *Rhomboï'des*, *Cervici-dorso-scapulaire*. A muscle situate at the posterior inferior part of the neck, and at the posterior part of the back. It has a rhomboidal shape, and is attached, by its inner edge, to the posterior cervical ligament, and to the spinous processes of the last cervical vertebræ, and of the first four or five dorsal. By its outer edge, it is attached to the spinal or posterior edge of the scapula. It is divided into two fasciculi, constituting the *Rhomboïdeus major* and *Rh. minor*, the latter being situate higher than the other. This muscle draws the scapula backwards and upwards, and impresses upon it a rotatory motion, which brings its inferior angle nearer to the spine; and, consequently, depresses the anterior angle and the shoulder.

RHOMBOS, 'ῥομβος. A bandage mentioned by Galen, so called on account of its rhomboidal shape.

RHONCHAL, *Rhoncha'lis*, from *rhonchus*, 'rattle.' Relating or appertaining to rhonchus;—as '*rhonchal* fluctuation,' the fremitus that occurs through the influence of respiration as an attendant on cavernous rhonchi.—Walshe.

RHONCHUS, Rattle, Snoring, Stertor—r. Cavernous, see Gurgling—r. Cavernulous, see Gurgling.

RHONCHUS, CLICKING. A rhonchus which has been considered positively indicative of the existence of tubercles in the lungs.[?]

RHONCHUS, CREPITANS, *Râle crépitant*—r. Crepitans Redux, see Crepitant — r. Mucous, see *Râle muqueux*—r. Sibilans, see *Râle crépitant* — r. Sibilus, *Râle sibilant*—r. Sonorus, *Râle sonore* —r. Subcrepitant, see *Râle muqueux*.

RHOPALISMUS, Priapismus.

RHOPALOSIS, Plica, Pupil, Uvea.

RHOPE, Congestion.

RHOTACISMUS, Rotacism.

RHUBARB, Rheum — r. Chinese, see Rheum —r. French, Rheum Rhaponticum — r. India, see Rheum — r. Krimea, Rheum Rhaponticum —r. Monk's, Rumex Alpinus, Rumex patientia— r. Poor man's, Thalictron — r. Rhapontic, Rheum Rhaponticum—r. Russia, see Rheum—r. Turkey, see Rheum—r. Wild, Convolvulus panduratus.

RHUBARBE, Rheum—*r. Fausse*, Thalictron — *r. des Indes*, Convolvulus mechoacan — *r. des Pauvres*, Thalictron — *r. Sauvage*, Rumex patientia.

RHUE, Ruta.

RHUM, Rum.

RHUMAPYRA, Rheumatism, acute.

RHUMATALGIA, Rheumatism, chronic.

RHUMATALGIE, Rheumatism, chronic.

RHUMATIQUE, Rheumatic.

RHUMATISANT, Rheumatic.

RHUMATISMAL, Rheumatic.

RHUMATISME, Rheumatism — *r. Aigu*, Rheumatism, acute—*r. Articulaire aigu*, Rheumatism, acute—*r. Chronique*, Rheumatism, chronic—*r. Prèabdominale*, Rheumatism, præabdominal—*r. d. l'Utérus*, Metrorrheuma.

RHUME, Rheum — *r. de Cerveau*, Coryza — *r. de Poitrine*, Catarrh.

RHUS COPALLINA, see Rhus glabra.

RHUS CORIA'RIA, *Adu'rion*, *Sumach*, *Shumach*, *Elm-leaved Sumach*, (F.) *Sumac des Corroyeurs*, *Roure*. *Ord.* Anacardiaceæ. *Sex. Syst.* Pentandria Monogynia. This is the only species of the genus rhus that is innocent. Both the leaves and berries have been used as astringents and tonics.

RHUS GLABRA, '*Smooth Sumach*.' Indigenous, and officinal in the Pharmacopœia of the United States. An infusion of the fruit — *Rhus glabrum* [?] — which is acid and astringent, has been used as a cooling drink, and as a gargle. An infusion of the inner bark of the root has been recommended in mercurial ptyalism.

RHUS RADI'CANS, *R. vernix*, *Poison vine* (*America*). This plant is poisonous (see Poisons, Table of), and is extremely acrid, when applied to the skin, producing erysipelas and vesications, and has been used, like the next variety, in paralysis, and other nervous affections.

RHUS SYLVESTRIS, Myrica gale.

RHUS TYPHI'NA, *Stag's horn Sumach*, and RHUS COPALLI'NA, *Mountain Sumach*, have similar properties.

RHUS TOXICODEN'DRON, *Toxicoden'dron*, *Poison Oak* (*America*), (F.) *Sumac vénéneux*. This plant has been used in paralytic affections and cutaneous eruptions. It is poisonous, like the last. Dose, gr. ss. to gr. iv.

RHUS TYPHINA, see Rhus glabra.

RHUS VENENA'TA, *Poison Sumach*, and RHUS PU'MILA, have similar properties.

RHUS VERNIX, Rh. radicans.

RHYAS, from 'ῥεω, 'I flow.' An ulceration of the lachrymal caruncle, with a constant flow of tears.—Blancard.

RHYPARIA, Rupia, Sordes primarum viarum

RHYPIA, Rupia.

RHYPOS, Sordes.

RHYPTICA, Detergents.

RHYPTICUS, Abstergent.

RHYSIS, Flux.

RHYSMUS, Rhythm.

RHYSSEMA, Wrinkle.

RHYTHM, *Rhythmus*, 'ρυθμος, *Rhysmus*, (F.) *Rhythme*, 'measured movement.' The order of proportion, as regards time, which reigns between the different movements of an organ — as of the organism in health and disease. Thus, rhythm is applied to the diurnal variations of the pulse; and to the paroxysmal movements of an intermittent.

RHYTHMICAL, Periodical.

RHYTHMICAL CONTRACTIONS OF MUSCLES are those that succeed one another after regular intervals.

RHYTHMUS, Rhythm.

RHYTIDOSIS, Rutidosis.

RIB, Costa—r. False, see Costa — r. Floating, see Costa — r. Sternal, see Costa — r. True, see Costa.

RIBES GROSSULARIA, R. uva crispa.

RIBES NIGRUM, *R. ol'idum*, *Grossula'ria nigra*, *Cassis*, *Black Currant*, *Gazel*, (F.) *Groseillier noir*. *Ord.* Grossulaceæ. *Sex. Syst.* Pentandria Monogynia. The berries—*Black currants*—have been recommended in sore-throat, as diuretics. The leaves have been advised for the same purpose. They are chiefly used as preserves.

RIBES OLIDUM, R. nigrum — r. Officinale, R. rubrum.

RIBES RUBRUM, *R. officina'lē* seu *vulga'rē*, *Grossula'ria non spino'sa* seu *rubra*, *Red currant*, (F.) *Groseillier rouge*; of which the *White* is only a variety. It is cultivated, and affords an agreeable fruit—*Red currants*, (F.) *Groseilles*. It possesses the qualities of the subacid fruits in general, and makes an excellent preserve.

RIBES UVA CRISPA, *R. grossula'ria*, *Common gooseberry*. The fruit — *Grossula'ria*, (F.) *Groseille à maquereau*, *Gooseberry*, *Feaberry* — is agreeable, and makes a good preserve.

RIBES VULGARE, R. rubrum.

RIBGRASS, Plantago lanceolata.

RIBS, NECK OF THE, Collum costarum — r. Short, see Costa.

RIBWORT, Plantago Virginica.

RICE, Oryza—r. Disease, Cholera—r. Ground, see Oryza—r. Jelly, see Oryza.

Rice Water, see Oryza. The evacuations of cholera have been termed — from their resemblance to rice-water — '*rice-water* discharges;' and in India, '*congee* discharges;' — *congee* in Hindoostanee meaning 'rice-water.'

Rice, Wild, Zizania aquatica.'

RICHARDSONIA, see Ipecacuanha.

RICHLEAF, Collinsonia Canadensis.

RICHWEED, Actæa racemosa, Ambrosia trifida, Collinsonia Canadensis, Pilea pumila.

RICIN, Ricinus communis.

RICINOIDES, Jatropha curcas.

RIC"INUS COMMU'NIS, from *ricinus*, 'a tick,' which its seed resembles; *Ricinus vulga'ris* seu *vir'idis*, *Palma Christi*, *Catapu'tia major*, *Faba purga'trix*, *Cerua*, *Kerua*, *Cici*, *Castor oil plant*, (F.) *Ricin*, *Fève purgatif*. *Ord.* Euphorbiaceæ. *Sex. Syst.* Monœcia Monadelphia. Castor-oil seeds, whence the oil is obtained, are inodorous; taste acrid and slightly sweetish. One or two seeds — *Sem'ina Catapu'tiæ majo'ris* seu *Ric"ini vulga'ris*—will act as a cathartic; but the oil is alone used. It is obtained by bruising the castor-seeds, previously decorticated, and then expressing the oil without the application of heat. Recently-drawn castor oil, *Oleum de kerva* seu *kervi'num*, *Alker'va*, *O. Ric"ini* seu *Cic"inum* seu *Palmæ liq'uidum* seu *de Palmâ Christi*,—in the United States often called simply *Oil*, (F.) *Huile de Ricin*—is inodorous and nearly insipid. It is cathartic, operating speedily, and may be used in all cases where powerfully stimulating purgatives would be injurious. Dose, f℥j to f℥iss. Hufeland recommends that a drop of croton oil shall be added to an ounce of the oil of poppy, and that the mixture shall be called *O'leum Ric"ini Officina'lē*.

At the Cape of Good Hope the oil is obtained from *Ricinus liv'idus*.

A variety of Ricinus at Cape Verd is employed by the inhabitants to increase the secretion of milk. It is applied in the form of poultice, made with the green leaves, to the mammæ, or of a strong decoction, with which the mammæ and the external parts of generation are washed.

Ricinus Lividus, see Ricinus communis — r. Major, Jatropha curcas — r. Minor, Jatropha manihot — r. Viridis, R. communis — r. Vulgaris, R. communis.

RICK, Malleolus.

RICKETS, Rachitis.

RICKETY, Rachiticus.

RICTUS LUPINUS, see Harelip.

RIDE, Wrinkle.

RIDÉ, Wrinkled.

RIDING (of Bones). *Ossium superpositi"io*, (F.) *Chevauchement*. Displacement of the fragments of a bone, chiefly produced by the contraction of muscles, which occasions shortening of the limb; the fractured extremities *riding* over each other instead of being end to end.

Riding-hag, Incubus.

RIFE, (Sax.) ῥýfe, (Prov.) *Brief*. Prevailing; as applied to diseases.

RIFT, Eructation.

RIGIDITAS, Rigidity.

Rigiditas Articulo'rum, *Ancylo'sis spu'ria*. Stiffness of the joints. False ancylosis.

RIGIDITÉ, Rigidity—r. *Cadavérique*, see Rigidity.

RIGIDITY, *Rigid'itas*, from *rigere*, 'to stiffen,' (F.) *Rigidité*, *Roideur*, *Raideur*. Great stiffness of fibre, or want of suppleness. The stiffness of the dead body, *Cadav'eric rigidity*, (F.) *Raideur* ou *Rigidité cadavérique*, is one of the signs of the cessation of life. It may be removed, however, for a time, by the injection into the arteries of oxygenated defibrinated blood. See Rigor mortis.

RI'GOR, *Rhigos*, *Algor*, *Coldness*, *Cheim'ia*, (F.) *Frisson*. Same etymon. Sensation of cold, with involuntary *shivering* or *shaking* of the whole body:—a symptom of fever. A slighter degree, and at times full rigor, is occasionally termed a *chill*, (Prov.) *cream*; *frigus ten'uē*, *perfrigera'tio*.

Rigor Artuum, Contractura — r. Cadaverosus, Rigor mortis — r. Corporis mortui, Rigor mortis — r. Emortualis, Rigor mortis — r. Maxillæ inferioris, Trismus.

Rigor Mortis, *R. cor'poris mor'tui* seu *cadavero'sus* seu *emortua'lis*, *Necronarce'ma*, (F.) *Roideur* ou *Raideur* ou *Rigidité cadavérique*. 'Stiffness of death.' Death stiffening. The rigidity of limbs that occurs on dissolution. See Rigidity.

Rigor Nervorum, Tetanus — r. Nervosus, Tetanus.

RIMA, *Schisma*, *Schiza*; 'a fissure, a cleft;' as *Rima* seu *Ri'mula Glot'tidis* seu *Laryn'gis*, the opening of the glottis. *Rima* seu *R. magna vulvæ*, *Introi'tus*, *Sinus vulvæ*, *Scapha*, *Scaphus* seu *Fissu'ra magna* seu *Scissu'ra vulvæ*, *Schiza*, the opening of the vulva. See Vulva. *Rima oris*, the opening of the mouth.

Rima Canalis Orbitarii, Suborbitar fissure — r. ad Infundibulum, Vulva cerebri — r. Laryngis, Rima glottidis — r. Magna Vulvæ, see Rima — r. Oris, see Rima — r. Transversa Magna Cerebri, Fissure, transverse, of the brain — r. Vulvæ, see Rima.

RIMÆ, Rhagades.

RIMULA GLOTTIDIS, Rima glottidis — r. Laryngis, Rima glottidis.

RINÆUS, Compressor naris.

RINCHOS, Rostrum.

RING, (Sax.) hring, ring, (Germ.) Ring, *Cricos*, (F.) *Anneau*. A name given to natural, circular, or roundish apertures, with muscular or aponeurotic parietes, which serve for the passage of some vessel or canal: — as the *umbilical ring*, *inguinal ring*, &c.

RINGS, FESTOONED, Annuli fibro-cartilaginei—r. Fibro-cartilaginous, Annuli fibro-cartilaginei.

RING-FINGER, Annular finger.

RINGMAN, Annular finger.

RINGWORM, Herpes circinatus — r. of the Scalp, Porrigo scutulata — r. Ulcerative, Herpes exedens — r. Vesicular, Herpes præputii.

RIO VINAIGRO, *Passambio*. A stream of some size in New Grenada, which is strongly impregnated with sulphuric acid.

RIRE ou *RIS*, Risus—r. *Canin*, Canine laugh — r. *Moqueur*, Canine laugh — r. *Sardonien*, Canine laugh, Risus sardonicus — r. *Sardonique*, Canine laugh.

RISAGON, Cassumuniar.

RISIGALLUM, Orpiment.

RISING, see Regurgitation — r. of the Lights, Cynanche trachealis.

Rising or Eleva'tion of the Pulse, *Pulsûs eleva'tio*. The pulse is said to rise, when it becomes more full and frequent, as occurs in the exacerbation of acute diseases.

RISO'RIUS NOVUS. Santorini gives this name to a portion of the platysma myoides, which passes from the cheek towards the commissure of the lips.

RISSIGALLUM, Orpiment.

RISUS, from *ridere*, *risum*, 'to laugh.' *Gelus*, *Laughing*, *Laughter*, *Laugh*, (F.) *Rire* ou *Ris*. An involuntary movement of the muscles of the face, and of the lips in particular, accompanied with a sonorous and interrupted respiration, commonly indicating mirth and satisfaction.

Risus Apium, Ranunculus sceleratus — r. Caninus, Canine laugh — r. Involuntarius, Canine

laugh — r. Sardonicus, Canine laugh — r. Spasticus, Canine laugh.

RITA-CRISTINA. A celebrated double monster, born in Sardinia, in 1829. It lived to be nearly nine months old. Two distinct bodies were united at the pelvis. Below, the monster was single.

RIVER WEED, Conferva rivalis.

RIVING, Eructation.

RIZ, Oryza.

ROAN TREE, Sorbus acuparia.

ROB, *Roob*, *Robub*, *Rohob*, *Rohab*, (F.) *Extrait des fruits*. This word, of Arabic extraction, means the juice of any fruit thickened to the consistence of honey by evaporation, before it has fermented. The juice of the grape, boiled to this consistence, was called *Sapa*, and, when not quite so thick, *Defru'tum*.

ROB CYNOSBATOS, Confectio rosæ caninæ — r. ex Moris, Diamorion — r. Nucum, Diacaryon.

ROBIN-RUN-AWAY, Glechoma hederacea.

ROBIN-RUN-THE-HEDGE, Galium aparine.

ROBIN'IA AMA'RA, *Ord.* Leguminosæ. *Sex. Syst.* Diadelphia Decandria. The roots of the *Robinia amara* of Cochin China are bitter, and have been recommended, especially in that country, in diarrhœa and dyspepsia.

ROBINIA PSEUDO-ACA'CIA, *Pseudaca'cia odora'ta*, *False Aca'cia*, *Black Locust*, *Locust-tree*; native of America. The flowers are said to possess antispasmodic properties, and the bark of the root to be emetic and cathartic.

ROBORANS, Corroborant.

ROBORANTIA, Tonics.

ROBUB, Rob.

ROCCELLA, Lichen roccella — r. Tinctoria, Lichen roccella.

ROCHE'S EMBROCATION FOR HOOPING-COUGH. An empirical preparation, composed of *ol. oliv.* ℥xvj, *ol. succin.* ℥viij, *ol. caryoph.*, q. s. to scent it strongly.

ROCHER, see Temporal bone.

ROCHETTA ALEXANDRINA, Soda.

ROCKBRIDGE ALUM SPRINGS, see Virginia, mineral waters of.

ROCKET, GARDEN, Brassica eruca — r. Roman, Brassica eruca.

ROCK ROSE, Helianthemum Canadense, H. Corymbosum.

ROCOU, Terra Orleana.

RODDIKIN, Abomasus.

RODENS, see Sorbus acuparia.

RODEN-TREE, Sorbus acuparia.

RODSCHIEDIA BURSA PASTORIS, Thlaspi bursa.

ROGNE, Psora.

ROHAB, Rob.

ROHENA BARK, Swietenia.

ROHOB, Rob.

ROHUN, see Strychnos nux vomica.

ROIDEUR, Rigidity — r. *Cadavérique*, Rigor mortis.

ROISDORFF, MINERAL WATERS OF. Alkaline waters in Germany, which contain carbonic acid and carbonate of soda.

ROLLER, Bandage, Fascia,

ROMARIN, Rosmarinus — r. *des Marais*, Statice limonium — r. *Sauvage*, Ledum sylvestre.

ROME, (CLIMATE OF.) The climate of Rome, as regards its physical qualities, is considered to be one of the best in Italy. It is peculiarly still; and, hence, has been esteemed favourable as a winter climate in pulmonary diseases, and for invalids generally, as it admits of their taking exercise in the open air at a lower temperature than they otherwise could do. In the early stages of consumption, Sir James Clark generally found the climate favourable.

ROMPEURE, Hernia.

ROMPT-PIERRE, Pimpinella saxifraga.

RONCE, Rubus idæus — r. *Bleue*, Rubus cæsius — r. *de Montagne*, Rubus chamæmorus — r. *Noire*, Rubus fruticosus.

RONCHUS, Snoring, Stertor.

ROND, Round — r. *Grand*, Teres major — r. *Petit*, Teres minor.

RONE, Sorbus acuparia.

RONFLEMENT, Snoring, Stertor, see Rattle — r. *de Diable*, *Bruit de Diable*.

RONNACHS, Triticum repens.

RONNING, Rennet.

ROOB, Rob.

ROOF OF THE MOUTH, Palate.

ROOM, Pityriasis.

ROOT, Radix — r. Ague, Aletris farinosa — r. Bitter, Apocynum androsæmifolium — r. Canada, Asclepias tuberosa — r. Colic, Aletris — r. Red, Celastrus, Lachnanthes tinctoria — r. Rough, Liatris.

ROOT OF SCARCITY, Beta hybrida.

ROOT, SQUAW, Actæa racemosa — r. Sweet, Acorus calamus — r. Unicorn, Aletris farinosa — r. White, Ligusticum actæofolium — r. Yellow, Xanthoriza apiifolia, Jeffersonia Bartoni.

ROPE, Nanus.

ROPE BARK, Dirca palustris.

ROQUETTE, Brassica eruca, Soda.

RORELLA, Drosera rotundifolia.

RORIF'EROUS, *Rorif'er*, (F.) *Rorifère*, from *ros*, *roris*, 'dew,' and *ferre*, 'to carry.' An epithet given to vessels which pour exhaled fluids on the surface of organs.

RORIFEROUS DUCT, Thoracic duct.

ROS, Sperm — r. Calabrinus, Fraxinus ornus — r. Solis, Drosera rotundifolia.

ROSA, (*ῥόδον*,) R. centifolia — r. Afzeliana, R. canina.

ROSA ALBA, *R. usitatis'sima* seu *leucan'tha*. The *White Rose*, (F.) *Rosier blanc*. *Ord.* Rosaceæ. *Sex. Syst.* Icosandria Polygynia. The flowers of this species possess similar but inferior qualities to the damask.

ROSA ARMATA, R. canina — r. Asturica, see Pellagra — r. Austriaca, R. Gallica — r. Calycina, R. canina.

ROSA CANI'NA, *R. sylves'tris* seu *sentico'sa* seu *Swartzia'na* seu *Afzelia'na* seu *arma'ta* seu *calyci'na* seu *rubra vulga'ris*, *Cynor'rhodon*, *Caniru'bus*, *Cani'nus Sentis*, *Cynocyt'isus*, *Cynospas'tum*, *Cynos'batos*, *Dog rose*, *Wild Briar*, *Hip Tree*, (F.) *Rose du chien*, *Eglantier de chien*, *E. sauvage*. The fruit of this variety, called *Hepe* or *Hipe*, *Hope*, (Sc.) *Doghip*, has a sourish taste, and is formed into a conserve. See Confectio cynosbati. It is seldom employed, except to give form to more active remedies; as to pills, boluses, linctuses, &c.

ROSA CENTIFO'LIA, *Rosa*, *R. Damasce'na* seu *Pal'lida*, *Hecatomphyl'la*, *Damask Rose*, *Hundred leaved* or *Cabbage rose*, (F.) *Rosier à cent feuilles*, *Rhodon*. The petals of this rose have an extremely fragrant odour, and sub-acidulous taste. They are laxative; but are scarcely used for any purposes except for the distillation of rose water, *Oil of Roses*, *Oleum Rosæ*, *Attar*, *Otto* or *Essence of Roses*, and the formation of a syrup.

ROSA DAMASCENA, R. centifolia.

ROSA GAL'LICA, *R. Austriaca* seu *rubra*, *Red Rose*, (F.) *Rosier de Provins*. The petals of this variety are astringent; and are used in infusion conserve, &c.

ROSA LEUCANTHA, R. alba — r. Pallida, R. centifolia — r. Rubra, R. Gallica — r. Rubra vulgaris, R. canina — r. Saltans, Essera — r. Senticosa, R. canina — r. Swartziana, R. canina — r. Sylvestris, R. canina — r. Usatitissima, R. alba.

ROSACE, Roseola.

ROSACEUS, Rhodinus.

ROSAGE, Nerium oleander, Rhododendron chrysanthemum.

ROSAGO, Nerium oleander.

ROSALIA, Scarlatina.

ROSALIÆ, Scarlatina.

ROSAT, Rhodinus.

ROSATUS, Rhodinus.

ROSE, Erysipelas — r. Cabbage, Rosa centifolia—r. Campion, Lychnis githago—r. Christmas, Helleborus niger—r. Corn, Papaver rhœas—r. Damask, Rosa centifolia — r. Dog, Rosa canina — r. Dog, conserve or confection of, Confectio rosæ caninæ.

ROSE DU CHIEN, Rosa canina.

ROSE, HUNDRED-LEAVED, Rosa centifolia — r. *Marine*, Rosmarinus.

ROSE RASH, Roseola.

ROSE, RED, Rosa Gallica — r. Rock, Helianthemum Corymbosum.

ROSE DE SIBÉRIE, Rhododendron chrysanthemum—r. Spots, Spots, red.

ROSE, WHITE, Rosa alba.

ROSEA, Rhodia.

ROSEBALM, SCARLET, Monarda coccinea.

ROSEBAY, AMERICAN, Rhododendron maximum.

ROSE DROP, Gutta rosea.

ROSÉE DU SOLEIL, Drosera rotundifolia.

ROSELLINA, Roseolæ.

ROSEMARY, Rosmarinus — r. Marsh, Statice limonium, and S. Caroliniana — r. Wild, Eriocephalus umbellulatus.

ROSENHEIM, MINERAL WATERS OF. Rosenheim is 34 miles S. E. from Münich, in Bavaria. The waters contain sulphuretted hydrogen, carbonic acid, carbonate of lime, chlorides of calcium and magnesium, carbonate of soda, and oxide of iron. They are used as tonics.

ROSE'OLA, *Exanthe'sis Roseola, Rose Rash*, (F.) *Roséole, Éruption anomale, Rosace, Fièvre rouge, Efflorescence érysipélateuse*, from *rosa*, 'the rose,' on account of the colour. An efflorescence in blushing patches, gradually deepening to a rose-colour, mostly circular or oval; often alternately fading and reviving; sometimes, with a colourless nucleus; and chiefly on the cheeks, neck, or arms. It is frequently found, as a symptom, in dentition, dyspepsia, rheumatism, &c., and is of no consequence. See Roseolæ, Rubeola, and Scarlatina.

ROSEOLA ACNOSA, Gutta rosea.

ROSEOLA ÆSTI'VA. The affection which prevails in summer. The eruption is of a darker colour, and is attended with more itching.

ROSEOLA ANNULA'TA. Characterized by patches in the form of rose-coloured rays, with central areas of the colour of the skin.

ROSEOLA FICOSA, Sycosis — r. Typhosa, Spots, red—r. Variolosa, Roseolæ.

ROSE'OLÆ, *Roseola, Roselli'na, Rube'ola spuria, False* or *French measles*, (F.) *Roséole, Fausse rougeole.* This name is also given by some to an acute exanthem, midway between measles and scarlatina, and which belongs to neither one nor the other, as it affords no protection against either. It is, also, termed *Rubeolæ* by some, and *Rube'oloid*, a term, which is applicable to any eruption resembling rubeola. An eruption which often precedes that of small-pox is termed *Roseola Variolo'sa.*

ROSÉOLE, Roseola, Roseolæ.

ROSE PINK, Chironia angularis.

ROSES, MILK OF. A cosmetic wash, formed, according to one method, of *subcarbonate of potass*, gr. vj; *oil of almonds*, ℥j; *essence of bergamot*, ℥ij; *aquæ rosæ*, ℥iij; *orange flower water*, ℥ij. Mix.

ROSEUS, Rhodinus.

ROSEWOOD, Rhodium lignum.

ROSEWORT, Rhodia.

ROSIER BLANC, Rosa alba—*r. à Cent feuilles*, R. centifolia — *r. de Provine*, Rosa Gallica.

ROSIN, BLACK, Colophonia—r. Brown, Colophonia.

ROSIN WEED, Silphium laciniatum.

ROSIN, WHITE, see Pinus sylvestris—r. Yellow, see Pinus sylvestris.

ROSIO STOMACHI, Cardialgia — r. Ventriculi, Cardialgia.

ROSMARINUM, Rosmarinus.

ROSMARI'NUS, *R. officina'lis* seu *latifo'lius* seu *horteu'sis, Alchachil, Libano'tis corona'ria, Dendrolib'anus, Rosemary*, (F.) *Romarin, Rose marine, Encensier; Ord.* Labiatæ. *Sex. Syst.* Diandria Monogynia. The tops of this plant, *Rosmarinus* (Ph. U. S.), *Herba Anthos*, have a fragrant, grateful smell; and an aromatic, warm, bitterish taste, which is dependent upon an essential oil, combined with camphor. Rosemary has been recommended in nervous headachs, in the form of infusion. It is now rarely used, except for its odour. The flower is called *Anthos*, *ἄνθος*. Its oil — *Oleum Rosmarini* — is officinal. From two to six or ten drops are given in nervous complaints, rubbed up with sugar.

ROSMARINUS HORTENSIS, Rosmarinus—r. Latifolius, Rosmarinus—r. Officinalis, Rosmarinus — r. Stœchadis facie, Teucrium creticum — r. Sylvestris, Ledum sylvestre.

ROSSALIA, Scarlatina—r. Squamosa, Scarlatina.

ROSSIGNOL. A name given, in France, to an affection to which pressmen are subject. It is a sprain, followed by tumefaction of the radio-carpal joint.

ROSSOLIO, see Spirit.

ROSTRUM, *Rhinchos, Rinchos, Ramphos*, 'a beak.' (F.) *Bec.* A name given to several old forceps, on account of their resemblance to the beaks of different birds. The principal were the *Rostrum corvi'num, anati'num, psittaci'num, vulturi'num, cyg'neum* seu *olori'num, grui'num, lacerti'num*, &c.

ROSTRUM EXTERNUM, Olecranon—r. Porcinum, Acromion—r. Posterius, Olecranon — r. Sphenoidale, Azyges processus.

ROSY BETTY, Erigeron bellidifolium — r. Bush, Spiræa tomentosa—r. Drop, Gutta rosea—r. Whelk, Gutta rosea.

ROT, Eructation.

ROT, Grinders', Asthma, grinders'.

ROT'ACISM, *Rotacism'us, Rottacismus, Rhotacis'mus, Psellis'mus rhotacis'mus*, (F.) *Grasseyement.* A vicious pronunciation of the Greek, Ρ, *Rau*, common in the northern parts of England; especially near Newcastle. Called, there, the *Burr* or *Burrh.*

ROTACISMUS, *Grasseyement*, Rotacism.

ROTA'TOR, from *rotare, rotatum*, (*rota*, 'a wheel,') 'to turn round,' (F.) *Rotateur.* A name given to several muscles that turn the parts to which they are attached upon their axes;—such as the oblique muscles of the eyes, the pronators, supinators, &c.

ROTATOR, Trochanter.

ROTATO'RES DORSI. Eleven small muscles on each side of the dorsal vertebræ, which arise from the point or upper edge of each transverse process, and pass to the lower edge of the arch of the vertebra above, as far as the base of the transverse process. Their action is to rotate the individual vertebræ on each other.

ROTATORES FEMORIS, Obturatores — r. Oculi, Oblique muscles of the eye.

ROTCOLL, Cochlearia armoracia.

ROTTACISMUS, Rotacism.

ROTTLE'RA TINCTO'RIA. A euphorbiaceous plant of India. A powder is attached to the fruit capsule of this plant, which is brushed off and col-

lected when the fruit is dry. It is called *Kameyla*, is used in Northern India as a vermifuge for dogs; and has proved effectual against tapeworm in man. The dose is two or three drachms, which purges.

ROTULA, Patella, Trochiscus — r. Genu, Patella.

ROTULAD, see Rotular aspect.

ROT'ULAR; from *rotula*, 'the patella.' Relating or appertaining to the patella.

ROT'ULAR ASPECT. An aspect towards the side on which the rotula is situated. — Barclay. *Rot'ulad* is used by the same writer, adverbially, to signify 'towards the rotular aspect.'

ROTULE, Patella.

ROTU'LIAN, *Rotulia'nus*, (F.) *Rotulien*. Relating or belonging to the rotula or patella.

ROTUNDUS, Round.

ROUCOU, Terra Orleana.

ROUEN, MINERAL WATERS OF. This water, known under the name, *Eau des fontaines de la Maréquerie*, is cold, and contains carbonate of iron, carbonic acid, carbonate of lime, chloride of calcium, &c. It is tonic.

ROUGE, Colcothar — *r. d'Angleterre*, Colcothar — *r. de Prusse*, Colcothar — *r. du Sang*, Hæmatin.

ROUGEOLE. Rubeola — *r. Fausse*, Roseolæ.

ROUGEURS, Flush.

ROUGH ROOT, Liatris.

ROUILLÉ, Rubiginous.

ROULEMENT DU LAMBEAU, see Flap.

ROUND, *Teres*, *Rotun'dus*, (F.) *Rond*. Anatomists have given this name to many organs whose fibres are collected in round fasciculi. See Teres.

ROUND FORAMEN, *Fora'men rotund'um*. A foramen of the sphenoid bone, a little behind the *foramen lacerum superius*, which gives passage to the second branch of the fifth pair of nerves, called *superior maxillary*.

ROUND HEART, Thaspium atropurpureum.

ROUND LIGAMENTS OF THE UTERUS, *Ligamen'ta rotund'a U'teri*, (F.) *Cordons sus-pubiens* (Ch.), *Cordons vasculaires*, *Ligaments ronds de l'utérus*. Two cords, which arise from the lateral and superior parts of the uterus, whence they proceed towards the abdominal rings, which they pass through, and terminate by vanishing in the areolar tissue of the groins, mons veneris, and labia majora. These cords are whitish, flattened, and narrower in the middle than at the extremities. According to Mr. Rainey, they are composed chiefly of the striped muscular fibre.

ROUP, Cynanche trachealis, Raucedo.

ROURE, Rhus coriaria.

ROUTINE PRACTITIONER, Routinist.

ROUTINIST, pronounced *routeen'ist*; (F.) *Routinier*; from (F.) *routine*, 'a regular habit or practice, unvaried by circumstances.' One who practises in such an unvaried manner: — a *routine practitioner*.

ROVE, Scab.

ROVING, Delirium.

ROWLAND'S SPRINGS, see Georgia, mineral waters of.

ROWTING, Snoring.

RUBBER, INDIAN, Caoutchouc.

RUBBING SOUND, *Bruit de Frottement*.

RUBE'DO, *Rubor*, 'redness;' from *rubere*, 'to be red.' A diffused, but not spotted, redness on any part of the skin; like that which arises from blushing. Blushing.

RUBEFA'CIENT, *Erethis'ma*, *Erethis'ticum*. *Rubefa'ciens*, from *ruber*, 'red,' and *facio*, 'I make.' (F.) *Rubéfiant*. That which produces redness. A medicine which causes redness of the skin. The action is called *Rubefaction*.

RUBÉFIANT, Rubefacient.

RUBE'OLA, *Rubeola vulga'ris*, from *rubeo*, 'I am red.' *Rose'olæ*, *Exanthe'sis Rubeola*, *Vetera*, *Blaciæ*, *Fersæ*, *Blactiæ*, *Bovil'læ*, *Morbil'li*, *Scarlati'na pustulo'sa* seu *milia'ris*, *Febris morbillo'sa*, *Typhus morbillosus*, *Phœnicis'mus*, *Ecphy'mata*, *Measles*, (Sc.) *Mirles*, (Prov.) *Creos*, *Crewds*, *Malls*, *Maules*, *Measlings*, (F.) *Rougeole*, *Fièvre morbilleuse*. One of the major exanthemata; generally affecting individuals but once, and produced by specific contagion. The rash usually appears on the fourth, but sometimes on the third, fifth, or sixth day of a febrile disorder; and, after a continuance of four days, gradually declines with the fever. The disease generally commences from ten to fourteen days after the contagion has been received. The eruption first shows itself in distinct, red, and nearly circular spots, somewhat less than the ordinary areolæ of flea-bites. As these increase in number, they coalesce; forming small patches of an irregular figure, but approaching nearest to that of semicircles or crescents. These patches are intermixed with single, circular dots and with interstices of the natural colour of the skin. On the face they are slightly raised, so as to give the sensation of inequality of surface to the finger passed over the cuticle. The disappearance of the eruption is followed by desquamation of the cuticle. Measles is not dangerous of itself, but it is liable to induce pneumonia in winter, and dysentery in summer, which are, at times, very fatal. These are apt to come on at the time of, or soon after, the disappearance of the eruption. When they supervene, they must be treated as idiopathic affections. It demands a general antiphlogistic treatment. Willan has pointed out a kind of RUBEOLA SPU'RIA, which he calls RUBEOLA *sine* CATAR'RHO. In this the rash runs its regular course, with little fever or catarrhal affection; affording no certain security against the common or regular disease. He also gives the name, RUBEOLA NIGRA or BLACK MEASLES, to an unusual appearance of the measles about the seventh or eighth day, when the rash becomes suddenly livid, with a mixture of yellow. It is devoid of inconvenience or danger; and is removed in a week or ten days by the mineral acids and tonics.

RUBEOLA SPURIA, Roseolæ.

RUBEOLÆ, Roseolæ.

RUBEOLOID, see Roseolæ.

RU'BIA, from *ruber*, 'red.' *R. Tineto'rum* seu *peregri'na* seu *sylves'tris* seu *major*, *Erythrod'anum*, *Radix rubra*, *Dyer's Madder*, *Madder*, (F.) *Garance*. *Family*, Rubiaceæ. *Sex. Syst.* Tetrandria Monogynia. The root of this plant—*Rubia*, (Ph. U. S.)—has a bitterish, somewhat austere, taste, and a slight, not agreeable, smell. They were formerly considered deobstruent, detergent, and diuretic.

RUBIG''INOUS, *Rubigino'sus*, from *rubigo*, *rubiginis*, 'rust.' (F.) *Rouillé*. Rusty. Having the colour of rust. An epithet given to the sputa in certain cases of pneumonia.

RUBINUS VERUS, Anthrax.

RUBOR, Rubedo.

RUBRI'CA FABRI'LIS, from *ruber*, 'red.' A red, heavy, earthy matter, formerly employed for making drying plasters; *Hard Ruddle*, *Red Chalk*.

RUBRICA SINOP'ICA. A heavy, compact, reddish earth: formerly used in diarrhœa.

RUBRIN, Hæmatin.

RUBUS AFFINIS, R. fruticosus; allied to *ruber*, 'red.'

RUBUS ARC'TICUS, *Shrubby Strawberry*, *Baccæ Norlandi'cæ*. *Ord.* Rosaceæ. *Sex. Syst.* Icosandria Polygynia. The fruit is recommended by Linnæus as possessing antiseptic, refrigerant, and antiscorbutic qualities.

Rubus Batus, R. cæsius.

Rubus Cæ'sius, *R. batus, Dewberry plant,* (F.) *Ronce bleue.* The fruit resembles the blackberry in appearance and properties. The bark of the root of *R. Trivia'lis* seu *Canaden'sis* seu *procum'bens* seu *flagella'ris, American Dewberry, Low Blackberry,* is astringent.

Rubus Canadensis, see R. cæsius.

Rubus Chamæmo'rus, *Cloudberry Tree, Chamæmo'rus, C. Norwegica, Chamædrys, Cloudberries, Knot-berries,* (F.) *Ronce de Montagne.* The ripe fruit is sometimes prepared like a jam, and used in fevers, &c., to allay thirst. It has been much extolled as an antiscorbutic.

Rubus Flagellaris, see R. cæsius—r. Frambœsianus, R. idæus—r. Frondosus, R. fruticosus.

Rubus Frutico'sus, *R. affi'nis* seu *paniculatus* seu *niger* seu *frondo'sus* seu *vulga'ris; Common Bramble,* which affords *Blackberries,* (Prov.) *Brambleberries, Bumblekites,* (F.) *Ronce noire.* The berries are eaten as a summer fruit, of which they form a poor variety. The bark of the root of the *Rubus villo'sus, American Blackberry, High or standing blackberry, Hairy American Bramble,* is astringent and has been used in the last stages of dysentery, and in cholera infantum.

Rubus Idæ'us, *R. frambœsia'nus, Batos; Raspberry,* (F.) *Framboise, Ronce.* The fruit of the best varieties — (Sc.) *Rasps,* (Prov.) *Hindberries* — is extremely agreeable; and is much used. It was, formerly, called *Batiuon moron.*

Rubus Niger, R. fruticosus — r. Occidentalis, see R. strigosus—r. Paniculatus, R. fruticosus—r. Procumbens, see R. cæsius.

Rubus Strigo'sus, *Wild red raspberry,* of the United States. The leaves are often used as a mild astringent, as well as those of *Rubus occidentalis, Black Rasp'berry.*

Rubus Trivialis, see Rubus cæsius — r. Villosus, see Rubus fruticosus — r. Vulgaris, R. fruticosus.

RUCKING, Eructation.

RUCTAMEN, Eructation.

RUCTATIO, Eructation.

RUCTUATIO, Eructation.

RUCTUOSITAS, see Eructation.

RUCTUS, Eructation — r. Acidus, Oxyregmia — r. Nidorosus, Cnissoregmia.

RUDBECK'IA LACINIA'TA, *Cone flower, Thimble weed;* indigenous: *Order,* Compositæ; is diuretic, and has been given in nephritic affections.

RUDDLE, HARD, Rubrica fabrilis.

RUDIMEN'TAL, *Rudimenta'lis,* (F.) *Rudimentaire,* from *rudimentum,* 'the first beginning.' That which is but slightly developed.

RUDOLPHIA FRONDOSA, Butea frondosa.

RUE, Ruta—r. Common, Ruta—r. *de Chèvre,* Galega officinalis—r. Goat's, Galega officinalis—r. Goat's, Virginia, Galega Virginiana — r. Meadow, Thalictron — r. *des Murailles,* Asplenium ruta muraria — r. *des Prés,* Thalictron — r. *Sauvage,* Ruta.

RUELLES, Wrinkles.

RUFT, Eructation.

RUGA, Wrinkle.

RUGINE, Raspatorium.

RUGISSEMENT, Rugitus.

RUGI'TUS, *Brycheth'mos,* from *rugire, rugitum,* 'to roar.' (F.) *Rugissement.* A Latin word, which ordinarily expresses the roaring of the lion: and which is used, by some medical writers, to designate a particular species of borborygmus compared to it.

RUGOSE, Wrinkled.

RUGOUS, Wrinkled.

RUM, *Taſia, Spir'itus Jamaicen'sis, Molas'ses Spirit,* (F.) *Rhum.* A spirit distilled from sugar, or molasses. See Spirit.

RUMA, Mamma.

RUMEN, Hypogastrium, Ingluvies.

RUMEX ACETOSELLA, *Sheep Sorrel, Field Sorrel;* indigenous; has similar virtues.

Rumex Aceto'sus, *R. tubero'sus* seu *intermedius, Lap'athum pratense, Ox'alis Aceto'sa, Acetosa vulga'ris* seu *praten'sis* seu *nostras, Auox'yris, A. arven'sis, Sour dock, Sorrel, Common Sorrel,* (Sc.) *Docken,* (F.) *Oseille, Vinette, Aigrette, Surelle. Ord.* Polygenaceæ. *Sex. Syst.* Hexandria Trigynia. The leaves are sour, and are used in cookery, and also as a refrigerant.

Rumex Acu'tus, *Sharp-pointed Wild dock, Oxylap'athum, Lap'athum, L. sylves'tre* seu *acu'tum, Rumex, R. paludo'sus* seu *pusil'lus, Lap'athos,* (F.) *Patience sauvage.* A decoction of the root has long been used in cutaneous affections. It is, sometimes, employed for the cure of the itch.

Rumex Ætnensis, R. scutatus.

Rumex Alpi'nus, *Aceto'sa Alpi'na.* The systematic name of the plant that affords the *Monk's Rhubarb,* (F.) *Rhabarbe des Moines.* See Rumex patientia.

Rumex Aquaticus, Rumex hydrolapathum — r. Britannica, Rumex hydrolapathum — r. Confertus, R. patientia—r. Digynus, Oxyria reniformis —r. Glaucus, R. scutatus—r. Hastatus, R. scutatus — r. Hastifolius, R. Scutatus.

Rumex Hydrolap'athum, *Water-Dock,* (Old Eng.) *Brakeleak, Hydrolapathum, Rumex aquat'icus* seu *Britan'nica, Herba Britan'nica, Lap'athum aquat'icum,* (F.) *Parelle, Patience d'eau.* The leaves of this plant are subacid, and said to be laxative. The root has been used as a tonic, astringent, and antiscorbutic. It has also been employed externally in some cutaneous affections.

Rumex Intermedius, R. acetosus.

Rumex Obtusifo'lius, *Lap'athum sylvestre. Blunt-leaved Dock, Bitter dock.* The root of this, as well as of R. Crispus, *Curled,* or *Sour,* or *Yellow,* has similar virtues to those of the other species. Both have been used in decoction in the same cases as sarsaparilla.

Rumex Oxyotus, R. scutatus — r. Paludosus, R. acutus.

Rumex Patien'tia, *R. confer'tus, Lap'athum horten'sē, Rhabar'barum monacho'rum, Hippolap'athum, Patien'tia, Garden Patience, Monk's Rhubarb,* (F.) *Patience, Rhubarbe sauvage, Parelle.* This root, which is supposed to possess the virtues of rhubarb, but in an inferior degree, is, according to Linnæus, obtained from the *Rumex patientia;* according to Murray, from the *Rumex alpi'nus.*

Rumex Pusillus, R. acutus.

Rumex Sanguin'eus. The root of the *bloody dock* or *bloody veined Dock,* has an austere and astringent taste; and has been employed in dysentery. It is called, also, *Lap'athum sanguin'eum,* (F.) *Oseille ou Patience Rouge, Sangdragon.*

Rumex Scuta'tus, *R. glaucus* seu *hastifo'lius* seu *Ætnen'sis* seu *oxyotus* seu *hasta'tus, Aceto'sa rotundifo'lia* seu *Roma'na* seu *Rotundifolia horten'sis* seu *scuta'ta, Lap'athum scuta'tum* seu *rotundifo'lia, Roman* or *Garden Sorrel, Green Sauce, French Sorrel,* (F.) *Oseille boucher, Oseille ronde, Petite O.* Virtues the same as those of the common sorrel.

Rumex Tuberosus, R. acetosus.

RUMINA'TION, *Rumina'tio,* from *ruma* or *rumen,* 'the gullet.' *Merycis'mus.* A function peculiar to ruminating animals, by which they chew a second time the food they have swallowed. An analogous phenomenon is sometimes seen in man. One who ruminates is in French *mérycole.*

RUMMET, Pityriasis.

RUMP, *Croupon* — r. Bone, Coccyx.

RUNCHES, Sinapis arvensis.

RUNCINA, Raspatorium.

RUNCINULA, Raspatorium.

RUNKILL, Wrinkle.

RUNKLE, Wrinkle.

RUNNET, Rennet.

RUNNING, *Cursus*, (F.) *Course*. A succession of leaps, executed with rapidity, to transport the body quickly from one place to another.

RUNNING, Rennet.

RUNSH, Sinapis arvensis.

RUNUNCULA, Raspatorium.

RUPES, Lips of the Vulva. See Lip.

RU'PIA, *Rhypia, Ulcus aton'icum, Ecphly'sis Rhy'pia, Rhypa'ria*, from '*ῥυπος*, 'filth.' An eruption of large flattish blebs, which contain a fluid —at first serous, afterwards puriform, and often bloody, which rapidly concretes into crusts, at the base of which are ulcers of variable depths.

It requires the use of tonics internally, and of stimulating ointments externally.

RUPIA ESCHAROT'ICA, *Pem'phigus infan'tilis* seu *gangræno'sus*; known in Ireland under the names—*white blisters, eating hive* and *burnt holes*. An affection, which bears a close similarity to pemphigus, particularly in the absence of a thick rugous crust, whilst in its chief feature, that of ulceration, it evidently belongs to Rupia.

RUPTIBILITAS, Fragilitas.

RUPTIO, Rhexis.

RUPTORIUM, Cauterium — r. Commune, Potassa fusa.

RUPTURA, Ecrexis, Hernia, Laceration, Rhexis—r. Corneæ, Ceratorrhexis — r. Herniosa, Hernia—r. Ovarii, Oariorrhexis—r. Uteri, Uterus, rupture of the — r. Vaginæ, Colporrhexis.

RUPTURE, Hernia, Rhexis — r. *du Cœur*, Cardiorrhexis — r. of the Groin, Bubonocele — r. *de la Matrice*, Uterus, rupture of the — r. Wort, Herniaria glabra.

RUPTURED, see Hernial.

RUSCUS, *R. aculea'tus, Bruscus, Oxymyr'rhinē, Oxymyr'sinē, Myrtacan'tha, Catan'gelos, Myacan'tha, Sco'pia re'gia, Wild Myrtle, Centromyr'inē, Butcher's Broom*, (Prov.) *Knee-holly*, (F.) *Petit houx, Fragon. Ord.* Smilaceæ. *Sex. Syst.* Diœcia Monadelphia. The root has been recommended as an aperient and diuretic.

RUSCUS ACULEATUS, Ruscus.

RUSCUS HYPOGLOS'SUM, *Uvula'ria, Hypoglossum, Hippogloss'um, Bislin'gua, Bonifa'cia, Laurus Alexandri'na angustifo'lia*, (F.) *Laurier Alexandrin, Langue de cheval*. Formerly used against relaxed uvula.

RUSH, SWEET, Acorus calamus, Juncus odoratus.

RUSMA, see Orpiment.

RUSPINI'S STYPTIC, see Styptic, Ruspini's.

RUSPI'NI'S TINCTURE FOR THE TEETH. An empirical preparation, composed of *Florentine orris* ℥viij, *cloves* ℥j, *rectified spirit* Oij, *ambergris* ℈j.

RUT, Heat.

RUTA, *'pυτη, R. grav'eolens* seu *horten'sis* seu *al'tera, Peg'anum, Besa'sa, Common Rue*, (F.) *Rue, Rhue, Rue sauvage, Herbe de grace; Ord.* Rutaceæ. *Sex. Syst.* Decandria Monogynia. The plant has a strong, ungrateful odour, and bitter pungent taste. It is acrid, so as to blister the skin. Its properties are reputed to be tonic, stimulant, antispasmodic, and emmenagogue. Dose, gr. xv to ℈ij. The leaves are officinal — *Ruta*. (Ph. U. S.)

Oleum Rutæ, distilled Oil of Rue, is antispasmodic; and, externally, rubefacient. Dose, gtt. ij to vj.

RUTA ALTERA, Ruta—r. Capraria, Galega officinalis—r. Graveolens, Ruta—r. Hortensis, Ruta —r. Muraria, Asplenium ruta muraria.

RUTABULUM, Penis.

RUTA'CEUM, from *Ruta*, 'rue.' Vinegar of rue.

RUTIDOMA, see Rutidosis.

RUTIDO'SIS, *Rytido'sis, Rhytido'sis*, from *ῥυτίδωω*, 'I wrinkle.' The act of wrinkling; as *Rutido'ma* means a shrivelled or wrinkled body. A destruction or atrophy of the eye. Corrugation and subsidence of the cornea.

RUYSCHIA'NA TU'NICA, (F.) *Lame* ou *Membrane Ruyschienne*. According to Ruysch, and the greater part of his disciples, the choroid coat of the eye is formed of two laminæ. His son gave to the inner the name *Tunica Ruyschia'na* or *Membra'na Ruyschia'na* seu *Ruysch'ii*.

Tu'nica Cellulo'sa Ruyschia'na is the areolar substance under the peritoneal covering of the stomach. It is not numbered among the coats of that organ.

RYE, Secale—r. Horned, Ergot — r. Robbin's, Polytrichum juniperinum — r. Spurred, Ergot.

RYTIDOSIS, Rutidosis.

RYTIS, Wrinkle.

S.

S. A. &c., see Abbreviation.

SAAG, Urine.

SABADILLA, Veratrum sabadilla, see Veratrina.

SABADILLIN, see Veratrina.

SABATILLA, Veratrum sabadilla.

SABBATIA, Chironia angularis—s. Angularis, Chironia angularis.

SABINA, Juniperus sabina.

SABINE, Juniperus sabina.

SABLÉ, Maculo'sus, 'sanded,' from *sabulum*, 'sand.' Having the appearance as if strewed with sand. The terms *sablé* and *piqueté* are sometimes applied to the brain, when a slice of it exhibits red points as if it had been strewed with red sand. Such is the case in cerebral hyperæmia.

SABOT DE VÉNUS JAUNE, Cypripedium luteum.

SABUCUS, Sambucus.

SAB'ULOUS, *Sabulo'sus, Areno'sus, Psammo'des*, from *sabulum*, 'sand.' The sandy deposit often seen in the urine.

SABULUM CONARII, see Pineal gland.

SABURA, Saburra.

SABUR'RA, *Sabu'ra, Sordes*. This word signifies, by derivation, 'coarse sand, or ballast.' In its common acceptation, it means *foulness of the stomach*, as it is sometimes called;—vitiated matters supposed to be retained and accumulated in the stomach—the result of imperfect digestion—and which have been sometimes considered as a morbid product of the mucous secretion of that organ, or of the biliary secretion; at others, as a residuum from alimentary substances badly di-

gested. The *Saburral state, Collu'vies gas'trica, Crudita'tes ventric'uli, Gastric'mus*, (F.) *Embarras gastrique, État saburral*, is an accumulation of saburræ in the stomach, (F.) *Saburres gastriques*, which the Humourists considered to be the cause of a number of diseases.

SABURRA VERMINOSA, Helminthiasis.

SABUR'RAL, *Saburra'lis*. Relating or appertaining to saburræ,—as the '*saburral* state.'

SABURRATIO, Arenatio.

SABURRES GASTRIQUES, see Saburra.

SAC, see Sack — *s. Herniaire*, Hernial sac — s. of the Omentum, see Epiploon, gastro-hepatic.

SACCADÉ, see Respiration, jerking.

SACCATUS, Encysted.

SACCHAR, Saccharum.

SACCHARHYDROLÉ, Syrup.

SACCHARI FÆX, Melasses.

SACCHARINA, *Saccharolés*.

SACCHARO-ALCOOLÉ, Ratafia.

SACCHAROLÉ LIQUIDE, Mellitum, Syrup — *s. Mou*, Conserva, Electuarium — *s. Solide*, see Pastel, and Tabella.

SACCHAROLÉS (F.), *Sacchari'na*, from *saccharum*, 'sugar.' A name given by MM. Henry and Guibourt to medicines which have sugar or honey for excipient, or for predominant principle. M. Béral so calls an exact mixture of pulverized sugar with other substances also in powder, but in less quantity.

SACCHAROM'ETER, (F.) *Saccharomètre, Pèse-sirop*, from *saccharum*, 'sugar,' and *μετρον*, 'measure.' A hydrometer adapted for determining the density of syrups. The marginal figure is graduated to Baumé's scale. See Areometer.

Saccharometer.

SACCHAROMYCES, Torula cerevisiæ.

SACCHARORRHŒA, Glycyrrhœa — s. Cutanea, Sudor dulcis.

SACCHARORRHŒ'A LAC'TEA, *Galactorrhœ'a sacchara'ta*. A secretion of unusually sweet milk.

SACCHARORRHŒA PULMONA'LIS, *Sputum dulcē* seu *sacchara'tum*. The copious expectoration of unusually sweet matter from the lungs.

SACCHARORRHŒA URINOSA, Diabetes mellitus.

SAC'CHARUM, *Sacchar, σακχαρ*, from Arabic, or rather Sanscrit, *Sakar*, 'white earth;' *Suchar, Succhar, Sutter, Zuchar, Zu'caro, As'sukur, Tigala, Zuc'charum, Zozar, Zu'charum, Zuc'carum, Zuchra, Mel arundina'ceum, Sugar*, (F.) *Sucre*. The produce of the juice of *Suc'charum officina'rum* seu *officinalē* of Linnæus, *Cal'amus In'dicus* seu *Sacchari'nus, Sugar Cane*, (F.) *Canne à Sucre, Cannamelle; Arun'do saccharif'era* of Sloane; *Ord.* Gramineæ; *Sex. Syst.* Triandria Digynia, and also of the beet, maple, &c.

True Sugars are those with which alcoholic fermentation *may be* effected, by the addition of yeast and water. They are:—

Species.	*Varieties.*
1.....	Hard sugar of the cane, maple, beet, chestnut, &c.
2.....	Liquid sugar, sugar of malt, of the sweet potato, melasses, honey, &c.
3.....	Hard sugar of the grape, ripe fruits, starch, diabetes, &c.
4	Hard sugar of the mushroom.

Imperfect sugars are those in which alcoholic fermentation *cannot be* effected by means of yeast and water.

Species.	*Varieties.*
1.....	Manna.
2.....	Sugar of Milk.
3.....	Sugar of jelly or glue.
4.....	Liquorice.
5.....	Picromel.

Sugar is prepared from the expressed juice of the sugar-cane, boiled with the addition of quicklime or common vegetable alkali. It is used, in pharmacy, for the preparation of syrups, conserves, lozenges, &c. It is nutritious, and is employed as an aliment, and as a eutrophic demulcent and antiseptic. Dissolved in small quantities in water, as in tea, it is apt to disagree with dyspeptics; an evil which does not always occur when the same substance is taken more largely.

Liver or *Hepat'ic Sugar*, (F.) *Sucre du Foie*, has been recently found to be a normal secretion of the liver. It is more readily assimilated than other varieties of sugar. See Glucose.

SACCHARUM ACER'NUM, *S. Canaden'sē, Maple Sugar*, is often used as a demulcent.

SAC'CHARUM ALBUM, *S. purifica'tum, Saccharum* (Ph. U. S.), *Sal Indus, White Sugar, Refined Sugar* is the *Loaf Sugar. Double-refined Sugar* has been called *Tabarzet*.

SACCHARUM ALUMINATUM. Equal parts of *white sugar* and *alum*, powdered. Used as a styptic.

SACCHARUM CAN'DIDUM, *S. candum* seu *cantum* seu *canthum, Al'phenic, Nabot, Sugar candy, Sugar candian*, (F.) *Sucre Candi*, is the crystallized juice of the cane.

SACCHARUM CANDUM, S. Candidum—s. Cantum, S. Candidum — s. Canthum, S. Candidum — s. Commune, Saccharum non-purificatum.

SACCHARUM HORDEA'TUM, *Barley Sugar*, (PROV.) *Sugar barley, Penides, Penid'ium, Sac'charum penid'ium*, is a variety of sugar candy.

SACCHARUM LACTIS, Sugar of milk.

SACCHARUM NON-PURIFICA'TUM, *Muscova'do, raw, brown* or *moist sugar*, is the *S. commu'nē, S. rubrum, Mel cannæ*, or *coarse sugar*.

SACCHARUM OFFICINARUM, see Saccharum — s. Penidium, Hordeatum — s. Rosaceum, Confectio rosæ gallicæ — s. Saturni, Plumbi superacetas.

SACCHARURE, from *saccharum*, 'sugar.' A medicine resulting from the intimate union of sugar with the medicinal principles of alcohol or ethereal tinctures. — Béral.

SACCULATED, Encysted.

SACCULATUS, Encysted.

SACCULI ADIPOSI, Fatty vesicles — s. Chalicophori, see Lacunæ of Bone—s. Laryngei, Ventricles of the larynx.

SAC'CULI MEDICINA'LES. Bags containing medicinal substances.

SACCULI MEDULLARES, see Medullary membrane.

SAC'CULUS, diminutive of *saccus*, 'a little sac.' This name has been given to two sacs formed by the membranous vestibule, which open into each other, and contain the *otolithes* and *otoconies*: one of these is termed the *sacculus vestib'uli*, the other *sacculus*. See Semicircular canals.

SACCULUS, Marsupion — s. Cephalicus, Cucupha — s. Chylifer seu rorifer, Receptaculum chyli — s. Cordis, Pericardium — s. Ellipticus, see Semicircular canals — s. Lactiferus, see Lactiferous vessels.

SAC'CULUS LARYN'GIS. A cæcal pouch, of variable size, formed by the mucous membrane in the ventricles of the larynx.—Hilton.

Sacculus Medicinalis, Pulvinar medicatum —s. Spherieus, see Semicircular canals—s. Vesical, see Bladder, sacculated — s. Vestibuli, Semicircular canals, see Sacculus.

SACCUS, Sac — s. Coli, Cæcum — s. Cordis, Pericardium—s. Herniosus, Hernial sac—s. Epiploicus, Epiploon — s. Intestini crassi, Cæcum — s. Lacrymalis, Lachrymal sac — s. Lacrumalis, Lachrymal sac — s. Lacteus, Receptaculum chyli — s. Mucosus, see Bursæ mucosæ — s. Peritonæi retro-ventricularis, see Epiploon, gastro-hepatic —s. Pleuræ, Pleura—s. Venarum cavarum, Sinus dexter cordis — s. Venarum pulmonalium, Sinus pulmonalis.

SACER, Sacral — s. Ignis, Herpes zoster — s. Morbus, Epilepsy — s. Musculus, Transversalis dorsi.

SACERDOTIS PENIS, Arum maculatum.

SACHET (F.), *Sac'culus*, 'a little sac.' A small bag containing perfumes to be placed among clothes to communicate to them an agreeable odour. The following is a formula for the powder they contain. *Powdered cloves* and *powdered cassia*, each one ounce; *powdered orris root*, an ounce and a half; *powdered yellow sandal wood*, one drachm; *otto of roses*, twenty-four drops; *oil of lavender*, *oil of bergamot*, each one drachm; *musk*, six grains. A scent-bag.

SACK, (F.) *Sec*, 'dry.' A dry wine used by our ancestors; *Vin sec*. Probably *Sherry*.

Sack, *Saccus*, *Secluso'rium*; Sax. rac. A bag or pouch.

Sack, Her'nial, *Saccus hernio'sus*, (F.) *Sac herniaire*. An envelope or pouch, formed by the serous membrane of the cavity, whence a viscus has escaped. We distinguish, in a hernial sac, its *orifice* or the opening by which it communicates with the great cavity lined by the serous membrane: its *cervix* or *neck*, (F.) *Collet*, the narrow portion on the outside of the orifice, where strangulation sometimes occurs: the *body*, (F.) *Corps*, which is the round prominent part; and the *fundus* or *bottom*, — the part opposite to the orifice.

Sack Posset; from *sack*, 'the wine,' and *posset*. A posset made of sack, milk and other ingredients.

Sack, Serous. The shut cavity formed by any serous membrane, as by the pleura or peritoneum.

Sack Whey, Wine Whey.

SACRAD, see Sacral aspect.

SACRA FISTULA, Vertebral column.

SACRAL, *Sacer*, (F.) *Sacré*. That which belongs or relates to the sacrum. A name given to several parts.

Sacral Arteries are distinguished into, 1. The *anterior* or *middle sacral*, *Median Artery of the Sacrum* of Chaussier, which arises from the posterior part of the abdominal aorta, in front of the 4th lumbar vertebra. It descends, in a serpentine manner, upon the sacro-vertebral articulation, and on the anterior surface of the sacrum. It furnishes many lateral branches, which unite with the lateral sacral arteries, and enter the anterior sacral foramina, to be distributed to the membranes of the marrow, &c. 2. The *lateral sacral arteries*, which are two in number; one on each side. They arise from the hypogastric, from the ilio-lumbar, or from the gluteal; and descend before the anterior sacral foramina, anastomosing in an arched manner, towards the coccyx, with the middle sacral. They give off *external* and *posterior branches*, which enter the sacral foramina; and *internal branches*, which are distributed to the pyramidalis, sacrum, &c.

Sacral Aspect. An aspect towards the region where the sacrum is situated.—Barclay. *Sacrad* is used by the same writer adverbially to signify 'towards the sacral aspect.'

Sacral Extremities. The lower limbs.

Sacral Grooves, (F.) *Gouttières sacrées*. Two longitudinal excavations, slightly marked, at the posterior surface of the sacrum; which appear to terminate the vertebral grooves or gutters.

Sacral Nerves, (F.) *Nerfs sacrés*, are generally six in number. They arise from the termination of the spinal marrow. The first, united with the great cord which descends from the lumbar plexus, concurs with the three others in the formation of the sacral or sciatic plexus. The third and fourth, with branches of the great sympathetic, from the hypogastric plexus. The fifth and sixth (*coccyge'al nerve*) are distributed to the ischio-coccygeus muscle, and to the sphincter and levator ani.

Sacral Plexus, *Sciat'ic plexus*, — the *sacral portion of the crural plexus* of Chaussier, constituted as just mentioned, is situate in front of the pyramidalis. It gives off, backwards, two branches, called the *pudic*, (F.) *honteux*, and the *lesser sciatic*. It terminates in the great sciatic nerve.

SACRÉ, Sacral.

SACRO, in composition, relating or belonging to the sacrum.

SACROCOCCYGE'AL, *Sacro-coccyge'us*. Relating to the sacrum and coccyx.

Sacrococcyge'al Articula'tion is that of the lower extremity of the sacrum with the superior *facette* of the coccyx. It is closed by two ligaments; — an *anterior* and a *posterior sacro-coccygeal*.

SACROCOSTALIS, Sacro-lumbalis—s. *Fémoral*, Glutæus major.

SACROCOXAL'GIA, from *sacro*, *coxa*, 'the hip,' and *αλγος*, 'pain;' a hybrid term. Some authors have called thus a rheumatic affection of the sacro-iliac symphysis.

SACROÏL'IAC, *Sacro-ili'acus*. That which relates to the sacrum and ilium.

Sacroïliac Articula'tion, Sym'physis or Synchondro'sis, *Ilio-sacral articula'tion*, *symphysis* or *synchondrosis*, is the union of two surfaces; — two inclined planes, broader above than below; one formed by the sacrum, the other by the ilium. Both surfaces are incrusted by an articular cartilage. The bands which strengthen them are the two *sacro-sciatic ligaments*, the *sacro-spinal*, a *sacro-iliac* ligament, and some irregular fibres. The *sacro-iliac* ligament is a very thick assemblage of short, dense, irregular fibres, occupying the space which the sacrum and ilium leave between them, behind their articular surface. Some authors have termed some irregular fibres, situate in front of the sacro-iliac articulation, *anterior sacro-iliac ligaments*, in opposition to the preceding fasciæ, which they call *posterior sacro-iliac*.

SACROÏSCHIATICUS, Sacro-sciatic.

SACROLOMBAIRE, Sacro-lumbalis.

SACROLUM'BAR, *Sacro-lumba'lis*, *Sacro-lombaire*. That which belongs to the sacrum and loins.

Sacrolumbar, *Sacro-lumba'lis*, *Sacro-lumba'ris Muscle*, *Sacro-costa'lis*, *Dorso-trache'lian portion of the Sacro-spinal* of Chaussier, (F.) *Lombo-costo-trachélien*, *Sacro-lombaire*, is seated at the posterior part of the trunk; is thick and triangular below; flat and thin in the remainder, and terminates in a point at its upper extremity. It is attached to the posterior surface of the sacrum; to the corresponding portion of the crista ilii; to the extremities of the transverse processes of the lumbar vertebræ; to the angles of the eleven inferior ribs; to the tuberosity of the first, and the

posterior tubercle of the transverse processes of the last five cervical vertebræ. The sacro-lumbalis straightens the vertebral column when bent forwards, and maintains it straight. By means of its insertion into the ribs, it can elevate or depress these bones, according as it contracts from above to below, or from below to above. It acts, consequently, sometimes as an inspiratory, at others as an expiratory muscle.

From six or eight of the lower ribs arises an equal number of fleshy portions, which terminate at the inner side of this muscle, and are called *Mus'culi Accessor'ii* seu *Additamen'tum ad Sacro-lumba'lem*, (F.) *Accessoires du Sacro-lombaire.*

From the upper part of the sacro-lumbalis, a fleshy slip, called *Cervica'lis descen'dens*, *Cervicalis descendens Diemerbroeck'ii*, *Transversa'lis collatera'lis colli*, *Accesso'rius ad Sacro-lumba'lem*, (F.) *Transversaire grêle*, runs up, to be fixed to the transverse processes of the fourth, fifth, and sixth cervical vertebræ, by three distinct tendons. These last parts, though separated by some anatomists, belong to the sacro-lumbalis.

SACROSCIAT'IC, *Sacro-ischiat'icus.* That which belongs to the sacrum and ischium.

SACROSCIATIC LIGAMENTS are two ligaments, which assist in securing the sacro-iliac articulation. The *great* or *posterior sacro-sciatic ligament* extends from the crista ilii and the sides of the sacrum and coccyx to the tuberosity of the ischium. The *less* or *anterior sacro-sciatic ligament* arises from the same point, and terminates in the spine of the ischium.

SACROSPINAL, Dorso-trachelian portion of the sacro-lumbalis.

SACROSPINA'LIS. That which relates to the sacrum and spine. Under this name, Chaussier describes the sacro-lumbalis, longissimus dorsi, transversalis, transverso-spinalis, and intertransversalis muscles. He divides it into three portions.

SACROTROCHANTÉRIEN, Pyramidalis.

SACROVERT'EBRAL, *Sacro-vertebra'lis.* That which relates to the sacrum and the vertebræ.

SACROVERTEBRAL ARTICULATION is the junction of the last vertebræ of the loins with the sacrum. The angle which these two bones form at the anterior part has been called the *Prom'ontory of the Sacrum*, or the *Sacro-vertebral Angle.*

SACROVERTEBRAL LIGAMENT is a strong ligument, which passes from the anterior part of each of the transverse processes of the last lumbar vertebra to be attached to the base of the sacrum. Its *use* is to maintain the articulation of those two bones *in situ.*

SACRUM, *Os sacrum* seu *basila'rē* seu *Alagas* seu *latum* seu *clun'ium*, *Lus*, *Luz*, *Ver'tebra magna*, *Albagiazi*, *Hi'eron ost'eon*, *Clunis*, *Subver'tebra*, *Subver'tebrum*, *Vet'ula*; from *sacer*, 'sacred;' because it contributes to protect the genital organs, which were considered sacred, or because it was offered in sacrifice. The bone, which forms the posterior part of the pelvis, and is a continuation of the vertebral column. The sacrum is symmetrical and triangular, situate at the posterior part of the pelvis, and concave anteriorly. It has,—1. A *pelvic* or *anterior surface*, which corresponds to the pelvic cavity, and has four transverse furrows, that point out the parts where the primitive portions of the bone were separated from each other. On each side there are four foramina, called *anterior sacral*; these are oblique, and decrease in size, from above downwards. Through them pass the anterior branches of the sacral nerves. 2. A *spinal* or *posterior surface*, which is convex, rough, and covered by muscles. Upon the median line are four horizontal, tubercular eminences, forming a continuation of the spinous processes of the vertebræ; and below, a triangular notch, where the *sacral canal* terminates. On each side of the surface are four foramina, called *posterior sacral*, which are smaller than the anterior, and give passage to the posterior branches of the sacral nerves. 3. The *vertebral surface* or *base.* Its greatest extent is transversely. It is articulated with the last lumbar vertebra. On it is seen the orifice of the *sacral canal*, of a triangular shape, which decreases in width from above downward; terminates the vertebral canal; is lined by a prolongation of the cerebral membranes; contains the fasciculi of the sacral nerves; communicates, externally, by the sacral foramina; and terminates at the triangular notch on the posterior surface of the bone. At the sides of the upper orifice of the sacral canal are two articular processes, which receive the articular processes of the last lumbar vertebra. The projection, formed by the union of the base of the sacrum with the last lumbar vertebra, is called the *Prom'ontory*, *Promonto'rium Ossis Sacri*, *Great Angle of the Sacrum* or *Sacro-vertebral Angle.* 4. A *coccygeal face* or *apex*, (F.) *Face coccygienne* ou *Sommet*, which is very narrow, and is articulated with the coccyx. 5. *Two lateral margins*, which have, above, a broad, oblique surface, articulated with the ilium.

The sacrum is developed by 30 to 36 points of ossification.

SADDLE, TURKISH, Sella Turcica.

SÆPES, Sepes.

SAFFLOW, Carthamus tinctorius.

SAFFLOWER, Carthamus tinctorius.

SAFFRON, Crocus — s. Bastard, Carthamus tinctorius — s. Dyers', Carthamus tinctorius.

SAFFRON FLOWER, Carthamus tinctorius.

SAFFRON, MEADOW, Colchicum autumnale.

SAFRAN BÂTARD, Carthamus tinctorius, Colchicum autumnale — *s. des Indes*, Curcuma longa — *s. de Mars apéritif*, Ferri subcarbonas — *s. de Mars astringent*, Coleothar — *s. des Prés*, Colchicum autumnale — *s. Racine de*, Curcuma longa.

SAFRANUM, Carthamus tinctorius.

SAFRE, Smalt.

SAGA, Sago.

SAGAPE'NUM, *Sag'apin*, *Serapi'non*, (F.) *Gomme séraphique.* A gum-resin, supposed to be obtained from the *Fer'ula Per'sica. Ord.* Umbelliferæ. *Sex. Syst.* Pentandria Digynia. Its odour is fetid and alliaceous; taste pungent, bitterish, nauseous. It is in small, agglutinated masses of a yellow colour; tenacious; breaking with a horny fracture. It is a reputed antispasmodic and emmenagogue. Dose, gr. x to ʒss.

SAGAPIN, Sagapenum.

SAGE, Salvia — s. Indian, Eupatorium perfoliatum — s. Jerusalem, Pulmonaria.

SAGE TREE, Lantana.

SAGE, WILD, Salvia Africana, S. Lyrata.

SAGE-FEMME, Midwife.

SAGENA, Epiploon.

SAGESSE DES CHIRURGIENS, Sisymbrium Sophia.

SAGIMEN VITRI, Soda, subcarbonate of.

SAGIT'TAL, *Sagitta'lis*, *Sagitta'tus*, from *sagitta*, 'an arrow.'

SAGITTAL FURROW, *Sagittal Groove*, (F.) *Goutt̀ière sagittale*, is a channel on the median line of the inner surface of the skull-cap. It is excavated in the os frontis, in the two parietal and occipital bones, and extends from the crista galli to the internal occipital protuberance. It lodges the longitudinal sinus, which has been called the *sagittal sinus.*

SAGITTAL SUTURE, *Obelæ'a sutu'ra* seu *Raphē*, *Sutura Virga'ta* seu *juga'lis* seu *Rabdoï'des*,

Rhabdoï'des, Rhabdo'des, Rhabdoïdeus seu *Biparieta'lis* seu *Interparieta'lis*. The suture which unites the two parietal bones, and which extends, from before to behind, on the median line, from the coronal suture to the lambdoidal. It is so called, from *sagitta*, 'an arrow,' because it seems to meet the coronal suture as an arrow meets the string of a bow.

SAGITTA'RIA VARIAB'ILIS. From *sagitta*, 'an arrow,' owing to the prevalent form of the leaves. *Arrowhead, Arrowleaf, Arrow weed, Wapata* of Oregon; *Nat. Ord.* Alismaceæ. Esculent, yielding fecula like arrow-root. The roots are cooling and sub-astringent, and are at times applied to the feet in cases of yaws and dropsical swellings of the legs. The leaves are applied to the breasts to dispel milk.

SAGITTA'RIUM ALEXIPHAR'MACUM, *Malac'cæ radix, Canna In'dica, Arun'do Indica.* A root cultivated in the West Indies, and supposed to be a remedy for wounds by poisoned arrows.

SAGITTATUS, Sagittal.

SAGO, *Sagus, Saga, Sagu, Segu, Am'ylum palma'ceum*, (F.) *Sagou, Sague.* A fecula, obtained from the pith of the *Sagus rumph'ii, Cycas circina'lis, C. revolu'ta, &c.*, growing in the Moluccas, Philippine Isles, *&c.*, and which is brought to us in small grains. The same substance is, also, obtained from the West Indies, but it is inferior to that from the East. By boiling in water or milk, sago becomes soft and transparent, and forms an agreeable and nutritious food in febrile, calculous, and other disorders. It is made palatable by sugar, lemon-juice, or wine, where the last is not contra-indicated.

To make sago into a proper mucilage for the sick, a tablespoonful of it should be macerated in a pint of water for two hours, and then boiled for fifteen minutes, stirring assiduously. Care must be taken, that the grains are perfectly dissolved by long boiling and constant stirring.

Sago posset is made by putting *sago*, ℥ij, into *water*, Oij; boiling until the mucilage is formed: then rubbing *sugar*, ℥ss, on the rind of a lemon, and putting it with *tincture of ginger*, f℥j, into *sherry*, Oss; adding this mixture to the mucilage, and boiling for five minutes.—It is a good restorative.

SAGO, FRENCH, see Solanum tuberosum, and Arrow-root, common — s. Portland Island, see Arum maculatum.

SAGOU, Sago.

SAGU, Sago.

SAGUE, Sago — *s. Petit*, see Solanum tuberosum.

SAGUERUS GOMUTO, see Toddy — s. Rumphii, see Toddy—s. Saccharifer, see Toddy.

SAGUS, Sago — s. Rumphii, see Sago.

SAHARA, Insomnia.

SAIDSCHÜTZ WATER, Seidschütz water.

SAIGNÉE, Blood-letting—*s. Spoliative*, Spoliativa phlebotomia.

SAIGNEMENT DU NEZ, Epistaxis.

SAILORS, DISEASES, &c., OF. Sailors, by nature of their occupation, are liable to many diseases. Several of these may, however, be warded off by proper attention to cleanliness and ventilation.

SAIN BOIS, Daphne gnidium — *s. Doux*, Adeps præparatus.

SAINT AMAND, MINERAL WATERS OF. Sulphuretted waters, in the department of Du Nord, France. They contain carbonic and sulphohydric acids. The *Boue* or deposit contains sulphohydric acid, and salts of iron and magnesia. Temperature, 64° to 82° Fahr.

SAINT ANTHONY'S FIRE, Erysipelas.

SAINT AUGUSTINE, CLIMATE OF. This sea-port of Florida is a frequent retreat during the winter season for the valetudinarian from the more northern parts of the United States. The climate is certainly comparatively mild and equable; but it is liable to frequent north-east storms. There are only a few days, however, in winter, in which the invalid cannot take exercise in the open air. Tampa Bay, and Pensacola, in Florida, and Mobile, in Alabama, which are sometimes visited by the consumptive, are less liable to the storms in question.

SAINT CATHERINE'S SPRINGS, see Canada, Mineral waters of.

SAINT CHARLES'S ROOT, Carlo Sancto (Radix).

SAINT CROIX, Santa Cruz.

SAINT JAMES'S WORT, Senecio Jacobæa, Thlaspi bursa.

SAINT JOHN'S DANCE, see Mania, dancing. — St. John's Wort, Hypericum perforatum.

SAINT KITTS, see West Indies.

SAINT LEONARD'S, CLIMATE OF. This place, which is situate about a mile to the westward of Hastings, in Sussex, England, is less sheltered than it, and is therefore a less favourable retreat, during the winter months, for the phthisical valetudinarian.

SAINT MYON, MINERAL WATERS OF. Some cold, acidulous waters at Saint Myon, near Riom, in the department of Puy-de-Dôme. They contain free carbonic acid, subcarbonate of soda, chloride of sodium, and carbonate and sulphate of lime.

SAINT NECTAIRE, MINERAL WATERS OF. Springs in the department of Puy-de-Dôme, France. They contain carbonic acid, bicarbonate of soda, and chloride of sodium. Temperature, 75° to 103° Fahr.

SAINT PARDAUX, MINERAL WATERS OF. Chalybeate springs in the department of Allier, France. They contain carbonic acid and iron.

SAINT SAUVEUR, MINERAL WATERS OF. Sulphurous waters in the department of Hautes-Pyrénées, France. Temperature, 76° to 93° Fahr.

SAINT VINCENT'S, see West Indies.

SAINT VITUS'S DANCE, Chorea, see Mania, dancing — s. Vitus's Dance of the Voice, Balbuties.

SAIR, Ulcer.

SAIRE, Essera.

SALAAM CONVULSION, see Convulsion, Salaam.

SALAB, Salep.

SALACITAS, Satyriasis — s. Vulvæ, Nymphomania.

SALAD, CORN, Valeriana dentata.

SALAP, Salep.

SALCOMBE, (CLIMATE OF.) A small place — the Montpelier of Huxham — which is one of the warmest spots on the S. W. coast of England, and, therefore, in this respect adapted for the phthisical invalid as a winter retreat.

SALEP, *Saloop'* (so pronounced.) *Salab, Salap.* The prepared bulb of the *Orchis mas'cula* and other species of Orchis. The salep of Cachmere is from a species of *Euoph'ia.* Salep is in small, irregular, hard masses. In its compusition in relation to water, it is closely analogous to tragacanth. It is possessed of similar virtues with sago, tapioca, &c. The mucilage is prepared by dissolving the powdered salep in hot water, with assiduous stirring, and addiug to the solution sugar and milk.

SALEP, OTAHEITE, Arrow-root,(Tahiti).

SALER'NUM, (SCHOOL OF.) An ancient school of medicine at Salerno in Italy. It was established by Charlemagne, in 802; and was the first Christian university at which medicine was taught. It was much celebrated, especially in the 12th century. The work on hygiene, "*De Conservandâ Valetudine,*" which bears its name, has passed through several editions in various languages. It is supposed to have been written by John of Milan, in 1100, and is in Leonine verses.

SALICARIA, Lythrum salicaria.

SALICINE, see Salix.

SALICORNIA ARABICA, &c., see Soda.

SALINE', *Sali'nus, Salina'cius, Salinac''idus Sali'tus, Salsus, Hali'nus, Halmy'rus,* 'αλμυρος *Halico'des, Sali'nous,* from *sal.* That which contains a salt, or has the properties of a salt.

SALINE DRAUGHT OR MIXTURE. This may be made as follows:—*Potass. carbon.* ℈j, *acid. citric.* seu *tartar.* gr. xv seu *succ. limon. recent.* ℥ss, *aquæ* f℥viij, *syrup. cujusvis* ℥j. M. Given in divided doses as a febrifuge.

SALINE EFFERVESCING DRAUGHT OR MIXTURE is made by adding a due proportion of either of the acids above mentioned, or of lemon-juice, to the proper proportion of the carbonate of soda or potassa. About 25 grains of the acid saturate 30 grains of the carbonate. See Powders, soda.

SALINES, see Kentucky, mineral waters of.

SALINOUS, Saline.

SALIS AMMONIACI FLORES, Ammoniæ carbonas.

SALITIO, Leap.

SALITUS, Saline.

SALIUM, Saliva.

SALIUNCA, Valeriana Celtica.

SALI'VA, *Si'alon, Si'elon, Sialo'ma, Ptyema, Pty'alon, Pty'elon, Sa'lium, Sputa'men, Sputamen'tum, Sputum, Spittle,* (Old. Eng.) *Spaul,* (Prov.) *Spoat.* An inodorous, insipid, transparent, slightly viscid fluid; secreted by the parotid, submaxillary and sublingual glands, and poured into the mouth by the ducts of Steno, Wharton, and Rivinus; the use of which is to mix with the alimentary bolus, and to serve in the process of digestion. It is composed, according to Berzelius, of 992·2 parts of water, 2·9 of a particular animal matter, soluble in water, and insoluble in alcohol, *pty'alin, princip'ium saliva'lē, mate'ria siali'na, Ca'sein of the sali'va, Sal'ivary albu'men,* of 1·4 of mucus, 1·7 of chlorides of potassium and sodium, 0·9 of lactate of soda and animal matter, and 0·2 of soda.

SALIVÆ FLUXUS CIBO VISO, see Salivation.

SALIVAIRE, Anthemis pyrethrum, Salivary.

SALIVAL, Salivary.

SALIVANS, Sialagogue.

SALIVANT, Sialagogue.

SALIVARIS, Salivary — s. Herba, Anthemis pyrethrum.

SAL'IVARY, *Saliva'rius, Saliva'ris, Salivo'sus, Sali'val, Sali'vous,* from *saliva,* (F.) *Salivaire.* That which belongs to the saliva.

SALIVARY ALBUMEN, see Saliva—s. Calculi, see Calculi, salivary.

SALIVARY FIS'TULÆ, *Syalosyrin'ges,* are such as depend upon an accidental opening into the excretory ducts of the salivary glands. Fistulæ are most commonly met with in the duct of Steno.

SALIVARY GLANDS, *Secreting organs of the saliva, Salival glands,* are situate symmetrically, to the number of four, on each side of the face. Their form is very irregular, and their extent varies according to individuals. Their excretory ducts — *Ductus Saliva'rii,* (F.) *Canaux* ou *Conduits salivaires*—carry the saliva directly into the mouth, without pouring it into any intermediate reservoir, as happens in the case of some of the other glands. The salivary glands have been distinguished into,—1. The *parotid;* 2. The *submaxillary;* 3. The *sublingual;* and 4. The *intralingual* or *lingual,* seated at the inferior surface of the tongue, where the mucous membrane forms a fringed fold.

SALIVATIO, Salivation—s. Mercurialis, Salivation, mercurial.

SALIVA'TION, *Saliva'tio, S. cal'ida, Epiph'ora ptyalis'mus, Sialis'mus, Sputum Oris, Sial'achus, Sielismos, Sialorrhœ'a, Sialoze'mia, Ptyalis'mus, Pty'alism, Fluxus sali'væ,* (F.) *Flux de Bouche, Flux salivaire, Ptyalisme ;* from *Saliva.* A superabundant secretion of saliva; occasioned either locally, by the use of irritating masticatories, or under the influence of some cause which acts on the whole economy, and especially of mercurial preparations. In this last case it is accompanied by a coppery taste in the mouth, by swelling of the gums, and sometimes by looseness of the teeth. Salivation may usually be diminished by the use of astringents, laxatives, &c.

Ptyalismus acu'tus sympathet'icus, Salivæ fluxus cibo viso, Mouth watering, the increased flow of saliva produced by the sight, smell, or thought of agreeable food, is a species of ptyalism, as well as the *Ptyaliemus acutus melli'tus, Apoceno'sis ptyalis'mus mellitus, Dulce'do Sputato'rum,* or *Sweet spittle.* In this, the saliva has a sweet or mucilaginous taste.

SALIVATION, MERCU'RIAL, *Saliva'tio mercuria'lis, Sialoze'mia* seu *Ptyalis'mus mercuria'lis, P. hydrargyra'tus,* (F.) *Ptyalisme mercuriel, Salivation mercurielle.* Salivation produced by mercury. The stomatitis that accompanies it is termed *mercurial, Hydrar'gyro-stomati'tis,* (F.) *Stomatite mercurielle.*

SALIVATION MERCURIELLE, Salivation, mercurial.

SALIVATUM, Sialagogue.

SALIVOSUS, Salivary.

SALIVOUS, Salivary.

SALIX. The *Willow, I'tea,* (Prov.) *Sally, Sally-withy,* (Sc.) *Sauch, Saugh, Willan,* (F.) *Saule.* A genus of plants in the Linnæan system. *Ord.* Salicaceæ.

SALIX FRAG''ILIS, *S. pen'dula* seu *decip'iens* seu *amygdali'na* seu *persicifo'lia* seu *Russelia'na* seu *pippoph'æfolia* seu *Trevira'nii,* or Crack willow (Ph. D.) SALIX ALBA, *S. cæru'lea* seu *vitelli'na,* or White willow (Ph. D. and Ph. U. S.), (F.) *Osier.* SALIX LATIFO'LIA, or broad-leaved willow. SALIX CA'PREA, *S. Sphacela'ta* seu *tomento'sa,* or Great round-leaved willow (Ph. L.) SALIX PENTAN'DRIA seu HERMAPHRODIT'ICA. SALIX HU'MILIS, Low bush willow, Speckled willow. SALIX VITULI'NA, SALIX ERIOCEPH'ALA. The bark of each of these has a slightly aromatic odour, and a bitter astringent taste, which is nearly the same in all the species. It is tonic and astringent, and has been used in intermittents, and in cases of dyspepsia, worms, &c. The active principle has been separated, and called *Sal'icine.* It has been found in about fourteen species of salix and eight species of Populus; is like the quinia in medicinal efficacy. Dose, ℈j to ℥j of the powder. Dose of *Salicine* from 4 to 6 grains.

SALIX ÆGYPTIACA, Calaf.

SALLENDERS, Malandria.

SALLIS, Adeps.

SALLOW, Lurid.

SALLY, Salix.

SALLY-WITHY, Salix.

SALMIAC, Ammoniæ murias.

SALOOP, Salep. Also, sassafras tea flavored with milk and sugar. Under this name a tea is sold in the streets of London which consists of an infusion of the wood of *Laurus Sassafras* with the addition of milk and sugar—*Sas'safras Tea.*

SALPETRA, Potassæ nitras, Soda, nitrate of.

SALPINGEMPHRAX'IS, from σαλπιγξ, σαλπιγγος, 'a tube,' and εμφραξις, 'obstruction.' Obstruction of the Eustachian tube; — a cause of deafness.

SALPINGI'TIS, from σαλπιγξ, σαλπιγγος, 'a tube,' and *itis,* 'denoting inflammation.' Inflammation of the Eustachian tube.

SALPINGOCYE'SIS, *Paracye'sis tuba'ria, Gravid'itas tuba'ria,* from σαλπιγξ, σαλπιγγος, 'a tube or trumpet,' and κυησις, 'pregnancy.' Tubal pregnancy.—See Pregnancy, tubal.

SALPINGOMALLÉEN, Tensor tympani.

SALPINGOPHARYNGÆ'US, from σαλπιγξ, σαλπιγγος, 'a trumpet,' and φαρυγξ, 'the pharynx.' Valsalva and Douglas have given this name to a bundle of fibres, which passes from the Eustachian tube to the pharynx.

SALPINGOSTAPHYLINUS, Circumflex muscles—s. Staphylinus internus, Levator palati.

SALPINGOSTENOCHO'RIA, from σαλπιγξ, σαλπιγγος, 'a tube,' στενος, 'narrow,' and χωρα, 'space.' Narrowness or stricture of the Eustachian tube.

SALPINX, Tuba.

SALSAMENTUM CRUDUM, Omotarichos.

SALSAPARILLA GERMANICA, Sarsaparilla Germanica.

SALSEDO MUCRUM, Potassæ nitras.

SALSEPAREILLE, Smilax sarsaparilla — *s. d'Allemagne,* Sarsaparilla Germanica—*s. du Brésil, s. Caraque, s. de Honduras, s. de Péru,* and *s. de Portugal,* see Smilax sarsaparilla.

SALSIFI, Tragopogon porrifolium.

SALSILAGO, Muria.

SALSOLA DECUMBENS, S. Kali.

SALSO'LA KALI, *S. Decum'bens, Kali soda* seu *spino'sum cochlea'tum, Prickly Saltwort, Tragus* sive *Tragum Matthi'oli. Ord.* Chenopodiaceæ; from *sal,* 'salt,' owing to its saline properties. This plant, as well as *Salsola sati'va* and *Salsola soda* seu *longifo'lia, Kali iner'mis, Herba vitri,* produces the alkaline salt, commonly called *Barilla, Soda,* or *Kelp.*

SALSOLA LONGIFOLIA, S. Kali—s. Sativa, &c., see S. Kali, and Soda — s. Soda, see S. Kali.

SALSUGINOSUS, Halmyrodes.

SALSUS, Saline.

SALT, *Sal, Hal, Hals,* 'αλς, (F.) *Sel.* A name formerly given to a considerable number of substances of very different nature. At present, chymists apply the term *Salts* exclusively to the combination of an acid with one or more bases. *Neutral salts* are those in which the acid and base reciprocally saturate each other. *Acid salts* or *supersalts,* (F.) *Sur-sels,* are those in which the acid predominates over the base. *Alkaline salts* or *subsalts,* (F.) *Sous-sels,* those in which the base is, on the contrary, predominant. The different denominations of the salts are compounded, 1. Of the name of the acid; the termination of which is changed into *ite,* when the name of the acid is in *ous ; — ate,* when it is in *ic.* Thus the salts formed by the *sulphurous* acid are *sulphites ;* those by the *sulphuric, sulphates* 2. This name is followed up by that of the oxyd, which enters into the composition of the salt. Thus, the *sulphate of protoxyd of iron* is a combination of sulphuric acid with the protoxyd of that metal. Frequently, to shorten the name, the word *oxyd* is suppressed; and *proto, deuto, trito,* &c., put before the acid :—as *protosulphate of iron. Simple salts* are those resulting from the combination of an acid with a single base; *double salts* with two different bases: *triple* with three, &c. A *haloid salt* is one constituted after the type of common salt, or which contains a metal and a *salt-radical,* as chlorine, iodine, &c. An *oxysalt* is formed from the combination of an acid with an oxide.

When *salt* is used in an abstract sense, it means the chloride of sodium.

SALT, APERIENT, OF FREDERICK, Soda, sulphate of—s. Baker's, Ammoniæ carbonas—s. of Barilla, Soda, subcarbonate of—s. Bay, Soda, muriate of —s. Bitter purging, Magnesiæ sulphas—s. Common, Soda, muriate of—s. Epsom, Magnesiæ sulphas—s. Glauber's, Soda, sulphate of — s. Glauber's, Lymington, see Soda, sulphate of—s. Preston, see Ammoniæ carbonas — s. Rochelle, Soda, tartrate of — s. Rock, Soda, muriate of — s. Sea, Soda, muriate of—s. Secondary, Neutral salt—s. Seignette's, Soda, tartrate of—s. Smelling, Ammoniæ carbonas—s. of Soda, Soda, subcarbouate of — s. Sore-throat, Potassæ nitras fusus sulphatis paucillo mixtus.

SALT OF TARTAR, see Potassæ subcarbonas, and Potash.

SALT, TASTELESS PURGING, Soda, phosphate of.

SALT OF URINE, Ammoniæ carbonas.

SALT, WHITE, Soda, muriate of.

SALT OF WOODSOOT, Ammoniæ carbonas — s. of Wormwood, see Potash.

SALTANS ROSA, Urticaria.

SALTATIO, Dancing — s. Sancti Viti, Chorea.

SALT'ERTON. A village about four miles to the eastward of Exmouth, England, frequented as a winter abode by invalids. It is in a small, open valley on the seashore, and is well protected from winds, particularly the northerly.

SALTISH, Halmyrodes.

SALTPETRE, Potassæ nitras.

SALTUS, Leap, Vulva—s. Tendinum, Subsultus tendinum.

SALTWORT, PRICKLY, Salsola kali.

SALUBRIOUS, Salutary.

SALUBRIOUSNESS, Salubrity.

SALUBRIS, Salutary.

SALU'BRITY, *Salu'britas, Salu'briousness*, (F.) *Salubrité*, from *salus*, 'health.' Any thing which contributes to the health of individuals or of communities. Situations differ materially from each other in this respect; and the cause of the difference is often an interesting topic of inquiry.

SALUS, Sanitas.

SALUTAIRE, Salutary.

SAL'UTARY, *Peries'ticos, Saluta'ris, Salu'ber, Salu'bris, Hygiei'nus, Hygias'ticus, Hygie'rus, Salu'brius*, (F.) *Salutaire, Salubre*. Same etymon. Healthy. That which is favourable to health. Some diseases have been considered salutary; but this is doubtful.

SALUTIF'EROUS, *Salu'tifer*; from *salus, salutis*, 'health,' and *fero*, 'I bear.' Bringing health; health-bearing.

SALVATEL'LA; same etymon, [?] *Vena salvatel'la*, is situate on the back of the hand, near its inner margin. It begins on the posterior surface of the fingers and dorsal surface of the hand, by a plexus, formed of a number of radicles, frequently anastomosing with each other; it then ascends to the inner part of the forearm, where it takes the name—*posterior cubital*. The ancients recommended this vein to be opened in certain diseases, as in melancholic and hypochondriacal affections; and they attributed to such abstraction of blood considerable efficacy in the cure of disease: hence its name.

SALVE, BLISTERING, Unguentum lyttæ— s. Deshler's, Ceratum resinæ compositum—s. Eye, Unguentum oxidi zinci impuri — s. Eye, Singleton's, Unguentum hydrargyri nitrico-oxydi — s. Healing, Cerate of calamine.

SAL'VIA, (from *salveo*, 'to be sound,' owing to its reputed healing qualities;) *S. officina'lis* seu *horten'sis* seu *vulga'ris* seu *minor, Elelis'pancos, Sage, Save*, (F.) *Sauge, Petite Sauge, Thé d'Europe* ou *de France*. *Ord.* Labiatæ. *Sex. Syst.* Diandria Monogynia. Sage leaves, *Salvia* (Ph. U. S.), have a peculiar, aromatic odour, and warm, aromatic, bitterish taste. Their virtues depend upon an essential oil. They are tonic, stimulant, and carminative. In the form of a weak infusion, Sage is occasionally used as a diluent, and as a wash for sore mouth. Dose, gr. xv to xxx or more.

SALVIA AFRICA'NA, *Wild Sage*, a South African species, has the same medical properties as Salvia.

SALVIA COLORATA, Salvia.

SALVIA HORMI'NUM, *S. colora'ta, Hormi'num, H. colora'tum* seu *sati'vum*, (F.) *Sauge-hormin*, of the Pharmacopœias, is used in similar cases.

SALVIA HORTENSIS, Salvia.

SALVIA LYRA'TA, *Wild Sage, Cancer Weed*; indigenous. The fresh leaves, bruised, are used to destroy warts. It has been supposed to be of use in cancer.

SALVIA MINOR, Salvia — s. Officinalis, Salvia.

SALVIA SCLA'REA, *Sclarea, Gallit'richum, Æthio'pis, Biser'mos, Colus Jovis, Common Clary*, (F.) *Sauge sclarée, Grand sauge, Orvale* ou *Toutebonne*. The leaves have been recommended as corroborants and anti-spasmodics.

SALVIA VITÆ, Asplenium ruta muraria — s. Vulgaris, Salvia.

SAMADE'RA IN'DICA, *Ord.* Simarubeæ, furnishes the *Niepa bark*, which is possessed of antiperiodic properties.

SAMBU'CUS, from *σαμβυκη*, an ancient musical instrument, said to have been made of its wood. *Sabu'cus, Sambucus nigra* seu *vulga'ris* seu *arbo'rea, Actê, Infe'lix lignum; Elder, Elnorne, Ellen-tree, Ellarne*, (Sc.) *Boartree, Boretree, Bountree*, (Prov.) *Bottry tree, Burtree, Ellet, Elren, Scaw*, (F.) *Sureau commun*. *Ord.* Caprifoliaceæ. *Sex. Syst.* Pentandria Digynia — (the flower and bark were formerly called *Cano'pum*). The flowers, berries, and bark of the elder have been used in medicine. The *flowers* have been reputed diaphoretic and discutient; the *berries*, aperient and sudorific; the *bark*, purgative, and, in small doses, deobstruent. The flowers are sometimes used in fomentations, and to form a cooling ointment.

SAMBUCUS ARBOREA, Sambucus — s. Chamæacte, S. ebulus.

SAMBUCUS EB'ULUS, *S. Chamæactê* seu *he'lion* seu *hu'milis* seu *herba'cea, Ebulus, Chamæac'tê, Od'ocos, Dwarf-elder, Danewort*, (F.) *Hiéble, Yèble*. The root, interior bark, leaves, flowers, *Sambucus* (Ph. U. S.), berries, (*Baccæ* seu *Grana Actes*,) and seeds, have all been given in moderate doses as resolvents and deobstruents; and in large doses as hydragogues. The berries of *Sambucus Canaden'sis*, the *Common Elder* of America, are made officinal in the Pharmacopœia of the United States. A distilled water of the flowers, *Aqua Sambu'ci, Elder Water*, is officinal in the London and Edinburgh Pharmacopœias.

SAMBUCUS HELION, Sambucus ebulus—s. Herbacea, S. ebulus—s. Humilis, S. ebulus—s. Nigra, Sambucus.

SAMBUCUS PU'BENS, *S. pubes'cens* seu *racemo'sa, Red-berried Elder*; indigenous. The bark, in decoction, is said to be a valuable hydragogue cathartic.

SAMBUCUS RACEMOSA, S. pubens—s. Vulgaris, Sambucus.

SAMI TERRA, *Sa'mian Earth*. An argillaceous earth, found in the island of Samos, to which were ascribed virtues similar to those of the Terra Lemnii.—Galen, Dioscorides.

SA'MIUS LAPIS. A stone found in the Isle of Samos, which the ancients believed to be astringent and refrigerant.

SAMPHIRE, Crithmum maritimum.

SAMPSON, BLACK, Echinacea purpurea.

SAMPSUCHUS, Thymus mastichina.

SAMPSUCUS, Origanum majorana.

SAMPSYCH'INON, *Sampsu'chinum*, An ointment composed of *σαμψυχον*, which was perhaps marjoram. — Dioscorides.

SANABILIS, Curable.

SANABLE, Curable.

SANAMUNDA, Geum urbanum.

SANATIO, Curation, Cure.

SANATIVE, Curative.

SANATORIUM, Sanitarium.

SANATORY, Curative.

SAN GIULIANO, MINERAL WATERS OF. At the foot of the mountain San Giuliano, a league and a half from Pisa, are several mineral springs; temperature from 84° to 107° Fahr.

The spring, *Pozzetto*, contains carbonic acid, sulphates of soda, lime, and magnesia; chlorides of sodium and magnesium; carbonates of lime and magnesia; argil and silica.—Santi.

SAND, see Gravel — s. Brain, see Pineal gland — s. Pineal, see Pineal gland.

SANDALUM CÆRULEUM, Guilandina moringa—s. Rubrum, Pterocarpus santalinus.

SAN'DARAC, *Sandara'cha*, *Gum Ju'niper* or *Sandarach*, *Pounce*, *Gummi Junip'eri*, *Sandara'ca*, *Vernix sicca*, *Resina Junip'eri*, (F.) *Sandaraque*, *Gomme de Genévrier*. A name given, by the Arabs, to an odorous resin, that flows from the *Thuya aphyl'la*. *Ord.* Coniferæ. *Sex. Syst.* Monœcia Monadelphia. It is stimulant, like all the resins; but is very little used.

SANDARACHA GRÆCORUM, Realgar.

SAND-BLIND, nearly blind. A defect of vision, in which small particles seem to fly before the eyes. See Metamorphopsia.

SANDERS, see Saunders.

SANDIVER, see Vitrum.

SANDIX, Plumbi oxydum rubrum.

SANDYX, Plumbi oxydum rubrum.

SANG, Blood — *s. Artériel*, Arterial blood — *s. Dragon*, Rumex sanguineus — *s. Dragon*, see Calamus rotang — *s. Globules du*, Globules of the blood — *s. Perte de*, Hæmorrhagia.

SANGAREE'. Wine and water, sweetened and spiced.

SANGLOT, Sob.

SANGSUE, Hirudo.

SANGUIDUCTUS DURÆ MATRIS, Sinuses of the dura mater.

SANGUIFICATIO, Hæmatosis — s. Debilior, Hyphæmatosis.

SANGUIFLUXUS, Hæmorrhagia — s. Uterinus, Metrorrhagia.

SANGUIMOTION, Circulation.

SANGUIMOTORY, Circulatory.

SANGUIN, (*Vaisseau*,) Blood-vessel.

SANGUINALIS CORRIGIOLA, Polygonum aviculare.

SANGUINA'RIA, from *sanguis*, *sanguinis*, 'blood,' owing to the colour of its juice. *S. Canaden'sis* seu *acau'lis*, *Blood root*, *Bloodwort*, *Puccoon*, *Red Puccoon*, *Red Root*, *Indian Paint*, *Tur'meric*. *Nat. Ord.* Papaveraceæ. *Sex. Syst.* Polyandria Monogynia. A North American plant, the rhizoma, *Sanguinaria* (Ph. U. S.), and seeds of which are used in medicine. They are emetic. Dose of the powder, 5 to 20 grains. They are said to reduce the velocity of the pulse, like digitalis.

SANGUINARIA, Polygonum aviculare.

SANGUINE, *Sanguin'eus*, *Sanguino'sus*, *Hæmat'icus*, *Hæmato'des*, *Hæmate'rus*, *Hæmati'nus*, *Hæmo'des*, *Hæmoi'des*, *Sanguin'eous*, *Hæmat'ic*, (F.) *Sanguin*. From *sanguis*, *sanguinis*, 'blood.' Bloody, blood-like; having the colour of blood, as 'a *sanguine* countenance.' Relating to, or containing blood — as 'sanguine temperament.' Plethoric.

SANGUINEA, Potassæ nitras.

SANGUINENESS, Plethora.

SANGUINEOUS, Plethoric, Sanguine.

SANGUINEUS, Sanguine.

SANGUINIS ABSORPTIO, Hæmorrhophesis — s. Congestio, Congestion — s. Dissolutio, Hæmatecysis — s. Fluor, Hæmoptysis — s. Fluor Vesicæ, Cystorrhagia — s. Ictus, Apoplexy — s. Missio, Blood-letting — s. Profluvium copiosum, Hæmorrhagia — s. Profluvium ex Ore, Stomatorrhagia — s. Stagnatio, Hæmostasis.

SANGUIN'OLENT, *Sanguinolen'tus*, from *sanguis*, *sanguinis*, 'blood.' Tinged with blood. An epithet applied, particularly, to the sputa when so tinged. Bloody.

SANGUINOSUS, Sanguine.

SANGUIPUR'GIUM, from *sanguis*, 'blood,' and *purgare*, 'to cleanse.' Purgation of the blood. A name given by some authors to mild fevers, from an idea that they purged the blood of noxious matters.

SANGUIS, Blood, Sperm — s. Concretus, Coagulum — s. Draconis, see Calamus rotang — s. Hirci siccatus, see Blood — s. Menstruus, see Menses — s. in Urinâ, Hæmaturia — s. Virginis primum menstruatæ, see Menses.

SANGUISOR'BA CANADEN'SIS, *Canada Burnett*. From *sanguis*, 'blood,' and *sorbere*, 'to absorb.' A tall indigenous plant — *Ord.* Rosaceæ — with white, sometimes purple, flowers, which appear from August to October. It has the same virtues as

SANGUISOR'BA OFFICINA'LIS, *S. car'nea* seu *rubra*, *Ital'ian Pim'pinel*, *Pimpinel'la Ital'ica* seu *officina'lis*, (F.) *Pimprenelle noire*. It was formerly used as an astringent and tonic, in hemorrhages, dysentery, &c.

SANGUISUGA, Hirudo.

SANGUISU'GUM, from *sanguis*, 'blood,' and *sugere*, 'to suck.' A barbarous term, to denote too great an accumulation of blood in the heart.—Bonetus.

SANICLE, Sanicula, S. Marilandica—s. American, Heuchera cortusa—*s. de Mariland*, Sanicula Marilandica — s. Yorkshire, Pinguicola vulgaris.

SANICULA, (from *sano*, 'I heal,') Saxifraga granulata.

SANIC'ULA, *S. Europæ'a* seu *officina'rum* seu *mas*, *Astran'tia diapen'sia*, *Cauca'lis Sanic'ula*, *Cuculla'ta*, *Dodeca'theon*, *Sym'phytum petræ'um*, *Diapen'sia*, *D. cortu'sa*, *San'icle*, *Wood March*, (F.) *Toute-saine*. *Ord.* Umbelliferæ. *Sex. Syst.* Pentandria Digynia. This herb was formerly used as a mild astringent. It is bitterish, and somewhat austere.

SANICULA Eboracensis, Pinguicola vulgaris—s. Europæa, Sanicula.

SANIC'ULA MARILAN'DICA, *San'icle*, *Ma'ryland Sanicle*, *Black Snakeroot*, (F.) *Sanicle de Mariland*. This indigenous plant grows in marshes, or low and shaded ground. It is possessed of tonic virtues; and the powdered root is employed in popular practice as a favourite remedy in intermittent fever. It has been recommended, also, in chorea.

SANICULA MONTANA, Pinguicola vulgaris — s. Officinarum, Sanicula.

SANIDO'DES, *Sanio'des*, 'resembling a board,' from *σανις*, gen. *σανιδος*, 'a board,' and *ειδος*, 'resemblance.' One whose thorax is narrow, and, as it were, contracted.

SANIE, Sanies.

SA'NIES, *Ichor*, *Tabum*, *Virus*, *Pus mal'gnum* seu *corrosi'vum*, (F.) *Sanie*, corrupted from *sanguis*, 'blood.' A thin, serous fluid, presenting some of the qualities of pus and blood, and commonly exhaled at the surface of ulcers.

SANIEUX, Ichorous.

SANIODES, Sanidodes.

SANIOSUS, Ichorous.

SANIOUS, Ichorous.

SANITA'RIUM, *Sanato'rium*. Same etymon as the next. A retreat selected for valetudina-

rians, in consequence of its salubrity. Also, an establishment for the treatment of the sick.

SAN'ITARY, *San'atory*, from *sanitas*, 'health,' (F.) *Sanitaire*. That which relates to health, and especially to public health; as *établissement sanitaire, police sanitaire*.

SAN'ITAS, from *sanus*, 'healthy,' *Hygiē'a, Hygie'a, Hygian'sis, Hygi'asis, Integ'ritas, Prosper'itas Valetu'dinis, Salus, Hygieï'a, Valetu'do, Valitu'do, Valetu'do bona* seu *secun'da* seu *com'moda, Hygeï'a, Enzoödyna'mia, Health*, (Sc.) *Heil, Heyle, Heal*, (F.) *Santé*, from *sanus*, 'sound.' Health has been defined,—a state, in which all the functions are exerted with regularity and harmony. A person may, however, be in health, although certain functions are not performed. A blind man, for example, has health when all his functions, except sight, proceed with regularity. *Sanity* is often used for soundness of mind.

SANITAS, Cure.

SANITY, Sanitas.

SANKIRA, Smilax China.

SANS PAIRE, (*Veine*,) Azygos vein.

SANTA CRUZ, (CLIMATE OF.) This West India island is frequently selected as a winter retreat for the phthisical valetudinarian from the United States; but it does not seem entitled to any preference, in such cases, over the other islands of the West Indies, whilst its general salubrity is said to be less than that of many.

SANTAL BLANC, Santalum album—*s. Rouge*, Pterocarpus santalinus.

SANTALUM, see Pterocarpus santalinus.

SAN'TALUM ALBUM, *S. cit'rinum* seu *pal'lidum* seu *myrtifo'lium, Sir'ium myrtifo'lium, Yellow Saunders*, (F.) *Santal blanc. Ord.* Santalaceæ. *Sex. Syst.* Tetrandria Monogynia. The virtues of the wood of the white saunders reside in a volatile oil and resinous principle. The odour is fragrant, and resembles a mixture of ambergris and roses. It has been used as a stimulant and sudorific, but it is not now employed. The saunders woods are called, collectively, in French, *Santaux*.

SANTALUM MYRTIFOLIUM, S. album — *s.* Rubrum, Pterocarpus santalinus.

SANTÉ, Sanitas.

SANTONICUM, Artemisia santonicum.

SAN'TONINE, *San'tonin, Cinin*. A peculiar crystalline substance obtained from Artemisia Santonica. It possesses the anthelmintic properties of the plant. Dose, five or six grains.

SANTORI'NI, FISSURES OF, (F.) *Incisures ou Scissures de Santorini*. Clefts at the upper and back part of the fibro-cartilaginous portion of the external ear.

SANTORINI, TU'BERCLES OF. Small cartilaginous projections at the top of the arytenoid cartilages, which support the ligaments of the glottis. See Corniculum Laryngis.

SAPVE, Sinapis.

SAO'RIA, *Souarja*. The ripe and dried fruit of *Maesa* seu *Bacob'otrys picta*, an Abyssinian tree, which is administered in its native country, in powder, in doses of from 32 to 44 grammes, as a tæniafuge.

SAP, Sax. ræpe. (G.) Saft, *Ar'borum Succus* seu *Lympha*, (F.) *Sève*. The circulating fluid of the vegetable, which corresponds to the blood of the animal.

SAPA, see Rob.

SAPHA'DA. Paracelsus has given this name to reddish scales adherent to the hair in some eruptions of the hairy scalp.

SAPHÆNA, Saphena.

SAPHE'NA, *Saphæ'na*, from σαφὴς, 'manifest,' 'evident.' (F.) *Saphène*. A name given to two subcutaneous veins of the lower limb. These are: 1. The GREAT SAPHENA VEIN, *S. interna, Tibio-malle'olar* (Ch.), (F.) *Grande Veine Saphène* ou *Saphène interne*. Its radicles occupy the inner part of the great toe, and form a transverse arch on the back of the foot, which unites with the saphena externa, and receives at its convex part, which is turned forwards, a number of branches coming from the toes. These radicles, when united, ascend before the inner ankle, and form a trunk, the size of which is farther increased by several branches that proceed from the region of the tarsus, and that of the metatarsus. This trunk ascends vertically at the inner part of the leg; passes behind the inner condyle of the femur; proceeds along the inner part of the thigh; receives other subcutaneous veins, such as the abdominal subcutaneous, the external pudic, &c., and passes through the inferior opening of the crural canal to empty itself into the femoral vein. 2. The LESSER VENA SAPHENA or *Saphena externa, Perone'o-malle'olar Vein* of Chaussier, (F.) *Petite Veine Saphène* ou *Saphène externe*, commences by several roots, which are spread over the dorsum and outer side of the foot, and embrace the outer ankle. Behind this, they unite into a single trunk, which ascends obliquely, approaching the tendo Achillis, and proceeds vertically towards the ham to open into the popliteal vein.

SAPHÈNE, Saphena.

SAPHE'NOUS, *Sapheno'eus*; from *Saphena* Of or belonging to the saphena.

SAPHENOUS NERVES are two in number, and are branches of the crural or femoral nerve. They are the *short saphenous — nervus cutaneus internus*; and the *long saphenous — nervus cutaneus internus longus*.

The *external saphenous*, formed by the union of the communicans poplitei and communicans peronei, passes down the leg by the side of the external saphenous vein of the foot.

SAPID, *Sa'porous, Sap'idus*, (F.) *Savoureux*, from *sapere*, 'to taste.' Possessed of sapidity Having the power of affecting the organs of taste.

SAPID'ITY, *Sap'idness, Saporos'ity, Sapor*, (F.) *Sapidité*. The quality of bodies that give them taste.

SAPIN COMMUN, Pinus picea.

SAPIN'DUS, (*sapo*, and *Indus*, 'Indian soap,') *S. Sapona'ria, Sapona'ria, Soap Tree*, (F.) *Savonnier commun. Ord.* Sapindaceæ. The name of the plant that affords the *Soap Nuts, Sapona'riæ Nu'culæ, Bac'cæ Bermuden'ses, Soap-berries*. A spherical fruit about the size of a cherry, the cortical part of which is yellow, glossy, and so transparent as to show the spherical black nut that rattles within, and includes a white kernel. The cortical part of this fruit, which has similar effects with soap in washing, has been recommended in chlorosis, and as a stomachic and deobstruent.

SAPO, *Soap*, Sax. rape, *Smegma*, (F.) *Savon*. A product obtained by treating fatty bodies with caustic alkalies dissolved in water. In the Pharmacopœia of the United States, it means Soap made with soda and olive oil. See Sapo medicinalis.

YELLOW SOAP is formed of turpentine, oil, and alkali.

Castile Soap, being made of fine olive oil, is generally used internally. The yellow and soft soaps are the most stimulating; and are, consequently, best adapted for particular cutaneous eruptions.

Internally, soap is purgative and diuretic; externally, it is detergent and stimulant. Soapy water is used with the greatest success, in cases

of poisoning by acids. It is mostly applied externally to bruises and sprains. In *Pharmacy*, it is used to favour the solution of resins.

Sapo Ac''idus, *Acid Soap*, is a combination of a fixed oil with an acid.

Sapo Ammoniacalis, Linimentum ammoniæ fortius — s. Ammoniæ oleaceus, Linimentum ammoniæ fortius — s. Amygdalinus, Sapo medicinalis — s. Cacaotinus, Sapo coconeus — s. Calcarius, Linimentum aquæ calcis — s. Castiliensis, see Sapo medicinalis.

Sapo Coco'neus, *Sapo cacaoti'nus, Soap of Cocoa-Nut Oil*, (F.) *Savon de cacoa*, has been much used in Germany in herpetic affections.

Sapo Durus, S. medicinalis — s. Hispanicus, see S. medicinalis.

Sapo Kalicus, S. Mollis.

Sapo Liq'uidus, *Liquid Soap, Lotio sapona'cea*, is a cosmetic which is composed of *olive oil* ℥iv, *ol. tartari per deliquium* ℥ss. Rub together, and add *aquæ rosarum* ℥xij.

Sapo Medicina'lis, *Sapo amygdali'nus, Medic''inal Soap*, (F.) *Savon médicinal*, is made with oil of sweet almonds and half its weight of caustic alkali, or, like the *Sapo Hispan'icus* seu *Castilien'sis, Spanish* or *Castile soap, Sapo durus, Sapo* (Ph. U. S.), (F.) *Savon dur*, of olive oil and soda.

Sapo Mollis, *S. vir'idis* seu *ni'ger* seu *ka'licus, Common* or *Soft Soap*, (F.) *Savon mou* ou *noir*, is made of potass and oil or tallow. The *Sapo vulgaris* or 'common soap' of the Pharm. U. S. is made with soda and animal oil.

Sapo Niger, *Black Soap, Melanosmeg'ma*, is a composition of train oil and an alkali: and Green Soap, *Sapo vir'idis*, of hempseed, linseed, or rape oil, with an alkali. See Sapo mollis.

Sapo Vegetabilis, Pulvis gummosus alkalinus — r. Viridis, Sapo mollis — r. Vulgaris, see Sapo mollis.

SAPONA'CEOUS, *Sapona'ceus*, (F.) *Saponacé*, from *sapo, saponis*, 'soap.' Soapy. Containing soap, as *Linimentum saponaceum*, Soap liniment.

SAPONAIRE, Saponaria.

SAPONA'RIA, from *Sapo*, 'soap,' the juice forming a lather with water. *Soap-wort, Bruisewort, Bouncing Bet. Stru'thium, Lana'ria, Lychnis officinalis* seu *sylves'tris, Ibix'uma, Boot'ia vulga'ris*, (F.) *Saponaire, Savonnière*. *Ord.* Caryophyllaceæ. *Sex. Syst.* Decandria Digynia. A decoction of the leaves of this plant has been recommended in scrofula, cancer, old syphilis, cutaneous eruptions, jaundice, visceral obstructions, &c. It is hardly ever used.

Saponaria, Sapindus saponaria.

Saponariæ Nucul.æ, see Sapindus saponaria.

SAPONÉ. Soap, to which are added substances capable of communicating to it new properties, without affecting its own.—Béral.

SAPO'NEA. A pectoral medicine, prepared with sweetened syrup of violets, and oil of sweet almonds.

SAPON'ULES, *Sapon'uli*, (F.) *Savonules*. Same etymon. Combinations of volatile or essential oils with different bases.

Acid Saponules are combinations of such oils with different acids.

SAPONULÉ. A tincture (*alcoolé*), sufficiently charged with soap to cause it to assume a gelatinous shape. — Béral.

SAPONURE. A medicine, formed of soap, in powder, and of resinous or extractive matters.

SAPOR, Sapidity, Savour.

SAPOROSITY, Sapidity.

SAPOROUS, Sapid.

SAPO'TA, *S. Alchras, Achras Sapota* seu *austra'lis* seu *Zapota, El nispero, Oval-fruited Sapota*, (F.) *Sapotier, Sapotillier, Sapotilla. Fam.* Sapotaceæ. *Sex. Syst.* Hexandria Digynia. A tree which grows in the Antilles, and particularly at St. Domingo. Its fruit is much esteemed. It resembles the marmalade of quinces; and hence has been called *natural marmalade*. The seeds make an emulsion, which has been given in nephritic affections. The bark has been recommended as a febrifuge.

Sapota Alchras, Sapota.

SAPOTIER, Sapota.

SAPOTILLA, Sapota.

SAPOTILLIER, Sapota.

SAPROPYRA, Typhus gravior.

SAPROS, Putrid, Rancid.

SAPROS'TOMUS, from *σαπρος*, 'foul, of a bad odour,' and *στομα*, 'mouth.' One who has an offensive breath.

SAPROTES, Putrefaction.

SAR'APUS, *Sarapous*. One who has a large foot; whose toes are largely separated, or whose feet are much asunder in walking; from *σαιρω*, 'I grin,' and *πους*, 'the foot.' See Kyllosis.

SARATO'GA, MINERAL WATERS OF. The Saratoga springs in New York are ten miles north-east from Ballston. They contain the same ingredients as those of the latter place; and are much frequented by visitors from every part of the United States. The following analysis has been given of the *Congress spring*. In a wine gallon — *gaseous contents:* carbonic acid, 311 cubic inches; atmospheric air, 7. *Solid contents:* chloride of sodium, gr. 385; iodide of sodium, gr. 3.5; bicarbonate of soda, gr. 8.982; bicarbonate of magnesia, gr. 95.788; carbonate of lime, gr. 98.098; carbonate of iron, gr. 5.075; silica, gr. 1.5; bromide of potassium, a trace. Total, gr. 597.943. — Steel.

The *Walton* or *Iodine spring* contains chloride of sodium, carbonate of magnesia, and iodide of sodium.

SARCEPIPLOCELE, Sarcoëpiplocele.

SARCEPIPLOMPHALOCELE, Sarcoëpiplomphalocele.

SARCEPIPLOMPHALUS, Sarcoëpiplomphalus.

SARCIDIUM, Caruncle.

SARCINA, Fœtus.

Sar'cina Ventric'uli, *S. Goodsir'ii, L. Sarcina*, 'a pack, a woolpack;' *Merismopæ'dia ventriculi* (Robin). A microscopic cryptogamous plant found in the fluid of waterbrash.

SARCION, Caruncle.

SARCITES, Anasarca — s. Flatuosus, Emphysema.

SARCITIS, Myositis.

SARCOCE'LE, *Hernia carno'sa, Scirrhus Testic'uli*, from *σαρξ, σαρκος*, 'flesh,' and *κυλη*, 'a tumour;' *Sarco'ma scroti*, (F.) *Hernie charnue*. Scirrhus or cancer of the testicle. This disease affects adults particularly; and appears most commonly after an inflammatory swelling of the testicle. Sometimes it is dependent upon a blow; at others, it makes its appearance without any appreciable cause. It is well known by a hard, heavy, ovoid or spherical swelling of the testicle, which is, at first, slightly, or not at all painful, and merely causes an unpleasant traction on the spermatic cord. There is no heat or change of colour of the skin; the spermatic cord is swollen, and participates in the affection; very painful shootings occur; the lymphatic glands of the abdomen become swollen, and form a tumour, which may, at times, be felt through the abdomen; and the patient, at length, dies with every sign of the cancerous diathesis. The prognosis is very unfavourable. The only means, indeed, that can save life, is the extirpation of the testicle.

SARCOCOL'LA, (F.) *Colle-chair*, from *σαρξ*,

'flesh,' and κολλα, 'glue.' A resinous matter, obtained from *Penæ'a Sarcocol'la, P. mucrona'ta,* and other species of Penæa; an African shrub, which has been so called from a belief that it facilitates the consolidation of flesh. It is in the form of small, oblong, semitransparent globules, of a yellowish or reddish hue, and smells like aniseed. It was once employed as an astringent and detergent.

SARCODES, Carneous.

SARCOËPIPLOCE'LE, *Sarcepiploce'lē,* from σαρξ, σαρκος, 'flesh,' επιπλοον, 'the epiploon,' and κηλη, 'a tumour.' Epiplocele, complicated with sarcoma or sarcocele.

SARCOËPIPLOM'PHALUS, *Sarcepiplom'phalus, Sarcepiplomphaloce'lē,* from σαρξ, σαρκος, 'flesh,' επιπλοον, 'the epiploon,' and ομφαλος, 'the navel.' Umbilical hernia, formed by scirrhous epiploon or complicated with sarcoma.

SARCOHYDROCELE, Hydro-sarcocele.

SARCOLEM'MA, *Sarcole'ma,* from σαρξ, σαρκος, 'flesh,' and λεμμα, 'a coat.' The sheath which surrounds the fibrils of muscle that form a fibre. It is quite distinct from the areolar membrane that binds the fibres into fasciculi. — Bowman. See Perymisium.

SARCOLOGIA, Myology, Sarcology.

SARCOL'OGY, *Sarcolog''ia,* from σαρξ, σαρκος, 'flesh,' and λογος, 'a discourse.' The part of anatomy which treats of the soft parts. It comprises myology, angiology, neurology, and splanchnology

SARCO'MA, *Emphy'ma Sarcoma, Sarcom'atous tumour, Sarco'sis, Porrus, Sarcophy'ia, Ecsarco'ma, Exsarco'ma, Tumor car'neus, Excrescen'tia carno'sa, Pol'ypus carno'sus,* from σαρξ, σαρκος, 'flesh.' Any species of excrescence having a fleshy consistence.

SARCOMA, CARCINOMATOUS, Scirrhus — s. Cercosis, see Cercosis — s. Epulis, Epulis — s. Gelatinous, see Tumour, fibro-cellular — s. Mastoid, Mammary sarcoma — s. Medullare, see Encephaloid — s. Medullary, Encephaloid, Hæmatodes fungus—s. Pulpy, Hæmatodes fungus—s. Scroti, Sarcocele.

SARCOMA, COMMON VAS'CULAR OR ORGANIZED of Abernethy, *Emphy'ma Sarcoma Vasculo'sum,* is vascular throughout: texture simple: when bulky, napped on the surface with arborescent veins. Found over the body and limbs generally.

SARCOMATEUX, Sarcomatous.

SARCOMATODES, Sarcomatous.

SARCOMATOSUS, Sarcomatous.

SARCOM'ATOUS, *Sarcomato'sus, Sarcomato'des,* (F.) *Sarcomateux.* Belonging to, or having the characters of sarcoma.

SARCOMPHALUM, Sarcomphalus.

SARCOM'PHALUS, *Sarcom'phalum,* from σαρξ, σαρκος, 'flesh,' and ομφαλος, 'the navel.' A scirrhous or *fleshy* tumour, developed at the navel.

SARCOMYCES, Sarcospongus.

SARCOPHAGUS, Carnivorous, Catheretic.

SARCOPHYIA, Excrescence, Sarcoma.

SARCOPSYLLA PENETRANS, *Chique.*

SARCOPTE, Acarus.

SARCOPTES, SCABIEI, see Psora.

SARCOPYO'DES, from σαρξ, σαρκος, 'flesh,' πυον, 'pus,' and ειδος, 'resemblance.' Having the appearance of pus mixed with flesh. An epithet given to certain excreted matters, and particularly to the sputa of those labouring under consumption.

SARCO'SIS, from σαρξ, σαρκος, 'flesh.' The formation of flesh. Also, sarcoma.

SARCO'SIS BULBI, *Exophthal'mia fungo'sa* seu *sarcomat'ica.* A fleshy growth from the globe of the eye.

SARCOSIS UTERI, Metrauxe.

SARCOSPONG'US, *Sarcomy'ces,* from σαρξ, σαρκος, 'flesh,' and σπογγος, 'fungus.' A fleshy fungus.

SARCOSTOSIS, Osteo-sarcoma.

SARCOTIC, Incarnans.

SARCOUS, from σαρξ, σαρκος, 'flesh.' Of, or belonging to, flesh or muscle — as '*sarcous tissue.*'

SARCOUS ELE'MENTS, *Prim'itive par'ticles.* The elementary particles, which, by their union, form the mass of muscular fibre. — Bowman.

SARDIASIS, Canine laugh, Risus sardonicus.

SARDONIA HERBA, Ranunculus sceleratus.

SARDONIASIS, Canine laugh, Risus sardonicus.

SARDONIUS RISUS, Canine laugh.

SARE, Essera.

SARRACE'NIA, *Side-saddle plant, Flytrap.* The root of *Sarracenia flava* and *S. variola'ris* is bitter and astringent, and has been used in South Carolina, as a domestic remedy in dyspepsia.

SARRASIN, Polygonum fagopyrum.

SARRÈTE, Trismus infantum.

SARRIETTE, Satureia hortensis—*s. de Crète,* Satureia capitata.

SARSA, Smilax sarsaparilla.

SARSAPARILLA, (S.) *Zarza,* 'a briar,' and *parilla,* 'a little vine.' Menispermum Canadense, Smilax S.

SARSAPARILLA, FALSE, Aralia nudicaulis.

SARSAPARIL'LA GERMAN'ICA, *Gramen major* seu *rubrum, Salsaparil'la Germanica, Carex Arena'ria,* (F.) *Laiche, L. des Sables, Salsepareille d'Allemagne, Chiendent rouge. Ord.* Cyperaceæ. *Sex. Syst.* Monœcia Triandria. A plant, which grows plentifully on the sea-coasts of Europe. It has been recommended in some mucous affections of the trachea, in rheumatism, gout, &c.

SARSAPARILLA, INDIAN, Hemidesmus Indicus — s. Wild, Aralia nudicaulis.

SARTAPARILLA, Smilax sarsaparilla.

SARTO'RIUS, from *sartor,* 'a tailor,' because used in crossing the legs. *Suto'rius, Longis'simus Fem'oris, Fascia'lis, F. Longus* seu *suto'rius,* (F.) *Ilio-cresti-tibial, Ilio-prétibial* (Ch.), *Couturier.* A muscle situate at the anterior part of the thigh. It is long, small, and flattened, and extends, obliquely, from the anterior and superior spine of the ilium to the superior and inner part of the tibia. This muscle can, also, bend the pelvis on the thigh, and conversely.

SARX, Flesh, Pulp.

SARZA, Smilax sarsaparilla.

SASSA GUM. A gum, occasionally carried into the European markets from the East, and answering exactly to Bruce's description of the product of a tree, which he calls *Sassa.* It has considerable resemblance to Gum Tragacanth.

SASSAFRAS, Laurus sassafras, Nectandra cymbarum—s. Medulla, see Laurus sassafras—s. Nut, see Pichurim beans—s. Radicis cortex, see Laurus sassafras.

SASSAFRAS, SWAMP, Magnolia glauca.

SASSAFRAS TEA, Saloop.

SASSY BARK, A poisonous bark of a large tree—*Genus,* Erythrophleum, *E. Judiciа'le; Nat. Ord.* Fabaceæ; *Red water tree* of Sierra Leone—growing in Western and Central Africa, used in an ordeal to which persons, suspected of witchcraft, secret murder, and other crimes, are subjected, to test their innocence or guilt. Hence it is called, in Congo, *ordeal bark,* and in Ashantee and Liberia, *doom bark.*

SAT'ELLITE, *Satelles,* genitive *Satellitis.* That which guards. That which is placed near.

SATELLITE VEINS are those that accompany arteries.

SATHE, Penis.

SATIES, Satiety.

SATIETAS, Plesmone, Satiety.

SATI'ETY, *Sati'etas, Satu'ritas, Sa'ties, Satura'tio, Plethos, Plesmonē*, from *satiare* (itself from *satis*, 'enough'), 'to give enough.' Disgust for food; commonly produced by repletion.

SATIN, Lunaria rediviva.

SATURANS, Absorbent (medicine.)

SATURATIO, Satiety, Saturation.

SATURA'TION, *Satura'tio*, from *saturare, saturatum*, (*satis*, 'enough'), 'to satiate.' The state of a compound in which its elements are combined in such proportions that a fresh quantity of either cannot be added without producing excess.

SATUREI'A CAPITA'TA, from Σατυρος, 'the Satyrs;' owing to its presumed power of exciting to venery. *Cil'iated Sa'vory, Thymus, T. sylvestris* seu *capita'tus* seu *Cret'icus, Cuni'la*, (F.) *Sarriette de Crète. Ord.* Labiatæ. *Sex. Syst.* Didynamia Gymnospermia. Possesses similar properties to thyme.

SATUREI'A HORTEN'SIS, *Satureia, S. sati'va, Cuni'la sativa Plin'ii, Thymbra, Summer Sa'vory*, (F.) *Sarriette*. An aromatic plant, cultivated for culinary purposes. It has been used, as an excitant, in anorexia, anaphrodisia, &c.

SATUREIA ORIGANOIDES, Cunila mariana — s. Sativa, S. hortensis.

SATURITAS, Satiety.

SATURNI DULCEDO, Plumbi superacetas.

SAT'URNINE, *Saturni'nus*, from *saturnus*, lead.' Containing, or caused by, lead.

SAT'URNINE BREATH. The peculiar odour of the breath in one labouring under Saturnismus.

SATURNISM'US, *Intoxica'tio* seu *Cachex'ia* seu *Dyscrasi'a saturni'na, Molybdocachex'ia*, from *saturnus*, 'lead.' Poisoning by lead; lead-poisoning; saturnine cachexy.

SATURNUS, Plumbum.

SATYRI'ASIS, from Σατυρος, 'a Satyr;' because the Satyrs were greatly addicted to venery. *S. furens, Satyrias'mus, Satyris'mus, Priapis'mus, Salac''itas, Brachu'na, Aras'con, Lagne'sis Salac''itas, L. furor masculi'nus, Lagne'a, Lagni'a, Lagno'sis, Lascivi'tas, Lasciv'itas, Tenti'go vere'tri.* An irresistible desire, in man, to have frequent connexion with females, accompanied by the power of doing so without exhaustion. The causes are commonly obscure. Sometimes, the abuse of aphrodisiacs has occasioned it. The principal symptoms are: — almost constant erection; irresistible and almost insatiable desire for venery; frequent nocturnal pollutions. Cold lotions; the cold bath; a mild diet; active exercise, &c., are the only means that can be adopted for its removal.

SATYRIASIS FURENS, Satyriasis.

SATYRIASMUS, Satyriasis.

SATYRION, Orchis mascula.

SATYRISMUS, Satyriasis.

SATYRIUM, Goodyera pubescens.

SAUARJA, Saoria.

SAUCE-ALONE, Alliaria.

SAUCE, GREEN, Rumex scutatus.

SAUCH, Salix.

SAUER KRAUT, (G.), 'sour cabbage,' (F.) *Chou-croûte.* A culinary preparation, made with chopped cabbage, left to attain an incipient state of acetous fermentation. It is reputed by the Germans to be salubrious, easy of digestion, and eminently antiscorbutic.

SAUGE, Salvia — *s. des Bois*, Teucrium scordium — *s. Grande*, Salvia sclarea — *s. Hormin*, Salvia horminum — *s. de Jérusalem*, Pulmonaria — *s. Petite*, Salvia — *s. Sclarée*, Salvia sclarea.

SAUGH, Salix.

SAULE, Salix.

SAUMURE, Muria.

SAUNDERS, RED, Pterocarpus santalinus — s. Tree, Pterocarpus santalinus — s. Yellow, Santalum album.

SAURA, Lizard.

SAURU'RUS CER'NUUS, from σαυρος, 'a lizard,' and ουρα, 'a tail.' *Lizard's Tail, Breast weed.* Indigenous; *Order*, Saururaceæ; flowering in June. It has been used in lumbago. The bruised root is emollient, and is a popular application to inflamed breasts.

SAUSAGE POISON, Allantotoxicum.

SAUT, Leap.

SAUTEUSES, see *Convulsionnaire.*

SAUVE-VIE, Asplenium ruta muraria.

SAVE, Sage.

SAVEUR, Savour.

SAVINE, Juniperus sabina.

SAVINIER, Juniperus sabina.

SAVON, Sapo — *s. Ammoniacal*, Linimentum ammoniæ fortius — *s. Cacao*, Sapo cocoaceus — *s. Calcaire*, Linimentum aquæ calcis — *s. Dur*, Sapo durus — *s. Médicinal*, Sapo medicinalis — *s. Mou*, Sapo mollis — *s. Noir*, Sapo mollis.

SAVONNIER COMMUN, Sapindus saponaria.

SAVONNIÈRE, Saponaria.

SAVONULE, Saponulus.

SAVONULUS, Saponulus.

SAVORY, CILIATED, Satureia capitata — s Summer, Satureia hortensis.

SA'VOUR, *Sapor, Taste*, (F.) *Saveur.* Quality of bodies, by which they act upon the sense of taste. Chymists, at times, avail themselves of this quality to analyse an unknown substance.

SAVOUREUX, Savoury.

SA'VOURY, *Sap'idus*, (F.) *Savoureux.* An epithet given to bodies that have taste; and particularly to those that excite a very agreeable impression on the organ of taste.

SAVOYAN, Galium verum.

SAW, *Prion, Serra*, (Da.) Sawe, (Sax.) ꝛaga, (F.) *Scie.* A surgical instrument, made like a common saw; and used for sawing the bones in amputations, or for removing exostoses, &c. Saws of different sizes and shapes are used in surgery. The crown of the trepan is nothing more than a species of circular saw.

SAW, AMPUTA'TION, *Serra amputato'ria.* The saw used in amputation.

SAW, HEY'S. An instrument used by Mr. Hey, of Leeds, in fractures of the cranium. It consists of a long handle, to which a small saw with a convex or straight edge is attached, and by which a piece of bone of any shape may be removed. With the trephine, the saw must always be circular.

SAW PALMETTO, Chamærops serratula — s. Wort, Liatris.

SAXIF'RAGA, from *saxum*, 'a stone,' and *frango*, 'I break.' Pimpinella saxifraga—s. Anglica, Peucedanum silaus.

SAXIF'RAGA CRASSIFO'LIA. *Ord.* Saxifragaceæ. *Sex. Syst.* Decandria Digynia. The root of this species of saxifrage has been extolled by Pallas, as pre-eminently antiseptic.

SAXIFRAGA GRANULA'TA, *S. alba, Sanie'ula, Sedum, White sax'ifrage*, (F.) *Saxifrage granulée.* Recommended as diurectic and lithontriptic; but not used.

SAXIFRAGA RUBRA, Spiræa filipendula — s. Vulgaris, Peucedanum silaus.

SAXIFRAGE, BURNET, Pimpinella saxifraga — s. *Granulée*, Saxifraga granulata — s. Meadow, Peucedanum silaus — s. White, Saxifraga granulata.

SAXIFRAGUS, Lithontriptic.

SAXON'ICUS PULVIS. A powder, prepared with the roots of the wild and cultivated ange-

lica; the asclepias vincetoxicum, &c. It was considered formerly as an antidote.

SCAB, *Sca'bies*, from *scabere*, 'to dig.' *Scall*, (Prov.) *Rove*. An incrustation, which forms upon a sore, owing to the concretion of the fluid discharged from it. An eschar.

SCABBY or SCABBED. Covered or diseased with scabs.

SCABIES, Psora — s. Agria, Lichen — s. Capitis, Porrigo lupinosa, Porrigo scutulata — s. Capitis favosa, Porrigo favosa—s. Crustosa, Radzyge—s. Fera, Ecthyma.

Sca'bies Feri'na, *Itch of animals*, *Mange*, (pronounced *Maynge*.) A cutaneous disease, which affects almost all domestic animals, but especially the horse, sheep, dog, and cow. It is said to have been transmitted to man; but this is questionable.

Scabies Ferina, Psoriasis — s. Norwegica Boeckii, Radzyge — s. Papuliformis, Prurigo — s. Sicca, Lichen, Psoriasis — s. Venerea contagiosa, Scherlievo.

SCABIEUSE ORDINAIRE, Scabiosa.

SCABIOLA, Scabies.

SCABIO'SA, *S. arven'sis*, *Tri'chera arven'sis*, *Field Sca'bious*, (Sc.) *Eastning wort*, (F.) *Scabieuse ordinaire*. *Ord.* Dipsaceæ. *Sex. Syst.* Tetrandria Monogynia. From *scaber*, 'rough,' owing to its rough hairy surface.' The plant is bitter and sub-astringent, and was formerly used in the cure of leprous affections and diseased lungs.

Scabiosa Arvensis, Scabiosa — s. Cardnifolia, Echinops.

Scabiosa Succi'sa, *Succisa*, *S. praten'sis*, *Asteroceph'alus succisa*, *Morsus Diab'oli*, *Devil's bit*, (F.) *Mors du Diable*, has similar properties.

SCABIOUS, Erigeron Philadelphicum — s. Field, Scabiosa — s. Sweet, Erigeron heterophyllum.

SCABISH, Œnothera biennis.

SCABRITIES, Lichen, Trachoma.

SCALA, 'a ladder.' A machine formerly used for reducing dislocations of the humerus.

Scalæ of the Coch'lea, *Gyri* seu *Ductus spira'les* seu *Cana'les cochleæ*, (F.) *Rampes* ou *Échelles du Limaçon* — arc the cavities in the cochlea, separated from each other by the spiral septum. The one—*Scala inter'na* seu *poste'rior* seu *inferior coch'leæ*, *S. tym'pani* — would communicate with the cavitas tympani by the fenestra rotunda, were it not for the membrane that closes it. The other — *Scala exter'na* seu *ante'rior* seu *superior coch'leæ*, *S. vestib'uli* — opens into the cavity of the vestibule. The scalæ communicate with each other by an opening at the top of the partition.

Scala Anterior Cochleæ, see Scala — s. Clausa, see Scala—s. Externa cochleæ, see Scala —s. Inferior cochleæ, see Scala—s. Interior cochleæ, see Scala — s. Posterior cochleæ, see Scala — s. Superior cochleæ, see Scala — s. Tympani, see Cochlea, and Scala — s. Vestibuli, see Cochlea, and Scala.

SCALDRICKS, Sinapis arvensis.

SCALE, Sax. ɔcalan, 'to divide, separate;' (G.) Schale, 'shell, peel:' schälen, 'to shell, to peel.' *Squama*, *Lepis*, (F.) *Escaille*, *Écaille*. An opake and thickened lamina of cuticle, commonly produced by some degree of inflammation of the true skin, over which it is formed.

Scale, Dry, Psoriasis.

SCALÈNE ANTÉRIEUR, Scalenus anticus — s. *Postérieur*, Scalenus posticus.

SCALE'NUS, *σκαληνος*, 'irregular or unequal.' Geometers employ this word to designate a triangle whose three sides are unequal. Anatomists have given the name to two muscles. 1. Scalenus Anti'cus, *Portion of the Costo-trachelian* (Ch.), (F.) *Scalène antérieur*, is situate at the internal and inferior parts of the neck. It is long and triangular; and is inserted, below, at the upper surface of the first rib; and, above, at the anterior tubercle of the transverse processes of the 3d, 4th, 5th, and 6th cervical vertebræ. This muscle bends the neck, and draws it to its side. It can also raise the first rib. 2. Scalenus Posti'cus, (F.) *Scalène postérieur*, *Portion of the Costo-trachelian* (Ch.), is situate behind the last. It is, also, long and triangular; but more bulky than the *S. anticus*. It is attached, below, to the outer surface of the first two ribs; and terminates, above, at the summit of the transverse processes of the last six vertebræ of the neck. This muscle bends the neck laterally, and can elevate the first two ribs. Some anatomists, as Albinus and Sömmering, have described five scaleni muscles on each side, and have called them *Scalenus prior*, *S. min'imus*, *S. latera'lis*, *S. me'dius*, *S. posti'cus*. Riolan and Chaussier only describe one scalenus muscle on each side. Cowper and Douglas, and the generality of the English anatomists, admit three, *S. anti'cus*, *me'dius*, and *posti'cus*; or, *primus*, *secun'dus*, and *ter'tius*; Winslow, Boyer, and many of the French anatomists,—two, as above described.

SCALING — same etymon as Scale—in dentistry, is an operation, which consists in removing the tartar from the teeth.

SCALL, ((Sc.) *Skaw*,) Impetigo, Scab—s. Asbestos, see Eczema of the hairy scalp—s. Crusted, Impetigo—s. Dry, Psoriasis—s. Honeycomb, Porrigo favosa — s. Humid, Eczema—s. Milky, Porrigo larvalis—s. Papulous, Ecthyma—s. Running, Eczema, Impetigo — s. Vesicular, Eczema capitis — s. Washerwoman's, Psoriasis diffusa.

SCALLARD, Porrigo.

SCALLED HEAD, Porrigo, P. scutulata.

SCALP, Teut. Schelpe, 'a shell.' (Old Eng.) *Scop.* The integuments covering the head. The *hairy scalp* is called, also, *Capillit'ium*, *Tricho'ton*, *Cæsa'ries*, (F.) *Chevelure*, *Cuir chevelu*.

SCALPEL, *Scalpel'lum*, *Scalpel'lus*, *Culter*, *Inciso'rium*, *Smi'leon*; from *scalpo*, 'I cut.' A cutting instrument, formed of a blade of well-tempered steel, very sharp, of variable shape and size, and fixed solidly in a handle. Its *use* is to divide the soft parts in operations, dissection, &c.

SCALPELLUM, Scalpel—s. Lenticulare, Phacopis.

SCALPELLUS, *Bistouri*, Scalpel.

SCALPEUM, *Bistouri*.

SCALPRUM, Raspatorium — s. Chirurgicum, Lancet.

Scalprum Denta'rium, *Lima denta'ria*. A tooth-file. A dental file or file used by the dentist.

Scalprum Rasorium, Raspatorium.

SCALY, Squamous.

Scaly Diseases or Squamæ, *Lepida'ses*, form the second order in Willan and Bateman's system of cutaneous diseases.

SCAMMA, Fossa.

SCAMMONÉE D'ALEP, Convolvulus scammonia.

SCAMMONIUM, see Convolvulus scammonia — s. Syriacum, Convolvulus scammonia.

SCAMMONY, Convolvulus scammonia.

Scammony, Bourbon. The concrete juice of *Periploca Mauritiana*.

Scammony, Germany. The concrete juice of Convolvulus sepium.

Scammony of Montpellier, Cynanchum Monspeliacum.

SCAMNUM HIPPOCRAT'ICUM, (*scamnum*,

'a bench.') *Bathron Hippocrati'on* of Galen, (F.) *Banc d'Hippocrate.* A machine invented by Hippocrates for reducing fractures. It was a sort of bed, six feet long, on which the patient was fixed. Straps were attached above and below the fracture or luxation, and extension and counter-extension were effected by a winch. It is described in Galen, Oribasius, Scultetus, &c. See Bathron.

SCANDIX, S. cerefolium.

SCANDIX BULBOCASTANUM, Bunium bulbocastanum.

SCANDIX CEREFO'LIUM, *Scandix, Scandyx, Pecten Ven'eris, Cerefolium, Daucus Seprin'ius, Chærophyll'um, Ch. Sati'vum* seu *Cerefo'lium, Anthris'cus cerefolium, Chærefo'lium, Chervil,* (F.) *Cerfeuil. Ord.* Umbelliferæ. *Sex. Syst.* Pentandria Digynia. A culinary herb, which is slightly aromatic and grateful. It is said to be gently aperient and diuretic.

SCANDIX ODORA'TA, *Sweet Cic''ely.* Properties the same as the other. Also, Chærophyllum odoratum.

SCANDULARIUS MUSCULUS, Parathenar, Transversus pedis.

SCANDYX, Scandix cerefolium.

SCAPHA, *Scaphus,* 'a skiff or cock-boat,' from σκαπτω, 'I make hollow.' The excavation or cavity of the external ear, between the helix and anthelix. The meatus auditorius externus. The rima vulvæ. Also the name of a bandage for the head, mentioned by Galen, and called, likewise, *Tholus Diocle'us.*

SCAPHIA, Nates.

SCAPHION, Cranium, Papaver (Capsule).

SCA'PHIUM OCULA'RE, *Pelvis Ocula'ris, Eye-glass,* (F.) *Bassin* ou *Gondole oculaire, (Œillière.* A small porcelain, glass or metallic vessel, used for applying lotions to the eye.

SCAPHO-CARPO-SUPER-PHALANGEUS POLLICIS, Abductor pollicis brevis.

SCAPHOID, *Scaphoï'des,* from σκαφη, 'a skiff,' and εἰδος, 'form.' A name given to several parts.

SCAPHOID FOSSA, *Fossa Scaphoï'des,* (F.) *Enfoncement Scaphoïde.* A small cavity at the upper part of the internal ala of the pterygoid process, in which the peristaphylinus internus is attached.

SCAPHOID BONE OF THE HAND, *Os Scaphoïdes Manûs* seu *navicula're* seu *cymbifor'mē, Boat-like bone,* (F.) *Scaphoïde de la main.* The first bone of the first row of the carpus. The upper surface is convex, and articulated with the radius. The under and outer surfaces are also convex,—to be articulated with the trapezium and trapezoides. Between the upper and under cartilaginous surfaces there is a *rough fossa* for the insertion of the capsular ligament. The anterior and inner surface has an *oval cavity,* where it is articulated with the os magnum, which gives name to the bone. There is a *process* on the outer end of the bone, for the attachment of part of the anterior transverse ligament of the wrist.

SCAPHOID BONE OF THE FOOT, *Os Scaphoïdes Pedis* seu *navicula're* seu *cymbifor'mē, Boat-like bone,* (F.) *Scaphoïde du Pied.* This bone is situate at the forepart of the astragalus and inner part of the foot. The *posterior surface* forms a cavity, somewhat like that of a boat, for receiving the head of the astragalus. There is a prominence at the inner side of the bone, for the insertion of tendons, muscles, and strong ligaments. The forepart of the bone is convex, and divided into three articular surfaces for articulation with the ossa cuneiformia. Between the os naviculare and astragalus, the foot has its principal lateral and rotary motions; although each of the other joints of the tarsus contributes a little. Part of the tibialis posticus is inserted into it.

SCAPHOÏDE DE LA MAIN, Os scaphoides manûs — *s. du Pied,* Os scaphoides pedis.

SCAPHOÏDO-ASTRAG'ALAN, *Scaphoïdo-astragala'nus.* That which relates to the scaphoid bone and astragalus. The articulation of these bones is so called; and the ligament which strengthens it is termed the *Scaphoïdo-astragalan ligament.*

SCAPHOÏDO-CUBOID, *Scaphoïdo-cuboïdæ'us.* That which relates to the scaphoid and cuboid bones. The articulation of those bones is so called.

SCAPHULA, Navicularis fossa.

SCAPHUS, Auditory canal, external, Rima vulvæ, Scapha.

SCAP'ULA, *Scap'ulum, Plata, Omopla'ta, Homoplata, Scop'tula, Epino'tion, Latitu'do hu'meri, Omop'latē, Os latum hu'meri, Scutum thora'cis* seu *cordis, Spath'ula, Pteryg'ium, Chelo'nium. Spat'ula; Blade-bone, Shoulder-blade,* (Prov.) *Shield-bone, Plate-bone, Spade-bone,* (F.) *Omoplate.* An irregular, broad, flat bone, of a triangular shape, situate at the posterior part of the shoulder. It has, 1. A *posterior* or *dorsal surface* or *Dorsum, Testu'do scapu'læ,* divided transversely into two parts, by a triangular process, called *Spine of the Scapula;* which terminates by a considerable eminence, called *Acromion.* Above the spine, is the *Fossa supra-spinata;* below it, the *F. infra-spinata.* 2. An *anterior* or *costal surface* or *venter,* forming the *Fossa subscapularis.* 3. A *superior* or *cervical edge,* which is thin, and terminates, anteriorly, by a strong, curved apophysis, called the *coracoid process.* 4. A *posterior* or *vertebral edge,* called, also, the *base.* 5. An *outer* or *axillary* or *inferior edge,* having a thick, truncated angle, in which is the *glenoid cavity.* With this is articulated the head of the humerus. The glenoid cavity is separated from the body of the bone by a narrow part called the *cervix* or *neck.* The edges or margins are, also, called *costæ.* The scapula has three angles — an *inferior, superior,* and *anterior.*

SCAPULA, Humerus.

SCAPULÆ NASI, *Partes latera'les nasi.* The lateral parts of the nose.

SCAPULAL'GIA; from *scapula,* 'the shoulder-blade,' and ἀλγος, 'pain.' Arthralgia of the shoulder-joint.

SCAP'ULAR, *Scap'ulary, Scapula'ris,* (F.) *Scapulaire,* from *scapula,* 'the shoulder-blade.' That which relates or belongs to the scapula.

SCAPULAR APONEURO'SIS. A broad, thin aponeurosis, with decussating fibres; which is attached, *above,* to the spine of the scapula; *below,* to a crest between the teres major and infra-spinatus; *within,* to the spinal edge of the scapula; and which, at its middle, unites with the thin aponeurosis that covers a part of the external surface of the deltoid.

SCAPULAR ARTERIES. These are several. *a.* The *Superior scapular, Superficial scapular* of Sömmering, *Dorsa'lis scapulæ superior, Transversa'lis scapulæ, T. Hu'meri.* This arises from the subclavian; and often from the inferior thyroid, or from a trunk common to it and the *posterior scapular* or *transverse scapular* or *cervical.* It passes behind the clavical, above the superior edge of the scapula, and buries itself between the dorsal surface of that bone and the muscles inserted into it. *b.* The *inferior scapular* or *common scapular* or *internal scapular* or *subscapular artery, A. Thorac''ica axilla'ris* seu *ala'ris* is of considerable size. It arises from the inferior part of the axillary artery, behind the brachial plexus —gives off several branches to the armpit, and divides into two branches:—the one, *Scapula'ris*

interna, and the smaller of the two, is distributed, almost entirely, to the serratus major anticus, and latissimus dorsi; the other, the larger of the two, the *Dorsa'lis Scap'ulæ inferior* seu *Circumflex'a Scapula're*, which distributes its branches to the subscapular and supra-spinal, and infra-spinal regions.

SCAPULAR NOTCH, see Notch, scapular.

SCAPULAR VEINS follow the same course as the arteries, which they accompany.

SCAPULARE, Scapulary.

SCAP'ULARY, *Scapula're*, *Fascia Scapula'ris*, from *scapula*. A broad, linen bandage, divided into two tails for three quarters of its length, the undivided extremity of which is attached to the posterior and middle part of a bandage carried round the body; the tails passing over the shoulders; and being attached to the anterior part of the body bandage, to prevent it from slipping down.

SCAPULODYN'IA, from *scapula*, and *ὀδυνη*, 'pain.' A hybrid word, signifying pain or rheumatism of the shoulder.

SCAP'ULO-HU'MERAL. An epithet given to the *shoulder-joint*. It is an orbicular articulation, resulting from the reception of the head of the humerus into the glenoid cavity of the scapula. To keep the bones in connexion, there are: 1. A very strong, conoidal capsular ligament; passing from the circumference of the glenoid cavity around the neck of the humerus. 2. A *fibro-cartilaginous ring*, called the glenoid ligament, and a synovial capsule.

SCAPULO-HUMÉRAL, Teres major—*s. Humëro-olécranien*, Triceps extensor cubiti—*s. Hyoïdien*, Omohyoideus—*s. Radial*, Biceps flexor cubiti—*s. Trochitérien, grand*, Infra-spinatus.

SCAPUS, Penis, see Hair.

SCAR, Cicatrix.

SCAR, *Seam*. To mark with a cicatrix or seam;—as *scarred*, (Sc.) *arred*, means marked with a cicatrix or seam.

SCARABÆOLUS HEMISPHÆRICUS, Coccus cacti.

SCAR'BOROUGH, MINERAL WATERS OF. *Scarborough Spa*. A celebrated English chalybeate, at Scarborough, in Yorkshire. One of the springs is a simple, carbonated chalybeate, like that of Tunbridge: the other has an admixture of purging salt. Scarborough, having the additional advantage of sea-bathing, is much frequented by invalids.

SCARCHT, Hermaphrodite.

SCARDAMYG'MUS, *Scardamyx'is*, (F.) *Cligнement*, from *σκαρδαμυσσειν*, 'to wink.' Winking.

SCARFSKIN, Epidermis.

SCARIFICA'TION, *Scarifica'tio*, *Amyx'is*, *Schasis*, *Catacas'mus*, *Catachas'mus*, *Amyg'mus*, *Schasmus*, *Encharax'is*, from *σκαριφαομαι*, 'to make a slight scratch.' The act of scarifying. Also, a small incision, *Am'ychē*, made into the skin with a lancet, bistoury, or scarificator, for different therapeutical purposes,—as to draw blood, or to discharge some effused fluid. When the scarifications are very superficial, and do not go further than the skin, they are termed by the French, *Mouchetures*.

SCARIFICA'TOR, *Scarificato'rium*, *Schaste'rium*. Same etymon. An instrument for making scarifications. It consists of a small brass box, of a cubical shape, in which 10 or 12 lancet points turn upon a common pivot. By means of a spring, all these blades can be made to issue at once, and make as many scarifications.

SCARIFICATORIUM, Scarificator.

SCARIOLA, Cichorium endivia, Lactuca scariola.

SCARIOLE, Cichorum endivia.

SCARLATA, Scarlatina.

SCARLATI'NA, from (I.) *scarlatte*, 'a deep red.' *Scarlata*, *Enanthe'sis Rosa'lia*, *Rosa'lia*, *Rossa'lia*, *R. squamo'sa*, *Rosa'liæ*, *Rube'olæ*, of some, *Morbil'li ig'nei* seu *confluen'tes*, *Morbus scarlatino'sus*, *Febris scarlatino'sa* seu *rubra*, *Gut'turis morbus epidem'icus Forest'i*, *Pur'pura*, *Typhus scarlati'nus*, *Porphyris'mus*, *Porphyris'ma*, *Scarlet* or *Rash-fever*, (F.) *Fièvre rouge*, *F. pourprée*. The characteristic symptoms of scarlatina are:—a scarlet flush, appearing about the second day of fever on the face, neck, and fauces; and progressively spreading over the body; terminating about the 7th day. Two great varieties may be reckoned:—the *S. simplex* seu *febris* seu *benig'na* seu *sine angi'nâ*, in which the fever is moderate and terminates with the efflorescence; prostration of strength being trifling, and the contagious property slight;—and the *S. Angino'sa* seu *Paristhmit'ica* seu *Cynanch'ica* seu *mit'ior*, in which the fever is severe; the throat ulcerated; the eruption later in its appearance, and less extensive; often changing to a livid hue; the fever being highly contagious. *Scarlati'na malig'na* seu *gra'vior*, has been reckoned a variety of this, in its worst degree. It agrees with the Cynanche maligna of Cullen.

Scarlatina belongs to the *Major exanthemata*, and is a disease, chiefly, of children. The eruption differs from that of measles, in being an efflorescence not raised above the cuticle. Measles, too, is attended with catarrhal symptoms, whilst the complication, in scarlatina, is cynanche. The treatment of simple scarlatina need not be much. It must be antiphlogistic. If the throat be very much ulcerated, acid gargles and counter-irritants must be employed; and if the affection become manifestly typhoid, and the sore throat of a malignant character, the case must be treated like typhus gravior; with antiseptic gargles of bark, acid, &c. Anasarca sometimes supervenes on scarlatina, and requires attention. Purgatives are here demanded as well as the use of sorbefacients, such as mercury and squill, &c.

SCARLATINA ANGINOSA, see Scarlatina—s. Benigna, see Scarlatina—s. Cynanchica, see Scarlatina—s. Febris, see Scarlatina—s. Gravior, see Scarlatina—s. Miliaris, Rubeola—s. Mitior, see Scarlatina—s. Paristhmitica, see Scarlatina—s. Pustulosa, Rubeola—s. Rheumatica, Dengue—s. Sine Anginâ, see Scarlatina—s. Urticata, Urticaria.

SCARLATI'NOUS, *Scarlati'nal*, *Scarlatino'sus*. Relating or appertaining to scarlatina.

SCARLET BERRY, Solanum dulcamara.

SCARLET FEVER, Scarlatina.

SCATACRASIA, Scoracrasia.

SCATACRATIA, Scoracrasia.

SCAW, Sambucus.

SCEAU DE SALOMON, Convallaria polygonatum.

SCELAL'GIA, from *σκελος*, 'the leg,' and *αλγος*, 'pain.' Pain of the leg.

SCELALGIA ANTICA, Neuralgia femoro-pretibialis—s. Postica, Neuralgia femoro-poplitea—s. Puerperarum, Phlegmatia dolens.

SCELETEU'SIS. Mummification. Also, the mode of making a skeleton, *Skeletopœ'a*, *Syntax'is*.

SCELETOLOGIA, Skeletology.

SCELETON, Skeleton.

SCELETOPŒA, Sceleteusis.

SCELETUM, Skeleton—s. Artificiale, see Skeleton—s. Naturale, see Skeleton.

SCELONCUS, Phlegmatia dolens.

SCELORRHEU'MA, *Rheumatis'mus cruris*, from *σκελος*, 'the leg,' and *ρευμα*, 'defluxion, rheumatism.' Rheumatism of the leg.

SCELOS, Leg.

SCELOTYRBE, Chorea, Porphyra nautica — s. Febrilis, see Subsultus tendinum—s. Festinans, Paralysis agitans — s. Tarantismus, Chorea.

SCEPARNON, Amnios, Ascia.

SCEPASTERIUM, *Couvrechef.*

SCEPASTRUM, *Couvrechef.*

SCEPTRUM, Penis.

SCHASIS, Scarification.

SCHASMUS, Scarification.

SCHASTERION, Fleam, Lancet, Scarificator.

SCHEBA ARABUM, Artemisia santonica.

SCHEDULA, Prescription.

SCHERBET', *Sherbet', Serbet', Tscherbet', Sorbe'thum, Sorbet'tum, Sorbe'tum.* A drink prepared by the Turks, Persians, Egyptians, &c., with sugar and the juice of acid fruits.

SCHERLIEVO, *Skerljevo, Male di Scherlievo, Male di Breno, Male di Fiume, Male di Scarlievo, Male scabioso venereo, Margaretizza, Morbus Croatus* seu *fluminien'sis, Frambœ'sia Illyr'ica, Scabies venerea contagio'sa, Venereal itch.* A name given to a particular form of syphilis, observed in Illyria. It is said to be capable of being communicated without immediate contact; and, that its principal symptoms are: — pains in the bones, ulceration of the fauces, pustules, and fungous growths in different parts of the body.

Affections, known by this name, as well as by those of *Male di Breno, Falcadi'na, Boala* and *Frenga*, prevail in the frontier countries of the Austrian empire, and are generally regarded as contagious, of syphilitic origin, and as having been introduced from a surrounding country. The terms appear, however, in the course of time, to have been applied to a variety of ulcers, eruptions, and other morbid conditions in no way connected with syphilis, so that they lost their peculiar signification. — Sigmund.

SCHERO'MA. A dryness of the eye from the want of lachrymal secretion. — Dictionaries.

SCHIAS, Neuralgia femoro-poplitea.

SCHIATICUS, Sciatic.

SCHIDAKE'DON, *Schidace'dum, Schindace'dum, Schindal'amus, Schindal'mus,* from *σκιζω*, 'I cleave.' A longitudinal fracture of a bone.—Galen.

SCHINDACEDUM, Schidakedon.

SCHINDALAMUS, Schidakedon, Schindylesis.

SCHINDALESIS, Schindylesis.

SCHINDALMUS, Schidakedon, Schindylesis.

SCHINDYLE'SIS, *Schindale'sis, Schindal'amus, Schindal'mus.* An articulation of bones — by furrowing, as it were; as in that of the vomer, which constitutes, in part, the septum narium. Also, the act of splitting into small pieces: from *σχινδυλεω*, 'I split into small pieces.'— Hippocrates.

SCHINELÆ'ON, from *σχινος*, 'the mastic tree,' and *ελαιον*, 'oil;' *Oleum lentis'cinum.* Oil of mastic. — Dioscorides.

SCHINOCEPHALUS, Scillocephalus.

SCHINOS, Scilla.

SCHINZNACH or HAPSBURG, MINERAL WATERS OF. These springs are situate three leagues from Baden, and are amongst the most celebrated bathing-places in Switzerland. The waters are of the saline sulphurous kind; and have a high reputation in cutaneous and rheumatic affections, visceral obstructions, and glandular enlargements. They contain sulphate of lime, sulphate of soda, chloride of sodium, chloride of magnesium, sulphate of magnesia, sulphate of lime, carbonate of magnesia, and oxide of iron; sulphohydric acid, and carbonic acid gases.

SCHISMA, Fissure, Rima.

SCHISTOCEPH'ALUS, from *σχιστος*, 'cleft, separated,' and *κεφαλη*, 'head.' A monster having some part of the head cleft or fissured. — Gurlt.

SCHISTOCOR'MUS, from *σχιστος*, 'cleft, separated,' and *κορμος*, 'trunk.' A monster having some part of the trunk cleft or fissured. — Gurlt.

SCHISTOM'ELUS, from *σχιστος*, 'cleft, separated,' and *μελος*, 'a limb.' A monster whose limbs are fissured.

SCHISTORRHACHIS, Hydrorachis.

SCHISTOSO'MUS, from *σχιστος*, 'cleft,' and *σωμα*, 'body.' A malformation of the abdomen, in which the fissure and eventration extend over the entire length of the abdomen; the lower extremities being absent, or very little developed, so that the body appears as if truncated inferiorly.—Vogel.

SCHIZA, Rima, Rima vulvæ.

SCHIZATRICH'IA, *Trichoschi'sis, Schizotrich'ia,* from *σχιζω*, 'I split,' and *θριξ, τριχος*, 'a hair.' The splitting of the hairs at their extremities. — J. P. Frank.

SCHLANGENBAD, MINERAL WATERS OF. Schlangenbad is a much-frequented watering-place in Germany. The waters contain a little carbonic acid, and carbonate of soda. Temperature 86° Fahrenheit.

SCHNAPPS, SCHIEDAM, see Gin.

SCHNEIDERIAN MEMBRANE, Pituitary membrane.

SCHŒNANTHUS, Juncus odoratus.

SCHOLA, School.

SCHOLLERA OXYCOCCOS, Vaccinium oxycoccos.

SCHOOL, *Schola,* (F.) *École.* A place of education. In Europe the large Medical Schools are usually attached to the universities. In England, however, there has been no medical school of celebrity at either of the universities of Oxford or Cambridge; owing greatly to their provincial situation. Of late, two schools have existed in London, attached to the London University — University College and King's College. Excellent private schools have, however, long existed in that metropolis. The medical schools of Europe which have been most celebrated, are those of Edinburgh, Leyden, Berlin, Halle, Tubingen, Paris, Montpellier, Bologna, Padua, Pavia, and Pisa. In the United States, the medical schools are numerous; at this time not fewer, perhaps, than 40. Those most numerously attended, are Jefferson Medical College of Philadelphia, the medical department of the University of Pennsylvania, and the University of Nashville.

SCHOOLEY'S MOUNTAIN, MINERAL WATERS OF. The waters of this New Jersey Spring are a carbonated chalybeate. According to Dr. McNevin, they contain extractive, chloride of sodium, chloride of calcium, chloride of magnesium, carbonate of lime, sulphate of lime, carbonate of magnesia, silex, and carbonate, and oxide of iron.

SCHORBUTUS, Purpura.

SCHOUSBÆA COCCINEA, Cacoucia coccinea.

SCHWALBACH or LANGEN-SCHWALBACH, MINERAL WATERS OF. Schwalbach is a town of Germany, seated on the Aa, 32 miles west of Frankfort. The waters contain chloride of sodium, carbonates of lime and magnesia, iron, sulphate of lime, carbonic acid, oxygen, &c. Employed as a tonic.

SCHWANN, WHITE SUBSTANCE OF, see Substance, white, of Schwann.

SCHWENDECK, MINERAL WATERS OF. These waters are about 5 leagues from Münich, in Bavaria. They contain carbonic acid; carbonate and sulphate of lime, chloride of calcium; chloride of magnesium; carbonate of soda, and

oxide of iron, and are much used for cutaneous affections.

SCIAT'IC, *Sciat'icus, Ischiat'ic, Ischiat'icus, Schiat'icus,* (F.) *Sciatique,* from *ισχιον,* 'the haunch.' A word formed by contraction from *ischiatic,* which latter is still used. See Ischiatic.

SCIATIC NERVE, GREAT, *Nervus ischiad'icus, Great fem'oro-poplite'al* (Ch.), (F.) *Grand nerf sciatique,* ought to be esteemed a continuation of the sacral plexus. It issues from the pelvis between the pyramidalis and superior gemellus; descends along the posterior part of the thigh; and after having given branches to the gemini, quadratus, obturator externus, glutæus maximus, semi-membranosus, semi-tendinosus, biceps and third abductor muscles, it divides, about the inferior third of the thigh, into two branches; the one, named the *external popliteal;* the other, the *internal.*

SCIATIC NERVE, LESSER, *Inferior glu'teal branch of the sacral plexus, Lesser fem'oro-poplite'al nerve* (Ch.), (F.) *Nerf petit sciatique,* which seems especially formed by the 2d and 3d sacral, is given off from the lower part of the plexus, and escapes from the pelvis beneath the pyramidalis muscle. It gives branches — *nervi cuta'nei clu'nium inferio'res* — to the glutæus maximus; a *sciatic branch* or *infra-pelvic cutaneous* or *perineal cutaneous, Pudenda'lis longus infe'rior,* which passes under the tuberosity of the ischium, and furnishes filaments to the glutæus maximus, and to the muscles of the perinæum, urethra, penis, scrotum, &c.; and *a posterior femoral cutaneous branch — middle posterior cutaneous nerve* — the filaments of which traverse the femoral aponeurosis, to be distributed on the skin of the posterior part of the thigh. The principal branch of the lesser sciatic nerve divides, near the ham, into two or three filaments, which descend under the integuments almost as far as the inferior part of the leg.

SCIATIC NOTCH, GREAT, *Sciatic Fora'men, Incisu'ra ischiad'ica major,* (F.) *Grande échancrure sciatique* ou *grand trou sciatique,* is a large notch at the posterior edge of each os innominatum, below the posterior and inferior iliac spine, which is converted into a foramen by the sacrum and sacro-sciatic ligaments. The *lesser sciatic notch, Incisu'ra ischiad'ica minor, Luna Albi'ni,* (F.) *Petite échancrure ischiatique,* is much smaller than the last, from which it is separated by the sciatic spine. It gives passage to the tendon of the obturator internus, and to the internal pudic vessels and nerves.

SCIATIC REGION, Ischiadic region.

SCIATIC SPINE, *Spine of the Ischium, Spinous Proc''ess of the Ischium,* is a short, flat, pyramidal eminence on the os innominatum, above the preceding foramen; which gives insertion to the lesser sacro-sciatic ligament.

SCIATICA, Neuralgia femoro-poplitea.

SCIATIQUE, Neuralgia femoro-poplitea, Sciatic.

SCIE, Saw.

SCIENTIA HERMETICA, Alchymy—s. Medendi, Medicina — s. Medica, Medicina.

SCIERO'PIA, from *σκιερος,* 'shady,' and *ωψ,* 'the eye.' A defect of vision, in which all objects have a darker hue than natural.

SCILLA, *σκιλλα,* from *σχιζω,* 'I cleave, I split' [?]. *Scilla* seu *Squilla marit'ima, Scylla, Aschil, Schinos, Oc'ulus Typho'nis, Ornithog'alum marit'imum* seu *squil'la, Stella'ris* seu *Urgin'ea scilla, Cepa marit'na scilla, Squilla, Squill* or *sea onion, Eye of Typhon,* (F.) *Ognon marin. Ord.* Liliaceæ. *Sex. Syst.* Hexandria Monogynia. Native of Spain, Austria, &c. The bulb or root of the squill has a bitter, nauseous taste, and is extremely acrid; inflaming the skin when rubbed on it. Its acrimony, on which its virtues depend, is destroyed by heat, drying, and keeping. It is extracted by vinegar, spirit, and water. In large doses, squill is emetic and purgative; in small doses, diuretic and expectorant. Its active principle has been called *scillitine.* Dose, gr. j to v of the dried root, united or not with mercury.

SCILLA ESCULEN'TA, *Phalan'gium esculen'tum, Eastern Quamash, Wild Hy'acinth;* indigenous: flowering in May. An article of diet amongst the Western Indians. It is made into bread and poultices for inflamed breasts.

SCILLIT'IC, *Scillit'icus,* (F.) *Scillitique,* from *scilla,* 'squill.' Containing squill.

SCILLOCEPH'ALUS, *Schinoceph'alus,* from *σκιλλα,* 'the squill,' and *κεφαλη,* 'head.' One who has a large bulbiform head.

SCINCUS, *σκιγκος* or *σκιγγος.* A species of *Saurus* or *Lacer'ta,* common in Egypt, and much extolled by the ancients as alexipharmic and aphrodisiac.

SCINTIL'LA VEN'ERIS, 'a spark, a relic of Venus.' A name given, by Paracelsus, to the impotence and loss of power in the limbs, produced by syphilis.

SCINTILLEMENT DE L'ŒIL, Confusio.

SCIOM'ACHY, *Skioma'chia, Skiamachia;* from *σκια,* 'a shade,' and *μαχη,* 'a fight.' A gymnastic exercise with the ancients, which consisted in a mock encounter at boxing and jumping with one's own shadow.

SCIRHUS, Scirrhus.

SCIRPUS PALUSTRIS, Eleocharis palustris.

SCIRRHE, Scirrhus.

SCIRRHOBLEPHARONCUS, see Scleriasis.

SCIRRHOCELE, Orcheocele scirrhosa.

SCIRRHOGAS'TRIA, *Scirrhus ventric'uli,* (F.) *Squirrogastrie;* from *scirrhus,* and *γαστηρ,* 'stomach.' Scirrhus of the stomach.

SCIR'RHOID, *Scirrhoi'des, Scirrho'des,* from *σκιρος,* 'scirrhus,' and *ειδος,* 'resemblance.' Resembling scirrhus.

SCIRRHOMA, Scirrhus.

SCIRRHOPHTHAL'MIA, *Sclerophthal'mia,* from *scirrhus,* and *οφθαλμος,* 'the eye.' *Cancer oc'uli.* Cancer of the eye.

SCIRRHOPHTHALMIA PALPEBRARUM, see Scleriasis.

SCIRRHOSARCA NEONATORUM, Induration of the cellular tissue.

SCIRRHOSIS, Scirrhus.

SCIRRHOUS, *Scirrho'sus,* (F.) *Squirrheux,* from *scirrhus.* Of or belonging to scirrhus.

SCIRRHOUS SARCO'MA OF AB'ERNETHY, *Emphy'ma sarco'ma scirrho'sum.* Hard, rigid, vascular infarction of glandular follicles; indolent, insentient, glabrous; sometimes shrinking and becoming more indurated. Found in glandulous structures.

SCIRRHUS, *Scirhus, Squirrhus, Skirrhus, Scirrho'ma, Scirrho'sis, Cancer scirrho'sus, Carcino'ma simplex* seu *fibro'sum, Indura'tio malig'na, Sclerus, Carcinom'atous sarco'ma, Hard* or *Fibrous cancer;* from *σκιρος,* 'hard,' 'indurated;' (F.) *Squirrhe, Squirre, Schirre, Skirre, Cancer dur* ou *squirrheux* ou *fibreux.* A disease, so called from the hardness that characterizes it. It is a state of induration, of a peculiar kind, affecting glandular structures generally, but capable of occurring in other textures. It usually precedes carcinoma, of which it may, indeed, be considered as the first stage. Scirrhus must not be confounded with the induration which succeeds inflammation, although the two states are often complicated, and may stand, occasionally, in the relation of cause and effect to each other. Scirrhus is ordinarily accompanied by violent shooting pains. It is also irregular on its surface;

and when cut into has a bluish or grayish white colour. When the surgeon is satisfied of the existence of scirrhus, he had better remove it at once. No other treatment seems to possess much advantage.

Galen uses the term *Scirrho'sis* for a livid excrescence caused by inflammation.

SCIRRHUS ET CARCINOMA VENTRICULI, see Gastrostenosis cardiaca et pylorica — s. Hepatis, Hepatoscirrhus—s. Intestinorum, Enteropathia cancerosa — s. Palpebrarum, see Scleriasis — s. Testiculi, Sarcocele — s. Uteri, Metroscirrhus — s. Ventriculi, Gastroscirrhus.

SCISSION, see Generation.

SCISSIPARITÉ, see Generation.

SCISSORS, *Scissor*, 'a carver,' from *scindere*, *scissum*, 'to cut.' *Forfex*, *Forpex*, *Psalis*, *Tomis*, (F.) *Ciseaux*. A well-known instrument in common use, and often employed in surgery. Scissors are composed of two cutting blades, crossing each other and moving upon an axis. They are *straight* or *curved*. Sometimes the curve is on the flat side, when they are called, in France, *Ciseaux à cuiller;* at others, on their edges. The scissors, bent so that the blades make an obtuse angle with the handles are also much used. They are called in France *Ciseaux coudés*. Scissors are used for dividing soft, loose, isolated parts, which it would be difficult to reach and to cut with the bistoury. They are employed, likewise, in the operation for harelip, and for removing warts, fungous excrescences, &c.

SCISSURA, Fissure — s. Vulvæ, see Rima.

SCISSURÆ, Rhagades.

SCISSURE DE GLASER, Fissure, glenoid— —*s. Grand médiane du Cervelet*, Valley—*s. de Santorini*, Santorini, fissure of.

SKERLJEVO, Scherlievo.

SCLAREA, Salvia sclarea.

SCLEREMA, Induration of the cellular tissue.

SCLÉRÈME, Induration of the cellular tissue.

SCLEREMIA, Induration of the cellular tissue.

SCLEREMUS, Induration of the cellular tissue.

SCLERENCEPHA'LIA, *Indura'tio cer'ebri*, from σκληρος, 'hard,' and εγκεφαλον, 'the brain.' (F.) *Endurcissement du cerveau*. Induration of the brain.

SCLERIA, Scleriasis.

SCLERI'ASIS, *Sclero'ma*, *Sclero'sis*, *Scle'ria*, *Sclerys'mus*, *Seph'irus*, from σκληρος, 'hard.' Any kind of hardness or induration. Sometimes hardness of the eyelids, *Callo'sitas* seu *Scirrhophthal'mia* seu *Scirrhus palpebra'rum*, *Scirrhoblepharon'cus;* at others, hardness of the genital organs of the female; probably synonymous with scirrhus. — Galen. Paulus. Hardness of bones, *Fragil'itas Os'sium*.

SCLERITIS, Sclerotitis.

SCLERODERMA, Induration of the cellular tissue.

SCLERODES, Sclerotic.

SCLERO-IRITIS. Inflammation of the sclerotic and iris.

SCLEROMA, Induration of the cellular tissue, Scleriasis.

SCLEROMENINX, Dura mater.

SCLERONYXIS, Scleroticonyxis.

SCLEROPHTHALMIA, Hordeolum, Scirrophthalmia.

SCLEROS, Hard.

SCLEROSARCO'MA, from σκληρος, 'hard,' and σαρκωμα, 'a fleshy tumour.' A hard, fleshy tumour, seated on the gums, and resembling a cock's comb.

SCLEROSIS, Induration of the cellular tissue, Scleriasis.

SCLEROSTENOSIS CUTANEA, Induration of the cellular tissue.

SCLEROT'IC, *Sclerot'ica*, from σκληροω, 'I harden.' *Cornea opa'ca*, *Sclero'des*, *Tunica dura* seu *albugin'ea* seu *du'rior et crass'ior* seu *ex'tima* seu *alba* seu *can'dida* seu *innomina'ta oc'uli*, *Sclero'tis*, (F.) *Sclérotique*. A hard, resisting, opake membrane, of a pearly white colour and fibrous nature, which covers nearly the posterior four-fifths of the globe of the eye, and has the form of a sphere truncated before. It is strengthened by the expansion of the muscles of the eye, to which expansion many anatomists have given the name *Tu'nica albugin'ea*. It forms the *white of the eye*, *Albu'men* seu *Album oc'uli*, *Lav'chades*, *Log'ades*, *Loch'ades*, *Lev'cades*. The sclerotic is penetrated posteriorly by a round opening, for the passage of the optic nerve; and, anteriorly, it has a much larger opening, into which the transparent cornea is received. There are, besides, many small oblong apertures in it for the passage of nerves and vessels, proceeding to the interior of the eye. Its inner surface is of a light brown colour, owing to a delicate areolar tissue containing brown pigment cells; and hence called *Membra'na* seu *Lam'ina fusca*. In the fœtus, the sclerotic may be separated into two very distinct laminæ.

SCLEROTICA CERATOIDES, Cornea.

SCLEROTICITIS, Sclerotitis.

SCLEROTICONYX'IS, *Scleronyx'is*, *Sclerotonyx'is*, from *sclerotica*, and νυξις, 'puncturing.' Perforation of the sclerotica in the operation for cataract by depression.

SCLEROTICUS, Indurans.

SCLÉROTIQUE, Sclerotic.

SCLEROTIS, Sclerotic.

SCLEROTI'TIS, *Inflamma'tio Sclerot'icæ*, *Leuci'tis*, *Lonchadi'tis*, *Logadi'tis*, *Scleri'tis*, *Sclerociti'tis*, *Rheumat'ic ophthal'mia*, *Ophthal'mia arthrit'ica*, from *sclerotica*, and *itis*, denoting inflammation. Inflammation of the sclerotic coat of the eye.

SCLEROTIUM CLAVUS, see Ergot.

SCLERUNTICUS, Indurans.

SCLERUS, Induration, Scirrhus.

SCLERYNTICUS, Indurans.

SCLERYS'MA, from σκληρος, 'hard.' Induration; also, induration of the liver.

SCLERYSMUS, Scleriasis.

SCLIRUS, Scirrhus.

SCLOPETA'RIUS, from *sclopetum*, 'a gun.' Relating to a gun. Hence, *Aqua sclopeta'ria*, a water for gunshot wounds. *Vul'nera sclopeta'ria*, gunshot wounds, &c.

SCLOPETOPLAGÆ, Wounds, gunshot.

SCOBS, *Prisma*, *Xysma*, *Rameu'tum*, *Rasu'ra*. A shaving; also, an alkali; and the scoria of any metal.

SCŒNANTHUM, Juncus odoratus.

SCOLECESIS, Helminthiasis.

SCOLECIASIS, Helminthiasis.

SCOLEX, Ascaris lumbricoides.

SCOLIOMA, Scoliosis.

SCOLIO'SIS, *Scolio'ma*, *Skolio'sis*, *Rhachio scolio'ma*, from σκολιος, 'crooked.' A distortion of the spine to one side. See Hump.

SCOLOPENDRA, Asplenium scolopendrium.

SCOLOPENDRIA, Asplenium ceterach, and A. scolopendrium.

SCOLOPENDRIUM LINGUA, Asplenium scolopendrium — s. Officinarum, Asplenium scolopendrium — s. Phyllitis, Asplenium scolopendrium—s. Ruta muraria, Asplenium ruta muraria — s. Vulgare, Asplenium scolopendrium.

SCOLOPOMACHÆ'RION, from σκολοπαξ, 'the woodcock,' and μαχαιρα, 'a knife;' so called because it is bent a little at the extremity like a woodcock's bill. A sort of blunt-pointed bistoury. — Scultetus.

SCOLYMUS SATIVUS, Cynara scolymus.

SCOOP, Teut. Schoepe, *Cochlea'rē*, (F.) *Curette*. A surgical instrument of the shape of a spoon, which is used for the extraction of certain foreign bodies. The scoop is often employed to extract balls impacted in the soft parts; to remove calculi from the urinary bladder in lithotomy, &c. A small scoop is sometimes used to extract foreign bodies from the meatus auditorius externus, nasal fossæ, &c.

SCOP, Head, Scalp.

SCOPA REGIA, Ruscus.

SCOPARIUS, see Spartium scoparium.

SCOPE, *σκοπη, Scopy, Scop'ia, Scopos*, from *σκοπεω*, 'I look around.' A common suffix to words meaning 'view, inspection,' as cranio*scopy*, stetho*scopy*, &c.

SCOPOLINA ATROPOIDES, Hyoscyamus scopolia.

SCOPTULA, Scopula.

SCOPULA, Brush.

SCOR, Excrement.

SCORACRATI'A, *Scoracra'sia, Scatacra'sia, Scatacrati'a, Copracrati'a, Copracra'sia, Incontinen'tia Alvi*, from *σκωρ*, 'excrement,' and *ακρατια*, 'want of control.' Want of power to retain the fæces. Involuntary evacuation of the fæces.

SCORBUT, Porphyra nautica, Purpura hæmorrhagica—*s. des Alpes*, Pellagra — *s. de Terre*, Purpura hæmorrhagica.

SCORBU'TIC, *Scorbu'ticus*, (F.) *Scorbutique*, From *scorbutus*, 'scurvy.' That which belongs to scurvy. One affected with scurvy.

SCORBUTUS, Purpura — s. Alpinus, Pellagra —s. Nauticus, Porphyra nautica—s. Oris, Cancer aquaticus.

SCORDINEMA, Carebaria, Pandiculation.

SCORDINISMUS, Carebaria, Pandiculation.

SCORDIUM, Teucrium scordium.

SCORDON, Allium.

SCORDOSMINE, Oxyd, cystic.

SCORITH, Sulphur.

SCORIUM, Scrotum.

SCORODON, Allium.

SCORPIODEX'IS, from *σκορπιος*, 'the scorpion,' and *δηξις*, 'bite:' — more properly, SCORPIOSTIG'MA; from *σκορπιος*, and *στιγμα*, 'puncture.' The sting of the scorpion.

SCOR'PION, *Scor'pio, Scorpius*, from *σκορπιομαι*, 'I enrage.' A genus of insects having a sting at the extremity of their tail, with which they make dangerous wounds. An *Oil of Scorpion* was once made from them, which is not now used.

SCORPIOSTIGMA, Scorpiodexis.

SCORPIUS, Scorpion.

SCORTUM, Scrotum.

SCORZONE'RA, *S. hu'milis* seu *lana'ta* seu *nervo'sa, Escorzone'ra*, from *scurzo*, old Spanish for a viper, *Vipera'ria, Serpenta'ria Hispan'ica, Offic''inal viper's grass, Viper's grass, Goat's grass. Family*, Cichoraceæ. *Sex. Syst.* Syngenesia Polygamia. The roots have been used as alexipharmics, and in hypochondriacal disorders and obstructions of the viscera. The root of the *Scorzonera Hispan'ica* is esculent, but inefficacious as a drug.

SCOTAS'MA, *Scoto'ma, Scoto'dia, Scoto'sis, Scotos*; from *σκοτος*, 'darkness.' Obscurity of vision, darkness, *Suffu'sio ra'dians*. Also Scotodinia.

SCOTCH FIDDLE, Psora.

SCOTODIA, Scotasma, Scotodinia.

SCOTODIN'IA, *Scoto'ma, Dinus Scoto'ma, Scotodi'nē, Tenebrico'sa verti'go, Scotos, Scotas'ma, Scoto'sis, Scot'omy*, from *σκοτος*, 'darkness,' and *δινεω*, 'I turn round.' Giddiness, with impaired sight, often succeeded by headach. See Vertigo.

SCOTOMA, Scotasma, Scotodinia.

SCOTOMY, Scotodinia.

SCOTOS, Scotasma, Scotodinia.

SCOTOSIS, Scotodinia.

SCOTT'S ACID BATH, *Nitro-muriatic acid bath*. A bath of dilute aqua regia, employed by Dr. Scott, of India, as a remedy in hepatic diseases. Three pints by measure of muriatic acid, and two of nitric acid, are mixed to form the aqua regia. In preparing this for use, a pint of it is mixed with an equal quantity of water. The acid bath consists of three ounces of this dilute acid to every gallon of water.

SCOUR, Diarrhœa.

SCOURING, Diarrhœa.

SCRAT, Hermaphrodite, Psora.

SCRATCH, Psora.

SCREATUS, Excreation.

SCRIPLUM, Scruple.

SCRIPTIUM, Scruple.

SCRIPTULUM, Scruple.

SCRIPULUM, Scruple.

SCRIPULUS, Scruple.

SCRIVENER'S CRAMP, Cramp, writers'.

SCROBIC'ULUS, *Scrobic'ulum*, (F.) *Fossette*. A little ditch or furrow; diminutive of *scrobs*, 'a ditch.'

SCROBIC'ULUS CORDIS, *Anticar'dium, Procar'dium*, (F.) *Fossette du cœur, Avant-cœur, Anticœur*. The pit of the stomach. The depression at the anterior part of the abdomen, below the xiphoid cartilage.

SCROBICULUS VARIOLÆ, Pockmark.

SCROFFÆ, Scrofula.

SCROF'ULA, *Scroph'ula, Scroph'ulæ*; from *scrofa*, 'a sow;' as Chœras is from *χοιρος*, 'a hog,' because swine were presumed to be subject to a similar complaint. *Scrophulo'sis, Morbus scrophulo'sus, Vit''ium scrophulo'sum, Cacochym'ia* seu *Cachex'ia* seu *Dysera'sia scrophulo'sa, Pæda troph'ia glandulo'sa, Struma, Chœras, Coiras, Tabes Glandula'ria, Adeno'sis scrofulo'sa, Scrofæ, King's evil, The Evil, Quince, Cruels* (Scottichè), (F.) *Scrophules, Scrofules, Strumes, Ecrouelles, Humeurs froides, Tubercules des glandes lymphatiques, Mal du Roi*. A state of the system characterized by indolent, glandular tumours, chiefly in the neck; suppurating slowly and imperfectly, and healing with difficulty; the disease ordinarily occurring in those of a sanguine temperament, with thick upper lip, &c. The tumours, after suppuration, degenerate into ulcers; which, in process of time, cicatrize, leaving scars. The internal organs are apt to be attacked in those disposed to scrofula; hence they are often the subjects of phthisis and mesenteric affections. Scrofula is hereditary; and is frequently excited by insufficient or improper regimen, and by a close, confined air during the first years of existence. The best treatment is:—to strengthen the system by animal diet; pure air, and exercise, cold bathing, or sea-water bathing, &c.

SCROFULA ABDOMINALIS INTERNA, Physconia strumosa.

SCROFULAIRE, Scrophularia nodosa — *s. Aquatique*, Scrophularia aquatica.

SCROFULARIA, Scrophularia.

SCROFULES, Scrofula.

SCROFULEUX, Scrofulous.

SCROF'ULOUS, *Scrophulo'sus, Scrophula'rius, Strumous, Strumo'sus*, (F.) *Scrofuleux, Strumeux*. Suffering from, or relating to, scrofula.

SCROOBY-GRASS, Cochlearia officinalis.

SCROOF, Scarf.

SCROG-LEGGED, Cnemoscoliosis.

SCROPHULA, Scrofula—s. Mesenterica, Tabes mesenterica — s. Molucana, Frambœsia.

SCROPHULÆ, Scrofula—s. Gonorrhoicæ, Gonorrhœa impura.

SCROPHULA'RIA, from *scrofula*, against which it has been employed. S. Nodosa.

SCROPHULA'RIA AQUAT'ICA, *Beton'ica aquat'ica, Fica'ria, Ferra'ria, Castran'gula, Greater Water Figwort, Water Bet'ony,* (F.) *Scrofulaire aquatique. Ord.* Scrophulariaceæ. The leaves are celebrated as correctors of the bad flavour of senna. They were at one time regarded as eminently antiscrofulous, stomachic, and carminative.

SCROPHULARIA FŒTIDA, Scrophularia nodosa — s. Lanceolata, S. Nodosa — s. Marilandica, S. Nodosa—s. Minor, Ranunculus ficaria.

SCROPHULA'RIA NODOSA, *S. fœ'tida* seu *vulga'ris* seu *lanceola'ta* seu *Marilan'dica, Millemor'bia, Scrophula'ria, Figwort, Kennelwort, Holmesweed, Heal-all,* (F.) *Scrofulaire, Herbe aux écrouelles.* The root and leaves of this plant have been celebrated, both as an internal and external remedy, against inflammations, piles, scrofulous tumours, ulcers, &c.

SCROPHULARIA VULGARIS, Scrophularia nodosa.

SCROPHULARIUS, Scrofulous.

SCROPHULES, Scrofula — *s. Mésentériques*, Tabes mesenterica.

SCROPHULOSIS, Scrofula.

SCROPHULOSUS, Scrofulous.

SCROTAL, *Scrota'lis;* from *scrotum.* Relating to the scrotum, — as *Hernia scrota'lis*, scrotal hernia.

SCROTAL NERVE, see Genito-crural Nerve.

SCROTOCE'LÈ, Oscheocele, Oschocele. A hybrid term; from (L.) *scrotum*, and *κηλη*, 'a tumour.' *Hernia Scrota'lis, Scrotal her'nia.* Inguinal hernia, descending into the scrotum.

SCROTUM, from *scorteus, scorteum,* 'made of leather' [?]. *Sco'rium, Oschē, Os'cheus, Os'chus, Oscus, Os'cheon, Och'eus, Perin, Scortum, Marsu'pium, Bur'sula, Bursa tes'tium* seu *virī'lis, Cap'ulus* [?], *Orchas, Follic'ulus genita'lis, Her'nia, the Purse, the Cod,* (F.) *Les bourses.* The integuments which cover the testes. These are nothing more than a prolongation of the skin of the inner part of the thighs, perinæum, and penis. The skin is remarkable for its brown colour, for the numerous rugæ, especially when the scrotum is contracted; for the great number of sebaceous follicles it contains; and for the long and few hairs which issue from it in the adult. The scrotum is divided into two equal parts by a raphe, which extends from the anus to the root of the penis. Its organization is similar to that of the skin of other parts of the body, except that the chorion is thinner.

SCROTUM CORDIS, Pericardium — s. Pendulum, Rhachosis.

SCRUBIE, Purpura nautica.

SCRUBIE-GRASS, Cochlearia officinalis.

SCRUPLE, *Diob'olon, Gramma'rium, Scru'pulus, Scru'pulum, Scrip'tulus, Scrip'tulum, Scrip'tium, Scrip'ulum, Scriplum, Scrip'ulus.* A weight of twenty grains, Troy; twenty-four grains, Poids de marc.

SCUDAMORE'S MIXTURE, see Mixture, Scudamore's.

SCULL, Cranium — s. Cap, Calvaria.

SCURF, Sax. *rcurf*, Teut. Schorft; (Prov.) *Scroof, Fur'fura.* Small exfoliations of the cuticle are so called.

SCURFY, Furfuraceous.

SCURVY OF THE ALPS, Pellagra—s. Land, Purpura hæmorrhagica — s. Petechial, Purpura simplex — s. Sea, Porphyra nautica.

SCURVY GRASS, Sisyrinchium Bermudianum — s. Grass, common, Cochlearia officinalis — s. Grass, lemon, Cochlearia officinalis — s. Grass, wild, Cochlearia coronopus.

SCUTELLA, Cup.

SCUTELLARIA CAROLINIANA, S. integrifolia.

SCUTELLA'RIA GALERICULA'TA, from *scutella*, 'a cup,' in allusion to the form of the calyx. *Cassi'da galericula'ta, Tertiana'ria, Skull-cap,* (F.) *Casside bleue, Toque. Ord.* Labiatæ. *Sex. Syst.* Didynamia Angiospermia. This plant has a bitter taste and a garlic smell. It has been esteemed especially serviceable in tertian ague.

SCUTELLARIA HYSSOPIFOLIA, S. integrifolia.

SCUTELLARIA INTEGRIFO'LIA, *S. hyssopifo'lia* seu *Carolinia'na,*—another indigenous variety,—is an intense bitter.

SCUTELLA'RIA LATERIFLO'RA, *Skull-cap, Maddog skullcap, Madweed, Hoodwort, Blue Pimpernel.* An indigenous plant, which grows in all parts of the United States in moist places. It was at one time esteemed a preventive of hydrophobia, but is probably possessed of little virtue of any kind. By some, however, it is regarded as a good nervine.

SCUTICULA DIGITORUM MANÛS, Phalanges of the fingers.

SCUTTER, Diarrhœa.

SCUTULÆ DIGITORUM MANÛS, Phalanges of the fingers.

SCUTUM, Thyroid cartilage — s. Cordis, Scapula, Sternum — s. Genu, Patella — s. Pectoris, Sternum, Thorax.

SCUTUM STOMACH'ICUM. A large plaster, applied to the breast or stomach.

SCUTUM THORACIS, Scapula.

SCYB'ALA, plural of *σκυβαλον*, 'dung.' *Enterol'ithus Scyb'alum, Excrementa Alvi siccio'ra, Fæces indura'tæ.* Hard fecal matters discharged in round lumps.

SCYLLA, Scilla.

SCYPHOPHORUS PYXIDATUS, Lichen pyxidatus.

SCYPHUS AUDITORIUS, Infundibulum of the cochlea — s. Cerebri, Infundibulum of the brain—s. Vieussenii, Infundibulum of the cochlea

SCYROS, Callosity.

SCYTALIDES DIGITORUM MANÛS, Phalanges of the fingers.

SCYTHICA, (RADIX,) Glycyrrhiza.

SCYTHROPASMUS, from *σκυθρος*, 'gloomy;' *σκυθρωπαζειν*, 'to look gloomy;' *Vultus tet'ricus et mœstus.* A gloomy, depressed countenance, of bad augury in serious diseases

SCYTITIS, Cytitis.

SCYTODEPSIUM, Tannin.

SEA AIR. The air in the neighbourhood of the sea contains saline particles commingled with it, which render it a valuable change for scrofulous and debilitated individuals. The sea and sea-coast are usually, also, more equable in their temperature than places inland.

SEA SICKNESS, Nausea marina.

SEA-WARE, see Pila marina — s. Water, see Water, sea.

SEAL. GOLDEN, Hydrastis Canadensis — s. Solomon's, Convallaria polygonatum — s. Solomon's, great, Convallaria canaliculata — s. Solomon's, smaller, Convallaria pubescens.

SEAM, Cicatrix.

SEARCHER, Body searcher.

SEARCHING, *Sounding;* from (F.) *chercher,* 'to seek.' The operation of ascertaining, by the introduction of a metallic instrument, whether there is a stone in the bladder.

SEASONING, Acclimation — s. Fever, Fever, strauger's.

SEAT, Anus — s. Bone, Ischion.

SÉBACÉ, Sebaceous.

SEBA'CEOUS, *Seba'ceus,* (F.) *Sébacé;* from *sebum,* 'suet.' That which has the nature of suet.

SEBACEOUS FLUX, Stearrhœa.

SEBACEOUS, SEBIP'AROUS or SEBIF'EROUS GLANDS, *Sebaceous Fol'licles* or *Crypts*, *Follic'uli seba'cei*, *Cryptæ seba'ceæ*, *Oil* or *Mil'iary glands*, are small hollow organs, of a rounded or pyriform shape, seated in the substance of the skin, and opening on its surface by a small, excretory duct; furnishing a yellow, unctuous humour, *Smegma cuta'neum*, *Sebum cuta'neum*, having some analogy with suet, which is destined to lubricate the surface of the body. Follicles of a similar nature exist around the corona glandis of the male, and under the skin of the labia majora and nymphæ of the female. They secrete a sebaceous matter, which emits a peculiar odour; and hence, after the name of those who described them, have been called *Gland'ulæ odorif'eræ Tyso'ni*, *G. Tyso'ni*, *Glandulæ Littria'næ* seu *Littrii*, *Tyson's glands*, (F.) *Glandes de Littre;* and, also, *Glandulæ odorif'eræ* seu *sebaceæ glandis*, *G. cor'onæ penis*, *Follic'uli seba'cei coronæ glandis*, *Glandulæ odorif'eræ præpu'tii*.

SEBASTOMA'NIA, from σεβαστος, 'worshipped,' and *mania*. Religious insanity, Demonomania.

SEBESTE'NA, *Cordia myxa* seu *sebeste'na* seu *Africa'na* seu *domes'tica* seu *obli'qua*, *Sebeste'na officina'lis*, *Seb'esten*, *Sebsten*, *Myxa*, *Cornus sanguin'ea*, *Prunus sebesti'na*, *Smooth-leaved Cor'dia*, *Assyr'ian plum*, (F.) *Sebestier myxa*. *Ord.* Cordiaceæ. The dark, black fruit of the *Sebestina* possesses glutinous and aperient qualities, and is exhibited, in decoction, in various diseases of the chest.

SEBESTIER MYXA, Sebestena.

SEBIFEROUS, see Sebaceous.

SEBIPAROUS, see Sebaceous.

SEBORRHAGIA, Stearrhœa.

SEBORRHŒA, Stearrhœa.

SEBSTEN, Sebestina.

SEBUM, Pinguedo, Sevum—s. Cutaneum, see Sebaceous glands — s. Palpebrale, *Chassie* — s. Præputiale, Smegma præputii.

SECA'LE, *S. cerea'lē* seu *barba'tum*. The *Rye plant*. (F.) *Seigle*. *Ord.* Gramineæ. Rye is chiefly used as an article of diet, particularly in the northern parts of Europe, where a spirit is also extracted from it. The grain is disposed to acescency: and hence its internal use at first generally produces a laxative effect.

SECALE BARBATUM, Secale — s. Cornutum, Ergot—s. Luxurians, Ergot—s. Maternum turgidum seu temulentum, Ergot.

SECALIS MATER, Ergot.

SÉCATEUR DES AMYGDALES, *Amygdalatome*.

SECERNENT, Secreting.

SECERNING, Secreting—s. Substance of the kidney, see Kidney.

SECESSIO FÆCUM, Defecation.

SECESSUS NIGER, Melæna.

SÈCHE, Sepia.

SECLUSORIUM, Sac.

SEC'ONDARY, from *secundus*, 'the second.' Something that acts subordinately to another; as the *secondary symptoms* of a disease; that is, those which supervene on the *primary*. A *secondary amputation* is one performed after the constitutional effects of an injury have mainly passed away. See Fever, secondary; and Hæmorrhagia, for Secondary Hemorrhage.

SECONDINES, Secundines.

SECRETA. Same etymon as Secretion. Things or matters secreted or separated from the blood.

SECRE'TING, *Secreto'rius*, *Secer'ning*, *Se'cern'ent*, *Excer'nent*, (F.) *Sécréteur*, *Sécrétoire*. Same etymon as Secretion. That which secretes, — as a secreting organ.

SECRETIO, Secretion—s. Lactis, Galactosis—s. Lotii, Uropoesis — s. Urinæ, Uropoesis — s. Vicaria, see Vicarious.

SECRE'TION, *Secre'tio*, *Apoc'risis;* from *secernere*, *secretum*, 'to separate.' An organic function, which is chiefly executed in the glands, and consists in an elaboration or separation of the materials of the blood, at the very extremities of the arterial system, or rather of the vascular secretory system; and which differs in each organ according to its particular structure; hence the formation of different fluids;—bile, saliva, urine, milk, &c. The secretions are of three kinds:—*exhalant*, *follicular*, and *glandular*. Simple secretions are those which exist ready-formed in the blood, and pass out of the vessels by an act of exosmose, whilst the more complicated are formed from the liquor sanguinis by cell-agency. The latter, alone, are, by some, called *Secretions*.

SÉCRÉTOIRE, Secreting.

SECRETORIUS, Secreting.

SECT, METHODICAL, Methodists.

SEC'TIO, *Section*. The act of cutting. A division.

SECTIO ALTA, see Lithotomy — s. Anatomica, Dissection — s. Cadaveris, Autopsia cadaverica — s. Cadaveris legalis, Autopsia cadaverica—s. Cæsarea, Cæsarean section — s. Franconiana, see Lithotomy — s. Hypogastrica, see Lithotomy — s. Lateralis, see Lithotomy — s. Legalis, Autopsia cadaverica legalis—s. Mariana, see Lithotomy—s. Nympharum, Nymphotomy — s. Perinæalis, Perineal section—s. Rectovesicalis, see Lithotomy — s. Renalis, Nephrotomy — s. Tendinum, Tenotomy — s. Vagino-vesicalis, Colpocystotomia — s Vesicalis, Lithotomy.

SECTION, Sectio — s. Sigaultian, Symphyseotomy.

SECUNDÆ, Secundines.

SECUNDINÆ, Secundines.

SEC'UNDINES, *Hys'tera*, *Deuter'ion*, *Metræ*, *Sœcun'dæ*, *Secundi'næ*, *After-birth*, (F.) *Arrière-faix*, *Secondines*, *Délivre*, from *secundare*, (*secundus*, 'second,') 'to follow.' All that remains in the uterus after the birth of the child,—viz., the placenta, a portion of the umbilical cord, and the membranes of the ovum. These are commonly not expelled till some time after the birth of the fœtus; hence their name. See *Délivrance*.

SECUNDUS PROPRIORUM AURICULÆ, Retrahens auris.

SEDANTIA, Sedatives.

SED'ATIVES, *Sedati'va*, *Pauon'ta*, *Sedau'tia*, *Adec'ta*, *Catastal'tica*, *Deprimen'tia*, (F.) *Sédatifs*, *Calmants*, *Tempérants*, from *sedare*, *sedatum*, 'to settle or assuage.' Medicines which directly depress the vital forces, and which are consequently employed whenever it is necessary to diminish preternaturally increased action. The chief reputed sedatives are: Acidum Hydrocyanicum, Acidum Hydro-sulphuricum, Tabacum, Missio Sanguinis, and certain gases by inhalation, as azote, carbonic acid [?], carburetted and sulphuretted hydrogen.

SEDEM ATTOLLENS, Levator ani.

SEDES, Anus, Excrement — s. Cruentæ, Dysentery, Hæmatochezia—s. Lactescentes, Cœliac flux—s. Procidua, Proctocele.

SEDHEE, Bangue.

SED'IMENT, *Sedimen'tum*, *Lemma*, *Residen'tia*. Same etymon. (F.) *Dépôt*. A deposit formed by the precipitation of some one or more of the substances held in solution or suspension by a liquid. That which is formed in urine, at the time of cooling, has been called *Hypos'tasis*. *Hyposte'ma*, *Residen'tia*, *Subsiden'tia*, (F.) *Dépôt de l'urine*. This sediment or deposit varies in different states of the system. In calculous affec-

tions, it is one of the most important objects of attention.

SEDIMENTUM, Sediment — s. Urinæ lateri-cium, see Lateritious — s. Urinæ pityroïdes, see Furfuraceous.

SEDITIA, Nates.

SEDLITZ, MINERAL WATERS OF, *Seidlitz water*. Springs in Bohemia, near Prague, which are simple salines. They contain sulphate and carbonate of magnesia, chiefly chloride of magnesium, sulphates of potassa, soda, and lime, carbonic acid and carbonate of lime. They are employed as purgatives in a multitude of diseases.

ARTIFICIAL SEDLITZ POWDERS, in no respect, however, resembling the natural ingredients, are formed of *Sodæ et Potassæ tartras* ℥ij, *Sodæ carbon.* ℈ij, in one paper; *Acid tartaric.* gr. xxxv, in another. For half a pint of water.

SÉDON BRÛLANT, Sedum — *s. Reprise*, Sedum telephium.

SEDUM, *S. acrē* seu *glacia'lē* seu *minus* seu *vermicula're*, from *sedeo*, 'I sit,' owing to its attachment to rocks and walls. *Illec''ebra, Hellec''ebra, Illec''ebrum, Vermicula're, Vermicula'ris, Piper mura'lē, Sempervi'vum acrē, Aei'chrysson, Æo'nion, Wall pepper, Jack of the But'tery, Pricket, Bird's bread, Stone crop, Bitiwy Stone crop, Small Houseleek*, (F.) *Joubarbe âcre, Orpin brûlant, Vermiculaire brûlante, Sédon brûlant. Ord.* Crassulaceæ. *Sex. Syst.* Decandria Pentagynia. In its recent state it is very acrid, and proves both emetic and cathartic. Externally, in the form of cataplasm, it produces vesications and erosions. It has been recommended in cancerous and malignant ulcers.

SEDUM, Saxifraga granulata — s. Glaciale, Sedum — s. Majus, Sempervivum tectorum — s. Minus, Sedum.

SEDUM TELE'PHIUM, *S. telephoïdes, Faba crassa, Cras'sula, C. Major, Illec''ebra major, Tele'phium, Faba'ria cras'sula, Faba crassa, Anacamp'seros, A. al'bicans* seu *triphyll'a* seu *vulga'ris, Orpine*, (F.) *Sédon reprise, Grand orpin, Fève épaisse, Joubarbe des vignes*, &c. Formerly used as a cataplasm in cuts, hemorrhoids, corns, whitlows, &c.

SEDUM TELEPHOÏDES, S. Telephium — s. Vermiculare, Sedum.

SEED, Sperm.

SEGMENTA CARTILAGINEA, see Trachea.

SEGMENTA'TION, *Segmenta'tio*, from Lat. *segmentum*, 'a segment,' itself from *seco*, 'to cut.' The act of being divided into segments or portions. (F.) *Segmentation, Fractionnement, Sillonnement.* A term applied to the division of the vitellus or yolk into 'segments;' each containing a transparent vesicle, which may be a descendant of the primordial or germ cell.

SEGNIT''IA, *Segnit''ies*, from *segnis*, 'sluggish.' Sluggishness or torpor in the exercise of a function: — as SEGNITIES ALVI, Torpor of the bowels; SEGNITIES VIRIUM, Languor.

SEGNITIES, Segnitia.

SEGRAY, MINERAL WATERS OF. Near Pithiviers, in Gâtinais, in the French department of Loiret, there is a chalybeate spring, which has some reputation.

SEGU, Sago.

SEIDLITZ, Sedlitz.

SEIDSCHÜTZ, SEYDSCHÜTZ or SAIDSCHÜTZ, MINERAL WATERS OF. Bitter springs, in the neighbourhood of those of Püllna and Sedlitz, in Bohemia, which contain chiefly sulphate, nitrate, muriate, and carbonate of magnesia, sulphates of potassa, soda, and lime; carbonate of lime, iron and manganese. The water is an excellent cathartic, and is well known in Europe.

SEIGLE, Seca.e — *s. Cornu*, Ergot — *s. Corrompu*, Ergot — *s. à Éperon*, Ergot — *s. Ergotée*, Ergot — *s. Ergotisé*, Ergot — *s. Faux*, Ergot.

SEIN, Uterus, see Mamma.

SEIRIASIS, *Coup de Soleil.*

SEIZURES, HIDDEN, see Hidden seizures.

SEKISKAYAVODKA, see Spirit.

SEL, Salt — *s. Admirable de Lémery*, Magnesiæ sulphas — *s. Admirable perlé*, Soda, phosphate of — *s. Ammoniac*, Ammoniæ murias — *s. Arméniac*, Ammoniæ murias — *s. Arsenical de Macquer*, Arseniate of protoxide of potassium — *s. de Cuisine*, Soda, muriate of — *s. de Dérosne*, Narcotine — *s. d'Égra*, Magnesiæ sulphas — *s. de Lait*, Sugar of Milk — *s. Marin*, Soda, muriate of — *s. d'Opium*, Narcotine — *s. d'Oseille* Potassæ oxalas — *s. de Saturne*, Plumbi superacetas — *s. de Verre*, see Vitrum — *s. Volatil d'Angleterre*, Ammoniæ carbonas.

SELAGO, Camphorosma Monspeliaca, Lycopodium selago.

SELENE, Moon, see Nail.

SELENIASIS, Somnambulism.

SELENIASMUS, Somnambulism.

SELENOBLETUS, Lunatic.

SELENOGAMIA, Somnambulism.

SELERY, Apium graveolens.

SELF-ABUSE Masturbation.

SELF-HEAL, Prunella.

SELF-LIM'ITED. An epithet applied to diseases which appear to run a definite course, but little modified by treatment, — small-pox, for example.

SELF-POLLUTION, Masturbation.

SELI'BRA, *Semili'bra, Sembella*, 'half a pound.' Six ounces, Troy; eight Avoirdupois.

SELINI'TES, σελινιτης. Wine impregnated with the seeds of the *σελινον* or *smallage*. — Dioscorides.

SELINUM ANGELICA, Angelica Sylvestris — s. Galbanum, Bubon galbanum — s. Imperatoria, Imperatoria — s. Lactescens, Peucedanum palustre — s. Marsh, Peucedanum palustre — s. Opoponax, Pastinaca opoponax — s. Oreoselinum, Athamanta aureoselinum — s. Ostruthium, Imperatoria — s. Palustre, Peucedanum palustre — s. Pastinaca, Pastinaca sativa — s. Peucedanum, Peucedanum — s. Pubescens, Angelica sylvestris — s. Sylvestre, Angelica sylvestris, Peucedanum palustre — s. Thysselinum, Peucedanum palustre.

SELLA, S. Turcica — s. Equina, S. Turcica — s. Familiarica, Lasanum — s. Obstetricia, Diphrus — s. Sphenoidalis, S. Turcica.

SELLA TUR'CICA, *Ephip'pium, Fossa Pituita'ria, Sella, S. equi'na* seu *sphenoida'lis. Pitu'itary fossa, Turkish Saddle*, (F.) *Selle Turcique* ou *du Turc*. A depression at the upper surface of the sphenoid bone, which is bounded, anteriorly and posteriorly, by the clinoid processes, and lodges the pituitary gland. It is so called from its resemblance to a *Turkish saddle*. The broad rough plate, behind, and somewhat overhanging the Sella Turcica is the *Dorsum Ephippii*.

SELLA TURCICA, Pituitaria fossa.

SELLE TURCIQUE, Sella Turcica — *s. du Turc*, Sella Turcica.

SELS NEUTRES, Neutral salts.

SELTZ or SELTZER, MINERAL WATERS OF. Cold, acidulous springs, the source of which is at Seltz, nine leagues from Strasburg, and in the Department of the Bas-Rhin. They contain carbonates of lime, magnesia, and soda, chloride of sodium, and much carbonic acid. They are refrigerant, tonic, diuretic, and aperient.

ARTIFICIAL SELTZER WATER may be made from *muriat. acid.* gr. xxxv, *water* Oj, *white marble* gr. iij. Stop up till dissolved. Add *carbonate of Magnesia*, gr. v, and, after some time, *subcarbonate of soda*, gr. xxxij. Close it till used.

SEMBELLA, Selibra.

SEMECARPUS ANACARDIUM, Avicennia tomentosa.

SEMEIOG'RAPHY, *Semeiograph'ia, Semiography, Semiogra'phia, Symptomatog'raphy*, from *σημειον*, 'a symptom,' and *γραφη*, 'a description.' A description of symptoms or signs of disease.

SEMEIOL'OGY, *Semeiot'icē, Semiology, Semioticē, Phœnomenolog''ia*, from *σημειον*, 'a symptom,' and *λογος*, 'a discourse.' (F.) *Séméiotique.* The branch of pathology whose object is the doctrine of the symptoms or signs of disease.

SEMEION, Sign — s. Boethematicum, Indication.

SEMEIOSIS, Semeiology.

SÉMÉIOTIQUE, Semeiology.

SEMEN, Sperm — s. Badian, Illicium anisatum—s. Cinæ, see Artemisia santonica — s. Contra, see Artemisia santonica — *s. Contra d'Alep*, Artemisia santonica — s. Contra vermes, Artemisia santonica—s. Masculinum seu virile seu genitale, Sperm—s. Muliebre, Sperm (of the female) — s. Sanctum, see Artemisia santonica — s. Santonici, see Artemisia santonica—s. Zedoariæ, see Artemisia santonica.

SEMENCE, Sperm.

SEMENTINA, Artemisia santonica.

SEMI, from *'ημισυ*, 'half.' *Semi* or *demi*, in composition, universally signifies 'half;' both in French and English.

SEMIAN'IMIS, *Semimor'tuus, Sem'inex, Semivi'vus;* from *semi*, 'half,' and *animus*, 'soul.' Half-living. Half-dead.

SEMI-BULB OF THE FEMALE, Bulbus vestibuli.

SEMICANALICULUS, Sulcus.

SEMICANALIS, Sulcus.

SEMICEPHALUS, Hemicephalus.

SEMICIRCULI OSSEI, Semicircular canals.

SEMICIRCULAR, *Semicircula'ris.* From *semi*, and *circulus*, 'a circle.' (F.) *Demicirculaire.* That which represents the half of a circle.

SEMICIRCULAR CANALS, *Cana'les* seu *Ductus semicircula'res* seu *tubæform'es* seu *circula'res, Semicir'culi os'sei, Funes* seu *Canalic'uli semiannula'res labyrin'thi*, (F.) *Canaux demicirculaires*, are seated in the pars petrosa of the temporal bone, and open into the vestibule, behind which they are situate. They are three in number, of which one is *superior* or *vertical, cana'lis semicircula'ris vertica'lis supe'rior;* another *posterior* or *oblique, cana'lis semicircula'ris vertica'lis poste'rior*, and the third *exterior* or *horizontal, canalis semicircula'ris horizonta'lis.* Their parietes are formed of a bony, compact, hard plate. Their uses in audition are not known: at their termination they have the elliptical arrangements called *ampul'læ;* and by both extremities they open into the vestibule, in the sac at its superior part—the *Sac'culus Ellip'ticus, Al'veus* seu *Utricu'lus* seu *Sinus commu'nis, Sinus* seu *Alveus utriculo'sus, Sacculus vestibuli* or *Median sinus, Utricle.* In front of the S. elliptieus, nearer the cochlea, and opposite the foramen ovale, is the *Sac'culus sphær'icus*, or *Sacculus.*

SEMICIRCULUS EXSCULPTUS, Hiatus diaphragmatis aorticus.

SEMICON'GIUS. Half a gallon, or four pints.

SEMICU'BIUM, *Semicupium, Insess'io, Incess'io, Encathis'ma, Excathis'ma*, (F.) *Demibain*, from *semi*, and *cubare*, 'to lie down.' A half-bath, or such as receives only the hips or extremities.

SEMICUPIUM, Bath, half, Semi-cubium.

SEMI-FIBULÆUS, Peronæus brevis.

SEMI-INTEROSSEUS INDICIS, Abductor indicis.

SEMI-INTEROSSEUS POLLICIS, Opponens pollicis.

SEMILIBRA, Selibra.

SEMILLA DEL GUACHARO. Various kinds of hard and dry fruits, found in the stomachs of the young Guacharoes, a sort of nocturnal bird. The fruits are a celebrated South American remedy in Ague.

SEMILU'NAR, *Semiluna'ris*, (F.) *Demilunaire* ou *Semilunaire*, from *semi*, and *luna*, 'the moon.' Having the shape of a half-moon.

SEMILUNAR CART'ILAGES, *Semilunar fibro-cartilages, Sigmoid cart'ilages, Cartilag''ines sigmoideæ* seu *semiluna'res*, are two fibro-cartilages, which exist between the condyles of the os femoris and the articular surfaces of the tibia. The innermost, which is longer from before to behind than transversely, is nearly semicircular. The outermost forms almost an entire circle; an arrangement, in both cases, corresponding to the different surfaces of the tibia. They are thicker at their outer circumference, which is convex, than at the inner, which is concave and very thin. Both are inserted, before and behind, into the spine of the tibia, by means of fibrous fasciæ.

SEMILUNAR GANGLION,—*Ganglion abdomina'lē* seu *eplanch'nicum* seu *transver'sum* seu *sola'rē, G. surrénal*, (Ch.), belongs to the great sympathetic. These ganglia present considerable variety, and are deeply situate in the abdomen, above and behind the supra-renal capsules. They correspond, posteriorly, to the pillars of the diaphragm and the aorta. They have the shape of a crescent reversed, often surrounded by other ganglia of a smaller size. From their periphery numerous filaments proceed, which go to the formation of the solar plexus.

SEMILUNAR NOTCH OF THE STERNUM, *Fourchette* — s. Valves, Sigmoid valves.

SEMILUNULA UNGUIUM, see Nail.

SEMI-MAS, Eunuch.

SEMIMASCULATUS, Eunuch.

SEMIMASCULUS, Eunuch.

SEMIMEMBRANEOUS, Semimembranosus.

SEMIMEMBRANO'SUS, *Semimembra'neus*, (F.) *Ischio-popliti-fémoral, Ischio-popliti-tibial*, (Ch.) *Demimembraneux.* A muscle situate at the posterior part of the thigh. It is flat, thin, narrow, and aponeurotic in its upper third; broader and fleshy in the middle, and tendinous below. It is attached above to the tuberosity of the ischium; and below—by a tendon, which has three divisions—to the outer condyle of the femur, and to the posterior and inner part of the internal tuberosity of the tibia. This muscle is a rotator inwards, and a flexor of the leg. It can also bend the thigh upon the leg. In standing it maintains the pelvis in position, and can even draw it downwards.

SEMIMORTUUS, Semianimis.

SEMINA CATAPUTIÆ MAJORIS, see Ricinus communis.

SE'MINA FRIG'IDA MAJO'RA. The *greater cold seeds.* The ancients gave this name to the emulsive seeds of the cucumber, melon, gourd, and water-melon.

SEMINA FRIGIDA MINO'RA. The *lesser cold seeds.* The ancients gave this name to the seeds of the lettuce, purslane, endive, and cichory.

SEMINA RICINI VULGARIS, see Ricinus communis.

SEMINAL, Spermatic—s. Filaments, Spermatozoon—s. Fluid, Sperm—s. Granules, see Granule.

SEMINALE MEMBRUM, Penis.

SEMINALIS, Spermatic.

SEMINERVOSUS, Semi-tendinosus.

SEMIORBICULARIS, Orbicularis oris.

SEMIPESTIS, Typhus.

SEMINEX, Semianimis.

SEMINIA MORBORUM, Predisposition.

SEMINIF'EROUS, from *semen, seminis*, 'sperm,' and *fero*, 'I carry.' *Spermatoph'orous*

An epithet given to the vessels which secrete and convey the seminal fluid.

SEMINIST, Animalculist.

SEMINIUM, Sperm.

SEMIOGRAPHY, Semeiography.

SEMIOLOGY, Semeiology.

SEMION, Sign.

SEMIOTICE, Semeiotice — s. Faciei, Physiognomy.

SEMIPLEGIA, Hemiplegia.

SEMISEXTUM, Hemiecton.

SEMISICIL'ICUS. A weight of one drachm or three scruples. — Rhodius.

SEMISIDERATIO, Hemiplegia.

SEMISIDERATUS, see Hemiplegia.

SEMISOMNIS, Coma.

SEMISOPITUS, Coma.

SEMISOPORUS, Coma.

SEMISPEC'ULUM. An instrument used for dilating the incision made into the neck of the bladder in the operation of lithotomy.—Fabricius Hildanus.

SEMISPINA'LIS COLLI, *Semispina'tus* seu *transver'so-spina'lis* seu *spina'lis* seu *transversa'lis colli, Artic'ulo-spina'lis, Spinalis cervi'cis, Transverso-spinal,* (F.) *Demi-épineux* ou *transversaire-épineux du cou.* This muscle arises from the transverse processes of the six uppermost dorsal vertebræ, by an equal number of distinct tendons, which run obliquely under the complexus, and is inserted in the spinous processes of all the cervical vertebræ, except the first and last. Its *action* is, to extend the neck obliquely backwards and to one side.

SEMISPINALIS DORSI, *Semi-spinalis externus, Transver'so-spinalis dorsi, Semi-spina'tus,* (Riolan), *Transverso-spinal,* (F.) *Demi-épineux du dos, Transversaire-épineux du dos.* This muscle arises from the transverse processes of the seventh, eighth, ninth, and tenth dorsal vertebræ, by as many distinct tendons, which soon grow fleshy; and then again become tendinous, and are inserted into the spinous processes of the sixth or seventh uppermost dorsal, and two lowest cervical vertebræ, by as many tendons. Its *action* is, to extend the spine obliquely backwards.

SEMISPINALIS EXTERNUS, Semi-spinalis dorsi — s. Internus, Transversalis dorsi — s. Spinatus, Longissimus dorsi, Semi-spinalis dorsi.

SEMISPINATUS COLLI, Semispinalis colli.

SEMIS'SIS, *Semis.* The half of a pound, ounce, drachm, &c.

SEMITENDINO'SUS, *Semi-nervo'sus,* (F.) *Ischio-créti-tibial, Ischio-prétibial,* (Ch.) *Demiten-dineux, Demiinervenx.* This muscle is situate at the posterior part of the thigh. It extends obliquely, downwards and inwards, from the tuberosity of the ischium — to which it is attached by a flat tendon, common to it and the biceps — as far as the posterior and inner part of the tibia, to which it is attached by means of another round tendon. Its fibres are commonly interrupted by an aponeurosis. Its *uses* are the same as those of the semimembranosus.

SEMITERTIANA, Hemitritæa.

SEMIUNCIA, Hemiuncion.

SEMIVIR, Eunuch.

SEMIVIVUS, Semianimis.

SEM'OLA, BULLOCK'S; a farinaceous article of diet, which is recommended as highly nutritious and easily digestible, consequently well adapted for infants and invalids, is said to consist of the gluten of wheat, with a small proportion of starch. Semola and Semolina resemble each other greatly. They appear, indeed, to be identical.

SEMOLI'NA, *Manna croup.* This may be made by grinding wheat in an apparatus, separating the flour from the middlings, dressing the latter four different times in a bolting mill, and sifting through parchment sieves, until the product is perfectly freed from bran. In Poland, it is called *Cracow groats.*

Semolina is generally imported into England from the Baltic, and in Russia is said to be manufactured from buckwheat. It has a granular form like some kinds of oatmeal, a dingy white colour, a farinaceous, somewhat insipid, taste, and is well adapted for the diet of children affected with derangement of the bowels. A recent analysis makes it consist of the gluten of wheat with a certain proportion of the starch, part of the latter having been removed.

SEMPERVIVUM ACRE, Sedum.

SEMPERVIVUM TECTO'RUM, *S. majus* seu *tecto'rum;* from *semper,* 'always,' and *vivo,* 'I live,' because always green, *Aïzoön, Beiahalalen, Buphthalmus, Barba Jovis, Agriosin'ara, Andrachahara, Chrysosper'mum, House-Leek, Sengreen, Fews, Fouets,* (Prov.) *Cyphel, Jupiter's Beard,* (F.) *Joubarbe des toits.* The leaves have a mild, subacid austerity, and are often applied to bruises and old ulcers.

SEMUDA, Betula.

SEMUNCIA, Hemiuncion.

SENA, Cassia senna.

SÉNÉ, Cassia senna — *s. d'Amérique,* Cassia Marilandica—*s. Faux,* Colutca—*s. Indigène,* Colutea—*s. des Prés,* Gratiola officinalis.

SENEBIERA CORONOPUS, Cochlearia coronopus.

SENECA OIL, Petroleum, (New York.)

SENE'CIO, *S. vulga'ris,* from *senex,* 'an old man,' in allusion to the grayish down on many species; *Erig''erum, Cortalom, Erigeron, Groundsel, Fireweed,* (Sc.) *Groundie Swallow,* (F.) *Seneçon commun. Ord.* Compositæ. *Sex. Syst.* Syngenesia Polygamia Superflua. A common plant in Europe; frequently applied, bruised, to inflammations and ulcers, as refrigerant and anti-scorbutic.

SENE'CIO AU'REUS, *Golden ragweed, Wild vale'rian, Life root, Squaw root;* indigenous. Is an excitant, diaphoretic, and diuretic. The dried plant is used in decoction; — ℥ss to Oj of water.

SENECIO HIERACIFOLIUS, Erechthites hieracifolius.

SENECIO JACOBÆ'A, *Jacobæ'a, St. James's Wort, Ragwort,* (Sc.) *Bunwede, Weebo,* (F.) *Jacobée.* The leaves have a roughish, bitter, subacid, and extremely nauseous taste. A decoction has been used in dysentery. A poultice of the leaves has been recommended in rheumatic affections; and a decoction of the root has often been employed in cases of wounds and bruises.

SENEÇON COMMUN, Senecio.

SENECTA, Senectus.

SENEC'TA AN'GUIDM. The cast skin of a serpent. A decoction of it is said to cure deafness!

SENECTA DECREPITA, Decrepitude — s. Extrema, Decrepitude — s. Summa, Decrepitude — s. Ultima, Decrepitude.

SENEC'TUS, *Senec'ta,* from *senex,* 'an old man;' *Geras, Se'nium, Ætas seni'lis* seu *provec'ta* seu *mala, Old age, Senil'ity,* (F.) *Vieillesse.* The last period of life, commencing, according to some, at 60 years of age,—according to M. Flourens at 70,—but varying according to numerous circumstances. It is characterized by progressive diminution of the physical and moral faculties

SENECTUS ULTIMA, Decrepitude.

SENEGA, Polygala senega.

SEN'EGAL, GUM, *Gummi Senegalen'se* seu *Seu'eca* seu *Sen'ega* seu *Sen'ica.* The exudation from *Aca'cia* seu *Mimo'sa Senegal. — Ord.* Leguminosæ. *Sex. Syst.* Polygamia Monœcia — which grows in the country of Africa through

which the river Senegal runs. It is in loose or single drops, much larger than gum Arabic, or the gum which exudes from the cherry tree; and is much more difficult of solution than the former.

SENEGINE, see Polygala senega.

SÉNÉGRAIN, Trigonella fœnum.

SENEKA, Polygala senega.

SÉNEVÉ, Sinapis.

SENGREEN, Sempervivum tectorum.

SENILE, *Seni'lis*, from *senex*, 'an old man.' Relating or belonging to old age: — as '*senile* delirium;' dotage.

SENILITY, Senectus.

SENNA, Cassia senna—s. Alexandrina, Cassia senna—s. American, Cassia Marilandica—s. Bladder, Colutea arborescens—s. Essence of, prepared, Selway's, see Infusum sennæ compositum — s. Germanica, Colutea—s. Italica, Cassia senna—s. Prairie, Cassia chamæcrista—s. Wild, Cassia chamæcrista, Cassia Marilandica.

SENS, Sense — *s. Génital*, Appetite, venereal.

SENSA'TION, *Sensa'tio*, from *sentire*, *sensum*, 'to feel;' *Æsthe'ma*. The consciousness or cognisance by the brain of an impression caused by an external body on the organs of the senses. (F.) *Sentiment*. It is not necessarily, however, confined to bodies external to us; for we can receive an impression by touching any part of our own body. The body which communicates the impressions needs but to be external to the part impressed. Sensations are divided into *external*, *internal*, and *morbid*. The *external* are communicated by the five organs of the senses. The *internal* are such as occur within the body, and arise from some alteration in the function of the part, for the time being. Hunger and thirst are internal sensations, as well as all the natural wants. *Morbid* sensations may be either internal or external. *Objec'tive sensations* are produced by impressions on the peripheral nerves; as in vision, audition, &c. *Subjec'tive sensations*, are such as originate centrically, or in the encephalon,—as tinnitus aurium.

SENSATIONAL, Sentient.

SENSE, *Sensus*, *Sen'sio*, *Æsthe'sis*, (F.) *Sens*. Same etymon as Sensation. A faculty, possessed by animals, of appreciating impressions from external objects. The senses are five in number; sight, hearing, smell, taste, and touch. Of these, the first two and the last administer more to the intellect; and, hence, have been called by some, the *intellectual senses*; the other two seem more destined for the nutrition of the body: and, hence, have been termed *corporeal* or *nutritive senses*. Other senses have been suggested — as the intense sensation experienced during the venereal act; a sense of heat and cold; a muscular sense, a common sense or cœnæsthesis, &c.

SENSES, NERVOUS SYSTEM OF THE, Medulla oblongata.

SENSIBILITAS, Sensibility—s. Anomala, see Irritable — s. Aucta, see Irritable — s. Morbosa, see Irritable.

SENSIBIL'ITY, *Sensibil'itas*. Same etymon as Sensation: *Æsthe'ma*. The faculty of receiving and transmitting impressions, and having the consciousness of them. It thus includes three secondary properties, *impressibility*, (F.) *impressionabilité*, *transmissibility*, and *perceptibility*. Bichat defines it as the property possessed by living bodies, of receiving impressions, whether the individual be conscious of them or not. In the former case, where conscious, he calls the sensibility *animal*: in the latter, where not, he terms it *organic*. This last is common to vegetables and animals, and presides over nutrition, absorption, exhalation, secretion, &c. The other does not exist in vegetables: it is the origin of the sensations—olfaction, vision, gustation, audition, thirst, hunger, pain, &c. There are few parts of the animal body, but what are sensible — if not in health—in disease. The free extremities of the hair and nails, and the epidermis, are not so. See Insensibility.

SENSIFEROUS, Sentient.

SENSIO, Sense.

SENSITORIUM, Sensorium.

SENSORI-VOLIT''IONAL. A term applied to nervous fibres which pass to and from the cerebro-spinal axis, and are respectively concerned in sensation and volition.

SENSO'RIAL, Sentient.

SENSORIAL POWER, according to Dr. Wilson Philip, is composed of the two functions of sensation and volition. Dr. Darwin included in it the power of muscular contraction; but it ought not to be extended to acts in which there is not consciousness.

SENSO'RIUM, *S. commu'nĕ*, *Or'ganon senso'rium internum*, *Sensito'rium*, *Empo'rium spirituum*, *Æsthete'rion*, *Sen'sory*. Same etymon. The common centre of sensations.

SENSORY, Sensorium, Sentient.

SEN'SORY GANG'LIA. A name given by Dr. Carpenter to a series of ganglionic masses at the base of the brain, which are in direct communication with the nerves of sensation—as the *olfactory*, *optic*, *auditory*, and *gustatory*.

SENSORY NERVES, *Nerves of sensation*, are so called in contradistinction to *Motor* nerves. There are *general sensory nerves* — as those connected with the posterior part of the spinal marrow, and the fifth pair; and *special sensory*, as those of the senses.

SENSUS ÆGRITUDINIS, Indisposition — s Osmometricus, Olfaction—s. Perversus, Pseudæsthesia.

SEN'TIENT, *Sen'tiens*, *Sen'sory*, *Ideäg''enous*, *Senso'rial*, *Sensa'tional*, *Sensif'erous*. Same etymon. Feeling, causing feeling.

SENTIENT EXTREMITIES OF NERVES are their minute terminations in the organs.

SENTINA, Pituitary gland.

SENTIMENT, see Sensation.

SEPARATO'RIUM, from *separare*, *separatum*, 'to separate.' A surgical instrument, for separating the pericranium from the skull.

A *Sep'aratory*, *Vitrum Hypoclep'ticum*, is a pharmaceutical vessel for separating fluids of different densities from each other.

SEPEDOGENESIS, Sepedonogenesis.

SEPEDON, Putrefaction.

SEPEDONODES, Putrid.

SEPEDONOGEN'ESIS, *Sepedogen'esis*, from σηπεδων, 'putrescency,' and γενεσις, 'generation.' A septic disposition or tendency; such as is met with in typhus gravior.

SEPES, *Sæ'pes*, 'a hedge,' 'a row;' as *Sepes* seu *Se'ries* seu *Pecten den'tium*:—a row of teeth.

SEPES DENTIUM, see Sepes.

SEPHIRUS, Scleriasis.

SE'PIA, σηπια, *S. officina'lis*, *Se'pium*, *Cuttle-Fish*, (Sc.) *Hose-Fish*, *Slieve-Fish*, (F.) *Sèche*. *Class* Cephalopoda. The osseous part of the cuttle-fish; (F.) *Os de Sèche—Præcip'itans mag'num*—has been used as an absorbent, and is often added to tooth-powders.

SEPLASIA'RIUS. A name formerly given to one who sold perfumes, ointments, &c. It is derived from *Seplasia*, the name of a public place at Capua, where such preparations were frequently sold. A druggist.

SEPSICHYMIA, Septochymia.

SEPSIS, Putrefaction.

SEPTÆ'MIA; from σηπτος, 'rotten,' and 'αιμα,

'blood.' A morbid condition of the blood produced by septic or putrid matters.

SEPTAL, *Septa'lis*, from *Septum*. Relating, or appertaining to, a septum: as 'septal walls of the heart'—those that separate the cavities from each other.

SEPTANA FEBRIS, Fever, septan.

SEP'TENARY, *Septena'rius*, (F.) *Septénaire*, from *septem*, 'seven.' 'Consisting of seven.' The septenary years of the old believers in critical periods were times at which, it was supposed, important changes might be expected to take place. The grand climacteric was fixed at 63, and it was considered that if a person passed that age, he had well-founded expectations that his life might be protracted to 90.

SEPTENNIAD, Climacteric, (years.)

SEPTERIUS, Septic.

SEPTFOIL, UPRIGHT, Tormentilla.

SEPTIC, *Sep'ticus*, *Septus*, *Septerius*, from *σηπειν*, 'to rot,' *σηπτος*, 'rotten.' That which produces putrefaction. A substance which corrodes and disorganizes the soft parts without causing much pain.

SEPTIC POISON, see Poison.

SEPTICÆMIA, Septæmia.

SEPTIMESTRIS FŒTUS, see Fœtus septimestris.

SEPTINERVIA, Plantago.

SEPTOCHYM'IA, *Sepsichym'ia*; from *σηψις*, 'putrefaction,' and *χυμος*, 'juice.' Putrefaction or putrescency of the humours.

SEPTON, Azote.

SEPTOPYRA, Typhus gravior.

SEPT'ULUM; diminutive of *septum*. A division between small spaces or cavities — as the *septula* or fibrous cords given off by the mediastinum testis to be inserted into the inner surface of the tunica albuginea.

SEPTUM, (F.) *Cloison*, 'a partition,' from *sepio*, *septum*, 'I fence in.' A part destined to separate two cavities from each other, or to divide a principal cavity into several secondary cavities.

These septa are numerous in the human body. The chief are the following:—

SEPTUM ATRIO'RUM, *S. Auricula'rum*. The septum or partition between the auricles of the heart.

SEPTUM AURICULARUM, S. Atriorum—s. Cerebelli, Falx cerebelli—s. Cerebri, Falx cerebri—s. Cochleæ auditoriæ, Lamina spiralis.

SEPTUM CORDIS, *Septum me'dium cordis*. The partition which separates the two ventricles of the heart.

SEPTUM ENCEPHALI, Tentorium.

SEPTUM LU'CIDUM seu *pellu'cidum* seu *ten'uē et pellucidum* seu *me'dium*, *Spec'ulum*, *S. lucidum*, *Lapis specula'ris*, *Mediasti'num* seu *Diaphragma ventriculo'rum latera'lium cer'ebri*, (F.) *Septum médian* (Ch.), *Cloison transparente*. The soft portion or medullary substance, which separates the two lateral ventricles of the brain from each other. This septum is composed of two laminæ; between which a small cavity exists, filled by a serous fluid, *ventric'ulus septi pellu'cidi*, see Ventricles of the Brain. The brothers Wenzel are of opinion that this cavity is lined by a peculiar membrane.

SEPTUM MÉDIAN, S. lucidum—*s. Médian lu cervelet*, Falx cerebelli—s. Medium cerebri, S. lucidum.

SEPTUM NA'RIUM, *Interseptum* seu *Dissepimen'tum* seu *Interfi'nium* seu *Discri'men* seu *Imbrex* seu *Diaphrag'ma na'rium*, (F.) *Cloison des Fosses nasales*. The partition between the nares. It is formed by the vomer, the perpendicular plate of the ethmoid bone, and a cartilage of a triangular shape. These parts are lined by the pituitary membrane, which receives a considerable number of nerves and vessels.

SEPTUM NASI, see Nares.

SEPTUM PARVUM OCCIPITALE, Falx cerebelli—s. Pectiniforme, see Cavernous bodies—s. Pellucidum, S. Lucidum—s. Scalæ, Lamina spiralis—*s. Staphylin*, Velum pendulum palati—s. Tenue et pellucidum, S. lucidum—s. Thoracis, Mediastinum—*s. Transverse*, Tentorium—s. Transversum, Diaphragm—s. Vestibuli nervoso-membranaceum, see Labyrinth.

SEPTUS, Septicus.

SEPUM, Sevum.

SEQUES'TRUM, "the depositing of a disputed thing in the hands of a third person!" The portion of bone, in necrosis, which is dead, and separated from the living bone; acting, whilst retained, as an extraneous body. When the sequestrum is superficial and small, it is called *Exfolia'tion*. The portion of bone surrounding it is the *Cap'sula sequestra'lis*.

SERAPEUM, Syrup.

SERAPINON, Sagapenum.

SERAPIUM, Syrup.

SERBET, Scherbet.

SÉREUX, Serous.

SE'RICO-CARPUS TORTIFO'LIUS, *Cony'za bifolia'ta*, *Aster tortifo'lius*; indigenous; *Order*, Compositæ: is said to be diuretic.

SER'ICUM, *Silk*; from *Seres*—the Thibetans probably—from whom it was first obtained. (F.) *Soie*. The thread spun by the *Bombyx Mori* or *Silkworm*. Silk is used by surgeons for ligatures, &c.

SERICUM ANGLICUM, see Sparadrapum adhæsivum.

SERIES DENTIUM, see Sepes.

SÉRIEUX, Serious.

SERINGUE, Syringe.

SERIOLA, Cichorium intybus.

SE'RIOUS, *Serius*, (F.) *Sérieux*, *Grave*. A term applied to a disease, *Dyspathi'a*, *Morbus gravis*, and to a symptom that is attended with danger.

SERIS, Cichorium intybus.

SERMOUNTAIN, Laserpitium album.

SERO-COLITIS, see Colitis.

SERO-CYSTIC, *Sero-cyst'icus*. An epithet for tumours of the female breast, which consist, in the first stage, of one or more membranous cysts, produced perhaps by dilatation of portions of the lactiferous tubes.

SERO-HEPATITIS, see Hepatitis.

SER'OLIN, from *serum* and *olein*. A peculiar fatty matter detected in the blood by Boudet, Lecanu, Sanson, and others.

SÉROSITÉ, Serum.

SEROSITY, Serum.

SEROUS, *Sero'sus*, (F.) *Séreux*; from *serum*. Thin; watery. Relating to the most watery portion of animal fluids, or to membranes that secrete them. See Serum.

SEROUS LAYER, see *Tache embryonnaire*—s. Membranes, Membranes, serous.

SERPEDO, Psoriasis.

SERPENT, *Serpens*, *Anguis*, *Ophis*; from *serpo*, 'I creep.' A snake.

SNAKE BROTH was, at one time, recommended as a restorative.

Many serpents are venomous: and the bites of some fatal. See Poisons, table of.

SERPENTAIRE NOIRE, Actæa racemosa—*s. Rouge*, Polygonum bistorta.

SERPENTARIA, Aristolochia serpentaria—s. Gallorum, Arum dracunculus—s. Hispanica, Scorzonera—s. Minor, Arum maculatum—s. Nigra, Actæa racemosa.

SERPENTARIÆ BRAZILIENSIS RADIX, Cainœæ radix.

SERPENTIN, see Alembic.

SERPENTINE, Ophites.

SERPENTINUS, Ophites.

SERPES, Herpes.

SERPIG''INOUS, from *serpere*, 'to creep.' An epithet given to certain affections, which creep, as it were, from one part to another,—'*Serpiginous* erysipelas,' (F.) *Érysipèle serpigineux.*

SERPIGO, Herpes circinatus, Lichen psoriasis.

SERPILLUM, Thymus serpyllum.

SERPOLET, Thymus serpyllum.

SERPULLUM, Thymus serpyllum.

SERPYLLUM, Thymus serpyllum—s. Citratum, see Thymus serpyllum.

SERRA, Saw—s. Amputatoria, Saw, amputation—s. Versatilis, Trepan.

SERRAT'ULA AMA'RA, from *serra*, 'a saw,' owing to its serrated leaves. *Family*, Cynarocephaleæ. *Sex. Syst.* Syngenesia Polygamia æqualis. A species of *Sawwort*, recommended in ague.

SERRATULA BEHEN, Centaurea behen.

SERRATUS, Dentate—s. Anticus Minor, Pectoralis minor.

SERRA'TUS MAGNUS. So called from its serrated appearance; from *serra*, 'a saw.' *Serratus major anti'cus, S. major*, (F.) *Costo-basi-scapulaire, Costo-scapulaire* (Ch.), *Grand dentelé.* A very broad (especially anteriorly), thin, flat, irregularly quadrilateral muscle, situate at the sides of the thorax. It is attached, before, to the external surface of the first 8 or 9 ribs, by as many distinct digitations; and, behind, to the spinal edge of the scapula. The superior fibres are almost horizontal; the lower become gradually more and more oblique upwards and backwards. This muscle carries the scapula forwards, and causes it to execute a movement of rotation, which directs its inferior angle forwards, and the anterior upwards. When the shoulder is fixed, it raises the ribs.

SERRATUS MAJOR, Serratus magnus—s. Major anticus, Serratus magnus.

SERRATUS POSTI'CUS INFERIOR, (F.) *Dorso-lombo-costal, Lombo-costal* (Ch.), *Petit dentelé postérieur et inférieur.* A broader and thinner muscle than the following, but nearly of the same shape. It is situate obliquely at the lower part of the back; and extends from the spinous processes of the last two or three dorsal vertebræ, and the first two or three lumbar, to the inferior margin of the last four false ribs. This muscle depresses the ribs, and thus concurs in expiration. It is an antagonist to the next.

SERRATUS POSTI'CUS SUPE'RIOR, (F.) *Cervico-dorso-costal, Dorso-costal*, (Ch.) *Petit dentelé supérieur.* A flat, thin, quadrilateral muscle; situate obliquely at the posterior inferior part of the neck, and the superior part of the back. It passes from the posterior cervical ligament, the spinous process of the last cervical vertebra; from the spinous processes of the first two or three dorsal, to the second, third, fourth, and fifth ribs; into which it is inserted by as many digitations. It raises the ribs, and is, consequently, an inspiratory muscle.

SERRE-ARTÈRE, Presse-artère.

SERRE-COU (F.), from *serrer*, 'to squeeze,' and *cou*, 'the neck.' An instrument, invented by Chabert, for compressing the jugular vein, in bleeding from that vessel. It surrounds the neck like a collar, and, by means of a pad, exerts the necessary pressure.

SERRE-FINE, (F.), from *serrer*, 'to squeeze,' and *fin*, 'fine.' A small spring forceps, invented by M. Videl. It is formed of a wire of metal, turned in the middle into two spirals, one in front of the other. This constitutes the spring. Each branch describes nearly the letter S; and one extremity forms the spiral, the other lays hold of the parts to be united.

SERRE-NŒUD (F.), from *serrer*, 'to squeeze,' and *nœud*, 'a knot.' This name has been given to various instruments, employed by the surgeon for tightening a ligature passed round a pediculated tumour, or any part which has to be destroyed by ligature slowly and gradually. Thus, there is the *serre-nœud* of Roderic, the *constricteur* of Herbinaux, the *serre-nœud* of Desault, &c.

SERRE NŒUD DE DESCHAMPS, Presse-artère.

SERTULA CAMPANA, Trifolium melilotus.

SERUM, Sperm.

SERUM, 'whey.' *Orrhos, Oros, Seros'ity*, (F.) *Sérosité.* The most watery portion of animal fluids, exhaled by serous membranes. It is a constituent part of blood, milk, &c.

SERUM OF THE BLOOD, *Hæmydor, Orrhos, Serum* seu *Ichor san'guinis*, (F.) *Sérum du Sang*, is the liquid which separates from the blood, when coagulated at rest. It is of a greenish-yellow colour; viscid, slightly coagulable by heat, acids, and alcohol. It is composed of water; chloride of sodium; certain phosphates; and albumen, constantly united to soda, almost in a saponaceous combination.

The fluid which exudes from the albumen of the serum of the blood, when coagulated by heat, is by some called *seros'ity.*

SÉRUM DU SANG, S. of the blood.

SERUM LACTIS, *Aqua Lactis; Serum of Milk, Whey*, (Prov.) *Whig*, (F.) *Sérum du lait, Petit lait.* That part of milk from which the butter and caseous matter have been separated. It is a transparent, citrine-coloured liquid, containing sugar of milk, mucilage, acetic acid, phosphate of lime, and some other saline substances. It is used as a slightly nutritious diluent and refrigerant. The French have magistral formulæ, the basis of which is whey. They are called *Petite-laits*, or 'wheys.'

SERUM LACTIS HOFFMAN'NI, (F.) *Petit-lait d'Hoffmann*, is a name given to the liquid resulting from treating with boiling water milk which has been evaporated to an almost solid consistence. It is not much used.

RENNET WHEY is made thus: *milk* 2 pints; *rennet* ℥ss, infused in a little hot water; mix and keep in a gentle heat for some hours, then strain. —Gray.

SERUM SANGUINIS, Serum of the blood.

SERUM OF SEROUS MEMBRANES, *Serum membranarum serosa'rum, Water of Dropsy*, (F.) *Sérum des membranes séreuses, Eau des hydropiques.* It resembles the serum of the blood,—especially in cases of hydrocele. The water of hydrothorax and ascites contains much less albumen:—sometimes enough to coagulate on the application of heat: at others, not.

SERVICE, MOUNTAIN, Sorbus aucuparia.

SERVICE TREE, Sorbus domestica.

SERVIETTE EN CARRÉ, Couvrechef.

SÉSAME, Sesamum orientale.

SES'AMOID, *Sesamoï'des, Sesamo'des, Sesamoïdeus*, from *σησαμη*, 'a grain of sesamum,' and *εἰδος*, 'resemblance.'

SESAMOID BONES, *Ossa* seu *Ossic'ula sesamoïdea*, are small bones, situate in the substance of tendons, near certain joints. Their number is various. They are commonly more in the male than female. Two are constantly met with beneath the metatarso-phalangal articulations of the great toe. Sometimes, the articulations of other bones of the metatarsus with the phalanges of the toes have them likewise. In the hand, there are two before the metacarpo-phalangal joint of the thumb. At times, they are

met with in the other metacarpo-phalangal articulations. Occasionally, two exist behind the condyles of the femur, in the tendons of the gastrocnemii muscles. A considerable os sesamoideum is also met with in the tendon of the peronæus longus. These bones are commonly round, and flattened only on one surface, which is incrusted with cartilage. Their size is very variable, according to the joints in which they exist. Traces of sesamoid bones are not observed in infants: in them, they are replaced by small, cartilaginous concretions. They are developed by a single point of ossification: and are, like the patella (which is a true sesamoid bone,) composed of much cellular substance, covered by a thin layer of compact tissue. The *use* of these bones is,—to allow the tendon to be inserted into the lever at a greater angle; and thus enable the power to act more advantageously.

Riolan has given the name *Ossa sesamoïdea* to two bony points sometimes met with;—the one at the outer side of the carotid canal of the temporal bone; and the other at the edge of the cavernous sinus, at the side of the internal carotid artery.

SESAMUM, see Sesamum orientale.

Ses'amum Orienta'lē, *S. edu'lē* seu *oleif'erum* seu *In'dicum*, *Bennē*, *Oily Grain*, (F.) *Sésame*, *Jugeoline*. *Ord.* Bignoniaceæ. The seeds of this African plant are cultivated in Georgia and South Carolina, where the negroes use them with Indian corn as an article of food. They yield a larger proportion of oil than any other vegetable; one hundred weight producing ninety pounds of oil, which is, at least, equal to Florence oil.

Benne oil, *Oleum Ses'ami*, is used in the Southern States as a laxative. The leaves—*Sesami folia*, (Ph. U. S.)—afford, by infusion, an excellent mucilage.

SESCUN'CIA, *Sesquiun'cia*, *Hemiol'ion*. An ounce and a half. See Sesqui.

SESELI, Laserpitium siler—s. Ægopodium, Ligusticum podagraria—s. Annuum, S. tortuosum—s. Carum, Carum—s. Carvi, Carum—s. Creticum, Tordylium officinale—s. Fœniculifolium, Sison ammi—s. Graveolens, Apium graveolens—s. Meum, Æthusa meum—s. Patens, S. tortuosum—s. Pratense, Peucedanum silaus—s. *des Prés*, Peucedanum silaus.

Ses'eli Tortuo'sum, *S. Massilien'sē* seu *an'nuum* seu *patens*, *Œnan'thē stria'ta rig''ida*, *Hartwort of Marseilles*. The seeds have a warm taste; and a greater degree of pungency than those of Laserpitium siler, which is the *Seseli* of the Pharmacopœias.

SESELIS, Laserpitium siler, Seseli.

SESQUI. This word, joined with any number, weight, measure, &c., signifies one and a half; as *sesquigranum*, 'a grain and a half.'

SESQUIUNCIA, Sescuncia.

SETA EQUI'NA, 'horse-hair.' *Hairworm*, *Helmin'thus Gor'dii*. A kind of worm, found in stagnant water, from 4 to 6 inches long, and twisted into various knots and contortions; colour pale-brown, with dark extremities. It is common in the intestines of the Laplanders; causing the *Col'ica Lappon'ica*, in which the gripings are, at times, exceedingly severe.

SETA'CEUM, *Seto*, *Seton*, from *seta*, 'a bristle.' A long strip of fine linen or cotton twist, passed through the skin and areolar membrane, to keep up an issue; or through suppurating cavities, between the fragments of fractured bones, &c., to fulfil certain indications. The term is, also, applied to the issue so established. The operation is simple. It consists in laying hold of a fold of skin, and passing a seton-needle through it, with the thread attached. Every day a fresh portion of the thread is drawn through the sore. Setons are established in many diseases;—in obstinate ophthalmia, cephalalgia; epilepsy, thoracic and abdominal affections, &c.; but they are not as much used as formerly.

SETARIA ROCCELLA, Lichen roccella.

SETFAST, see Furunculus.

SETO, Setaceum.

SETON, Setaceum.

SETTERWORT, Helleborus fœtidus.

SEVADILLA, Veratrum sabadilla.

SEVATIO, Steatoma.

SĒVE, Sap.

SEVENBARK, Hydrangea arborescens.

SÉVRAGE, Weaning.

SEVUM, Pinguedo.

Sevum, *Sebum*, *Sepum*, *Stear*, *Adeps ovil'li*, *Sevum verveci'num*. Suet, mutton suet; Pinguedo.

Sevum Præpara'tum, *Sevum* (Ph. U. S.),—*Ovil'li Sevum Præpara'tum*, *Prepared Suet*, (F.) *Graisse de Mouton*, *Suif*, is formed by cutting suet in pieces; melting over a slow fire, and straining through linen. It is emollient, and is sometimes boiled in milk (℥ij to Oj), and is used in diarrhœa and dysentery. Its principal employment is in the formation of plasters.

Sevum Vervecinum, Sevum.

SEX, *Sexus*, *Genos*, *Physis*. The physical difference between male and female in animals and vegetables:—as the *Male sex*, *Sexus po'tior* seu *for'tior* seu *viri'lis*; and the *Female sex*, *Sexus seq'uior*, *S. mulie'bris*, *Alter Sexus*, '*The Sex*.'

SEXTANS, from *sextus*, 'the sixth;' *Sexta pars libræ*. The sixth part of a pound.—Galen.

SEXTA'RIUS. Same etymon. An ancient measure for liquid and solid substances; the sixth part of a congius. See Weights and Measures.

SEX'TULA. Same etymon. *Hexa'gium*, '*ἑξαγιον*. The sixth part of an ounce.

SEX'UAL, *Sexua'lis*, from *sexus*, 'sex.' That which relates to the sex; which characterizes the sex.

Sexual Diseases, *Morbi sexua'les*, are the diseases of the genital organs; as Sexual Functions are the genital functions.

Sexual Intercourse, Coition—s. Organs, Genital organs.

SEXUS, Sex—s. Alter, see Sex—s. Fortior, see Sex—s. Muliebris, see Sex—s. Potior, see Sex—s. Sequior, see Sex—s. Virilis, see Sex.

SEYDSCHÜTZ WATER, Seidschütz water

SHACKLE, Carpus.

SHACKLE-HAMMED, see Cnemoscoliosis.

SHADDOCK. The fruit of *Citrus decu'mana*, called after the captain of a vessel who first took it to the West Indies from China. It is large; but inferior to the orange in flavour. It keeps, however, longer; and, hence, is useful on long voyages.

SHAKERS, see *Convulsionnaire*.

SHAKES, Intermittent.

SHAKING, Intermittent, see Riger.

SHALLOT, Echalotte.

SHAMPOO'ING, *Champooing*, *Massing*, (F., *Massage*, *Massement*. A Hindoo process, which consists in pressing the body of the bather in a peculiar manner; cracking the various joints, and employing blows and friction.

'Kneading' consists in pressing alternately upon a part of the body to arouse the muscles to more energetic action. It is employed at times in dyspepsia.

SHAMROCK, INDIAN, Trillium latifolium—s. Water, Menyanthes verna.

SHANKER, *Chancre.*

SHANNONDALE SALINE SPRINGS. These are within a few miles of Charlestown, Jefferson County, Virginia. They are mildly aperient and diuretic.

SHARON SPRINGS, NEW YORK. These springs, which are situate about 10 or 12 miles south of Canajoharie, N. Y., and 45 miles west of Albany, are much frequented. They contain, according to the analysis of Dr. Chilton, sulphate of magnesia, sulphate of lime, chloride of sodium, chloride of magnesium, sulphohydrate of sodium, sulphohydrate of calcium, vegetable extractive matter, and free sulphohydric acid gas. Their temperature is 48° Fahr.

SHEATH, Vagina.

SHEDDING OF THE TEETH, see Dentition.

SHEEP POISON, Kalmia latifolia.

SHELLBARK, see Hickory.

SHELL FLOWER, Trillium latifolium — s. Liquid, see Calcis murias — s. Membrane, Membrana testæ.

SHEPHERD'S PURSE, Thlaspi bursa — s. Sun dial, Anagallis arvensis.

SHERBET, Scherbet—s. Orange, see Syrupus aurantii.

SHERMAN'S WORM LOZENGES, see Worm lozenges, Sherman's.

SHERRY, Sack, see Wine.

SHIELD-BONE, Scapula.

SHIELD, WATER, Nelumbium luteum.

SHILDER, Humerus.

SHIN, *O'erea, Crista tib'iæ,* Sax. ɼcina. The *spine* or anterior part of the tibia or leg. It is, also, called *Anticne'mion,* and *Crea.*

SHINBONE, Tibia.

SHINGLES, Herpes zoster.

SHINLEAF, Pyrola.

SHINLOCK, Brassica eruca.

SHIP FEVER, see Typhus.

SHITABED, Leontodon taraxacum.

SHIVERING, see Rigor.

SHOCK, see Concussion.

SHOCK, NERVOUS, *Vital Shock, Vital Depression, Nervous Depression, Fatal Sinking.* Sudden or instantaneous depression of organic, nervous, or vital power, often with more or less perturbation of body and mind, passing either into reaction, or into fatal sinking, occasioned by the nature, severity or extent of injury, or by an overwhelming moral calamity. — Copland.

SHOCK, VITAL, Shock, nervous.

SHOOT, Crick-in-the-neck.

SHORT, Sax. ɼeopt, from ɼcinan, 'to cut, to *shear,' shored, shor'd, short,* (F.) *Court.* A word used, by anatomists, in opposition to *long;* and to distinguish parts from each other that have otherwise the same name.

SHORT BONES, for example, are those in which the three dimensions—length, breadth, and thickness — are nearly alike; such are the vertebræ, bones of the carpus, tarsus, &c.

SHORT-OF-PUFF, Short-winded — s. Ribs, see Costa.

SHORTSIGHTED, Myopic.

SHORTSIGHTEDNESS, Myopia.

SHORTWINDED, Pursy.

SHOTBUSH, Aralia spinosa.

SHOTT, Pleurodynia.

SHOULDER, Humerus — s Blade, Scapula — s. Bone, Humerus.

SHOUP, Haunch.

SHOVEL PICKEREL WEED, Unisema deltifolia — s. Pond, Unisema deltifolia.

SHOW, see Parturition.

SHOW-CHOO, see Spirit.

SHOWER-BATH, see Bath.

SHRUB, perhaps, from Arabic, *sharab,* 'syrup.' A compound of spirits, lemon-juice, and sugar.

SHRUB, SWEET, Calycanthus—s. Sweet-scented, Calycanthus.

SHRUMP-SHOULDERED, see Hump.

SHUD'DERING, *Frem'itus, Phryag'ma,* from (G.) Schauder, Schauer, (F.) *Frémissement, Tressaillement.* A peculiar sensation, felt either externally or internally; and which seems to be the result of a spasmodic movement of the parts in which it occurs. A slight feeling of cold sometimes accompanies it. It is, at times, the result of a moral cause, and is often the precursor of shivering.

SHULL-BANE, Humerus.

SHUMAC, Rhus coriaria.

SIAGANTRI'TIS, from σιαγων, 'the jaw,' αντρον, 'a cavity,' and *itis,* denoting inflammation. Inflammation of the lining membrane of the antrum of Highmore.

SIAGON, Maxillary bone.

SIAGO'NAGRA, from σιαγων, 'the jaw,' and αγρα, 'a seizure.' *Arthri'tis maxilla'ris.* A gouty or rheumatic affection of the joint of the lower jaw.

SIALACHUS, Salivation.

SIAL'AGOGUE, *Sialago'gus, Sial'ogogue, Ptyal'agogue, Ptyas'magogue, Sali'vans, Saliva'tum, Sialocinet'icus, Apophlegmat'isans per os,* (F.) *Salivant;* from σιαλον, 'saliva,' and αγω, 'I expel.' That which provokes the secretion of saliva. Pyrethrum and mercury are sialogogues. Sialagogues may be of two kinds, those which act through the circulation, and those which act immediately on the salivary organs. Mercury belongs to the former, — pyrethrum to the latter class. The chief sialagogues are armoracia, calamus, mezereum, pyrethrum, tabacum, and zingiber.

SIAL'ICA, from σιαλον, 'saliva.' Medicines, which affect the salivary glands.—Pereira.

SIALISMUS, Salivation.

SIALOCINETICUS, Sialagogue.

SIALOLITHI, Calculi, salivary.

SIALOLOG''IA, from σιαλον, 'saliva,' and λογος, 'a discourse.' A treatise on saliva.

SIALOMA, Saliva.

SIALON, Saliva.

SIALORRHŒA, Salivation.

SIALOS'CHESIS, from σιαλον, 'saliva,' and σχεσις, 'retention.' Retention or suppression of the saliva.

SIALOSYRINGES, Salivary fistulæ.

SIALOZEMIA, Salivation — s. Mercurialis, Salivation, mercurial.

SIAMESE TWINS, see Twins, Siamese.

SIBARE, Phrenitis.

SIBBENS, *Sivvens, Frambœ'sia Sco'tica.* An infectious disease in the mountainous parts of Scotland, viewed to be of the venereal kind. *Sivin,* in the Keltic, means raspberry; and it is said that, in this affection, fungi appear like raspberries. From *sivin,* the inhabitants have made *sievin, sibben, sibbens,* and *sivvens.* By some, this affection is regarded as a complication of the venereal and itch. In the Orkneys, *sibbens* means itch. — Jamieson.

SIB'ILANT, *Sib'ilus, Sib'ilans,* from *sibilo,* 'I hiss, I whistle.' Making a hissing or whistling sound. See *Râle sibilant.*

SIBILISMUS AURIUM, Tinnitus aurium.

SIBILUS AURIUM, Tinnitus aurium.

SICCAN'TIA, from *siccare,* 'to dry.' *Xeran'tica,* (F.) *Siccatifs.* Drying medicines. See Desiccativa.

SICCATIFS, Siccantia.

SICCATIO, Drying.

SICCHA'SIA, σιχασια, 'disgust.' A distressing disgust for food; such as is experienced by women with child.

SICIL/ICUM. A Roman weight of about two drachms.

SICK, Sax. ɼeoc, *Æger, Ægro'tus, Nos'eros, Noso'des, Jacens, Laborio'sus, Labo'rans,* (F.) *Malade.* Labouring under disease; *Disea's'ed, Distem'pered, Ill, Ailing, Disor'dered.* Such is its acceptation in old English, and generally in the United States. In most parts of the United States, if a patient is affected with a slight indisposition, he is said to be *sick;* if with one more severe, he is said to be *ill;* (Prov.) *bad, badly.* In England, it most commonly means,—affected with disorder of the stomach, or nausea.

A sick person, *Æger, Ægro'tus,* (F.) *Malade,* who is under the charge of a physician is said to be a *patient,* or the patient of the physician. At times, but rarely, patient is used for a sick person in the abstract.

Sick Stomach, Milk sickness.

SICKLY, *Morbo'sus, Valetudina'rius, Adyn'atos, Nosac'eros, Noso'des, Morbose, Mor'bulent, Unhealth'y,* (Sc.) *Hough,* (F.) *Maladif.* Subject to be sick, or in feeble health. Ailing.

SICKNESS, Disease, Plague — s. Falling, Epilepsy — s. Mountain, Puna — s. River, Milk sickness — s. Sea, Nausea marina — s. of the Stomach, Vomiting — s. Swamp, Milk sickness.

SICLIUM, Sicilicum.

SICUA, Cupping-glass.

SICULA, Beta, Penis.

SICYEDON, Cauledon.

SIDA ABUTILON, Abutilon Avicennæ.

SIDE, PAIN IN THE, Pleurodynia.

SIDERA'TIO, *Sydera'tio, Sidera'tion,* from *sidus, sideris,* 'a star;' because the condition was thought to be produced by the influence of the stars. The state of one struck suddenly, without apparent cause, and as if by the influence of the stars or planets — *Planet-struck.* The ancients comprised under this name, different morbid conditions, such as paralysis, apoplexy, and gangrene.

Sideratio, Apoplexy, Asphyxia, Phrenitis — s. Ossis, Spina ventosa.

SIDERATION, Astrobolismos, Sideratio.

SIDERION, Ferramentum.

SIDERITES, Magnet.

SIDERITIS, Magnet, Teucrium chamæpitys.

SIDEROKRENÆ, Water, mineral, (chalybeate.)

SIDEROPEGÆ, Water, mineral (chalybeate).

SIDEROS, Ferrum.

SIDEROXYLON, Chrysophyllum cainito.

SIDE-SADDLE-PLANT, Sarracenia.

SIDHEE, see Gunjah.

SIDMOUTH (CLIMATE OF). Sidmouth is in Devonshire, England, on the sea-beach, at the mouth of the Sid. It is much frequented by invalids, both during the summer and winter. The climate is, however, damp, and subject to sea-fogs.

SIÈGE, Anus.

SIELISMOS, Salivation.

SIELON, Saliva.

SIEVE, see Cribration — s. Drum, see Cribration.

SIFFLEMENT (F.), from *siffler,* 'to whistle.' Whistling.

SIFFLEMENT MODULÉ, Chant des artères, Bruit musical, 'modulated whistling, or music of the arteries.' A kind of sound heard on auscultation, resembling, at times, the humming of certain insects. Various musical sounds, (F.) *Bruits musicaux,* are described from fancied resemblances:—as *Bruit de piaulement,* resembling the clucking of the hen;—*Bruit de jappement,* resembling the barking or yelping of a young dog, &c.

The sound is chiefly met with in those labouring under chlorosis.

SIGAULTIAN SECTION, Symphyseotomy.

SIGE, Taciturnity.

SIGH, Suspirium.

SIGHT, Vision — s. Askew, Dysopia lateralis — s. False, Metamorphopsia, Pseudoblepsia — s. Feebleness of, Amblyopia.

SIGILLUM SALAMONIS, Convallaria polygonatum — s. Virginitatis, Hymen.

SIGMATOID, Sigmoid.

SIGMOID, *Sigmoid'al, Sig'matoid, Sigmoï'des, Sigmo'des, Sigmoï'deus;* from *sigma* and *εἶδος,* 'resemblance.' That which has the form of the Greek S or C.

Sigmoid Cartilages, Semilunar cartilages.

Sigmoid Cavities or Fossæ of the Ulna, (F.) *Cavités* ou *Fosses sigmoïdes,* are two notches at the upper part of that bone, — one for the reception of the humerus; the other for that of the radius.

Sigmoid Flexure of the Colon, *Flexu'ra sigmoï'dea* seu *ili'aca,* is a turn the colon takes immediately before its termination in the rectum.

Sigmoid Fossa (of the temporal bone), Fossa sigmoidea.

Sigmoid or Semilunar Valves, *Valvulæ Sigmoïdea, Proces'sus Sigmoï'des,* (F.) *Valvules sigmoïdes* ou *semilunaires,* are three valvular folds, at the commencement of the pulmonary artery and aorta. These valves have the form of a crescent, when applied against the parietes of the vessel. When the blood is sent from the ventricles by their contraction, the valves are applied against the sides of the vessel; but, during the diastole of the ventricle, they are depressed, and prevent the blood from returning to the heart. At the middle of the convexity of each valve is a small, hard, triangular granulum, called *Corpus'culum* seu *Glob'ulus Aran'tii,* which completely closes up the passage. It is, also, called *Corpusculum Morgagn'ii* and *C. Sesamoï'deum,* (F.) *Globule d'Arantius.*

SIGN, *Signum, Semi'on,* (F.) *Signe.* Any present or past circumstance, afforded by the examination of a patient, or of matters concerning him, whence a conclusion may be drawn regarding the nature and seat of his disease. The phenomena which precede the disease are called *anamnes'tic* or *commem'orative signs;*—those which accompany it are termed *diagnos'tic,* if they reveal the nature or seat of the disease, — *prognos'tic,* when they indicate its probable duration and termination. See Symptom.

SIGNA ASSIDENTIA, see Assidens.

SIG'NATURE, *Signatu'ra, Signa'tio,* from *signum,* 'a sign;' *Episphagism'os.* This term was applied in the Eastern countries, in the middle ages, to mystic characters of good or bad augury, with which it was pretended that every one was marked by the star under which he was born.

Signatures of Plants meant certain peculiarities in their external formation or colour, which indicated that they were adapted for particular diseases:—as in the case of the *Lungwort, Liverwort,* &c.

SIGNES AVANT-COUREURS, Precursory signs—*s. Précurseurs,* Precursory signs.

SIGNUM, see Parturition — s. Characteristicum, see Pathognomonic — s. Conjunctum, see Pathognomonic — s. Diacriticum, see Diacritica signa — s. Morbi essentiale, see Pathognomonic.

SILACH, *Silac.* An Arabic word, used to designate thickening of the eyelids, *Crassit''ies Palpebra'rum;* and, also, *Alopecia.* — Forestus, Stephanus.

SILENCE, see Murmur, respiratory.

SILENE CRASSIFOLIA, Cucubalus behen—

s. Inflata, Cucubalus behen — s. Thorei, Cucubalus behen.

SILE'NĒ VIRGIN'ICA, *Ground Pink, Wild Pink, Catch Fly. Ord.* Caryophyllaceæ. The root has been employed in decoction, as an efficacious anthelmintic.

SILENE PENNSYLVAN'ICA probably has the same properties.

SILER LANCIFOLIUM, Laserpitium siler — s. Montanum, Laserpitium siler.

SIL'IQUA, *Cera'tion;* the carat. A weight of about four grains. A pod.

SILIQUA ARABICA, Tamarindus — s. Araci aromatici, see Vanilla — s. Banillæ, see Vanilla — s. Dulcis, Ceratonium siliqua—s. Vanigliæ, see Vanilla — s. Vanilliæ, see Vanilla.

SILIQUASTRUM PLINII, Capsicum annuum.

SILK, Sericum.

SILK GRASS, Yucca filamentosa — s. Weed, Asclepias Sullivantii, Asclepias tuberosa—s. Weed, common, Asclepias Syriaca — s. Weed, flesh-coloured, Asclepias incarnata — s. Weed, swamp, Asclepias incarnata — s. Worm, see Sericum.

SILLON, Sulcus — *s. Horizontal de la veine ombilicale*, see Liver — *s. Transversale*, see Liver — *s. de la Veine cave inférieur*, see Liver — *s. de la Veine porte*, see Liver.

SILLONNEMENT, Segmentation.

SILO, Camus.

SILPHIUM, Laserpitium.

SILPH'IUM LACINIATUM, *Rosin weed, Compass plant, Polar plant.*

SILPHIUM PERFOLIA'TUM, *Cup Plant, Turpentine Sun Flower*, and

SILPHIUM TEREBINTHINA'CEUM, *Pra'irie Burdock; Nat. Order*, Compositæ; indigenous in Ohio and Michigan, and flowering from July to September; yield a fragrant gum which is esteemed stimulant and antispasmodic.

SILURUS GLANIS, see Ichthyocolla.

SILUS, Camus.

SILVER, Argentum—s. Ammonio-chloride of, see Argentum — s. Chloride of, see Argentum — s. Chloruret of, see Argentum—s. Cyanide of, see Argentum — s. Cyanuret of, see Argentum — s. Iodide of, see Argentum — s. Ioduret of, see Argentum.

SILVER LEAF, Magnolia macrophylla.

SILVER, MURIATE OF, see Argentum—s. Nitrate of, Argenti nitras — s. Oxide of, see Argentum.

SILVER AND AMMONIA, CHLORIDE OF, see Argentum — s. and Ammonia, chloruret of, see Argentum — s. and Soda, Hyposulphite of, Sodæ et argenti hyposulphis.

SILYBUM, Carduus marianus—s. Maculatum, Carduus marianus — s. Marianum, Carduus marianus.

SIMA'BA CEDRON. *Nat. Fam.* Simarubaceæ. A South American tree, the seeds of which — *cedron seeds* — have been used as an antidote for snake-bites. They have, also, been proposed in mental diseases and in epilepsy. The scrapings of the wood have been used as a substitute for sulphate of quinia.

SIMABA QUASSIOIDES, Nima quassioides.

SIMAROUBA, Quassia simarouba — s. Bitter, Quassia simarouba—*s. Faux*, Malpighia mourella.

SIMARUBA, Quassia simarouba.

SIMARUBA OFFICINALIS, Quassia simarouba.

SIMILATIO, Assimilation.

SIMITIUM, Plumbi subcarbonas.

SIMO, Camus.

SIMONEA FOLLICULORUM, Acarus folliculorum.

SIMOTRACHELUS, Bysauchen.

SIMPLER'S JOY, Verbena bastata.

SIMPLES. Medicinal herbs. One skilled in simples is called a *Simplist*, a *Rhizot'omist.*

SIMPLIST, see Simples.

SIMULATED DISEASES, Feigned diseases.

SIMULATI MORBI, Feigned diseases.

SIMUS, Camus.

SINA LEVANTICA, Artemisia santonica.

SINAPELÆ'ON, from *σιναπι*, 'mustard,' and *ελαιον*, 'oil.' Oil impregnated with mustard.

SINAPI, Sinapis.

SINA'PIS, *S. nigra* seu *cer'nua* seu *Oliveria'na, Bras'sica nigra, Napus, Eru'ca, Sina'pē, Sina'pi, Sine'pi, Na'pium, Napy, Common Black Mustard*, (F.) *Moûtarde noire* ou *grise, Sénevé, Sauve. Ord.* Cruciferæ. *Sex. Syst.* Tetradynamia Siliquosa. The seeds are inodorous, when entire; but, when bruised, the colour is very pungent; taste bitterish and acrid. They yield their virtues to water, and afford a bland oil by expression. The seeds are stimulant, diuretic, emetic, and rubefacient. They are sometimes recommended to be swallowed whole, in dyspepsia, torpor of the bowels, &c. Externally, they are applied in the form of cataplasm. See Sinapism.

SINAPIS ALBA, *S. folio'sa, Bonannia officina'lis, Napus Leuco-sina'pis, White Mustard*, is also used medicinally. It is somewhat less pungent than the black. The distilled oil—*Oleum Sinapis*—is a powerful stimulant and rubefacient. In the pharmacopœias of the United States and London, *Sinapis* is the seeds of Sinapis nigra and Sinapis alba.

Whitehead's Essence of Mustard consists of *oil of turpentine, camphor*, and a portion of *spirit of Rosemary:* to which is added a small quantity of *flour of mustard.* It is a celebrated embrocation for rheumatism, &c.

Whitehead's Essence of Mustard Pills consist of *yellow resin* and *balsam of tolu* enough to make into pills.

Mustard Whey is made by taking bruised *mustard seeds* ℥ss, and *milk* Oj. Boil together until the milk is curdled, and strain.

This whey is used in dropsy.

SINAPIS ARVEN'SIS, *S. Timoria'na, Charlock, Wild Mustard, Garlock, Chadlock, Runch*, (Sc.) *Runches, Scaldricks, Skellock, Skellie.* The seeds are sometimes substituted for black mustard.

SINAPIS CER'NUA, Sinapis — s. Eruca, Brassica eruca—s. Foliosa, S. alba—s. Nigra, see Sinapis alba — s. Oliveriana, Sinapis — s. Tamoriana, S. arvensis — s. Tuberosa, Brassica rapa.

SINAPISIS, Bole Armenian.

SIN'APISM, *Sinapis'mus*, from *sinapis*, 'mustard.' A cataplasm, of which mustard forms the basis, which is used for exciting redness, and acting as a counter-irritant. It is prepared by mixing flour of mustard and vinegar together to the due consistence. See Cataplasma sinapis.

SIN'CIPUT, *Sincip'ital Region, Syn'ciput, Hemicephalæ'um.* The French use it synonymously with *vertex, Mesocra'nium, Mesocra'num.* By some, it is applied to the frontal region or forepart, or forehalf of the cranium, *Hemicephal'ium, Hemiceph'alum.* The parietal bones have been called *sincipital bones, Ossa sincip'itis*, (F.) *Os du sinciput.*

SINDON, *σινδων*, very fine linen. A small piece of rag, or round pledget, supported by a thread at the middle, and introduced into the opening in the cranium made by the trephine.

SINEPI, Sinapis.

SINEW, Tendon.

SINGLETON'S GOLDEN OINTMENT is formed of *sulphuret of arsenic* (realgar,) and *lard* or *spermaceti ointment.*

SINGULT'OUS, *Lygmo'des, Lygo'des, Lyngo'des, Lynggo'des*, (F.) *Singulteux*, from *singultus*, 'hiccough.' Relating to or affected with hiccough.

SINGUL'TUS, *Lynx*, *Lygmus*, *Spasmolyg'mus*, *Clonus* seu *Pneusis singul'tus*, *Hiccough*, *Hiccup*, (Prov.) *Heuks*, *Yoke*, (Sc.) *Eskin*, *Eeskin*, (F.) *Hoquet*. A noise made by the sudden and involuntary contraction of the diaphragm, and the simultaneous contraction of the glottis, which arrests the air in the trachea. It is a symptom of many morbid conditions, and especially of gangrene, but occurs, frequently, in persons otherwise in good health.

SIN'ISTRAD, from *sinister*, 'to the left hand.' A term used by Dr. Barclay, adverbially, to signify 'towards the sinistral aspect.' See Mesial.

SINISTRAL ASPECT, see Mesial.

SINKING, FATAL, Shock, nervous.

SINUEUX, Sinuous.

SINUOSITAS, Sinus.

SIN'UOUS, *Sinuo'sus*, (F.) *Sinueux*, from *sinus*, 'a bay or curve.' An epithet given to certain ulcers, and especially to certain fistulæ, which are tortuous.

SINUS, *Sinuo'sitas*, *Colpos*, *Abscon'sio*, *Eurycho'ria*, *Recee'sus*, (F.) *Golfe*, 'a cavity.' Any cavity, the interior of which is more expanded than the entrance. In this sense, anatomists have applied the term to cavities in certain bones of the head and face. It has been, also, applied to certain venous canals, into which a number of vessels empty themselves; such as the sinuses of the dura mater and of the spine; the sinus of the vena porta; uterine sinuses, &c.;—and to the bosom.

In *surgery*, it means a long, narrow, hollow track, leading from some abscess, diseased bone, &c., (F.) *Clapier*.

Sinuses of bones form part of the nasal cavities. They are the frontal, sphenoidal, maxillary, &c. The name has also been given, occasionally, to the ethmoid and mastoid cells.

SINUS ACUSTICUS, Auditory canal, internal — s. Ampullaceus, Cavitas elliptica — s. Aortici, Sinuses of Valsalva—s. Arteriosus, S. pulmonalis—s. Basilar, Sinus transversus—*s. Caverneux*, Cavernous sinus—s. Cavernosi uteri, Sinus uterini—s. Cavernosus, Cavernous sinus — s. Cerebri, Ventricles of the brain —*s. Choroïdien*, S. quartus — s. Circular, of Ridley, Sinus coronarius — s. Circularis, S. coronarius — s. Communis, see Semicircular canals — *s. Coronaire du cœur*, see Cardiac veins.

SINUS CORONA'RIUS, *S. circula'ris* seu *circula'ris Rid'leyi*, *Circular sinus of Ridley*, *Cor'onary sinus*. A venous canal, which surrounds, in a more or less regular manner, the pituitary fossa and gland, emptying itself into the corresponding cavernous sinus by each of its extremities.

SINUS, CORONARY, Sinus coronarius — s. Coronary of the heart, Sinus coronary, venous.

SINUS CORONARY, VENOUS, *Coronary sinus of the heart*. A name given, on account of its great size, to that portion of the great coronary vein which embraces the left auriculo-ventricular furrow.

SINUS COXÆ, see Cotyloid—*s. Droit*, S. quartus.

SINUS DEXTER CORDIS, *S. vena'rum cava'rum* seu *veno'sus*, *Saccus vena'rum cava'rum*. The right auricle of the heart — *A'trium cordis dextrum*. See Auricula.

SINUSES OF THE DURA MATER, *S.* seu *Fis'tulæ* seu *Cavita'tes* seu *Ventric'uli* seu *Tu'buli* seu *Sanguidu'tus* seu *Receptac'ula Durœ matris*, are formed by a separation of the layers of the dura mater, which acts as a substitute for the outer membrane of veins. Bichat admits only four great sinuses, of which all the others seem to be dependencies; — the *two lateral sinuses*, the *straight sinus*, and the *longitudinal sinus*. To the lateral sinuses belong, — the *petrous sinuses*, superior and inferior; the *transverse sinus*; the *cavernous sinuses*; the *coronary sinus*, and the *occipital sinuses*. To the straight sinus belongs the *inferior longitudinal*. The longitudinal sinus, properly so called, has no sinus under its dependence.

SINUS FALCIFORMIS INFERIOR, S. longitudinal, inferior—s. Falciformis superior, S. longitudinal, superior—s. Fourth, Torcular Herophili—s. Genæ pituitarius, Antrum of Highmore—s. of the Jugular vein, see Jugular veins — s. Lacrymalis, Lachrymal sac — s. Lactiferus, see Lactiferous vessels.

SINUSES OF THE LARYNX, Ventricles of the larynx.

SINUSES, LAT'ERAL, *Sinus transver'si*, *S. magni*, *S. latera'les*, (F.) *Sinus latéraux*. Each of these sinuses, distinguished into right and left, begins at the torcular Herophili or confluence of the sinuses, and terminates at the sinus of the jugular vein.

SINUS LATÉRAUX, Sinuses, lateral.

SINUSES, LONGITU'DINAL, *S. Longitudina'les*. These are two in number. 1. SUPERIOR LONGITUDINAL SINUS, *S. falcifor'mis superior* seu *triangula'ris*, *Sinus médian*, (Ch.) A long, triangular canal; convex above, concave below; which occupies the whole of the upper edge of the falx cerebri. It is broad behind, and much narrower before, where it commences by a *cul-de-sac*, at the crista galli of the ethmoid bone. It passes along the frontal or coronal crest, sagittal suture, and the vertical groove of the occipital bone. It receives several veins from the dura mater; and all those that are spread over the convex and plain surfaces of the two hemispheres of the brain. It discharges itself into the upper part of the torcular Herophili. 2. INFERIOR LONGITUDINAL SINUS, *S. falcifor'mis inferior*, *Vena falcis cer'ebri*. This is much narrower than the last, and occupies the inferior edge of the falx cerebri, from its anterior third to the tentorium cerebelli, where it terminates, commonly by two branches, in the straight sinus.

SINUS MAGNI, Sinuses, lateral — s. Maxillary, Antrum of Highmore — *s. Médian*, Sinus longitudinal superior — s. Median, see Semicircular canals — s. Muliebris, Vagina.

SINUS, OCCIP'ITAL, *Sinus occipita'lis*. These sinuses commence at the sides of the foramen magnum ossis occipitis, and ascend — becoming broader and nearer each other — into the substance of the falx cerebelli, where they frequently unite. Each opens into the inferior part of the torcular Herophili. They receive the veins of the falx cerebelli, of the dura mater which lines the fossæ cerebelli, and of the posterior part of the cerebellum. Haller and Sömmering have given them the name of *posterior occipital sinuses*, to distinguish them from the transverse sinus, which they have called *anterior occipital sinus*.

SINUS OCCIPITALIS ANTERIOR, Sinus transversus—s. Ophthalmic, see Cavernous sinus—s. Perpendicularis, S. quartus — s. Ovatus, see Crista vestibuli—s. Pituitarii frontis, Frontal sinuses—s. Poculariş, see Ejaculatory ducts—s. Polymorphus, Cavernous sinus — s. Portarum, see Liver — s. Prostatæ, see Ejaculatory Ducts — s. Pudendi, Vagina — s. Pudoris, Vagina, Vulva — s. Pulmonales, Sinuses of Valsalva.

SINUS PULMONA'LIS, *S. sinis'ter cordis* seu *vena'rum pulmona'lium* seu *arterio'sus*, *Saccus vena'rum pulmona'lium*, *A'trium cordis sinis'trum*. The left auricle of the heart. See Auricula.

SINUS OF THE PULMONARY VEINS. Auricle, left.

SINUS QUARTUS, *S. perpendicula'ris*, *Straight sinus*, (F.) *Sinus choroïdien* (Ch.), *Sinus droit*. This sinus—triangular throughout; wide posteriorly; narrower anteriorly; slightly oblique downwards and backwards—passes along the base of the falx

cerebri, from the termination of the inferior longitudinal sinus to the torcular Herophili. It receives the inferior longitudinal sinus, the veins of the lateral ventricles or *venæ Galeni*, the superior cerebellous veins, &c.

Sinus Renum, Pelvis of the kidney—s. Rhomboideus, see Ventricles of the brain—s. Rotundus, see Crista vestibuli — s. of the Septum lucidum, Ventricle, fifth—s. Sinister cordis, S. pulmonalis —s. Sphenoidalis, Cavernous sinus — s. Straight, S. quartus — s. Superciliares, Frontal sinuses—s. Terminalis, Circulus venosus — s. Transversi, Sinuses, lateral.

Sinus Transver'sus, *S. occipita'lis ante'rior, Bas'ilar sinus.* This sinus lies transversely at the anterior part of the basilary process of the occipital bone. It forms a communication between the two petrous sinuses, and the cavernous sinus of one side, and those of the other. Its breadth is commonly very great. It is situate between two layers of the dura mater, and presents, internally, a kind of cavernous tissue.

Sinus Triangularis, S. longitudinal, superior — s. Urogenitalis, Urogenital sinus.

Sinus, Uteri'ni, *S. caverno'si U'teri, U'terine sinuses.* A name given to cavities, formed by the uterine veins in the substance of the uterine parietes. They are very large during pregnancy.

Sinus Utriculosus, see Semicircular canals—*s. des Vaisseaux séminifères*, Corpus Highmori.

Sinuses of Valsal'va are three depressions in the aorta—*Sinus aor'tici*,—and pulmonary artery — *Sinus pulmona'les* — immediately opposite the semilunar valves. Their use is to leave the edges of the valves free, so that they can be caught by the refluent blood. Where the aorta is about to send off the first of its large branches, at the top of the thorax, it is of great size, and has been called the *Large sinus of Valsalva.*

Sinus of the Vena Cava, Auricle, right — s. Venarum cavarum, S. dexter cordis—s. Venarum pulmonalium, S. pulmonalis—s. Venosus, S. dexter cordis.

Si'nuses, Ver'tebral, (F.) *Sinus vertébraux.* Two great venous sinuses, different from those of the dura mater, which extend the whole length of the vertebral canal, from the occipital foramen to the end of the sacrum, behind the bodies of the vertebræ, before the dura mater, and at the sides of the posterior vertebral ligament. At their inner side they communicate with each other by means of branches, which form true *transverse sinuses.* They are situate at the middle of the body of each vertebra, passing under the posterior vertebral ligament. They receive, at their middle part, the veins that arise in the spongy tissue of the vertebræ. By their external side, the vertebral sinuses communicate with the posterior branches of the vertebral, intercostal, and lumbar veins. At their posterior side they receive the veins, which creep on the prolongation of the dura mater that envelops the marrow.

Sinus Vulvæ, Rima vulvæ.

SIPEERI, Bebeeru.

SIPEERINE, see Bebeeru.

SIPHAR, Peritoneum.

SIPHILIS, Syphilis.

SIPHITA, Somnambulism—s. Prava, Chorea.

SIPHO, Siphon — s. Urinæ, Diabetes.

SIPHON, *Sipho*, *σιφων*, 'a tube.' A bent tube, whose limbs are of unequal length, employed in pharmacy for transferring liquids from one vessel to another. With this view, the shorter limb is plunged into the liquid; and air is sucked from the extremity of the lower limb. The pressure of the atmosphere forces the fluid through the tube; and the flow will continue as long as the extremity of the longer limb is below the level of the fluid in which the shorter limb is immersed.

An exhausting syringe is, at times, attached to the longer extremity of the siphon, by means of which the air can be drawn from it.

Siphon, Plunging. An instrument, used in pharmacy for obtaining a specimen,—at times, a measured specimen, — of any liquid. With this view, the instrument is immersed into liquid, and allowed to remain there until full. The opening at the top is then closed with the thumb; and the contents, thus removed, are allowed to flow out by removing the thumb and permitting the entrance of air. It is a form of the *pipette.*

SIPHONIA CAHUCHU, see Caoutchouc — s. Elastica, see Caoutchouc.

SIPHUNCULUS, Syringe.

SIRA, Orpiment.

SIRENS, Symmeles.

SIRIASIS, *Coup de Soleil*, Insolation, Phrenitis — s. Ægyptiaca, *Coup de Soleil.*

SIRIUM MYRTIFOLIUM, Santalum album

SIRIUS, Canicula.

SIROP, Syrup—*s. de Capillaire*, see Adiantum capillus veneris — *s. de Coralline*, see Corallina Corsicana—*s. Simple*, Mel despumatum.

SIRUP, Syrup.

SISON AMMI, *Æthu'sa ammi, Ovid'ium tenuifo'lium, Pimpinella laterifo'lia, Scs'eli fœniculifo'lium. Ord.* Umbelliferæ. *Sex. Syst.* Pentandria Digynia. The plant that affords the *Ammi verum* of the shops; (F.) *Ammi des Boutiques.* The seeds — *Semen Am'mios cretici* seu *veri* — were once used as a carminative.

Sison Amo'mum, (F.) *Amome faux*, is considered to be excitant and diuretic. It is the *field honewort.*

Sison Anisum, Pimpinella anisum — s. Podagraria, Ligusticum podagraria.

SISTENS, Epischetics.

SISYMBRIUM ALLIARIA, Alliaria—s. Barbarea, Erysimum barbarea—s. Erucastrum, Brassica eruca—s. Menthastrum, Mentha aquatica.

Sisym'brium Nastur'tium, *Nasturtium aquat'icum* seu *officina'lē, Laver odora'tum, Cratevæ'sium, Cressi, Cardami'nē fonta'na* seu *nastur'tium, Water Cress,* (F.) *Cresson de fontaine. Ord.* Cruciferæ. *Sex. Syst.* Tetradynamia Siliquosa. Water-cresses are commonly used in salad. They have obtained a place in the materia medica for their antiscorbutic qualities.

Sisymbrium Officinale, Erysimum — s. Parviflorum, S. sophia.

Sisymbrium So'phia, *S. parvifio'rum, Herb Sophia, Sophia Chirurgo'rum, Flix* or *Flux-weed,* (F.) *Sagesse des Chirurgiens.* It was once reputed to be anthelmintic, and valuable in hysterical affections. It is not used.

Other species of *Nasturtium*, as N. Palus'trē, *Marsh water-cress;* and N. Amphib'ium, *Water-radish,* possess similar virtues with Nasturtium officinale.

SISYRIN'CHIUM BERMUDIA'NUM, *Blue-eyed Lily. Physic* or *Scurvy grass;* indigenous; *Order,* Iridaceæ; flowering from June to August. Used as a cathartic by the Thompsonians. A decoction of the root is acrid and cathartic.

SITICULOSUS, Dipsodes, see Alterative.

SITIENS, Dipsodes.

SITIS, Thirst — s. Intensa, Polydipsia — s. Morbosa, Polydipsia.

SITKA, MINERAL WATERS OF. See Archangel, New, mineral waters of.

SITOS, Aliment.

SITUS ALIENUS, Ectopia—s. Anomalus seu perversus intestinorum, Splanchnectopia—s. Mutatus, Ectopia, see Monster — s. Perversus, Ectopia.

SITZBATH, see Bath, half.

SIUM, *S. nodiflo'rum* seu *angustifo'lium* seu *Ber'ula* seu *erec'tum* seu *inci'sum*, *A'pium sium*, *Helioscia'dium nodiflo'rum*, *Ber'ula angustifo'lia*, *Ber'ula*, *Creeping Water-parsnep*, (F.) *Berle nodiflore*. *Ord.* Umbelliferæ. *Sex. Syst.* Pentandria Digynia. It is stimulant, and supposed to be diuretic and lithontriptic. It is, sometimes, employed in cutaneous eruptions.

SIUM ANGUSTIFOLIUM, S. nodiflorum—s. Apium, Apium graveolens—s. Berula, S. nodiflorum—s. Bulbocastanum, Bunium bulbocastanum—s. Carvi, Carum—s. Erectum, S. nodiflorum—s. Graveolens, Apium graveolens—s. Incisum, S. nodiflorum.

SIUM LATIFO'LIUM is the common *Water-parsnep* of the United States. It is said to be poisonous.

SIUM LUNA'RE. The root is eaten by the Chepewyans. It has an agreeable nutty flavour. By the Canadians, it is called *Queue de Rat*. The poisonous roots of Cicuta virosa, C. maculata, and C. bulbifera, are often mistaken for it.—Sir J. Richardson.

SIUM NINSI. The plant whose root is called *Radix Ninsi*, *Ninzin*, *Nindsin*. This root was long supposed to be the same as ginseng, and it possesses similar, though weaker properties. See Panax schinseng.

SIUM NODIFLORUM, Sium—s. Silaus, Peucedanum silaus.

SIUM SIS'ARUM, *Skirret*, (F.) *Chervi*, *Girole*, is used as a salad in Europe; and has been thought a useful diet in chest affections.

SIUM VULGARE, Ligusticum podagraria.

SIVVEN, Rubus idæus.

SIVVENS, Sibbens.

SKAW, Scall.

SKEELY, Strabismus.

SKELETIA, Emaciation.

SKELETOL'OGY, *Sceletolog''ia*, (F.) *Squelettologie*, from *skeleton*, and λογος, 'a discourse.' A treatise on the solid parts of the body. This part of anatomy comprehends *Osteology* and *Syndesmology*.

SKEL'ETON, *Scel'etum*, *Sceleton*, *Cadav'er exsicca'tum*; (Old Eng. and Prov.) *At'omy*, *Anat'omy*, (Sc.) *Spaig*, (F.) *Squelette*, *Charpente osseuse*: (σκελετος, 'dried up,' from σκελλω, 'I dry.') A dried body. The aggregate of the hard parts of the body, or the bones. A skeleton is found in almost all animals, although it may not always be formed in the same manner. In some, as in the crustacea and testacea, it is wholly or partly *external*, *Exo-skeleton*, *Dermo-skeleton*. In others, as in birds, the mammalia, &c., it is *internal*, *Endo-skeleton*, *Neuro-skeleton*. It serves as a support for other organs. On it the general shape of the body and of its various parts is greatly dependent. When the bones are united by their natural ligaments, the skeleton is said to be *natural*, *Scel'etum natura'le*; when articulated by means of wires, *artificial* or *articulated*, *Scel'etum artificia'le*.

SKELETOPŒ'IA, *Sceletopœ'a*, *Sceleteu'sis*, from *skeleton*, and ποιεω, 'I make.' The part of practical anatomy which treats of the preparation of bones, and the construction of skeletons. Bones are prepared to exhibit their conformation, structure, chymical composition, mode of development, and changes; the different cavities formed by their union; and to demonstrate their connexions, relations, modes of union, &c.

SKELLIE, Sinapis arvensis, Strabismus.

SKELLOCH, Sinapis arvensis.

SKEVISCH, Erigeron Philadelphicum.

SKEVISH, FLEABANE, Erigeron Philadelphicum.

SKEW SIGHT, Dysopia lateralis.

SKIN, Cutis—s. Bronzed, see Capsule, renal.

SKIN-BIND, Induration of the cellular tissue.

SKIN-BOUND DISEASE, Induration of the cellular tissue.

SKIN, SCARF, Epidermis.

SKIN-TIGHT, Induration of the cellular tissue.

SKIOMACHIA, Sciomachy.

SKIRRET, Sium sisarum.

SKIRRHUS, Scirrhus.

SKIRSE. Scirrhus.

SKITTER, Diarrhœa.

SKOKE, Phytolacca decandra.

SKOLEMORA FERNAMBUCENSIS, Geoffræa vermifuga.

SKOLIOSIS, Scoliosis.

SKUE-SIGHT, Dysopia lateralis.

SKULL, Cranium.

SKULL-CAP, Calvaria, Scutellaria galericulata—s. Cap, maddog, Scutellaria laterifolia.

SKUNK-CABBAGE, Dracontium fœtidum.

SKUNK-WEED, Dracontium fœtidum.

SLAB, Torticollis.

SLABBERING, Slavering.

SLATE, IRISH, Hibernicus lapis.

SLATERS, Onisci aselli.

SLATKAIA TRAVA, see Spirit.

SLAV'ERING, *Slab'bering*, *Slob'bering*, *Driv'elling*, (Old E.) *Pirtling*, from *saliva*. *Ptyalis'mus iners*, (F.) *Bave*. Involuntary flow of saliva, from sluggishness of deglutition, without increased secretion. It is seen in the infant, the aged, and the idiot.

SLEEP, Sax. rlep: *Somnus*, *Sompnus*, *Sopor*, *Dormi''io*, *Hypnos*, (F.) *Sommeil*. Temporary interruption of our relations with external objects. A repose of the organs of sense, intellectual faculties, and voluntary motion.

The act of quitting this condition is called *awaking*, (F.) *Évigilation*, *Réveil*. Sometimes this is progressive and natural; at others, sudden and starting; (F.) *Réveil en sursaut*,—as in nightmare, affections of the heart, hypochondriasis, &c.

SLEEP, MAGNET'IC, *Hypno'sis biomagnet'ica*, is the sleep induced by the so-called animal magnetism. See Magnetism, animal.

SLEEP, NERVOUS, see Magnetism, animal.

SLEEPLESSNESS, Insomnia.

SLEEP-WALKING, Somnambulism.

SLIACS, MINERAL WATERS OF. Sliacs is a favourite bathing-place in Hungary, a few miles from Neusohl. Some of the waters are cold; others, thermal: the former are carbonated chalybeates; the latter are much used in the same cases as thermal springs in general.

SLIDING OF THE FLAP, see Flap.

SLIEVE-FISH, Sepia.

SLING, (G.) Schlinge, *Mitel'la*, *Mit'rium*, (F.) *Écharpe*. A bandage employed to keep the forearm bent on the arm, in cases of injury done to those parts, in fracture of the clavicle, injury of the hands, &c. A handkerchief is often sufficient for this purpose. It must be folded diagonally, and be tied, by the extremities, round the neck. The French surgeons have used many varieties of *Écharpes* or *slings*; as the *Grande écharpe*, *Écharpe moyenne*, *Petite écharpe*, *Écharpe de* J. L. Petit, &c.

SLIPPERS, Impatiens.

SLIT AND TAIL BANDAGE, Invaginated bandage.

SLOBBERING, Slavering.

SLOE, Viburnum prunifolium.

SLOE-TREE, Prunus spinosa.

SLOKE, GREEN, Ulva latissima.

SLOUGH, Eschar.

SLOVEN WOOD, Artemisia abrotanum.

SLOWS, Milk-sickness.

SLUG, Limax—s. Sea, *Biche de Mer*.

SLUMBER, Somnolency.

SMALLAGE, Apium graveolens.

SMALL-POX, Variola—s. Modified, Varioloid.

SMALT, *Protox'ide of Cobalt, Smaltum, Safre, Zaffre, Azur, Blue Starch.* This oxyd has been given in rheumatism, in the dose of ten to twenty grains. A larger quantity excites vomiting.

SMARAG'DUS, *σμαραγδος*, (F.) *Émeraude.* The emerald. It was formerly regarded as a tonic.

SMARTWEED, Polygonum hydropiper, P. punctatum.

SMECTICA, Detergents.

SMECTIS, Cimolia terra.

SMECTRIS, Cimolia terra.

SMEGMA, *σμηγμα*, from *σμηχειν*, 'to wipe, to rub off.' Soap, grease, a salve, a liniment. Also, the secretion from the sebaceous follicles of the skin.

Smegma Articulare, Synovia — s. Cutaneum, see Sebaceous glands.

Smegma Præpu'tii, *Sebum præputia'lē.* The fatty secretion from the sebaceous follicles of the glans penis.

SMEGMATORRHŒA, Stearrhœa.

SMEGMORRHŒA, Stearrhœa.

SMELL, SENSE OF, Olfaction.

SMELLING, Olfaction.

SMELLOME'S OINTMENT FOR THE EYES, Ceratum resinæ.

SMILACI'NA RACEMO'SA, *False Spikenard;* indigenous; *Ord.* Liliaceæ; is said to be alterative, diuretic and diaphoretic.

SMILAX, *σμιλαξ*, Taxus baccata — s. Aspera Chinensis, Smilax China — s. Aspera Peruviana, Smilax sarsaparilla — s. Canellæfolia, S. pseudo-China.

Smilax China, *S. as'pera Chinen'sis. Ord.* Smilaceæ. *Sex. Syst.* Dioecia Hexandria. The root — *China, Ch. orienta'lis* seu *pondero'sa* seu *vera, Sankira, Ganquava, China root,* (F.) *Squine, Esquine, Racine de Chine.* Formerly much used in cutaneous and venereal affections.

Smilax Glauca; indigenous; has similar virtues to those of S. Sarsaparilla.

Smilax Hederæfolia, S. pseudo-China — s. Indica Spinosa, Smilax pseudo-China — s. Officinalis, Smilax sarsaparilla.

Smilax Pseudo-China, *S. In'dica spino'sa* seu *canellæfo'lia* seu *hederæfo'lia, China occidenta'lis* seu *spu'ria nodo'sa, American* or *West India China.* In scrofulous disorders, the root has been often preferred to the oriental kind. In other cases, it possesses similar virtues.

Smilax Sarsaparil'la, *S. officina'lis, Sarsaparil'la, Sartaparil'la, Smilax as'pera Peruvia'na, Sarza, Sarsa, Carivillan'di, Iva Pecan'ga, Macapatli, Zarsa, Zarzaparil'la,* (F.) *Salsepareille.* The root of this and other species of Smilax is inodorous; taste bitterish, feculaceous, and fibrous; of a dark colour externally; white within. It is possessed of diuretic and demulcent properties, and has been often employed in the sequelæ of syphilis; when, after a mercurial course, nocturnal pains, ulcerations, &c., continue. It has, also, been advised in scrofula, chronic rheumatism, &c.; but its efficacy is, to say the least of it, a matter of doubt. Dose, ℈j to ℥j of the powder.

It is obtained from Honduras, Brazil, and Peru — the varieties being called respectively, *Honduras,* (F.) *Salsepareille de Honduras; Brazil,* (F.) *S. de Brésil* ou *de Portugal,* and *Peruvian Sarsaparilla,* (F.) *S. de Pérou* ou *caraque.*

Smilax Tamnoïdes; indigenous; has similar properties.

SMILĒ, *σμιλη.* A curved, two-edged bistoury. A knife.

SMILEON, Scalpel.

SMIT, see Contagion.

SMITTLE, see Contagious.

SMYRNA, Myrrha.

SMYRNISMOS, Embalming.

SMYR'NIUM OLUSA'TRUM, *Smyr'nium,* from *σμυρνα,* 'myrrh,' the odour of the seeds resembling that of myrrh; *Hipposeli'num, Macero'na, Macedonis'ium, Herba Alexandri'na, Gri'elum, Agrioseli'num, Alexan'ders, Alsanders.* A plant formerly cultivated for culinary purposes. The seeds are bitter and aromatic, and the roots more powerfully bitter. They have been recommended as resolvents, diuretics, emmenagogues, &c.

SNAGGLE-TEETH, Odontoparallaxis.

SNAGREL, Aristolochia serpentaria.

SNAIL, Limax—s. Shell, Cochlea.

SNAKEHEAD, Chelone glabra.

SNAKEROOT, Garuleum bipinnatum — s. Birthwort, Aristolochia serpentaria — s. Black, Actæa racemosa, Sanicula Marilandica — s. Button, Eryngium aquaticum, Liatris spicata — s. Canada, Asarum Canadense—s. Dewitt, Prenanthes — s. Evergreen, Polygala paucifolia — s. Heart, Asarum Canadense — s. Virginiana, Aristolochia serpentaria — s. White, Eupatorium ageratoides.

SNAKEWEED, Aristolochia serpentaria, Helenium autumnale, Polygonum bistorta—s. American, Cicuta maculata.

SNEEZING, from Sax. nieȝan, (G.) Niesen, (probably an example of onomatopœia,) *Clonus Sternuta'tio, Sternuta'tio, Sternutamen'tum, Sternumen'tum, Ptarmos,* (Sc.) *Neesing,* (F.) *Éternuement.* A convulsive motion of the expiratory muscles, by which the air is driven rapidly, and rushes sonorously, through the nasal fossæ, carrying with it the mucus and foreign bodies which adhere to the pituitary membrane, and have occasioned the movement.

SNEEZEWORT, Achillea ptarmica, Helenium autumnale.

SNIRRELS, Nares.

SNOB, Nasal mucus.

SNORING, *Snore,* (Sax.) ꝥnoꝛa, *Rhenchus, Renchus, Rhenxis, Ronchus, Rhonchus, Stertor,* (Sc.) *Rowting* (probably a case of onomatopœia), (F.) *Ronflement.* Noise made in the posterior part of the mouth and nasal fossæ during the movements of inspiration, particularly in sleep, both when the person is in health, and in disease, as in apoplexy. In certain affections of the chest — in some cases of pulmonary catarrh — a kind of snoring may be distinctly heard by applying the ear or the stethoscope to the chest.

SNOT, Nasal mucus.

SNOTH, Nasal mucus.

SNOUT, Nasus.

SNOW, Sax. ꝥnaƿ, *Nix, Chion,* (F.) *Neige.* Water in a solid state, which falls from the atmosphere in white flakes. It is used externally as a tonic and discutient.

SNOWBALL, Cephalanthus occidentalis.

SNOWBERRY, Symphoricarpus racemosus.

SNOWDROP TREE, Chionanthus Virginica.

SNOW-BLINDNESS, Blindness produced by the reflection of the solar light from snow. As a preventive, *Snow Eyes* are used by the Esquimaux. These are made of extremely light wood, with a bridge resting on the nose like spectacles, and a narrow slit for the passage of the light.

SNOW EYES, see Snow Blindness.

SNUFF, CEPHALIC, Pulvis asari compositus.

SNUFFLES, Teut. Snuffeln (probably an example of onomatopœia), *Grave'do neonato'rum, Rhinan'gia, Rhinanch'onē.* Breathing hard through the nose, often owing to accumulation of the mucous secretions,—an affection to which

Infants are liable, and which is relieved by oiling the interior of the nostrils.

SNURLE, Coryza.

SNURLES, Nares.

SOAP, Sapo — s. Acid, see Sapo.

SOAP BERRIES, Sapindus saponaria.

SOAP, BLACK, see Sapo — s. Castile, Sapo durus.

SOAP OF THE COCOA-NUT OIL, see Sapo.

SOAP, COMMON OR SOFT, see Sapo — s. Liquid, see Sapo — s. Medicinal, see Sapo — s. Spanish, Sapo durus—s. Yellow, see Sapo.

SOAPWORT, Saponaria.

SOB, from Sax. **reopian**, 'to grieve,' (probably an example of onomatopœia); (F.) *Sanglot*. A spasmodic, sudden, and momentary contraction of the diaphragm, immediately followed by relaxation, by which the little air, that the contraction has caused to enter the chest, is driven out with noise. It is an evidence of corporeal or mental suffering.

SOBBY, Corpulent.

SOBOLES, Epigone.

SOBRIETAS, Temperance.

SOCIA PAROTIDIS, see Parotid.

SOCI'ETY, *Soci'etas*, (F.) *Société*, from *socius*, 'a companion.' An association for the promotion of some common object.

SOCIETIES, MEDICAL. Associations of medical gentlemen for the promotion of science have been numerous, and productive of valuable results. In the United States, societies exist in many of the States, possessing the power of examining into the qualifications of every one who may be desirous of practising within their particular jurisdiction. In some of the States, however, the qualified and unqualified are permitted to exercise their profession with equal privileges and immunities.

Amongst the medical associations that have issued from time to time useful transactions or publications, are the following: IN AMERICA, — The *Massachusetts Medical Society*; the *Physico-medical*, and *Medical Societies of the State of New York*; the *College of Physicians of Philadelphia*, and the *American Medical Association*. IN EUROPE, — The *Association of Fellows and Licentiates of the King's and Queen's College of Physicians of Ireland*; the *Medico-Chirurgical* and *Phrenological Societies of Edinburgh*; the *College of Physicians*, the *Medico-Chirurgical* the *Medical* and the *Sydenham Societies* of London; the *Associated Apothecaries and Surgeon Apothecaries of England and Wales*, and the *Provincial Medical and Surgical Association*; the *Royal Academy of Surgery*, the *Royal Society of Medicine*, the *Société Médicale d'Émulation*, the *Société de Médecine*, the *Royal Academy of Medicine*, the *Société Médicale d'Observation*, and the *Société de Biologie*, of Paris; the *Medico-Chirurgical Academy of Vienna*; the *Medical Societies of Berlin and Copenhagen*, &c., &c. IN ASIA,— The *Medical and Physical Society of Calcutta*.

Valuable medical essays are likewise contained in the published *Transactions of the American Philosophical Society*; the *Royal Societies of London, Edinburgh, Göttingen*, &c.; the *Imperial Academy of Sciences of Paris*; the *Imperial Society of Sciences of St. Petersburg and Vienna*; the *Royal Academy of Sciences of Turin*; the *Academia Imperialis Leopoldina Naturæ Curiosorum*, &c.

SOCORDIA, Hallucination.

SODA. An Arabic word. *Protox'ide of sodium*, (F.) *Soude*, is obtained by adding *caustic lime* to a solution of *carbonate of soda*. The soda in solution may be obtained by evaporation as hydrate of soda. Its action is like that of potassa; but it is not officinal.

Soda impu'ra, Baril'la, Barig'lia, Baril'lor, Soda Hispan'ica, Ana'tron, Natron, Ana'ton, Nitrum Antiquo'rum, Kelp, Aphroni'trum, Sal alkali'nus fixus fos'silis, Car'bonas Sodæ im'purus, Subcar'bonas Sodæ impu'ra, Anachron. The *mineral alkali* is obtained from several sources; — naturally, in Egypt: artificially, from the incineration of marine plants; and from the decomposition of sulphate of soda, &c. It is principally, however, derived from plants growing on the sea-coast; — as the *Salso'la soti'va, S. soda, S. tragus, Salicor'nia herba'cea, Salicornia Arab'ica*, &c. The *Barilla ashes* are from the ashes of the *Salicor'nia Europæ'a*: the *Kelp, Soude de Varecq*, from the *Fucus vesiculo'sus* and other varieties;—the *Turkey Barilla, Roquette, Cendre du Levant, Rochet'ta Alexandri'na*, from the *Mesembryan'themum Cop'ticum*; — the *Al'icant Barilla, Soda Alicanti'na* seu *Alonen'sis*, from the *Mesembryan'themum nodiflo'rum*;—and the *Carthage'na Barilla*, from the *Salicor'nia and Salso'la*.

Impure subcarbonate of soda, (F.) *Soude du commerce*, consists of subcarbonate of soda, potash, chloride of sodium, clay and other earthy substances. It is chiefly used for preparing the pure subcarbonate.

SODA, Cardialgia, Cephalalgia, Pyrosis.

SODA ACETA'TA, *Sodæ Acet'as, Ac''etate of Soda, Terra folia'ta mineral'is*, (F.) *Acétate de soude*. This salt is used in similar cases with the acetate of potass.

SODA AËRATA, Sodæ carbonas — s. Alonensis, Soda—s. Biborate of, Borax — s. Bicarbonate of, Sodæ carbonas—s. Bilate of, Picromel—s. Borate of, Borax—s. Boraxata, Borax.

SODA, CAR'BONATE OF, *Sodæ Car'bonas* seu *Bicar'bonas, Carbonas Na'tricum, Soda Aëra'ta, Bicar'bonate of Soda, Carbonate of protox'ide of Sodium*, (F.) *Carbonate de Soude, S. effervescente* ou *aérée* ou *crayeuse*. (*Sodæ subcarb.* ℔j, *aquæ destill.* Oiij. Dissolve the subcarbonate of soda, and pass carbonic acid through the solution; set it aside to crystallize.) Its use is the same as the subcarbonate, than which it is less caustic, and better adapted for effervescing draughts.

SODA CAU'STICA, *Protox'ide of So'dium, Caustic Soda*, (F.) *Soude caustique, S. à la Chaux, Soude pure*. The impure subcarbonate, treated by quicklime, and consequently deprived of its carbonic acid. It may be used as a caustic like the *Potassa fusa*, and is even preferable to it, as it does not deliquesce and run.

SODA, CHLORIDE OF, *S. Chlorina'ta, Sodæ Chlo'ridum* seu *Chlorure'tum, Chlo'rinated Soda, Natrum Oxymuriat'icum, Oxymu'riate of Soda*, (F.) *Chlorure de Soude, Chlorure d'oxide de Sodium*. This salt is used as a disinfecting agent; both to remove offensive smells in chambers, and to alter the condition of fetid ulcers. See Liquor Sodæ Chlorinatæ.

SODA, CHLORINATED, Soda, chloride of—s. His panica, Soda — s. Hydrochlorate of, Soda, muriate of.

SODA, HYPOSULPH'ITE OF, *Sodæ hyposulph'is*, (F.) *Hyposulfite de Soude*. This salt has been lately extolled in chronic cutaneous, and scrofulous affections. It is given in syrup.

SODA, LITHATE OF, Urate of soda — s. Mephite of, Soda, subcarbonate of.

SODA, MU'RIATE OF, *S. muria'ta* seu *muriat'icum, Al'kali mineral'e sali'num, Sodæ murias, Sal commu'nis* seu *culina'ris* seu *fos'tium* seu *gemmæ* seu *mari'nus* seu *album* seu *fos'silis* seu *lu'cidum, Mu'ria, Natron muria'tum, Natrum muriat'icum, Hydrochlo'rinas Na'tricus, Chlorure'tum So'dii, So'dii Chlo'ridum, Common salt, Sea salt, Rock salt, Bay salt, White salt, Quadrich'o'ruret of Sodium, Hydrochlo'rate of protox'ide of Sodium, Hydrochlo'rate of Soda, Chloride of Sodium*, (F.) *Chlorure de Sodium, Sel marin, Sel de Cuisine*.

In an impure state, this salt is one of the most abundant of natural productions. It is soluble in 3 parts of water, and is tonic, purgative, and anthelmintic. Externally, stimulant. It is a well-known and useful culinary substance. It has been greatly recommended as an antiperiodic in the dose of ℥ss or ℥i.

Soda, Nitrate of, *Sodæ Nitras, Natron* seu *Natrum ni'tricum, Nitras na'tricus, Al'kali mineral'ē nitra'tum, Nitrum Rhomboida'lē* seu *cu'bicum, Nitras Natricum, Salpe'tra, Nitrate of protoxide of So'dium, Protoni'trate of Sodium, Cubic Nitre.* Its virtues are similar to those of the nitrate of potass, for which it has been substituted.

Soda, Oxymuriate of, Soda, chloride of.

Soda, Phosphate of, *S. Phosphora'ta, Sodæ phos'phas, Phosphas Na'tricum, Natrum Oxphosphoro'des, Sal mirab'ilē perla'tum, Alkali minera'lē phosphora'tum, Subphosphate of protoxide of Sodium, Subprotophosphate of Sodium, Subphos'phate of Soda, Tribasic phosphate of Soda, Tasteless purging salt,* (F.) *Phosphate de Soude, Sel admirable perlé.* (*Bone* burnt to whiteness and powdered, ℔x; *Sulphuric acid*, ℔vj; *Carbonate of soda*, q. s. Mix the bone with the acid in a covered vessel, add a gallon of water, and stir. Digest for three days, occasionally adding a little water to that lost by evaporation, and frequently stirring the mixture. Pour in now a gallon of boiling water, and strain through linen, gradually adding more boiling water, until the liquor passes nearly tasteless. Set the strained liquor by, that the dregs may subside; from which pour off the clear solution, and boil down to a gallon. To this solution, poured off from the dregs and heated in an iron vessel, add by degrees the carbonate of soda previously dissolved in hot water, until effervescence ceases, and the phosphoric acid is completely neutralized; then filter the liquor, and set it aside to crystallize. Having removed the crystals, add, if necessary, a small quantity of carbonate of soda to the liquor, so as to render it slightly alkaline; then alternately evaporate and crystallize so long as crystals are produced. Lastly, preserve the crystals in a well stopped bottle.—Ph. U. S.) Cathartic, in the dose of from ℥ss to ℥j.

Soda, Phosphate of, tribasic, S. Phosphate of—s. Powders, see Powders, Soda—s. Springs, see Water, Mineral (gaseous).

Soda, Subcarb'onate of, *Sodæ Subcarbonas, S. Carbonas* (Ph. U. S.), *Natron præpara'tum, Sal Sodæ, S. al'kali, Flos Salis, Sagi'men Vitri, Salt of Soda* or *of Barilla, Subcarbonate of protoxide of Sodium, Mephite of Soda,* (F.) *Sous-carbonate de Soude.* The impure carbonate, dissolved in water; the solution filtered and crystallized. Soluble in two parts of water at 60°. It is much used as an antacid; and also as a deobstruent in scrofulous and other affections. Dose, gr. x to ℥ss.

The *dried Subcar'bonate of Soda, Sodæ Subcar'bonas exsicca'ta, Sodæ carbonas exsicca'tus,* (Ph. U. S.) *Carbonas Sodæ sicca'tum,* (F.) *Sous-carbonate de Soude desséché,* is employed as an antacid and lithontriptic. Dose, gr. x to xv.

Soda, Subphosphate of, S. phosphate of.

Soda, Sulphate of, *Sodæ Sulphas, Natron vitriola'tum, Sal cathar'ticus* seu *mirab'ilis Glauber'ri, Al'cali minera'lē sulphu'ricum, Natrum sulphu'ricum, Soda vitriola'ta, Sulphas na'tricus, Ape'rient Salt of Frederick, Glauber's Salts,* (F.) *Sulfate de Soude.* Obtained from the salt that remains after the distillation of muriatic acid; the superabundant acid being saturated with subcarbonate of soda. It is soluble in three parts of water at 60°; is purgative, and, in small doses, diuretic. Dose, ℥vj to ℥x.

The *Lymington Glauber's Salts* is a *Sulphate of Magnesia and Soda,* and is obtained from the mother liquor of sea-water, or by dissolving Epsom salt in a solution of Glauber's salt.

Soda, Tartrate of, *Tartrate of potass and Soda, Tar'tarised Soda, Rochelle* or *Seignette's Salt, Soda Tartariza'ta, Sal Rupellen'sis* seu *Polychres'tum Seignet'ti* seu *Seignetti, Natron tartariza'tum, Tartris potas'sæ et Sodæ, Sodæ et Potas'sæ Tartras* (Ph. U. S.), *Sodæ potassio-tartras, Tartras Potas'sæ et Sodæ,*(F.) *Tartrate de potasse et de Soude.* (*Sodæ carb.* ℔i; *potass. bitart.* in pulv. ℥xvj, *Aq. bullient.* Ov. Dissolve the carbonate in water; and add, gradually, the bitartrate. Filter the solution and crystallize.—Ph. U. S.) It is a gentle cathartic. Dose, ℥ss to ℥j.

Soda, Urate of, Urate of Soda—s. Vitriolata, S. sulphate of.

Soda Water, Acidulous water, simple.

Soda and Silver, Hyposulphite of, Sodæ et Argenti Hyposulphis.

Sodæ Acetas, Soda, acetate of—s. Arsenias, Arseniate of soda—s. Biboras, Borax—s. Bicarbonas, Soda, carbonate of—s. Boras, Borax—s. Boras alcalescens, Borax—s. Boras supersaturus, Borax—s. Carbonas, Soda—s. Carbonas, Soda, subcarbonate of—s. Carbonas exsiccatus, see Soda, subcarbonate of—s. Carbonas impurus, Soda—s. Chloras, Soda, chlorate of—s. Hyposulphis, Hyposulphite of soda—s. Murias, Soda, muriate of—s. Nitras, Soda, nitrate of—s. Phosphas, Soda, phosphate of—s. et Potassæ tartras, Soda, tartrate of—s. Potassio-tartras, Soda, tartrate of—s. Subboras, Borax—s. Subcarbonas impura, Soda.

Sódæ et Argen'ti Hyposulph'is, *Hyposulph'ite of soda and silver,* (F.) *Hyposulphite de Soude et d'Argent.* This salt is formed by pouring a solution of *hyposulphite of soda* over *oxide of silver* recently precipitated by *potassa,* until the oxide is entirely dissolved. Crystals are afforded by evaporation. A solution of it is used in the same cases as one of the nitrate of silver.

Sodii auro-terchloridum, see Gold—s. Chloridum, Soda, muriate of—s. Chloruretum, Soda, muriate of.

So'dii Iod'idum, *I'odide of so'dium.* This salt has been prescribed in the same cases as the iodide of potassium.

So'dium, *Na'trium, Natro'nium.* The metallic basis of soda.

Sodium, Carbonate of Protoxide of, Sodæ carbonas—s. Chloride of, Soda, muriate of—s. *Chlorure de,* Soda, muriate of—*s. Chlorure d'Oxide de,* Soda, chloride of—s. Protonitrate of, Soda, nitrate of—s. Protoxide of, Soda—s. Protoxide of, hydrochlorate of, Soda, muriate of—s. Protoxide of, nitrate of, Soda, nitrate of—s. Protoxide of, phosphate of, Soda, phosphate of—s. Protoxide of, subcarbonate of, Soda, subcarbonate of—s. Quadri-chloruret of, Soda, muriate of—s. Subborate of protoxide of, Borax—s. Subprotoborate of, Borax—s. Subprotophosphate of, Soda, phosphate of.

SODOMA GALLORUM, Syphilis.

SODOMIA, Buggery.

SODOMY, Buggery.

SOFTENING, Mollities.

SOI-POUR-SOI, Homœozygy.

SOIE, Sericum.

SOIF, Thirst—*s. Excessive,* Polydipsia.

SOL, Gold.

SOL-LUNAR, *Sol-luna'ris;* from *sol,* 'the sun,' and *luna,* 'the moon.' An epithet applied to a fancied influence exerted by the sun and moon on man in a state of health and disease.

SOLAMEN INTESTINORUM, Pimpinella anisum—s. Scabiosorum, Fumaria.

SOL'ANOID, *Solanoï'des;* a hybrid word, from

solanum, 'the potato,' and *εἶδος*, 'resemblance.' Resembling a potato; potato-like. An epithet applied to a form of cancer, which appears to be intermediate between scirrhus and encephaloid, increasing more rapidly than the former, yet approaching it in firmness.

SOLA'NUM, *S. nigrum* seu *vulga'rē* seu *vulga'tum*, *Common* or *Garden Nightshade*, (F.) *Morelle à fruit noir*. *Family*, Solanaceæ. *Sex. Syst.* Pentandria Monogynia. A narcotic poison. The *Huile de Morelle* is made, by macerating in oil, for several days, the leaves and fruit of this plant. The oil is anodyne and discutient.

SOLANUM CAROLINEN'SĒ, *Horse nettle*; indigenous. The juice of the berries has been employed successfully in idiopathic tetanus. [?]

SOLANUM DULCAMA'RA, *S. scandens* seu *ligno'sum*, *Dulcamara*, *D. flexuo'sa*, *Glycipi'cros*, *Ama'ra dulcis*, Στρυχνος of Theophrastus, *Bittersweet*, *Woody Nightshade*, *Bittersweet Nightshade*, *Bittersweet Vine*, *Nightshade Vine*, *Violet bloom*, (F.) *Douce-amère*, *Morelle grimpante*, *Vigne de Judée*. The taste of the stalks is bitter, followed by sweetness; hence its name. It has been used in many diseases, as a diuretic and sudorific, especially in chronic rheumatism, humoral asthma, dropsy, various skin diseases, scrofula, and jaundice. Dose, in powder, ℈j to ʒj.

SOLANUM ESCULENTUM, S. tuberosum — s. Fœtidum, Datura stramonium—s. Furiosum, Atropa belladonna — s. Hortense nigrum, Atropa belladonna—s. Humboldtii, S. Lycopersicum — s. Lethale, Atropa belladonna — s. Lignosum, S. dulcamara.

SOLANUM LYCOPER'SICUM; *Lycoper'sicon esculent'um*, *L. pomum amo'ris* seu *Humbold'tii* seu *pseudolycoper'sicum*, *Malum lycoper'sicum*, *Love-apple plant*. The fruit of this, called *Toma'ta*, *Toma'to* or *Love-apple*, (F.) *Pomme d'Amour*, is much eaten in the United States; and, with the French, Spaniards, Portuguese, &c., forms an esteemed sauce.

SOLANUM MAGNUM VIRGINIANUM RUBRUM, Phytolacca decandra — s. Maniacum, Atropa belladonna, Datura stramonium — s. Melanocerasus, Atropa belladonna.

SOLANUM MELON'GENA, *Melongena*, *Egg-plant*, *Mud Apple plant*; (F.) *Aubergine*. A native of Asia, Africa, and America. Its oblong, egg-shaped fruit, *Ponum Melon'genæ*, *Malum insa'num*, is prepared in soups and sauces in those countries, like the tomata.

SOLANUM NIGRUM, Solanum.

SOLANUM NIV'EUM. A South African plant, the leaves of which, applied to foul ulcers, cleanse them. The fresh juice of the berries and leaves, made into an ointment with lard or fat, is used by the farmers for the same purpose.

SOLANUM PARMENTERII, S. tuberosum — s. Pseudolycopersicum, S. Lycopersicum — s. Quadrifolium, Paris — s. Racemosum Americanum, Phytolacca decandra.

SOLANUM SANCTUM; *Pal'estine Nightshade*. The fruit of this is globular, and is much eaten in the countries where it is a native.

SOLANUM SCANDENS, S. Dulcamara.

SOLANUM TUBERO'SUM, *S. esculen'tum* seu *Parmentie'rii*, *Lycoper'sicum tubero'sum*, *Papas America'nus*, *Pappus America'nus*, *America'num Tubero'sum*, *Batta'ta Virginia'na*, *Bata'tas*; the *Pota'to*, (F.) *Pomme de Terre*. A native of Peru. A nutritious and wholesome vegetable; one of the most useful, indeed, that exists. One hundred pounds of potatoes afford ten pounds of starch, which is equal to arrow-root, as a nutrient and demulcent. It is called *Potato Flour*, *P. Starch*, *French Sago*, *Petit Sagyue*, *Common Arrow-root*, &c.

SOLANUM URENS, Capsicum annuum — s. Vesicarium, Physalis.

SOLANUM VIRGINIA'NUM; indigenous; is said to resemble Solanum nigrum in its properties.

SOLANUM VULGARE, Solanum.

SOLAR, *Sola'ris*, from *sol*, *solis*, 'the sun. Relating to the sun; having rays like the sun.

SOLAR PLEXUS, *Plexus sola'ris*, *Centrum commu'nē*, *Cer'ebrum abdomina'lē*. A collection of ganglions and filaments, interweaving and anastomosing with each other repeatedly, and belonging to the system of the great sympathetic. This vast plexus, lying on the vertebral column, the aorta, and the pillars of the diaphragm, has a very irregular shape. The ganglions and filaments composing it are soft, reddish, and almost all issue from the semilunar ganglions. It receives, also, branches from the pneumogastrics. It seems to be chiefly intended for the aorta, and accompanies all its branches; furnishing many secondary plexuses, which are called the *infra-diaphragmatic*, *cœliac*, *superior mesenteric*, *inferior mesenteric*, *renal* or *emulgent*, *spermatic*, &c.

SOLDANELLA, Convolvulus soldanella.

SOLDIER'S WEED, Matico.

SOLE, *Solum*, *S. pedis*, *Solea*, *Basis cor'poris*, *Ichnus*, *Superfic''ies planta'ris pedis*, *Peti'na*, *Vestig''ium*, *Pe'dion*, *Peza*, *Pelma*, *Planta'ris superficies pedis*, *Fa'cies conca'va* seu *infe'rior* seu *Planum* seu *Concavum* seu *Pars inferior* seu *Planit''ies* seu *Planta* seu *Vola pedis*, (F.) *Plante du Pied*. The sole of the foot; the under surface of the foot.

SOLEA, Sole — s. Ipecacuanha, see Ipecacuanha.

SOLÉAIRE, Soleus.

SOLEN, Cradle, see Vertebral column.

SOLENA'RIUM, from *σωλην*, 'a canal, a pipe.' An instrument of surgery, representing a kind of gutter, in the cavity of which the penis was placed, like a limb in a *cradle*. The word *Solen* itself — *σωλην*, *Cana'lis* — was used, in antiquity, for a grooved channel or cradle, in which a fractured limb was placed.

SOLENOSTEMMA ARGEL, Cynanchum oleæfolium.

SOLE'US, *Gastrocne'mius inter'nus*, *Tibiocalcanien*, (Ch.;) (F.) *Soléaire*, from *solea*, 'a sole of a shoe,' owing to its shape. A muscle situate at the posterior part of the leg. It is broad, flat, and almost oval; and is attached, above, to the posterior edge of the fibula, to the oblique line on the posterior surface, and to the inner edge of the tibia. It terminates, below, by a large tendon, which unites to that of the gastrocnemius externus, to form the tendo Achillis. This muscle extends the foot on the leg, and conversely.

SOLID, *Sol'idus*, *Ste'reos*, from *solum*, 'the ground.' A body whose integrant molecules are so united by the force of cohesion, that they will not separate by their own weight. The solids, in the human body, are the bones, cartilages, tendons, muscles, ligaments, arteries, veins, nerves, membranes, skin, &c. The anatomy, or rather study of the solids, is called *Stereol'ogy*, from *στερεος*, 'solid,' and *λογος*, 'a discourse.'

SOLIDA'GO, from *solido*, 'I make firm,' in allusion to its properties as a vulnerary. See Solidago virgaurea.

SOLIDAGO SARACENICA, S. virganrea.

SOLIDA'GO RIG''IDA, *Rigid Goldenrod*, *Bones' styptic*; indigenous; of the Composite *family*, flowering in August and September; is astringent and tonic.

SOLIDA'GO VIRGAU'REA, *S. vulga'ris* seu *Saracen'ica*, *Virga aurea*, *Herba do'rea*, *Cony'za coma aurea*, *Sym'phytum Petræ'um*, *Eli'chrysum*, *Consol'ida*, *Saracen'ica*, *Golden rod*, (F.) *Verge*

d'or, Herbe des juifs. The leaves of *Solida'go odo'ra* — Solida'go (Ph. U. S.) — *Fragrant* or *Sweet-scented Golden-rod* — and the flowers have been recommended as aperients and tonics, in urinary diseases, and in internal hemorrhage.

Solidago Vulgaris, S. virgaurea.

SOL'IDISM, *Patholog'ia solida'ris.* The doctrine of those physicians who refer all diseases to alterations of the solid parts of the body. To the believers in this doctrine, the appellation *Sol'idists* has been given. The solidists think that the solids alone are endowed with vital properties; that they alone can receive the impression of morbific agents, and be the seat of pathological phenomena. Solidism has been the prevalent doctrine. It is scarcely necessary to say, that in all our investigations, the condition of both solids and fluids must be regarded.

SOLIUM, *Boignoire,* Tænia solium.

SOLUBIL'ITY, *Solubil'itas,* from *solvere, solutum,* 'to dissolve.' That property of a body by virtue of which it can be dissolved in a menstruum.

TABLE OF THE SOLUBILITY OF SOME SUBSTANCES IN WATER.

NAMES OF SALTS.	*Solubility in* 100 *parts water.*	
	at 60°	at 212°
Acids.		
Benzoic	0·208	4·17
Citric	133	200
Oxalic	50	100
Tartaric	very soluble	
Salts.		
Acetate of Potassa	100	
——— Soda	35	
Bitartrate of Potassa	1·5	3·3
Borate of Soda	8·4	10·8
Carbonate of Ammonia	50	
——— Magnesia	2	
——— Potassa	25	
——— Soda	50	
Chlorate of Potassa	6	40
——— Soda	35	35
Chloride of Calcium	200	
——— Magnesium	100	
——— Potassium	33	
——— Sodium	35·42	38·16
Muriate of Ammonia	33	100
Nitrate of Potassa	14·25	100
——— Soda	33	100
Phosphate of Soda	25	50
Sulphate of Ammonia	50	100
——— Copper	25	50
——— Iron	50	100
——— Magnesia	100	133
——— Potassa	6·25	20
——— Soda	37	125
Supersulphate of Potassa	5·0	100
Tartrate of Potassa	25	
——— Potassa and Soda	20	
——— Antimony & Soda	6·6	33

SOLUM, Sole—s. Pedis, Metatarsus, Sole.

SOLUTÉ, Solution.

SOLUTIO, Solution — s. Alexiteria Gaubiana, see Disinfection — s. Ammoniæ subcarbonatis, Liquor ammoniæ subcarbonatis — s. Arsenicalis, Liquor arsenicalis—s. Arsenicata, Liquor arsenicalis—s. Arsenitis kalicæ, Liquor arsenicalis — s. Calcis, Liquor calcis — s. Camphoræ ætherea, Tinctura ætherea camphorata — s. Camphoræ oleosa, Linimentum camphoræ — s. Continui, Solution of continuity—s. Cupri ammoniati, Liquor Cupri ammoniati — s. Ferri nitratis, Liquor Ferri nitratis—s. Guaiaci gummosa, Mistura guaiaci—s. Muriatis barytæ, Baryta, muriate of—s. Muriatis calcis, see Calcis murias—s. Muriatis ferrici ætherea, Tinctura seu alcohol sulfurico-æthereus ferri — s. Muriatis hydrargyri oxygenati, Liquor hydrargyri oxymuriatis—s. Potassii iodidi iodureta, Liquor iodini compositus — s. Resinæ guaiaci aquosa, Mistura guaiaci — s. Solventis Mineralis, Liquor Arsenici chloridi — s. Subcarbonatis ammoniaci spirituosa, Spiritus ammoniæ.

Solutio Sulpha'tis Cupri Compos'ita, *Aqua vitriol'ica cæru'lea, Sydenham's Styptic Water,* (*Sulph. cupri,* ℥iij, *alum., acid.-sulph.,* ää ℥ij, *aquæ,* ℥viij: dissolve, and filter.) A styptic, and, largely diluted, an astringent collyrium.

SOLU'TION, *Solu'tio, Lysis,* (F.) *Dissolution,* from *solvere, solutum,* 'to dissolve.' An operation which consists in dissolving a solid body in a menstruum. Likewise, the product of such operation — *Solu'tum,* (F.) *Soluté.* It means, also, with many, the termination of a disease:—with others, a termination accompanied by critical signs;—and, with others, again, it is synonymous with crisis.

Solution of Acetate of Ammonia, Liquor ammoniæ acetatis — s. of Acetate of morphia, Liquor morphiæ acetatis — s. Alkaline, see Fuligokali—s. of Alkaline iron, Liquor ferri alkalini — s. of Alum, compound, Liquor aluminis compositus—s. of subcarbonate of Ammonia, Liquor ammoniæ subcarbonatis—s. of Ammoniated copper, Liquor cupri ammoniati—s. Arsenical, Liquor arsenicalis — s. Arsenical, De Valangin's, Liquor Arsenici chloridi—s. of Carbonate of Soda, Liquor sodæ carbonatis — s. of Charcoal, concentrated, see Tinctura catechu — s. of Chlorinated soda, Liquor sodæ chlorinatæ—s. of Chloride of Arsenic, Liquor Arsenici chloridi — s. of Chloride of Zinc, see Burnett's disinfecting liquid — s. of Citrate of Ammonia, Liquor ammoniæ citratis — s. of Citrate of Magnesia, see Magnesiæ citras — s. of Citrate of Potassa, Liquor potassæ citratis — s. of Continuity, see Continuity — s. of Corrosive sublimate, Liquor hydrargyri oxymuriatis — s. De Valangin's, Liquor arsenici chloridi—s. Donovan's, see Arsenic and Mercury, Iodide of — s. Fowler's, Liquor arsenicalis — s. Gannal's, see Aluminæ sulphas — s. of Gutta percha in Chloroform, see Gutta percha—s. Heinecke's, see Arseniate of Soda.

Solution, Goadby's, called after the proposer, is made of bay salt, corrosive sublimate or arsenious acid, and water. It is employed to preserve animal substances.

Solution of Hydriodate of Potass, Liquor potassæ hydriodatis—s. of Iodide of iron, Liquor ferri iodidi — s. of Iodine, compound, Liquor iodinii compositus — s. of Iron, nitrated, Liquor ferri nitratis — s. Labarraque's, *Eau de Javelle* — s. of Lime, Liquor calcis — s. Lugol's, Liquor iodinii compositus — s. of Magnesia, condensed, Magnesia, fluid — s. of Monro, Liquor of Monro — s. of Nitrate of iron, Liquor ferri nitratis — s. of Oxymuriate of mercury, Liquor hydrargyri oxymuriatis — *s. Par les huiles,* Olea medicinalia —s. Pearson's, see Arseniate of soda—s. Plenck's, see Hydrargyri oxydum cinereum—*s. de Potasse,* Liquor potassæ — s. of Potassa, Liquor potassæ —s. of Sesquinitrate of iron, Liquor ferri nitratis — s. of Soda, Liquor sodæ — s. of Subacetate of lead, Liquor plumbi subacetatis—s. of Subacetate of lead, diluted, Liquor plumbi subacetatis dilutus—s. of Subcarbonate of potass, Liquor potassæ subcarbonatis—s. of Sulphate of morphia, Liquor morphiæ sulphatis — s. of Tartarized antimony, Vinum antimonii tartarizati — s. of Ternitrate of sesquioxide of iron, Liquor ferri nitratis — s. of Van Swieten, Liquor hydrargyri oxymuriatis.

SOLUTIVUS, Laxative.

SOLUTUM, Solution.

SOLVENS, Solvent — s. Minerale, Liquor arsenicalis.

SOLVENT, *Solvens,* (F.) *Fondant,* from *solvere,* 'to dissolve.' A medicine supposed to possess the property of dissolving or removing obstruc-

tions and extraneous substances. Thus we have *solvents* of the stone in the bladder, &c. See Dissolventia.

SOLVENT, MINERAL, Liquor arsenicalis.

SOMA, Body, Corpus.

SOMASCETICS, Gymnastics.

SOMASCÉTIQUE, Gymnastics.

SOMAT'IC, *Somat'icus*; from *σωμα*, *σωματος*, 'the body.' That which concerns the body;—as *somatic* death, or death of the body, in contradistinction to *molecular* death or the death of a part.

SOMATODYM'IA, from *σωμα*, *σωματος*, 'the body,' and *δυω*, 'I enter into.' A double monstrosity in which the trunks are united. Of this, there are several varieties: — *Vertebrodym'ia*, where the union is by the vertebræ; *Ischiodym'ia*, by the ossa ischii; *Sternodym'ia*, by the sternum; *Supraomphalodym'ia*, (F.) *Sus-omphalodymie*, by the super-umbilical regions; *Supra et infra-omphalodymia*, by the superior and inferior umbilical regions; and *Sterno-omphalodym'ia*, where the union is by both the sternal and the umbilical regions.—Cruveilhier.

SOMATOL'OGY, *Somatolog''ia*, from *σωμα*, *σωματος*, 'the body,' and *λογος*, 'a discourse.' A treatise on the human body. Anatomy.

SOMATOTOMY, Anatomy.

SOMMEIL, Sleep.

SOMNAMBULATION, Somnambulism.

SOMNAM'BULISM, *Somnambula'tio, Hypnobate'sis, Hypnobata'sis, Hypnoba'tia, Hypnobad'iais, Rhembas'mus, Lunatis'mus,. Hypnoenergi'a, Selenoga'mia, Nyctobate'sis, Autonyctoba'tia, Seleni'asis, Selenias'mus, Somnambulis'mus, Nyctob'asis, Noctambula'tio, Noctambulis'mus, Nyctoba'dia, Nyctoba'tia, Siph'ita, Syph'ita, Paroni'ria am'bulans, Noctisur'gium, Oneirodyn'ia acti'va, Cenospu'dia, Somno-vigil, Somnambula'tion, Sleep-walking*, from *somnus*, 'sleep,' and *ambulare*, 'to walk.' A condition of the brain which occasions the individual to execute, during sleep, some of those actions that commonly take place when awake. It has been imagined that the somnambulist is guided solely by his subjective sensations; but there are many facts which induce the belief that the external senses are not always entirely suspended. The causes of somnambulism are very obscure; and the principal indication of treatment is, — so to arrange the bedchamber of the somnambulist, that he cannot get out of it during sleep; and to avoid suppers, as well as all bodily and mental excitement.

SOMNAMBULISM, MAGNET'IC, MESMERIC, or ARTIFIC''IAL, *Somnambulis'mus artificia'lis, Catapl'ora magnet'ica, Somnip'athy*, is that peculiar condition, into which individuals are thrown by the *Animal Magnetizer*. It occurs only in those of weak nervous temperament; in hysterical females, &c.

SOMNAMBULISMUS, Somnambulism — s. Artificialis, Somnambulism, magnetic.

SOMNAM'BULIST, *Somnam'bulus, Hybnob'ates, Hypnob'ates, Noctam'bulus, Lunat'icus, Noctam'bulo, Somnam'bulo*. A sleep-walker.

SOMNAMBULIS'TIC. Relating or appertaining to somnambulism, — as the '*somnambulis'tic state*.'

SOMNAMBULO, Somnambulist.

SOMNIA'TIO, from *somnium*, 'a dream.' The act of dreaming.

SOMNIATIO MORBOSA, Oneirologus—s. in Statu vigili, Hallucination.

SOMNIF'EROUS, *Som'nifer, Sopor'ifer, Hypnot'icus, Hypnopœ'us, Soporati'vus, Soporif'ic, Soporif''erous*, (F.) *Assoupissant*; an epithet for a medicine which causes sleep, from *somnus*, 'sleep,' and *fero*, 'I carry.'

SOMNIL'OQUIST; same etymon as the next. One who talks in his sleep.

SOMNILO'QUIUM, *Somniloquis'mus, Somnil'oquism*, from *somnus*, 'sleep,' and *loquor*, 'I speak.' Talking in the sleep.

SOMNOPATHY, Somnambulism, magnetic.

SOM'NIUM, *Enyp'nion, Insom'nium*, a *Dream*, (Sc.) *Sweuin, Sweving, Swevynyng, Swenyng*, (F.) *Rêve, Songe*. A confused assemblage, or accidental and involuntary combination of ideas and images, which present themselves to the mind during sleep. Dr. S. Mitchell, of New York, used the word *Somnium* to signify the state between sleeping and waking, in which persons perform acts of which they are unconscious.

For 'waking dreams,' see Hallucination.

Those distressing dreams which occur during a state of half sleep, are called, by the French, *Rêvasseries*.

SOMNO-VIGIL, Somnambulism.

SOM'NOLENCY, *Somnolen'tia, Hypnœsthe'sis Hypno'dia, Dormita'tio, Carus Lethar'gus Cataph'ora, Cataphora, Coma Somnolen'tum, Caro'sis, Slumber, Heav'iness*, (F.) *Assoupissement*; from *somnus*, 'sleep.' Sleepiness. Also a state intermediate between sleeping and waking. It is often a symptom of disease.

SOMNUS, Sleep.

SOMPNUS, Sleep.

SON, Furfur, Sound.

SONCHUS, *σογχος*, *S. Olera'ceus, Hieracium olera'ceum, Cicer'bita, Sow Thistle, Swine-thistle*, (F.) *Laiteron doux*. *Ord.* Cichoraceæ. Most of the species of Sonchus abound with a milky juice, which is very bitter, and said to possess diuretic virtues.

SONCHUS FLORIDANUS, Mulgedium Floridanum.

SONDE, Sound, Specillum — *s. Cannelée*, Director.

SONDE D'ANEL. A very fine stylet of silver, awl-shaped at one end. It is used for probing the lachrymal passages through the punctum lacrymale.

SONDE DE BELLOC. An instrument invented by Belloc for plugging the nasal fossæ, in cases of hemorrhage. It consists of a curved silver canula, open at both ends, and furnished with a button. The instrument is passed through the nares to the throat; and a plug is attached to the button, so that, when the instrument is drawn forwards through the nose, the posterior nostril is stopped.

SONDE BRISÉE (F.), *Eyed probe*. A long, straight stylet, composed of two parts, which may be screwed to each other; blunt at one end, and furnished at the other with an eye, so that it may be used either as a probe for punctured wounds, or for a seton needle.

SONDE À CONDUCTEUR (F.). A modification of the ordinary catheter;—to facilitate the changing of catheters, without the fear of making false passages. It is a common catheter, open at its beak. The *Stylet* or *Mandrin* is one half longer than that of the ordinary catheter. To use the instrument, the stylet is pushed into the cavity of the bladder through the catheter. The latter is then withdrawn by slipping it over the stylet, which is kept in its place, and serves as a guide to a fresh catheter.

SONDE À DARD, see Lithotomy (high operation).

SONDE DE LAFOREST. A small, crooked canula, used for probing the nasal duct from below upwards, and for throwing injections into it.

SONDE or *PINCE DE HUNTER*. A cylindrical silver canula; of the size of a common catheter; open at both extremities, and contain-

ing a wire of iron, one of the ends of which is split into two parts; each being terminated by a small silver scoop, and separating from each other by virtue of their elasticity, when pushed out of the canula, and again approximating when drawn in. It has been used for laying hold of small calculi in the urethra.

SONDE DE VARECQ. Soda.

SONGE, Somnium.

SONITUS AURIUM, Tinnitus aurium — s. Fluidi, Hygrechema — s. Hepaticus, Hepatechema — s. Intestinalis, Enterechema — s. Stomachicus, Gasterechema.

SONOROUS RHONCHUS, *Râle sonore.*

SONUS, Sound — s. Vocis, Accent.

SOOJA, see Dolichos.

SOOJIE, BASTER'S, a farinaceous article of diet, is said to consist of wheat flour sweetened with sugar.

SOOL, Gastroperiodynia.

SOOT, Fuligo — s. Tea, see Fuligokali — s. Wart, Cancer, chimney-sweeper's.

SOPHIA, Sisymbrium sophia — s. Chirurgorum, Sisymbrium sophia.

SOPHISTICATION, Falsification.

SOPHO'RA HEPTAPHYL'LA, *Anticholer'ica. Ord.* Leguminosæ. *Sex. Syst.* Decandria Monogynia. The root and seeds of this shrub are intensely bitter, and are said to have been found useful in cholera, colic, dysentery, &c.

SOPHORA TINCTO'RIA, *Baptis'ia* seu *Podalyr'ia Tincto'ria, Indigof'era, Wild Indigo, Indigo Weed, Broom, Indigo Broom, Horsefly Weed, Yellow Broom, Clover Broom, Rattle Bush, Yellow Indigo.* An American plant, the taste of whose root is unpleasant, sub-acrid, and nauseous—very similar to that of ipecacuanha. In a large dose, the bark of the root acts both as an emetic and cathartic. It has been considered antiseptic and febrifuge, and has been used, in the form of fomentation or cataplasm, in phagedenic and gangrenous ulcers. A liniment, prepared by simmering the *cortical part* of the root in cream, has been found an efficacious application to sore nipples and to ulcerated breasts.

Baptis'ia Leucan'tha, Tall white false Indigo, an indigenous plant, has the same properties.

SOPHRONISTÆ DENTES, see Dentition.

SOPHRONISTERES DENTES, see Dentition.

SOPHROSYNE, Temperance.

SOPIENS, Paregoric.

SOPIO, Opium.

SOPOR. A profound sleep, from which the person can be roused with difficulty. It is a symptom in many of the neuroses.

SOPOR CAROTICUS, Carus.

SOPORARIÆ ARTERIÆ, Carotids.

SOPORATIVUS, Somniferous.

SOPORIFEROUS, Somniferous.

SOPORIFIC, Somniferous.

SO'POROUS, *So'porus,* (F.) *Soporeux,* from *sopor,* 'sleep.' Sleepy: causing sleep.

SORA, Essera.

SORB TREE, Sorbus domestica.

SORBASTRELLA, Pimpinella saxifraga.

SORBEFA'CIENT, *Sorbefa'ciens,* from *sorbere,* 'to suck in,' and *facere,* 'to make.' A remedy that promotes absorption.

The following are the chief sorbefacients or modifiers of nutritive action — *eutrophics:* — Acida Vegetabilia; Alkalia; Ammoniacum; Bromininm; Galbanum; Hydrargyri Præparata; Iodinium; Liquor Calcii chloridi; Spongia usta; Compression, (methodical;) Friction; Mental Sorbefacients, (Imagination, Emotions.)

SORBETHUM, Scherbet.

SORBETTUM, Scherbet.

SORBETUM, Scherbet.

SORBIER DES OISELEURS, Sorbus aucuparia.

SORBITIO, Jus.

SORBITIO CARNIS seu EX CARNE. Broth or soup made of meat.

SORBITUM, Jus.

SORBUM, see Sorbus domestica.

SORBUS, Cratægus aria, S. domestica.

SORBUS ACUPA'RIA seu AUCUPA'RIA, *Mes'pilus, M. aucupa'ria, Mountain Service, Mountain Ash, Quicken tree, Roan tree, Witchen, Witch hazel, Witch wood,* (Sc.) *Roden tree, Roun tree, Rowan tree, Rone,* (Prov.) *Keer, Rantree,* (F.) *Sorbier des Oiseleurs, Frêne sauvage. Ord.* Rosaceæ. The berries — (Sc.) *Rodens* — of this tree are employed for similar purposes as the last.

SORBUS ALPINA, Cratægus aria.

SORBUS AMERICA'NA, *Pyrus Americana, American Mountain Ash.* The bark resembles that of the Wild Cherry, and might be used in the same cases.

SORBUS ARIA, Cratægus aria—s. Aucuparia, S. acuparia — s. Cydonia, Pyrus cydonia.

SORBUS DOMES'TICA, *Sorbus, Pyrus domes'tica, Mes'pilus domes'tica, Oie, Service* or *Sorb Tree,* (F.) *Cormier. Family,* Rosaceæ. *Sex. Syst.* Icosandria Trigynia. The fruit of this tree, *Sorbum,* is astringent, and has been recommended in diarrhœa and dysentery. It is given in the form of rob. A kind of cider is made from it, and also brandy.

SORBUS MALUS, Pyrus malus.

SORDES, *Rhypos,* 'Filth.' A dirty-looking sanies, discharged from ulcers. Also, accumulations of the secretions of the mouth, on the teeth in adynamic fevers more especially, and of foul matters in the stomach—*Sordes prima'rum via'rum, Rhypa'ria.* The French call an ulcer, ex hibiting such an appearance, *sordid.* Also dirt of any kind.

SORDES, Ichor, Saburra — s. Acidæ, Acidities — s. Aurium, Cerumen — s. Primarum viarum *Embarras gastrique,* see Sordes—s. Ventris, Excrement.

SORDICULÆ AURIUM, Cerumen.

SORE, Ulcer.

SORE, BAY. A disease which Mosely considers to be a true cancer. It is endemic in the Bay of Honduras.

SORE MOUTH, Stomatitis—s. Gangrenous, Cancer aquaticus — s. Throat, Cynanche — s. Throat, Clergyman's, Pharyngitis, follicular — s. Throat, inflammatory, Cynanche tonsillaris — s. Throat, putrid, Cynanche maligna — s. Throat, tubercular, Pharyngitis, follicular—s. Throat, ulcerous, Cynanche maligna.

SORENESS, Sax. ΓORP, 'vexed, molested.' *Parap'sis aeris teneritu'do.* Painful uneasiness or tenderness, local or general, on being touched with a pressure that does not usually excite distressing feeling. Often, a febrile symptom. Also, the tenderness of a wound, ulcer, &c.

SORGHUM, Panicum Italicum.

SOROCCO, Puna.

SOROCHE, Puna.

SORORIA'TIO, from *sorores,* 'sisters,' *sororio,* 'to grow up or swell together.' The period at which the breasts of the female become developed. The act of becoming thus developed. A young maiden, whose mammæ begin to show, — *sororiantes mammæ* — was formerly called *sororians virgo.* — Plautus.

SORREL, COMMON, Rumex acetosus — s. Field, Rumex acetosella—s. French, Rumex scutatus—s. Garden, Rumex scutatus—s. Mountain, Oxalis acetosella. Oxyria reniformis — s. Salt of, Potass, oxalate of—s. Roman, Rumex scutatus—s. Sheep, Rumex acetosella.

SORREL TREE, Andromeda arborea, A. mariana.

SORREL, WELSH, Oxyria reniformis—s. White, Oxalis acetosella—s. Wood, Yellow, Oxalis stricta.

SOSTRUM, *Sotrum*; from *σωζειν*, 'to save,' *σωτηρ*, 'a preserver.' A reward given to one who saves the life of another. A physician's *fee* or *honorarium*. (F.) *Honoraire*.

SOTERIA DOCTRINA, Medicina.

SOTERIÆ AQUÆ, Waters, mineral.

SOTIREL'LA. Ancient name of a medicine composed of *opium* and other *narcotics*, *nutmeg*, *saffron*, *camphor* and *soot*. It was used in certain diseases of the teeth.

SOTRUM, Sostrum.

SOUBRESAUT, Subsultus tendinum.

SOUCHERLOON, Bit noben.

SOUCHET DES INDES, Curcuma longa — *s. Odorant*, Cyperus longus — *s. Rond*, Cyperus rotundus.

SOUCI, Calendula officinalis, Panophobia — *s. des Alpes*, Arnica montana — *s. des Champs*, Calendula arvensis—*s. Ordinaire*, Calendula officinalis.

SOUDE, Soda — *s. Acétate de*, Soda, acetate of — *s. Aéré*, Sodæ carbonas — *s. Borate de*, Borax—*s. Borate sursaturé de*, Borax—*s. Carbonate de*, Sodæ carbonas — *s. Caustique*, Soda caustica — *s. à la Chaux*, Soda caustica — *s. Chlorure de*, Soda, chloride of — *s. du Commerce*, Soda — *s. Crayeuse*, Sodæ carbonas—*s. Effervescente*, Sodæ carbonas — *s. Hyposulfite de*, Soda, hyposulphite of—*s. Phosphate de*, Soda, phosphate of—*s. et de Potasse, Tartrate de*, Soda, tartrate of — *s. Pure*, Soda caustica—*s. Sousborate de*, Borax—*s. Sous-carbonate de*, Soda, subcarbonate of — *s. Sulfate de*, Soda, sulphate of.

SOUFFLE, see Murmur, respiratory — *s. Amphorique*, see Cavernous respiration — *s. Bronchique*, see Murmur, respiratory — *s. Métallique*, see Cavernous respiration — *s. Placentaire, Bruit placentaire—s. Trachéal*, see Murmur, respiratory —*s. Tubaire*, see Murmur, respiratory—*s. Utérin, Bruit placentaire—s. Voilé*, see Cavernous respiration.

SOUFFLE, WHISPERING. A bellows' sound heard over solidified lung and excavations when the patient whispers.—Flint.

SOUFRE, Sulphur—*s. Carburé*, Carbonis sulphuretum — *s. Iodure de*, Sulphuris iodidum — *s. Sublimé*, Sulphur sublimatum—*s. Végétal*, Lycopodium.

SOUILLURE, Pollution.

SOULA'MEA AMA'RA, *Rex amaro'rum*. A shrub of the Moluccas; *Order*, Polygalaceæ; all the parts of which are of great bitterness—"*korenda amarities*." It is employed by the Malays, and, it is said, with success in cholera and pleurisy: and as a febrifuge.

SOUND, *Specill'um*, *Stylus*, *Explorato'rium*, *Radi'olus*, (F.) *Sonde*. An instrument used by surgeons to discover whether there be a stone in the bladder. It is usually made of highly polished steel, and is shaped like the catheter. The operation is termed sounding.

The French *Sonde* has, however, a more extensive signification. It means different instruments introduced into cavities of certain organs, or into wounds, fistulas, &c., to investigate their condition, or to fulfil some therapeutical indication. See *Sonde*.

SOUND, *Sonus*, *Echos*, *Noise*, (F.) *Son*, *Bruit*. The sensation produced on the auditory nerve by the vibrations of a sonorous body. Sounds may be propagated in three modes. 1. By *reciproca'tion* or *con'sonance*, as when a sounding body, of a definite pitch, produces a musical tone when another body of the same pitch is sounded near it. 2. By *res'onance*, as when a sounding body is placed in connection with another, one or more of whose parts may be thrown into reciprocal vibration; and 3. By *conduc'tion*, as where the vibrations are transmitted through fluid, liquid, or solid media.

SOUND, Catheterize, Syncope — s. Auricular, Apyromele—s. Bellows, friction, rasp, saw, lancet, &c., see *Bruit*—s. Cracked pot, *Bruit de pot fêlé* — s. Crumpling, pulmonary, *Froissement pulmonaire* — s. Laryngeal, Laryngeche.

SOUND, U'TERINE, *U'terine bougie*, (F.) *Sonde utérine*. An instrument, somewhat similar to a small male catheter, to be introduced into the cavity of the uterus, in the diagnosis of diseases of that viscus. When notched on the stem, it enables the size of the uterine cavity to be appreciated, and becomes a good *hysterom'eter*.

SOUNDING, Searching, see Sound.

SOUNDNESS OF MIND, Sanity.

SOUPIR, Sigh.

SOUR BERRY, see Oxycantha Galeni, Vaccinium oxycoccos — s. Dock, boreal, Oxyria reniformis — s. Leaf, Andromeda arborea — s. Tree Andromeda arborea — s. Wood, Andromeda arborea.

SOURCIL, Supercilium.

SOURCILIER, Corrugator supercilii, Superciliary.

SOURD, Deaf.

SOURDS-MUETS, see Mutitas surdorum.

SOUR-MILK, Buttermilk.

SOUR-SOP, Bromelia ananas.

SOURWOOD, Andromeda mariana.

SOUS-ACROMIO-CLAVI-HUMÉRAL, Deltoid — *s. Atloïdien*, Subatloidæus — *s. Axoïdien*, Subaxoidæus — *s. Azotate de Bismuth*, Bismuth, subnitrate of—*s. Clavier*, Subclavius—*s. Costaux*, Intercostal — *s. Cutané*, Subcutaneous — *s. Épineux*, Infra-spinatus—*s. Lingual*, Sub-lingual—*s. Mammaire*, Submammary — *s. Maxillaire*, Submaxillary — *s. Maxillo-Labial*, Depressor anguli oris—*s. Mental*, Submental—*s. Métacarpo-latéri-phalangien*, Prior annularis — *s. Optico-sphéno-sclérotician*, Rectus inferior oculi — *s. Orbitaire*, Suborbitar — *s. Pubio-coccygien*, Levator ani — *s. Pubio-créti-tibial*, Gracilis — *s. Pubio-prétibial*, Gracilis—*s. Pubio-trochantérien-externe*, Obturator externus—*s. Pubio-trochantérien-interne*, Obturator internus—*s. Scapulaire*, Subscapularis—*s. Scapulo-trochinien*, Subscapularis — *s. Sels*, see Salt.

SOUTH CAROLINA, MINERAL WATERS OF. *Glenn's Springs*, in Spartanburg District, are highly charged with salts of lime, and, not far from them, is a chalybeate. *West's Spring*, and *Chick's Springs*, a few miles from Greenville, resemble Glenn's Springs.

SOUTHERNWOOD, Artemisia abrotanum — s. Field, Artemisia campestris — s. Maritime, Artemisia maritima—s. Tartarian, Artemisia santonica.

SOWBREAD, Arthanita, Cyclamen.

SOWENS, Flummery.

SOY, see Dolichos soja.

SOYMIDA FEBRIFUGA, Swietenia febrifuga

SPA, MINERAL WATERS OF. A town seven leagues southeast of Liége, where there are several springs, possessing a sharp acidulous taste; containing much carbonic acid, carbonates of iron, lime, and magnesia; carbonate of soda, and chloride of sodium. The water is much used as a tonic.

SPA WATER, ARTIFICIAL. *Sodæ subcarb.*, gr. vij: *magnesiæ carbon.*, ℈j; *limat. ferri.*, gr. iij; *sodii chlorid.*, gr. j; *aquæ*, Oij. Impregnate with gas from *marble powder* and *sulph. acid.*, āā ℈x.

SPACE, INTERPEDUNCULAR, see Interpeduncular — s. Perforated, anterior, Locus per-

oratus anticus — s. Perforated, posterior, see Tarini pons.

SPADE-BONE, Scapula.

SPADO, Castratus, Eunuch, Spasm.

SPAGYRIA, Chymistry.

SPAG''YRISTS, from *σπαω*, 'I separate,' and *γειρω*, 'I assemble;' because they reduced compounds into elements, and formed the latter into compounds [?]. A sect of physicians, who pretended to account for the changes that occur in the human body in health and disease, in the same manner as the chymists of their day explained those of the inorganic kingdom. *Medici'na Paracelcis'tica* seu *Spagyr'ica*, was likewise called *Hermet'ica*, because it was believed that the means of cure adopted in it had been found in the books of Hermes.

SPAIG, Skeleton.

SPANÆ'MIA, from *σπανος*, 'poor,' and *'αιμα*, 'blood.' Poverty of the blood. Diminution in the quantity of fibrin and red corpuscles of the blood, — as where bleeding has been carried beyond certain limits. — Simon.

SPANÆ'MIC, *Spanæ'micum* (remedium), *Dysplas'ticum*, *Plastilyt'icum et erethilyt'icum*, *Hæmatolyt'icum*, *Dyscrasi'acum*. Same etymon as the last. Relating to spanæmia.

A medicine whose protracted use is said to impoverish the blood, — as iodine, bromine, &c.

SPANDARAPUM, Sparadrapum.

SPANING, Weaning.

SPANISH FLY, Cantharis — s. Juice, Extractum glycyrrhizæ.

SPANNADRAPUM, Sparadrapum.

SPANOPO'GON, from *σπανος*, 'rare,' and *πωγων*, 'beard.' One who has lost his beard, or has a thin beard.

The Greeks called those who had little beard, or who had lost it, *Spanopogo'nes*.

SPARADRAPA, Sparadrapum.

SPARADRAPIER. The name of a machine for spreading sparadraps. A *Plaster machine*. It consists of a table, with two raised pieces, movable, and furnished with points, by which the cloth can be stretched, and of a lamina or blade of metal to extend the plaster over it.

SPARADRA'PUM, *Sparadra'pa*, *Sparadrapus*, *Tela emplas'tica* seu *emplas'trica*, *Spandara'vum*, *Spannadra'pum*, (F.) *Sparadrap*. Any adhesive plaster spread upon linen or paper. The chief sparadraps are the following:—

SPARADRAPUM ADHÆSI'VUM, *Adhe'sive Plaster*. A spread plaster of the *Emplastrum adhæsivum*. It is also called *Strapping*.

English Court Plaster is a Sparadrap, (F.) *Taffetas agglutinatif*, *T. gommé*, *Taffetas d'Angleterre*, *Ser'icum An'glicum*, *Emplas'trum Anglicum*. *E. Anglica'num*, *E. Adhæsi'vum Woodstock'ii*, *E. Ichthyocol'læ telæ induc'tum*, *E. Glutino'num*, *Tela Ichthyocol'læ glu'tinans*, *Isinglass Plaster*. It is made by stretching black silk, and brushing it over with a solution of *isinglass* ℥j, in *proof spirit* ℥xij, to which *tinct. benzoin.* ℥ij, are added. When dry, this is repeated five times; after this, two coats are given it of a solution of *tereb. Chiæ* ℥iv, in *tinct. benz.* ℥vj, which render it less liable to crack.

Liston's Isinglass Plaster is made by spreading several coats of strong solution of isinglass in weak spirit over oiled silk, or, still better, over animal membrane previously prepared for the purpose from the peritoneal coat of the cæcum of the ox.

SPARADRAPUM PRO FONTIC'ULIS, *Issue Plaster*, is sometimes made of *simple diachylon*, ℔ij; *Burgundy pitch* and *sarcocolla*, each ℥iv; *common turpentine*, ℥j. Spread upon linen and polished with a moistened calendering glass rubber.

SPARADRAPUM seu TELA GALTERI, *Defensive Plaster*, (F.) *Toile de Gautier*. This is made of *olive oil*, ℔ss; *suet*, ℥iv; *wax*, ℥x; *litharge*, *common turpentine*, *thus*, and *mastich*, āā, ℥ij; *bole armeniac*, *flour*, āā ℥j. Pour it, while liquid, upon cloth, and spread. Used for issues and to keep on dressings.

SPARADRA'PUM VESICATO'RIUM. Several substances have been introduced as substitutes for blistering plaster, (see Emplastrum Lyttæ,) under the names, *Tela vesicato'ria*, *Blistering Tissue*, &c., and other forms of which are the *Taffetas vésicant* ou *épispastique*, *Papier épispastique*, *Charta vesicato'ria*. They are made of an ethereal or alcoholic extract of cantharides, or of cantharidin, mixed with wax, and spread, in a very fine layer, on silk or paper previously oiled or waxed. They are efficient agents.

SPARADRAPUM VIR'IDE, *Corn Plaster*. This may be made of *yellow wax*, ℔ij; *Burgundy pitch*, ℥xij; *common turpentine*, ℥vj; *verdigris*, ℥iij; spread on cloth and polished.

Kennedy's Corn Plaster is made of *yellow wax*, ℔j; *Venice turpentine*, ℥ij; *verdigris*, ℥j.

SPARADRAPUS, Sparadrapum.

SPARAGMA, Laceration.

SPARAGMOS, Spasm.

SPARAGUS, Asparagus.

SPARAL'LIUM, *Clyster uteri'nus*. An injection into the vagina. — Ruland and Johnson.

SPAREDIA. A ligature covered with the white of egg. — Paracelsus.

SPARGA'NIUM RAMO'SUM, *Great Burreed*, from *Sparganon*, owing to the ribbon-like leaves. Indigenous; *Order*, Typhaceæ; flowering in July and August. The roots are substringent, but esculent; yielding a fine fecula, similar to salep. They are sometimes made into a poultice for inflamed mammæ.

SPAR'GANON, *Spar'ganum*, from *σπαργω*, 'I swathe,' 'I wrap.' 'Swathing clothes;' a kind of bandage, with which children were formerly surrounded. — Foësius. Also, a fascia.

SPARGANO'SIS, *Spargo'sis*, *Intumescen'tia lac'tea mamma'rum Mastodyn'ia polyg'ala*, from *σπαργαω*, 'I am ready to burst.' Extreme distension of the breasts by milk. Sparganosis also means the wrapping of a child in swathing clothes.

SPARGANOSIS PUERPERARUM, Phlegmatia dolens.

SPARGANUM, Sparganon.

SPARROWGRASS, Asparagus.

SPARSUS, Sporadic.

SPAR'TIUM JUN'CEUM, *Spanish broom*. *Ord.* Leguminosæ. A small European shrub, cultivated in the gardens of the United States, on account of its yellow flowers. The seeds are diuretic and tonic, in small doses; emetic and cathartic in large. They have been used in dropsy — 10 or 15 grains three times a day.

SPARTIUM SCOPA'RIUM, *Cyt'isus scopa'rius*, *Genis'ta*, *G. scopa'ria* seu *hirsu'ta*, *Cytisoyenista*, *Broom*, (F.) *Genêt à balai*. *Broom Tops*, *Spartii Cacumina*, *Scopa'rius*, (Ph. U. S.,) have a bitter taste, and are possessed of diuretic properties. They have been used in dropsies. Dose, of the powder, ℈j to ʒj. All the genistæ have similar virtues. A decoction of genista, along with the cauterization of the pustules under the tongue, has been recommended in hydrophobia.

SPARTIUM TINCTORIUM, Genista tinctoria.

SPASM, *Spasmus*, *Sparag'mos*, *Synol'cē*, *Spado*, from *σπαω*, 'I draw.' The Greeks gave this name to all kinds of convulsions. It is now usually applied to involuntary muscular contractions; and these, again, have been divided into *tonic* spasm, *Paraton'ia*, which consists in permanent rigidity and immobility of the muscles that are the seat of it (see Tetanus); and *clonic* spasm,

which consists in alternate contractions and relaxations (see Convulsion).

Cullen has a class, *Spasmi* — the *neurospasmi* of Fuchs.

Spasm, Clonic, Convulsion — s. Cynic, see Canine laugh.

Spasm of the Glottis, Asthma thymicum.

Spasm, Histrionic, or the Face, see Tic.

Spasm of the Larynx, Asthma thymicum.

Spasm, Masticatory, or the Face, Trismus.

Spasm with Rigidity, Tetanus.

Spasm, Writers'. Involuntary spasms of the muscles of the thumb and index finger, observed, at times, in those who are much accustomed to writing. See Cramp, writers'.

SPASMATICUS, Spasmoticus.

SPASMATODES, Spasmoticus.

SPASME DE LA GLOTTE ET DU THORAX, Asthma thymicum — *s. de la Vessie*, Cystospasmus.

SPASMI, see Spasm.

SPASMODES, Convulsive.

SPASMODIC, Spasmoticus.

SPASMOL'OGY, *Spasmolog''ia*, from σπασμος, 'spasm,' and λογος, 'a treatise.' A treatise on spasms.

SPASMOLYGMUS, Singultus.

SPASMOT'ICUS, *Spasmat'icus*, *Spasmato'des*, *Spas'ticus*, *Spastic*, *Spasmod'ic*, (F.) *Spasmodique*, *Spastique*, from σπασμος, 'spasm.' Anything relating to spasm. Also, an antispasmodic.

Morbi constricto'rii, *M. spasmot'ici*, &c., are diseases accompanied with spasm.

SPASMUS, Convulsion, Spasm — s. Aurium, Otalgia — s. Bronchialis, Asthma — s. Caninus, see Canine laugh — s. Clonicus, Convulsion — s. Cynicus, see Canine laugh — s. Facialis, Tic — s. Glottidis, Asthma thymicum — s. Linguæ, Glossospasmus — s. Maxillæ inferioris, Trismus — s. Muscularis, Cramp — s. Musculorum Faciei, Canine laugh — s. Nutans, Convulsion, salaam — s. Periphericus, Horrida cutis — s. Universalis, Synclonus — s. Ventriculi, see Cardialgia — s. Vesicæ, Cystospasmus.

SPAS'NIA, same etymon as Spasm. [?] A term used by Mercurialis to designate the lancinating pain produced, at times, in the chest by violent fits of coughing.

SPASTIC, Spasmoticus, Tonic spasm.

SPASTICUM, Tetanic.

SPATHA, Hypaleiptron.

SPATHES'TER, from σπαω, 'I draw.' A surgical instrument, used for drawing the prepuce over the glans, when too short. — P. Amman.

SPATHOMELE, Spatula.

SPATHULA, Scapula, Spatula — s. Fœtida, Iris fœtidissima.

SPATHYEMA FŒTIDA, Dracontium fœtidum.

SPATIA INTERLOBULARES, Interlobular fissures.

SPAT'ILĒ, σπατιλη, 'human excrement.' A liquid fecal evacuation. Excrement. — Hippocrates.

SPATIUM ORIS, Mouth — s. Trigonum, Lyra.

SPATTERDOCK, Nuphar advena.

SPAT'ULA, *Spath'ula*, diminutive of *Spatha*, σπαθη, 'a broad-sword.' *Spathome'lē*, *Specill'um latum*. An instrument used for spreading plasters, stirring ointments, holding down the tongue, &c. Also, the scapula.

Spatula pro Ore, Glossospatha.

SPAUD, Humerus.

SPAUL, Saliva.

SPAUT-BONE, Humerus.

SPAW-BONE, Humerus.

SPAYING, see Castration.

SPEANING-BRASH, Brash, weaning.

SPEARWORT, Ranunculus flammula.

SPEAUTER, Zinc.

SPECIAL, see Specific.

SPEC''IALIST, (F.) *Spécialiste*. One who devotes himself to a specialty; as to diseases of particular parts, as of the eye, ear, chest, &c.

SPECIES, (F.) *Espèces*, *Spécioles*, *Thés composés*. Officinal mixtures of substances cut or bruised. Sometimes used for compound powders, as it always appears to have been formerly. See Pulvis.

Species Aromaticæ, Pulvis cinnamomi compositus — s. Diacinnamomi, Pulvis cinnamomi compositus — s. Diacretæ, Pulvis cretæ compos. — s. Diajalapæ, Pulvis jalapæ compositus — s. Diambræ sine odoratis, Pulvis cinnamomi compositus — s. Diatragacanthæ frigidæ, Pulvis tragacanthæ compositus — s. Hieræ picræ, Pulvis aloes cum canellâ — s. Lætificantes Rhazis, Pulvis cinnamomi compositus — s. e Scordio cum opio, Pulvis cretæ compositus cum opio — s. e Scordio sine opio, Pulvis cretæ compositus.

SPECIF'IC, *Specif'icus*, *Nosocrat'ic*, (F.) *Spécifique*, from *species*, 'a form or fashion,' and *facere*, 'to make.' A substance to which is attributed the special property of removing some particular disease. Probably no such remedy exists. *Mercury* in syphilis, and *sulphur* in the itch, have been regarded as the strongest examples. The word is also used adjectively in the sense of *special*; as "mercury has a *specific* or *special* action on the salivary glands."

Specific or Herrenschwand. A once celebrated German vermifuge. It is said to have consisted of 10 grains of *Gamboge*, with 20 of *Carbonate of Potassa*. It is affirmed, that mercury and arsenic have also been found in it. — Paris.

SPECIFICUM PARACELSI, Potassæ sulphas.

SPECIL'UM, *Melē*, *Stylus*, *Explorato'rium*, from *specio*, 'I examine,' *Specla'rion*, a probe, (F.) *Stylet*, *Sonde*. A surgical instrument, employed for examining wounds, fistulas, and for passing setons, &c. It is usually formed of silver; and is terminated, at one end, by an olive-shaped button. The *eyed probe* has an aperture at the other extremity.

Specillum, Everriculum, Hypaleiptron, Sound — s. Auricularium, Apyromele — s. Cereum, *Bougie* — s. Excavatum, Stylus excavatus — s. Latum, Spatula — s. Minus, Melotis.

SPÉCIOLÉ, Species.

SPECKS OF THE CORNEA, see Caligo.

SPECLARION, Specillum.

SPEC'TACLES, from *spectare*, 'to behold;' *Conspicil'la*, (Sc.) *Breels*, (F.) *Besicles*, *Lunettes ordinaires*, *Conserves*. Glasses to assist the sight; arranged so as to be adapted to both eyes. These glasses are more or less *concave* or *convex*, according as the sight is more or less short, (*myopic*,) or long, (*presbyopic*.) When the glass is adapted to one eye, it is called an *Eyeglass*, *Conspicil'lum*, *Perspicil'lum*, *Vitrum ocula'rē*.

SPECULA'RIS LAPIS. A transparent mineral, but of what nature is not clear, which was formerly employed in epilepsy. In old times it was used for glass. — Pliny.

SPEC'ULUM, *Catop'ter*, *Catop'tron*, *Diop'tron*. In Latin, 'a mirror;' from *specio*, 'I see.' In *surgery*, it means different instruments for dilating cavities, and facilitating their examination. See Dilator. There are various instruments of this kind, — the *S. Ani*, *S. Auris*, *S. Vaginæ*, (*Colpeuryn'ter*, *Elytreurynter*,) *S. Matri'cis*, *S. Oculi*, *S. Oris* ((F.) *Bâillon*,) *S. Gutturis*, *S. Vesicæ*.

Speculum Citrinum, Orpiment — s. Indicum, Ferri limatura — s. Lucidum, Septum lucidum — s.

Oris, Glossocatochus—s. Veneris, Achillea millefolium.

SPECUS, Vulva—s. Cordis, Ventricle of the Heart—s. Pro medullâ spinali, see Vertebral column—s. Vertebralis, see Vertebral column.

SPEDALSKE, see Radzyge.

SPEDALSKHED, see Radzyge.

SPEECH, Voice, articulated.

SPEECHLESSNESS, Mutitas.

SPEEDIMAN'S PILLS, see Pilulæ aloes et myrrhæ.

SPEEDWELL, BROOKLIME, Veronica beccabunga—s. Female, Antirhinum elatine—s. Officinal, Veronica—s. Purslain, Veronica peregrina—s. Water, Veronica beccabunga.

SPELL-BONE, Fibula.

SPELTRUM, Zincum.

SPERAGE, Asparagus.

SPERAGUS, Asparagus.

SPERM, *σπερμα, σπερματος*, from *σπειρω*, 'I sow.' *Sperma'tic fluid* or *liquor*, *Sem'inal fluid*, *Seed*, *Semen*, *S. viri'lē* seu *muscu'lum* seu *genita'lē*, *Semin'ium*, *Genita'lē*, *Medul'læ*, *Ros. Sanguis*, *Serum*, *Humor genita'lis* seu *semina'lis* seu *vene'reus*, *Uri'na genita'lis*, *Genitu'ra*, *Sperma*, *S. viri'lē*, *Spermi'um*, *Tho're*, *Tho'rus*, *Lac mariæ*, *Lagne'a*, *Lagni'a*, *Lagneu'ma*, *Germen*, *Vita'lē virus*, *Male's milk*, *Prop'agatory* or *genital liquor*, *Vital* or *quickening venom*, (F.) *Semence*, *Fluide séminal*. A whitish, viscid fluid, of a peculiar smell, secreted by the testicles, whence it is carried by the vasa deferentia to the vesiculæ seminales, to be thrown into the vagina, during coition, through the ejaculatory ducts and the urethra. It is the fecundating fluid, and must come into actual contact with the germ of the female. The *Aura sem'inis*, *Gonaw'ra*, is incapable of effecting fecundation. The semen, at the time of emission, is composed of two different fluids; the one liquid and transparent, which is considered to be the secretion of the prostate,—the other, white, and as thick as mucilage; the product of the testicular secretion. The sperm contains, according to Vauquelin, 900 parts of water, 50 of animal mucilage, 10 of soda, and 30 of calcareous phosphate. The animal matter is peculiar, and by some termed *spermatin*.

Microscopic observations show that it contains *spermatozo'a*, or more properly *spermatozo'ids*; for their animalcular nature is not demonstrated. They are produced in cells—*sperm-cells*—and have probably no more title to be considered animalcular, than the cilia of the ciliated epithelium. By careful examination, other minute, round, granulated bodies may almost always be detected, which are in all cases much less numerous than the spermatozoa. These bodies are the *seminal granules*, *gran'ula sem'inis*. Pure sperm, in its most perfect state, consists principally of spermatozoids and seminal granules; both of which are enveloped in a small quantity of fluid, *liquor sem'inis*, *spermat'ic liquor*.

It has been imagined, but erroneously, that during coition there is a secretion of female sperm—*Semen mulie'brē*, *Thelyg'onum*. The increased secretion that takes place is chiefly from the glands of Duverney.

Sperm also means spermaceti.

SPERM CELL, see Sperm.

SPERMA, Sperm—s. Mercurii, Hydrargyrus acetatus.

SPERMA RANA'RUM, *Sperni'ola* seu *Spermi'olum* seu *Spermi'ola seu Spermi'olum rana'rum*. Frog's spawn. Once used in medicine.

SPERMACETI, Cetaceum—s. Whale, see Cetaceum.

SPERMACRASIA, Spermatorrhœa.

SPERMATACRASIA, Spermatorrhœa.

SPERMATACRATIA, Spermatorrhœa.

SPERMAT'IC, *Spermat'icus*, *Semina'lis*, *Sem'inal*, (F.) *Spermatique*, from *σπερμα, σπερματος*. That which relates to the sperm. A name given to different parts connected with the organs of generation.

SPERMATIC ARTERIES, *Arteriæ Spermat'icæ* seu *præparan'tes*, (F.) *Artères testiculaires*, *A. de l'ovaire* (Ch.), are two in number—one on each side—and arise from the sides of the arota, sometimes from the renal arteries. They descend, almost vertically, at the sides of the vertebral column, and are distributed differently in the two sexes. In man, the spermatic artery, situate at the side of the vas deferens, issues by the abdominal ring; gives numerous ramifications to the spermatic cord, and divides into fasciculi of branches, one of which goes to the testicle,—the other to the epididymis. In the female, the spermatic artery, *ova'rian artery*, dips into the pelvis, and passes to the ovarium, Fallopian tube, and round ligament.

SPERMATIC CORD, or CHORD, *Testic'ular Cord*, *Funic'ulus Spermaticus*, *Corpus varico'sum*, (F.) *Cordon spermatique* ou *testiculaire*. The vascular and nervous chord, by which the testicle is suspended. It is composed of the spermatic artery and veins; of other small vessels; of lymphatics; of nervous filaments from the spermatic plexus, and from the genito-crural branch of the lumbo-abdominal plexus; of the vas deferens, and, very often, of a fibro-cellular cord, which unites the peritoneum to the upper part of the tunica vaginalis, and in which encysted hydrocele of the spermatic cord occurs. All these parts are united together by a very lax, areolar tissue, and surrounded by coats, which, reckoning from without, are:—1. The skin and areolar membrane. 2. A fibro-cellular membrane, formed by the fascia superficialis. 3. A very thin layer, formed by fibres of the cremaster muscle, united archwise before, and often also behind, the cord. 4. The proper sheath of the spermatic vessels, or the tubular prolongation furnished by the fascia transversalis to the chord, on a level with the superior orifice of the inguinal canal. The spermatic cord is commonly shorter on the right side than on the left; and of a different size in different individuals. It ascends, almost vertically, from the superior margin of the testicle as far as the lower orifice of the inguinal canal; passes through this canal and enters the abdomen, crossing the epigastric artery. Here it forms an evident elbow, directing its course backward. At this part, also, the organs composing it separate from each other:—the vas deferens descending into the pelvis to pass behind the bladder;—the blood-vessels and lymphatics ascending towards the lumbar region, &c.

SPERMATIC FILAMENTS, Spermatozoa—s. Fluid, Sperm.

SPERMATIC GANGLION. A large ganglion, formed by branches from the hypogastric ganglion, and from the spermatic plexus. It supplies the fundus uteri. Besides these ganglia, Dr. Robt. Lee describes *ves'ical* and *vag''inal ganglia*, and anterior and posterior *subperitone'al ganglia* and *plexuses*, which communicate with the preceding, and constitute an extensive nervous rete over the entire uterus.

SPERMATIC LIQUOR, Liquor seminis, see Sperm.

SPERMATIC PASSAGES or WAYS, *Viæ Spermaticæ*, are the canals concerned in the excretion of semen. See Testicle.

SPERMATIC PLEXUSES of nerves, *Plexus testiculares*, are two in number, and are furnished by the renal plexuses. Their filaments, called *Spermatic nerves*, follow the arteries of the same name to the testicle in man; and to the ovary and Fallopian tube in the female,—*ova'rian nerves*. They

cannot be traced into the substance of these organs.

Spermatic Veins are two or three in number on each side. They accompany the spermatic artery, and open — those of the right, into the vena cava inferior; those of the left, into the corresponding renal vein. These veins form, above the testicle, a kind of venous network, called, by some, the *Spermatic Plexus*; and another plexus before the psoas muscles, called the *Corpus pampiniforme.*

SPERMATIN, see Sperm.

SPERMATIS'MUS, *Emis'sio sem'inis*, from σπερμα, σπερματος, 'sperm.' The emission of sperm. *Sperma'tism* or *Animal'culism* is the doctrine, which maintains that the embryo is produced by the, so called, spermatic animalcules.

SPERMATIST, Animalculist.

SPERMATOCOCCI, Spermatozoa.

SPERMATOCE'LE, *Hernia semina'lis scroti, Oscheoce'lē semina'lis, Gonoce'lē*, from σπερμα, σπερματος, 'sperm,' and κηλη, 'a tumour.' The ancients gave this name to certain swellings of the testicle which were regarded as produced by an accumulation of sperm in the organ. Also, varicocele.

SPERMATOCLEMMA, see Pollution.

SPERMATOCLEPSIS, see Pollution.

SPERMATOCYSTIDORRHAG''IA, *Caulorrhag''ia ejaculato'ria, Hæmatu'ria ejaculato'ria* seu *semina'lis*, from σπερμα, σπερματος, 'sperm,' κυστις, 'bladder,' and ραγη, 'a breaking forth.' A discharge of blood from the urethra, or the act of ejaculation of sperm.

SPERMATODES, Gonoides.

SPERMATOGON'IA, *Spermogon'ia, Spermatopœ'a, Spermatopoë''sis, Spermi'um*, from σπερμα, σπερματος, 'sperm,' and γενναω, 'to beget.' The preparation or secretion of sperm.

SPERMATOID, Gonoides.

SPERMATOLEPSIS, see Pollution.

SPERMATOLIPSIS, see Pollution.

SPERMATOL'OGY, *Spermatolog''ia*, from σπερμα, σπερματος, 'sperm,' and λογος, 'a discourse.' A treatise on sperm.

SPERMATOPH'OROUS, *Seminif''erous*, from σπερμα, σπερματος, 'sperm,' and φερω, 'I carry.' Sperm-bearing. The cells or granules in the sperm have been so called.

SPERMATOPŒA, Spermatogonia.

SPERMATOPOESIS, Spermatogonia.

SPERMATOPOETIC, Spermatopœus.

SPERMATOPŒ'TUS, *Spermatopoët'icus, Spermatopoët'ic, Gonepœ'us, Gonepoet'icus, Gonopoet'icus*, from σπερμα, σπερματος, 'sperm,' and ποιειν, 'to make.' Food, to which has been attributed the property of augmenting the secretion of semen; and, consequently, of exciting the venereal act. Very succulent and very nutritious substances have been so considered.

SPERMATORRHŒ'A, *Spermorrhœ'a, Spermacra'sia, Spermatoze'mia, Spermatacra'sia, Gonacra'sia, Gonacrati'a, Gonoze'mia, Spermatacrati'a, Gonorrhœ'a vera*, (F.) *Flux de Sperme, Pollutions, Pertes séminales*; from σπερμα, σπερματος, 'sperm,' and ρεω, 'I flow.' An emission of sperm, without copulation. See Gonorrhœa, and Pollution.

Spermatorrhœa Atonica, Gonorrhœa laxorum.

SPERMATOS'CHESIS, from σπερμα, σπερματος, 'sperm,' and σχεσις, 'retention.' Retention or suppression of the spermatic secretion.

SPERMATOZEMIA, Spermatorrhœa.

SPERMATOZO'A, *Zoosper'mata*, from σπερμα, σπερματος, 'sperm,' and ζωον, 'animal.' *Animal'cula semina'lia* seu *spermat'ica, Fila spermat'ica, Corpuscula semi'nis, spermatococ'ci, Vermic'uli spermat'ici, Spermatozo'ïds, Sem'inal* or *spermatic fil'aments, Spermatïc* or *seminal animal'cules* [?], (F.) *Zoöspermes, Spermatozoaires* Reputed animalcules seen in the sperm; by most physiologists supposed to be the formative agents in generation. See Sperm.

SPERMATOZOAIRES, Spermatozoa.

SPERMATOZOIDS, Spermatozoa.

SPERMIOLUM RANARUM, Sperma ranarum.

SPERMIUM, Sperm, Spermatogonia.

SPERMOBOLE, see Ejaculation, Spermatismus.

SPERMOEDIA CLAVUS, Ergot.

SPERMOGONIA, Spermatogonia.

SPERMORRHŒA, Spermatorrhœa.

SPERNIOLUM RANARUM, Sperma ranarum.

SPEWING, Vomiting.

SPHAC''ELATED, *Sphacela'tus*, (F.) *Sphacelé*, Struck with sphacelus.

SPHACELATION, Mortification.

SPHACÈLE, Sphacelus — *s. de la Bouche*, Cancer aquaticus.

SPHACELIA SEGETUM, see Ergot.

SPHACELISMUS, Sphacelus — s. Cerebri, Phrenitis.

SPHAC''ELUS, σφακελος, *Gangræ'na Sphacelus, Sphacelis'mus, Cold mortification*, (F.) *Sphacèle, Gangrène froide*, from σφαζω, 'I slay.' This word is used, by some, synonymously with gangrene; by others, with gangrene when it occupies the whole substance of a limb. Commonly, it means the disorganized portion, in cases of mortification, *anthraconecro'sis*, which must be thrown off, — or is, in other words, totally dead. The foul disorganized portion of an ulcer—called the *slough* — must be considered a kind of sphacelus.

Sphacelus was formerly used to denote excessive pain; and for agitation from excessive pain, or violent emotion.

Sphacelus Cerealis, Ergotism — s. Nosocomialis, Hospital gangrene.

SPHÆRA, Pila — s. Marina, Pila marina — s. Thalassia, Pila marina.

SPHÆRANTHUS INDICUS, Adaca.

SPHÆ'RIA SINEN'SIS, (σφαιρα, 'a globe,') *Hia Tsao Tom Tchom, Hia Tsao Tong Tchong, Totsu Kaso, Summer plant winter worm.* A fungus which projects from the neck of a lepidopterous insect. It is highly esteemed by the Chinese as a tonic, like ginseng.

SPHÆRIDION, Pilula

SPHÆRION, Globule, Pilula.

SPHÆROCEPHALA ELATIOR, Echinops.

SPHÆROCOCCUS CRISPUS, Fucus crispus —s. Helminthochortus, Corallina Corsicana — s. Lichenoides, Fucus amylaceus.

SPHÆRULA GALENI, Pilula.

Sphærulæ Sanguinis, Globules of the blood.

SPHAGE, Throat.

SPHENDONE, Funda.

SPHENO, in the composition of anatomical terms, usually means, belonging or relating to the sphenoid bone.

SPHENOCEPHA'LIA, from σφην, 'a wedge, and κεφαλη, 'head.' Monstrosity, in which the head is wedge-shaped, owing to the projection of the anterior fontanel region.

SPHÉNO-ÉPINEUSE, (*Artère*,) Meningeal artery, middle.

SPHENOID, *Sphenoï'des, Spheno'des, Sphenoïdeus, Sphenoï'da'lis*, (F.) *Sphénoïde*, from σφην, 'a wedge,' and ειδος, 'resemblance.' Wedge-shaped. Hence,

Sphenoid Bone, *Sphenoïdes os, Os basila'rē* seu *cuneifor'mē* seu *cu'neo compara'tum* seu *sphe-*

noida'lē seu *multifor'mē* seu *az'ygos* seu *papilla'rē* seu *polymor'phon* seu *paxilla'rē* seu *baxilla'rē* seu *alæfor'mē* seu *sphecoï'deum* seu *vespifor'mē* seu *inconjuga'tum* seu *pterygoïdeum* seu *ala'tum* seu *colato'rii*, *Pter'ygoid bone*. An azygous bone, situate on the median line, and at the base of the cranium. It articulates with all the other bones of that cavity; supports them, and strengthens their union. Its form is singular, and resembles a bat with its wings extended. It has, 1. An *inferior* or *gutturol surface*, on which is situate the crista, that joins the vomer; a channel, which concurs in forming the pterygo-palatine foramen; the pterygoid process; the pterygoid fossa; the scaphoid depression; the Vidian or pterygoid canal; the foramina — ovale, spinale, &c. 2. A *superior* or *cerebral surface*, on which are: — the clinoid processes; the pituitary fossa; the *foramina* (*ovale, rotundum*, and *spinale*); the *Apophysis of Ingrassias* or *lesser wing*; the foramen opticum, &c. 3. An *occipital* or *posterior surface*, which is articulated with the basilary process of the occipital bone. 4. An *anterior* or *orbitar nasal surface*; having, anteriorly, a *crista* to unite with the ethmoid bone; and, on each side, a round aperture, which leads into two cavities in the substance of the bone, separated by a middle septum, and called the *sphenoidal sinuses*. 5. Two *zygomato-temporal* or *external surfaces*, which correspond to the temporal and zygomatic fossæ.

Some divide the sphenoid into *body* or *middle portion*; and *alæ*, which are four in number, and are subdivided into *great* (*Temporal Plates* or *Wings*, *Alæ magnæ*) and *little* (*Apophyses of Ingrassias*, *Alæ mino'res*, *Processus ensiform'es*).

The *Sphenoid suture* surrounds the bone.

Sphenoid, Sinous Process of the, Sphenoid spine.

SPHENOID'AL, *Sphenoïda'lis*. That which belongs or relates to the sphenoid bone.

Sphenoidal Cor'nua, *Cor'nua Sphenoïda'lia*, (F.) *Cornets sphénoïdaux* ou *de Bertin*, *Osselets de Bertin*, *Ossic'ula Berti'ni*, *Ossa triangula'ria*, *Pyr'amids of Wistar*. Two small, thin, and curved bones, situate between the sphenoid and ethmoid, with which they are confounded in the adult. They have the shape of a hollow pyramid, with the base turned backwards; and are developed by a single point of ossification. They are articulated with the sphenoid, ethmoid, palate bone, and vomer.

Sphenoidal or Supe'rior Or'bitary Fissure, *Fora'men lac'erum supe'rius*, (F.) *Fente sphénoïdale*, is a large fissure, situate between the great and little ala of the sphenoid. It is seen at the upper and back part of the orbit between which and the cranium it is a means of communication, and transmits the third, fourth, and sixth pair of nerves, and the first branch of the fifth pair, to the eye and its appendages.

Sphenoidal Spine, *Spina* seu *Crista sphenoïda'lis*, (F.) *Épine sphénoïdale*, *Spinous Process of the Sphenoid*;—1. A projecting crista at the inferior surface of the sphenoid-bone, for articulation with the vomer. 2. A triangular process, *Apophyse sous-temporale* (Ch.), met with near the posterior margin of the same bone, behind the foramen spinale. At the point of the spinous process, a *styloid process* is frequently met with.

SPHENOIDES, Cuneiform, Sphenoid — s. Os, Sphenoid bone.

SPHENOMAX'ILLARY, *Spheno-maxilla'ris*. That which relates to the sphenoid and maxillary bones.

Sphenomaxillary Fissure, *Inferior or'bitar Fissure*, (F.) *Fente sphéno-maxillaire* ou *orbitaire inférieure*; called, also, *Fora'men lac'erum infe'rius* seu *spheno-maxilla'rē*, is situate at the posterior part of the angle formed by the union of the internal and inferior parietes of the orbit. It is constituted, above, by the sphenoid bone; below, by the superior maxillary and palate bones; and, before, by the malar bone. It is narrower at the middle than at the extremities, and forms a communication between the orbitar cavity and the zygomatic fossa.

Sphenomaxillary Fossa is a name given by some anatomists, to a depression at the union of the sphenomaxillary and pterygomaxillary fissures.

SPHENO-OR'BITAR. A name given by Béclard to the anterior part of the body of the sphenoid bone, which is developed by a variable number of points of ossification.

SPHENOPAL'ATINE, *Sphenopalati'nus*. That which relates to the sphenoid and palate bones.

Sphenopalatine Artery, *Large lateral nasal A.*, is the termination of the internal maxillary. It enters at the posterior part of the superior meatus of the nose, through the spheno-palatine foramen, and spreads its numerous branches on the pituitary membrane covering the septum, the cornua, and the meatus.

Sphenopalatine Fora'men is a round aperture, formed by the vertical portion of the os palati and the sphenoid. It establishes a communication between the nasal fossæ and the zygomatic fossa.

Sphenopalatine Ganglion, *Ganglion of Meckel*, *Sphenoïd'al G.* (Ch.) A small, nervous, corditorm, or triangular ganglion, of variable size, situate without the foramen sphæno-palatinum, in the pterygomaxillary fissure. It seems suspended by several nervous filaments to the trunk of the superior maxillary nerve, and gives off *internal* or *sphenopalatine filaments*, *inferior* or *palatine filaments*, and a *posterior filament*, which is the *Vidian* or *pterygoid nerve*.

Sphenopalatine Nerves, *Lat'eral nasal nerves*, arise from the ganglion — just described — at its inner part, and enter the nasal fossæ by the sphenopalatine foramen. They are five or six in number, and distribute their filaments to the outer and inner parietes of the nasal fossæ. One of the most remarkable branches is the *Naso-palatine*.

SPHENOPALATINUS, Levator palati.

SPHENOPARI'ETAL, *Spheno-parieta'lis*. That which belongs or relates to the sphenoid and parietal bones.

Sphenoparietal Suture is formed by the articulation of the extremity of the greater ala of the sphenoid with the anterior and inferior angle of the parietal bone.

SPHENO-PTERYGO-PALATINUS, Circumflexus—s. Salpingostaphylinus, Circumflexus—*s. Salpingo-mallien*, Laxator tympani.

SPHENOSIS, see Wedged.

SPHENOSTAPHYLINUS, Levator palati.

SPHENOTEMP'ORAL, *Spheno-tempora'lis*. That which belongs to the sphenoid and temporal bones.

Sphenotemporal Suture is the suture at the articulation of the great alæ of the sphenoid bone with the squamous portion of the temporal. Béclard gives the name *sphenotemporal* to the posterior part of the body of the sphenoid, which is developed by distinct points of ossification.

SPHEX, Wasp.

SPHINCTER, *σφιγκτηρ*, *Constric'tor*, *Muscu'lus constricto'rius*, from *σφιγγω*, 'I constrict.' A name given to several annular muscles, which constrict or close certain natural openings.

Sphincter Ani, *Annula'ris Ani*. Many anatomists have described two sphincter muscles of the anus:—1. The *S. exter'nus* seu *cuta'neus*, *As-*

pidis'cus, Coccygio-cutané-sphincter, Orbicula'ris Recti, Constric'tor Ani, Coccygio-anal, (Ch.) It is situate around the anus; is elliptical from before to behind; flattened, and pierced at its middle. Its fibres describe concentric arcs, which are attached, behind, to the extremity of the coccyx, by a dense, areolar substance; and are confounded, anteriorly, with the bulbo-cavernosi and transversi perinæi muscles. This muscle contracts and closes the anus. 2. The *inner* or *internal Sphincter Ani, Sphincter intestina'lis* of Winslow, is by many anatomists considered as the termination of the circular fibres of the rectum. It is annular, and situate around the inferior extremity of the rectum, to the extent of about a finger's breadth. It has the same uses as the other.

SPHINCTER GULÆ, Constrictores pharyngis — s. Ilei, Bauhin, valve of—s. Intestinalis, Sphincter ani internus—s. Labiorum, Orbicularis oris—s. Oculi, Orbicularis palpebrarum — s. Palpebrarum, Orbicularis palpebrarum — s. Pylori, see Pylorus — s. Vaginæ, Constrictores cunni — s. Ventriculi, Pylorus.

SPHINCTER VESI'CÆ, *Sphincter of the bladder.* Some anatomists have given this name, to whitish, elastic, and circular fibres, which surround the neck of the bladder, but do not constitute a particular muscle. Morgagni has given the name PSEUDO-SPHINCTER to the anterior fibres of the levator ani, which pass beneath the neck of the bladder, and, by their contraction, close that opening. See Compressor urethræ.

SPHONDYLIUM, Heracleum spondylium.

SPHONGUS, Fungus, Spongia.

SPHRAGIDONYCHARGOCOME'TA, from *σφραγις*, 'a seal,' *ονυξ, ονυχος*, 'a nail,' *αργος*, 'white,' or perhaps *αργυρος*, 'silver,' and *κομεω*, 'I adorn.' A charlatan who adorned his fingers to the very nails with rings.—Aristophanes, Hippocrates.

SPHYGMA, Pulse.

SPHYGMIC, *Sphyg'micus,* (F.) *Sphygmique,* from *σφυγμος*, 'pulse.' Relating to the pulse: — pulsatory.

SPHYGMIC ART, *Ars Sphyg'mica.* The art of judging by the pulse, in health or disease.

SPHYGMICA DOCTRINA, Sphygmologia.

SPHYGMICUS, Throbbing.

SPHYGMOCEPHALUS, Crotaphe.

SPHYGMODES, Throbbing.

SPHYGMOLEGIUM, Pulsilegium.

SPHYG'MOGRAPH; from *σφυγμος*, 'the pulse,' and *γραφω*, 'I describe.' An instrument which, when applied over an artery, indicates the character of the pulse as to force and extent of undulations.—Vierordt.

SPHYGMOLOG"IA, *Sphygmol'ogy, Sphygmica Doctri'na, Ars Sphyg'mica,* from *σφυγμος*, 'the pulse,' and *λογος*, 'a description.' The doctrine of the pulse.

SPHYGMOMETER, Pulsilegium.

SPHYGMOS, Pulsation, Pulse.

SPHYGMOSCOPIUM, Pulsilegium.

SPHYRA, Malleolus.

SPHYXIS, Pulsation.

SPIC, Lavandula Spica.

SPICA, *Fas'cia repens, Spica bandage,* (F.) *Épi.* A bandage so called in consequence of its somewhat resembling a *spike* of barley. The turns of the bandage cross like the letter V; — each leaving a third of the roller uncovered. It is distinguished into *ascending* and *descending.* It may be applied over various parts of the body, and in a different manner in each case: thus, there is the *Spica* seu *Fascia inguina'lis, Spica inguina'lis duplex,* the spica for the shoulder, and another for the thumb.

SPICA, Lavandula Spica—s. Alpina, Valeriana Celtica—s. Celtica, Valeriana Celtica—s. Indica, Nardus Indica—s. Nardi, Nardus Indica.

SPICEBERRY, Gaultheria, Laurus Benzoin.

SPICEBUSH, Laurus Benzoin.

SPICES, FOUR, see Myrtus pimenta.

SPICEWOOD, Laurus Benzoin.

SPICILLUM, Specillum.

SPIDER, see Araneæ tela.

SPIDERWORT, Liliago, Tradescantia Virginica.

SPIGELIA, S. Marilandica.

SPIGE'LIA ANTHEL'MIA, *Demera'ra Pinkroot,* a native of South America and the West India Islands, has properties like the

SPIGE'LIA MARILAN'DICA, *S. Lonic"era, Anthelmia, Lonic"era Marilan'dica, Peren'nial Wormgrass* or *Indian Pink, Caroli'na Pink, Starbloom, Wormroot. Nat. Ord.* Gentianaceæ. *Class,* Pentandria. *Order,* Monogynia. Indigenous. The root—*Spigelia* (Ph. U. S.) *Pinkroot*—is celebrated as an anthelmintic, particularly in cases of lumbrici.

It is, also, asserted to have been found serviceable in remittent fever. It is a narcotico-acrid. Dose, gr. x to ʒss.

SPIGNEL, Æthusa meum.

SPIKENARD, Conyza squarrosa, Nardus Indica—s. American, Aralia racemosa—s. False, Smalacina racemosa—s. Small, Aralia nudicaulis — s. Tree, Aralia spinosa.

SPILANTHES ACMELLA, Spilanthus acmella.

SPILAN'THUS ACMEL'LA, *S. cilia'ta* seu *fimbria'ta, Spilan'thes acmel'la,* from *σπιλος*, 'a spot,' and *ανθος*, 'a flower,' owing to its dotted or speckled flower, *Bidens acmella, Achmella, Acmella, A. Mauritiana, Verbesi'na acmella, Balmleaved Spilanthus. Ord.* Compositæ. *Sex. Syst.* Syngenesia Polygamia æqualis. This plant possesses a glutinous, bitter taste, and fragrant smell. The herb and seed are said to be diuretic and emmenagogue. They have been used in dropsies, jaundice, fluor albus, and calculous complaints; given in infusion.

SPILANTHUS, BALM-LEAVED, Spilanthus acmella—s. Ciliata, S. acmella—s. Fimbriata, S. acmella.

SPILANTH'US OLERA'CEA, *Spear-leaved Spilanthus,* (F.) *Cresson de Para.* A tincture of the plant has been recommended in toothach.

SPILL, see Nævus.

SPILOMA, see Nævus.

SPILOSIS, Epichrosis—s. Ephelis, Ephelides — s. Poliosis, Poliosis.

SPILSBURY'S ANTISCORBUTIC DROPS. An empirical preparation, formed of *hydrarg. oxymur., rad. gentian., cort. aurant.* sicc. ää ʒij; *antimon. crud., santal. rubr.* ää ʒj; *spiritus vini rectif., aquæ,* ää ʒviij.

SPINA, 'a thorn;' *Spine,* (F.) *Épine.* A process on the surface of a bone, which has been compared to the spines or thorns on certain vegetables. The chief processes of this name are:—the *nasal spine,* the *spine of the scapula,* the *spine of the ischium,* the *four iliac spines,* the *palatine spine,* the *maxillary,* the *sphenoid,* &c. The *spine of the back* is the collection of vertebræ constituting the *vertebral column.*

SPINA, Penis—s. Acida, Oxyacantha Galeni—s. Ægyptiaca, see Acaciæ gummi—s. Alba, Carduus marianus, Mespilus oxycantha, Onopordum acanthium—s. Bifida, Hydrorachis—s. Cervina, Rhamnus—s. Domestica, Rhamnus—s. Dorsi, Vertebral column, see Nasus—s. Dorsi introrsum Flexa, Lordosis—s. Ferrea, Pin—s. Helmontii, *Aiguillon*—s. Hirci, Astragalus verus—s. Infectoria, Rhamnus—s. Nodosa, Rachitis—s. Sphenoidalis, Sphenoidal spine.

SPINA VENTO'SA, *Spinæ ventosi'tas, Teve'do,*

Ostarthroc'acē, *Fungus* seu *Tumor fungo'sus artic'uli*, *Lu'pia junctu'ræ*, *Hyperspon'gia*, *Flatus spinæ*, *Arthrac'acē*, *Pædarthroc'acē*, *Sidera'tio Ossis*, *Cancer* seu *Gangræ'na Ossis*, *Exosto'sis*, *White Swelling* (of some). A term of no definite meaning, as is obvious from these various words having been considered its synonymes. By some, it is defined to be — a disease of the osseous system, in which the texture of the bone dilates, seeming to be distended with air, and constituting a variety of osteo-sarcoma. By others, it is considered to be a tumour arising from an internal caries of a bone; occurring most frequently in the carpus or tarsus. The term itself is a translation from the Arabic of Rhazes. See, also, Hydrarthrus, and Mollities Ossium.

Spina Vertebralis, Vertebral column.

SPINACH, Spinacia.

SPINACHIA, Spinacia.

SPINA'CIA, *Spina'chia*, *Spina'cia olera'cea*, *Spin'age*, *Spinach*, (F.) *Épinard*. *Ord.* Chenopodiaceæ. *Sex. Syst.* Diœcia Pentandria. A plant which resembles the cabbage in its dietetic powers. The leaves boiled, with the addition of oil, form a good emollient cataplasm. It has been used in phthisical complaints; but its medicinal properties, if it have any, are not now regarded.

Spinacia Oleracea, Spinacia.

SPINÆ, Spinous processes — s. Ventositas, Spinæ ventosa.

SPINAGE, Spinacia.

SPINAL, *Spina'lis*, *Spino'sus*, *Spina'tus*, *Rachid'ian*, (F.) *Épinière*, *Rachidien*, from *spina*, 'the spine.' That which relates to the vertebral column.

Spinal Arteries, *Arteriæ spinales*, are two in number, viz: 1. The *posterior spinal*, *Artère médiane postérieure du Rachis*, (Ch.) It arises from the vertebral, near the corpora pyramidalia, and descends on the posterior surface of the spinal marrow, distributing its ramifications to it. 2. The *anterior spinal artery*, *A. médiane antérieure*, (Ch.,) is larger than the last, and arises, also, from the vertebral. It descends, in a serpentine manner, upon the anterior surface of the marrow; furnishes ramusculi to it, and unites with that of the opposite side, opposite the foramen magnum occipitis. A very tortuous branch arises from this union, which descends as far as the inferior extremity of the marrow, to which it sends numerous divisions.

The term *Spinal Arteries* or *Rachidian Arteries* is also given, in the abstract, to all the arteries of the spinal marrow and vertebral canal. The same may be said of the veins and nerves.

Spinal Cord, Medulla spinalis.

Spinal Foram'ina, (F.) *Trous rachidiens*, in the abstract, are the foramina formed by every two contiguous vertebræ, through which the spinal nerves issue. See Vertebral. The term *Fora'men Spina'lē* seu *spino'sum* is especially applied, however, to a small foramen, in front of the spinous process of the sphenoid bone, through which the middle artery of the dura mater enters the cranium. It is, likewise, called *Foramen spheno-spino'sum*, (F.) *Trou Sphéno-épineux* ou *petit rond*, *Trou épineux*.

Spinal Ganglion, see Encephalon.

Spinal Irrita'tion. *Rhachialgi'tis*, *Rhachial'gia*, *Neural'gia spina'lis*, *Notal'gia*. A modern pathological view, which refers most nervous diseases to irritation of the spinal cord. This irritation is presumed to be indicated by tenderness on pressure over the spinous process of one or more vertebræ, or over the nerves proceeding from the cord and distributed to the parts at the sides of the spine. Such tenderness, however, by no means indicates the pathological condition in question, as it is often met with in those enjoying perfect health. The treatment advised is cupping and counter-irritation on each side of the spine, which may be beneficial in such diseases, no matter what part of the frame may be in a morbid state, by exciting a new and revelent impression on a very sensible portion of the cutaneous surface.

Spinal Nerve, *Ac'cessory of the Par vagum* or *8th pair*, *Accessory nerve of Willis*, *Spinal Accessory*, *Superior respiratory N.*, *Eleventh pair of encephalic nerves*, (F.) *Spino-cranio-trapézien*, *Trachélo-dorsal* (Ch.), arises from the medulla spinalis, within the vertebral canal, between the anterior and posterior roots of the cervical nerves, at a greater or less distance from the cranium. The roots unite to form the nerve, which ascends into the cranium through the foramen magnum of the occipital bone, and issues by the foramen lacerum posterius, crossing the sterno-cleido-mastoideus, to which it gives filaments, and losing itself entirely on the trapezius muscle. The pneumogastric and spinal accessory nerves together — *nervus vagus cum accesso'rio* — resemble the spinal nerves; the former, with its ganglion, being the posterior root; the latter, the anterior.

Spinal Nerves, Vertebral nerves — s. Prolongation, Medulla spinalis.

Spinal System of Nerves, see Nerves.

SPINALES COLLI MINORES, Interspinales colli — s. et Transversales lumborum, Transversalis dorsi.

SPINALIS CERVICIS, Semi-spinalis colli — s. Colli, Semi-spinalis colli.

Spinalis Dorsi, *Spinalis Dorsi major*, (F.) *Grand épineux du dos*. Winslow calls thus some fleshy fasciculi, which are situate on the lateral surfaces of the spinous processes; from the third dorsal vertebra to the first or second lumbar; and which form part of the transverso-spinalis of most authors. The same anatomist calls — *Spina'lis Dorsi minor*, *Petit épineux du dos* — some small, fleshy fibres, situate on each side of the interspinal ligament. They are short, flat, and pass from one spinous process to the other. Like the preceding, they form part of the transverso-spinalis. All these fleshy fasciculi strengthen the vertebral column.

SPINATI, Interspinales colli.

SPINATUS, Spinal.

SPINDLE TREE, Euonymus Americanus.

SPINE, Vertebral column — s. Curvature of the, Gibbositas — s. Hæmal, Sternum — s. Neural, Spinous process.

SPINGEL, Anethum.

SPINI-AXOIDO-OCCIPITALIS, Rectus capitis posticus major — *s. Axoïdo-trachéli-atloïdien*, Obliquus inferior capitis.

SPINITIS, Myelitis.

SPINNICK, Nanus.

SPINO-DORSITIS, Myelitis.

SPINOLA, see Hydrorachis.

SPINOSUS, Spinal.

SPINOUS, *Spino'sus*, (F.) *Épineux*, from *spina*, 'a thorn.' Having the shape of a spine or thorn.

Spinous Proc''esses or Apoph'yses *of the Ver'tebræ*, *Acan'thæ*, *Spinæ*, *Cynol'ophoi*, *Neural Spines* of Mr. Owen, (F.) *Apophyses épineuses*, are situate at the posterior part of each vertebra, and afford attachment to the muscles, whose office it is to extend the spine. See Vertebra.

SPINTHEROPIA, Confusio.

SPINULA, Pin.

SPIRAC'ULA, (F.) *Spiracules*, from *spiro*, 'I breathe,' 'Breathing-holes.' Respiratory pores of the skin.

SPIRÆ CEREBRI, Convolutions, cerebral.

SPIRÆA DENUDATA, S. ulmaria.

SPIRÆ'A FILIPEN'DULA, *Filipendula, Saxif'raga rubra, Dropwort,* (F.) *Filipendule. Ord.* Rosaceæ. *Sex. Syst.* Icosandria Pentagynia. The root of this plant is said to possess astringent and lithontriptic virtues.

SPIRÆA LOBA'TA, *S. Palma'ta, Queen of the Prairie, American Meadowsweet.* An oil, resembling oleum gaultheriæ, is obtained from the roots and stems.

SPIRÆA OPULIFO'LIA, *Opulus-leaved Spiræa, Nine Bark,* has similar properties.

SPIRÆA PALMATA, S. lobata.

SPIRÆA TOMENTOSA, *Hardhack, Red meadowsweet, Steeple bush, Rosy bush, White leaf.* The root of this indigenous species, *Spiræ'a* (Ph. U. S.), which is abundant in the northern States of the Union, is tonic and astringent; and is usually administered either in the form of extract or decoction, (*Spiræ* ℥ss; *aquæ* Oj.)

SPIRÆA TRIFOLIATA, Gillenia trifoliata.

SPIRÆA ULMA'RIA, *S. denuda'ta, Ulmaria, U. palustris, Regi'na Prati, Barba capræ, Bar'bula capri'na, Meadow Sweet, Queen of the Meadows,* (F.) *Ulmaire, Spirée ulmaire, Reine des Prés, Vignette, Herbe aux Abeilles.* The leaves have been recommended as mild astringents and diuretics — the flowers as antispasmodics and diaphoretics.

SPIRAMENTA PULMONUM, see Pulmo.

SPIRAMENTUM ANIMÆ, Pulmo.

SPIRAMINA PALPEBRARUM, Lachrymal puncta — s. Pulmonum, see Pulmo.

SPIRATIO, Respiration.

SPIRÉE ULMAIRE, Spiræa ulmaria.

SPIRIT, *Spir'itus;* from *spirare,* 'to breathe, to exhale;' (F.) *Esprit, Alcoolat.* A name given to every liquid product of distillation. Spirits were formerly distinguished into — *inflammable, acid,* and *alkaline;* and consequently a number of substances were crowded together, which often resembled each other in no other property than in being volatile. The term is now confined to alcoholic liquors, of which the following are the chief:

Arrack. Distilled from coarse palm sugar, named *jaggery,* fermented with the bark of the *Mimosa leucophlea;* also from rice and the fermented juice of the Palm; made in India. Its varieties are:—

1. *Mahwah Arrack.* Made in India from the flowers of the Madhuca tree, *Bassia butyracea.*

2. *Tuba.* Made from palm wine, in the Philippine Islands.

Araka. Distilled, by the Tartars, from koumis, fermented mares' milk.

Araki. Distilled from dates, by the Egyptians.

Arika. A variety of koumis, distilled from fermented mares' milk, in Tartary and Iceland.

Brandy. Distilled from wine, figs, peaches, persimmon, apple, mulberries, and sometimes other fruits, in Europe, Asia, North and South America, wherever wine is made. The best brandy is that of Cognac; the next, that of Bordeaux and Rochelle. The varieties are —

1. *Aguardiente,* (S.) In Peru, the common brandy obtained from grapes is the *Aguardiente de Pisco,* so called, because shipped at the port of Pisco. Another kind, much dearer, and of excellent flavour, is made from Muscatel grapes, and is called *Aguardiente de Italia.* It is sometimes seen in the United States.

2. *Lau.* Made from rice, in Siam.

3. *Rakia.* Made in Dalmatia from the husks of grapes mixed with aromatics.

4. *Rossolio.* Made at Dantzic, from a compound of brandy, rossolis, and other plants.

5. *Troster.* Made on the Rhine, from the husks of grapes, fermented with barley and rye.

6. *Sekis-kayavodka.* Made from the lees of wine and fruit at Scio.

Geneva, Hollands, (*genièvre,* French for juniper.) Distilled from malted barley and rye, rectified on juniper berries, in Holland. Its variety is—

Gin. Made in England, from malted barley, rye, potatoes; rectified with turpentine.

Goldwasser. Distilled at Dantzic, from wheat, barley, and rye, rectified with aniseed, cinnamon, and other spices.

Kirschwasser. Distilled from the Malacheb cherry, in Switzerland.

Maraschino. Distilled from the Macarska cherry, at Zara, the capital of Dalmatia.

Rum, (supposed to be derived from the terminal syllable of the word *saccharum:* but the aboriginal Americans call this liquor Rum.) Distilled, in the West Indies and South America, from cane-sugar and molasses, and in North America from maple-sugar. Its variety is—

Slatkaia trava. Made in Kamtschatka, from a sweet grass.

Show-choo. Distilled, in China, from the lees of mandarin, a wine made from boiled rice.

Whisky, (supposed to be derived from *usque,* the first two syllables of *usquebagh,* the original name in Ireland.) Distilled, in Scotland and Ireland, from malted and raw barley, rye, oats, and potatoes; and in the south of France, from sloes. In Ireland it was called *buil-ceaun,* or madness of the head. The best Scotch whisky is *Glenlivet,* the best Irish, *Ennishowen.*

Y-wer-a. Distilled, in the Sandwich Islands, from the root of the Tee-root, baked, pounded, and fermented.

To these may be added an intoxicating liquor made by the Affghanistans, from ewes' milk; and that made in Kamtschatka, from a species of mushroom, named muchumer.

SPIRIT OF AMMONIA, FETID, Spiritus ammoniæ fœtidus—s. of Ammonia, succinated, Spiritus ammoniæ succinatus — s. of Aniseed, Spiritus anisi.

SPIRIT, BATHING, FREEMAN'S, see Linimentum saponis compos.—s. Bathing, Jackson's, see Linimentum saponis compos. — s. Bezoardic of Bussius, see Bussii spiritus Bezoarticus—s. Bone, Liquor volatilis cornu cervi.

SPIRIT OF BURRHUS, Burrhi spiritus matricalis —s. of Camphor, Spiritus Camphoræ—s. of Carraway, Spiritus carui — s. of Colchicum, ammoniated, Spiritus colchici ammoniatus — s. of Cinnamon, Spiritus cinnamomi — s. of Ether, aromatic, Spiritus ætheris aromaticus.

SPIRIT, FUMING, OF BEGUIN, Ammoniæ sulphuretum—s. Fuming, of Boyle, Ammoniæ sulphuretum.

SPIRIT OF HARTSHORN, Liquor volatilis cornu cervi — s. of Horseradish, compound, Spiritus armoraciæ compositus—s. of Juniper, compound, Spiritus juniperi compositus — s. of Lavender, Spiritus lavandulæ — s. of Lavander, compound, Spiritus lavandulæ compositus—s. of Mindererus, Liquor ammoniæ acetatis — s. of Nitre, sweet, Spiritus ætheris nitrici—s. of Nitric ether, Spiritus ætheris nitrici — s. of Pennyroyal, Spiritus pulegii—s. of Peppermint, Spiritus menthæ piperitæ—s. of Pimento, Spiritus pimentæ.

SPIRIT, PROOF, Spiritus tenuior—s. Pyroxylic, Spiritus Pyroxylicus.

SPIRIT OF ROSEMARY, Spiritus rosmarini—s. of Salt, Muriaticum acidum — s. of Scurvygrass, golden, see Spiritus armoraciæ compositus — s. of Spearmint, Spiritus menthæ viridis — s. of Sulphuric ether, Spiritus ætheris sulphurici—s. of Sulphuric ether, compound, Spiritus ætheris sulphurici compositus — s. of Turpentine, Oleum terebinthinæ rectificatum.

SPIRIT, VERDIGRIS, Aceticum acidum.

SPIRIT OF VITRIOL, Sulphuric acid—s. of Wine, Spiritus rectificatus — s. of Wine and camphor, Spiritus camphoræ.

SPIRIT, WOOD, Spiritus Pyroxylicus.

SPIRITS, ANIMAL, Nervous fluid.

SPIRITUOUS, Alcoholic.

SPIRITUS, Breath, Life, Respiration, Spirit — s. Ætherеus nitrosus, Spiritus ætheris nitrici — s. Ætherеus vitriolicus, Spiritus ætheris sulphurici.

SPIRITUS ÆTHERIS AROMAT'ICUS, *Æther Sulphu'ricus cum alcoho'lē aromat'icus, Elix'ir vitrio'li dulcē, Sweet Elix'ir of Vit'riol, Viga'ni's Elixir of Vitriol, Aromat'ic Spirit of Ether.* (*Cinnam. cort.* contus. ℥iij, *cardam. sem.* contus. ℥iss, *piperis longi fruct.* cont., *zingib. rad.* concis., sing. ℥j, *spiritūs ætheris sulphuric.* Oj. Macerate, for 14 days, in a stopped glass vessel and strain. *Ph. L.*) It is used as a stimulant in nervous affections. Dose, f℥ss to f℥j.

SPIRITUS ÆTHERIS COMPOSITUS, Spiritus Ætheris sulphurici compositus — s. Ætheris hydrochlorici, Spiritus Ætheris muriatici.

SPIRITUS ÆTHERIS MURIAT'ICI, *Sp. Æ. Hydrochlo'rici, Sp. Muriat'icus ætheˊreus, Sp. Salis dulcis, Æther Muriat'icus alcoho'icus, Spirit of hydrochloric* or *muriatic ether, Dulcified marine acid.* An old preparation, made by adding one part of *muriatic acid* to three parts of *rectified spirit,* and distilling. Its action is like that of the spiritus ætheris nitrici.

SPIRITUS ÆTHERIS NI'TRICI, *Sp. Ætheris nitro'si* seu *nitri dulcis* seu *Æthe'reus nitro'sus, Æther nitricus alcoolisa'tus, A''cidum Nitri dulcifica'tum, Sweet Spirit of Nitre, Nitre drops, Spirit of Nitric Ether,* (F.) *Éther azoteux alcoolisé, Liqueur anodine nitreuse.* (*Nitrate of Potassa,* in coarse powder, ℔j, *Sulphuric acid,* ℔iss ; *Alcohol,* Oixss ; *Diluted Alcohol,* Oj ; *Carbonate of Potassa,* ℥j. Mix the nitrate of potassa and the alcohol in a large glass retort, and having gradually poured in the acid, digest with a gentle heat for two hours; then raise the heat, and distil a gallon. To the distilled liquor add the diluted alcohol and carbonate of potassa, and again distil a gallon.—Ph. U. S.) It is refrigerant, diuretic, antispasmodic, and diaphoretic. Dose, gtt. xxv to f℥j. Specific gravity, 0·834.

SPIRITUS ÆTHERIS OLEOSUS, Spiritus Ætheris sulphurici compositus, Oleum ætthereum.

SPIRITUS ÆTHERIS SULPHU'RICI, *Æther Sulphuricus cum Alcoho'lē, Liquor Æthe'reus Sulphuricus, Spiritus Vitrioli dulcis, S. Ætheris vitriol'ici, Liquor Sulphuricus alcoolisa'tus, Spirit of Sulphuric Ether.* (*Æther. sulphuric.* Oss ; *sp. rect.* Oj. Mix. Ph. L.) Stimulant, diaphoretic, diuretic, and antispasmodic. Dose, f℥ss to f℥iij.

SPIRITUS ÆTHERIS SULPHURICI COMPOS'ITUS, (Ph. U. S. 1842), *S. ætheris vitriol'ici compositus* seu *Æ'theris compositus* (Ph. U. S. 1851) seu *Spiritus æthe'reus oleo'sus, Liquor anod'ynus* seu *anodynus minera'lis Hoffmanni, Compound Spirit of Sulphuric Ether, Hoffmann's Anodyne Liquor,* (F.) *Éther hydrique alcoolisé, Éther sulfurique alcoolisé, Esprit d'Éther sulfurique, Liqueur anodine d'Hoffman.* (*Æther Sulphuric.* Oss ; *Alcohol,* Oj ; *Ol. Æther.* f℥iij. Ph. U. S. Ph. L.) Mix. A stimulant and antispasmodic. Specific gravity, 0·816.

SPIRITUS ÆTHERIS VITRIOLICI COMPOSITUS, Spiritus ætheris sulphuric. comp.

SPIRITUS AMMO'NIÆ, *Al'kali ammoni'acum spiritu'osum, Al'cohol ammonia'tum, Sp. salis ammoni'aci, Sp. salis ammoni'aci vino'sus* seu *dulcis* seu *dulcificа'tus, Ammoni'aca alcoholisa'ta, Liquor ammo'nii vino'sus, L. ammoniæ spirituo'sus, Lixiv'ium ammoniaca'lē vino'sum, Solu'tio subcarbona'tis ammoni'aci spirituo'sa,* (F.) *Esprit d'ammoniaque.* (*Ammon. muriat.* in pulv. subtilissim., *calcis,* āā ℔j ; *alcohol.* f℥xx ; *aquæ,* f℥ix. The water is employed to slake the lime; the muriate of ammonia is then well mixed with it, and by means of heat, the ammonia is made to pass into the distilled water contained in a quart bottle. Ph. U. S.) Stimulant and antispasmodic. Dose, f℥ss to f℥j.

SPIRITUS AMMONIÆ AROMAT'ICUS, *Alcohol ammonia'tum aromaticum, Spiritus salis volat'ilis oleo'sus* seu *volatilis aromaticus* seu *ammoniæ compos'itus, Sal volatile oleosum Sylvii, Tinctu'ra aromatica ammoniata, Liquor oleo'sus Sylvii, Lixiv'ium ammoniaca'lē aromaticum, Aromatic ammonia'ted Alcohol, Sal volat'ilē Drops.* (*Ammon. muriat.* ℥v ; *Potass. carb.* ℥viij ; *cinnam.* cont., *caryophyll.* cont. āā ℥ij ; *Limon. cort.* ℥iv ; *alcohol., aquæ* āā, Ov. M. Distil Ovijss. Stimulant. Dose, f℥ss to f℥j.

SPIRITUS AMMONIÆ COMPOSITUS, Spiritus aromaticus.

SPIRITUS AMMONIÆ FŒ'TIDUS, *Sp. volat'ilis fœtidus, Al'cohol ammonia'tum fœtidum, Tinctu'ra asafœtidæ ammoniata, Fetid Spirit of Ammonia, Fit Drops.* (*Ammon. muriat.* ℥x, *Potass. carb.* ℥xvj, *Sp. rectificat., Aquæ* āā Oiij, (Imp. meas.) *Assafœtid.* ℥v, *Distil.* Oiij, (Imp. meas.) Macerate for 12 hours, and distil Oiss. *Ph. L.*) Stimulant and antispasmodic. Dose, f℥ss. to f℥j.

SPIRITUS AMMONIÆ SUCCINA'TUS, *Sp. Ammoniæ cum Suc'cino, Sp. Salis Ammoni'aci lactes'cens* seu *lacteus, Tinctu'ra ammo'niæ composita, Ammoni'acum succina'tum, Aqua Lu'ciæ, Liquor ex Ammoniâ et Oleo Suc'cini, L. ex'citans, Succinated Spirit of Ammonia, Common Eau de Luce.* (*Mastich.* ℥iij, *sp. rect.* f℥ix, *ol. Lavand.* gtt. xiv, *ol. succin.* gtt. iv, *liq. ammon.* f℥x. Macerate the mastich in the alcohol, and pour off the clear tincture: add the rest and shake. *Ph. L.*) Stimulant and antispasmodic. Dose, gtt. x to f℥ss, or f℥j.

SPIRITUS ANIMALES, see Nervous fluid.

SPIRITUS ANI'SI, *Sp. Anisi compos'itus, Aqua anisi for'tis, A. Sem'inum Anisi compositа, Spirit of An'iseed,* (F.) *Esprit d'anis.* (*Anisi sem.* cont. ℔ss, *spirit tenuior.* cong., *aquæ* quod satis sit ad prohibendum empyreuma. *Ph. L.*) Carminative. Dose, f℥ss to f℥ss. In the compound spirit, angelica is usually an ingredient.

SPIRITUS ANTHOS, Spiritus rosmarini.

SPIRITUS ARMORA'CIÆ COMPOS'ITUS, *Sp. Raph'ani compositus, Aqua Raphani composita, Compound Spirit of Horseradish,* (F.) *Esprit de raifort composé.* (*Armorac. rad.* recent. concis., *qurant. cort.* exsicc., sing. ℔j, *myrist. nuc.* contus. ℥ss, *spirit. ten.* cong., *aquæ* q. s. ad prohibendum empyreuma. *Ph. L.*) Simulant and antiscorbutic. [?] Dose, f℥j to f℥iv.

The *Golden Spirit of Scurvy grass* — an empirical preparation — is formed by adding *gamboge* ℥viij, to one gallon of the *sp. armoraciæ compositus.*

Greenough's Tincture for the teeth is formed of *amygd. amar.* ℥ij, *lig. Bresil., cassiæ bacc.,* āā ℥iv, *irid. Florent.* ℥ij. *coccinell., sal. acetosellæ, alum.* āā ℥j, *sp. vin. rect.* Oij, *sp. armoraciæ comp.* f℥ss.

SPIRITUS BEGUINIS, Ammoniæ sulphuretum — s. Bellidis, see Osmitopsis asteriscoides.

SPIRITUS CAMPH'ORÆ, *Sp. Camphora'tus* seu *vino'sus camphoratus, Tinctu'ra Camphoræ* (Ph. U. S.), *Spirit of Wine and Camphor, Spirit of Camphor,* (F.) *Esprit de Camphre, Alcool camphré, Eau de Vie camphrée.* (*Camphor.* ℥iv, *alcohol.* Oij. Dissolve.) Stimulant, anodyne and discutient. Used only externally.

Spiritus Car'ui, *Sp. Cari Carui, Aqua Sem'inum Carui fortis* seu *Sem'inum Carui, Spirit of Car'raway, Strong Carui Waters,* (F.) *Esprit de Carvi.* (*Carui sem.* cont. ℔biss, *Sp. tenuior.* cong., *aquæ* q. s. Distil a gallon. *Ph. L.*) Carminative. Dose, f℥j to f℥ss.

Spiritus Cinnamo'mi, *Sp. Lauri Cinnamomi, Aqua Cinnamomi fortis* seu *Cinnam. spirituo'sa, Spirit of Cin'namon, Strong Cinnamon Water,* (F.) *Esprit de Cannelle.* (*Cort. cinnam.* ℈v, *sp. rect.* Oivss.) Stimulant and carminative. Dose, f℥j to f℥ss.

Spiritus Col'chici Ammonia'tus, *Tinctu'ra Colchici Compos'ita, Ammoniated Spirit of Colchicum, Compound Tincture of Colchicum.* (*Sem. colchic.* cont. ℥ij, *sp. ammon. aromat.* Oj. *Ph. L.*) Narcotic, cathartic, and diuretic. Used in gout, rheumatism, and dropsy. Dose, from gtt. xxx to ℥j.

Spiritus Cornu Cervi, Liquor volatilis C.C.—s. Fortior, see Alcohol—s. Fumans Beguini, Ammoniæ sulphuretum—s. Genitalis, Aura seminis—s. Jamaicensis, Rum.

Spiritus Junip'eri Compos'itus, *Aqua Junip'eri composita, Compound Spirit of Juniper,* (F.) *Esprit de genièvre composé.* (*Ol. junip.* ℥ss, *Ol. carui, Ol. fœniculi.,* āā ℥x; *Alcohol dilut.* cong. Solve. Ph. U. S.) Stimulant and diuretic. Dose, f℥j to f℥ss.

Spiritus Lauri Cinnamomi, Spiritus cinnamomi.

Spiritus Lavan'dulæ, *Sp. Lavandulæ spicæ* seu *Lavand. simplex, Lavender Water,* (F.) *Esprit de Lavande.* (*Lavand.* recent. ℔ij. *Alcohol.* cong., *aquæ* Oij. Distil a gallon. Ph. U. S.) Usually made by adding the oil to rectified spirit. Used as a perfume chiefly.

Spiritus Lavandulæ Compos'itus, *Tinctu'ra Lavandulæ composita, Red Hartshorn, Lavender drops, Compound Spirit of Lavender,* (F.) *Esprit de Lavande composé.* (*Sp. Lavand.* Oiij., *sp. rosmarin.* Oj, *cinnam.* contus. ℥j, *myristic.* cont. ℥ss, *caryophyll.* cont. ʒij, *santali* concis. ʒiij. Macerate for 14 days, and filter through paper. Ph. U. S.) Stimulant. Dose, gtt. xl to ʒij.

Spiritus Lethalis, Carbonic acid — s. Lumbricorum, Liquor volatilis cornu cervi.

Spiritus Menthæ Piperi'tæ, *Sp. Menthæ piperit'idis, Aqua Menthæ piperit'idis spirituo'sa, Spirit of Peppermint,* (F.) *Esprit de Menthe poivrée.* (*Olei. menth. pip.* ℈vjss, *sp. rectif.* Oivss, *aquæ,* q. s. Distil a gallon. *Ph. L.*) Carminative and stimulant. Dose, f℥ss to f℥iij.

Spiritus Menthæ Sativæ, Spiritus menthæ viridis.

Spiritus Menthæ Vir'idis, *Spiritus menthæ sativæ, Aqua Menthæ vulga'ris spirituo'sa, Spirit of Spearmint,* (F.) *Esprit de Menthe vert.* (*Olei Menth. virid.* ℈viss, *sp. rectif.* Oivss, *aq.* q. s. Distil a gallon. *Ph. L.*) Like the last in properties and dose.

Spiritus Millepedarum, Liquor cornu cervi—s. Muriaticus æthereus, Spiritus Ætheris muriatici.

Spiritus Myris'ticæ, *Sp. Myristicæ Moscha'tæ* seu *Nucis Moschatæ, Aqua Nucis Moschatæ* seu *Nephrit'ica, Nutmeg Water,* (F.) *Esprit de Muscade.* (*Myrist.* cont. ℥ij, *Alcohol. dil.* cong., *aquæ* Oj. Distil a gallon.) Cordial and carminative. Dose, f℥j to f℥iv.

Spiritus Myrti Pimentæ, Spiritus pimentæ — s. Nitri acidus, Nitric acid — s. Nitri dulcis, Spiritus ætheris nitrici — s. Nitri duplex, Nitric acid — s. Nitri fumans, Nitric acid — s. Nitri Glauberi, Nitric acid — s. Nitri simplex, see Nitric acid — s. Nitri vulgaris, see Nitric acid — s. Nucis moschatæ, Spiritus myristicæ—s. Ophthalmicus Mindereri, Liquor ammoniæ acetatis.

Spiritus Pimen'tæ, *Sp. Myrti Pimentæ* seu *Pimento, Aqua Mirab'ilis, Spirit of Pimento.* (*Ol. Piment.* f. ℥ij, *Alcohol. dilut.* cong. Solve. Ph. U. S.) Cordial and carminative. Dose, f℥j to f℥iv.

Spiritus Pule'gii, *Aqua Pulegii spirituo'sa, Spirit of Pennyroyal, Spirituous Pennyroyal Water,* (F.) *Esprit de Pouliot.* (*Olei pulegii* ℈vij, *sp. rect.* Oivss, *aquæ,* q. s. Distil a gallon. *Ph. L.*) Same as spirit of spearmint in properties and dose.

Spiritus Pyro-aceticus, Acetone.

Spiritus Pyroxyl'icus, *Pyroxyl'ic spirit, Wood spirit, Wood alcohol, Pyroxylic alcohol, Methylic alcohol, Hy'drated oxide of methyle, Bihydrate of Meth'ylene,* (F.) *Esprit pyroxylique, Esprit de bois.* This substance is by some supposed to have been the article given in phthisis, by Dr. Hastings, under the names *Naphtha* and *Wood Naphtha.* It was probably, however, the *Pyro-acetic spirit.* See Acetone. When wood is subjected to destructive distillation, about one per cent. of an inflammable volatile liquid, along with other products, passes over, which, when separated and purified, constitutes pyroxylic spirit. It is given in the same cases and doses as Acetone.

Spiritus Rectifica'tus, *Sp. Vini rectificatus* seu *vino'sus rectificatus, Œnostag'ma, Œnelæ'um, Pyrœ'nus, Al'cohol, A. Vini, Spirit of Wine,* (F.) *Esprit de Vin rectifié.* Rectified spirit is much used in Pharmacy to dissolve resinous and other substances. It is seldom exhibited internally; although it exists in the diluted state in all vinous and spirituous liquors. Externally, it is employed as a discutient.—S. g., according to the London Pharmacopœia, 0·838; according to that of Dublin, 0·840; of Edinburgh and United States, 0·835, (see Alcohol,) and of Paris, 0·819 to 0·827.

Spiritus Rector, Aroma—s. Raphani compositus, Spiritus armoraciæ compositus—s. Roriferus, Gaz sanguinis.

Spiritus Rosmari'ni, *Sp. Rosmarini officina'lis, Sp. Anthos, Spirit of Rosemary, Hungary Water,* (F.) *Esprit de Romarin.* (*Ol. rosmarini* f℥iv, *Alcohol.* cong. Solve. Ph. U. S.) Stimulant. Dose, f℥j to f℥iv.

Spiritus Salis Acidus seu Fumans, Muriaticum acidum — s. Salis ammoniaci, Spiritus ammoniæ—s. Salis ammoniaci aquosus, Liquor ammoniæ — s. Salis ammoniaci lactescens seu lacteus, Spiritus ammoniæ succinatus—s. Salis ammoniaci sulphuratus, Ammoniæ sulphuretum — s. Salis dulcis, Spiritus ætheris muriatici—s. Salis Glauberi, Muriaticum acidum — s. Salis marini, Muriaticum acidum—s. Salis marini coagulatus, Potassæ murias—s. Salis volatilis oleosus, Spiritus ammoniæ aromaticus — s. Sulphurico-ætereus camphoratus, Tinctura ætherea composita — s. Sulphurico-ætereus martialis, Tinctura seu Alcohol sulphurico-æthereus ferri — s. Sulphuris, Sulphurous acid — s. Sulphuris per campanam, Sulphurous acid — s. Sulphuris volatilis, Ammoniæ sulphuretum — s. Sulphurosus volatilis, Sulphurous acid.

Spiritus Tenu'ior, *Alcohol dilu'tum, Spiritus vino'sus tenu'ior, Proof Spirit,* (F.) *Esprit de vin délayé.* Generally made for pharmaceutical purposes, by mixing equal parts of rectified spirit and water. S. g. Lond. 0·920; Edinb. and United States, 0·935. It is employed in the same cases as those in which the alcohol is used: — chiefly, as a solvent of vegetable matters, in the form of tinctures.

Spiritus Veneris, Aceticum acidum—s. Vini Gallici, Brandy—s. Vini rectificatus, Spiritus rectificatus—s. Vinosus camphoratus, Spiritus camphoræ—s. Vinosus tenuior, Spiritus tenuior — s.

Vitalis, Nervous fluid — s. Vitrioli, Sulphuric acid — s. Vitrioli acidus Vogleri, Sulphuricum acidum dilutum — s. Vitrioli coagulatus Mynsichti, Potassæ sulphas — s. Vitrioli dulcis, Spiritus ætheris sulphurici—s. Vitrioli phlogisticatus, Sulphurous acid—s. Volatilis aromaticus, Spiritus ammoniæ aromaticus — s. Volatilis fœtidus, Spiritus ammoniæ fœtidus.

SPIROID CANAL, Aquæductus Fallopii.

SPIROM'ETER; a hybrid term, from *spiro*, 'I breathe,' and *μετρον*, 'a measure: — properly *Anapnom'eter, Pneusom'eter, Pneumom'eter, Pneumatom'eter, Pulmom'eter, Pneumonom'eter.* Any instrument for measuring the quantity of air concerned in respiration, and, consequently, the capacity of the lungs. This mode of measurement has been called *Spirom'etry*, as it was formerly called *Pulmom'etry*. The term spirometer is now usually applied to a kind of gasometer introduced by Dr. Hutchinson to estimate the quantity of air contained in, or, rather, expelled from the lungs under different circumstances.

SPIROPTERA HOMINIS, see Worms.

SPISSANTIA, Incrassantia.

SPIT, Sputum.

SPITAL, Hospital.

SPIT'AL, Mineral Waters of. The village of Spital is situate on the south side of the Tweed, near Tweedmouth. The springs there contain chloride of calcium, sulphate of soda, sulphate and carbonate of lime. They act as saline cathartics.

SPITII'AMA, *σπιθαμη, Dodrans.* A measure of twelve fingers' breadth, or about nine inches.

SPITTING, Exspuition.

SPITTLE, Saliva — s. Sweet, see Salivation.

SPLANCHNA, Entrails.

SPLANCHNECTOP'IA, *Splanchnodias'tasis, Situs perver'sus* seu *enom'alus intestino'rum*; from *σπλαγχνον*, 'an intestine,' *εκ*, 'out of,' and *τοπος*, 'place.' Misplacement or ectopia of the intestines.

SPLANCHNELMINTHA, Worms,

SPLANCHNEURYS'MA, from *σπλαγχνον*, 'an intestine.' and *ευρυνω*, 'I dilate.' Morbid dilatation of the intestines.

SPLANCHNIC, *Splanch'nicus, Vis'ceral*, (F.) *Splanchnique*, from *σπλαγχνον*, 'a viscus.' Relating or belonging to the viscera.

Splanchnic Cav'ities are the three great cavities of the body;—those of the cranium, chest, and abdomen.

Splanchnic Nerves belong to the great sympathetic, and are two in number on each side. They are distinguished into: — 1. The *great splanchnic nerve*, (F.) *Grand surrénal* (Ch.), Its roots—four or five in number—come from the 6th, 7th, 8th, 9th, and sometimes the 10th, thoracic ganglia. They descend inwards, on the sides of the vertebral column, beneath the plenra, and unite into a single trunk, which enters the abdomen through a separation of the fleshy fibres of the pillars of the diaphragm; passes behind the stomach, and divides into several branches, which pass into the semilunar ganglion. 2. The *lesser splanchnic nerve, Renal nerve*, (F.) *Splanchnique accessoire* of Walther, *Petit surrénal*, (Ch.,) is composed of two distinct branches, proceeding from the 10th and 11th thoracic ganglia, which unite on the 12th dorsal vertebra into a cord, that pierces the diaphragm singly; enters the abdomen, and divides into two branches, one of which anastomoses with the greater splanchnic nerve, whilst the other sends its filaments to the renal and solar plexuses.

Splanch'nica. Medicines adapted to diseases of the bowels. Also, the 2d order of the class *Cœliaca* of Good; defined,—diseases affecting the collatitious viscera, and characterized by disquiet or diseased action in the organs auxiliary to the digestive process, without primary inflammation.

SPLANCHNODIASTASIS, Splanchnectopia.

SPLANCHNOD'YNĒ, from *σπλαγχνον*, 'a viscus,' and *οδυνη*, 'pain.' Pain in the bowels.

SPLANCHNOGRAPHIA, Splanchnography.

SPLANCHNOG'RAPHY, *Splanchnogra'phia*, from *σπλαγχνον*, 'a viscus,' and *γραφη*, 'a description.' The part of anatomy which treats of the viscera.

SPLANCHNOLITHI'ASIS; from *σπλαγχνον*, 'a viscus,' and *λιθος*, 'a stone.' The formation of a calculous concretion in any viscus.

SPLANCHNOL'OGY, *Splanchnolog'ia*, from *σπλαγχνον*, 'a viscus,' and *λογος*, 'a discourse.' A treatise on the viscera:—also, Splanchnography.

SPLANCHNOPATHI'A, from *σπλαγχνον*, 'a viscus, and *παθος*, 'suffering.' A disease of the intestines.

SPLANCHNOSCLERO'SIS, from *σπλαγχνον*, 'a viscus,' and *σκληρος*, 'hard.' Induration of a viscus.

SPLANCHNOT'OMY, *Splanchnotom'ia, Splanchnot'omē*, from *σπλαγχνον*, 'a viscus,' and *τεμνω*, 'I cut.' Dissection or anatomy of the viscera.

SPLAT-FOOT, see Kyllosis.

SPLAYFOOT, see Kyllosis.

SPLEEN, *σπλην, Lien, Hepar sinis'trum* seu *adulteri'num, Fomes ventric'uli, Milt*, (Sc.) *Melt*, (F.) *Rate*. A soft, spongy, parenchymatous organ; of a more or less deep violet red, situate deeply in the left hypochondrium, below the diaphragm, above the colon, between the great tuberosity of the stomach and the cartilages of the false ribs, and above and anterior to the kidney. Its ordinary length is 4½ inches; its thickness 2½; and its weight 8 ounces. Its parenchyma, which is bathed in blood, contains a multitude of grayish, soft, and semi-transparent granulations — *splenic corpuscles* or *Malpighian bodies of the spleen*. It is covered by a serous membrane, furnished by the peritoneum; and by a proper coat, of a fibrous nature, which is intimately united with it, and transmits into its interior delicate, solid, and very elastic prolongations — *trabeculæ*, At its inner edge is a fissure, *Hilus* seu *Porta lie'nis*, by which the vessels and nerves enter the organ. The functions of the spleen are unknown. The best opinion is, that it appertains to hæmatosis, and acts as a diverticulum to the vascular system.

Spleen, Hypochondriasis — s. Malpighian bodies of the, see Spleen — s. Supernumerary, Lienculus.

SPLEENWORT, Asplenium, A. filix fœmina, Asplenium scolopendrium — s. Bush, Comptonia asplenifolia.

SPLEN, Spleen.

SPLENAL'GIA, *Neural'gia lie'nis, Sple'nica, Splenodyn'ia*, from *splen*, and *αλγος*, 'pain.' Pain in the spleen.

Splenalgia Bengalensis, see Cachexia, splenic — s. Phlegmonodea, Splenitis — s. Subinflammatoria chronica, Splenoncus.

SPLENATROPH'IA, *Atroph'ia Lie'nis*, from *splen*, and *atrophia*, 'atrophy.' Wasting or atrophy of the spleen.

SPLENAUXE, Splenoncus.

SPLENECTAMA, Splenoparectama.

SPLENECTASIS, Splenoparectama.

SPLENECTOM'IA, *Splenec'tomē*, from *splen*, *εκ*, 'out of,' and *τεμνω*, 'I cut.' Extirpation of the spleen.

SPLENECTOP'IA, *Dieloca'tio* seu *Ectop'ia lie'nis* seu *splenis, Anomosplénotopie* — Piorry; from *splen*, and *εκτοπος*, (*εκ*, and *τοπος*,) 'out of

place.' Dislocation of the spleen. Not a common occurrence.

SPLENEMPHRAX'IS, *Splenophrax'ia*, from *splen*, and *εμφρασσω*, 'I obstruct.' Obstruction of the spleen.—Vogel. See Splenoncus.

SPLENES, Hypochondriasis.

SPLENET'ICUS, *Sple'nicus, Splenit'icus, Lieno'sus*, (F.) *Rateleux*. That which relates to the spleen: one labouring under diseased spleen. A medicine adapted for diseases of the spleen.

SPLENIC, *Sple'nicus, Sple'nius*, (F.) *Splénique*, from *splen*. That which relates to the spleen.

Splenic Artery. It arises from the cœliac; and passes from right to left, forming many windings along the upper edge of the pancreas, which lodges it in a special groove. It reaches the fissure of the spleen, and divides into several branches that enter the organ. In its course it furnishes the pancreatic, left gastro-epiploic, and the *vasa brevia*.

Splenic Cachexia, see Cachexia splenica — s. Corpuscles, see Spleen.

Splenic Plexus is a nervous network, which proceeds from the cœliac plexus, and accompanies the splenic artery, sending secondary plexuses to each division.

Splenic Vein, *Vena sple'nica, V. liena'lis*, arises from the spleen, and accompanies the splenic artery; proceeding from left to right, to unite with the superior mesenteric vein, and to form, with it, the abdominal vena porta. In its course, it receives veins corresponding to the vasa brevia, the right and left gastro-epiploic, the duodenal, pancreatic, coronaria ventriculi, and inferior mesenteric veins.

SPLENICA, Splenalgia. Also, medicines which affect the spleen. — Pereira.

SPLENICUS, Spleneticus, Splenic.

SPLENIOLA, Compress.

SPLENIS TUMOR, Ague cake.

SPLÉNISATION, Splenization.

SPLENISCUS, Compress.

SPLENITICUS, Splenic.

SPLENI'TIS, from *splen*, and *itis*, denoting inflammation. Inflammation of the spleen. *Empres'ma splenitis, Inflamma'tio lie'nis, I. splenis, Splenal'gia phlegmono'dea, Lieni'tis*, (F.) *Splénite, Inflammation de la Rate*. A rare disease, characterized by local pain, swelling, and heat, which sometimes terminates by suppuration. It generally affects the capsule—*Epispleni'tis, Perisplenit'tis*—and must be treated like other inflammations.

SPLENIUM, Compress — s. Corporis Callosi, see Corpus callosum — s. Cruciatum, *Croix de Malte*.

SPLE'NIUS, *S. Cap'itis* seu *Colli*, (F.) *Cervicodorso-mastoïdien et dorso-trachélien, Cervico-mastoïdien* (Ch.), *Posterior mastoid muscle*. So called from its resemblance to the *spleen* of certain animals. A muscle situate at the posterior part of the neck, and upper part of the back. It is much broader above than below, where it terminates in a point. It is attached, by its inner edge, to the spinous processes of the first five dorsal vertebræ; to that of the 7th cervical, and to the inferior part of the posterior cervical ligament. By its upper extremity, it is attached to the transverse processes of the first two cervical vertebræ, to the mastoid process, and to the posterior surface of the occipital bone. Some have considered this muscle to be formed of two portions, which they have called *Splenius colli*, and *Splenius cap'itis*. The splenius extends the head, inclines it, and rotates it. If the splenii of each side act together, they extend the head.

SPLENIZA'TION, *Splenizatio, Splenifica'tion, Splenifica'tio*, (F.) *Splénisation*, from *splen*. A term applied to the state of the lung in the first or second stage of pneumonia, in which its tissue resembles that of the spleen.

SPLENOCE'LE, *Her'nia liena'lis*, from *splen*, and *κηλη*, 'a tumour.' Hernia formed by the spleen.

SPLENODYNIA, Splenalgia.

SPLENOG'RAPHY, *Splenograph'ia*, from *splen*, and *γραφη*, 'a description.' A description of the spleen.

SPLENOHÆ'MIA, (F.) *Splénohémie*, from *splen*, and *αιμα*, 'blood.' Congestion or hyperæmia of the spleen, a common phenomenon in many diseases, especially in typhoid and intermittent fevers.

SPLENOID, *Splenoï'des, Spleno'des*, from *splen*, and *ειδος*, 'resemblance.' Spleen-like. Having the appearance of the spleen.

SPLENOL'OGY, *Splenolog''ia*, from *splen*, and *λογος*, 'a discourse.' A treatise on the spleen.

SPLENOMALA'CIA, *Lienomala'cia*, from *splen*, and *μαλακος*, 'soft.' Morbid softening of the spleen.

SPLÉNONCIE, Splenoncus.

SPLENON'CUS, *Megalosple'nia, Hypertroph'ia* seu *Supernutrit''io splenis* seu *lie'nis, Intumescen'tia seu Infarc'tus seu Physco'nia lienis, Splenal'gia subinflammato'ria chron'ica, Splenemphrax'is, Splenaux'e, Hypersplenotroph'ia, Lien ingens*, (F.) *Splénoncie, Hypertrophie de la Rate*; from *splen*, and *ογκος*, 'a tumour.' Tumefaction of the spleen. See Ague cake.

SPLENOPAREC'TAMA, *Splenec'tama, Splenoparec'tasis, Splenec'tasis*, from *splen*, and *παρεκταμα*, 'excessive volume.' Excessive enlargement of the spleen. — Ploucquet.

SPLENOPARECTASIS, Splenoparectama.

SPLENOPHRAXIA, Splenemphraxis.

SPLENORRHAG''IA, from *splen*, and *ραγη* 'rupture.' Hemorrhage from the spleen.

SPLENOSCIR'RHUS, from *splen*, and *σκιρρος*, 'hardness.' Scirrhus or cancer of the spleen.

SPLENOT'OMY, *Splenotom'ia, Splenot'omē*, from *splen*, and *τεμνω*, 'I cut.' Dissection of the spleen.

SPLINT, Teut. Splinter, from splijten, 'to split;' *Hastel'la, Ass'ula, Asser'culum, Plag'ula, Narthex, Fer'ula*, (F.) *Attelle, Éclisse*. A flexible and resisting lamina of wood, used in the treatment of fractures, to keep the fragments in apposition, and prevent their displacement. Splints are made of iron, wood, bark of trees, leather, gutta percha, pasteboard, &c. They are generally padded, and are fixed by a roller or by tapes, according to circumstances.

SPLINTER, (F.) *Esquille*. Same etymon. This term is sometimes applied to a small portion of wood, which occasionally enters the skin, and gives occasion to much irritation, until it is removed, — *Acu'leus lig'neus*, (F.) *Écharde*.

It is also applied to fragments that separate from a fractured or diseased bone.

SPLITCLOTH, *Lin'teum scissum*. A bandage for the head, consisting of a central part, and six or eight tails. The *single split cloth* has four tails. It is regarded as the most convenient bandage for the head, face and jaws.

SPLITROCK, Heuchera cortusa.

SPOAT, Saliva.

SPODIUM GRÆCORUM, Album græcum.

SPOLIARIUM, Apodyterium.

SPO'LIATIVE, *Spoliati'va*, from *spoliare, spoliatum*, 'to take away.' (F.) *Spoliatif. Phlebatom'ia spoliati'va*, (F.) *Saignée spoliative*. Bloodletting, used for the purpose of diminishing the mass of blood.

SPOLIATORIUM, Apodyterium.

SPONDLES, Vertebræ.

SPONDYLAL'GIA, *Spondylodyn'ia*, from *σπονδυλος*, 'a vertebra,' and *αλγος*, 'pain.' Pain in the vertebræ. Cacorrhachitis. See Vertebral Disease.

SPONDYLARTHRI'TIS, from *σπονδυλος*, 'a vertebra,' *αρθρον*, 'a joint,' and *itis*, denoting inflammation. Gouty or rheumatic inflammation of the spinal column.

SPONDYLARTHROCACE, Vertebral disease.

SPONDYLI, Vertebræ.

SPONDYLIS, Coccyx.

SPONDYLI'TIS, *Inflamma'tio ver'tebræ*, from *σπονδυλος*, and *itis*, denoting inflammation. Inflammation of the vertebræ.

SPONDYLIUM, Coccyx, Heraclenm spondylium.

SPONDYLOCACE, Vertebral disease.

SPONDYLODYNIA, Spondylalgia.

SPONDYLOPATHI'A, from *σπονδυλος*, 'a vertebra,' and *παθος*, 'a disease.' A disease of the vertebral column.

SPONDYLOPYOSIS, Vertebral disease.

SPOND'YLUS, *σπονδυλος*. A *vertebra*. Also, the vertex.

SPONGE, BASTARD, Alcyonium.

SPONGI. The tumefied glands of the neck.

SPON'GIA, *S. officina'lis* seu *Mari'na*, *Spongos*, *Sphongus*, *Sponge*, (F.) *Éponge*. An organized marine substance, of the *Class* Porifera, met with in many seas, but especially in the Mediterranean and Arabian. It is supple, elastic, porous, and capable of absorbing fluids in which it may be placed, and of thus increasing in size. It is employed in *surgery*, for cleansing or washing; for absorbing acrid discharges from ulcers; suppressing hemorrhage when the mouth of the vessel can be compressed by it, and for forming tents for dilating wounds; in which case, the sponge is immersed in melting wax, and cooled before being used, It is then called *Spongia cera'ta*, *Waxed*, *Cera'ted* or *Prepared Sponge* or *Sponge Tent*.

SPONGIA ASSA, S. Usta—s. Cerata, see Spongia—s. Cynosbati, Bedegar.

SPONGIA USTA, *S. Assa*, *Carbo spon'giæ*, *Burnt Sponge*, contains carbonate and phosphate of lime, carbonate of soda, charcoal, and iodine. It is used in bronchocele, scrofulous affections, and herpetic eruptions; and its good effects seem to be dependent upon iodine. It is made by cutting sponge into pieces, and heating it, that any extraneous matter may be separated; burning it in a close iron vessel until it becomes black and friable, and, lastly, rubbing it into very fine powder.—Ph. U. S. Dose, ʒj to ʒiij.

SPON'GIÆ LAPIS. A name given to small friable stones found in sponge. They were formerly esteemed lithontriptic.

SPONGIODES, Spongoid.

SPONGIOLE, *Spon'giolum*, *Spon'giola*, *Sponge'let*; from *σπογγιον*, 'a small sponge.' The soft succulent extremity of the fibrils or true roots of a plant, by which it absorbs or sucks up fluid. Similar spongioles have been supposed to exist at the terminations of the absorbents in animals.

SPON'GION. Ancient name of an epithem made of goats' dung: and also of a malagma, which was considered capable of absorbing the serum in dropsies, like a sponge.—Paulus, Gorræus.

SPONGIO-PILINE, from *spongia*, 'sponge,' and *pilus*, 'a hair.' A fabric, composed of sponge and wool, felted together in three layers, and coated, on one of its surfaces, with caoutchouc, which renders it impermeable. It is of great service as a cataplasm, fomentation, vehicle for lotions, liniments, &c.

SPONGIOSUM (OS), Ethmoid bone.

SPONGIOSUS, Spongoid.

SPONGOID, *Spongoï'des*, *Spongio'des*, *Spongio'sus*, *Spongy*, from *σπογγια*, 'sponge,' and *ειδος*, 'resemblance.' Resembling sponge. Of the nature of sponge.

SPONGOID INFLAMMATION, Hæmatodes fungus.

SPONGOID TISSUE, (F.) *Tissu spongoïde*. An adventitious spongy tissue, found in cases of rickets.—Guérin.

SPONGOS, Tonsil.

SPONGY, Spongoid.

SPONGY TISSUE, see Bone.

SPONSA SOLIS, Calendula officinalis.

SPONTA'NEOUS, *Sponta'neus*, (F.) *Spontanée*, from *sponte*, 'voluntarily.' That which occurs of itself, or without any manifest external cause. Evacuations are termed *spontaneous*, which are not produced by medicine. *Sponta'neous lassi'tude* is that which is not the result of fatigue. Diseases are also *spontaneous* which supervene without apparent cause. *Sponta'neous Amputa'tion* is the separation of a limb from the fœtus in utero.

SPONTANEOUS EVOLUTION, see Evolution—s. Version, Evolution, spontaneous.

SPONTÉPARITÉ, Generation, spontaneous.

SPOON, Umbilicus.

SPOONWOOD, Kalmia latifolia, Tilia Americana.

SPORAD'IC, *Spor'ades*, *Sporad'ici*, *Morbi disper'si* seu *sparsi*, (F.) *Maladies sporadiques*, from *σπειρω*, 'I spread.' Diseases which supervene indifferently in every season and situation, from accidental causes, and independently of any epidemic or contagious influence.

SPORE, *Spor'ule*, *Sporum*, *Spor'ulum*, from *σπειρω*, 'I sow.' The reproductive body in cryptogamous plants, which is analogous to the seed of phanerogamous plants.

SPORID'IUM; same etymon. The reproductive body in algaceous plants, which resembles the spore of other plants.

SPORULE, Spore.

SPORUM, Spore.

SPOTS, CEREBRAL, *Taches cérébrales*—s. Germinal, see Molecule—s. Meningitic, *Taches méningitiques*.

SPOTS, RED, (F.) *Taches rouges*, *Rose spots*, *Rose'olæ* seu *Pap'ulæ typho'sæ*. Small red spots which appear in typhoid fever, from the 8th to the 15th day of the disease. They are most frequently seen on the lower and middle portions of the chest, and upper part of the abdomen.

SPOTS, ROSE, Spots, red.

SPRAIN, corrupted from *strain* [?]—*Subluxa'tio*, *Distor'tio*, *Dias'trophē*, *Diastrem'ma*, *Luxa'tio imperfec'ta*, *Exarthre'ma*, *Exarthro'sis*, *Stremma*, *Thlasma Stremma*, *Wrench*. (Sc.) *Wramp*, (Prov.) *Kench*, *Keak*, (F.) *Détorse*, *Entorse*, *Foulure*. A violent straining or twisting of the soft parts surrounding the joints. According to the degree of the sprain, the fibrous parts of the joint may be simply stretched, or they may be ruptured. This affection, which has been regarded as incomplete luxation, occurs, particularly, in the ginglymoid joints;—as in the foot, wrist, knee, &c. The violence causes an afflux of blood; the serum of the blood is poured out, and often the blood itself, owing to the rupture of vessels; and inflammation arises, which ends in resolution or induration. Local, antiphlogistic applications are required, with perfect rest; and, when the inflammatory action has subsided, cold pumping and friction, with the application of a plaster and bandage, will afford support till the parts affected recover their due tone.

SPRAT, YELLOW-BILLED, Clupea thryssa.

SPRUCE BEER, *White Spruce Beer*. A beer made as follows: To 10 gallons of *water*, add 6 pounds of *sugar*, and 4 oz. of *essence of spruce*.

Add yeast, and bottle, when ready. It is grateful and antiscorbutic.

SPRUCE BEER POWDERS may be formed of *white sugar*, ℥j, and ℈ij; *sodæ subcarb.*, gr. xxvj; *essence of spruce*, gr. x, in each blue paper; and *acid of tartar*, ℥ss in each white paper. For half a pint of water.

SPUITIO, Exspuition.

SPUMA ARGENTI, Plumbi oxydum semivitreum—s. Cerevisiæ, Yest—s. Trium draconum, Antimonium muriatum.

SPUMEUX, Frothy.

SPUMOSUS, Frothy.

SPUNK, Boletus igniarius.

SPUR, Sax. ꝑpuꝛ, (F.) *Éperon des Artères*. The angle at which the arteries leave a cavity or trunk.

SPUR, Ergot.

SPURBLIND, Myopic.

SPURGE, CAPER, Euphorbia lathyris — s. Cypress, Euphorbia Cyparissias—s. Flax, Daphne gnidium — s. Flowering, large, Euphorbia corollata—s. Garden, Euphorbia lathyris—s. Greater, Euphorbia palustris—s. Ipecacuanha, Euphorbia ipecacuanha.

SPURGE LAUREL, Daphne laureola.

SPURGE, MARSH, Euphorbia palustris.

SPURGE OLIVE, Cneorum tricoccum, Daphne mezereum.

SPURGE, PETTY, Euphorbia peplus — s. Sea, Euphorbia paralias — s. Spotted, Euphorbia maculata—s. Sun, Euphorbia helioscopia—s. Wartwort, Euphorbia helioscopia.

SPUTA, PRUNE JUICE, see Prune Juice.

SPUTAMEN, Saliva, Sputum.

SPUTAMENTUM, Saliva, Sputum.

SPUTATIO, Exspuition.

SPUTATION, Exspuition.

SPUTATORIUS, Expectorant.

SPUTUM, plural *Sputa*, *Apochrem'ma*, *Chremma*, *Emptys'ma*, *Sputa'men*, *Pty'elon*, *Pytis'ma*, *Spit*, from *spuere*, *sputum*, 'to spit.' (F.) *Crachat*. The secretions ejected from the mouth in the act of spitting. It is composed of saliva, and of the mucus secreted by the mucous membrane of the nasal fossæ and fauces, and often by the membrane of the larynx and bronchia. The sputa are, sometimes, called *eru'ginous*, when of a greenish-yellow colour; *gummy*, when they resemble a thick solution of gum; *frothy*, (F.) *mousseux*, when covered with froth; *rubig'inous*, (F.) *rubigineux* ou *rouillés*, when of a reddish-yellow; and *streaked*, (F.) *striés*, when mixed with lines of blood. Also, saliva.

SPUTUM CRUENTUM, Hæmoptysis — s. Dulce, Saccharorrhœa pulmonalis—s. Oris, Salivation—s. Saccharatum, Saccharorrhœa pulmonalis — s. Sanguinis, Hæmoptysis.

SQUALLING, Vagitus.

SQUAMA, Scale, Squamous portion, Table.

SQUAMÆ, Scaly diseases.

SQUAMARIA, Plumbago Europæa.

SQUAMEUX, Squamous.

SQUAMIFORMIS, Squamous.

SQUAMOUS, *Squamo'sus*, *Lepidoï'des*, *Lepido'des*, *Squamifor'mis*, *Scaly*; from *squama*, 'a scale.' That which relates to or resembles a scale.

SQUAMOUS PORTION of the temporal bone, (F.) *Portion squameuse* ou *écailleuse du Temporal*, is the upper part of the temporal, so called from a fancied resemblance to a scale. See Temporal Bone.

SQUAMOUS SUTURE, *Sutu'ra squamo'sa* seu *mendo'sa* seu *lepidoï'des* seu *lepido'des* seu *cra'nii squamo'sa*, (F.) *Suture squameuse* ou *écailleuse*. The suture which unites the squamous portion of the temporal bone to the parietal.

Certain *scaly* cutaneous affections are also called *squamous*. (F.) *squameux*. See Scale.

SQUARE STALK, Monarda coccinea.

SQUARRA TONDENS, Porrigo decalvans.

SQUATTING PILLS, Pilulæ opiatæ.

SQUAW-MINT, Hedeoma.

SQUAW-ROOT, Actæa racemosa, Caulophyllum thalictroïdes, Senecio aureus.

SQUAW-WEED, Erigeron Philadelphicum.

SQUEAMISHNESS, Fastidium cibi.

SQUEASINESS, Nausea.

SQUELETTE, Skeleton.

SQUELETTOLOGIE, Skeletology.

SQUILL, Scilla—s. Vinegar of, Acetum scillæ.

SQUILLA, Scilla.

SQUINANCIE, Cynanche, Cynanche tonsillaris.

SQUINANCY, COMMON, Cynanche tonsillaris.

SQUINANTHIA, Cynanche.

SQUINANTHUS, Juncus odoratus.

SQUINE, Smilax China.

SQUINSY, Cynanche tonsillaris.

SQUINT-EYED, see Strabismus.

SQUINTER, see Strabismus.

SQUINTING, Strabismus.

SQUINZEY, Cynanche tonsillaris.

SQUIRRE, Scirrhus—*s. en Cuirasse*, see Ligneous.

SQUIRRHE, Scirrhus.

SQUIRREL CORN, Dicentra Canadensis.

SQUIRREUX, Scirrhous.

SQUIRROGASTRIE, Scirrhogastria.

SQUIRRUS, Scirrhus.

SQUIRT, Syringe.

STACHE BERG, MINERAL WATERS OF. Stachelberg Springs are far down in the valley of the Linth, in Switzerland. The waters are sulphureous, and are much visited by gouty and rheumatic invalids.

STACHYS FŒTIDA, Galeopsis.

STACTE, Myrrha.

STADE, Stage.

STADIUM, Period, Stage.

STA'DIUM ACMES seu STA'SEOS. The period of the height of a disease.

STA'DIUM ANNIHILATIO'NIS seu CONVALESCEN'TIÆ seu RECONVALESCENTIÆ. The period of recovery from disease.

STADIUM AUGMEN'TI seu INCREMEN'TI MORBI. The period or stage of increase of a disease.

STADIUM CALORIS, Stage, (hot) — s. Convalescentiæ, S. annihilationis.

STADIUM DECREMEN'TI. The period or stage of decrease of a disease.

STADIUM FRIGORIS, Stage, (cold) — s. Incrementi Morbi, S. Augmenti morbi — s. Latentis Contagii, Prodromus—s. Opportunitatis, Prodromus—s. Prodromorum, Prodromus—s. Reconvalescentiæ, S. Annihilationis.

STAFF, (D.) Staf. An instrument of great importance in lithotomy,—being the director for the gorget or knife. It is made of steel; and the handle is flat and rough, in order that it may be more securely held. The groove is on its convex surface.

STAFF TREE, CLIMBING, Celastrus scandens.

STAFFA, Stapes.

STAG'S PIZZLE, see Cervus.

STAGE, *Sta'dium*, (F.) *Estage*, *Étage*, *Stade*. The period or degree of a disease; especially the period of an intermittent: — as the *cold stage*,—*sta'dium fri'goris* — *hot stage*, &c.

STAGGERBUSH, Andromeda mariana

STAGGERWEED, Delphinium.

STA'GIUM. The sixth part of an ounce.

STAGMA, from στάζω, 'I distil;' *Stalag'ma*. Any distilled liquid or liquor.

STAGMA, Gutta.

STAGNA'TION, *Stagnat'tio*, from *stagnare*, *stagnatum*, 'to form a pond,' (*stagnum*, 'a pond.') Accumulation and retardation of fluids in any part of the body.

STAGNUM CHYLI, Receptaculum chyli.

STAHLIAN. One who follows the doctrine of Stahl.

STAHL'IANISM. The doctrine of Stahl, which considered every vital action under the direction and presidency of the soul. See Animist.

STALAGMA, Stagma.

STALAGMI'TIS CAMBOGIOÏ'DES, *S. Cambo'gia*, from *σταλαγμος*, 'a drop'—the gum exuding by drops. Gamboge was long ascribed to this fancied Ceylonese plant. It is now known, that the name was given by Murray to specimens of two distinct trees of different genera. See Cambogia.

STALAGMOS, Distillation.

STALE, Urine.

STALTICUS, Incarnans.

STAMMERING, Balbuties—s. of the Fingers, Cramp, writers'.

STAMP, *Cachet*—s. Medicine, *Cachet*—s. Oculist, *Cachet*.

STAMPING MILL, see Pulverization.

STANG, see Throbbing.

STANGOS, Tin.

STANNI MURIAS, Tin, muriate of—s. Oxyduli murias. Tin, muriate of—s. Pulvis, see Tin.

STANNIOLUM, Tinfoil.

STANNUM, Tin—s. Cinereum, Bismuth—s. Foliatum, Tinfoil—s. Glaciale, Bismuth—s. Granulatum, see Tin—s. Indicum, Zincum.

STAPÉDIEN, Stapedius.

STAPE'DIUS, *Stapes*, (F.) *Stapédien*, *Pyramidal-stapédien*. A muscle of the middle ear, which draws the stapes obliquely upwards.

STAPES, genitive *Sta'pedis*, (*sto* and *pes*,) *Stapha*, *Staffa*, 'a stirrup.' (F.) *Étrier*. The innermost of the small bones of the ear, so called because it resembles a *stirrup*. It is situate horizontally in the cavity of the tympanum. Its head, which is directed outwards, is articulated with the os orbiculare. Its base faces inwards, and is applied to the fenestra ovalis, which it closes imperfectly, and to the membrane of which it is united. Its *branches* are one *anterior*, and the other *posterior*. They are curved; and the space between them is parabolic. Surgeons have given the name *Stapes* to a bandage used in bleeding from the foot; which forms a figure of 8 around the ankles.

STAPHA, Stapes.

STAPHIS, Delphinium staphisagria.

STAPHISAGRIA, Delphinium staphisagria.

STAPHISAIGRE, Delphinium staphisagria.

STAPHYLÆMATO'MA, from *σταφυλη*, 'the uvula,' and *hæmotoma*. A tumour formed by effusion of blood beneath the mucous membrane of the uvula.

STAPHYLAGRA, Staphylepartes.

STAPHYLE. Uvula, see Vitis vinifera.

STAPHYLEPAR'TES, from *σταφυλη*, 'the uvula,' and *επαιρω*, 'I lift up.' *Staph'ylagra*. An instrument for laying hold of, and removing the uvula. — Paulus.

STAPHYLINI, see Azygos muscle—s. Medii, see Azygos muscle.

STAPHYLINO-PHARYNGEUS, Palato-pharyngeus.

STAPHYLINUS EXTERNUS, Circumflexus.

STAPHYLIS, Nipple.

STAPHYLITIS, Uvulitis.

STAPHYLIUM, Nipple.

STAPHYLODIALYSIS, Cionis, Staphylœdema.

STAPHYLŒDE'MA, from *σταφυλη*, 'the *uvula*,' and *œdema*. *Angi'na uvula'ris*, *Dysepha'gia uvulo'sa*, *Hypostaph'ylē*, *Hypostaphyli'tis*, *Staphylodial'ysis*. *Prolapsus* seu *Propto'sis* seu *Casus* seu *Œdema u'vulæ*, *Himas*, *Himanto'ma*, *Himanto'sis*, *Staphylon'cus*, *Staphylon'cia*, *Produc'tio uvulæ* & *pitui'tâ*, *U'vula decid'ua* seu *relaxa'ta*, *Cros'pedon*. Relaxation and tumefaction of the uvula, which, either from inflammation or infiltration, hangs down so as to occasion difficult deglutition, cough, &c. Scarification, astringent gargles, and, if necessary, excision, constitute the treatment.

STAPHYLO'MA, from *σταφυλη*, 'a grape.' *Uva'tio*, *Myoceph'alon*, *Myïoceph'alum*, *Parop'sis Staphylo'ma*, *Staphylo'sis*, *Polygro'ma*. A name given to different tumours of the anterior surface of the globe of the eye.

STAPHYLOMA CONICUM, Staphyloma of the cornea—s. Pellucidum conicum, Staphyloma of the cornea.

STAPHYLOMA OF THE CORNEA, *Sugar-loaf Cornea* or *Con'ical Cornea*, *Con'ical hydrophthal'mia*, *Staphylo'ma con'icum* seu *pellu'cidum con'icum*, *Conophthal'mia*, *Prolap'sus cor'neæ*, *Ceraton'cus*, *Hypercerato'sis*, *Hypercer'asis*, is an unequal, embossed, bluish or whitish, round or conical tumour; of variable size; formed by the projection of the transparent cornea, which is sometimes extenuated and distended, at others thickened.

STAPHYLOMA OF THE IRIS is the disease described by Scarpa under the name *Procidentia Iridis*. It is hernia of the iris, through an accidental opening of the cornea. Also, iridauxesis.

STAPHYLOMA OF THE SCLEROT'IC, *Staphyloma sclerot'icæ*, differs from the last, in the prominence existing on a part of the eye covered by the sclerotic, which is much thinner.

STAPHYLOMA UVEÆ, Iridauxesis.

STAPHYLONCIA, Staphylœdema.

STAPHYLONCUS, Staphylœdema.

STAPHYLOPLAS'TIC, *Staphyloplas'ticus*, from *σταφυλη*, 'the uvula,' and *πλασσω*, 'I form.' An epithet applied to the operation for replacing the soft palate, when it has been lost. *Staph'yloplasty*, *Pal'atoplasty*, a word of hybrid formation, is the operation for closing the palatine vault.

STAPHYLOR'RAPHY, *Velosynth'esis*, *Staphylorrha'phia*, *Kionorrha'phia*, *Cionorrhaph'ia*, *Uranor'rhaphē*, *Uranorrha'phia*, *Uraniscorrha'phia*, *Uraniscor'rhaphē*, from *σταφυλη*, 'the uvula,' and *ραφη*, 'a suture.' The operation for uniting a cleft palate. It consists in paring the edges of the cleft; passing ligatures through them, and bringing them together.

STAPHYLOSIS, Staphyloma.

STAPHYLOT'OMY, *Staphylotom'ia*, from *σταφυλη*, 'the uvula,' and *τομη*, 'incision.' Amputation of the uvula.

STAR APPLE, BROAD-LEAVED, Chrysophyllum cainito—s. Blazing, Aletris farinosa—s. Bloom, Spigelia Marilandica—s. Grass, Aletris farinosa, Hypoxys erecta.

STAR, KNAP-WEED, Centaurea calcitrapa.

STAR OF THE NORTH, Geum urbanum.

STAR STROKE, *Coup-de-soleil*—s. Wort, Aletris farinosa—s. Wort, golden, Bubonium—s. Wort, water, Callitriche verna.

STARBECK SPA. A chalybeate spring at Harrogate.

STARCH, Sax. *rcarp*, 'rigid, stiff,' Amylum.

STARCH, ANIMAL, Corpora amylacea—s. Blue, Smalt—s. Canna, *Tous-les-mois*.

STARCH CORPUSCLES, Corpora amylacea.

STARCH, IODIDE OF, *Iod'idum* seu *Iodure'tum Am'yli*, *Am'ylum iodu'tum*, (F.) *Iodure d'Amidon*; prepared by triturating iodine and starch, is said to have the eutrophic effects of iodine; but, by some, is esteemed inert. Dose, four to six grains.

STARCH, POTATO, see Solanum tuberosum.

STARCH SUGAR, Glucose.

STARCH, TACCA, Arrowroot, Tahiti.

STARKEY'S PILLS, see Pilulæ ex helleboro et myrrhâ.

STASE, Stasis.

STASIS, *στασις*, from *σταω*, 'I stop,' (F.) *Stase*. This word has nearly the same signification as stagnation. Stagnation, however, sometimes includes a morbid condition of the fluids, — Stasis never.

STASIS, Station.

STATE MEDICINE, Medicine, state.

STATIC, *Statical, Staticus*, (F.) *Statique*. Same etymon. An epithet applied to the physical phenomena presented by organized bodies in contradistinction to the organic or vital.

STATICA SEPTI NA'RIUM, *Appen'dix cuta'nea septi na'rium*. The cutaneous appendage to the septum narium.

STATICAL, Static.

STATI'CE CAROLINIA'NA, of the United States, (*στατικος*, 'restraining,') *Amer'ican* or *Seaside Thrift, Marsh Rose'mary, Marsh Root, Inkroot, Sea Lavender, Ord.* Plumbaginaceæ, is considered to be a mere variety of the Statice limonium. The root is the *Statice* — (Ph. U. S.).

STATI'CE LIMO'NIUM, *S. Marit'imum, Behen rubrum, Limo'nium, L. majus* seu *vulga're, Behen, Behmen Ackmar, Sea Lav'ender, Red Behen, Marsh Rosemary, Lavender Thrift*, (F.) *Behen rouge, Romarin des marais, Lavande triste* ou *de mer*. The roots have been esteemed astringent, tonic, and eminently antiseptic.

STATICE MARITIMUM, S. limonium—s. Vulgare, S. limonium.

STA'TION, *Sta'tio, Stasis, Status*, from *stare, statum*, 'to stand.' The act of standing.

STA'TIONARY, *Stationa'rius*, (F.) *Stationnaire*. Same etymon. A name given by Sydenham and Stoll to certain diseases, which depend upon a particular state of the atmosphere; and which prevail in a district for a certain number of years, and then give way to others.

STATIS'TICS, MEDICAL, *Vital Statistics, Biostat'ics*, (*Status*, 'a state,') (F.) *Statistique médicale*. That part of medicine which relates to details — *medico-statistical* — connected with the mortality, salubrity, &c., of different countries and situations.

It has, also, been used in a wider sense to signify the same as *Numerical method*, (F.) *Méthode numérique*; which is applied to the systemization of medical facts, or to the use of numbers in the investigation of disease.

STATISTICS, VITAL, Statistics, medical.

STATURE, *Statu'ra, Meg'ethos, Magnitu'do cor'poris*, from *sto, statum*, 'to stand.' The height of the human figure. The following table exhibits the results of several admeasurements, with the heights of some of the monkey species, on the authority of Mr. Lawrence.

	STATURE. Feet.	In.
An Englishman	6 to 5	4½ 00
An Englishwoman	5 to 5	4 00
European male skeleton	5	8
Do.	5	5
A Negro at the Lunatic Hospital, Liverpool	5	10½
Another from Virginia	5	5½
Another from the Gold Coast	5	8
Another	5	00

	STATURE. Feet.	In.
Negro skeleton	4	11
Another	5	7½
A Lascar	5	4
Venus de Medici	5	00
Tyson's Chimpansé (*Simia Troglodytes*)	2	2
Mr. Abel's Orang Otang	2	7
Camper's Do.	less than	30
Mr. White's Monkey	2	2

STATUS, Acme — s. Cruditatis, Crudity — s. Erethicus, Nervous diathesis—s. Gastricus, *Embarras gastrique*—s. Nervosus, Nervous diathesis —s. Parturiendi, Parturition—s. Sthenicus, Sthenia — s. Verminosus, Helminthiasis.

STAVESACRE, Delphinium staphisagria.

STAXIS, *σταξις, Apostax'is*. A slight epistaxis or nasal hemorrhage. — Hippocrates.

STEAM-DOCTOR. A term applied to one who treats all or most diseases by steam.

STEAR, see Fat, Sevum.

STÉARATÉ, Emplastrum.

STEARIN, see Fat.

STEARINUM CETACEUM, Cetaceum.

STÉAROLÉ, Pomatum — s. *Solide*, Emplastrum.

STEAROSIS, Steatosis.

STEARRHŒ'A, *Steatorrhœ'a, Seborrhœ'a, Seborrhag''ia, Smegmatorrhœ'a, Smegmorrhœ'a, Fluxus seba'ceus, Seba'ceous Flux*, from *στεαρ*, 'suet,' and *ρεω*, 'I flow.' Augmentation of secretion from the sebaceous follicles of the skin.

STEARRHŒA NI'GRICANS. A term used by Dr. Neligan, of Dublin, for a black discoloration of the face, observed in young females affected with derangement of the catamenia, and which, in his opinion, is owing to a dark secretion from the cutaneous sebaceous glands.

STEATITES, Polysarcia.

STEATOCE'LE, from *στεαρ*, *ο τατος*, 'suet, and *κηλη*, 'a tumour.' A tumour formed by a collection of steatomatous matter in the scrotum.

STEATO'MA, *Tumor lar'deus*, from *στεαρ, στεατος*, 'suet.' *Seva'tio, Emphy'ma encys'tis steatoma*. An encysted tumour, whose contents are similar to fat.

STEATOP'YGA, from *στεαρ, στεατος*, 'fat,' and *πυγη*, 'buttocks.' *Buttock-hump*. Fat buttocks; such as exist in the Hottentot female.

STEATORRHŒA, Stearrhœa.

STEATO'SIS, *Steato'sis*. Fatty degeneration of a part, or unusual deposition and accumulation of fat in its adipose tissue.

STEATO'SIS CORDIS, *Degenera'tio adipo'sa cordis, Cardiethmolipo'sis* and *Cardiomyolipo'sis* (Piorry), *Fatty heart*. Unusual deposition of fat on the heart:—by some presumed to be occasionally a true adipous degeneration of the substance of the heart.

STEATOSIS HEPATICA, Adiposis hepatica.

STEATOZOON FOLLICULORUM, Acarus Folliculorum.

STEEL, Chalybs.

STEEP, Rennet.

STEEPLE-BUSH, Spiræa tomentosa.

STEER'S OPODELDOCH, see Opodeldoch, Steer's.

STEGMONTH, see Parturient.

STEGANOP'ODES, *στεγανοποδες, Planip'edes*. They who have flat feet, or are web-footed, from *στεγανος*, 'covered,' and *πους*, 'foot.'

STEGNO'SIS, *Steno'sis, Constipa'tio, Stipa'tio, Condensa'tio, Obstruc'tio*, from *στεγνοω*, 'I constrict.' Constriction or narrowness of the pores and vessels. Stricture. Constipation. Suppression of the evacuations. See Arctatio.

STEGNOTICA, Astringents.

STEIROSIS, Sterilitas.

STELENGIS, Strider dentium.

STELLA, *Fas'cia stella'ta*, (F.) *Étoile*. A bandage, improperly compared to a star, because it is crossed like the letter X. This bandage is applied upon one or both shoulders. In the first case, it is called *simple*; in the second, *double*. It was employed in fractures of the sternum, clavicle, and scapula; in luxations of the humerus, &c.

STELLA TERRÆ, Plantago coronopus.

STELLARIA MEDIA, Alsine media—s. Scilæ, Scilla.

STELLATA RUPINA, Centaurea calcitrapa.

STELL'ULÆ VERHEYEN'II, (*stella*, 'a star,' *stel'lula*, 'a little star,') *Substan'tia stel'lata serpenti'nu* seu *radia'ta*, *Ellych'nia*. A stelliform plexus of veins at the surface of the kidney, which gives origin to the interlobular veins.

STELOCHITIS, Osteocolla.

STENAGMUS, Suspirium.

STENAXIS, Suspiritm.

STENIA, Sthenia.

STENICUS, Active.

STENOBREGMATE, see Cranium.

STENOCARDIA, Angina pectoris, Cardiostenosis.

STENOCHO'RIA, *Stenochori'asis*, from στενος, 'narrow,' and χωρα, 'space.' Angustia. Employed by some for contraction of the vagina.

STENOCHORIA INTESTINI RECTI, Stricture of the rectum — s. Œsophagi, Dysphagia constricta.

STENOMYCTE'RIA, from στενος, 'narrow,' and μυκτηρ, 'nose.' Contraction of the nasal passages.

STENOSIS, Stegnosis.

STENOSTEGNOSIS, Stenostenosis.

STENOSTENO'SIS, *Stenostegno'sis*, from *Steno*, and στενωσις, 'contraction.' *Obstruc'tio ductûs Stenonia'ni*. Narrowness or contraction of the duct of Steno.

STENOSTOM'IA, from στενος, 'narrow,' and στομα, 'mouth.' Contraction of the mouth.

STENOTHORA'CES, from στενος, 'narrow,' and θωραξ, θωρακος, 'the chest.' They who have narrow chests.

STENTOROPHO'NUS, from Στεντωρ, *Stentor*, a Greek of powerful voice in the army before Troy; and φωνη, 'voice.' One who has a strong voice.

STEPHANE, Crown.

STEPHENS, MRS., REMEDY FOR THE STONE. This consisted of lime, prepared by calcining the shells of eggs and snails, made into pills with soap. A decoction was, also, administered, consisting of chamomile, fennel, parsley, and burdock, with a portion of Alicant soap. Its virtues were dependent upon the lime and the tonic properties of the decoction. Hales, Hartley, Kirkpatrick, Lobb, and others, wrote in favour of this nostrum; and it was ultimately bought by the British parliament for £5000—about $25,000.

STEPHENSIA ELONGATA, Matico.

STEPMOTHER'S BLESSING, Hangnail.

STERA, Uterus.

STERCORA'CEOUS, *Stercora'rius*, *Diachoret'icus*, *Ster'coral*, from *stercus*, *stercoris*, 'dung.' *Fecal*, *Fæcal*, (F.) *Stercoraire*, *Stercoral*.

The French use the term *Fistules stercoraires* for those which are kept up by the constant passage of fecal or *stercora'ceous matter*. The name *Stercoraires* is sometimes given, in derision, to those physicians who are fond of purging their patients: *à posteriori* has been similarly used.

STERCORAIRE, Stercoraceous.

STERCUS, Excrement, Fimus — s. Anseris, Fimus anseris — s. Caninum album, Album Græcum—s. Diaboli, Asafœtida—s. Equi non castrati, Fimus.

STERCUS HUMA'NUM, Homerda. Human excrement.

STERCUS LACERTÆ, Crocodilia.

STEREOCYST'IS, from στερεος, 'hard,' and κυστις, 'cyst.' A hard encysted tumour.

STERE'OS, Solid.

STE'REOSCOPE, *Stereoscop'ium*, from στερεος, 'solid,' and σκοπεω, 'I view.' A physical instrument by means of which plane pictures of an object are made on each retina, and so blended as to appear as one in relief. Also, an instrument for detecting a calculus in the bladder, and foreign bodies in the soft parts. It resembles a common catheter, having an expanded free extremity.

STEREOT'ICA, from στερεος, 'hard.' Fortuitous lesions or deformities affecting the hard parts. The 2d order, class *Tychica* of Good.

STER'ILE, *Ster'ilis*, *A'gonos*, *Aph'orus*, *Aphor'icus*, *Ablast'es*, *Infecun'dus*, *Barren*, (F.) *Stérile*. Same etymon as Sterilitas. Not producing fruit; infecund.

STERILIS, Sterile.

STERIL'ITAS, *Agon'ia*, *Steiro'sis*, *Stiro'sis*, *Agenne'sia*, *Agenne'sis*, *Infecun'ditas*, *Steril'ity*, *Acye'sis*, *Bar'renness*, *Infecun'dity*, *Apho'ria*, *Atec'nia*, *Atoc'ia*, from στειρος, or στερεος, 'hard, barren.' Quality of that which is barren. Sterility may be *absolute* or *relative*. The former depends upon some vicious conformation of the genital organs, apparent or concealed, and occasionally admits of cure. Sterility is *relative* when a female does not conceive with one individual, but does with another. Sterility in females is often dependent upon a condition of the uterus characterized by membranous menstruation.

STERNAD, see Sternal.

STERNAL, *Sterna'lis*, from *sternum*, 'the breast bone.' Relating or appertaining to the sternum or breast bone.

STERNAL ASPECT. The aspect of the body where the sternum is situate.—Barclay. *Sternad* is used by the same writer adverbially to signify towards the sternal aspect.

STERNALGIA, Angina pectoris.

STERNO, in composition, belonging, or relating to, the sternum or breast bone.

STERNO-CLAVIC'ULAR, *Sterno-clavicula'ris*. That which relates to the sternum and clavicle.

STERNO-CLAVIC'ULAR ARTICULA'TION is the union of the inner extremity of the clavicle with a round facette at each side of the superior extremity of the sternum. In this articulation there are, besides the incrusting cartilages, two *radiated sterno-clavicular*, (F.) *Sterno-claviculaires rayonnées*; *one* anterior, and *one* posterior —an *inter-clavicular ligament* extending between the two clavicles, and two synovial capsules, separated by an *inter-articular fibro-cartilage*. The costo-clavicular ligament may also be considered to belong to this articulation.

STERNO-CLAVIO-MASTOÏDIEN, Sterno-cleido-mastoideus — s. Cleïdo-hyoïdeus, Sterno-hyoïdeus.

STERNO-CLEIDO BRACHIALIS, Pectoralis major.

STERNO-CLEIDO-MASTOÏDEUS, *Sterno-mastoïdeus*, *Cleido-mastoïdeus*, *Mastoïdeus*, *M. anterior*, *Nuta'tor cap'itis*; (F.) *Sterno-clavio-mastoïdien*, *Sterno-mastoïdien*; from στερνον, 'the sternum,' κλεις, 'the clavicle,' and μαστος, 'the mastoid process.' A muscle situate at the anterior and lateral part of the neck. It is long and flattened: simple, above; and divided into two portions below; where it is inserted into the anterior and superior part of the sternum, and the inner quarter of the clavicle. Above, it terminates at the mastoid process, which it embraces, at the neighbouring part of the temporal bone, and at the outer third of the upper curved line

of the occipital bone. It carries the head forward; inclines, and rotates it to one side. When both contract, they bend the head directly forwards.

STERNO-COSTAL, Triangularis sterni — *s. Costo-clavio-huméral*, Pectoralis major — *s. Huméral*, Pectoralis major.

STERNO-HYOÏDEUS, *Sterno-cleido-hyoïdeus, Sterno-hyoïdæus, Hyoïdes primus*; from στερνον, 'the sternum,' and 'υοειδης, 'the os hyoides.' A muscle situate at the anterior part of the neck; inserted, above, at the inferior edge of the body of the hyoid bone; below, into the upper part of the posterior surface of the sternum; — at the posterior part of the sterno-clavicular articulation, and sometimes into the cartilage of the first rib. It depresses the os hyoides.

STERNO-MASTOÏDIEN, Sterno-cleido-mastoideus — *s. Pubien*, Rectus abdominis.

STERNO-THYROÏDEUS, *Sterno-thyroïdes, Bron'chius*. A muscle, situate at the anterior part of the neck. It is attached, above, to the oblique line seen on the outer surface of the thyroid cartilage; and terminates, below, at the upper part of the posterior surface of the sternum, and the cartilage of the second rib. When it contracts, it depresses the thyroid cartilage and os hyoides by the medium of the thyro-hyoid membrane.

STERNODYNIA, see Stomatodynia — s. Syncopalis, Angina pectoris — s. Syncoptica et Palpitans, Angina pectoris.

STERNO-OMPHALODYMIA, see Somatodymia.

STERNOPA'GIA, from στερνον, 'the breast bone,' and παγω, 'I fasten.' A monstrous union of fœtuses, in which they are attached at the sternum.

STERNUM, *Sternon*, from στερρος, 'solid;' *Pectus, Os asser* seu *pec'toris* seu *xiphoïdes* seu *gladi'oli* seu *ensifor'mē, Scutum cordis* seu *pec'toris, Breast Bone, Hæmal Spine* of Owen. An azygous symmetrical bone, situate at the fore-part of the chest. It is flat; broad above; narrower in the middle; and terminates, below, by a pointed cartilage — the xiphoid. It has an *anterior* or *cutaneous surface*, a *posterior* or *mediastinal*—a *superior* or *clavicular extremity*, and an *inferior* or *abdominal*. It is articulated with the clavicles and the seven upper ribs on each side, by means of their cartilages. According to Béclard, it is formed of six principal bones, which he names, from their position, 1. *Primi-sternal* or *clavi-sternal*: 2. *Duo-sternal*: 3. *Tri-sternal*: 4. *Quarti-sternal*: 5. *Quinti-sternal*: 6. *Ultimi-sternal* or *ensi-sternal*.

STERNUMENTUM, Sneezing.

STERNUTAMENTORIA, Achillea ptarmica.

STERNUTAMENTUM, Sneezing.

STERNUTATIO, Sneezing.

STERNUTATOIRE, Sternutatory.

STER'NUTATORY, *Sternutato'rius*, from *sternutare, sternutatum*, 'to sneeze.' *Sternutamen'tum, Errhi'num, Ptar'micum, Anarrhi'num*, (F.) *Sternutatoire*. A substance which provokes sneezing; as tobacco, &c. — See Errhine.

STERTEUR, Stertor.

STERTOR, *Ronchus* or *Rhonchus, Renchus, Rhencus*, (F.) *Sterteur, Ronflement*, from *stertere*, 'to snore.' The deep snoring which accompanies inspiration in some diseases, particularly in apoplexy. Such respiration is said to be *ster'torous*, (F.) *Stertoreux; Respira'tio stertuo'sa* seu *stertens* seu *stertoro'sa*.

STERTOROUS, see Stertor.

STETHÆ'MIA, *Hyperæ'mia Pulmo'num* seu *Pec'toris, Conges'tio Pulmonum* seu *Pectoris*, (F.) *Hyperémie* ou *Congestion des Poumons*; from στηθος, 'the chest,' and 'αιμα, 'blood.' Hyperæmia of the lungs. Congestion or accumulation of blood in the pulmonary vessels.

STETHOCATHARSIS, Expectoration.

STETHOCHYSIS, Hydrothorax.

STETHODESMIS, Corset.

STETHODESMIUM, Corset.

STETHODESMUS, Corset.

STETHOM'ETER, from στηθος, 'the chest,' and μετρον, 'measure.' An instrument, proposed by Dr. Richard Quain, for measuring the extent of movement of the walls of the chest, as a means of diagnosis in thoracic diseases. It consists of a flat case, not unlike a watch-case, having on its upper surface a graduated dial and index, which is acted on by a simple mechanism. A silk cord, long enough to surround one-half the chest, passes through an aperture in the case. The dial is graduated into fifty equal parts, each of which represents the 1-200th of an inch. In using the instrument, the dial is placed firmly against the spine, and the point of the tape over the sternum, or at any other spot according to the part to be examined. The extension of the string, as indicated by the dial, shows the amount of elasticity of the parietes of the thorax.

Under the name *Thoracom'eter*, Dr. Sibson has described an instrument of his invention, which is employed with a similar view as the stethometer of Dr. Quain. — Med. Chir. Transact., vol. xxxi.

STETHOPARAL'YSIS, *Paral'ysis nervo'rum thora'cis, phrenicorum*, &c.; from στηθος, 'the chest,' and παραλυσις, 'paralysis.' Palsy of the muscles of the chest.

STETHORRHEUMA, Pleurodynia.

STETH'OSCOPE, *Stethoscop'ium, Stethos'copum, Echoscop'ium, Psophom'eter, Thoracoscop'ium*, from στηθος, 'the chest,' and σκοπεω, 'I examine.' An instrument invented by Laënnec, of Paris, for exploring the chest. The stethoscope, sometimes called *Pectoriloque*, is a cylinder of wood, from four inches to a foot long; pierced through and through by a longitudinal canal about a quarter of an inch in diameter. The longer are generally composed of two portions, that fit together by means of a screw, one of which is hollowed at the extremity, in the shape of a funnel. These two portions being screwed to each other, the physician lays hold of the instrument, as he would of a pen, puts the funnel-shaped extremity on the chest of the patient, and applies his ear to the other. To explore the pulsations of the heart, the funnel is plugged up by a piece of the same kind of wood accurately adapted to it, and pierced by a canal of the same width as that in the body of the instrument. Stethoscopes are sometimes flexible, like the flexible ear-trumpet.

This mode of examining affections of the chest, *Steth'oscopy, Stethoscop'ia*, &c., is what Laënnec terms *Auscultation médiate, Mediate Auscultation*

STETHOSCOPIA, see Auscultation, and Stethoscope.

STETHOSCOP'IC, *Stethoscop'icus*, (F.) *Stéthoscopique*. Same etymon as Stethoscope. Furnished by stethoscopy or auscultation, — as a '*stethoscopic* sign.'

STETHOSCOPY, see Stethoscope.

STETHUS, Thorax.

STEW, Stove.

STHENI'A, *Steni'a, Diath'esis sthen'ica, Status sthen'icus, Vis aucta*, from σθενος, 'strength,' 'power.' Excess of strength; excitement of the organic actions. A word used, especially by the Brunonians, as well as *Asthenia*,—its antitheton. *Sthenic* or *dynamic diseases* are such as depend upon excessive excitement.

STHENICUS, Active.

STHENOPYRA, Synocha.

STIBI, Antimonium.

STIBIALIS, Antimonial.

STIB'IALISM, *Stibialis'mus*, from *stibium*, 'antimony.' The aggregate phenomena produced by antimonials, when given in large quantities:—antimonial intoxication or poisoning.

STIBIATUS TARTRIS LIXIVIÆ, Antimonium tartarizatum.

STIBII BUTYRUM, Antimonium muriatum — s. Deuto-murias sublimatus, Antimonium muriatum—s. et Potassæ deuto-tartras, Antimonium tartarizatum—s. Hydrosulphuretum rubrum, Antimonii sulphuretum rubrum — s. Oxidum acido muriatico oxygenato paratum, Algaroth—s. Oxidum album mediante nitro confectum, Antimonium diaphoreticum — s. Oxidum præcipitando paratum, Algaroth — s. Oxodes album, Antimonium diaphoreticum — s. Oxodes sulphuretum, Antimonii sulphuretum præcipitatum — s. Oxydi sulphurati hydro-sulphuretum luteum, Antimonii sulphuretum præcipitatum—s. Oxydulati sulphuretum, Antimonii sulphuretum præcipitatum — s. Oxydulum vitreatum, Antimonii vitrum—s. Oxydum semivitreum, Antimonii vitrum—s. Oxydum sulphuratum, Oxydum stibii sulphuratum — s. Subhydrosulphas, Antimonii sulphuretum rubrum — s. Submurias præcipitando paratum, Algaroth — s. Sulphurati hydrosulphuretum rubrum, Antimonii sulphuretum rubrum — s. Sulphuretum nigrum, Antimonium — s. Vitrum, Antimonii vitrum.

STIBIO-DERMIC, see Unguentum antimonii.

STIBIOSUM HYDROSULPHURETUM CUM SULPHURE, Antimonii sulphuretum præcipitatum—s. Oxidum, Antimonium diaphoreticum.

STIBIUM, Antimonium.

STICHAS ARABICA, Lavendula stœchas.

STICKWORT, Agrimony.

STICTA PULMONACEA, Lichen pulmonarius.

STIFF JOINT, MUSCULAR, Contractura.

STIFF JOINTS, Milk sickness.

STIFFNECK, Torticollis.

STIGMA, Cicatricula.

STIGMATA, see Nævus. The breathing pores of insects are so called.

STIG'MATA OVARIO'RUM, *Cicatri'ces Ovario'rum*. The cicatrices left in the ovary after the escape of ova.

STILBOMA, Cosmetic.

STILL, Alembic.

STILLA, Gutta.

STILLATIO SANGUINIS E NARIBUS, Epistaxis.

STILLBORN, (F.) *Mort-né*. Born still or lifeless, — dead born.

STILLICID'IUM, *Subetil'lum*, from *stilla*, 'a drop.' This term is often used synonymously with *Strangury*. It means the flow of any fluid—particularly the urine — drop by drop. Also a kind of embrocation, *Stillicid'ium supra partem*, effected by dropping a liquid upon a part.

STILLICIDIUM LACRYMARUM, Epiphora — s. Narium, Coryza — s. Sanguinis e naribus, Epistaxis — s. Supra partem, see Stillicidium.

STILLIN'GIA, *S. sylvat'ica, Queen's Root, Queen's delight, Yaw root, Mar'cory, Cockup hat*. An indigenous plant, which grows in pine barrens, from Virginia to Florida. *Sex. Syst.* Monœcia Monadelphia. *Nat. Ord.* Euphorbiaceæ. The root — *Stillingia*, Ph. U. S. — is said to be used in syphilis, obstinate cutaneous affections, &c., like sarsaparilla.

STIMATO'SIS, *Stymatosis, Hæmorrhag''ia Penis, Stymatorrhag''ia, Phallorrhay''ia, Caulorrhoy''ia*, from στυμα, 'priapism,' itself from στυειν, 'to erect.' Hemorrhage from the male organ, accompanied or not with priapism.

STIMMI, Antimonium.

STIM'ULANT, *Stim'ulans, Ex'citans, In'citans, Incenti'vum, Irri'tans, Excі'tant, Inci'tant, Hypersthen'ic, Pyretogenet'ic*, from *stimulare*, 'to goad.' A medicine which has the power of exciting the organic action of the different systems of the economy. Some stimulants are *diffusible*, — that is, have a prompt but temporary action; others are *permanent* or *persistent*. The action of stimulants is called *Stimula'tion, Stimula'tio, Incita'tio*.

The chief stimulants are the following: Æther Sulphuricus, Ammonia, Asafœtida, Brucia, Camphora, Capsicum, Castoreum, Cinnamomum, Copaiba, Cubeba, Guaiacum, Hydrargyri Præparata, Iodinium, Nux Vomica, Olea Essentialia, Opium (in small dose), Piper, Sinapis, Strychnia, Zingiber, — Alcohol, Caloric, Electricity, Mental Emotions, (the Impetuous.)

STIM'ULUS, 'a goad.' *Incitamen'tum, Irrita'men, Irritamen'tum, Poten'tia Irri'tans*. Any thing which excites the animal economy.

STINE, Hordeolum.

STINK POKE, Dracontium fœtidum—s. Weed, Chenopodium anthelminticum, Datura stramonium, Polanisia graveolens.

STIPATIO, Stegnosis.

STIPATIO TELÆ CELLULO'SÆ INFANT'UM. Induration of the cellular tissue of children.

STIROSIS, Sterilitas.

STITCH, same root as *stick*, Sax. ꝑtician, (G.) stecken, (Sc.) *Stonnd*, (Prov.) *Dag*, (F.) *Point*, (L.) *Punctum*; (from *pungere, punctum*, 'to prick or sting.') An acute lancinating pain, like that produced by the puncture of a sharp needle.

STITCH, COMMON, Suture, common — s. Royal, see Suture — s. in the Side, Pleurodynia.

STIZOLOBIUM, Dolichos pruriens.

STLENGIS, Stridor dentium.

STOBÆ'A RUBRICAU'LIS. A South African plant, *Nat. Ord.* Compositæ. A tincture of the bruised roots is diuretic, and of great service in gravel.

STOCKING, LACED, (F.) *Bas lassé*. A bandage used by surgeons, which consists of a stocking made of firm cloth or dog-skin, admitting of being tightly laced anteriorly. It is employed in varices and ulcers of the legs.

STŒCHAS ARABICA, Lavendula stœchas.

STŒCHIOL'OGY, *Stœchiolog''ia*, (F.) *Stœchiologie*; from στοιχειον, 'element,' and λογος, 'a discourse.' A treatise, or the theory, of elements; hence of the elementary parts of organized substances.

STOICHEION, Element.

STOMA, Mouth.

STOMAC'ACĒ, *Stomatoc'acē, Stomal'gia, Labrisul'cium, Cheiloc'acē, Uloc'acē, Cheilomala'cia, Stomatono'ma, Stomatonecro'sis, Cancer Oris, Canker*, from στομα, 'the mouth,' and κακος, 'evil.' Fœtor of the mouth with a bloody discharge from the gums. (F.) *Cancer aquatique*; see Cancer Aquaticus. Also, Scurvy.

STOMACACE, Porphyra nautica—s. Gangrænosum, Cancer aquaticus — s. Universale, Purpura hæmorrhagica.

STOMACAL, Stomachal.

STOMACALGIA, Cardialgia.

STOMACH, *Stom'achus, Ventric'ulus, Nedys, Anocœ'lia, Gaster, Gluttu'patens, Maw*, (of animals,) (Sc.) *Kyte, Pechan*, (Prov.) *Warison*, (F.) *Estomac*, from στομα, 'a mouth.' One of the principal organs of digestion. It is a musculo-membranous reservoir; continuous, on the one side, with the œsophagus; on the other, with the duodenum. It is situate beneath the diaphragm, between the liver and the spleen; and occupies the epigastrium and a part of the left hypochondrium. In it the food is converted into chyme.

When viewed externally, the stomach has, 1. An *anterior face*, which looks a little upwards. 2. An *inferior face*, directed downwards. 3. An *inferior* or *colic margin*, which is convex and extensive, and is called the *greater curvature*, (F.) *Grand courbure*. It gives origin to the omentum majus. 4. A *superior* or *diaphragmatic margin*, which is shorter, concave, and is called the *lesser curvature*, (F.) *Petit courbure*. The lesser omentum is attached to this. 5. A *left* or *œsophageal orifice*, called, also, the *cardia*, *Os ventric'uli* or *upper orifice*. 6. A *right* or *intestinal*, or *inferior orifice*, called the *pylorus*. 7. A considerable dilatation, situate to the left of the cardia and greater curvature — the *great tuberosity* or *great cul-de-sac* or *fundus of the stomach;* and, 8. A less extensive dilatation, situate to the right of the greater curvature, — *the lesser tuberosity* or *lesser cul-de-sac*, *Antrum Pylo'ri*. The inner surface of the stomach is of a reddish-white colour, and has a marbled appearance. It is constantly covered by thick mucus, and is lined by a mucous membrane, which presents numerous wrinkles. The parietes of the stomach consist of three membranes in superposition. The outermost is serous, and is an extension of the peritoneum. The middle coat is *muscular*,—some of its fibres running longitudinally; others, transversely, and others obliquely. The innermost membrane is of a mucous nature, *Crusta villo'sa ventric'uli*, *Gastro-mycod'eris*, but not exactly a continuation of the membrane that lines the œsophagus. The mucous and muscular membranes form, at the pylorus, a valve, called the *Pyloric valve*. These three coats are united by a dense, close, areolar membrane; and, between the mucous and muscular coats, along the two curvatures especially, is a quantity of muciparous glands, called *Glands of Brunner*. The arteries of the stomach are very numerous, and proceed from the coronaria ventriculi, the pyloric, splenic, and right and left gastro-epiploic. The veins have the same name, and pursue the same course as the arteries. They pour their blood into the trunk of the vena porta. Its lymphatic vessels are very numerous, and pass into ganglia, situate along the two curvatures. The nerves of the stomach proceed from the pneumogastric, and three divisions of the cœliac plexus.

Stomach Cell, see Favulus — s. Disease, Limosis.

Stomach, First, Ingluvies.

Stomach Pump, *Gastren'chyta*, *Antli'a gas'trica*, (F.) *Pompe pour l'estomac*. A useful instrument for conveying fluids to the stomach, when deglutition is impracticable, and for pumping out the contents of that organ. It consists of a forcing syringe, to the bottom and nozzle of which flexible tubes can be attached. When the object is to force fluids into the stomach, the stomach-tube must be attached to the nozzle, and passed down the throat, — the tube connected with the bottom of the syringe being placed in the fluid to be injected. To empty the stomach, the stomach-tube must be attached to the bottom of the instrument. This instrument has been of great service where poisons have been taken. The antidote, when any exists, and is at hand, should be administered immediately prior to its use.

The stomach pump was first employed in America by Dr. Physick, in the year 1812.

Stomach, Second, Proventriculus — s. Sick, Milk sickness — s. Third, Ventriculus callosus.

Stomach Tube, see Tube, œsophageal.

STOM'ACHAL, *Stomach'ic*, *Stomach'ical*, *Cardi'acus*, *Stomach'icus*, *Stomacha'lis*, *Viscera'lis*, (F.) *Stomacal*, *Stomachique*. That which belongs to the stomach; that which is good for the stomach; which strengthens the stomach. A medicine that gives tone to the stomach.

STOMACHALGIA, Cardialgia.

STOMACHI RESOLUTIO, Dyspepsia.

STOMACHIC, Stomachal.

STOMACHICAL, Stomachal.

STOMACHIQUE, Stomachal.

STOM'ACHUS, from στομα, 'mouth.' This word has been used in several different acceptations; for example, for the œsophagus, for the cardiac orifice of the stomach, (see Cardia,) and for the stomach itself. Hippocrates calls the neck of the bladder στομαχος κυστεως; and the neck of the uterus της μητρας στομαχος.

STOMAL'GIA, *Stomatal'gia*, *Stomatodyn'ia*, from στομα, 'mouth,' and αλγος, 'pain.' Pain in the mouth.

STOMAPYRA, Aphthæ—s. Aphtha, Aphthæ.

STOMATALGIA, Stomalgia.

STOMATEL'CIA, *Stomatelco'sis*; from στομα, στοματος, 'the mouth,' and ελκος, 'an ulcer.' Ulceration of the mouth.

STOMATI'A, *Stomatopathi'a*; from στομα, στοματος, 'the mouth.' Disease of the mouth.

STOMAT'IC, *Stomat'icus*, from στομα, στοματος, 'mouth.' A medicine used in diseases, &c., of the mouth. Dentifrices, masticatories, &c., are stomatics.

STOMATITE APHTHEUSE, Stomatitis, aphthous — *s. Charbonneuse*, Cancer aquaticus — *s. Couenneuse*, Stomatitis, pseudo-membranous — *s. Crèmeuse pultacée*, Aphthæ — *s. Folliculeuse*, Stomatitis, aphthous — *s. Gangréneuse*, Cancer aquaticus — *s. Mercurielle*, see Salivation, mercurial — *s. Ulcéreuse*, Stomatitis, aphthous.

STOMATI'TIS, from στομα, στοματος, 'the mouth,' and *itis*, denoting inflammation. (F.) *Inflammation de la Bouche*; Inflammation of the mouth.

Stomatitis, Aphthous, *S. follic'ular* or *ul'cerous*, *Em'phlysis Aphtha*, *A. Adulto'rum*, (F.) *Stomatite*, *S. aphtheuse* ou *folliculeuse* ou *ulcéreuse*. An inflammation of the follicles of the mouth, constituting the aphthæ of the adult, which is generally accompanied by cephalic, gastric, and general disturbance. It may be either discrete or confluent, and requires general and local treatment, adapted to the case.

Stomatitis, Erythem'atous. Simple inflammation of the mouth.

Stomatitis, Exsudativa, Aphthæ—s. Follicular, S. aphthous — s. Gangrenous, Cancer aquaticus — s. Materna, Stomatitis of nursing women.

Stomatitis, Mercu'rial, *S. mercuria'lis*, *Hydrargyrostom'atis*, *Hydrargyrostomati'tis*. Inflammation of the mouth induced by mercury.

Stomatitis of Nursing-women, *S. Nutri'cum* seu *Mater'na*, appears to be a variety of S. aphthous.

Stomatitis Nutricum, Stomatitis of nursing women.

Stomatitis, Pseudomem'branous, (F.) *Stomatite couenneuse*, *Diphthérite buccale*, *Pseudo-membranous inflammation of the mouth;* — in its worst form, *Stomatyphus*, (F.) *Fégarite*. Inflammation of the mouth accompanied by the exudation of a false membrane, — a disease which is rarely seen except in large foundling establishments.

Stomatitis, Ulcerous, S. aphthous — s. Vesiculosa infantum, Aphthæ.

STOMATOCACE, Stomacace.

STOMATODYNIA, Stomalgia.

STOMATO-GASTRIC, *Sto'mato-gas'tricus*, *Stomo-gastric*, *Stomo-gas'tricus*, from στομα, στοματος, 'the mouth,' and γαστηρ, 'the stomach.' Appertaining to the mouth and stomach,—as the *stomato-gastric* ganglia of the lower animals. See Encephalon and Nerves.

STOMATOMALACIA PUTRIDA, Cancer aquaticus.

STOMATONECROSIS, Cancer aquaticus, Stomacace.

STOMATONOMA, Stomacace.

STOMATOPA'NUS, from στομα, στοματος, 'the mouth,' and πανος, 'a glandular tumour.' *Stomatophy'ma glandulosum, Panus Fau'cium.* Tumefaction of the glands of the mouth.

STOMATOPHY'MA, from στομα, στοματος, 'the mouth,' and φυμα, 'a swelling.' A swelling in the mouth.

STOMATOPHYMA GLANDULOSUM, Stomatopanus.

STOMATOPLAS'TIC, *Stomatoplas'ticus*; from στομα, στοματος, 'the mouth,' and πλασσω, 'I form.' An epithet for the operation of forming a mouth, where the aperture has been contracted from any cause. *Stomatoplas'ty.*

STOMATORRHAG''IA, *Stomatorrhœ'a, Hæmorrhag''ia oris* seu *fau'cium, Sau'guinis profluvium ex Orĕ, Hæmorrhoïdes Oris, Stomato'sis, Stomorrhag''ia*, (F.) *Hémorrhagie buccale*, from στομα, στοματος, 'the mouth,' and ρηγνυμι, 'I break out.' Hemorrhage from the mouth.

STOMATORRHAGIA ALVEOLORUM, Phatnorrhagia — s. Gingivarum, Ulorrhagia.

STOMATORRHŒA, Stomatorrhagia.

STOMATOSCOPE, from στομα, στοματος, 'mouth,' and σκοπεω, 'I view.' Any instrument for keeping the mouth open, so as to permit the parts within to be inspected; *Speculum oris.*

STOMATOSEPSIS, Cancer aquaticus.

STOMATOSIS, Stomatorrhagia.

STOMATOSPASMUS, Trismus.

STOMATYPHUS, Stomatitis, pseudomembranous.

STOMENCEPHALUS, Stomocephalus.

STOMOCEPH'ALUS, *Stomenceph'alus*, (F.) *Stomocéphale*; *Stomencéphale*; from στομα, 'mouth,' and κεφαλη, 'head.' A genus of monsters, having two contiguous eyes, or a double eye occupying the median line; the nasal apparatus atrophied and forming a tube (*trompe*); the jaws rudimental; and the mouth imperfect or wanting.—I. G. St. Hilaire.

STOMOMANICON, Platysma myoides.

STOMORRHAGIA, Stomatorrhagia.

STONE IN THE BLADDER, Calculi, vesical — s. Binder, Osteocolla — s. Crop, Sedum — s. Crop, biting, Sedum—s. Mint, Cunila mariana—s. Pock, Acne — s. Root, Collinsonia Canadensis.

STONES, THE, Testes.

STOOL, Dejectio.

STOOL, CALOMEL, see Calomel.

STORAX, Styrax — s. Liquida, Liquidambar styraciflua.

STOREY'S WORM CAKES. An empirical preparation, formed of *calomel* ℈j, *jalap* ʒj, *zingib.* ℈ij, *sacch.* ʒj, *cinnab. antim.* q. s. to colour them; *syrup. simpl.* q. s. to make into cakes.

STORKBILL, Geranium maculatum.

STOUND, Stitch.

STOVE, *Æstua'rium, Stupha.* Old French, *Estuve*; a *Stew*, (F.) *Étuve.* A limited space, warmed artificially, and in which the air is slowly renewed. It is used for drying various substances, as plants, extracts, conserves, &c., or for taking vapour baths. In this case, the *stew* or *stove* is said to be *wet* or *humid*; in the opposite case, it is said to be *dry*, (F.) *sèche.* The latter, which is used by the Turks, is the *Lacon'icum* or *Calida'rium* of the Romans. The former is their *Tepida'rium* or *Vapora'rium.* These kinds of baths greatly excite the cutaneous transpiration; and are valuable agents in rheumatic and other affections.

STRABI, see Strabismus.

STRABILISMOS, Strabismus.

STRABIS'MUS, *Strabilis'mos, Parop'sis Strabismus*, from στραβος, 'twisted,' 'one who squints;' *Strabos'itas, Loxophthal'mus, Distor'sio, Lus'citas, Illo'sis, Ilo'sis, Helo'sis, Squinting, Cross eye*, (Prov.) *Doyle, Gleeing*, (Sc.) *Skellie, Skeely*, (F.) *Strabisme, Vue louche, Louchement.* Want of concordance of the optic axes. It may be dependent upon natural or acquired inequality in the action of the motor muscles of the eye; on a convulsive state of one of those muscles; a difference in the sensibility of the two eyes; or a cerebral affection. In the treatment, if the disease seem to depend upon an excess of strength in one of the motor muscles, we must endeavour to give tone to that which is too weak, by placing before the eye a mask having a small aperture on the side to which it is necessary to direct the pupil; or by wearing glasses, provided with a piece of looking-glass, on the side to which the eye is vitiously turned; so that the reflection may be inconvenient, and occasion the organ to be turned in an opposite direction; or by putting a black patch on the angle opposite to that to which the eye is turned. If owing to weakness, the organ must be strengthened by being exerted alone, and by leaving the other at rest. If the disease be symptomatic of cerebral affection, attention must, of course, be directed to the latter.

Strabismus may be *single*, or affect one eye only, or *double*, and it may be *convergent* or *divergent.*

Those affected with Strabismus are called *Strabi, Strabo'nes, Strabo'ni, Strebli, Illi, Il'lides, Squint'ers, Squint-eyed*, (Sc.) *Gleyed*, (F.) *Louches, Bigles.* A slight deviation is generally called a *Cast in the Eye*, and, sometimes, a *Cock-eye.*

STRABISMUS, CONVERGENT, see Strabismus—s. Divergent, see Strabismus — s. Double, see Strabismus—s. Single, see Strabismus.

STRABONES, see Strabismus.

STRABONI, see Strabismus.

STRABOSITAS, Strabismus.

STRABOT'OMY, *Strabotomi'a*, from στραβος, 'one who squints,' and τομη, 'incision.' The operation for the removal of squinting by the division of the muscle or muscles that distort the eye-ball.

STRAE-DEATH, see Death.

STRAIN, Sprain.

STRAIN, *colare*, (F.) *couler*, from στραγγειν, *stringere*, (F.) *estreindre*, 'to constrict or squeeze.' To pass decoctions, infusions, &c., forcibly through linen; also, to exert an effort. This is accomplished by fixing firmly the parts where the muscles to be exerted originate, in order that their full power may be developed.

STRAINING, Nisus.

STRAITS OF THE PELVIS, see Pelvis.

STRAMOINE, Datura stramonium.

STRAMONIA, Datura stramonium.

STRAMONIUM, Datura stramonium—s. Fœtidum, Datura stramonium—s. Majus album, Datura stramonium — s. Spinosum, Datura stramonium — s. Vulgatum, Datura stramonium.

STRANGAL'IDES, from στραγγω, 'I compress.' Small, hard tumours, which form, as in the breast when the milk does not find issue.

STRANGALION, Tubercle.

STRANGALIS, Tubercle.

STRANGALISMUS, Strangulation.

STRANGERS' FEVER, see Fever, strangers'.

STRANGULATIO, Orthopnœa, Strangulation — s. Uterina, Angone. —s. Vulvæ, Hysteria.

STRANGULA'TION, *Strangula'tio, Pnix, Pnig'mos, Strangalis'mus*, (F.) *Étranglement, Strangulation.* From στραγγω. 'I constrict or squeeze.' State of a part too closely constricted Thus we say that there is *strangulation* of an in-

testinal hernia, when the opening that gives passage to the portion of protruded intestine contracts, so as to intercept the continuity of the digestive canal. In *Legal Medicine*, it means the forcible obstruction of the air passages, by a ligature or by the hand, for criminal purposes. See Suffocation.

STRANGULATOR, see Lycoides.

STRANGURIA, Enuresis—s. Cruenta, Cystorrhagia.

STRANGURIE, Strangury — *s. Menstruelle*, Dysmenorrhœa.

STRANGU'RIOUS; same etymon as the next. Affected with, or of the nature of, strangury.

STRAN'GURY, *Strangu'ria, Paru'ria stillati'tia*, from στραγγευν, 'to squeeze,' and ουρον, 'urine:' *Dysu'ria, Uri'næ Stillicid'ium* seu *Substil'lum*, (F.) *Strangurie*. Extreme difficulty in evacuating the urine, which issues only drop by drop, and is accompanied with heat, pain, tenesmus at the neck of the bladder, &c. See Ischuria, and Retention.

STRAPPING, WATER, see Water-dressing —s. Wet, see Water-dressing.

STRATHPEFFER, MINERAL WATERS OF. A sulphuretted water, at Strathpeffer, a few miles west from Dingwall, in Ross-shire, Scotland. It contains sulphate of soda, sulphate of lime, chloride of sodium, sulphate of magnesia, and sulpho-hydric acid.

STRATIOTES, Achillea millefolium.

STRATUM BACILLATUM, see Tunica Jacobi—s. Corneum, Epidermis—s. Malpighii, Corpus mucosum—s. Pigmenti, see Choroid—s. Proligerum, Proligerous disc.

STRAWBERRY, Fragaria — s. Bush, Euonymus Americanus — s. Shrubby, Rubus arcticus— s. Tree, Euonymus Americanus—s. Wild, Fragaria Virginiana.

STREAK, PRIMITIVE, Groove, primitive.

STREATHAM, MINERAL WATERS OF. Streatham is a village near London. The waters are saline and cathartic.

STREBLI, see Strabismus.

STREBLOSIS, Luxation.

STREMMA, Luxation, Sprain.

STREPITO'SUS MORBUS. 'Noisy disease.' A kind of flatulent disease, said by Sorbait to be not uncommon in the Austrian Alps, in which emphysematous tumours form on different parts of the body,—accompanied by sonorous excretion of gas by the mouth and anus.

STREPITUS AURIUM, Tinnitus aurium.

STRETCHING, Pandiculation.

STRIÆ, Vibices—s. Ciliares, Ciliary processes —s. Cornææ, Tenia semicircularis—s. Longitudinales Lancisii, see Corpus callosum — s. Medullares, see Processes teretes — s. Retinæ subjectæ ligamento ciliari, Halo signatus—s. Semilunares, Tænia semicircularis—s. Terminales, Tænia semicircularis — s. Transversales Willisii, see Corpus callosum.

STRIATED MUSCULAR FIBRE, see Muscular fibre.

STRIATUS, *Cannelé*, Grooved, see Corpora striata.

STRIBILIGO, Efflorescence.

STRICTURA, Stricture — s. Ani, Stricture of the rectum — s. Intestini recti, Stricture of the rectum — s. Intestini recti spasmodica, Stricture of the rectum, spasmodic — s. Œsophagi callosa, Dysphagia constricta — s. Œsophagi spasmodica, Œsophagismus—s. Pharyngis seu œsophagi vera, Dysphagia constricta — s. Præputii, Phimosis — s. Urethræ, Urethrostenosis—s. Ventriculi, Stricture of the stomach.

STRICTURE, *Strictu'ra*, from *stringere*, *strictum*, 'to tie hard.' *Coarcta'tio, Stegno'sis*, (F.) *Rétrécissement*. A diminution or contracted condition of some tube or duct, as the œsophagus, rectum, urethra, &c. This must be dilated by appropriate bougies. Strictures may, also, occur in the intestines: they are unmanageable, with the exception of those of the rectum, which admit of topical applications.

STRICTURE OF THE ŒSOPHAGUS, Dysphagia constricta — s. of the Pharynx, Dysphagia constricta.

STRICTURE OF THE RECTUM, SPASMOD'IC, *Strictu'ra Intesti'ni Recti spasmod'ica, Obstruc'tio Recti spas'tica*. An affection occurring in the nervous especially, which subsides spontaneously, after a longer or shorter continuance.

Stricture of the rectum, *Strictu'ra Ani* seu *Intesti'ni Recti, Archostegno'ma, Rectosteno'sis, Euthyenterosteno'ma, Archostegno'sis, Archosteno'sis, Proctoëncli'sis, Angusta'tio* et *Restric'tio intestini recti* seu *ani, Stenocho'ria intesti'ni recti, Proctosteno'sis organ'ica*, occurs also organically, and is a very serious affection; being generally dependent upon scirrhus.

STRICTURE OF THE STOMACH, *Gastrosteno'sis, Coarcta'tio* seu *Strictu'ra ventric'uli*. See Gastrostenosis cardiaca, &c.

STRICTURE OF THE URETHRA, Urethrostenosis — s. of the Urinary bladder, Cystostenochoria— s. Vesicæ urinariæ, Cystostenochoria.

STRIDOR DENTIUM, Brygma.

STRIGA CARTILAGINOSA CORDIS, Isthmus of the fossa ovalis.

STRIGIL, *Strig'ilis, Stlen'gis, Stelen'gis*. A flesh-brush. Also, an instrument, anciently used in the baths, for scraping off the sweat.

STRIPED MUSCULAR FIBRE, see Muscular fibre.

STROBILITI'TES, from στροβιλος, *stro'bilus*, 'a cone of the pine.' Wine impregnated with the cones of the pine.

STROEMIA, Cadaba.

STROKE, APOPLEC'TIC. An apoplectic seizure.

STROKE, BACK, OF THE HEART, Impulse, diastolic.

STROKE, PARALYT'IC. A sudden attack of encephalo-spinal paralysis.

STROMA, *Strag'ulum, Stramen'tum*; στρωμα, 'a bed or couch,' from στρωννυω, στρωννυμι, 'to spread out; to cover.' The bed or foundation-texture of an organ,—as the stroma of the ovary. Applied, also, to the bed or base of any deposit — as the 'amorphous stroma' of scrofulous deposits.

STROMBULCUS, Forceps (bullet.)

STRONGLE, Strongylus—*s. Géant*, Strongylus gigas.

STRON'GYLUS, from στρογγυλος, 'round.' Hippocrates, Chabert, and others, mean the *Ascaris lumbricoï'des* by this term. The *Strongylus Gigas, Eustron'gylus gigas, As'caris viscera'lis* seu *renu'lis, Fusa'ria viscera'lis* et *renu'lis*, (F.) *Strongle, S. géant*, is, however, distinct. It has an obtuse, flat head; mouth surrounded with six flattish papillæ: the whole bursa of the male truncated: the tail of the female rounded. It is sometimes met with,—five inches, a foot, a foot and a half, and even three feet long,— and from two lines to half an inch in diameter. It is occasionally found in the human kidney; rarely in other viscera, and still more rarely in the intestinal tube.

STRONGYLUS, Teres.

STROPHOS, Tormina.

STROPHULE, Strophulous.

STROPH'ULUS, *Licheni'asis stroph'ulus, Ebullit''io, Exanthe'ma* seu *Exo''ria strophulus, Red Gum, Red Gown, Tooth Rash, White Gum, Milk-spots*, (F.) *Strophule, Feux de dents*. It consists of an eruption of red, or sometimes

whitish pimples, occurring in early infancy, chiefly about the face, neck, and arms, surrounded by a reddish halo; or interrupted by irregular patches of cutaneous blush. All the varieties under this genus arise in consequence of the extreme vascularity and irritability of the skin at this period of life, when the constitution is liable to be disturbed by irritation, either in the alimentary canal, gums or other parts. None of these eruptions are of any importance, and no medical treatment is usually necessary. If the stomach seem at all disordered, a little rhubarb and magnesia may be administered occasionally. Willan and Bateman reckon five species, — *Strophulus intertinc'tus, Red gum* or *gown; S. albidus, white gum; S. confer'tus, rank red gum, Tooth rash; S. volot'icus* or *Erythe'ma volat'icum*, and *S. cau'didus*.

STROPHULUS SYLVESTRIS, Ignis sylvaticus—s. Volaticus, Ignis sylvaticus.

STROPHUS, Tormina.

STRUCTIO, Structura.

STRUC'TURAL; same etymon as the next. Of, or belonging to, structure.

STRUCTURE, *Structu'ra, Struc'tio, Conforma'tio, Catasceu'ē*, from *struere, structum*, 'to build.' The arrangement of the different tissues or organic elements of which animals and vegetables are composed. See Tissue.

STRUMA, Bronchocele, Scrofula.

STRUMA ADIPO'SA, *Obes'itas colli*. Fatty neck. Prominence of the neck from obesity.

STRUMA FUNGOSA, Encephaloid.

STRUMES, Scrofula.

STRUMEUX, Scrofulous.

STRUMOSIS CEREBRI, Encephalophymata — s. Pulmonum, Tubercles of the lungs.

STRUMOSUS, Scrofulous.

STRUMOUS, Scrofulous.

STRUTHIOPH'AGUS, from *στρουθιον*, 'a young ostrich,' and *φαγω*, 'I eat.' Struthiophagous tribes still exist in some parts of Africa.

STRUTHIUM, Saponaria.

STRUVE'S LOTION FOR HOOPING-COUGH, see Lotion, Struve's, for hooping-cough.

STRYCHNIA, *Strychni'na, Strych'nine, Strychni'num, Strych'nium, Vauqueline, Tet'anine*. An alkaline principle; solid, crystalline, inodorous, bitter, and excessively poisonous, which has been found in *Strychnos nux vomica, S. Colubri'na, S. Tieuté, Igna'tia ama'ra, Cer'bera Theve'tia*, and *C. Aho'vai*. (*Nucis vomicæ* rasur. ℔iv: *calcis* pulv. ℥vj; *acid. muriat.* f℥iij; *alcohol., acid. sulphuric. dil., liquor. ammoniæ, carbon. animal. purif., aquæ*, āā q. s. Digest the nux vomica in two gallons of water, acidulated with a fluidounce of muriatic acid, for 24 hours: then boil for two hours, and strain with expression through a strong linen bag. Boil the residuum twice successively in the same quantity of acidulated water, each time straining as before. Mix the decoctions, and evaporate to the consistency of thin syrup; then add the lime previously mixed with a pint of water, and boil for ten minutes, frequently stirring. Pour the mixture into a double linen bag, and having washed the precipitate well with water, press, dry, and powder it. Treat the powder repeatedly with boiling alcohol, until deprived of its bitterness; mix the liquors, and distil off the alcohol by means of a water-bath. Mix the residue with water, and having applied heat, drop in sufficient diluted sulphuric acid to neutralize and dissolve the strychnia; then add purified animal charcoal; boil for a few minutes, filter, evaporate, and crystallize. Dissolve the crystals in water, and add sufficient solution of ammonia to precipitate the strychnia. Lastly, dry the precipitate on bibulous paper. Ph. U. S.) The action—therapeutical and toxical—of strychnia on man and animals is exactly like that of the alcoholic extract of nux vomica. It is, however, more active. An eighth of a grain is sufficient to kill a large dog: and a quarter of a grain produces marked effects on the human body, when in health. It has been given in paralysis and other cases like the nux vomica. Dose, one-sixteenth to one-twelfth of a grain.

STRYCHNIA, ACETATE OF, Strychniæ acetas — s. Hydriodate of, Strychniæ hydriodas—s. Iodate of, Strychniæ iodas—s. Iodide of, Strychniæ hydriodas.

STRYCH'NIA, I'ODIDE OF IODHYDRATE OF, (F.) *Iodure d'Iodhydrate de Strychnine*, is made by pouring a solution of *ioduretted iodide of potassium* into a solution of a *salt of strychnia*; treating the precipitate with *boiling alcohol*, and crystallizing. Used in the same cases as strychnia. Dose, a tenth to a sixth of a grain.

STRYCHNIA, MURIATE OF, Strychniæ murias — s. Nitrate of, Strychniæ nitras — s. Sulphate of, Strychniæ sulphas.

STRYCHNIA and ZINC, DOUBLE IODIDE OF, Zinc and Strychnia, double iodide of.

STRYCH'NIÆ ACE'TAS, *Strych'nium* seu *Strychni'num ace'ticum, Ace'tas strych'nii* seu *strych'nicus, Ac'etate of Strychnia* or *Strychnine*. This salt is formed by the direct combination of *strychnia* with *acetic acid*. It is given in the same cases as pure strychnia.

STRYCH'NIÆ HYDRI'ODAS, *S. iodhy'dras, Strych'nium hydroïod'icum, Hydri'odas* seu *Iodhy'dros strych'nicus, Hydri'odate* or *Iodide of Strychnia*, is prepared by mixing a solution of *iodide of potassium* with a concentrated solution of *acetate of strychnia*.

STRYCH'NIÆ I'ODAS, *Strychni'næ Iodas, Strychni'na Ioda'ta, Strych'nium* seu *Strychni'num Iod'icum, Iodas Strych'nii* seu *Strych'nicus, Iodate of Strych'nia* or *Strychnine*. This salt may be formed by adding a concentrated solution of *iodic acid* to *strychnia*; treating with *boiling alcohol*; filtering, and leaving it to spontaneous evaporation.

STRYCH'NIÆ MU'RIAS, *Mu'riate of Strychnia*. (The product of the union of *muriatic acid* and *strychnia*.) Used in the same cases as strychnia.

STRYCHNIÆ NITRAS, *Strych'nium ni'tricum, Nitrate of Strychnia* or *Strychnine*, (F.) *Nitrate* ou *Azotate de Strychnine*. (The product of the union of nitric acid and strychnia.) Used in the same cases as strychnia.

STRYCH'NIÆ SULPHAS, *Strych'nium sulphu'ricum, Sulphate of Strychnia* or *Strychnine*. Has the same properties.

STRYCHININA, Strychnia.

STRYCHNINE, Strychnia — s. Azotate of, Strychniæ nitras.

STRYCHNINUM, Strychnia.

STRYCHNISM, see Strychnos nux vomica.

STRYCHNIUM, Strychnia — s. Aceticum, Strychniæ acetas—s. Nitricum, Strychniæ nitras — s. Sulphuricum, Strychniæ sulphas.

STRYCHNOS, Solanum dulcamara — s. Colubrina, see Strychnia, and S. Nux vomica—s. Guianensis, see Curare — s. Ignatii, Ignatia amara.

STRYCHNOS NUX VOM'ICA, *Nux Vomica, Metel'la, Caniram, Koochla tree. Nat. Ord.* Loganiaceæ. *Sex. Syst.* Pentandria Monogynia. (F.) *Vomiquier*. A tree of the family *Strychnōides*, which grows in India, and the seeds of which have been long sold in the shops, under the names, *Nux Vomica, Vomic* or *Poison nut, Bachelors' buttons*, &c., (F.) *Noix vomique*. For a long time, these seeds were used only for poisoning rats; but subsequently an alcoholic extract was prepared from them, which has been administered in paralytic affections, in small doses. Dose of the *Alcoholic Extract, Extrac'tum nucis*

vom'icæ spirituo'sum seu *nucis vomicæ resino'sum* seu *nucis vom'icæ alcohol'icum*, (F.) *Extrait alcoholique de noix vomique*, one or two grains. It produces a kind of tetanic convulsion in the paralyzed parts, when given to the requisite extent. It has, also, been administered in chronic diarrhœa and dysentery. When taken to such an extent as to induce toxical phenomena — *Strychnism* — it causes, at first, or when given in a smaller dose, greatly augmented excitability of the spinal nervous system, with slight transient paroxysms of spasms of the limbs, and hurried respiration. In larger doses, the excitability is still more developed, with paroxysms of prolonged general tetanic convulsions, laryngismus or contraction of the glottis, violent efforts of respiration, apoplexy, and asphyxia.

The following is the formula for the preparation of the Extrac'tum Nucis Vom'icæ of the Pharm U. S. Take of *Nux vomica*, ℔j; *Alcohol*, a sufficient quantity. Expose the Nux Vomica to steam till it is softened; then, having sliced and dried it, grind it into powder. Introduce it into an apparatus for displacement, and pour alcohol upon it gradually, until the liquid passes without bitterness. Distil off the greater part of the alcohol from the filtered liquor, and evaporate the residue to the proper consistence.

The bark is the *false angustura* or false *cusparia bark; Rohun.* See Brucea antidysenterica.

The wood of Strychnos Colubri'na, *Modira caniram*, an Indian tree, which contains strychnia, was formerly considered a specific against the bites of venomous animals; and was recommended by Boerhaave in intermittents. It is the *Lignum Colubri'num*, (F.) *Bois de Couleuvre.*

Under the names στρυχνη, and στρυχνος, different kinds of nightshade are described by Dioscorides.

Strychnos Ignatii, Ignatia amara.

Strychnos Potato'rum, *Clearing nut.* The fruit of a large tree of Silhet, which, when ripe, is sold in the markets of India, and has been introduced into those of London, under the name *Nirmullees* or *Nirmillies.* One of them is well rubbed for a minute or two around the inside of a vessel containing water, which it purifies by causing the impurities, which the fluid contains, to be deposited through its albumen and casein it is supposed.

Strychnos Pseudoqui'na, *Quina do Campo*, of Brazil, is used by the natives as a substitute for cinchona.

Strychnos Tieuté, see Strychnia, and Upas—s. Toxicaria, see Toxifera, and Curare.

STRYPHNA, Astringents.

STRYPHNOS, Acerb.

STUDIOSUS MEDICINÆ, Philiatros.

STUDIUM INANE, Aphelxia otiosa.

STUDY, BROWN, Aphelxia otiosa.

STUFF, see Medicament.

STUFFING, Cynanche trachealis.

STULTITIA, Fatuitas.

STUMP, (G.) Stumpf. (D.) *Stomp*, 'a stump;' also, 'blunt.' (F.) *Moignon.* The part remaining from which a limb or other part has been amputated or removed in any manner. Also, the portion of a tooth remaining in the alveolus, after the corona has been removed, (F.) *Chicot.*

STUMPFOOT, Kyllosis.

STUNNED. Old French, *Estonné*, (F.) *Étonné*, (L.) *attonitus*, 'astonished.' An epithet, applied to one who, in consequence of a fall or other accident, has received such a concussion of the brain as to deprive him, for a time, of his mental manifestations.

STUPA, στυπη, *Stupha*, *Stuppa*, στυππη, *Stupei'on.* Tow, used in certain surgical apparatuses and dressings, (F.) *Étoupe.* Also, a *Stupe*, that is, cloth or tow used in fomentations. A flannel or other article wrung out of hot water, plain or medicated, applied to a part, is a *stupe.* The act of applying such stupe is called *stuping.*

STUPE, Stupa.

STUPEFACIENTIA, Narcotics.

STUPÉFACTIFS, Narcotics.

STUPEFACTIO, Narcosis.

STUPÉFIANTS. Narcotics.

STUPEION, Stupa.

STUPEUR, Stupor.

STUPHA, Stove, Stupa.

STUPIA, Tin.

STUPIDITAS, Idiotism, Imbecility.

STUPING, see Stupe.

STUPOR, *Ecplex'is, Ecplex'ia, Consterna'tio*, (Sc.) *Swarff, Swerf*, (F.) *Stupeur*, from *stupere*, 'to be stupefied.' Diminished activity of the intellectual faculties, often amounting to lethargy. It occurs in many affections, especially in the neuroses.

Stupor, Narcosis—s. Artuum, Obdormitio — s. Dentium, Hæmodia — s. Formicans, Formication — s. Mentis, Fatuitas — s. Vigilans, Catalepsy.

STUPPE, Stupa.

STUPRATION, Stuprum.

STUPRUM, *Rape, Stupra'tion*, (F.) *Défloration, Viol.* Forcible and illicit enjoyment of a married or unmarried female. When committed upon the latter, which is most commonly the case, it is also called, *Deflora'tion, Deflora'tio, Devirgino'tio, Vitia'tio, Apanthis'mus*, &c. In judging whether rape has been committed under such circumstances, the state of the genital organs; the age of the individual; and the possibility of accidents and diseases of the parts, will have to be considered. It will be necessary, also, to be acquainted with the evidences of virginity; and to determine,—if signs of virginity no longer exist, — whether its loss be attributable to copulation, or to the introduction into the vagina of any other body than the male organ, &c. *Recent deflowering* can, of course, be much more readily distinguished than that which has taken place some time.

STUTTERING, Balbuties.

STYAN, Hordeolum.

STYE, Hordeolum.

STYGMATES. M. J. Cloquet has proposed this word, or *Stigmates*, from στιγμα, 'a mark,' to designate the marks, in form of cicatrices, which remain on the peritoneum after the obliteration of the neck of a hernial sac. They are, commonly, radiated folds, of a whitish appearance, more or less thick, and of a fibrous or fibro-cartilaginous nature.

STYLET. Specillum.

STYLI, Styloid processes.

STYLIFORM, Styloid.

STYLO, in composition, relating or belonging to the styloid process of the temporal bone.

STYLO-CERATOIDES, Stylo-hyoideus — s. Cerato-hyoideus, Stylo-hyoideus.

STYLO-CHONDRO-HYOÏDEUS. A name given, by Douglas and Albinus, to a fleshy fasciculus which the stylo-hyoid muscle sometimes presents, and which is attached to the lesser cornu of the os hyoides. It is the same fasciculus which Santorini calls *Stylo-hyoï'des novus, Stylo-hyoïdeus alter.*

STYLO-GLOSSUS. A muscle situate at the anterior and superior part of the neck. It is narrow behind, much broader before; is attached to the styloid process of the temporal bone, and to the stylo-maxillary ligament; and is inserted into the side of the tongue. It raises the base of the tongue and carries it backwards.

STYLO-HYOÏDEUS, *Stylo-cer'ato-hyoïdeus, Stylo-ceratoï'des, Stylo-hyoïdes major,* (F.) *Stylo-hyoïdien.* A muscle, situate at the superior, anterior, and lateral part of the neck. It is thin and narrow, — especially posteriorly: anteriorly, it opens to give passage to the tendon of the digastricus. It is attached to the styloid process of the temporal bone, and to the body of the os hyoides. It raises the os hyoides, and carries it backwards.

Stylo-hyoid Ligament is a fibrous, flattened cord, which passes from the styloid process to the lesser cornu of the os hyoides.

Stylo-hyoid Nerve is the second branch given off by the facial nerve.

STYLOID, *Sty'liform, Styloï'des, Graphioï'des, Graphoï'des, Graphio'des, Graphidoï'des, Belono'des,* from στυλος, 'a style,' 'a peg,' 'a pin,' and ειδος, 'shape.' Shaped like a peg or pin.

Styloid Cornua, see Hyoides os.

Styloid Proc''esses, *Pencil-like Processes, Proces'sus Beloïdes* seu *Belemnoïdes* seu *Belonoïdes* seu *Graphioïdes* seu *Graphoï'des, Styli,* are, 1. A long and slender process of the temporal bone, to which are attached the stylo-glossus, stylo-pharyngeus, and stylo-hyoideus muscles, and the stylo-hyoid and stylo-maxillary ligaments. 2. Two slender and pyramidal processes at the inferior extremities of the radius and ulna.

STYLO-MASTOID, *Stylo-mastoïdeus.* That which relates to the styloid and mastoid processes.

Stylo-mastoid Artery arises from the posterior auricular, and, in some subjects, from the occipital. It enters the stylo-mastoid foramen; passes along the aqueduct of Fallopius, and spreads its ramifications on the mucous membrane of the tympanum, and in the mastoid cells, and semi-circular canals; and terminates by anastomosing with a branch of the *Arteria meningæa media,* which enters by the *Hiatus Fallopii.* Murray has given the name—*Stylo-mastoid* — to the posterior auricular artery itself.

Stylo-Mastoid Fora'men, *Foramen Stylo-mastoïdeum* seu *Aquæduc'tûs Fallo'pii,* (F.) *Trou anonyme,* is situate at the inferior surface of the petrous portion of the temporal bone, between the styloid and mastoid processes. It terminates the aqueduct of Fallopius, and gives passage to the facial nerve.

STYLO-MAX'ILLARY, *Stylo-maxilla'ris.* That which relates to the styloid processes and jaw.

The Stylo-Maxillary Ligament is a ligamentous, flat cord, extending between the styloid process and the angle of the jaw.

STYLO-PHARYNGEUS, (F.) *Stylo-thyro-pharyngien.* A muscle, situate at the anterior and lateral part of the neck. It is slender; thin above; attached to the styloid process of the temporal bone, and terminates in the parietes of the pharynx, as well as at the posterior margin of the thyroid cartilage. It raises the pharynx and carries it backwards. Professor Chaussier has united, under the name *Stylo-pharyngien,* the three constrictor muscles of the pharynx, the stylo-pharyngeus, and palato-pharyngeus.

STYLOPH'ORUM DIPHYL'LUM, *Meconop'sis diphyl'la, Chelido'nium diphyl'lum, Cel'andine* or *Horn Poppy, Bruise root.* An indigenous plant, of the *family* Papaveraceæ, growing from western Pennsylvania to Wisconsin, which flowers from May to August. The juice is fetid and narcotic. Infused in wine, it has been given internally in gravel; and has been applied externally to contusions, &c.

STYLO-THYRO-PHARYNGIEN, Stylo-pharyngeus.

STYLUS, Sound.

Stylus Excava'tus, *Specil'lum excava'tum.* A hollow sound.

STYMA, Erection, Priapismus.

STYMATOSIS, Stimatosis.

STYM'MATA, from στυμμα, στυμματος, 'that which constricts or thickens.' The most solid ointments. Also, the ingredients proper for increasing their consistence.

STYPSIS, Astriction, Constipation.

STYPTERIA, Alumen, Styptics.

STYPTIC, see Styptics.

Styptic, Binelli's, Aqua Binellii — s. Brocchieri's, Aqua Brocchierii.

Styptic, Eaton's. A name first given to *Helvetius's Styptic,* when introduced into Great Britain. It is now usually made of *calcined green vitriol,* ℥j; *proof spirit,* tinged with a little oak bark, Oij.

Styptic, Helvetius's, see Ferrum tartarizatum, and Styptic, Eaton's.

Styptic, Pagliari's, Hæmostatic, Pagliari's.

Styptic, Ruspini's, *Liquor Stypt'icus Ruspini.* A nostrum, said to consist of *gallic acid,* a small quantity of *sulphate of zinc* and *opium,* dissolved in a mixture of *alcohol* and *rose-water,* which has had much reputation as an internal and external astringent.

Styptics, *Contrahen'tia, Constricti'va Medicamen'ta, Constringen'tia, Anastal'tica, Catastal'tica, Stypte'ria,* (F.) *Styptiques,* from στυπω, 'I constringe.' Sometimes used synonymously with astringent, but generally applied to a substance employed to arrest hemorrhage, — *Enæ'mon.* A *mechanical styptic* is one that arrests the flow of blood, by being applied immediately to the mouth of the bleeding vessel, or by inducing a coagulum, *mechanically,* in it. A *chymical styptic* is one which coagulates, *chymically,* the blood around a bleeding orifice.

STYRAC''INUM O'LEUM. Oil obtained by boiling storax in good olive oil.

STYRAX, στυραξ. A resin obtained from *Styrax officina'lis* and *S. calami'ta.* It is the *solid storax; — officinal storax.* There are two kinds of storax met with: 1. *Red Storax, Gum Storax, Thus Judæo'rum, Styrax rubra, Sty'racis bal'samum, Balsamum styracis officinalis,* which is obtained by incision from the *Styrax officina'lis,* and perhaps from the *Liquidam'bar Orienta'lis.* The purest is in tears; but it has lost some of its smell in drying. 2. *Common Storax, Styrax calami'ta.* That which has been received in reeds or vessels, and has had saw-dust added immediately to thicken it. The odour of storax is fragrant; the taste aromatic. It is considered, like the other balsams, to be stimulant and expectorant, but is rarely used long.

Pu'rified Storax, *S. cola'ta* seu *purifica'ta, S. præpara'ta, Extractum sty'racis,* is prepared by dissolving storax in alcohol; straining the solution; then distilling off the alcohol with a gentle heat, until the storax acquires the proper consistence. — Ph. U. S. Dose, gr. x to xxx.

Styrax Alba, see Myroxylon Peruiferum — s. Benzoin, see Benjamin — s. Calamita, see Styrax —s. Liquida, Liquidambar styraciflua — s. Officinalis, see Styrax.

STYSIS, Erection, Priapismus.

SUAVEOLENS, Beneolens.

SUB. A common Latin prefix, often signifying 'beneath,' or 'a lower degree.'

SUBACIDUS, Acidulous.

SUBAC'TIO, *Chiro'sis, Cheiro'sis,* from *subigo, subactum,* (*sub,* and *ago*), 'to subject, to prepare.' The operation of making plasters, extracts, &c., with the hand, or with the pestle and mortar.

SUBAFFECTIO, Hydropathia.

SUBAGITATRIX, *Tribade.*

SUB-ATLOÏDEUS, *Infra-atloïdeus,* (F.) *Sous-atloïdien.* That which is situate beneath the

atlas or first cervical vertebra. Chaussier has given this name to the second pair of cervical nerves.

SUB-AXOÏDEUS, *Infra-axoïdeus*, (F.) *Sous-axoïdien*. That which is below the *axis* or *vertebra dentata*. Chaussier has given this name to the third pair of cervical nerves.

SUBAZOTAS BISMUTICUS, Bismuth, subnitrate of.

SUBBORAS NATRICUM, Borax.

SUBCARTILAGINEUM, Hypochondre.

SUBCLA'VIAN, *Subcla'vius, Subclavicula'ris*, from *sub*, and *clavis*, 'the clavicle.' That which is under the clavicle.

SUBCLAVIAN ARTERIES, (F.) *Artères sous-clavières*, are situate at the upper part of the chest, and the lateral and lower parts of the neck. The right arises at the corresponding side of the trachea, and comes off from the arteria innominata or brachio-cephalic trunk. The left leaves the aorta at the end of the arch. Both extend as far as the superior surface of the first rib, in the space between the scaleni muscles, beyond which they take the name *axillary arteries*. The subclavian arteries run, for some distance, without sending off any branch. In the neighbourhood of the first rib, however, they give off, 1. *Upwards*, the *vertebral* and *inferior thyroideal*. 2. *Downwards*, the *internal mammary* and *superior intercostal*. 3. *Outwards*, the *transverse cervical* or *posterior scapular*, the *superior scapular*, and the *posterior cervical* or *profunda*.

SUBCLAVIAN or SUBCLAVIUS MUSCLE, *Subclavia'nus*, (F.) *Costo-claviculaire* (Ch.), *Sous-clavier*, is situate at the superior and anterior part of the chest. It is attached, by its inner extremity, to the superior surface of the cartilage of the first rib; and by its superior margin and outer extremity to the inferior surface of the clavicle. This muscle depresses the clavicle, and carries it forward. When the shoulder is fixed, it can raise the first rib.

SUBCLAVIAN VEINS, (F.) *Veines sous-clavières*, are continuations of the axillary, and extend from the inferior extremity of the scalenus anticus, in front of which they pass, to the vena cava superior, which they form by their union. The right subclavian vein is very short; the left, longer and broader. These veins receive the mouths of the internal and external jugulars, vertebral and superior intercostal. The left subclavian receives two veins more than the right,—the left internal mammary and left inferior thyroid. The thoracic duct opens into the left subclavian:—the corresponding great lymphatic vessel into the right.

SUBCLAVIC'ULA, from *sub*, and *clavicula*, 'the clavicle.' The first rib.

SUBCLAVICULARIS, Subclavian.

SUBCLAVIUS, Subclavian muscle.

SUBCRUEN'TUS, 'somewhat bloody;' from *sub*, and *cruentus*, 'bloody;' *Hyphæ'mos*. That which has the colour and nature of blood. An epithet given to certain excreted substances, which are mixed with blood, or have the appearance of blood.

SUBCRURÆI, see Crureus.

SUBCUTA'NEOUS, *subcuta'neus*, from *sub*, and *cutis*, 'the skin;' *Intercuta'neus*, (F.) *Sous-cutané*. That which is placed immediately under the skin.

SUBCUTANEOUS SECTION, Hypodermatomy.

SUBCUTANEUS COLLI, Superficialis colli — s. Malæ (Nervus), Orbitar nerve.

SUBDELIRIUM, Typhomania.

SUB'DITA, *Subditi''ia*, from *subdere*, (*sub*, and *dare*,) 'to put under;' *Pros'theta*. Medicines introduced into some one of the natural apertures; — as suppositories, pessaries, &c.

SUBDITITIA, Subdita.

SUBDUCTIO, Dejection.

SUBER, *Cork*:—the bark of the *Quercus Suber* or *Cork Tree*, (F.) *Liége*. *Family*, Amentaceæ. *Sex. Syst.* Moncœcia Polyandria. Cork, when burnt, is applied as a mechanical styptic to bleeding piles, &c. Surgeons use it for making tents; and it has been recommended to be worn as an amulet to suppress the secretion of milk!

SUBETH, Coma.

SUBFRONTA'LIS SUTU'RA, from *sub*, and *frons, frontis*, 'the forehead.' A suture resulting from the articulation of the os frontis with the nasal process of the superior maxillary bone, and the proper bones of the nose.

SUBGRONDATION, Depression.

SUBHUMERATIO, Catomismos.

SUBIGITATRIX, Tribas.

SUBINFLAMMATIO, Subinflammation — s. Hepatis, Hepatitis, chronic.

SUBINFLAMMA'TION, *Subinflamma'tio*, from *sub*, and *inflammatio*. *Inflammatium'cula*, *Hypophlegma'sia*. A mild degree of inflammation, so slight as hardly to deserve the name *inflammation*. Broussais understood by the term, an augmentation in the vital phenomena of the vessels that convey white blood. There are, however, no such vessels. Lymphatic engorgements, scrofula, herpes, and cancer he considered subinflammations.

SUBINTRAN'TES FEBRES, from *sub*, and *intrare*, 'to enter.' *Communican'tes fe'bres*. Fevers primarily intermittent, whose paroxysms approximate, so that one paroxysm begins before that which preceded it has gone through its stages. — L. Bellini.

SUBJECTIVE SENSATIONS, see Sensation.

SUBJEE, Bangue.

SUBLIGACULUM, Truss.

SUBLIGATURA, Truss.

SUBLIMAMENTUM, Enœorema.

SUBLIMATE, CORROSIVE, Hydrargyri oxymurias.

SUBLIMA'TION, *Sublima'tio*, *Meteoris'mus*, *Hypso'sis*, from *sublimis*, 'exalted.' An operation by which dry and solid matters are volatilized and condensed at the upper part of a subliming apparatus. Calomel, sal ammoniac, &c., are commonly obtained by sublimation. The product of sublimation is a *Sub'limate*, *Sublima'tum*, (F.) *Sublimé*.

SUBLIMATUM CORROSIVUM, Hydrargyri oxymurias.

SUBLIMATUS CORROSIVUS, Hydrargyri oxymurias.

SUBLIME, Sublimis.

SUBLIMÉ, Enœorema, see Sublimation — s. *Corrosif*, Hydrargyri oxymurias.

SUBLI'MIS, (F.) *Sublime*, 'high, elevated, superficial.' Anatomists have given the name *sublimis* to certain muscles, which are situate more superficially than their kindred muscles. These last they have called *profundi*. Of the former, the *flexor sublimis digitorum* is an example.

The French use the term *respiration sublime* for the respiration which is accompanied by considerable elevation of the ribs, and with separation of the alæ nasi at the time of inspiration.

SUBLINGUA, Uvula.

SUBLIN'GUAL, *Sublingua'lis*, (F.) *Sous-lingual*, from *sub*, and *lingua*, 'the tongue.' That which is seated under the tongue.

SUBLINGUAL ARTERY, with some, is the *Lingual*. With others, it is a branch given off by the lingual opposite the genio-glossus muscle, which is distributed particularly to the sublingual gland, to the mylo-hyoid, and genio-glossus muscles, &c.

SUBLINGUAL GLAND, *Glan'dula sublingua'lis* seu *Bartholinia'na* seu *Rivinia'na*, is seated in the substance of the inferior paries of the mouth,

beneath the anterior part of the tongue. It is smaller than the submaxillary, of which it frequently seems to be only a prolongation. It is oblong, flattened, amygdaloid, and is covered by the mucous membrane of the mouth, beneath which it projects. This gland has 10 or 12 excretory ducts — *Ductus Rivinia'ni* seu *Walthe-ria'ni*—some of which open beneath the frænum linguæ, joining Wharton's duct, whilst others pierce the mucous membrane of the mouth separately. It has the same structure as the parotid.

SUBLINGUIUM, Uvula.

SUBLINGUUM, Epiglottis.

SUBLOB'ULAR, *Sublobula'ris;* from *sub*, and *lobus*, 'a lobe,' *lobulus*, 'a little lobe.' That which is placed under a lobe.

Sublobular Veins of the Liver. The veins in which the intra-lobular veins terminate. By their union, the sublobular veins form the hepatic veins.

SUBLUXATIO, Sprain.

SUBMAM'MARY, *Submamma'rius*, (F.) *Sous-mammaire*, from *sub*, and *mamma*, 'the breast.' Under the mamma or breast: — hence, '*submammary* inflammation,' inflammation of the areolar tissue beneath the mamma.

SUBMAX'ILLARY, *Submaxilla'ris*, *Infra-maxilla'ris*, (F.) *Sous-maxillaire*, from *sub*, and *maxilla*, 'the jaw.' That which is seated beneath the jaw.

Submaxillary Ganglion is a small nervous ganglion, situate opposite the gland. It seems to be formed by the superior branch of the Vidian nerve, and communicates with the lingual nerve of the inferior maxillary. Its filaments form a plexus which penetrates the submaxillary gland.

Submaxillary Gland, *Max'illary Gland*, *Hypoguth'aden*, *Hyposial'aden*, is a salivary gland, less than the parotid, seated at the inner side of the ramus and body of the inferior maxillary bone, in the triangular space between the two bellies of the digastricus. Irregularly ovoid, and flattened on three surfaces, it has the same aspect and organization as the other salivary glands. Its excretory duct is called *Wharton's Duct*, and terminates at the side of the frænum linguæ, by a very small orifice. It is also called *Ductus inferior*.

SUBMEN'TAL, *Submenta'lis*, (F.) *Sousmental*, from *sub*, and *mentum*, 'the chin.' Situate under the chin.

Submental Artery is furnished by the facial, near the base of the jaw. It passes forwards along the attachment of the mylo-hyoideus, to which it furnishes branches that cross it to anastomose with those of the sublingual. Near the median line it bifurcates, to be distributed to the chin and muscles of the infra-hyoid region.

Submental Vein, which accompanies the artery, opens into the labial.

SUBMERSION, *Submer'sio*, from *sub*, and *mergere*, *mersum*, 'to plunge.' The act of plunging, or being entirely plunged, in a liquid.

Asphyxia by submersion, *A. Immerso'rum*, *Drowning*, is not owing to a certain quantity of liquid being introduced into the alimentary or air-passages; but simply to the interception of air, and of the respiratory phenomena. It is a case of suffocation, the signs of which, on dissection, are equivocal, without circumstantial evidence.

SUBMISSIO, Remission — s. Cordis, Systole.

SUBMU'COUS, *Submuco'sus;* from *sub*, and *mucus*. Under a mucous membrane, — as the '*submucous* areolar tissue.'

SUBMURIAS AMMONIACO-HYDRARGYRICUS, Hydrargyrum præcipitatum.

SUBMUS'CULAR, *Submuscula'ris;* from *sub*, and *musculus*, 'a muscle.' Seated beneath muscles or a muscular layer.

SUBOCCIP'ITAL, *Suboccipita'lis;* from *sub*, and *occiput*. That which is situated under the occiput.

Suboccip'ital Nerve, Occipital nerve.

SUBOR'BITAR, *Suborbita'rius*, *Infra-or'bitar*, *Infra-orbita'lis*, *Infra-orbita'rius*, (F.) *Sous-orbitaire*, from *sub*, and *orbita*, 'the orbit.' That which is seated beneath the orbitar cavity.

Suborbitar Artery, *Infra-orbitar A.*, proceeds from the internal maxillary, from which it separates near the anterior and superior part of the zygomatic fossa. It enters the infra-orbitar canal, and passes through it, giving branches to the anterior and superior dental canal; issues by the foramen infra-orbitarium; and divides, in the fossa canina, into a number of branches, which lose themselves in the neighbouring parts. The infra-orbitar vein follows the same course.

Suborbitar Canal, *Infra-orbitar Canal*, (F.) *Canal* ou *Conduit sous-orbitaire*, is a small canal, which runs obliquely through the substance of the inferior paries of the orbit. It begins, behind, by a simple gutter, and divides, anteriorly, into two branches, one of which descends into the anterior paries of the maxillary sinus, whilst the other passes out, in the canine fossa, by an orifice, called *Foramen-infra-orbitarium*, (F.) *Trou sous-orbitaire*. The infra-orbitar artery and nerve pass along it.

Suborbitar Fissure, *Infra-orbitar Fissure*, *Fissu'ra infra-orbita'lis*, *Rima cana'lis orbita'rii*. A fissure in the superior maxillary bone; the superior commencement of the suborbitar canal.

Suborbitar Fossa, Canine fossa.

Suborbitar Nerves, *Infra-orbitar Nerves*, seem to terminate the superior maxillary. They issue from the infra-orbitar canal by the foramen of the same name, and spread out in a radiated manner in the fossa canina, to divide into *superior* or *palpebral filaments*, *inferior* or *labial*, *internal* or *nasal*, and *external* or *buccal*.

SUBPERITONE'AL, *Subperitonea'lis;* from *sub*, and *peritoneum*. That which lies under the peritoneum.

Subperitoneal Aponeurosis, Fascia, subperitoneal — s. Ganglia, see Spermatic ganglion.

SUBPLACENTA, Decidua membrana.

SUBPOPLITÆUS, Poplitæus muscle.

SUBPUBIC ARCH, *Arcus subpu'bicus*, from *sub*, and *pubis*. A strong arch of the superior pelvic aponeurosis, which completes the posterior orifice of the obturator or subpubic canal.

Subpubic Membrane, Obturator membrane.

SUBPUBIO-FEMORALIS, Abductor brevis — s. Prostaticus, Compressor prostatæ.

SUBPURATIO, Suppuration.

SUBPUTRIS, Hyposaprus.

SUBSCAP'ULAR, *Subscapula'ris*, (F.) *Sous-scapulaire*, *Sous-scapulo-trochinien*, from *sub*, and *scapula*, 'the shoulder-blade.' That which is beneath the scapula.

Subscapular Fossa, *Fossa Subscapula'ris*. A considerable excavation at the anterior surface or venter of the scapula, in which the subscapularis is seated.

Subscapular Muscle, *Subscapula'ris Muscle*, *Immer'sus*, *Infra-scapula'ris*, (F.) *Sous-scapulo-trochinien* (Ch.), *Porte-feuille*, *Muscle-sous-scapulaire*. A muscle situate in the above-mentioned fossa. It is flat, broad, and triangular; is attached, by its base, to the subscapulary fossa and to the anterior lip of the edge of the spine of the scapula, and is inserted into the lesser tuberosity of the humerus. It carries the arm in rotation inwards. It can also depress it, and bring it towards the body.

Subscap'ular Nerves are two in number.

One arises from the brachial plexus above the clavicle; the other from the posterior aspect of the plexus within the axilla. They are distributed to the subscapularis muscle.

SUBSE'ROUS, *Subsero'sus;* from *sub*, and *serous*. Under a serous membrane,—as the '*subserous* areolar tissue.'

SUBSIDENTIA, Sediment.

SUBSTANCE ÉMAILLÉE DES DENTS, Enamel of the teeth — s. Horny, see Tooth.

SUBSTANCE, HYALINE, Cytoblastema — s. Intercellular, Cytoblastema — *s. Vitrée des Dents,* Enamel of the teeth.

SUBSTANCE, WHITE, OF SCHWANN. A hollow cylinder within the tubular nervous fibre, which differs in composition and refracting power from the matter that occupies the centre of the tube.

SUBSTANTIA ADAMANTINA DENTIUM, Enamel.

SUBSTAN'TIA FERRUGIN'EA, *Locus cine'reus.* An ash coloured substance, produced by the existence of well marked pigmentary matter in the floor of the fourth ventricle or *rhomboid fossa.*

[redacted]ANTIA FILAMENTOSA DENTIUM, Enamel—[redacted]a Centralis, see Medulla spinalis—s. Hy[redacted]ina, Cytoblastema — s. Nigra pedunculi, see Peduncles of the brain — s. Ossea dentium, see Tooth — s. Ostoidea, see Tooth — s. Perforata anterior, Locus perforatus anticus.

SUBSTANT'IA PERFORA'TA ME'DIA. When the pia mater has been removed from the space between the crura cerebri, termed the *intercru'ral* or *interpedunc'ular,* the surface appears cribriform from the perforations of the numerous minute vessels which penetrate it. This is the *substan'tia perfora'ta me'dia* of Vicq d'Azyr.

SUBSTANTIA PERFORATA POSTERIOR, see Tarini pons—s. Pulposa Dentis, Dental pulp—s. Radiata, Stellulæ Verheyenii—s. Rhomboidea, Corpus dentatum—s. Spongiosa Urethræ, Corpus spongiosum urethræ — s. Stellata serpentina, Stellulæ Verheyenii — s. Vitrea dentium, Enamel of the teeth — s. Vitrea, Cytoblastema — s. Vitrea dentium, Enamel.

SUB'STANTIVE, *Substanti'vus;* from *substare,* (*sub,* and *stare,*) 'to stand under or subsist.' An epithet applied by Dr. Paris to aliments which are nutritious, in contradistinction to *adjective* aliments, which are themselves not possessed of nutritive virtues, but impart to the digestive organs greater energy, so as to enable them to extract more nutriment from the substantive aliments. Meat, for example, is a *substantive* aliment: the condiment, as mustard, eaten with it, an *adjective* aliment.

SUBSTILLUM, Stillicidium.

SUBSULTIO, Palpitation.

SUBSUL'TUS TEN'DINUM, *Saltus ten'dinum, Clonus subsultus, Subsultus, Carpholog''ia spasmod'ica, Myopal'mus, Twitching of the Tendons,* (F.) *Soubresaut,* from *subsilio, subsultum,* (*sub* and *salio,*) 'to make short leaps.' Twitching, communicated to the tendons by the involuntary and instantaneous contraction of the muscular fibres. It is more observable at the wrist than elsewhere; and is an evidence of great cerebral irritability, and debility, when it occurs at an advanced period of fever.

The muscular agitations or twitchings observed in febrile diseases, especially of children, have been termed *Convulsibil'itas, Sclerotyr'bē febri'lis,* and *Irritabil'itas morbo'sa.*

SUBSURDITAS, Deafness.

SUBU'BERES, from *sub,* and *ubera,* 'the breasts.' *Infan'tes sugen'tes, Sucking children.* Infants at the breast, in contradistinction to *Exu'beres, ἀπογαλακτοι,* or those which have been weaned.

SUBUN'GUIAL, *Subun'gual, Subun'guical,* (F.) *Sous-ungéale,* from *sub,* and *unguis,* 'a nail.' Belonging to parts under the nail; — as *subunguial exostosis,* (F.) *Exostose sous-ungéale,* an exostosis under the nail of the great toe especially.

SUBVERSIO STOMACHI, Vomiturition.

SUBVERTEBRA, Sacrum.

SUBVERTEBRUM, Sacrum.

SUBVOLA, Hypothenar.

SUC, Succus — *s. de Citron,* see Citrus medica — *s. Gastrique,* Gastric juice—*s. de Kino,* Kino—*s. Médullaire,* Marrow — *s. du Limon,* see Citrus medica—*s. Nourricier,* Liquor sanguinis—*s. Pancréatique,* see Pancreas.

SUCCA'GO, from *succus,* 'juice.' The inspissated juice of plants; robs, jellies, &c.

SUCCÉDANÉ, Succedaneum.

SUCCEDA'NEUM, *Succeda'neum, Substitu'tum, Antiballom'enum, Surroga'tum, Antemballom'enum, Quid pro quo,* from *succedere,* (*sub,* and *cedere,*) 'to go under, to come in place of another.' (F.) *Succédané.* An epithet for medicines that may be substituted for others possessing similar properties. Also, used, in dentistry, for an amalgam for filling teeth.

SUCCENTURIA'TUS, from *succenturiare,* (*sub,* and *centuria,*) 'to supply a soldier to fill a vacancy;' and hence, 'to substitute or put in the room of.' That which is a substitute for another; as Renes *succenturiati,* Ventriculus *succenturiatus,* &c.

SUCCHAR, Saccharum.

SUCCIDANEUM, Succedaneum.

SUCCIN, Succinum.

SUCCINCTURA, Diaphragm.

SUCCINCTUS, Diaphragm.

SUCCINI RESINA, Musk, artificial.

SUCCIN'IC ACID, *Ac''idum Su'cini, A. Succin'icum, Acor Succin'eus, Sal Succini, Sal volat'ilē Succini,* has been considered antispasmodic and diaphoretic, in the dose of from five to twenty grains.

SUC'CINUM, *Elec'trum, Ambra, Ambram, Ampar, Bereni'cē, Amber, Yellow Amber,* (F.) *Succin, Ambre jaune,* from *succus,* 'juice,' because at one time supposed to exude from a tree. This kind of fossil resin, which is found on the shores of the Baltic, is composed of a resinous matter, of essential oil, and an acid *sui generis.* It is inodorous, except when heated or rubbed; insipid; in fragments of a pale golden-yellow colour, transparent, and has a shining lustre. S. g. 1·08; insoluble in water, and slightly acted on by alcohol. It is used for affording its essential oil — the *Ol'eum* seu *Bal'samum Suc'cini,* (F.) *Huile de Succin.* This oil possesses stimulant, antispasmodic, diuretic, and rubefacient properties.

The *Ol'eum Suc'cini rectifica'tum, Rectified Oil of Amber,* is made as follows:—*Oil of Amber,* Oj; *water,* Ovj. Mix in a glass retort, and distil until Oiv of the water have passed with the oil into the receiver; separate the oil from the water, and keep it in well-stopped bottles.—(Ph. U. S.)

The *White amber, Leucelec'trum,* (F.) *Ambre blanc,* is a variety.

SUCCINUM CINEREUM, Ambergris — s. Griseum, Ambergris.

SUCCION, Sucking.

SUCCISA, Scabiosa succisa — s. Pratensis, S. succisa.

SUCCOCOLLATA, Chocolate.

SUCCOLATA, Chocolate.

SUCCORY, WILD, Cichorium intybus, Chironia angularis.

SUC'COTASH, *Suck'atash.* A term of Indian derivation. A favorite dish in New England, formed of *green Indian corn* and *beans* boiled together.

SUC'CUBUS, from *sub*, and *cubare*, 'to lie.' Some authors have used this word synonymously with nightmare. Others mean by it a female phantom, with which a man in his sleep may believe he has intercourse; — as *Incubus* has been applied to the male phantom, with which a female may dream she is similarly situate.

SUCCUS, *Chylus*, *Opos*, *Opis'ma*, *Chylis'ma*, *Ecchylo'ma*, *Apothlim'ma*, *Juice*, (F.) *Suc*, from *sugere*, *suctum*, 'to suck.' The fluid obtained by pressing plants, flesh, &c.; *Succus expres'sus*, *Opolé* (officinal), *Opolide* (magistral), according to Chéreau. It is, also, applied to certain animal fluids, as *S. Gastricus*, &c.

Succus Acaciæ Germanicæ Inspissatus, see Prunus spinosa—s. Acaciæ nostratis, see Prunus spinosa — s. Arborum, Sap — s. Cicutæ spissatus, Extractum conii — s. Cyrenaicus, Laserpitium.

Succus Enter'icus, *S. Intestina'lis*, *Liquor intestina'lis* seu *enter'icus*, *Intes'tinal Juice*. The fluid copiously secreted from the lining membrane of the small intestines.

Succus Expressus, Apothlimma — s. Gastricus, Gastric juice — s. Glycyrrhizæ, Extractum glycyrrhizæ — s. Hypocistidis, see Cytinus — s. Intestinalis, Succus enterieus—s. Japonicus, Catechu — s. Limonis, see Citrus medica — s. Liquiritiæ, Extractum glycyrrhizæ—s. Nerveus, Nervous fluid — s. Nutritius, Chyle — s. Orni concretus, see Fraxinus ornus — s. Pancreaticus, see Pancreas — s. Spissatus Aconiti Napelli, Extractum aconiti — s. Spissatus atropæ belladonnæ, Extractum belladonnæ — s. Spissatus conii maculati, Extractum cicutæ — s. Spissatus hyoscyami nigri, Extractum hyoscyami — s. Spissatus lactucæ sativæ, Extractum lactucæ.

SUCCUS'SION, *Succus'sio*, *Hippocrat'ic Succus'sion*, from *succutio*, *succussum*, (*sub*, and *quatio*,) 'I shake from beneath.' A mode of ascertaining the existence of a fluid in the thorax, (*fluctuation by succussion*,) by giving the body one or more slight shakes.

Succussion, *Ballottement*.

SUCHOR, Saccharum.

SUCKATASH, Succotash.

SUCKING, *Suc'tio*, *Suctus*, *Athelx'is*, *Bdalsis*, *Myze'sis*, (F.) *Succion*, from *sugere*, *suctum*, 'to suck.' The act of drawing liquid into the mouth, by forming a vacuum with the tongue acting as a piston, during inspiration.

Sucking Bottle. A bottle so formed, that, when filled with milk, it can be sucked from instead of the breast.

Sucking Child, *Lactens*. A suckling.

SUCKLE, *Lactare*, *γαλακτοτροφειν*, *τιθηφνειν*, (F.) *Allaiter* ou *Alaiter*. Same etymon. To give suck. To nurse.

SUCKLING, Lactation, Loniccra periclymenum, Sucking child.

SU'CRE, Saccharum — *s. Candi*, Saccharum candidum — *s. du Foie*, see Saccharum — *s. de Lait*, Sugar of milk — *s. de Saturne*, Plumbi superacetas — *s. Tors*, Penidium.

SUCTIO, Exsuctio, Sucking.

SUCTION POWER. The force exerted on the blood in the veins, by the active dilatation of the heart. See Derivation.

SUCTO'RIA, from *sugere*, *suctum*, 'to suck.' Animals provided with mouths for sucking. Also, organs for sucking or adhesion, — hence termed *suctorial* — as '*suctorial* oscula.'

SUCTORIAL, see Suctoria.

SUCTUS, Sucking.

SUDAM'INA, *Hydro'ata*, *Hidro'ta*, *Pap'ulæ sudora'les*, *Sufferau'ræ*, *Alha'sef*, *Planta noctis*, *Boa*, from *sudor*, 'sweat.' Small vesicles, which appear upon the skin, especially in the summer time, in hot countries, and in diseases attended with much sweating. It is a miliary eruption. See Miliary fever.

Sudamina, Desudatio, *Échauboulures*, Lichen tropicus.

SUDARIUM, Achicolum.

SUDATIO, Ephidrosis.

SUDATIUNCULA, Ephidrosis.

SUDATORIA, Hidrosis — s. Maligna, see Sudor Anglicus.

SUDATORIUM. Achicolum.

SUDATORY, Achicolum.

SUDOR, '*ιδρως*, *Hidros*, (F.) *Sueur*, 'sweat.' The product of cutaneous transpiration, when visible on the surface of the body. It is colourless; of an odour more or less strong and variable; and of a saline taste. It is composed, according to Berzelius, of water, lactic acid, lactate of soda united with a little animal matter, chloride of sodium, and a little chloride of potassium, an atom of earthy phosphate, and some oxyd of iron.

Sudor, Miliary fever.

Sudor An'glicus, *Hidroé'osos*, *Hidrop'yra*, *Hidropyr'etos*, *Febris* seu *Milia'ris sudato'ria*, *Sudor milia'ris*, *Morbus sudatorius Ephemerus*, *Sudor malig'na* seu *sudatoria* seu *Britan'nica* seu *Anglica pes'tilens*, *Pestis Britannica*, *Sudor Anglicus*, *Sudor malig'na*, *Sweating Sickness*, *Sweating Fever*, (F.) *Suette*, *S. Miliare*, *S. épidémique*, *Sueur Anglaise*. A very severe epidemic disease, characterized by profuse sweating, which appeared in England in 1486; and recurred, at different times, until about the middle of the 16th century. It was accompanied with coldness, excessive prostration of strength, palpitation, frequency and inequality of the pulse, &c., and terminated favourably or unfavourably in the course of 24 hours. The French have given the name Suette de Picardie, *Suette des Picards*, *Fièvre suante*; *Miliaris sudatoria*, *Sudor Picardicus*, to an epidemic disease, which has appeared several times in that province; the principal symptoms of which were profuse sweats and a miliary eruption. The disease recurred in 1821, and has been described, at length, by M. Rayer, who considers it to consist of a simultaneous state of inflammation of various tissues; and proposes to class it with variola, scarlatina, and measles.

A form of it, in which the perspiration was of a black colour, was called *Sudor An'glicus niger*, *Melanephidro'sis*, *Black English Sweating sickness* or *fever*.

Sudor Colliquativus, S. Profusus.

Sudor Cruen'tus, *S. sanguin'eus*, *Hæmatidro'sis*, *Hæmathidro'sis*, *Ephidro'sis cruen'ta*, *Hæmorrhag''ia per Cutem*, (F.) *Hématidrose*, *Sueur de Sang*; *Sweating of blood*, *Bloody sweat*, *Hemorrhage from the skin*. Cutaneous perspiration intermixed with blood: — a very uncommon affection.

Sudor Dulcis, *Saccharorrhœ'a cuta'nea*, *Ephidro'sis saccharu'ta*. A discharge of saccharine matter by perspiration.

Sudor Localis, Meridrosis — s. Miliaris, Miliary fever, Sudor Anglicus — s. Partialis, Meridrosis.

Sudor Profu'sus, *S. Colliquati'vus*. A profuse or immoderate sweat.

Sudor Sanguineus, Sudor cruentus — s. Universalis, Panhidrosis.

SUDORIFER, Sudoriferous, Sudorific.

SUDORIF'EROUS, *Sudor'ifer*, *Hydroph'orus*, from *sudor*, and *fero*, 'I carry.' That which carries sweat, as the *sudoriferous* ducts or glands.

SUDORIF'IC, *Sudorif'icum*, *Sudor'ifer*, *Hidrot'icum*, *Hidrote'rium*, *Hidrotopœ'um*, *Hidropoët'icum*, (F.) *Sudorifique*, from *sudor*, and *facio*, 'I make.' A medicine which provokes sweating. See Diaphoretic.

Four Sudorific Woods, *Quat'uor ligna sudorifica*, were, formerly, *guaiacum, perfumed cherry, sarsaparilla*, and *sassafras*.

SUDORIPAROUS, see Perspiration.

SUDORIS NULLITAS, Anidrosis — s. Privatio, Anidrosis — s. Suppressio, Ischidrosis.

SUET, Sevum.

SUETTE, Sudor Anglicus — *s. Epidémique*, Sudor Anglicus — *s. Miliaire*, Sudor Anglicus — *s. de Picardie*, Sudor picardicus—*s. des Picards*, Sudor picardicus.

SUEUR, Sudor — *s. Anglaise*, Sudor Anglicus — *s. d'Expression*, Expression, sweat of — *s. de Sang*, Diapedesis, Sudor cruentus — *s. Urineuse*, Uridrosis.

SUFFERSURÆ, Sudamina.

SUFFIMEN, Suffimentum.

SUFFIMENT'UM, *Hypocapnis'ma, Suffi'men, Thymia'ma, Suffi'tus, Suffumiga'tio, Suffumiga'tion*, (F.) *Parfum*; from *suffio*, 'I perfume.' A perfume; suffumige; fumigation.

SUFFITIO, Fumigation.

SUFFITUS, Fumigation, Suffimentum.

SUFFLATIO, Puffiness.

SUFFOCATIO, Suffocation, Orthopnœa — s. Hypochondriaca, Hypochondriasis—s. Hysterica, Augone — s. Stridula, Cynanche trachealis — s. Uterina, Angone.

SUFFOCA'TION, *Suffoca'tio, Præfoca'tio, Apopnix'is, Asphyx'ia, Melancha'ma*, from *sub*, and *fax*, pl. *fauces*, 'the jaws.' Death, or suspended animation from impeded respiration, whether caused by the *inhalation of noxious gases, drowning, hanging, strangling*, or *smothering*. The principal morbid appearances in such cases are: — the lungs of a deep-blue colour, with the blood extravasated in the air-cells; right auricle and ventricle filled with dark blood, as well as the neighbouring veins; lividity of the countenance, turgescence, and, perhaps, rupture of the vessels of the brain.

Treatment of suspended animation by suffocation in general. The patient must be conveyed into a room not too warm. Blood-letting must be used, if at all, with caution; — friction must be employed with salt, or warm flannels; stimulating fluids, in a dilute state, be poured into the stomach by means of a tube, and attempts be made to inflate the lungs. Laryngotomy, if necessary.

Suffocation, *Pnigopho'bia*, (F.) *Étouffement*, is used, as *strangling* is, for threatened suffocation. It means the state of dyspnœa and oppression experienced when a sufficient quantity of air does not enter the lungs, or when the chemical phenomena of respiration are imperfectly executed; as in cases of asthma.

SUFFOCATION UTÉRINE, Angone, Hysteria.

SUFFRAGO, Poples.

SUFFUMIGATION, Suffimentum.

SUFFUMIGE, Suffimentum.

SUFFUMIGIUM, Fumigation.

SUFFUMINATIO, Fumigation.

SUFFUSIO, Pseudoblepsia — s. Auriginosa, Icterus—s. Bilis, Icterus—s. Colorans, Chromopsia—s. Dimidians, Hemiopia—s. Exclarans, Oxyopia — s. Fellis, Icterus — s. Lentis crystallinæ, Cataract—s. Metamorphopsia, Metamorphopsia—s. Multiplicans, see Diplopia — s. Myodes, Metamorphopsia—s. Nigra, Amaurosis—s. Oculi, Cataract, Pseudoblepsia — s. Oculorum, Metamorphopsia — s. Radians, Scotasma — s. Sanguinis, Ecchymona.

SUGAR, Saccharum — s. Barley, Penidium, Saccharum hordeatum.

Sugar Candy, Saccharum candidum—s. Cane, see Saccharum.

Sugar, Diabetic, Glucose — s. Fruit, Glucose — s. Grape, Glucose—s. Hepatic, see Saccharum — s. Honey, Glucose.

Sugar of Lead, Plumbi superacetas.

Sugar, Liver, see Saccharum.

Sugar, Magnet'ic, *Sac'charum Magnet'icum* A quack preparation, said to be composed of sugar and cannabis. It is given in nervous cases.

Sugar of Milk, *Sac'charum lactis, Galac'tosac'charum, Lactose, Lactine*, (F.) *Sucre de Lait, Sel de Lait*, is obtained from whey by evaporation and crystallization. It possesses the demulcent properties of the sugars.

Sugar, Muscle, Inosite.

Sugar Pine, see Arrowroot—s. Starch, Glucose.

Sugar, Urinary, Glucose.

Sugars, Various, see Saccharum.

SUGARBERRY, Celtis occidentalis.

SUGGILLA'TION, *Sugilla'tio, Livor, Œde'ma cruentum, Sugillation, Bruise*; from *sugillare, sugillatum*, 'to beat black and blue.' By most authors used synonymously with ecchymosis and ecchymoma. It is, also, applied to the spots, or ecchymoses which occur in consequence of intrinsic causes,—in disease and in incipient putrefaction. It is common in dead bodies; *Livor* seu *mac'ula emortua'lis*. To this last case it is, indeed, restricted by some medico-legal writers; and an interesting question sometimes arises:—Whether the appearance have been induced before death or afterwards? Whether it be a case of *ecchymosis* or of *suggillation?* In the former, the extravasated blood will usually be coagulated; not so in the latter. It is often, however, difficult to form a correct judgment without reference to the history of the case.

SUGGRUN'DIUM, perhaps from *suggredi*, (*sub*, and *gradior*,) 'to go or come up to.' The eave of a house.

Suggrundium Oculi, Superciliary arch — s Superciliorum, Frontal protuberance.

SUICIDA, Autochir.

SUICIDAL INSANITY, Suicide.

SUI'CIDE, *Suici'dium*: from *sui cædes*, 'murder of one's self.' The act of killing one's self. *Autochi'ria, Autocton'ia, Idiocton'ia, Autophon'ia*. Suicide is very frequently the result of disease of the mind: the individual seeming, at times, to be irresistibly impelled to self-destruction. — *Melancho'lia Suicid'ium* seu *autochi'ria, Suici'dal Insan'ity*. Also, one who commits self-murder.

SUIE, Fuligo.

SUIF, Sevum.

SUITES DE COUCHES, Lochia.

SULCATUS, *Cannelé*, Grooved.

SULCI, plural of Sulcus.

Sulci Ciliares, Halo signatus.

SULCULUS LABII SUPERIORIS, Lacuna Labii superioris.

SULCUS, *Semicana'lis, Semicanalic'ulus*. A furrow. A groove. (F.) *Sillon*. Anatomists have given this name to grooves on the surface of bones and other organs. See Anfractuosity.

French writers on anatomy often use the term *Sillons* for the grooves which lodge the arteries and creep on the surface of bones; whilst those that receive veins are called *gouttières*, 'gutters.' Also, the vulva.

Sulcus Antero-posterior Jecoris, see Liver —s. Labii superioris, Lacuna Labii superioris.

Sulcus, Lat'eral, ante'rior, of the Spinal Marrow. A mere trace on the marrow, marked only by the attachment of the filaments of the anterior roots of the spinal nerves.

Sulcus, Lateral, posterior, of the Spinal Marrow, corresponds with the attachment of the posterior roots of the spinal nerves.

Sulcus Retro-Glandularis, see Glans — s. Sinus lateralis, Fossa sigmoidea — s. Transversalis, see Liver — s. Umbilicalis, see Liver.

SULFATE D'AMMONIAQUE, Ammoniæ sulphas.

SULFIDUM CARBONII, Carbonis sulphuretum.

SULFUR, Sulphur.

SULFURE DE CARBON, Carbonis sulphuretum.

SULPHAS ALUMINARIS, Alumen—s. Ammoniacæ Cupratus, Cuprum ammoniatum — s. Cadmicus, Cadmii Sulphas — s. Kalico-aluminicum, Alumen—s. Natricus, Soda, sulphate of—s. Zincicum, Zinci sulphas.

SULPHUR, *Sulfur, Scorith, Thei'on, Thion, Averich, Terra fœlia'ta, Fumus cit'rinus, Ag'uila, Brimstone*, (F.) *Soufre. Native Sulphur* is called *Rock* and *Black Sulphur*, *Sulphur vivum* seu *nigrum*. Sulphur, as we meet with it, is in *rolls, Sulphur in rot'ulis* seu *rotun'dum, Roll Brimstone*. It is a volcanic production, and is obtained, in large quantities, from Solfatara, in Italy. *Roll Sulphur* is impure sulphur, melted, and run into moulds. It is unpleasantly inodorous, when heated or rubbed; insipid; solid, and brittle. S. g. 1·99. Fusible at 226°; volatilizable by heat, and condensing unchanged.

SULPHUR ANTIMONIATUM, Antimonii sulphuretum præcipitatum — s. Caballinum, see Sulphur sublimatum — s. Carburet of, Carbonis sulphuretum — s. Chloratum, Sulphur, chloride of.

SULPHUR, CHLORIDE OF, *Sul'phuris Chlo'ridum* seu *Dichlo'ridum, Sulphur chlora'tum, Hypochlore'tum sulphuro'sum, Chlorum hypersulphura'tum, Dichlo'ride* or *Protochlo'ride* or *Hypochlo'ride* or *Subchlo'ride of Sulphur, Bisulph'uret of Chlorine*, is obtained by passing *dry chlorine gas* over washed and dried *flowers of sulphur*, until they are for the most part dissolved, and distilling the decanted fluid from the excess of dissolved sulphur. One drachm of the liquid to an ounce of lard has been used in lepra, psoriasis, and other chronic cutaneous diseases. Ten drops, dissolved in ether, have been given in adynamic fever.

SULPHUR, DICHLORIDE OF, Sulphur, chloride of—s. Hypochloride of, Sulphur, chloride of — s. Iodatum, Sulphuris iodidum — s. Iodide of, Sulphuris iodidum—s. Ioduret of, Sulphuris iodidum — s. Liver of, Potassæ sulphuretum.

SULPHUR LOTUM, *Sulphur sublima'tum lotum, Washed Sulphur, Magiste'rium Sulph'uris, Sulphuris Flores loti*, is prepared by pouring boiling water on sublimed sulphur, so as to wash away any acid it may contain, and then drying it.

SULPHUR NIGRUM, Sulphur vivum, see Sulphur sublimatum.

SULPHUR PRÆCIPITA'TUM, *Lac Sulph'uris, Milk of Sulphur, Precip'itated Sulphur*, (F.) *Crème de Soufre*, is prepared by boiling sublimed sulphur and lime together, and adding muriatic acid to precipitate the sulphur.

SULPHUR, PROTOCHLORIDE OF, Sulphur chloride of—s. Subchloride of, Sulphur, chloride of.

SULPHUR SUBLIMA'TUM, *Sulphur*, (Ph. U. S.) *Sublimed Sulphur, Flowers of Sulphur* (F.) *Soufre sublimé, Fleurs de Soufre*, is the sulphur of commerce, sublimed in close vessels.

Sulphur is possessed of stimulant, laxative, and diaphoretic properties. As a laxative, it is used in hemorrhoidal and other affections. In the itch, applied externally and taken internally, it has been considered as a specific [?], and it is a valuable remedy in most cutaneous affections that are local. Dose, ʒss to ʒij.

The fæces or dregs, left in the purification or sublimation of sulphur, are called *Horse Brimstone, Dregs of Sulphur vivum, Sulphur caballi'num* seu *vivum, Sulphuris vivi recremen'ta*. They are very impure, and are only used externally.

SULPHUR, VEGETABLE, Lycopodium—s. Wort, Peucedanum.

SULPHURATUS, Sulphureous, Sulphurated.

SULPHU'REOUS, *Sulphuro'sus, Sulphu'rius, Sulphura'tus, Sulph'uretted*. Possessing the properties of, or relating to, or containing sulphur.

SULPHURETTED, Sulphureous — s. Hydrogen, see Hydrogen, sulphuretted.

SULPHURETUM AMMONIACÆ, Ammoniæ sulphuretum—s. Ammoniæ hydrogenatum, Liquor fumans Boylii—s. Kalicum, Potassæ sulphuretum — s. Lixiviæ, Potassæ sulphuretum.

SULPH'URIC ACID, *Ac''idum Sulphu'ricum* seu *Sulfuricum, Oleum Vitrio'li, Spir'itus Vitrioli* seu *vitrioli fortis, Acidum vitriol'icum, A. Vitrioli dephlogistica'tum, Oil of Vitriol, Spirit of Vitriol, Vitriol'ic Acid, Acor Sulphuris*, (F.) *Acide Sulphurique* ou *Sulfurique*. Sulphuric acid is inodorous; has a strong acid taste, and is corrosive. S. g. 1·845 (Ph. U. S.) It is escharotic, stimulant, and rubefacient. Mixed with lard, it is sometimes used in local pains, and certain cutaneous affections.

SULPHURIC ACID, AROMAT'IC, *Ac''idum Sulphu'ricum Aromat'icum, A. vitriol'icum aromat'icum*, seu *vitriolicum alcoho'lē aromaticum, Elixir vitrio'li* seu *vitrioli aromaticum* seu *vitrioli Mynsicht'i* seu *vitrioli Edinburgen'sium* seu *vitriol'icum tinctu'rā aromaticā* seu *vitrioli dulcē* seu *acido aromat'icum, Alcohol cum aromat'ibus sulphu ca'tus, Tinctu'ra acidi sulphurici*, is formed sulphuric acid, f ʒiijss; *ginger*, bruised, ʒj; *cin namon*, bruised, ʒiss; *Alcohol*, Oij. — Ph. U. S. Dose, gtt. x to xxx. Its properties are like those of the next preparation, than which it is more frequently employed, being more agreeable.

SULPHURIC ACID, DILU'TED, *Ac''idum Sulphu'ricum Dilu'tum, A. vitriol'icum dilutum, Elixir vitrio'li, Spir'itus vitrio'li ac''idus Vogle'ri, Elixir of Vitriol*, (F.) *Acide sulfurique délayé*, is formed, according to the Pharmacopœia of the United States, by adding *aq. destillat.* f ʒxiij, to *acid. sulph.* f ʒj. It is tonic, astringent, and refrigerant. Dose, gtt. x to xx, largely diluted. When used as a gargle, half a drachm may be added to ʒvj of water.

Very dilute sulphuric acid was formerly termed *Phlegma vitrioli*.

SULPHURIS CARBURETUM, Carbonis sulphuretum.

SULPHURIS CHLORIDUM, Sulphur, chloride of — s. Dichloridum, Sulphur, chloride of.

SULPH'URIS IO'DIDUM, *S. Iodure'tum, Sulphur Ioda'tum, Iduret* or *I'odide of Sulphur*, (F.) *Soufre Iodure, Iodure de Soufre*. It is thus directed to be prepared in the Pharmacopœia of the U. S. (*Iodin.* ʒiv; *sulphur.* ʒj.) Rub the iodine and sulphur together in a glass, porcelain, or marble mortar, until they are thoroughly mixed. Put the mixture into a matrass, close the orifice loosely, and apply a gentle heat, so as to darken the mass without melting it. When the colour has become uniformly dark throughout, increase the heat so as to melt the iodide; then incline the matrass in different directions, in order to return into the mass any portions of iodine which may have condensed on the inner surface of the vessel: lastly, allow the matrass to cool, break it, and put the iodide into bottles, which are to be well stopped.

SULPHURIUS, Sulphureous.

SULPHUROSUS, Sulphureous.

SULPHUROUS, Sulphureous.

SUL'PHUROUS ACID, *Ac'idum sulphuros'icum* seu *sulph'uris volat'ilē* seu *Sulphuro'sum* seu *Sulfureum, Spir'itus sulphuris* seu *sulphuro'sus volat'ilis* seu *sulphuris per campa'nam* seu *vitrio'li phlogistica'tus, Gas sulphuris*, (F.) *Acide Sulfureux, Air Acide Vitriolique*. Obtained by treating mercury with concentrated sulphuric acid, or by burning sulphur. It is sometimes

used in the gaseous, — at others, in the liquid, state. Sulphurous acid gas is used to disinfect clothes, confined air, letters coming from infected places, &c. It is also exhibited, with great success, in the form of fumigation, in the treatment of certain chronic cutaneous affections, and of sciatic and rheumatic pains in general. If respired pure, it acts in the manner of violent irritants; and is not long in producing death.

SULTZMALT, MINERAL WATERS OF. Sultzmalt is a village in the department of the Upper Rhine; where are several sources of cold, acidulous waters, which seem to contain carbonic acid, subcarbonate of soda, subcarbonate of lime, sulphate of lime, and a little bitumen. They are refrigerant, aperient, and alterative.

SUMAC DES CORROYEURS, Rhus coriaria — *s. Vénéneux,* Rhus toxicodendron.

SUMACH, Rhus coriaria — s. Mountain, Rhus copallina — s. Poison, Rhus venenata — s. Stag's Horn, Rhus typhina.

SUMBUL. The name of a root, *Sum'buli radix, Jatamansi, Musk-root,* presumed to belong to the Umbelliferæ family, much employed in Russia and Germany against cholera. Its exact botanical history is not determined. It contains a strongly odorous principle like that of musk; and is regarded as an antispasmodic.

SUMBULI RADIX, Sumbul root.

SUMEN, Hypogastrium.

SUMMER COMPLAINT. A popular name in the United States, for diarrhœa occurring in summer. It is often, also, made to include dysentery and cholera infantum. With some it means cholera infantum only.

SUMMER DISEASES, see Estival—s. Plant winter worm, Sphæria Sinensis—s. Rash, Lichen tropicus.

SUMMITAS CUTIS, Epidermis.

SUMMUS HUMERUS, Acromion.

SUN BURN, Ephelides — s. Dew, Drosera rotundifolia—s. Flower, false, Helenium autumnale — s. Flower, swamp, Helenium autumnale — s. Flower, tickweed, Coreopsis trichosperma — s. Flower, turpentine, Silphium perfoliatum — s. Pain, see Hemicrania — s. Rash, Lichen — s. Stroke, *Coup de Soleil* — s. Stroke, Egyptian, *Coup de Soleil.*

SUPELLECTILE DIOGENIS, Palm.

SUPELLEX ANATOMICA, Museum anatomicum — s. Diogenis, Palm.

SUPER. A common Latin prefix; in composition, signifying 'above.'

SUPERBUS, Rectus superior oculi.

SUPERCHLORIDUM FORMYLICUM. Chloroform.

SUPERCILIARIS, Corrugator supercilii.

SUPERCIL'IARY, *Supercilia'ris,* from *super,* and *cilium,* 'the edge of the eyelid.' That which relates to the supercilia or eyebrows. (F.) *Sourcilier* ou *Surcilier.*

SUPERCIL'IARY ARCHES, *Superciliary Ridges, Arcus supercilia'res, Suggrun'dia oculo'rum,* (F.) *Arcades sourcilières,* are two slightly projecting apophyses, situate at the anterior surface of the os frontis, above the superior margin of the orbits. They are separated by the nasal *bosse,* and covered by the superciliaris muscle, to which they give attachment.

SUPERCILIARY RIDGES, Superciliary arches.

SUPERCIL'IUM, *Ophrys, Oph'rya, Vallum,* (F.) *Sourcil.* Same etymon. The *eyebrows* (Sc.) *Brees,* (PROV.) *Eye-breen,* are two arched eminences, — convex above, and more or less prominent, according to the individual, — which lie on the superciliary arch of the os frontis, above the eyelids, and extend from the sides of the root of the nose to the temple. Their inner extremity or *head* is more prominent than the outer or *tail.* The eyebrows are covered with short and stiff hairs, which are directed, obliquely, from within outwards, and are, commonly, of the colour of the hair. The skin in which these hairs are implanted, rests on the *orbicularis palpebrarum, frontalis,* and *superciliaris* muscles, which move the eyebrows in different directions. The eyebrows serve as an ornament to the countenance; and by covering the eye defend it from the impression of too strong a light. They direct the perspiration also from the eye.

SUPERCILIUM ACETAB'ULI. The edge of the cotyloid cavity of the os innominatum.

SUPERCONCEPTION, see Superfœtation.

SUPEREVACUATIO. Hypercrisis.

SUPERFECUNDATION, see Superfœtation.

SUPERFIBRINATION, Hyperinosis.

SUPERFICIA'LIS COLLI, *Subcuta'neus Colli.* A nerve formed by communicating branches from the second and third cervical nerves. It is distributed to the superficial parts of the neck.

SUPERFICIES ORBITALIS, see Maxillary bone (superior) — s. Plantaris Pedis, Sole.

SUPERFŒCUNDATIO, Superfœtation.

SUPERFŒTATIO, Superfœtation.

SUPERFŒTA'TION, *Superfœta'tio, Epicye'sis, Hypercye'sis, Hypercye'ma, Superimprægna'tio, Epig'onē, Superfœcunda'tio, Superfecunda'tion, Superimpregna'tion,* from *super* and *fœtare,* 'to breed.' Conception of a fœtus—*epicye'ma*— in a uterus which already contains one. The impregnation of a female already pregnant. The possibility of this has been denied; but there is abundant evidence to show, that it is possible at a very early period of pregnancy. Twin cases may be of this kind of *superconception.*

SUPERGEMINALIS, Epididymis.

SUPERGENUALIS, Patella.

SUPERHUMERALE, Epomis.

SUPERIMPRÆGNATIO, Superfœtation.

SUPERIOR AURIS, Attollens aurem—s. Rotundus clitoridis, Ischio-cavernosus.

SUPERLABIA. Clitoris.

SUPERLIGAMEN, Epidesmus.

SUPERLIGULA, Epiglottis.

SUPERNUMERARY FINGER, Digitus supernumerarius.

SUPERNUTRITIO LIENIS, Splenoncus—s. Splenis, Splenoncus.

SUPEROXALAS KALICUM, Potass, oxalate of.

SUPERPURGATIO, Hypercatharsis.

SUPERSCAPULARIS, Supraspinatus- -s. Inferior, Infra-spinatus.

SUPINATEUR COURT ou *PETIT,* Supinator radii brevis — *s. Grand* ou *long,* Supinator radii longus.

SUPINA'TION, *Supina'tio,* from *supinus,* 'lying on the back.' The movement in which the forearm and hand are carried outwards, so that the *anterior* surface of the latter becomes *superior.*

In Pathology, *Supination, Supina'tio, Hyptias'ma, Hyptias'mus,* means the horizontal position on the back, with the head thrown back, and the legs and arms extended. It is often a sign of great weakness in disease.

SUPINA'TOR. Same etymon. That which produces supination. A name given to two muscles of the forearm.

SUPINATOR BREVIS seu MINOR, Supinator radii brevis — s. Longus seu major, Supinator radii longus.

SUPINATOR RADII BREVIS, *S. brevis* seu *minor,* (F.) *Épicondylo-radial* (Ch.), *Supinateur court* ou *petit supinateur.* A muscle, seated at the outer and back part of the forearm. It is flattened, triangular, and curved upon itself, in such a manner that it embraces the superior extremity of the radius. It is attached, on the one hand, to the external tuberosity of the humerus, and to

a small portion of the posterior surface of the ulna, and is inserted into the upper third of the outer and upper surfaces of the radius. It produces, by contracting, the motion of supination.

SUPINATOR RADII LONGUS, *S. longus* sive *major*, *Bra'chio-radia'lis*, (F.) *Humëro-sus-radial* (Ch.), *Long* ou *grand supinateur*, is seated at the anterior and outer part of the forearm. It arises from the inferior part of the outer edge of the os humeri, and from the external intermuscular aponeurosis; and is inserted, by a long tendon, into the outer edge of the radius, near the base of the styloid process. It causes the supination of the forearm, which it can likewise bend on the arm.

SUPPEDANEA, Hypopodia.

SUPPLANTALIA, Hypopodia.

SUPPLEMENTA EPIPLOICA, Appendiculæ pinguedinosæ.

SUPPLEMENTARY AIR, see Respiration.

SUPPORTER, ABDOMINAL, Belt, Russian —s. Utero-Abdominal, see Belt, Russian.

SUPPOSITION DE PART, Pregnancy, pretended.

SUPPOSITOIRE, Suppositorium.

SUPPOSITORIUM, Suppository — s. Uterinum, Pessary.

SUPPOSITORY, *Supposito'rium, Hypoth'eton, Bacil'lus, Balanis'mus, Bal'anus, Glans, G. subdidit''ia, Nod'ulus intestina'lis*, from *supponere, suppositum*, (*sub* and *ponere*, 'to put,) 'to put under,' (F.) *Suppositoire*. A solid medicine, in the form of a cone or cylinder, intended to be introduced into the rectum; — either for the purpose of favouring intestinal evacuations, or to act as an anodyne. Purgative suppositories are made of soap, aloes, or any other irritating substance.

SUPPRESSIO ALVI, Constipation — s. Lochiorum, Ischiolochia—s. Lotii, Ischuria—s. Mensium, Amenorrhœa—s. Menstruationis, Amenorrhœa — s. Sudoris, Ischidrosis.

SUPPRESSION DU FLUX MENSTRUEL, Amenorrhœa—*s. de Part*, see Parturition—*s. d'Urine*, Ischuria.

SUPPURANS, Suppurative.

SUPPURARE, Suppurate.

SUP'PURATE, *Suppura'rē*, (F.) *Suppurer*, (Prov.) *Beal* (vulgarly). To form or secrete pus.

SUPPURA'TION, *Suppura'tio, Subpura'tio, Ecpye'ma, Purulen'tia, Pyo'sis, Pye'sis, Diapye'ma, Diapye'sis, Pyogen'ia simplex, Pu'rulence, Pu'rulency, Gath'ering*, (F.) *Aboutissement*. Formation or secretion of pus, (see, also *Pyogenia*,) from *sub*, 'under,' and *pus, puris*. It is a frequent termination of inflammation, and may occur in almost any of the tissues. This termination is announced by slight chills; by remission of the pain, which, from being lancinating, becomes heavy; by a sense of weight in the part, and, when the collection of pus can be easily felt, by fluctuation. When pus is thus formed in the areolar membrane, and is collected in one or more cavities, it constitutes an *abscess*. If it be formed from a surface exposed to the air, it is an *ulcer*: and such ulcers we are in the habit of establishing artificially in certain cases of disease.

SUP'PURATIVE, *Suppu'rans, Suppurati'vus, Diapye'ticus, Ecpyo'tiens, Ecpyiscon'tus*, (F.) *Suppuratif*. Same etymon. That which facilitates suppuration. Suppuratives are, generally, vesicants mixed with lard.

SUPPURER, Suppurate.

SUPRA. A common Latin prefix; in composition, signifying 'above.'

SUPRA-COSTA'LES, *Levato'res Costa'rum*, (F.) *Sur-costaux*, from *supra*, and *costa*, 'a rib.' A name given to twelve small, fleshy fasciculi, which are flattened, triangular, and with radiating fibres. They pass from the transverse processes of the dorsal vertebræ to the superior margin of the rib beneath. Spigelius, Cowper, Boyer, Chaussier, and others, consider them to form part of the intercostales externi.

SUPRA-HEPATIC VEINS, see Hepatic veins.

SUPRA-OMPHALODYMIA, see Somatodymia — s. et Infra-omphalodymia, see Somatodymia.

SUPRA-OR'BITAR, *Supra-orbita'lis, Supra-orbita'rius*, (F.) *Sus-orbitaire*, from *supra*, and *orbita*, 'the orbit.' That which is situate above the orbit.

SUPRA-OR'BITAR FORA'MEN, *F. Supra-orbita'rium* seu *orbitarium supe'rius*, (F.) *Trou sus-orbitaire* ou *orbitaire supérieur*, is a foramen or notch completed by a ligament at the inner third of the orbitar arch. It gives passage to the *supra-orbitar* or *superciliary artery*, a branch of the ophthalmic, which ascends the forehead, and is distributed thereto.

SUPRA-PU'BIAN, *Supra-pubic, Supra-pubia'nus*, from *supra*, and *pubes*. That which is seated above the pubis.

SUPRA-PUBIAN NERVE, (F.) *Nerf sus-pubien*, is the internal ramus of the inguino-cutaneous branch of the first lumbar nerve. It is the *genito-crural* branch of Bichat. It descends almost vertically before the psoas muscle; and, near the crural arch, divides into two branches. One of these accompanies the spermatic cord, and is distributed to the cremaster, scrotum, and integuments on the inner part of the thigh. The other issues from the pelvis with the femoral filaments; traverses the aponeurosis of the thigh, and is distributed to the integuments of the upper and anterior part of the limb.

SUPRA-RE'NAL, *Supra-rena'lis*, (F.) *Surrénal*, from *supra*, and *ren*, 'the kidney.' Seated above the kidney — as the *supra-renal* capsule.

SUPRA-SCAP'ULAR; *Supra-scapula'ris*, from *supra*, and *scapula*. Seated above the scapula;—as

SUPRA-SCAPULAR NERVE. This arises from the fifth cervical; passes through the supra-scapular notch, and is distributed to the supra-spinatus and infra-spinatus muscles.

SUPRA-SCAPULARIS, Supra-scapular, and Supra-spinatus muscle.

SUPRA-SEMIORBICULARIS, Orbicularis oris.

SUPRA-SPINA'TUS, *Supra-spino'sus*, (F.) *Sur-épineux, Sus-épineux*, from *supra*, and *spina*. That which is seated above the spine.

SUPRA-SPINATA FOSSA, (F.) *Fosse sus-épineuse*, is a triangular depression above the spine of the scapula.

SUPRA-SPINATUS MUSCLE, *Super-scapula'ris, Supra-scapularis*, (F.) *Sus-spino-scapulo-trochitérien, Petit sus-scapulo-trochitérien* (Ch.), is situated in the fossa supra-spinata. It is elongated, thick, and triangular, and is attached, on the one hand, to the two inner thirds of the fossa supra-spinata; and terminates, on the other, at the anterior part of the great tuberosity of the humerus. This muscle raises the arm.

SUPRA-SPINO'SA LIGAMEN'TA, *Supra-spinal lig'aments*, are two in number. 1. The *Dorso-lumbo-supra-spinal ligament*, (F.) *Ligament sur-épineux dorso-lombaire*, extending above the spinous processes of the dorsal and lumbar vertebræ from the 7th cervical as far as the median crista of the sacrum. 2. *Cervical-supra-spinal ligament*, (F.) *Ligament sur-épineux cervical*, which extends above all the cervical spinous processes, and is attached, above, to the outer occipital protuberance.

SUR, Supra. A French prefix, signifying 'above.'

SURA, *Gastrocne'mē, Gastrocne'mia, Gastrocne'mium; Calf of the leg*, (F.) *Mollet, Gras de*

Jambe. The projection, formed at the posterior part of the leg by the gastrocnemii muscle. Also, the fibula.

SURCILIER, Corrugator supercilii, Superciliary.

SURCOSTAUX, Supracostales.

SURCULATION, see Generation.

SURCULI FELLEI, Pori biliarii.

SURCULUS, Ramusculus.

SURDENT (F.), from *sur,* and *dens,* 'a tooth.' When a milk-tooth does not fall out at the period of the second dentition, but is merely forced to one side by the new tooth, it is called a *surdent.*

SURDI-MUTITÉ, Mutitas surdorum.

SURDITAS, Cophosis, Deafness.

SURDITÉ, Cophosis, Deafness.

SURDOMUTITAS, Deaf-dumbness.

SURDUS, Deaf.

SUREAU COMMUN, Sambucus.

SURELLE, Oxalis acetosella, Rumex acetosa.

SURÉPINEUX, Supra-spinatus.

SUR-EXCITATION, see Excitement, and Super-excitation.

SURFEIT, Acrasia, Colica crapulosa.

SURGEON, *Chirur'geon ; Chiro'nax, Chirur'gus, Vul'nerum med'icus, Cheiria'ter, Chiria'ter, Iätrus,* (F.) *Chirurgien,* old French, *Surgien,* from χειρ, 'the hand,' and ἐργον, 'work.' One who practises surgery. The surgeon, says Celsus, ought to be young, or, at all events, not advanced in life. His hand must be steady, expert, and never tremulous : he must use the right or left with equal facility : his sight must be clear and penetrating : his mind intrepid ; and, although unmoved when he proceeds to operate, he must not be in haste, nor cut less than is necessary, but finish his operation, as if the cries of the patient made no impression upon him.

In the middle ages, the Universities of Italy and Spain sent out educated surgeons, as well as physicians, under the name *chirur'gi-phys'ici.*

SURGEON-APOTH'ECARY. One who unites the practice of surgery with that of the apothecary. A *general practitioner.* He is the ordinary *medical man* or family medical attendant in England. See Apothecary.

SURGEON-DENTIST, Dentist.

SUR'GEONCY. The office of a surgeon.

SUR'GERY, *Chirur'gia, Chiriatri'a, Cheirix'is, Chi'risis, Chirix'is, Chiris'mus, Metacheirix'is, Metachi'risis, Metachiris'mus, Tracta'tio manuar'ria, Medic'ina operati'va* seu *ef'ficax,* (F.) *Chirurgie.* Same etymon as surgeon. The part of the healing art which relates to external diseases ; their treatment; and, especially, to the manual operations adapted for their cure. Also, the office of a surgeon.

SURGERY, ANAPLASTIC, Morioplastice — s. Autoplastic, Morioplastice—s. Conservative, Surgery, salvation — s. Dental, Dentistry.

SURGERY, MIL'ITARY, *Chirur'gia milita'ris,* (F.) *Chirurgie militaire,* is that which relates to the operations to be performed on the field of battle, or subsequently ;—with the attention to be paid to the wounded, &c.

SURGERY, OP'ERATIVE, is termed *Aciur'gia, Acur'gia,* and *Acidur'gia,* (F.) *Médecine opératoire.*

SURGERY, PLASTIC, Morioplastice.

SURGERY, SALVA'TION, *Conser'vative Sur'gery,* is that which looks rather to the preservation of a limb for example than its removal. One, who is addicted to operating in almost all cases, is sometimes called a *knifeseman.*

SUR'GICAL, *Chirur'gicus,* (F.) *Chirurgical, Chirurgique.* Same etymon. That which relates to surgery ; as *surgical* anatomy, *surgical* operations, *surgical* instruments, &c.

SURGIEN, Surgeon.

SURINAMINE, see Geoffræa Surinamensis.

SUR-IRRITATION, see Irritation.

SURNUMÉRAIRE (Doigt), Digitus supernumerarius.

SUROXYGÉNÈSES. From *sur* and *oxygen.* A name given by Baumes to diseases attributed by him to superabundance of oxygen.

SURPEAU, Epidermis.

SURRECTA ALBA, Ranunculus flammula.

SUR-RÉNAL, Supra-renal.

SURROGATUM, Succedaneum.

SURSELS, see Salt.

SURTOUTS LIGAMENTEUX DE LA COLONNE VERTÉBRALE, Vertebral ligaments.

SURUMPE (S.) A disease to which the traveller in the Cordilleras is liable. It consists of a violent inflammation of the eyes, caused by the reflection of the bright rays of the sun. The conjunctiva is highly inflamed, and the lids swell and bleed. The pain is intense, and frequently induces delirium.—Tschudi.

SURVIE, Survivorship.

SURVI'VORSHIP, (F.) *Survie,* from *supervivere, (super,* and *vivere,)* (F.) *survivre,* 'to live longer.' In *legal medicine,* this word means the probability that any individual has survived others in an accident, which has been fatal to all. This is often an important question, connected with the inheritance of property, and on which physiology can rarely afford more than presumptive grounds for conclusion.

SUS, SUSUM, (F.) *Sus,* same as *Sursum,* 'above.' A French prefix, signifying 'above,' as in

SUS-ACROMIO-HUMÉRAL, Deltoid.

SUS-CARPIEN ; sus, and *carpe,* 'the wrist.' Above the wrist. An epithet given by Chaussier to the dorsal artery of the wrist—*Artère sus-carpienne* — a branch of the radial.

SUS-ÉPINEUX, Supra-spinatus— *Maxillo-labial,* Levator anguli oris — *s. Maxillo-labial, grand,* Levator labii superioris alæque nasi — *s. Maxillo-labial moyen,* Levator labii superioris proprius — *s. Maxillo-nasal,* Compressor naris — *s. Omphalodymie,* see Somatodymia — *s. Optico-sphéno-sclératicien,* Rectus superior oculi—*s. Orbitaire,* Supra-orbitar — *s. Phalangien du pouce,* Abductor pollicis brevis — *s. Pubio-fémoral,* Pectinalis — *s. Scapulo-trochitérien le plus petit,* Teres minor — *s. Scapulo-trochitérien petit,* Supra-spinatus — *s. Spino-scapulo-trochitérien,* Supra-spinatus.

SUSCEPTIBIL'ITY, *facilè suscipiens, (sus,* and *capio,* 'I take,') 'easily taking, or undertaking.' Sensibility, in its most enlarged acceptation. Impressibility. This term, with the epithet *nervous,* is sometimes used for that increase in the moral sensibility which is particularly observed in nervous affections.

SUSCEPTIO INTESTINORUM, Intussusception.

SUSPENDICULUM, Cremaster.

SUSPENSA, Enæorema.

SUSPENSEUR, Suspensory.

SUSPENSOIRE, Suspensory.

SUSPENSORIUM, Suspensory — s. Hepatis, Suspensory ligament of the liver—s. Testis, Cremaster.

SUSPEN'SORY, *Suspenso'rius,* from *suspendere, (sus,* and *pendere,* 'to hang,') 'to hang up.' (F.) *Suspenseur.* That which sustains or suspends.

SUSPENSORY BANDAGE, *Suspenso'rium, Suspensoir* ou *Suspensoire,* is a bandage intended to support the scrotum, in cases of diseases of the testicle or of scrotal hernia. It consists of a kind of bag, fixed above to a cincture, and retained

below by strings passing between the thighs, and fixed to the cincture behind.

Suspensory Ligament of the Liver, *Ligamen'tum latum, Suspenso'rium he'patis, Perpendic'ulum he'patis*, is a triangular duplicature of the peritoneum, between the inferior surface of the diaphragm and the upper surface of the liver, which is continuous with the great falx of the umbilical vein.

Suspensory Ligament of the Penis is a fibrocellular fascia, of a triangular shape, which extends from the anterior part of the symphysis pubis to the corpus cavernosum, which it sustains. A similar ligament belongs to the clitoris.

SUSPENSUM, Enæorema — s. Urinæ, Enæorema.

SUSPIRATION, Suspirium.

SUSPIRATUS, Suspirium.

SUSPIRITUS, Suspirium.

SUSPIRIUM, *Suspira'tio, Suspira'tus, Suspir'itus*, from *sus*, and *spiro*, 'I breathe;' *Mygmus, Mych'mus, Mychthis'mus, Stenag'mus, Stenax'is, Sigh, Suspira'tion*, (F.) *Soupir*. A short breathing. A slow, voluntary contraction of the diaphragm and intercostal muscles, the effect of which is to restore the due relation between the circulation and respiration, or to free ourselves from an inconvenient sense of weight felt in the chest, when we are much depressed, — a weight, which appears to be chiefly dependent on the functions of the heart being disturbed through the moral influence. The sigh differs from the *sob*:—the latter being involuntary and spasmodic. Sighing, occurring in fevers to a great extent, indicates considerable depression. When accompanied with a vocal sound, it constitutes a *groan*.

Suspirium Cardiacum, Angina pectoris.

SUSTENTACULUM, Aliment.

SUSTENTATOR CLITORIDIS, Erector clitoridis — s. Penis, Erector penis.

SUSURRATION, Whispering.

SUSURRUS, *Bourdonnement* — s. Aurium, Tinnitus aurium.

SUTELA, Suture.

SUTERBERRY, Xanthoxylum fraxineum.

SUTORIUS, Sartorius.

SUTTER, Saccharum.

SUTURA ABDOMINALIS, Gastroraphy — s. Arcualis, Coronal suture — s. Biparietalis, Sagittal suture — s. Clavata, Suture, quilled — s. Corporis callosi externa, see Raphe — s. Cranii squamosa, Squamous suture — s. Dentata, see Suture — s. Frontoparietalis, Coronal suture — s. Interparietalis, Sagittal suture — s. Jugalis, Sagittal suture—s. Lambdoidalis, Lambdoid suture — s. Limbosa, see Suture — s. Lepidoides, Squamous suture — s. Mendosa, Squamous suture — s. Notha, see Suture—s. Obelæa, Sagittal suture — s. Ossium Spuria, Harmony — s. Proræ, Lambdoid suture — s. Punctata, Suture, common — s. Puppis, Coronal suture — s. Rhabdoides, Sagittal suture—s. Serrata, see Suture, Sagittal suture—s. Spuria, see Suture—s. Squamosa, see Suture—s. Vera, see Suture.

SUTURAL, *Sutura'lis*; same etymon as the next. Relating to a suture.

SUTURE, *Sutu'ra, Sute'la, Armē, Rhaphē*, from *suere, sutum*, 'to stitch;' *Dove-tail joint*, (F.) *Engrenure*. A kind of immovable articulation, in which the bones unite by means of serrated edges, which are, as it were, *dove-tailed* into each other. The articulations of the greater part of the bones of the skull are of this kind. The coronal, lambdoidal, and sagittal sutures are called *true sutures, sutu'ræ veræ*, the two temporal are called *false sutures, suturæ nothæ* seu *spu'riæ* seu *squamo'sæ*.

A *dentated suture* — *Sutu'ra denta'ta* — is one in which the processes are long and dentiform, as in the interparietal suture. In a *serrated suture* — *sutu'ra* seu *syntax'is serra'ta* — the indentations and processes are small and fine, like the teeth of a saw, as in the suture between the two portions of the frontal bone. In the *sutu'ra limbo'sa* there is along with the dentated margins a degree of bevelling of one, so that one bone rests on the other, as in the occipito-parietal suture.

Suture, in *Surgery, Rha'phē*, means an operation which consists in stitching the lips of a wound to procure their union. The suture was, at one time, largely employed; but, in modern times, its use has been wisely restricted. There are few wounds in which the edges may not be brought together by adhesive plaster appropriately applied. This kind of union, by adhesive plaster simply, has been absurdly termed *Sutura sicca* or *dry suture*, in opposition to the *Sutura cruenta* or suture properly so called. The suture is generally performed with waxed thread and straight or curved needles, according to the arrangement of parts.

The chief sutures are the *interrupted suture*, the *quilled suture*, the *glover's suture*, and the *twisted suture*. 1. The Interrupted Suture, (F.) *Suture à points séparés, Suture entrecoupée*, is performed by passing a needle, armed with a ligature, through the lips of the wound previously brought into contact; and then tying the extremities of the thread. The other stitches are made in the same manner. They are separate or interrupted. It is the suture most commonly used. 2. The Quilled Suture, *Sutura clava'ta*, (F.) *Suture enchevillée* ou *emplumée* ou *empennée, Compound Suture*, is merely the interrupted suture, with this difference, that the ligatures are not tied over the face of the wound, but over two quills or rolls of plaster, or bougies, which are laid along the sides of the wound. It is used by some surgeons, on account of there being less danger of the stitches tearing out. It is not much employed. The Clamp Suture, used by Dr. Sims, of New York, in the treatment of vesico-vaginal fistulæ, is a modification of this. It is formed by two cylinders of silver or lead, perforated at several points for the passage of small pieces of fine silver wire, which are to supply the places of thread, and are prevented from slipping by perforated shot carried down upon them, pressed against the cylinders, and kept in situ by being firmly pinched with pliers. 3. The Glover's Suture, *Contin'ued* or *Uninterrup'ted Suture*, (F.) *Suture de Pelletier*, ou *en surget*, is executed by introducing the needle first into one lip of the wound from within outwards, then into the other in the same way; and, in this manner, sewing up the whole extent of the wound. It has been chiefly used in wounds of the intestinal canal. It is now rarely employed except for stitching up dead bodies. The common stitch or suture, *Sutura puncta'ta*, (F.) *Suture à points passés*, has been used in similar cases. 4. The Royal Stitch or Suture is the name of an old operation for the cure of bubonocele. It consisted in putting a ligature under the hernial sac, close to the abdominal ring, and then tying that part of the sac, so as to render it impervious by the adhesive inflammation thus excited. 5. The Twisted Suture, (F.) *Suture entortillée*, is employed, chiefly, to unite wounds of the cheeks and of the free edges of the lips. To perform it, a pin or needle is passed through the edges of the wound, so as to keep them accurately in contact. A piece of thread is then wound accurately around the pin, from one side of the division to the other, in the form of the figure ∞. The number of pins and sutures must, of course, correspond with the extent of the

wound. This is the suture used in cases of hare-lip. The Button Suture, of Dr. Bozeman, of Alabama, employed in vesico-vaginal fistula, is a modification of this. 6. The *SUTURE À ANSE*, of Le Dran, has only been employed in cases of wounds of the intestines. For this purpose, the edges of the wound are brought together, and as many needles, with unwaxed threads, used as there are to be stitches. Each stitch is then made by passing a needle through the edges; and all the ligatures which belong to one side of the wound are tied together, and twisted so as to form a thread, which is fixed externally. 7. The Implanted Suture, (F.) *Suture implantée*, is formed by pins arranged parallel to the edges of the wound, and *implanted* in their substance. By means of threads, the needles are approximated so as to bring the edges of the wound together. 8. The Plastic Suture, so called by Prof. Pancoast, of Philadelphia, its proposer, is a suture by tongue and groove. The groove is made by an incision in the part, which is to receive the flap. The tongue is made on the flap by bevelling off the two surfaces, cuticular and adipose. The suture is made by passing a loop of thread, by two punctures, deep through the inner lip of the groove. The two needles are passed through the base of the tongue, and again through the outer lip of the groove. The two ends of the thread are then tied over a small roll of adhesive plaster, by which the tongue is, of necessity, forced deep into the groove. Four raw surfaces are thus firmly held in connection, making the union of parts, by this suture, a very certain process.

Suture, Button, see Suture, (twisted) — s. Clamp, see Suture, (quilled) — s. Compound, Suture, quilled — s. Continued, Suture, glover's — *s. Écailleuse*, Squamous suture — *s. Empennée*, Suture, quilled—*s. Emplumée*, Suture, quilled — *s. Enchevillée*, Suture, quilled—*s. Entortillée*, Suture, twisted — *s. Entrecoupée*, Suture, interrupted — s. False, Harmony, see Suture — *s. Implantée*, see Suture, (implanted) — *s. Occipitale*, Lambdoid suture—s. Occipito-parietal, Lambdoid suture — *s. de Pelletier*, Suture, glover's — s. Perineal, Perinæorrhaphy — s. Plastic, see Suture — *s. à Points passés*, Suture, common — *s. à Points séparés*, Suture, interrupted — s. Sagittal, see Sagittal suture — *s. Squameuse*, Squamous suture — *s. en Surget*, Suture, glover's—s. Superficial, Harmony — s. Uninterrupted, see Suture, glover's.

SWAB, from Sax. ᵹpebban, 'to clean with a mop.' A piece of sponge or rag tied to a rod of whalebone or wood, for cleansing the mouth of the sick, or applying remedial agents to deep-seated parts. The process is termed *Swabbing*.

SWADDLING CLOTHES, Swathing clothes.

SWAGBELLY, Physconia.

SWALLOW, Hirundo — s. Wort, Asclepias vincetoxicum — s. Wort, orange, Asclepias tuberosa—s. Wort, tuberous-rooted, Asclepias tuberosa — s. Wort, white, Asclepias vincetoxicum.

SWALLOW'S NEST, Nidus hirundinis.

SWALME, Excrescence, Tumour.

SWAMP CABBAGE, Dracontium fœtidum — s. Dogwood, Petcla trifoliata — s. Sickness, Milk sickness — s. Wood, Cephalanthus occidentalis, Dirca palustris.

SWARFF, Stupor, Syncope.

SWATHING CLOTHES, *Swaddling Clothes*, *Incunab'ula*, *Fasciæ*, *Panni*, from Sax. ᵹpeban, 'to bind.' (F.) *Maillot*. The kind of clothing or bandaging formerly applied to children during the first year of life. It is now, properly, laid aside, and every freedom allowed to muscular exertion.

SWEAT, Sudor—s. Bloody, Sudor cruentus — s. Glands, see Perspiration — s. Root, Polemonium reptans — s. Scab, Crusta genu equinæ.

SWEATING, Ephidrosis—s. Bath, Achicolum — s. of Blood, see Diapedesis, and Sudor cruentus — s. House, Achicolum — s. Plant, Eupatorium perfoliatum — s. Room, Achicolum — s. Sickness, Sudor Anglicus.

Sweating Sickness, Malwah. A disease which appears to be allied to the worst form of cholera, and to bear a close relation to malignant congestive fever. As its name imports, it occurs in Malwah in India.

SWEBBING, Syncope.

SWEE, Vertigo.

SWEEMING, Syncope.

SWEEMISH, see Syncope.

SWEET BITTER, Triosteum—s. Bread, Pancreas, Thymus — s. Bush, Comptonia asplenifolia —s. Fern, Comptonia asplenifolia—s. Flag, Acorus calamus — s. Pod, Ceratonium siliqua — s. Root, Aralia nudicaulis.

SWELLING, *Eponaste'ma*, *Exar'ma*, *Exœde'sis*, *Presis*, *Presma*, *Oncus*, *Extumefac'tio*, *Tumor*, *Tumefac'tio*, (Prov.) *Blawing*, *Boist*, *Coul*, (Old Eng.) *Boche*, *Bollynge*, *Bolning*, (F.) *Enflure*, *Gonflement*, from Sax. ᵹpellan, (D.) swellen (G.) schwellen, 'to swell,' Morbid increase of bulk in the whole, or a part, of the body. See Tumour.

Swelling, White, Hydrarthrus.

SWENSIE, Cynanche.

SWENYNG, Somnium.

SWERF, Stupor, Syncope.

SWERTIA CHIRAYITA, Gentiana chirayita — s. Difformis, see Calumba — s. Frasera, see Calumba — s. Lutea, Gentiana lutea.

SWEUIN, Somnium.

SWEVYNG, Somnium.

SWEVYNYNG, Somnium.

SWIETE'NIA FEBRIF'UGA, after Van Swieten, *S. So'mida*, *Soym'ida* seu *Cedre'la febrif'uga*, *Feb'rifuge Swiete'nia*, (F.) *Mahogan. fébrifuge*. *Ord.* Meliaceæ. *Sex. Syst.* Decandria Monogynia. The bark of this tree, which is a native of the East Indies, called there *Rohena Bark*, has an aromatic odour and bitter taste. It is tonic and stomachic, and has been used in intermittents, and in diseases where bitter tonics are indicated. Dose, ℈j to ℈ij of the powder.

Swiete'nia Mahog'ani, *Cedrus Mahog'ani*, *Mahogany Tree*, grows in the West Indies and tropical America, and is possessed of similar properties.

Swiete'nia Senegalen'sis, *Khaya Senegalen'sis*. A common forest tree on the borders of the Gambia. The bark called *Cail-cedra*, and *Karson Khoyi*, is bitter and antiperiodic.

Swietenia Somida, S. Febrifuga.

SWIM, Air bladder.

SWIMBLADDER, Air bladder.

SWIMMING, Natation—s. Bladder, Air bladder — s. of the Head, Vertigo.

SWINACIE, Cynanche tonsillaris.

SWINE-POX, see Varicella.

SWINE-SAME, Adeps.

SWINE-THISTLE, Sonchus.

SWINNYING, Vertigo.

SWOON, Syncope.

SWOONING, Syncope.

SWOUNDING, Syncope.

SYALADENI'TIS, *Inflamma'tio glandula'rum saliva'lium*, from σιαλον, 'saliva,' αδην, 'a gland,' and *itis*, denoting inflammation. Inflammation of the salivary glands.

SYCAMINOS, Morus nigra.

SYCAMINUM, see Morus nigra.

SYCE, Ficus, Ficus carica.

SYCEA, Ficus.

SYCEPH'ALUS, from συν, 'with,' 'together,'

and *κεφαλη*, 'head.' A monster having two heads united together.

SY'CION, *συκιον*, from *συκον*, 'a fig.' A decoction of dried figs.

SY'CIOS ANGULA'TUS. *One-seeded star cucumber, Wild Bry'ony.* The roots and seeds of this indigenous plant, *Order,* Cucurbitaceæ, are bitter, purgative and diuretic. It is used in dropsy in the same cases as bryony.

SYCI'TES, from *συκον*, 'a fig.' Wine, in which figs have been infused.

SYCITES, Catorchites.

SYCOMA, Ficus.

SYCO'SIS. Same etymon. A tumour of the shape of a fig. Also, a fungous ulcer. A horny excrescence about the eyelids. Dr. Bateman defines it:—an eruption of inflamed but not very hard tubercles occurring on the bearded portion of the face and on the scalp, in adults; and usually clustering together in irregular patches; — *Phyma Sycosis, Rose'ola fico'sa, Acne mentagra.* Of this he has given two species: 1. *Sycosis Menti, S. barbæ, Men'tagra, Menti'go, Varus Men'tagra, Mentagroph'yta, Chinwelk, Chinwhelk, Barber's Itch,* (F.) *Dartre pustuleuse mentagre:* and, 2. *Sycosis Capil'li, S. Capillit''ii.* The treatment, in both cases, resembles that for porrigo favosa.

SYCOSIS, Ficus.

SYCUM, Ficus.

SYDERATIO, Sideratio.

SYLLEPSIS, Conception.

SYLLEPSIOLOG''IA, from *συλληψις*, 'conception,' and *λογος*, 'a description.' The doctrine of conception.

SYM, SYN, *συν*, 'with, together,' like the *cum, con, col, cor,* &c., of the Latins. A common prefix. Before *b, p, ph, ps,* and *m,* — *sym,* or *syn,* is changed into *sym* or *xym,* (com;) before *c, ch, g, k,* and *x,* into *syn* or *xyn, συγ, ξυ*, (con;) before *l* into *syl* or *xyl,* (col;) before *r* into *syr* or *xyr* (cor;) and before *s* into *sy* or *xy,* and *sys,* (co and cos.)

SYMBLEPHARON, Ankyloblepharon.

SYMBLEPHARO'SIS, *Conere'tio palpebra'rum cum bulbo oc'uli,* from *sym,* and *βλεφαρον*, 'an eyelid.' A preternatural adhesion between the eyelids; and especially between the upper eyelid and globe of the eye.

SYMBLEPHAROSIS, Ankyloblepharon.

SYMBOL, *Sym'bolum, Character,* (F.) *Caractère,* from *συμβαλλω* (*συν*, and *βαλλω*, 'I throw'), 'I compare.' A sign or representation of something else.

The following are the symbols used in prescriptions:

℞, Recipe. See R.

gr., *Granum,* a grain.

℈, *Scrupulus* seu *scrupulum,* a scruple.

ʒ, *Drachma,* a drachm.

℥, *Uncia,* an ounce.

℔, *Libra,* a pound.

lb, *Libræ,* pounds.

♏, *Minimum,* a minim.

f ʒ, *Fluidrachma,* a fluidrachm.

f ℥, *Fluiduncia,* a fluidounce.

O, *Octarius,* a pint.

C, *Congius,* a gallon. See Abbreviation.

SYMBOLE, Commissure.

SYMBOLEUSIS, Consultation.

SYMBOLISMUS, Sympathy.

SYMBOLIZATIO, Sympathy.

SYMBOLOGICA, Symptomatology.

SYMBOLUM, Sympathy.

SYMÉTRIE, Symmetry.

SYMÉTRIQUE, Symmetrical.

SYM'MELES, from *sym,* and *μελος*, 'an extremity.' *Mon'opus.* A genus of monsters whose extremities are joined together: *Sirens.* — I. G. St. Hilaire.

SYMMETRIA, Symmetry.

SYMMET'RICAL, *Symmet'ricus, συμμετρος,* (F.) *Symétrique,* from *sym,* and *μετρειν*, 'to measure.' An epithet given to those parts of the body, which, if seated on the median line, may be divided into two equal, and perfectly like halves; or which — if situate, the one to the right, the other to the left of this line — have a similar conformation, and a perfectly analogous arrangement.

SYMMETRICAL DISEASES, see Symmetry.

SYM'METRY, *Symmet'ria, Commen'sum, Membro'rum Om'nium Competen'tia, Propor'tio,* (F.) *Symétrie.* The regularity in form, observed in many parts, situate on the median line; and, also, the resemblance which exists between many organs that are situate on each side of the median line; *Bilatéral Symmetry.* Bichat first noticed that this symmetry was confined to the organs of animal life; as the head, brain, spine, organs of sense, locomotion, &c.

It has been affirmed—and there is evidence in favour of the assertion — to be a law of the animal economy, that when uninfluenced by disturbing agents, all general or constitutional diseases affect equally and similarly the corresponding parts of the two sides of the body. This has been called the *Symmetry of Diseases;* and the resulting diseases are said to be *symmet'rical.*

SYMMETRY OF DISEASES, see Symmetry.

SYMPARATERESIS, Observation.

SYMPASMA, Catapasma.

SYMPATHESIS, Sympathy.

SYMPATHET'IC, *Sympath'icus, Sympatheticus,* (F.) *Sympathique,* from *sym,* and *παθος*, 'suffering.' That which depends on sympathy. Sympathetic affections of an organ are those morbid phenomena that supervene without any morbific cause acting directly on it, and by the reaction of another organ primarily affected. Thus, itching of the nose is a *sympathetic affection,* produced by irritation in the intestinal canal.

The epithet *sympathetic* is, also, given to different nerves. See Trisplanchnic, Pneumogastric, and Facial.

SYMPATHETIC, GREAT, Trisplanchnic nerve—s. Middle, Pneumogastric—s. Nerve, Trisplanchnic nerve.

SYMPATHETIC POWDER, *Pulvis sympathet'icus* or *Powder of Sympathy* of Sir Kenelme Digby, was composed of *calcined sulphate of iron,* prepared in a particular manner. It was long supposed to be able to cure a wound, if applied to the weapon that inflicted it; or even to a portion of the bloody clothes. It is proper to remark, however, that the wound itself was carefully excluded from the air, and from all irritation.

SYMPATHETICUS MINOR, Facial nerve.

SYMPATHETISMUS, Sympathy.

SYMPATHIA, Consent of parts.

SYMPATHICUS, Sympathetic.

SYMPATHIQUE, Sympathetic — *s. Nerf,* Trisplanchnic nerve.

SYM'PATHY, *Sympathi'a, Sympathe'sis, Compas'sio, Consensus, Sympathetis'mus, Xympathi'a, Conflux'io, Conspira'tio, Commer'cium, Consor'tium, Homoiopathi'a, Homoëth'nia, Adelphix'is, Symbolis'mus, Symboliza'tio, Sym'bolum.* Same etymon. The connexion that exists between the action of two or more organs, more or less distant from each other; so that the affection of the first is transmitted, secondarily, to the others, or to one of the others, by means unknown. A knowledge of the particular sympathies between

different organs throws light on the etiology of diseases, their seat, and the particular organs towards which our therapeutical means should be directed. See Irritation.

SYMPEPSIS, Coction.

SYMPEXIS, Concretion.

SYMPHORA, Congestion.

SYMPHOREMA, Congestion.

SYMPHORESIS, Congestion.

SYMPHORICAR'PUS RACEMO'SUS, *Snowberry;* from *συμφορεω*, 'to bear together,' and *καρπος*, 'fruit,' owing to the clustered berries. An indigenous plant, *Order* Caprifoliaceæ, *Tribe* Loniceræ, whose berries are large, bright white, and remain till winter; flowering from June to September. The root is tonic and astringent, and has been used in ague; and by the Indians in syphilis.

SYMPHYIA, Symphysis.

SYMPHYOCEPH'ALUS, *Metop'ages, Cephalop'ages*, from *συμφυης*, (*συν*, and *φυω*, 'to grow,) 'united together,' and *κεφαλη*, 'head.' A monstrosity in which twins are united by the head.

SYMPHYSEOT'OMY, *Symphyseot'omy, Synchondrot'omy, Symphyseotom'ia, Symphysiotom'ia*, from *symphysis*, and *τεμνω*, 'I cut.' The *operation* or *section of the Symphysis, Sigaultian operation* or *section*. This operation is performed with the view of augmenting the diameter of the pelvis, in order to facilitate delivery in certain cases of faulty conformation of that cavity, with wedging of the head of the child therein. To perform the operation, (F.) *désymphyser*, the female is placed on her back; the pubes is shaved; and, with a strong scalpel, the soft parts are divided on the median line. The articulation is then cut. As soon as the fibrous parts, which hold the bones together, are divided, they separate to a certain distance from each other; and the delivery may be accomplished. The knife, with which the operation is performed, is called, by the French, *Couteau symphysien*.

SYMPHYS'IA, from *συμφυω*, 'to grow together.' A malformation consisting in the union of parts that are usually divided.—Breschet.

SYMPHYSIOTOMIA, Symphyseotomy.

SYM'PHYSIS, *Symphy'ia, Coalescen'tia, Coal'itus, Coalit'io*, (F.) *Symphyse*, from *συμφυω* (*συν*, 'with,' and *φυω*, 'I grow'), 'I unite together.' A union of bones. The bond of such union. The aggregate of means used for retaining bones *in situ* in the articulations. The name symphysis has, however, been more particularly appropriated to certain articulations; as to the *symphysis pubis, sacro-iliac symphysis*, &c. See Monster.

SYMPHYSIS, Coalescence, Commissure, Insertion — s. Cartilaginea, Synchondrosis — s. Ligamentosa, Syndesmosis — s. Ossium muscularis, Syssarcosis — s. Pubis, Pubic articulation.

SYMPHYSOTOMY, Symphyseotomy.

SYMPHYTOS, Hereditary.

SYM'PHYTUM. Same etymon. *Symphytum officina'lē* seu *album* seu *Bohe'micum, Consol'ida major, Comfrey, Alum, Alus*, (Prov.) *Knit-back*, (F.) *Grande Consoude, Oreilles d'âne*. *Ord.* Boraginaceæ. *Sex. Syst.* Pentandria Monogynia. The roots of this European plant are very mucilaginous, and are employed as emollients. They are used in decoction in hæmoptysis, dysentery, chronic diarrhœa, &c.

SYMPHYTUM, Solidago virgaurea — s. Album, Symphytum — s. Bohemicum, Symphytum — s. Minimum, Bellis — s. Minus, Prunella — s. Officinale, Symphytum.

SYMPHYTUM PETRÆ'UM, *Coris Monspelien'sis, Montpel'lier Coris*. An intensely bitter and nauseous plant, which is said to have been useful in syphilis. See, also, Sanicula.

SYMPLOCARP'US ANGUSTISPATHA, Dracontium angustispatha — s. Fœtidus, Dracontium fœtidum.

SYMPOD'IA, *Monopod'ia*, from *sym*, and *πους, ποδος*, 'a foot.' A monstrosity in which there is coalescence of the lower extremities.

SYMPTOM, *Sympto'ma, Ac'cidens, Casus*, from *sym*, and *πτωμα*, 'a fall,' from *πιπτω*, 'I fall.' Any change, perceptible to the senses in any organ or function, which is connected with morbific influence. It is by the aggregate and succession of symptoms that a disease is detected. The term *symptoms of symptoms* has been used for the effects which result from the symptoms of a disease; but which effects are not essentially connected with the disease itself. Thus, the debility arising from the frequency of evacuations in dysentery is a symptom of symptoms. *Symptom*, at one time, was generally used in the same sense as *sign*; but with many, perhaps most, of the present day, the former signifies a functional or vital phenomenon of disease, whilst the latter is applied to that which is more directly physical;—and hence the expressions *functional* or *vital phenomena* or *symptoms*, in contradistinction to the *physical signs* afforded by auscultation, percussion, &c. See Sign.

SYMPTOMA TURPITUDINIS, Nymphomania.

SYMPTOMAT'IC, *Symptomat'icus*, (F.) *Symptomatique*. That which is a symptom of some other affection. Thus we speak of a symptomatic disease, in opposition to one that is idiopathic.

SYMPTOMATOGRAPHY, Semeiography.

SYMPTOMATOL'OGY, *Symptomatolog''ia, Symbolog''ica*, from *symptoma*, and *λογος*, 'a treatise.' The branch of pathology, the object of which is the knowledge of symptoms.

SYMPTO'SIS, from *sym*, and *πιπτω*, 'I fall.' Depression or collapse, emaciation or atrophy, either of the whole body or of a part.

SYN, Sym.

SYNÆREMA, Corrugation.

SYNÆTION, Concausa.

SYNANCHE, Cynanche, Cynanche tonsillaris. *SYNANCIE*, Cynanche.

SYNAPHYMENITIS, see Ophthalmia.

SYNAPTASE, see Amygdalin.

SYNARTHRODIA, Synarthrosis.

SYNARTHRO'DIAL, *Synarthrodia'lis*, from *syn*, and *αρθρωσις*, 'articulation.' That which belongs to synarthrosis; as *Synarthrodial articulation*.

SYNARTHRO'SIS, *Synarthro'dia, Abarticula'tio, Coarticula'tio*. An immovable articulation. Synarthrosis includes three species: *Suture, Harmony*, and *Gomphosis*.

SYNATHROESIS, Congestion.

SYNATHROISMUS, Congestion.

SYNCAN'THUS, from *syn*, and *κανθος*, 'the corner of the eye.' A morbid adhesion between the globe of the eye and the orbit.

SYNCHONDRO'SIS, *Sym'physis* seu *Cop'ula* seu *Connex'io cartilagin'ea, Chondrosyndesm'us*, from *syn*, and *χονδρος*, 'a cartilage.' Union or articulation of bones by means of cartilage:—as the articulations of the ribs with the sternum, by means of their cartilages of prolongation.

SYNCHONDROTOMY, Symphyseotomy.

SYNCHRONIUS, Synchronous.

SYN'CHRONOUS, *Syn'chronus, Synchron'ius, Isoch'ronous*, from *syn*, and *χρονος*, 'time.' That which occurs at the same time. Thus the pulsations of an artery are said to be synchronous with those of the heart.

SYNCHRONUS, Synchronous.

SYNCHYSIS, Confusio — s. Sparkling, Confusio.

SYNCIPUT, Sinciput.

SYNCLONESIS, Synclonus.

SYN'CLONUS, *Synclone'sis*, from *συγκλονεω*, (*συν*, and *κλονεω*, 'I shake,') 'I shake together.' Tremulous, simultaneous, and chronic agitation of various muscles, especially when excited by the will; *Clon'ici universa'les, Clonus*, (Young.) Also, general spasm, *spas'mus universa'lis*. See Tremor, Chorea, &c.

SYNCLONUS BALLISMUS, Paralysis agitans — s. Beriberia, Beriberi — s. Chorea, Chorea — s. Raphania, Raphania — s. Saltans, Chorea — s. Tremor, Tremor.

SYNCOMIS'TUS, from *συγκομιζω*, (*συν*, and *κομιζω*,) 'I bring together.' *Autop'yros, Panis domes'ticus, secunda'rius, ciba'rius, confuса'neus.* Bread of the whole wheat, or of the unsifted meal. *Household bread.* Also a cataplasm made of the same.

SYN'COPAL, *Syncopa'lis, Syncop'ticus, Syncop'tus.* Same etymon as Syncope; as *Syn'copal Fever, Febris Syncopa'lis.* A pernicious intermittent, characterized by repeated attacks of syncope.

SYN'COPĒ, from *συγκοπτω*, (*συν*, and *κοπτω*, 'to fall,') 'I fall down.' *An'imi defec'tio* seu *deli'quium, Leipopsych'ia, Lipopsych'ia, Apsych'ia, Apsyx'ia, Lipsis An'imi, Asphyx'ia, Apopsych'ia, Lipothym'ia, Leipothym'ia, Lipothyx'ia, Eclips'is, Su'bitus animi casus, Anencephalohæ'mia, Ap'sychy, Swoon, Swooning, Fainting, Fainting fit, Faintness, Exolu'tion,* (Sc.) *Drow, Dualm, Swarff, Swerf, Swarth,* (Prov.) *Fower, Swebbing, Sweeming, Swounding, Sound,* (F.) *Évanouissement, Défaillance, Pamoison.* Complete and, commonly, sudden loss of sensation and motion, with considerable diminution, or entire suspension of the pulsations of the heart and the respiratory movements. Syncope is, commonly, an affection of no consequence; but, sometimes, it is an index of diseased heart. Placing the patient in the horizontal posture; sprinkling cold water over the face, and the application of volatile substances to the nose, are all that will be required during the fit. See Asphyxia, and Suffocation.

An approach to this condition is termed *faintishness;* and the person is said to be *faint,* (Prov.) *Sweemish.*

SYNCOPE ANGENS, Angina pectoris — s. Anginosa, Angina pectoris.

SYNCOPTICUS, Syncopal.

SYNCOPTUS, Syncopal.

SYNCRITICA, Astringents.

SYNDACTYLUS, Aschistodactylus.

SYNDESMI'TIS, see Ophthalmia. Also, inflammation of articular ligaments: *Inflamma'tio ligamento'rum,* from *syndesmos,* 'a ligament,' and *itis,* denoting inflammation.

SYNDESMOG'RAPHY, *Syndesmograph'ia,* from *syndesmos,* 'a ligament,' and *γραφη,* 'a description.' A description of the ligaments. The part of anatomy which describes the ligaments.

SYNDESMOL'OGY, *Syndesmolog''ia,* from *syndesmos,* 'a ligament,' and *λογος,* 'a treatise, discourse.' A treatise on the ligaments.

SYNDES'MO-PHARYNGE'US. A fasciculus of the constrictor pharyngis superior.

SYNDESMOS, Ligament.

SYNDESMO'SIS, *Synneuro'sis, Synyme'nesis, Connex'io* seu *Sym'physis ligamento'sa, Commis'su'ra ner'vea, Connerva'tio, Colliga'tio,* from *syndesmos,* 'ligament.' The articulation of two or more bones by means of ligament; — as of the radius with the ulna.

SYNDESMOT'OMY, *Syndesmotom'ia,* from *syndesmos,* 'ligament,' and *τεμνω,* 'I cut or dissect.' Dissection of the ligaments.

SYNDESMUS, Bandage, Ligament.

SYN'DROMĒ, from *syn,* and *δρομος,* 'a course.' *Concur'sus, Concourse.* A name given by the Empirical Sect to the union of symptoms which takes place in diseases:—*Syndromē pletho'rica,* for example, meant the union of symptoms produced by plethora.

SYNDYASMUS, Coition.

SYNECHES, see Continued fever.

SYNECHI'A, from *syn,* and *εχειν,* 'to have,' or 'to hold.' Adhesion between the iris and transparent cornea, or between the iris and crystalline lens. The former case is called *Synechia ante'rior;* the latter, *S. poste'rior.*

SYNENERGIA, Synergy.

SYNERGIA, Synergy.

SYNERGIE, Synergy.

SYN'ERGY, *Synergi'a, Synenergi'a,* (F.) *Synergie;* from *syn,* and *εργον,* 'work.' A correlation or concourse of action between different organs in health; and, according to some, in disease.

SYNESIS, Intellect.

SYNEUROSIS, Syndesmosis.

SYNEZI'SIS, *Synize'sis, Considen'tia,* from *syn,* and *ζευγνυειν,* 'to join.'

SYNEZI'SIS PUPILL'Æ, *Parop'sis Synizesis, Cali'go à Synizesi, Caligo* seu *Imperfora'tio* seu *Phthi'sis pupillæ, Amyo'sis, Closure* or *occlu'sion* or *obliтera'tion of the Pupil.* This disease is sometimes a faulty conformation, depending upon the continued existence of the membrana pupillaris, or the absence of the pupil. It is, in other words, *congenital.* At other times, it is owing to accident, and supervenes on violent ophthalmia, or on the operation for cataract. They who are affected with synezisis are completely blind: the iris having no central aperture. In certain cases, a remedy may be obtained by making an opening in the iris, which may supply the place of the pupil, and through which the rays of light may reach the retina. This operation is called the *operation for artificial pupil.*

SYNGÉNES, Hereditary.

SYNGENICUS, Congenital.

SYNHYMENESIS, Synymenesis.

SYNIMENESIS, Synymenesis.

SYNIZESIS, Considentia, Synezisis.

SYNNEUROSIS, Syndesmosis.

SYN'OCHA, from *συνεχω,* (*συν,* and *εχω,* 'I have or hold,') 'I continue.' *Inflam'matory* or *Dynam'ic Fever, Angiop'yra, Sthenop'yra, Febris causo'des* seu *caumato'des* seu *deu'rens* seu *ardens* seu *contin'ua sanguin'ea* seu *contin'ua non putris* seu *acuta'tica* seu *acu'ta* seu *acu'ta sanguin'ea* seu *con'tinens* seu *continens non pu'trida* seu *angioten'ica* seu *sthenica* seu *sanguin'ea* seu *inflammato'ria, Homot'onos, Syn'ochus* (Vogel), *S. impu'tris* (Galen), *Eue'cia cauma* seu *ton'ica, Phlogop'yrus, Cauma, Calentura continua,* (F.) *Fièvre ardente* ou *continente inflammatoire* ou *sanguine* ou *irritative* ou *angeioténique* ou *inflammatoire, Gastro-entérite intense; General inflammation.* A species of continued fever, characterized by increased heat; and by quick, strong, and hard pulse; urine high-coloured; disturbance of mind slight. It requires, of course, the most active treatment.

SYNOCHA RHEUMATICA, Rheumatism, acute — s. Vaccina, Vaccina.

SYN'OCHAL, *Synocha'lis;* same etymon. Relating to, or having the characters of, synocha.

SYN'OCHUS, *Eue'cia syn'ochus, Febris lenta,* (Linnæus,) same etymon. Continued fever, compounded of synocha and typhus: — in its commencement often resembling the former; in its progress, the latter: *Mixed fever, Common continued fever, Syn'ochoid fever.* See Continued fever, Fever, and Typhus.

SYNOCHUS, Synocha — s. Biliosa, Fever, gastric, Fever, bilious — s. Catarrhalis, Influenza — s. Icte-

rodes, Fever, yellow — s. Imputris, Synocha — s. Miliaria, Miliary fever—s. Varicella, Varicella.

SYNOLCE, Spasm.

SYNONIA, Synovia.

SYNOSTEOG'RAPHY, *Synosteogra'phia*, from *syn*, *οστεον*, a 'bone,' and *γραφω*, 'I describe.' The part of anatomy which describes the joints.

SYNOSTEOL'OGY, *Synosteolog''ia*, from *syn*, *οστεον*, 'a bone,' and *λογος*, 'a treatise.' A treatise on the joints.

SYNOSTEO'SIS, *Synosto'sis*, from *syn*, and *οστεον*, 'a bone.' Union by means of bone.

SYNOSTEOT'OMY, *Synosteotom'ia*, from *syn*, 'with,' *οστεον*, 'a bone,' and *τεμνειν*, 'to cut.' Dissection of the joints.

SYNOSTOSIS, Synosteosis.

SYNO'VIA, from *syn*, and *ωον*, 'an egg.' *Mucila'go, Un'guen* seu *Unguen'tum* seu *Smegma articula're*, *Syno'nia*, *Axun'gia articula'ris*, *Mucila'go articulo'rum* seu *junctura'rum*, *Humor articula'ris*, *Hydrarthrus*, *Humor* seu *Hu'midum nati'vum* seu *Gluten articulo'rum*, *Arthrohydrine*, (F.) *Synovie*. A fluid resembling the white of egg, which is exhaled by the synovial membranes surrounding the moveable articulations. The synovia has been found, on analysis, to consist of water, albumen, soda, chloride of sodium, phosphate of lime, and — Fourcroy fancied — uric acid. Its use is to lubricate the joints, and the sheaths in which tendons play.

SYNO'VIAL, *Synovia'lis*. That which relates to the synovia.

SYNOVIAL GLANDS, *Havers's Glands*, *Gland'ulæ articula'res* seu *Synovia'les* seu *Haversia'næ*, are the secretory fringes, which float in the interior of the synovial capsules (see Capsules.) They do not seem to be glandular. They have been called *Syno'vial fim'briæ*, (F.) *Franges synoviales*.

SYNOVI'TIS, from *Synovia*, and *itis*, a termination denoting inflammation. A term, badly compounded, applied at times to inflammation of the synovial membrane, *arthrophlogo'sis synovia'lis*. When it affects the bursæ, it is, sometimes called *Bursi'tis*.

SYNOVITIS RHEUMATISMALIS, Rheumatism, (acute.)

SYN'TASIS, *συντασις*, from *συντεινω*, (*συν*, and *τεινω*, 'I stretch,') 'I strain.' Tension of parts: hence *συντατικα*, are medicines which render parts tense. *Syntax'is*, on the other hand, means *Colliqua'tio*, or wasting of the body; from *συντηκω*, 'I melt together.'

SYNTAXIS, Articulation, Reduction, Taxis—s. Serrata, see Suture.

SYNTECOPYRA, Hectic fever.

SYNTECTYCOPYRA, Hectic fever.

SYNTENO'SIS, from *syn*, and *τενων*, 'a tendon.' A species of articulation in which two bones are joined by means of tendon; as the sesamoid bones with the toes, the rotula with the tibia, &c.

SYNTERESIS, Prophylaxis.

SYNTERETICUS, Prophylactic.

SYNTEXIS, Colliquation, Consumption, see Syntasis.

SYNTHENA. A term employed by Paracelsus to designate a species of epilepsy, accompanied by cardialgia and tormina.

SYN'THESIS, *Reu'nio*, 'composition or putting together,' from *syn*, and *τιθημι*, 'I place.' A surgical operation, which consists in uniting parts that are divided; and approximating such as are separated or distant from each other. *Reu'nio par'tium separata'rum*, *Syn'thesis of continu'ity*, means the union of the edges of a wound, or the approximation of the extremities of a fractured bone. *Syntheis of contigu'ity* is the reduction of displaced organs; as in cases of hernia and luxations.

SYNTHESIS, Composition.

SYNTHETIS'MUS, same etymon. The aggregate of operations and means for reducing a fracture, and maintaining it reduced: — comprising extension, counter-extension, coaptation, and bandaging.

SYNTONINE, see Fibrin.

SYNTRIMMA, Contritio.

SYNTRIPSIS, Contritio.

SYNTROPHOS, Connutritus.

SYNULOSIS, Cicatrization.

SYNULOTICA, Cicatrisantia.

SYNUSIA, Coition.

SYNYME'NESIS, *Synhyme'nesis*, *Synime'nesis*, from *syn*, and *υμην*, 'a membrane.' Union of bones by membrane, as in the case of the bones of the head in the fœtus.

SYNYMENESIS, Syndesmosis.

SYPHAR, Peritoneum.

SYPHILIDES, Syphili'da, (F.) *Dermo-syphilides*, *Dermatosies véroleuses*. Same etymon as Syphilis. The cutaneous eruptions that accompany constitutional syphilis are so denominated by the French writers.

SYPHILIDIA'TER, *Syphilidia'trus*, from *Syphilis*, and *ιατρος*, 'a physician.' A pox doctor. One who occupies himself in treating syphilis.

SYPHILIDOMANIA, Syphilomania.

SYPHILIPHO'BIA, from *Syphilis* and *φοβος*, 'dread.' A morbid dread of syphilis, giving rise to fancied symptoms of the disease: a form of hypochondriasis.

SYPH'ILIS, *S. vene'rea* seu *malig'na*, *Siphilis*, *Syphilis'mus*, *Cachex'ia* seu *Cacochym'ia Vene'rea*, *Malum vene'reum*, *Puden'dagra*, *Me'vium*, *Lues*, *L. vene'rea* seu *syphilis*, *Morbus Gal'licus* seu *Ital'icus* seu *Hispan'icus* seu *Neapolita'nus* seu *In'dicus* seu *aphrodisi'us*, *Paturea*, *Basilis'cus*, *Boæ*, *Sod'oma Gallo'rum*; *Venereal*, *Venereal Disease*, *Pox*, *French Pox*, *French Crust*, *French Distemper*, *Foul Disease*, old cant term, *Grincomes*, (Prov.) *Pip*, (Sc.) *Glengore*, *Glengour*, *Grandgore*, (F.) *Vérole*, *Maladie vénérienne*, *Mal de Naples*, *Mal Français*, *Maladie de Vénus*. The etymology of syphilis is unknown. Some consider it to proceed from *συς*, 'a hog,' and *φιλεω*, 'I love;' others, from *συν*, 'with,' and *φιλεω*, 'I love;' and others, with more probability, from *σιφλος*, — formed, by contraction, from *σιταλος*,—'a reproach,' &c. It is an infectious disease, communicable by coition, or by the contact of parts that are only lined with a thin epidermis; as the lips, nipple, &c. It generally makes its first appearance by a chancre, followed sooner or later by a bubo. The chancre is a *primary* symptom or sore; but there are others which are *secondary* or *constitutional*. These are: — ulcers in the throat; copper-coloured blotches on the skin; pains in the bones, nodes, &c.: the last are sometimes termed *tertiary* phenomena. The origin of syphilis is not known. It is believed to have been introduced into Europe from America, at the end of the 15th century [?]. Its progress is extremely variable, as well as its duration, which is often unlimited, if left to itself. Mercury may be esteemed the best remedy, but the disease admits of cure without it. Almost every antisyphilitic composition, whose use is attended with success, probably contains mercury united with diaphoretics or other medicines. It is generally sufficient to keep the mouth sore for a fortnight for the cure of chancre: for venereal sore throat, and other recent constitutional symptoms, eight or ten weeks will be required; and, of course, a longer time, if these symptoms have persisted longer. Sometimes, after mercury has been given for a time, the symptoms continue stationary; and do not yield until the mercury has been discontinued, and

tonics and eutrophics have been administered. The preparations of iodine have been much used, of late, in the revellent treatment of this disease.

Syphilis Indica, Frambœsia.

Syphilis Pseudo-Syphilis, *Lues Syphilo'des, Pseudo-syphilis.* A term given to ulcers or other affections that resemble syphilis, but are indeterminate in their character, — the symptoms being irregular in their appearance, and usually yielding spontaneously, or under the use of tonics, change of air, &c. The condition has not been at all well defined. The *Sivvens, Radesyge,* &c., have been referred to this head.

SYPHILISATION, Syphilization.

SYPHILISMUS, Syphilis.

SYPHILIT'IC, *Syphilit'icus,* (F.) *Syphilitique, Vérolique, Vérolé.* Belonging, or relating to syphilis — as '*a syphilitic* ulcer.'

SYPHILIZA'TION, *Syphilisa'tio,* (F.) *Syphilisation.* Saturation of the system by inoculation with the matter of syphilis. It has been used as a curative procedure in syphilis, as well as a preventive of that disease; and for the cure of other cachexiæ, as cancer.

SYPHILODERM'A, from *syphilis,* and *δερμα,* 'skin.' A cutaneous eruption of a syphilitic character. — E. Wilson.

SYPHILOG'RAPHER, from *syphilis,* and *γραφω,* 'I describe.' A writer on syphilis.

SYPH'ILOID, *Syphiloï'des;* from *syphilis,* and *εἰδος,* 'resemblance.' Resembling syphilis,— as '*a syphiloid* affection.'

SYPHILOMA'NIA, *Syphilidoma'nia,* — vulgarly, *Noddle Pox.* A mania, with which some persons are affected, so that they subject themselves to antivenereal treatment, under the erroneous impression that they are affected with syphilis.

SYPHITA, Somnambulism.

SYPHO AURICULARIS, Otenchytes.

SYPHON, see Siphon.

SYRIGMOPHO'NIA, from *συριγμος,* 'piping,' and *φωνη,* 'voice.' A piping state of the voice.

SYRIGMUS, Tinnitus aurium.

SYRINGA, Eustachian Tube, Fistula, Syringe, Trachea — s. Clysmatica, Syringe, (Clyster.)

Syrin'ga Vulga'ris, *Lilac vulga'ris, Common Lilac. Ord.* Oleaceæ. The leaves and fruit are bitter and somewhat acrid, and have been used as tonics and antiperiodics.

SYRINGE, *Syr'inx, Syrin'ga, Sipho Siphun'culus, Squirt,* (F.) *Seringue,* from *συριγξ, συριγγος,* 'a pipe.' A familiar apparatus through which any liquor is injected.

Various forms of syringe are used in medicine and surgery.

Syringe, Clyster, *Syrin'ga clysmat'ica, Clysantli'um,* (F.) *Clysopompe.* A syringe for administering clysters.

Syringe, Cupping, Antlia sanguisuga.

SYRINGES AËRIFERI, see Bronchia.

SYRINGICUS, Fistulous.

SYRINGI'TIS EUSTA'CHII, Inflammation of the Eustachian tube.

SYRINGMOS, Tinnitus aurium.

SYRINGODES, Fistulous.

SYRINGOTOME, Syringot'omus, Syringot'omum, from *συριγξ, συριγγος,* 'a pipe,' 'a fistula,' and *τεμνειν,* 'to cut.' A surgical instrument, formerly used in the operation for *fistula in ano.* It is a bistouri, concave at its edge, and terminated by a long, flexible, probe-pointed stylet. This stylet or probe was first introduced by the external opening of the fistula into the rectum, whence it was drawn externally through the anus, carrying with it the cutting edge of the instrument, which divided the intermediate parts.

SYRINGOT'OMY, *Syringotom'ia.* Same etymon as the last. The operation for fistula in ano by incision.

SYRINX, Eustachian tube, Fistula, Syringe, Trachea — s. Hiera, Vertebral column.

SYRMAIS'MOS, from *συρμαιζω,* 'I evacuate.' A gentle evacuation by vomiting or stool.

SYROP, Syrup — *s. d'Ail,* Syrupus allii — *s. d'Armoise composé,* Syrupus aromaticus — *s. de Chicorée composé,* Syrupus de cichorio compositus — *s. des Cinq racines,* Syrupus e quinque radicibus — *s. de Coquelicot,* Syrupus rhœados — *s. de Cuisinier,* Syrupus de sarsaparillâ et sennâ compositus — *s. d'Éther,* Syrupus cum æthere sulphurico paratus — *s. de Gingembre,* Syrupus zingiberis — *s. de Guimauve,* Syrupus althææ — *s. de Longue vie,* Mellitum de mercuriali compositum — *s. de Mercure,* Syrupus de mercurio mediante gummi — *s. de Mou de veau,* see Syrupus zingiberis — *s. de Mûres,* Syrupus mori — *s. de Nerprun,* Syrupus rhamni — *s. de Pavots blancs,* Syrupus papaveris — *s. de Pommes composé,* see Syrupus sennæ — *s. de Quinquina avec le Vin,* Syrupus de kinâ kinâ cum vino — *s. de Roses pâles,* Syrupus rosæ — *s. de Roses rouges,* Syrupus rosæ — *s. de Vinaigre,* S. aceti.

SYRUP, *Sirup, Syr'upus, Serapi'um, Serape'um,* (F.) *Syrop, Sirop, Saccharolé liquide, Saccharhydrolé;* derived, according to some, from *συρω,* 'I draw,' and *οπος,* 'juice;' but more probably, from the Arabic *Siruph, Sirab,* or *Scharab,* which signifies 'a potion.' A saturated solution of sugar in water, either simply, or united with some vegetable or other principle. Syrups, in general, require two pounds of sugar to the pint, and they are judged to be sufficiently boiled when a portion, taken up in a spoon, flows like oil. In the Pharmacopœia of the United States, it is directed, that syrups, whose density is not precisely determined by the process, should have the s. g. 1·261 when boiling, and about 1·319 at ordinary temperatures. Syrups should be kept in small bottles in a cool place. They are chiefly used to render medicines palatable. See Syrupus simplex.

Syrup of Almonds, Syrupus amygdalæ.

Syrup, Antiscorbutic, Syrupus antiscorbuticus — s. Balsamic, Syrupus tolutanus.

Syrup of Buckthorn, Syrupus rhamni — s. of Calf's lungs, see Syrupus zingiberis — s. of Capillaire, common, Syrupus simplex — s. of Cinchona with wine, Syrupus de kinâ kinâ cum vino — s. of Cinchonia, Syrupus cinchoniæ — s. of Citric acid, Syrupus acidi citrici — s. of Clove July flower, Syrupus caryophylli rubri — s. of Clove pinks, Syrupus Caryophylli rubri — s. of Cochineal, Syrupus cocci — s. of Emetine, Syrupus emetinæ — s. of Ether, Syrupus cum æthere sulphurico paratus — s. of Five roots, Syrupus e quinque radicibus — s. of Garlic, Syrupus allii — s. of Ginger, Syrupus zingiberis — s. of Gum Arabic, Syrupus acaciæ,

Syrup, Hive, Syrupus scillæ compositus.

Syrup of Honey, Mellitum simplex — s. of Iodide of iron, Liquor Ferri iodidi — s. of Ipecacuanha, Syrupus ipecacuanhæ — s. of Jalap, Syrupus jalapæ — s. of Lemon, Syrupus limonis — s. of Marshmallow, Syrupus althææ — s. of Meadow saffron, Syrupus colchici autumnalis — s. of acetate of Morphia, Syrupus morphiæ acetatis — s. of muriate of Morphia, Syrupus morphiæ muriatis — s. of Mugwort, compound, Syrupus aromaticus — s. of Mulberries, Syrupus mori — s. of Orange juice, see Syrupus aurantii — s. of Orange peel, Syrupus aurantii — s. of Orgeat, Syrupus amygdalæ — s. of Poppies, Syrupus papaveris — s. of Poppy, red, Syrupus rhœados — s. of Quinia, Syrupus quiniæ — s. of Rha-

tany, Syrupus krameriæ—s. of Rhubarb, Syrupus rhei—s. of Rhubarb, aromatic, Syrupus rhei aromaticus — s. of Rhubarb, spiced, Syrupus rhei aromaticus — s. of Roses, Syrupus rosæ — s. of Roses, red, Syrupus rosæ gallicæ—s. of Saffron, Syrupus croci—s. of Sarsaparilla, Syrupus sarsaparillæ—s. of Sarsaparilla and senna, compound, Syrupus de sarsaparillâ et sennâ compositus — s. of Sarsaparilla, compound, see Syrupus de sarsaparillâ et sennâ compositus—s. of Sarsaparilla, Indian, Syrupus hemidesmi — s. of Scammony, Syrupus de scammonio — s. of Seneka, Syrupus senegæ — s. of Senna, Syrupus sennæ — s. Simple, Syrupus simplex — s. of Squill, Syrupus scillæ — s. of Squill, compound, Syrupus scillæ compositus — s. of Succory, compound, Syrupus de cichorio compositus—s. of Tolu, Syrupus tolutanus—s. of Vinegar, Syrupus aceti — s. of Violets, Syrupus violæ—s. of Wild cherry bark, Syrupus Pruni Virginianæ.

SYRUPUS, S. simplex.

Syrupus Aca'ciæ, *Syrup of Gum Arabic, (Acaciæ* ℥ij, *Sacchar.* ℥xv, *Aq.* f℥viij. Dissolve the gum in the water; add the sugar, and strain. Ph. U. S.) A good pectoral syrup. Dose, f℥j to f℥iij.

Syrupus Ace'ti, *S. Ac''idi Aceto'si, Syrup of Vinegar,* (F.) *Syrop de Vinaigre.* (*Aceti* Oiiss, *sacch. purif.* ℔iiiss. Boil to form a syrup. *Ph. E.*) It is refrigerant and antiseptic. Dose, f℥j to f℥ij.

Syrupus Acidi Acetosi, S. aceti.

Syrupus Ac''idi Cit'rici, *Syrup of Citric Acid.* (*Acid. citric.* pulv. ℥ij; *Ol. Limon.* ♏iv; *Syrup.* Oij. Rub the acid and oil with an ounce of the syrup; add the rest of the syrup, and dissolve with a gentle heat. Ph. U. S.) Virtues the same as those of the Syrupus Limonis.

Syrupus cum Æ'there Sulphu'rico Paratus, *Syrup of Ether,* (F.) *Syrup d'éther.* (Very *pure sugar,* 1000 p.; *distilled water,* 500 p.; dissolve in the cold, and strain; add *sulphuric ether,* 48 p. Shake for five or six days, and draw off the limpid syrup. *Ph. L.*) Properties like those of ether.

Syrupus Al'lii, *Syrup of Garlic,* (F.) *Syrop d'ail.* (*Allii* recent. concis. ℥vj, *acet. destillat.* Oj, *sacchar.* ℔ij. Macerate the garlic in the vinegar, in a glass vessel, for four days; then express the liquor and set it by, that the dregs may subside; lastly, add the sugar to the clear liquor, and proceed in the manner directed for syrup. Ph. U. S.) *Use,* same as that of garlic. Dose, f℥j to f℥iv.

Syrupus Althæ'æ, *S. ex Althæ'â* seu *de Althæâ* seu *Althææ officina'lis, Syrup of Marshmallow,* (F.) *Syrop de Guimauve.* (*Althææ rad. recent.* cont. ℔ss, *sacch. pur.* ℔ij, *aquæ* Oiv. Boil the root in the water to one-half, and press out the liquor; when cold, defecate; add the sugar, and boil. *Ph. L.*) Emollient and demulcent. Dose, f℥j to f℥iij.

Syrupus Amomi Zingiberis, S. zingiberis.

Syrupus Amyg'dalæ, *Syrup of Almonds, S. of Orgeat, Orgeat.* (*Amygdal. dulc.* ℔j, *amygdal. amar.* ℥iv, *aquæ,* Oiij, *sacchar.* ℔vj. Blanch the almonds, and rub them in a mortar to a very fine paste, adding, during the trituration, three fluidounces of the water, and a pound of the sugar. Mix the paste thoroughly with the remainder of the water; strain with strong expression; add the remainder of the sugar to the strained liquor, and dissolve it with the aid of a gentle heat. Strain the syrup through fine linen, and having allowed it to cool, put it into bottles, which must be well stopped, and kept in a cool place. Ph. U. S.)

Syrupus Anticausoticus, see Anticausodic.

Syrupus Antiscorbu'ticus, *S. de Armora'ciâ compositus, Antiscorbu'tic Syrup.* (*Leaves of cochlearia, buckbean, water-cresses, horse-radish root* and *bitter oranges,* each ℔j, *cinnamon,* ℥iss. Cut, and pour on *white wine* ℔iv. Macerate for two days; distil over Oj in a sand-bath; add to this *sugar,* ℔ij, and form a syrup. Again, take what remains in the cucurbit: pass it through cloth; let it rest; decant, and add *sugar* ℔ij; make into a syrup, and clarify with white of egg. Mix it with the first while yet warm. *Ph. P.*) Antiscorbutic, alterative, tonic, stomachic, &c. Dose, f℥ij to f℥j.

Syrupus Aromat'icus, *S. de Artemisiâ compositus, Compound Syrup of Mugwort,* (F.) *Syrop d'armoise composé.* (*Tops of artemisia vulgaris,* in flower, ℥vj, *inula root, ligusticum levisticum,* and *fennel,* each, ℥ss, *pennyroyal, catmint, savine leaves,* each ℥vj, *marjoram, hyssop, pyrethrum, rue, basil,* each ℥iij, *aniseed* and *cinnamon,* each ℥ix: bruise and macerate in *hydromel* ℔xviij; distil over Oss; add to this a pound of *sugar.* Again, take the liquid that remains in the cucurbit, strain it gently; and add *sugar* ℔iv. Then mix the two. *Ph. P.*) Tonic, emmenagogue, &c.

Syrupus de Armoraciâ Compositus, S. antiscorbuticus—s. de Artemisiâ compositus, S. antiscorbuticus—s. Asparagi, see Asparagus.

Syrupus Auran'tii, *S. Aurantio'rum* seu *Citri Aurantii* seu *Cor'ticis Aurantii* seu *Aurantii Corticis* (Ph. U. S.) seu *e Cortic''ibus Aurantio'rum* seu *de Corticē Aurantio'rum, Syrup of Orange peel.* (*Aurant. cort.* cont. ℥ij, *aq. serv.* Oj, *sacch.* ℔ijss. Macerate the peel in the water for twelve hours. Add the sugar. Ph. U. S.) Stomachic. Dose, f℥j to f℥ij.

A Syrup of Orange Juice, Orange Sherbet, Syrupus e succo Aurantiorum, may be made by adding *white sugar* ℔ij to ℔j of the juice of oranges, strained and clarified.

Syrupus Balsamicus, S. tolutanus.

Syrupus Caryophyl'li Rubri, *S. Infusio'nis florum caryophyllo'rum, S. Dianthi Caryophylli, Syrup of Clove July flower* or *of Clove Pinks.* (*Petalorum dianth., caryoph. recent.,* unguibus resectis, ℔j, *aquæ bull.* Oiv, *sacch. purif.* ℔vij. *Ph. E.*) Aromatic.

Syrupus Cassiæ Sennæ, S. sennæ.

Syrupus de Cicho'rio Compos'itus, *S. de Rheo, Compound Syrup of Succory,* (F.) *Syrop de chicorée composé.* (*Root of succory* ℥vj, *leaves of succory* ℥ix, *leaves of fumitory* and *scolopendrium,* each ℥iij, *Alkekengi berries* ℥ij. Boil in *water* Oxiv to Oxij: pass through cloth, and dissolve in *white sugar* ℔v. Boil till it has the consistence of syrup. Again, take *water* Oviij, *rhubarb* ℥vj, *yellow sanders* and *cinnamon,* each ℥ss. Infuse for twenty-four hours; pass through linen, and add the preceding syrup. *Ph. P.*) It is laxative and stomachic. Dose, f℥j to f℥ss.

Syrupus Cinchonæ cum Vino, S. de kinâ kinâ cum vino.

Syrupus Cincho'niæ, *Syrup of Cincho'nia.* (*Simple syrup* one pound; *sulphate of cinchonia* nine grains. Mix.) Six spoonfuls are commonly sufficient to arrest an intermittent.

Syrupus Citri Aurantii, S. aurantii.

Syrupus Cocci, *Syrup of Cochineal.* (*Cocc.* cont. ℈iv. *Aq. destillat. bullient.* Oj (Imp. meas.), *sacchar.* ℔iij, vel q. s. *Sp. rectificat.* f℥iiss, vel q. s. *Ph. L.*) Chiefly used as a coloring agent.

Syrupus Col'chici Autumna'lis, *S. Colchici, Syrup of Meadow Saffron.* (*Rad. colch. autumn. recent.* ℥j, *acidi acetosi,* f℥xvi, *sacch. pur.* ℥xxvj. Macerate the root in the vinegar for two days, occasionally shaking the vessel; then strain with gentle expression. To the strained fluid add the sugar, and boil to a syrup. *Ph. E.*) Diuretic, antiarthritic. Dose, f℥j to f℥ss, or more.

Syrupus Corticis Aurantii, S. aurantii — s. Citri mediceæ, S. limonum — s. e Succo citronum, S. limonum.

Syrupus Croci, *Syrup of Saffron.* (*Croci stigmat.* ℥j, *aquæ fervent.* Oj, *sacch. purif.* ℔iiss. *Ph. L.*) Cardiac. Chiefly used for colouring.

Syrupus Diacodion, Diacodium — s. Dianthi Caryophylli, S. caryophylli rubri.

Syrupus Emeti'næ, *Syrup of Em'etine.* (*Simple syrup* ℔j, *emetine* 16 gr.) In small doses, expectorant; and in large, emetic.

Syrupus Empyreumaticus, Melasses—s. Ferri iodidi, Liquor Ferri iodidi.

Syrupus Hemides'mi, *Syrup of In'dian Sarsaparill'a.* (*Hemidesm.* cont. ℥iv (avoirdup.), *Aq. destillat. bullient.* Oj (Imp. meas.), *sacchar.* q. s. *Ph. D.*) A weak preparation of hemidesmus.

Syrupus Hydrargyri, Syrupus de mercurio mediante gummi—s. Infusionis florum caryophyllorum, Syrupus caryophylli rubri.

Syrupus Ipecacuan'næ, *Syrup of Ipecacuanha.* (*Ipecac.* in pulv. crass. ℥j, *alcohol. dilut.* Oj, *sacchar.* ℔iiss, *aquæ* q. s. Macerate the ipecacuanha in the alcohol for 14 days, and filter. Evaporate the filtered liquor to 6 fluidounces, again filter, and add sufficient water to make the liquid measure a pint; add the sugar, and evaporate by a water-bath to a proper consistence. Ph. U. S.) It may also be prepared by displacement.

Syrupus de Jalap'â, *Syrup of Jalap.* (*Pulv. Jalapæ* ℥x, *sem. coriandr., fœnicul. dulc.* āā ℥ss; *aquæ* f℥xijss, *sacch.* ℥xxv. *Ph. P.*) Cathartic. Dose, f℥ij to f℥ss for children.

Syrupus de Kinâ Kinâ cum Vino, *S. Cinchonæ cum vino, Syrup of Cinchona with wine,* (F.) *Syrop de quinquina avec le vin.* (*Cort. cinchonæ officinalis* ℥ij, *ext. cinchonæ* ℥vj, *vini albi* (*Vin. Lunel.* seu *cujusvis ei similis,*) Oj, *alcohol* (s. g. ·985 to ·915.) f℥j, *sacchar. alb.* ℔iss. Bruise the cinchona; gradually add the alcohol, so as to form a soft mass; pour on the wine; macerate for two days, and strain. Dissolve the extract, add the sugar, and make a syrup. *Ph. P.*) Dose, f℥ss to f℥j.

Syrupus Krame'riæ, *Syrup of Rhat'any.* (*Ext. Kramer.* ℥ij, *aquæ* Oj, *sacchar.* ℔ijss. Dissolve the extract in the water, and filter; then add the sugar, and form into syrup. Ph. U. S. It may also be made by displacement from *kramer.* in pulv. crass. ℔j, *sacchar.* ℔iiss; *aq.* q. s.) An adjunct to astringent mixtures; or given in diarrhœa, a teaspoonful to a child.

Syrupus Limonis, S. Limonum—s. Succi limonis, S. limonum.

Syrupus Limo'num, *S. limonis* (Ph. U. S.) seu *citri med'icæ* seu *e succo citro'num* seu *e succo limo'num* seu *succi limo'nis, Syrup of Lemon. Lemon Syrup.* (*Limon. succ.* colat. Oj, *sacchar.* ℔ij.) Cooling, antiseptic.

Syrupus e Meconio, S. papaveris—s. de Melle, Mellitum simplex.

Syrupus de Mercu'rio Median'tē Gummi, *S. Hydrar'gyri, Mercu'rius gummo'sus Plenck'ii,* (F.) *Syrop de mercure, Mercure gommeux de Plenck.* (*Hydrargyri pur.* ℥j, *p. gum. acaciæ,* ℥iij, *syrup diacod.* ℥ss. Rub together till the mercury is extinguished. *Ph. P.*) Possesses the properties of blue pill. Dose, gr. ij to viij, or more.

Syrupus Mori, *S. e succo moro'rum* seu *succi mori, Syrup of Mul'berries,* (F.) *Syrop de mûres.* (*Mori succ.* colat. Oj, *sacchar. purif.* ℔ij. *Ph. L.*) Gratefully refrigerant.

Syrupus e Succo Mororum, S. mori.

Syrupus Morph'iæ Aceta'tis, *Syrup of acetate of morphia.* (*Liq. morphiæ acet.* f℥j, *syrup* f℥xv. *Ph. D.*) Dose, f℥ss to f℥j, as an opiate.

Syrupus Morph'iæ Muria'tis, *Syrup of mu'riate of morphia.* (*Liq. morph. muriat.* f℥j; *syrup* f℥xvij. M. *Ph. D.*) Dose, f℥ss to f℥j, as an opiate.

Syrupus Morphiæ Sulpha'tis may be made in the same way.

Syrupus Niger, Melasses.

Syrupus Papav'eris, *S. papaveris somnif'eri* seu *papaveris albi* seu *e meco'nio* seu *de meconio, Diaco'dium, Syrup of poppies,* (F.) *Syrop de pavots blancs* ou *Diacode.* (*Papav. capsul.* exsiccat. et contus. exemptis seminibus, ℥xiv, *sacch. pur.* ℔ij, *aq. fervent.* cong. ijss. Macerate the capsules in water for 12 hours; boil to a gallon, and express strongly. Boil the liquor to Oij; and strain while hot. Defecate by rest, and boil to Oj, adding the sugar so as to form a syrup. *Ph. L.*) One ounce contains about one grain of opium. Anodyne and demulcent.

The Dublin college has a Syrupus Opii, called *Common Syrup of Poppies,* which is made by dissolving 18 grains of the *Watery Extract of Opium* in 18 ounces of boiling water. Properties, those of opium and syrup.

Syrupus de Papavere Erratico, S. rhœados — s. de Pomis compositus, see S. sennæ.

Syrupus Proteæ, see Protea mellifera.

Syrupus Pruni Virginia'næ, Syrup of *Wild cherry bark.* (*Pruni Virginian.* in pulv. crass. ℥v, *sacchar.* ℔ij, *Aquæ,* q. s. Moisten the bark with water; let it stand for 24 hours; transfer it to a percolator; pour water gradually upon it, until a pint of filtered liquor has passed. Add the sugar in a bottle, and dissolve by agitation. Ph. U. S., 1851.) Dose, as a demulcent expectorant, f℥i to f℥iij.

Syrupus e Pulmonibus Vitulinis, see Syrupus Zingiberis.

Syrupus Qui'niæ, *Syrup of Quinia.* (*Simple syrup,* 2 pints, *sulphate of quinia,* 64 grains.) Six spoonfuls are commonly sufficient to arrest an intermittent.

Syrupus e Quinquē Radi'cibus, *Syrup of five roots,* (F.) *Syrop des cinq racines.* (*Rad. apii, fœniculi, apii petroselini,* āā ℥v. Infuse for 24 hours in boiling water Oiiss, and strain. *Rad. asparag., ruscі aculeati,* āā ℥v, *aquæ,* Ovij. Boil and reduce to half; adding, towards the end, the residue of the preceding infusion. Boil again for some minutes; strain, and add *white sugar,* ℔vj. *Ph. P.*) Aperient and diuretic. Used in obstructions of the liver, spleen, and mesentery; and in dropsy, &c. Dose, f℥ss to f℥j, or more.

Syrupus Rhamni, *S. Rhamni cathar'tici* seu *de Spinâ cervi'nâ* seu *spinæ cervi'næ, Syrup of Buckthorn,* (F.) *Syrop de nerprun.* (*Rhamn. baccar.* succ. recent. Oiv, *zingib. rad.* concis., *pimentæ bacc.* contrit., āā ℥ss, *sacch. purif.* ℔iiiss. Defecate the juice for 3 days, and strain. To a pint of this, add the ginger and pimento; macerate for 4 hours, and strain; boil what remains to Oiss. Mix the liquors and add sugar, so as to form a syrup. *Ph. L.*) Cathartic, but apt to gripe. Dose, f℥iv to f℥ij.

Syrupus Rhei, *Syrup of Rhubarb.* (*Rhei,* in pulv. crass., ℥ij; *Alcohol,* Oss; *Aquæ,* Oiss; *sacchar.* ℔ij. Mix the alcohol and water; pour f℥iv on the rhubarb, mixed with an equal bulk of sand, and allow the whole to stand four hours; put the mass into a percolator, and gradually pour on the alcohol and water. By means of a water-bath, evaporate to f℥xiij; add the sugar, and make a syrup. Ph. U. S.) Dose to a child, as a laxative, one or two teaspoonfuls.

Syrupus Rhei Aromat'icus, *Aromatic* or *Spiced Syrup of Rhubarb.* (*Rhei* cont. ℥iiss; *Caryophyll.* cont., *Cinnam.* cont. āā ℥ss; *Myrist.* cont. ℥ij; *Alcohol. dilut.* Oij; *Syrup* Ovj. Macerate the rhubarb and aromatics in the diluted alcohol for 14 days, and strain; then, by means of a water-bath, evaporate the liquor to a pint,

and while still hot, mix with the syrup previously heated. Ph. U. S.) It may also be made by the process of displacement.

The aromatic syrup of rhubarb is a gentle carminative cathartic. Dose to a child, f℥j; to an adult, f℥j

Syrupus de Rheo, Syrupus de Cichorio compositus.

Syrupus Rhœ'ados, *S. de papav'erĕ errat'ico* seu *papaveris erratici, Syrup of Red Poppy,* (F.) *Syrop de coquelicot.* (*Rhœad. petal.* recent. lbj, *aq. fervent.* f℥xviij, *sacch. purif.* lbiiss. To the water, heated in a water-bath, add the petals. Remove the vessel; macerate for 12 hours; express; defecate, and add sugar to form a syrup. *Ph. L.*) Chiefly used to give colour.

A factitious syrup is often made of aloes, dissolved in simple syrup.

Syrupus Rosæ, *S. rosa'rum soluti'vus* seu *e rosis siccis* seu *rosæ centifo'liæ* seu *rosa'ceus soluti'vus, Syrup of Roses,* (F.) *Syrop de roses pâles.* (*Rosæ centif. petal.* exsicc. ℥vij, *sacch. purif.* lbvj, *aq. fervent.* Oiv. Macerate the petals for 12 hours. Evaporate the strained liquor to lbiiss. Add the sugar. *Ph. L.*) Gently laxative. Dose, f℥ij to f℥iss, or more.

Syrupus Rosæ Gal'licæ, *Syrup of Red Roses,* (F.) *Syrop de roses rouges.* (*Rosæ Gallic. petal.* exsicc. ℥vij, *aquæ bull.* Ov, *sacch. purif.* lbvj; prepared like the last. *Ph. E.*) Mildly astringent. Added to stomachic infusions.

Syrupus Sacchari, S. Simplex.

Syrupus Sarsaparil'læ. *S. Sarsæ, S. Sarzæ, Syrup of Sarsaparilla.* (*Rad. Sarsap.* cont. lbj, *aquæ bullient.* cong., *sacch. purif.* lbj. Macerate the root for 24 hours; boil to Oiv. Strain while hot; add the sugar, and boil. *Ph. L.*) Used in the same cases as the root. Dose, f℥j to f℥iv, and more.

Syrupus de Sarsaparil'lâ et Sennâ Compos'itus, *Compound Syrup of Sarsaparilla and Senna,* (F.) *Syrop de Cuisinier.* (*Rad. Sarsap.* concis. lbij. Infuse for 24 hours in *warm water* Oxij; boil for a quarter of an hour; pass with expression, and boil again the residuum in Ox of water. Reduce this to Ovj, and repeat the operation 2 or 3 times. Mix all the liquors and boil them together with *flowers of borage, white roses, senna leaves* and *aniseed,* each ℥ij; reduce to half; pass, and add *honey* lbij. Boil to a syrup. *Ph. P.*) It is considered to be alterant, depurative, and sudorific. Dose, f℥ss to f℥ij.

A similar syrup, under the name Syrupus Sarsaparil'læ Compos'itus, *Compound Syrup of Sarsaparilla,* is directed in the Pharmacopœia of the United States. (*Sarsaparill.* cont. lbij; *Lign. guaiac.* rasur. ℥iij; *Rosæ centifol., Sennæ, Glycyrrhiz.* cont. ää ℥ij; *Ol. Sassafras, Ol. Anisi.* ää ℥v.; *Ol. Gaultheriæ* m. iij; *Alcohol. dilut.* Ox.; *Sacchar.* lbviij. Macerate the sarsaparilla, guaiacum wood, roses, senna, and liquorice root in the diluted alcohol for 14 days; express and filter. Evaporate the tincture in a warm bath to four pints; filter, add the sugar, and form into syrup. Lastly, having rubbed the oils with a small quantity of the syrup, mix them thoroughly with the remainder. Ph. U. S.)

It may also be made by the process of displacement.

Syrupus Sarsæ, S. Sarsaparillæ — s. Sarzæ, S. Sarsaparillæ.

Syrupus de Scammo'nio, *Syrup of Scam'mony.* (*Pulv. Scammon.* ℥ss, *sacch. alb.* ℥iv, *alcohol.* (s. g. ·985 to ·915) f℥viij. Heat the mixture moderately: then set fire to the alcohol with a lighted taper; agitate constantly, until the flame is extinguished. Suffer it to cool; pass through cloth, and add *Syrup of Violets,* f℥iv. *Ph. P.*) ℥j contains 18 grains of scammony. Dose, f℥j to f℥ss.

Syrupus Scillæ, *S. scillit'icus* seu *scillæ marit'imæ, Syrup of Squills.* (*Acet. scillæ.* Oj, *sacch.* lbij. Ph. U. S.) Diuretic, expectorant, and emetic. Used in the same cases as the oxymel.

Syrupus Scillæ Compos'itus, *Mel Scillæ Compositum, Compound Honey of Squill, Compound Syrup of Squill, Hive Syrup.* (*Scillæ* cont.; *Senegæ* cont. ää ℥iv; *Antim. et Potassæ Tart.* gr. xlviij; *Aquæ* Oiv; *Sacchar.* lbiiiss. Pour the water upon the squills and seneka, and, having boiled to one-half, strain and add the sugar. Then evaporate to three pints, and while the syrup is still hot, dissolve in it the tartrate of antimony and potassa. It may also be made by the process of displacement. Ph. U. S.)

It is often given as an emetic in cases of croup, and in catarrh, especially in children. Dose, to infants, 10 drops to a drachm, repeated every 15 minutes, if vomiting be desirable.

Syrupus Sen'egæ, *Syrup of Seneka.* (*Senegæ* cont. ℥iv; *Aquæ* Oj; *Sacchar.* lbj. Boil the water with the seneka to one half, and strain; then add the sugar, and form into syrup. Ph. U. S.)

It may also be formed by the process of displacement.

This is a favourite stimulant expectorant [?] with many practitioners. Dose, f℥j or f℥ij.

Syrupus Sennæ, *S. cassiæ sennæ, Syrup of Senna.* (*Sennæ* ℥ij, *sem. foenicul.* cont. ℥j, *sacch. pur.* ℥xv, *aquæ bullient.* Oj. Macerate the senna leaves and fennel-seeds with a gentle heat for an hour. Strain: add the sugar, and make into a syrup. Ph. U. S.) Cathartic. Dose, f℥ij to f℥iss, or more.

The Parisian Codex has a *Syrupus de Sennâ* of a compound character, called *Syrupus de pomis compos'itus,* (F.) *Syrop de pommes composé.* It contains, also, borage, bugloss, &c. Dose, f℥ss to f℥ij.

Syrupus Simplex, *Syrupus* (Ph. U. S.), *S. Sac'chari, Sac'charum clarifica'tum, Liqua'rium, Simple Syrup, Syrup, Common syrup of capillaire.* (*Sacch. purif.* lbiiss, *aquæ* Oj. Dissolve the sugar; set aside for 24 hours; remove the scum, and pour off the clear liquid.) Used to cover nauseous tastes, &c.

Syrupus de Spinâ Cervinâ, Syrupus rhamni — s. de Stœchade communis, see Lavendula.

Syrupus Tolŭta'nus, *S. Toluta'ni* seu *toluif'eræ bal'sami* seu *balsam'icus, Balsam'ic syrup, Syrup of tolu.* (*Tinct. Tolut.* f℥iss; *Aquæ* Oj; *Sacchar.* lbiiss. Mix the tincture with the sugar in coarse powder; expose it on a shallow dish to a gentle heat, until the alcohol has evaporated; pour the water upon it; heat gradually until the sugar is dissolved, and strain. Ph. U. S.) Use—to give flavour.

Syrupus Vi'olæ, *S. violæ odora'tæ, S. viola'rum, S. e succo viola'rum, Syrup of Violets.* (*Flor. recent. viol. odorat.* lbij, *aq. bull.* Oviij, *sacch. pur.* lbxv. Macerate, in a covered vessel, for 24 hours: pass, without expression, through linen; add the sugar so as to form a syrup. *Ph. E.*) Very gently laxative. Dose, f℥j to f℥ij.

Syrupus e Succo Violarum, S. violæ.

Syrupus Zingib'eris, *S. amo'mi zingiberis, Syrup of Ginger,* (F.) *Syrop de gingembre.* (*Tinct. Zingib.* f℥iv; *Aquæ* Oiv; *Sacchar.* lbx. Mix the tincture with four pounds of the sugar in coarse powder; and expose it in a shallow dish to a gentle heat until the alcohol has evaporated. Add the rest of the sugar, and then the water in a covered vessel; heat gradually until the sugar is dissolved, and strain. Ph. U. S.) To the strained liquor add the sugar, and form a syrup.

N. B. The Parisian Codex contained a few other compound syrups besides those enume-

rated; amongst these is a *Syrup of calf's lungs*, *Syrupus e pulmon'ibus vituli'nis*, (F.) *Syrop de mou de veau*, as an expectorant.

These syrups are made according to the usual rule, and possess the virtues of the substances after which they are named.

SYS, Sym.

SYSPA'SIA, from συσπαω, (συν, and σπαω, 'I draw,') 'I contract.' Clonic spasm, with diminished sensibility and inability of utterance. A genus in Good's Nosology, which includes convulsion, epilepsy, and hysteria.

Syspasia Convulsio, Convulsion — s. Epilepsia, Epilepsy—s. Hysteria, Hysteria.

SYSSARCO'SIS, from συν, 'with,' and σαρξ, σαρκος, 'flesh.' *Commissu'ra ossium car'nea*, *Symph'ysis ossium muscula'ris*, *Counex'io ossium carnio'sa*, *Carna'tio*, *Concarna'tio*. Union of bones by means of muscles; such as the union of the os hyoides with the lower jaw, of the scapula with the ribs, &c.

SYSTALCIS, Systole.

SYSTAL'TIC, *Systal'ticus*, *Peristal'tic*; from συστελλω, (συν, and στελλω,) 'I contract.' A *systaltic motion* in a part is one in which there is alternate contraction and dilatation. See Systole.

SYSTAT'ICA, from συνιστημι, (συν, and ιστημι, 'I place,') 'I associate.' Diseases affecting several or all of the sensorial powers simultaneously; irritation or inertness of mind, extending to the muscles, or external senses; or of the muscles, or external senses, extending to the mind; — the 4th order, class *Neurotica*, of Good.

SYSTÊM, *Syste'ma*, from συν, 'together,' and ιστημι, 'I place.' This word, taken in a good sense, means the collection and arrangement of different matters having an analogy to each other, or working towards the same end. In natural history, it means a methodical arrangement of objects for the purpose of facilitating their study. System is, however, sometimes used in an unfavourable sense in physical science, and often means, — a purely gratuitous supposition, by which the march of nature is attempted to be universally explained, and to which every thing is made to bend. In anatomy, system is an assemblage of organs, composed of the same tissues, and intended for similar functions; for instance, the *nervous system*, *muscular system*, &c.

SYSTEMA, System — s. Vasorum, Vascular system.

SYS'TEMATISM. A method, according to which every fact of a science is collected around an opinion, true or false. One who reduces things to such a method is called a *Sys'tematist*.

SYSTEMATIST, see Systematism.

SYSTEMATOL'OGY, *Systematolog''ia*, from συστημα, 'system,' and λογος, 'a discourse.' The doctrine or a treatise of systems.

SYSTÈME VASCULAIRE À SANG NOIR, see Vascular — *s. Vasculaire à sang rouge*, see Vascular.

SYS'TEMIC. Belonging to the general system — as '*systemic* circulation' in contradistinction to the '*pulmonic*.'

SYS'TOLE. Same etymon as Systaltic. *Systal'sis*, *Constric'tio*, *Contrac'tio* seu *Augusta'tio* seu *Submissio* seu *Mica'tio cordis*. The movement of constriction or contraction of the heart, to give impulse to the blood, or to cause its progression. It is opposed to the *Diastole* of the organ.

SYS'TOLIC, *Systol'icus*, (F.) *Systolique*; same etymon. Relating to the systole of the heart,— as 'systolic murmur.'

SYZYGIUM NERVORUM, Par nervorum.

T.

T Bandage, *T fas'cia*, *Fas'cia T formis* seu *Heliodo'ri*, *Cru'cial Bandage*. A bandage shaped like the letter T. It consists of a strip of linen, of variable length and breadth, the middle of which is attached, at right angles, to the extremity of another strip, also of variable length and breadth. When two such strips are attached, at a distance from each other, the bandage is called a *double T*. This bandage is used, principally, for supporting the dressings after the operation for fistula in ano, in diseases of the perinæum, groin, anus, &c.

T Fascia, T Bandage.

TABAC, Nicotiana tabacum—*t. des Savoyards*, Arnica montana—*t. des Moutagnes*, Arnica montana — *t. des Vosges*, Arnica montana.

TABACUM, Nicotiana tabacum.

TAB'ANUS, called, by the *voyageurs*, *Bulldog*. A troublesome fly in the Hudson's Bay territory, which makes a perforation like a leechbite, from which it sucks the blood.

TABARZET, Saccharum album.

TAB'ASHEER, *Tabaschir*, *Tabaxir*. A substance found in the knots of the bamboo, in the East Indies, as a consequence of a morbid condition of the part. It is distinguished for its great proportion of silicic acid, in combination with a small quantity of mineral and vegetable matters; as well as for its slight refractive property. It has been used in obstruction of the bowels. The sweet juice of the bamboo stalks has also been called *Tabasheer*.

TABEFACTION, Emaciation.

TABEFY, Emaciate.

TABEL'LA, *Tab'ula*, *Tabula'tum*, *Lozan'ga*, *Lozan'gia*, *Mor'sulus*, *Morsel'lus*, *Lozenge*, *Tessel'la*, (F.) *Tablette*, 'a small table.' A solid medicine, composed of a powder, sugar, and mucilage. *Electua'rium sol'idum*; and generally shaped like a disk. See Pastil, and Troch. The three comprise the *Saccharolés solides*.

Tabella, Table.

TABELLÆ ABSORBENTES, T. de Magnesiâ.

Tabellæ Ac''idi Oxal'ici, *T. ad sitem*, *Lozenges of Oxalic Acid*. (*Acid. oxalic.* ʒj, *sacch. alb.* ʒss, *ol. limonis*, gtt. xviij seu gtt. xij. Make into lozenges with *mucilage of gum tragacanth*. *Ph. P.*) Lozenges are made in the same way with the citric and tartaric acids. They are refrigerant.

Tabellæ de Althæ'â, *Lozenges of Marshmallows*. (*Rad. althææ* pulv., ʒiss, *sacchar. alb.* pulv. ʒivss; f. massa. *Ph. P.*) Demulcent; expectorant.

Tabellæ Antimonia'les Kuncke'lii, *T. de stib'ii sulphure'to*, *Lozenges of Sulph'uret of Ant'imony*, *Mor'suli antimonia'les* seu *stibii* seu *stibia'ti*, *Trochis'ci stibiati*. (*Amygdal. dulc.* ʒj, *sacch.* ℔ss, *sem. cardam.*, *cinnam. pulv.*, *sulph.*

antim. præpar., āā ℈j; fiant tabellæ. *Ph. P.* Each to weigh 10 grains.) Recommended in cutaneous diseases, blennorrhagia, arthritic pains, &c. Dose, 4 or more.

TABELLÆ AD ARDOREM VENTRICULI, Trochisci carbonatis calcis — t. Cardialgicæ, Trochisci carbonatis calcis.

TABELLÆ DE CAT'ECHU ET MAGNE'SIÂ, *Lozenges of Catechu and Magnesia*, (F.) *Tablettes de cachou et de magnésie*. (*P. catech.* ℈vj, *p. magnes.* ℈iv, *p. cinnam.* ℈iij, *sacch. alb.* ℔ss, *g. tragac.* gr. xij, *aq. cinnam.* q. s. ut f. massa. *Ph. P.* Each to weigh 12 gr.) Antacid, absorbent, and stomachic. Dose, 5 to 10 lozonges.

TABELLÆ CINCHO'NÆ, *T. de kinâ kinâ*, *Bark Lozenges*. (*Ext. cinchon.* sicc. ℈ss, *sacch.* ℈iv, *cinnam.* ℈ss, *mucilag. g. trag.* q. s. ut f. massa. *Ph. P.*) Tonic.

TABELLÆ DE CITRO ET DIACARTHAMO, T. de Scammonio et Sennâ.

TABELLÆ DE FERRO, *Steel lozenges*, *Tabulæ martia'les* seu *instauran'tes* seu *antichlorot'icæ*. (*Ferri limat. porphyriz.* ℈ss, *p. cinnam.* ℈j, *p. sacch.* ℈v, *g. trag.* et *aq. cinnam.* q. s., ut fiat massa. Each lozenge to weigh 12 gr. *Ph. P.*) Tonic, stomachic. Dose, v to x.

Aromatic lozenges of steel. These consist of *sulphate of iron*, with a small proportion of the *Tincture of Cantharides*.

TABELLÆ DE KINÂ KINÂ, T. cinchonæ.

TABELLÆ DE MAGNESIÂ, *T. absorben'tes*, *Magnesia lozenges*. (*Magnes.* ℈j, *sacchar. alb.* ℈iv, *mucil. g. tragac.* q. s. *Ph. P.*) Absorbent and antacid.

TABELLÆ DE RHEO, *Rhubarb lozenges*. (*P. rhej.* ℈ss, *sacch.* ℈v, *mucilag. gum. tragac.* q. s.; f. massa. Each to contain 12 grains. *Ph. P.*) Stomachic and laxative.

TABELLÆ DE SCAMMO'NIO ET SENNÂ COMPOS'ITÆ, *T. de citro et diacar'thamo*, *Compound lozenges of scammony and senna*. (*Scammon.* ℈iij, *Sennæ* ℈ivss, *rhej.* ℈iss, *caryoph.* ℈j, *corticis limon. confect.* ℈j, *sacch.* ℈vj; f. massa. *Ph. P.*) Purgative. Dose, ℈ij to ℈vj, or more.

TABELLÆ AD SITEM, T. acidi oxalici — t. ad Sodam, Trochisci carbonatis calcis — t. de Stibii sulphureto, T. antimoniales Kunckelii.

TABELLÆ DE SUL'PHURE SIM'PLICES, *Simple sulphur lozenges*. (*Sulphur lot.* ℈ss, *sacch.* ℈iv, *muc. g. tragac.* cum aquâ rosâ præpar. q. s. *Ph. P.*) Expectorant, demulcent, &c. Used in diseases of the chest, and in cutaneous affections. Dose, a lozenge.

TABELLÆ DE SULPH'URE COMPOS'ITÆ, *Compound sulphur lozenges*. (*Sulph. lot.* ℈ij, *acid. benzoic.* gr. xij, *rad. irid. p.* ℈ss, *ol. anisi*, gtt. viij, *sacch.* ℈vss, *g. trag.* q. s. *Ph. P.*) Aperient, expectorant, and stimulant [?]. Dose, 4 a day.

TABERNA MEDICA. Pharmacopolium.

TABERNÆMONTANA UTILIS, (after Tabernæmontanus, a German botanist.) A tree of British Guiana, of the *family* Apocynaceæ, called, by the natives, *Hya-Hya*, the bark and pith of which yield a milk, which is used by the savages as a refreshing drink.

TABES, *Maras'mus Tabes*, *Tabum*, from *tabere*, 'to decay;' *Te'kedon*, *Atroph'ia*, *Tab'idness*, *Decline*, *Wasting*. Emaciation of the whole body, with general langnor, hectic fever, and, for the ruost part, depressed spirits.

TABES, Atrophy, Phthisis—t. Coxaria, Ischiophthisis — t. Diabetica, Diabetes mellitus—t. Diuretica, Diabetes mellitus.

TABES DORSA'LIS, *T. Dorsua'lis*, *Maras'mus tabes dorsa'lis*, *Phthisis no'tias* seu *dorsa'lis* seu *sicca*, *Myelophthi'sis*, *Myelatroph'ia*, *Myelanalo'sis*, *Tabes ossis sacri*. A wasting of the body, attended at first with a pain in the back or loins, and afterwards in the neck or head, — caused, it has been conceived, by too early or too frequent addiction to venery.

TABES GLANDULARIS, T. mesenterica, Scrofula — t. Ischiadica, Ischiophthisis — t. Lactea, Atrophia lactantium, see Galactin.

TABES MESENTER'ICA, *T. glandula'ris* seu *scrofulo'sa*, *Atroph'ia mesenter'ica* seu *infant'um* seu *glandula'ris* seu *infanti'lis* seu *dorsi*, *Parabys'mus mesenter'icum*, *Ma'cies Infan'tum*, *Pædatroph'ia*, *Scrof'ula* seu *Rachial'gia* seu *Physcon'cia mesenterica*, *Myelophthi'sis sicca*, *Febris hec'tica infan'tum*, *Phthisis mesara'ica*, *Mesenterophthi'sis*, *Mesenter'ic Disease*, (F.) *Carreau*, *Chartre*, *Scrofules* ou *Écrouelles mésentériques*, *Étisie* ou *Rachialgie* ou *Atrophie* ou *Physconie mésentérique*, *Entéro-mésentérite*, *Tubercules des ganglions mésentériques*, *Phthisie mésentérique*. An engorgement and tubercular degeneration of the mesenteric glands, followed by emaciation and general disorder of the nutritive functions. The disease is often owing to inflammation or irritation of the lining membrane of the intestines, giving occasion to enlargement of the glands of the mesentery,—as injury to the upper or lower extremities causes inflammation, and enlargement of the lymphatic glands of the axilla and groin. It occurs, particularly, in children of a scrofulous diathesis; and in those who are weaned too early, or fed on indigestible substances. Diarrhœa, emaciation, anorexia, or immoderate appetite; hardness and swelling of the abdomen; and, towards the end, hectic fever, are the chief symptoms of this affection; the prognosis of which is unfavourable. On opening the bodies of those who die of the disease, the mesenteric glands are found disorganized, tubercular, or in a more or less advanced state of suppuration. The treatment is the same as in scrophulosis. Frictions may be added over the abdomen and spine; and mercury, in small doses, so as to excite a new action in the system. The food must be easy of digestion, and the bowels be kept soluble.

TABES NUTRICUM, Atrophia lactantium, see Galactia — t. Ossis sacri, Tabes dorsalis — t. Pectorea, Rachitis — t. Pulmonalis, Phthisis pulmonalis — t. Scrofulosa, T. mesenterica — t. Senum, Marasmus senilis.

TABESCERE, Emaciate.

TABID, *Tab'idus*, (F.) *Tabide*. Same etymon as Tabes. Relating or appertaining to tabes. Wasted by disease.

TABIDNESS, Tabes.

TABIF'IC, *Tabif'icus*, (F.) *Tabifique*, from *tabes*, 'consumption,' and *facere*, 'to make.' That which causes consumption or phthisis.

TABLE, *Tab'ula*, *Tabell'a*, *Tabula'tum*, *Lam'ina*, *Paries*, *Squama*. A name given to the plates of compact tissue, which form the bones of the cranium. Of these, one is external; the other *internal*, and called *Tab'ula vi'trea*, on account of its brittleness.

TABLES DE MORTALITÉ, Mortality, bills of.

TABLET, Trochiscus — t. Votive, Tabula votiva.

TABLETTE, Tabella.

TABLETTES DE CACHOU ET DE MAGNÉSIE, Tabellæ de catechu et magnesiâ.

TABLIER, Ventrale cutaneum.

TABOURET, Thlaspi bursa.

TABULA, Tabella, Table.

TAB'ULA VOTI'VA, *Votive tablet*. A tablet, hung up as an offering — *anathe'ma* — in the ancient temples by the sick, descriptive of their diseases, and mode of cure; or by those who had been preserved from some calamity.

TABULÆ ANTICHLOROTICÆ, Tabellæ de ferro —

t. Instaurantes, Tabellæ de ferro — t. Martiales, Tabellæ de ferro.

TABULATUM, Tabella, Table.

TABUM, Ichor, Sanies, Tabes.

TAC, Influenza.

TACAMAHACA, Fagara octandra — t. Caragna, Caranna.

TACCA OCEANICA, see Arrowroot, (Tahiti.)

TACHE, Macula.

TACHE CÉRÉBRALE, Tache méningitique. A red mark or stain, observable in a large number of hydrocephalic children, when pressure is made on the skin. — Trousseau.

TACHE EMBRYONNAIRE, 'Embryonic spot;' *Cu'mulus, C. germinati'vus* seu *prolig''erus, A'rea germinati'va, Nu'cleus cicatric'ulæ* seu *blastoderm'atis, Ger'minal cu'mulus.* A name given by M. Coste to a spot seen on the blastoderma about the end of the first week, from which the development of the embryo proceeds.

According to Bischoff, the blastodermic vesicle consists here of a double layer, (F.) *Feuillet* — the upper one the *serous* or *animal;* the lower, the *mucous* or *vegetative;* and between these is afterwards formed the *vascular layer.*

TACHE GERMINATIVE, see Molecule — *t. Mélanienne*, see Nævus — *t. Méningitique, Tache cérébrale — t. de Naissance*, Nævus — *t. Sanguine*, see Nævus.

TACHENCAUSIS, Combustion, human.

TACHES HÉPATIQUES, Chloasma.

TACHES LAITEUSES, Plaques laiteuses, 'milky spots or patches.' White spots occasionally seen on the heart, and regarded by many pathologists as the results of previous pericarditis.

TACHES DE ROUSSEUR, Ephelides — *t. Rouges*, Spots, red.

TACHETÉ DE ROUSSEURS, see Ephelides.

TACHYIA'TER, *Tachyia'trus.* Same etymon as the next. One who cures speedily.

TACHYIATRI'A, from *ταχυς*, 'quick,' and *ιατρεια*, 'healing.' The art of curing quickly.

TACH'YTOMY, *Tachytom'ia*, from *ταχυς*, 'quick,' and *τομη*, 'incision.' The art of cutting or operating rapidly.

TACITUR'NITY, *Tacitur'nitas, Sigē*, 'silence,' from *tacere, tacitum*, 'to be silent.' 'State of a person who does not speak.' Morbid taciturnity sometimes exists as a symptom of the neuroses, especially of melancholy.

TACT, *Tactus*, from *tangere, tactum*, 'to touch.' A modification of the sense of touch. Passive judgment by the cutaneous nerves regarding bodies exterior to the skin. Tact is passive: Touch, active.

TACTILE, *Tac'tilis;* same etymon. Relating or appertaining to touch.

TACTION, Touch.

TACTUS, Tact, Touch — t. Dolorificus, Haptodysphoria — t. Eruditus, see Palpation.

TAE, Digitus pedis.

TÆDA, *Teda, Dæs, ὁας*, 'a torch.' A term used for a medicine employed under the form of fumigation, pessary, or troch.

TÆ'NIA, *Te'nia, Fas'cia*, from *ταινια*, 'a fillet, a riband.' See Bandage. Also a genus of intestinal worms, characterized by an elongated, flattened, and articulated body, with four suctorial oscula on the head. Of this genus, two only inhabit the human body—the *Tænia lata,* (see Bothriocephalus latus,) and *Tænia solium.*

TÆNIA ACEPHALA, Bothriocephalus latus — *t. à Anneaux courts*, Bothriocephalus latus — *t. à Anneaux longs.* Tænia solium — t. Articulos demittens, Tænia solium — t. Cucurbitina, Tænia solium — t. Dentata, Bothriocephalus latus — t. Grisea, Bothriocephalus latus — t. Hippocampi, Corpora fimbriata — t. Humana armata, Tænia solium — t. Humana inermis, Bothriocephalus latus — t. Hydatigena, Hydatid — t. Lata, Bothriocephalus latus — *t. à Longues articulations*, Tænia solium — t. Membranacea, Bothriocephalus latus — t. Nervosa Halleri, Ganglion of Gasser — *t. Non armé*, Bothriocephalus latus — t. Osculis lateralibus geminis, Bothriocephalus latus — t. Osculis lateralibus solitariis, Bothriocephalus latus — t. Osculis marginalibus solitariis, Tænia solium — t. Osculis superficialibus, Bothriocephalus latus — t. Prima, Bothriocephalus latus — *t. Sans épine*, Tænia solium — t. Secunda, Tænia solium.

TÆNIA SEMICIRCULA'RIS, *T. stria'ta, Gem'inum centrum semicircula'rē, Limbus poste'rior cor'poris stria'ti, Striæ cor'neæ* seu *semiluna'res* seu *termino'les, Fræ'nulum novum, Fascia semicircula'ris,* (F.) *Bandelette des éminences pyrifomes* (Ch.), *Bandelette, B. demicirculaire, Lame cornée.* A medullary, grayish, semitransparent layer, situate in the groove that separates the thalamus opticus from the corpus striatum in the lateral ventricle.

TÆNIA SO'LIUM, *T. os'culis margina'ibus soli'tariis* seu *cucurbiti'na* seu *huma'na arma'ta* seu *artic'ulos demit'tens* seu *secun'da, Hal'ysis solium, Vermis cucurbiti'nus, Lumbri'cus latus, So'lium, Ténia sans épine* ou *à longues articulations* ou *à anneaux longs, Ver solitaire* ou *cucurbitin, Long Tape Worm,* has an almost hemispherical, discrete head; an obtuse beak; the neck full anteriorly; all the joints slightly obtuse, the anterior very short; the next almost square, and the rest oblong; the marginal foramina vaguely alternated. The tænia solium is commonly a few feet long: sometimes its length is enormous. It is said to have been met with 600 feet long. It principally inhabits the small intestines, and is not common. The oil of turpentine, in some form, largely exhibited, is perhaps the best remedy.

TÆNIA STRIATA, T. semicircularis — t. Tarini, Lamina cornea — t. Tenella, Bothriocephalus latus — t. Vulgaris, Bothriocephalus latus.

TÆNIACIDE, Tæniafuge.

TÆNIÆ COLI, see Colon — t. Valsalvæ Coli, see Colon.

TÆ'NIAFUGE, *Tæ'nifuge, Tæ'niacide, Tæ'nicide, Tæniaf'ugum*, from *tænia*, and *fugo*, 'I drive off.' A remedy calculated to expel or destroy tænia.

TÆ'NICIDE, from *tænia*, and *cædo*, 'I kill.' A destroyer of tænia or tapeworm.

TÆNIFUGE, Tæniafuge.

TÆ'NIOLA, *Bandelette;* diminutive of Tænia. Used by Gerber for a simple, band-like, or flat fibre. *Filum tæniaform'ē*, seen under the microscope.

TAFFETAS AGGLUTINATIF, Sparadrapum adhæsivum — *t. d'Angleterre*, see Sparadrapum adhæsivum — *t. Épispastique*, Sparadrapum vesicatorium — *t. Gommé*, see Sparadrapum adhæsivum — *t. Vésicant*, Sparadrapum vesicatorium.

TAFIA, Rum.

TAIE, see Caligo.

TAILLADE, Incision, see *Entaille.*

TAILLE, Lithotomy — *t. Hypogastrique*, Hypogastric operation of lithotomy, see Lithotomy — *t. Postérieure*, see Lithotomy — *t. Recto-vésicale*, see Lithotomy — *t. par le Rectum*, see Lithotomy — *t. Sus-pubiénne*, see Lithotomy.

TAKAMAHAKA, Fagara octandra.

TAKE, Attack.

TAKEN DOWN, see Attack.

TAKING, see Contagious.

TAL. A word formerly employed for **alkali.** It also meant the dung of the peacock.

TALC EARTH, Magnesia.

TALCUM NEPHRITICUM, Nephreticus lapis.

TALEN'TUM, *ταλαντον*. An ancient weight equal to 54 pounds, 2 oz., 5 dr., and 24 grains. *Poids de Marc.* See Weights and Measures.

TALEOLUS, Malleolus.

TALIACOTIAN OPERATION, Rhinoplastic.

TALINUM UMBELLATUM, see *Mistura.*

TALIPES, Kyllosis (Clubfoot) — t. Calcaneus, see Kyllosis—t. Equinus, see Kyllosis—t. Valgus, see Kyllosis — t. Varus, see Kyllosis.

TALLAHATTA SPRINGS, see Alabama, mineral waters of.

TALON, see Calcaneum.

TALPA, 'a mole.' *Topina'ria, Tupina'ria, Talpa'ria, Testu'do,* (F.) *Taupe.* A tumour situate on the head, which has been supposed to burrow like a mole.

TALPARIA, Talpa.

TALUS, Astragalus, Malleolus, see Calcaneum. Pessary.

TAMARA CONGA, Averrhoa carambola.

TAMARÆA ZECLA, Tamarindus.

TAMARIN, Tamarindus.

TAMARIN'DI PULPA, *Pulp of Tamarinds,* (*Tamarinda,* q. s. Digest them with a small quantity of water, until they become of a uniform consistence; then separate the seeds and filaments, by pressing through a hair-sieve. Ph. U. S.)

TAMARINDS, PULP OF, Tamarindi pulpa.

TAMARIN'DUS, *T. Ind'ica, Thamarin'dus, Oxyphœ'nicon, Sil'iqua Arab'ica, Balampul'li, Tamaræ'a zecla, Oxyphœni'cia, Aca'cia Ind'ica, Tamarind tree,* (F.) *Tamarin. Ord.* Leguminosæ. *Sex. Syst.* Triandria Digynia. The pulp of the tamarind with the seeds connected by numerous tough strings, *Tamarindus* (Ph. U. S.), is exported from the West Indies, preserved in syrup. It is refrigerant and laxative. *Tamarind whey* is made by boiling ℥ij of the pulp with lbiss of milk. When strained, it is used as a diluent in fever.

TAMARISCUS, Tamarix Gallica.

TAM'ARIX, *T. Gal'lica* seu *Pentan'dra, Tamaris'cus.* The *Tamarisk tree. Ord.* Tamariscineæ. *Sex. Syst.* Pentandria Pentagynia. The bark, wood, and leaves were formerly employed medicinally; — the former for its aperient and corroborant virtues, in obstructions of the liver; the latter in icterus, hæmoptysis, and some cutaneous affections.

TAMBOUR, CAVITÉ DU, Tympanum.

TAMPA BAY, see Saint Augustine.

TAMPON, see Plugging.

TAMPONNEMENT, Plugging.

TAMUS COMMU'NIS, *Am'pelos melæ'na* (Dioscorides). *Chiro'nia, Gynæcan'thē* seu *Apro'nia* (Pliny), *Bryo'nia nigra, Common Black Bry'ony.* The root is diuretic, and has been given as an antilithic. In the herb-shops of Europe, it is sold as a topical application for removing bruise marks, and in France is called *Herbe aux femmes battues;* 'herb for beaten or bruised women.'

TANACE'TUM, *T. vulga'rē. Tana'sia, Athana'sia, Parthe'nium mas, Hind-heel, Tansy,* (F.) *Tanaisie vulgaire, Herbe aux vers, Coq des Jardins. Ord.* Compositæ. *Sex. Syst.* Syngenesia Polygamia. The leaves and flowers of tansy have a peculiar, strong odour, and warm bitter taste. They are tonic, deobstruent [?], and anthelmintic. Dose, ʒss to ʒj. The infusion is usually drunk as tea.

TANACE'TUM BALSAMI'TA, *T. horten'sĕ, Balsami'ta mas* seu *vulga'ris* seu *suaveolens* seu *major, Costus horto'rum, Mentha Roma'na* seu *Saracen'ica, Costmary, Alecost, Cock-mint,* (F.) *Menthe coq, Herbe au coq, Grand Baume.* A fragrant-smelling herb, somewhat resembling mint, and formerly much esteemed as a corroborant, carminative, and emmenagogue.

TANACETUM HORTENSE, T. balsamita.

TANACE'TUM MULTIFLO'RUM. A South African plant, which is used as a tonic, antispasmodic and anthelmintic. It is given in flatulency, gout, amenorrhœa and dropsy: but is especially prescribed in cases of ascarides lumbricoïdes and other entozoa. It is administered in the form of powder or infusion; the latter acting also as a diaphoretic and diuretic. It is used likewise as a resolvent and anodyne fomentation.

TANAISIE VULGAIRE, Tanacetum.

TANASIA, Tanacetum.

TANGĒ, *ταγη,* 'rancidity.' A putrescent tumour.

TANGHINIA, Cerbera tanghin.

TANGLES, BIG, Pila marina — t. Blue, Gaylussacia dumosa.

TANINUM, Tanninum.

TANNIC ACID, Tannin.

TANNICUM PURUM, Tannin.

TANNIN, from (F.) *tanner,* 'to tan.' *Tan'nicum purum, Tanni'num, Tani'num, Princip'ium Adstringens* seu *Scytodep'sicum* seu *Byrsodep'sicum* seu *Coria'ceum, Scytodep'sium, Mate'ria Scytodeph'ica, Acidum Tan'nicum* seu *Scytodeph'icum* seu *Quercitan'nicum, Tannic acid,* (F.) *Acide tannique.* A principle obtained from oak bark and other astringent vegetables, so called from its forming the principal agent in the process of *tanning.* Pure tannin, obtained from galls, by the action of ether, (see Ph. U. S.) has been employed as an excellent and powerful astringent. Dose, two grains, repeated several times a day.

TANSY, Tanacetum — t. Wild, Potentilla anserina.

TAPER, HIGH, Verbascum nigrum.

TAPE'TUM, *Tapes, Tape'tē,* 'tapestry, a carpet.' *Tapetum choroïdeæ.* A shining spot, on the outside of the optic nerve, in the eyes of certain animals, which is owing to the absence of the pigmentum nigrum, occasioning the reflection of a portion of the rays from the membrana Ruyschiana. Its use appears to be, by reflecting the rays, to cause a double impression on the retina, and thus add to the intensity of vision.

TAPETUM, see Corpus Callosum.

TAPETUM ALVE'OLI, *Membra'na exter'na den'tium.* The outer membrane of the teeth. The lining membrane or periosteum of the alveoli.

TAPEWORM, BROAD, Bothriocephalus latus — t. Long, Tænia solium.

TAPIOCA, see Jatropha manihot — t. Pearl, Jatropha manihot.

TAPSUS BARBATUS, Verbascum nigrum.

TAPSARIA, Decoctum hordei.

TAR, see Pinus sylvestris — t. Barbadoes, Petroleum.

TAR BEER, see Pinus sylvestris.

TAR, MINERAL, Pissasphaltum.

TAR WATER, see Pinus sylvestris — t. Wine, see Pinus sylvestris.

TAR'ACHE, *Tarax'is, Tarag'ma, Tarag'mus,* 'disorder.' A disorder of sight which arises from a blow, compression of the eye, or the action of dust, smoke or other external cause. By some, it is understood to signify mild or incipient ophthalmia.

Ταραχη της κοιλιας, 'disturbance of the belly. Diarrhœa.

TARAGMA, Tarache.

TARAGMUS, Tarache.

TARAGON, Artemisia dracunculus.

TARAHO, Peltandra Virginica.

TARANTISM'US, *Tarentis'mus, Tarantalis'mus, Dinoma'nia, Chore'a Sancti Valenti'ni, Taren'tulism, Tar'antism,* from *Tarentum,* or *Taranto,* where it was observed. A feigned or

imaginary disease in Apulia, characterized by excessive avidity for dancing at the sound of instruments, and which was ascribed, by the vulgar, to the bite of the tarantula. A sort of tarantismus, considered peculiar to Africa, and believed to be spontaneous, has been called *Tarentismus Tangita'nus, Janon-tarentisme.*

TARAN'TULA. Same etymon. *Taren'tula,* (F.) *Tarentule.* A species of spider—the *Ara'nea Tarentula* of Linnæus, *Lyco'sa Tarentula* of Latreille—whose bite has been looked upon as dangerous. Music has been thought to cure it.

TARASCON, MINERAL WATERS OF. Chalybeate springs in the department of Arriège, France. They contain iron and carbonic acid.

TARAXACUM, Leontodon taraxacum — t. Dens leonis, Leontodon taraxacum.

TARAXIS, Tarache, see Ophthalmia.

TARCHON SYLVESTRIS, Achillea ptarmica.

TARENTISMUS, Tarantismus — t. Tangitanus, Tarantismus.

TARENTULA, Tarantula.

TARENTULISM, Tarantismus.

TARGAR, Juniperus communis.

TARI. Palm or cocoa wine, from which sugar was obtained, called *Jagre.* It was once used as a tonic.

TARI'NI PONS, (F.) *Pont de Tarin.* A cineritious substance, between the corpora albicantia, which unites the crura and assists in forming the bottom of the third ventricle. The fossa, at the bottom of which it is placed, is called *Locus perfora'tus posti'cus, Posterior per'forated space, Substan'tia* seu *Lam'ina perfora'ta poste'rior.*

TARO, Arum esculentum.

TARSAL, *Tar'seus,* from *tarsus,* (F.) *Tarsien.* That which relates to the tarsus.

TARSAL ARTICULATIONS result from the union of the bones of the tarsus with each other.

TAR'SEA LATA (LIGAMENTA). Three ligaments, described by Winslow as stretching from the edge of the orbit to that of the tarsi, with which, he thought, they formed a complete layer of the eyelids. Zinn could not trace the ligaments all the way to the tarsi; whilst Haller doubted altogether their ligamentous texture, and Zeis regards them as merely areolar substance.

TARSEUS, Tarsal.

TARSO, in composition, belonging or relating to the tarsus.

TARSO-METATAR'SAL, *Tarso-metatar'seus.* That which relates to tarsus and metatarsus.

TARSO-METATARSAL ARTICULATIONS are those between the bones of the second row of the tarsus and the metatarsal bones. The term *Tarso-metatarsal* is likewise applied to ligaments connected with these joints, some of which are *dorsal,* and others *plantar.*

TARSO-MÉTATARSI-PHALANGIEN DU POUCE, Adductor pollicis pedis—*t. Phalangien du pouce,* Flexor brevis pollicis pedis — *t. Sous-phalangien du petit orteil,* Flexor brevis minimi digiti pedis—*t. Sous-phalangettien du premier orteil,* Flexor brevis pollicis pedis.

TARSOPHY'MA, from *Tarsus,* and *φυμα,* 'a tumour.' A swelling of the tarsus.

TARSOR'RHAPHY, *Tarsorraph'ia,* from *tarsus,* 'the tarsal cartilage,' and *ραφη,* 'suture.' An operation for diminishing the size of the opening between the eyelids, when it is enlarged by surrounding cicatrices.

TARSOT'OMY, *Tarsotom'ia,* from *tarsus,* and *τομη,* 'incision.' The section or removal of the tarsal cartilages.

TARSUS, *ταρσος, Planta prima* seu *Rasse'ta* seu *Rasce'ta pedis, Pe'dium, Clavic'ulæ pedis nodus.* 1. The posterior part of the foot. The tarsus consists of 7 bones, arranged transversely in two rows, between which amputation is sometimes performed. The *first* or *Tibial row,* (F.) *Première rangée, R. jambière,* consists of the astragalus and os calcis: the *second* or *metatarsal,* (F.) *Seconde rangée, R. métatarsienne,* of the scaphoides, cuboides, and three ossa cuneiformia. 2. The *Tarsi,* Tarsal cartilages, *Tarsal fibro-cartilages, Orchoï, Crepid'ines* seu *Coro'næ* seu *Chelæ* seu *Un'gulæ Palpebra'rum, Tharsi, Cil'ia,* are two small cartilaginous layers, seated in the substance of the free edge of each eyelid. The upper is larger and broader than the lower. Both commence at the bifurcated extremity of the tendon of the orbicularis palpebrarum, and pass to the opposite commissure of the eyelids. They are broader in the middle than at their extremities.

TARTAR, Antimonium tartarizatum (improperly), Potassæ supertartras impurus — t. Calcareous, Potassæ subcarbonas — t. Crystals of, Potassæ supertartras.

TARTAR EMETIC, Antimonium tartarizatum.

TARTAR, SALT OF, see Potash, and Potassæ subcarbonas—t. Soluble, Potassæ tartras, see Potash.

TARTAR OF THE TEETH, Odontolithos.

TARTA'REI MORBI. A term employed by Paracelsus to designate certain diseases which he attributed to tartar.

TARTARI CRYSTALLI, Potassæ supertartras.

TARTAR'IC ACID, *Ac'idum tartar'icum* seu *tartaro'sum* seu *tar'tari essentia'lē, Acor tartar'icus, Sal tartari essentia'lē, Tarta'reous acid,* (F.) *Acide tartrique.* (*Potassæ bitart.* ℔iiss, *aq. destillat. ferv.,* cong. iij, *cretæ ppt.* ℔j, *acidi sulph.* ℔j. Boil the bitartrate with two gallons of the water, and gradually add the prepared chalk, until no more bubbles appear; let the tartrate of lime subside; then pour off the fluid and wash the tartrate of lime with distilled water, until it is tasteless. Pour upon it the sulphuric acid, diluted with a gallon of boiling distilled water; and set the mixture aside for 24 hours, occasionally stirring it. Filter and evaporate it to crystallize. *Ph. L.*) It is refrigerant and antiseptic, but is chiefly used for making effervescent draughts with soda.

TARTARUM, Potassæ supertartras impurus—t. Solubile, Potassæ tartras — t. Vitriolatum, Potassæ sulphas.

TARTARUS AMMONIÆ, Ammoniæ tartras — t. Chalybeatus, Ferrum tartarizatum — t. Crudus, Potassæ supertartras impurus — t. Dentium, Odontolithos — t. Emeticus, Antimonium tartarizatum—t. Kalicoferricus, Ferrum tartarizatum — t. Kalinus, Potassæ tartras—t. Lixiviæ, Potassæ tartras — t. Martialis, Ferrum tartarizatum — t. Potassæ ferruginosus, Ferrum tartarizatum — t. Stibiatus, Antimonium tartarizatum — t. Subpotassicus, Potassæ supertartras—t. Superpotassicus, Potassæ supertartras — t. Tartarizatus, Potassæ tartras.

TARTRATE D'AMMONIAQUE, Ammoniæ tartras.

TARTRE BRUT, Potassæ supertartras impurus—*t. Cru,* Potassæ supertartras impurus—*t. des Dents,* Odontolithos — *t. Émétique,* Antimonium tartarizatum—*t. Stibié,* Antimonium tartarizatum.

TASIS, Extension, Tension.

TASTE, *Gustus, Geusis, Gevma, Genthmos,* (F.) *Goût.* One of the five external senses, which instructs us of the savours of bodies, and of which the tongue is the principal organ.

Gustation, Gustatio, is the exercise of this faculty. In disease, the taste frequently becomes variously vitiated. The nerves of taste are probably the glosso-pharyngeal, and, perhaps also, the lingual branch of the fifth pair.

TASTE, Savour.

TATZ'É. The fruit of *Myrsi'na Africa'na,* a native of Abyssinia, the Cape of Good Hope, the

Azores, and Algeria, which is used as a tæniafuge.

TATTOO'ING. A practice, with the South Sea Islanders, of puncturing the skin, and forcing coloring matters into the punctures. Sailors in all countries are in the custom of practising it by rubbing or forcing gunpowder into the punctures. The figures, thus formed, remain through life.

TAUPE, Talpa.

TAUROCOL'LA, from *ταυρος*, 'a bull,' and *κολλα*, 'glue.' Glue made of the ears and genitals of the bull. It was formerly much esteemed.

TAURUS, Penis, Perineum.

TAXIS, 'arrangement;' from *τασσω*, 'I order,' 'I arrange;' *Reposit''io, Reduc'tio, Syntax'is.* A methodical pressure exerted by the hand on a hernial tumour, for the purpose of reducing it. This operation is generally easy in herniæ that are free from adhesions, of small size, and with a large opening into the sac; but it is very difficult and frequently impracticable in those that are adherent or strangulated. To perform the taxis, the patient should be put in the horizontal posture, and in one in which the parietes of the abdomen are relaxed. The manual procedure varies in each species of hernia. In all cases, too strong pressure of the parts must be avoided; as inflammation and gangrene might be induced. The displaced organs must be pushed into the abdomen, according to the direction of the axis of the hernial sac. The reduction is sometimes favoured by blood-letting *ad deliquium;* the warm bath; warm fomentations; tobacco; emollient glysters; and, at times, by cold applications, as ice, &c. In a case of strangulated hernia, should the taxis fail, an operation becomes necessary.

TAXO'DIUM DIS'TICHUM, *Cupres'sus dis'ticha, Schuber''tia dis'ticha, Cypress, Bald Cypress;* indigenous. *Nat. Ord.* Coniferæ. A balsam, obtained from it, is applied to cuts and wounds. The resin from the cones is diuretic and carminative.

TAXONOMY, Biotaxy.

TAXUS BACCA'TA, *ταξος.* The *Yew tree, Smilax, Smilax, Thym'alos,* (F.) *If. Family,* Coniferæ. *Sex. Syst.* Diœcia Monadelphia. The ancients believed the yew to be poisonous; but the fruit may be eaten without inconvenience. The leaves have been often recommended in epilepsy. The resin, obtained from the bark, has been called *albir.*

TAXUS CANADEN'SIS, *American Yew, Ground Hemlock;* indigenous. The leaves are said to be sedative.[?]

TAXWAX, see Nucha.

TAYE, Caligo.

TAYLOR'S REMEDY FOR DEAFNESS, see Allium.

TEA, Thea—t. Apple, see Apple tea—t. Bahama, Lantana camara — t. Beef, see Beef tea — t. Berried, Gaultheria.

Tea Berry, Gaultheria.

Tea, Blankenheim, see Galeopsis grandiflora —t. Brazil, Lantana pseudothea — t. Bushman's, Methyscophyllum glaucum—t. Caffre, Helichrysum nudifolium—t. Chicken, see Chicken tea—t. Flaxseed. Infusum Lini compositum—t. Ginger, Infusum Zingiberis—t. Hottentots', Helichrysum serpyllifolium—t. Labrador, Ledum latifolium — t. Lemon-peel, see Citrus medica — t. Lye, Physick's, see Fuligokali — t. Marsh, Ledum palustre — t. Mexico, Chenopodium ambrosioides — t. Mint, Infusum menthæ — t. Mountain, Gaultheria—t. Mutton, see Mutton tea — t. New Jersey, Celastrus—t. Oswego, Monarda coccinea—t. Redberry, Gaultheria—t. Sassafras, Saloop — t. Slippery elm, Infusum Lini compositum — t. Soot, see Fuligokali—t. South sea, Ilex vomitoria — t. Spanish, Chenopodium ambrosioides—t. Veal, see Veal tea.

TEAK, Paronychia.

TEAR, Sax. *ταερ, Lac'ryma, Lach'ryma, Lac'rima, Lac'ruma, Dacry, Dac'ryma, Dac'ryon, Humor lacryma'lis, Eyedrop, Weeping-tear,* (F.) *Larme.* An excrementitious humour, secreted by the lachrymal gland, and poured between the globe of the eye, and the eyelids, to facilitate the motions of those parts. The tears are saline, inodorous, and colourless. They turn the syrup of violets green; and contain chloride of sodium, with excess of base; phosphates of lime and soda, and albumen, and a special organic matter called *Lac'rymine* and *Thrœmine.*

TEARS, DEERS', Bezoar of the deer.

TEASEL, CULTIVATED, Dipsacus sylvestris.

TEASICK, Phthisis pulmonalis.

TEAT, Nipple.

TEAZEL, Eupatorium perfoliatum.

TECEDON, Phthisis.

TECNOCTONIA, Infanticide.

TECNOL'OGY, *Tecol'ogy, Tecnolog''ia, Tecolog''ia,* from *τεκνος, τεκος,* 'a child,' and *λογος,* 'a description.' A treatise on children.

TECOLITHOS, Judæus (lapis.)

TECO'MA RADI'CANS, *Bigno'nia radi'cans, Trumpet flower, Trumpet creeper, Virgin'ia creeper.* Indigenous; the orange and scarlet flowers appearing in July. *Order,* Bignoniaceæ. The leaves are acrid.

TECTARIA CALAHUALA, see Calagualæ radix — t. Ferruginea, see Calagualæ radix.

TEDA, Tæda.

TEETH, see Tooth—t. Barred, *Barrées* (*Dents*) —t. Eye, Canine teeth—t. Jaw, Molar teeth — t. Milk, see Dentition—t. Neck of the, Collum dentium — t. Shedding of the, see Dentition—t. Vitreous substance of the, Enamel of the teeth — t. Wisdom, see Dentition—t. Wit, see Dentition.

TEETHING, Dentition.

TEGIMEN, Integument.

TEGMEN, Integument.

TEGULA HIBERNICA, Hibernicus lapis.

TEGUMEN, Integument.

TÉGUMENT, Integument.

TEGUMEN'TARY, *Tegumenta'rius,* (F.) *Tégumentaire.* Relating or appertaining to the integument.

TEGUMEN'TUM, Integument — t. Auris, see Tympanum — t. Ventriculorum cerebri, Centre, oval, of the brain.

TEIGNE, Pityriasis, Porrigo, Porrigo lupinosa —t. *Annulaire*, Porrigo scutulata—t. *en Anneau*, Porrigo scutulata — t. *Faveuse*, Porrigo favosa—t. *Furfuracée*, Porrigo furfurans—t. *Nummulaire*, Porrigo scutulata.

TEINESMOS, Tenesmus.

TEINODYN'IA; from *τεινειν,* 'to extend,' and *οδυνη,* 'pain.' Pain of the sinews or tendons.

TEINOPHLOGO'SIS; from *τεινειν,* 'to extend,' and *φλογωσις,* 'inflammation.' Inflammation of the sinews or tendons.

TEINTURE, Tincture — t. *Éthérée*, see Æthereal — t. *Rubéfiante*, Tinctura cantharidis.

TEKEDON, Tabes.

TELA, Texture, Tissue — t. Accidentalis Medullaris, Encephaloid — t. Cavernosa, Cavernous texture—t. Cellulosa, Cellular tissue— t. Cornea, Corneous tissue—t. Choroidea, Choroidea tela—t. Emplastica, Sparadrapum — t. Erectilis, Erectile tissue — t. Fibrosa, see Fibrous—t. Galteri, Sparadrapum Galteri—t. Hippocratis cribrosa, Cellular tissue—t. Hymenochondroides, Tissue, cartilaginous—t. Hymenochondrodes, Tissue, cartilaginous—t. Ichthyocollæ glutinans, see Sparadra-

pum adhæsivum—t. Inodularis, Tissue, inodular—t. Organica, Histos — t. Vesicatoria, Sparadrapum vesicatorium.

TELAMON, Habena.

TELAMO'NES, 'τελαμωνες,' 'bandages.' Charpie, used for wounds; or linen employed for bandages.

TELANGECTASIS, Telangiectasia.

TELANGIECTA'SIA, *Telangiec'tasis, Telangec'tasis, Angeiotelecta'sia, Hæmatotelangio'sis, Hæmotelangio'sis, Angiecta'sia, Anastomo'sis aneurysmat'ica;* from 'τελος,' 'far,' 'αγγειον,' 'vessel,' and 'εκτασις,' 'dilatation.' Dilatation of far or capillary vessels. Nævus maternus. Aneurism by anastomosis. According to some, fungus hæmatodes. See Hæmatodes fungus.

TELANGIECTASIA OCULI, Cirsophthalmus.

TELEPH'IUM, *Ulcus telephium, Achille'um.* The ancients gave this name to any ulcer of a very bad kind, and difficult to cure, because the wound, which Achilles inflicted on Telephus, degenerated into a similar ulcer.

TELEPHIUM, Sedum telephium.

TELLURISMUS, Magnetism, animal.

TELLU'RIUM, (F.) *Tellure;* from *tellus, telluris,* 'the earth.' A metal first met with in the gold mines of Transylvania. It is of a bluish white colour, very volatilizable; specific gravity 6·115; and oxidizable in the air and by heat.

The salts of tellurium occasion the exhalation of so disagreeable an alliaceous odour from the body, that they have not been much experimented with as therapeutical agents.

TELUM, Penis.

TEMPE, Temple.

TEM'PERAMENT, *Temperamen'tum, Temperatu'ra, Tempera'tio, Tempe'ries;* from *temperare,* 'to moderate,' originally from *tempus, temporis,* 'time,' the great *temperer; Complexio, Crasis, Eucra'sia.* A name given to the remarkable differences that exist between individuals, in consequence of the variety of relations and proportions between the constituent parts of the body. Thus, of old, it was supposed that, according to the predominance of any one of the four humours then generally admitted,—blood, lymph, bile, and atrabilis or black bile,— the manifestations of the functions were *tempered* or modified so as to give rise to a *sanguine, lymphatic, choleric,* or *atrabilious* or *melancholic* predominance or temperament. The idea of the existence of certain of these humours has been banished; yet the influence of some, as of the blood, lymph, and bile, is still admitted by many. Too much influence has, doubtless, been assigned to temperament in the sense in which it was formerly and still is generally understood, although there can be no question that difference of organization occasions a difference in the activity of organs.

TEMPERAMENT, BILIOUS, Choleric temperament.

TEM'PERANCE, *Sophros'ynē, Nephal'iotes, Sobri'etas, Sobri'ety.* Same etymon. Moderation, opposed to gluttony and drunkenness. The advantage of temperance, in a hygienic point of view, requires no comment.

TEMPÉRANTS, Sedatives.

TEMPERATIO, Temperament.

TEMPERATURA, Temperament.

TEMPERIES, Temperament.

TEMPLE, *Tempus, Re'gio Tempora'lis, Crotaphus,* (F.) *Tempe.* A depression, on each side of the head, between the forehead and eye anteriorly, and the ear posteriorly. The *temples,* distinguished into *right* and *left,* correspond to the temporal fossa on each side. The word is said to be from the Latin *tempus,* 'time,' because in this part the hair first begins to turn white, and to indicate age.

TEMPORAL, *Tempora'lis.* That which relates to the temples.

TEMPORAL APONEURO'SIS is a very strong aponeurosis, of a bluish, shining colour, which is attached to the whole of the curved line of the temporal bone; to the posterior edge of the malar bone; to the superior margin of the zygomatic arch; and forms an envelope for the temporal muscle.

TEMPORAL ARTERIES, *Crot'aphite Arteries,* are several: — I. The *Temporal Artery,* properly so called, arises from the outer side of the superior part of the external carotid. It ascends between the ramus of the jaw, the meatus auditorius externus, and the parotid gland, which covers it as far as the zygomatic arch. Above this it becomes subcutaneous; and, when it has attained the middle of the temporal region, it divides into two branches; the one anterior—*A. temporal'is frontal'is* seu *inter'na* seu *ante'rior;* the other posterior — the *A. temporal'is occipita'lis* seu *exter'na* seu *supe'rior.* The temporal artery, before its division, gives off, 1. Branches to the parotid; to the joint of the lower jaw; to the meatus auditorius, and to the masseter. 2. The *transverse artery of the face.* 3. The *middle temporal,* which arises beneath the cheek-bones, and traverses the temporal aponeurosis, immediately beneath that bone. II. The *Deep-seated Tem'porals*—*A. tempora'les profun'dæ.* These are two in number. They arise from the internal maxillary, and have been distinguished, from their position, into *anterior* and *posterior.* They send their principal divisions to the temporal muscle.

TEMPORAL BONE, *Os tem'poris* seu *tempora'lē* seu *arcua'lē* seu *arma'lē* seu *parieta'lē inferius* seu *crot'aphum* seu *memen'to mori* seu *menda'sum* seu *crot'aphit'icum* seu *lapido'sum,* is seated at the lateral and inferior part of the cranium, of which it forms part; and contains, within it, the special organs of audition. It is usually divided into three portions: — 1. The *squamous, Pars squamo'sa, Squama, Lepis'ma, Os lepidoï'des* seu *squamo'sum* seu *squamifor'mē,* (F.) *Portion écailleuse* ou *squameuse.* 2. The *mastoid portion,* and, 3. The *Petrous portion, Petrous Proc''ess, Pyramis trigo'na, Os lapide'um* seu *lapido'sum* seu *sax'eum* seu *petro'sum* seu *lithoïdes* seu *durum* seu *præruptæ rupi assimila'tum* seu *nervalē, Pars petro'sa, P. pyramida'lis ossis tem'poris,* (F.) *Portion pierreuse, Rocher, Os pétreux, Apophyse pyramidale, A. pétrée.*

It has, *first,* an *auricular* or *external face,* on which is a surface that makes part of the temporal fossa; the *zygomatic process;* the *glenoid cavity;* the *fissure of Glaser;* the *meatus auditorius externus;* the *mastoid process;* the *digastric groove;* the *canalis caroticus;* the *jugular fossa;* the *styloid process;* the *stylo-mastoid foramen,* &c. 2. A *cerebral* or *internal surface,* which corresponds to the cavity of the cranium, and on which is the *Pars petrosa,* the *hiatus Fallopii,* the *meatus auditorius internus,* the *fissure of the aquæductus vestibuli, a portion of the gutter for the lateral sinus,* &c. 3. A circumference, on which is observed the orifice of the *bony portion of the Eustachian tube,* the *aquæductus cochleæ,* &c. The temporal bone is articulated with the sphenoid, occipital, parietal, malar, and inferior maxillary bones. It is developed from five points of ossification.

TEMPORAL FOSSA, *Fossa tempora'lis,* is an excavation, observed at each side of the head. It is filled by the muscle whose name it bears, and is formed by the temporal and sphenoid, below; by the parietal and frontal bones, above; is separated, by a transverse crista, from the

zygomatic fossa; and completed, before, by the cheek-bone.

Temporal Muscle, *Tempora'lis, Crotaphi'tes*, (F.) *Arcadi-temporo maxillaire, Temporo maxillaire* (Ch.), is a broad, flattened, triangular muscle, which fills the temporal fossa. Its fibres are attached to the temporal aponeurosis and fossa; and all converge into a strong tendon, which passes under the zygomatic arch, and is inserted into the coronoid process of the lower jaw. This muscle raises the lower jaw, and applies the teeth against each other.

Temporal Nerves. These are distinguished into the *superficial temporal*, furnished by the inferior maxillary branch of the fifth pair, behind the condyle of the jaw; and the *temporales profundi*, — *anterior* and *posterior*, — furnished by the same nerve at its exit from the cranium. Sömmering has given the name *temporal* to the divisions sent by the facial nerve to the temporal regions.

Temporal Veins were formerly called *Ætoi* or *Aëtoi Phlebes, Aq'uilæ Venæ*.

TEMPORO-AURICULAIRE, Attollens aurem.

TEM'PORO-FA'CIAL, *Tem'poro-facia'lis*. Belonging to the temple and face.

Temporo-facial Nerve, *Nervus temporo-facia'lis*. A branch of the facial nerve distributed to the face and temple.

TEMPORO-MAXILLAIRE, Temporomaxillary, see Temporal muscle.

TEMPORO-MAX'ILLARY, *Tem'poro-maxilla'ris*, (F.) *Temporo-maxillaire*. That which belongs to the temporal bone and lower jaw.

Temporo-Maxillary Articulation or joint of the lower jaw, is seated between the glenoid cavity and transverse process of the temporal bone on the one hand, and the condyle of the lower jaw on the other. Two thin cartilages cover the surfaces of these bones. The one is common to the transverse process, and the portion of the glenoid cavity anterior to the fissure of Glaser; the other belongs to the condyle. This articulation is furnished with an inter-articular fibro-cartilage, two synovial capsules, and two lateral ligaments: — the one internal, and the other external.

Temporo-maxillary Nerves of Bichat are the divisions of the facial nerve, distributed to the temporal and maxillary regions.

TEMPUS, Temple — t. Intercalare, Apyrexia, Intermission.

TEM'ULENCE, *Ebri'etas, Ebrios'itas, Methys'mus, Meth'ysis, Temulen'tia, Tem'ulency, Inebria'tion, Intoxica'tion, Drunk'enness*: — from wine, *Œnophlyg'ia, Œnophlyx'is, Vinolen'tia, Vi'nolence*, (F.) *Ivresse*; from *temetum*, μεθυ, 'wine, any intoxicating drink.' Plater gave this name to delirium; Ettmuller, to an apoplectic condition, depending upon drunkenness; the *Apoplex'ia Temulen'ta* or dead drunkenness. Commonly, *Temulentia* is used synonymously with drunkenness, *Methē*; and is often employed in the description of diseases to indicate a state resembling drunkenness. *Mania e Temulentiâ* is the same as *Delirium Tremens*. The French use the term *Ivresse* for drunkenness, *Ivrognerie* for habitual drunkenness.

TEMULENTIA, Temulence.

TENACULA, Bone-nippers — t. Volsella, Forceps (lithotomy).

TENAC'ULUM, (*tenax, tenacis*, 'holding fast,') from *teneo*, 'I hold.' A kind of fine hook attached to a handle which is thrust through the parietes of a blood-vessel to draw it out and enable it to be tied.

Tenaculum, Assalini's. An ingenious instrument, invented by Assalini. It consists of a forceps, or double tenaculum, the points of which are fine, sharp, and bifurcated, so as to be readily received into each other when the instrument is closed on the artery, which it is by a spring. It is of great use when the surgeon has no assistant at hand. The instrument is figured in S. Cooper's "First Lines."

TENAILLE INCISIVE, Bone-nippers.

TENASMUS, Tenesmus.

TENDINES CORONARIÆ, Coronary tendons

TEN'DINOUS, *Tendino'sus, Tendin'eus Sin'ewy*, (F.) *Tendineux*, from *tendo, tendinis*, 'a tendon.' Relating or appertaining to, or having the nature of tendons.

TENDO, Tendon — t. Cordis venosus, Circulus callosus Halleri.

TENDON, *Tendo, Proneurva'tio, Tenon*, from τεινω, *tendo*, 'I stretch.' *Sinew, Thew, Leader*, (Prov.) *Guider*. A fibrous cord, more or less round, long, or flattened; of a white, pearl colour, and composed of very close parallel fibres. The tendons are attached to the bones, by one extremity; by the other, they receive the insertions of the fleshy fibres: sometimes they afford attachment to fleshy fibres at both ends; — as in the digastric muscle. The tendons must be considered as so many cords, for transmitting the motion of muscles to the bones or levers.

TENDON D'ACHILLE, Achillis tendo.

Tendon, Cordiform, of the Diaphragm, Center, phrenic.

TENDONS, TWITCHING OF THE, Subsultus tendinum.

TENEOTOMIA, Tenotomy.

TÉNESME, Tenesmus — t. de l'Œsophage, Œsophagismus — t. Vésical, Bradysuria.

TENES'MUS, *Teines'mos, Tenas'mus*, from τεινω, 'I stretch.' *Proc'tica* seu *Obstipa'tio Tenesmus, Proctospas'mus, Tinag'mus*, (F.) *Ténesme, Épreintes*. Frequent, vain and painful desires to go to stool; — one of the chief symptoms of inflammation of the lining membrane of the digestive tube, as of dysentery.

Tenesmus Vesicæ, Bradysuria — t. Vesicæ mucosus, Cystirrhœa.

TENETTES, Forceps (craniotomy)

TÉNIA, Tænia.

TENNESSEE', MINERAL WATERS OF. On the waters of the French Broad River, in this State, is a large, clear, thermal spring. The heat is so great that, on first going into the water, it is almost insupportable.

TENON, Tendon.

TENONT'AGRA, from τενων, τενοντος, 'tendon,' and αγρα, 'seizure.' A variety of gout, which affects the tendinous parts of muscles, or the tendinous ligaments which strengthen certain articulations.

TENONTOTOMIA, Tenotomy.

TENONTOTRO'TI, from τενων, τενοντος, 'tendon,' and τιτρωσκω, 'I wound.' They who are wounded in the tendons. — Galen.

TENOSYNI'TIS, *Tenosynovi'tis* [?], (F.) *Ténosynite*. An imperfectly formed term, from τενων, 'a tendon,' *syn*, and *itis*, denoting inflammation. Inflammation of the synovial sheath of a tendon.

TÉNOTOME, Tenot'omus; same etymon as the next. An instrument for dividing tendons, especially by the subcutaneous method.

TENOT'OMY, *Tenotom'ia, Teneotom'ia, Tenontotom'ia, Sec'tio* seu *Dissec'tio ten'dinum*, (F.) *Ténotomie*, from τενων, 'a tendon,' and τομη, 'incision.' The operation of dividing a tendon, often practised for the removal of loxarthrus, or deviation of the joints — as in club-foot.

TENSEUR DE L'APONÉVROSE FÉMORALE, Fascia lata muscle.

TEN'SION, *Ten'sio, Tensu'ra, Tasis, Diat'asis, Enton'ia,* (*Entonia* is, also, used for over-tension,) *Conten'sio, Disten'sio,* from *tendere, tensum,* 'to stretch.' State of a part, which is stretched, when its textures are distended by the afflux of fluids, or the accumulation of gas; or when its fibres are drawn, as it were, in an opposite direction, and are, consequently, more resisting than usual.

TENSIVE, *Tensi'vus, Tono'des,* (F.) *Tensif.* Same etymon. Accompanied by tension or by a feeling of tension — as a '*tensive* pain.'

TENSOR CHOROIDEÆ, Ciliary muscle — t. Palati, Circumflexus musculus.

TENSOR TARSI. A small muscle, belonging to the inner commissure of the eyelids, well described by Professor Horner, of Philadelphia, and hence termed *Muscle of Horner.* It is about three lines broad and six long; arises from the posterior flat surface of the os unguis, near its junction with the ethmoid bone, and passes forwards and outwards, lying on the posterior face of the lachrymal ducts. As it approaches the commissure of the lids, it splits into two nearly equal parts, each of which is appropriated to a duct, and inserted along its course, almost to the punctum lacrymale. Its chief office seems to be, to influence the position of the punctum lacrymale, and to regulate the course of the tears through the lachrymal ducts.

TENSOR TYM'PANI, *Inter'nus Auris, Internus Mal'lei,* (F.) *Salpingo-malléen.* A small muscle, which arises from the petrous portion of the temporal bone, and the cartilage of the Eustachian tube, and terminates by a tendon, which is reflected over the processus cochleaformis, and is inserted into the apophysis of the handle of the malleus.

TENSOR VAGINÆ FEMORIS, Fascia lata muscle.

TENSURA, Tension.

TENSUS, Penis.

TENT, *Tenta, Turun'da,* and its diminutive, *Turun'dula, Penic'ulus, Penicil'lus, Penicil'lum, Motos, Lemnis'cus, Licin'ium,* (F.) *Tente, Mèche,* from *tendere, tensum* or *tentum,* 'to stretch.' In surgery, tents are small rolls of lint, of a cylindrical or pyramidal shape, which are introduced into wounds and deep ulcers, to prevent them from closing before they are filled up from the bottom. Tents are sometimes, also, made of prepared sponge, gentian root, &c. They are not so much used as they formerly were.

TENTACULARIA, Filaria hominis bronchialis.

TENTACULUM CEREBELLI, Tentorium.

TENTA'MEN MED'ICUM. 'A medical trial.' From *tentare,* 'to try.' An examination in medicine, in the Prussian universities, which is conducted both in writing and *vivâ voce* before the Dean of the Medical Faculty.

TENTE, Tent — t. *du Cervelet,* Tentorium.

TENTIGO VENEREA, Nymphomania — t. Veretri, Satyriasis.

TENTIPEL'LUM, from *tendere, tensum* or *tentum,* 'to stretch,' and *pellis,* 'the skin.' Ancient name of a cosmetic, with which, it was pretended, wrinkles could be effaced.

TENTO'RIUM, *T. cerebel'lo super-exten'sum, T. cerebelli, Tentac'ulum cerebelli, Septum encephal'oli, Diaphrag'ma cer'ebri, Intersep'ta horizontal'ia Pacchio'ni, Proces'sus transver'sus duræ matris, Lateral Processes of the Dura Mater, Transverse septum,* (F.) *Tente du cervelet, Plancher du Cerveau, Septum transverse* (Ch.), from *tendere, tensum* or *tentum,* 'to stretch.' A process of the dura mater, which separates the cerebrum from the cerebellum. It extends from the internal horizontal spine of the occipital bone, directly forwards to the sella Turcica of the sphenoid.

TENTORIUM CEREBELLI, Tentorium.

TENTUM, Penis.

TENTWORT, Asplenium ruta muraria.

TENUIS MATER, Pia mater.

TENUITAS AQUOSA, Prædominium aquæ.

TEPHRO'SIA APOLLINE'A, *Gale'ga Apolline'a* of Egypt and Nubia. *Order,* Leguminosæ. The leaves are often found mixed with senna.

TEPHROSIA PURPU'REA, *Gale'ga purpu'rea* of the coast of Coromandel. The root is bitter, and a decoction of it is prescribed by the native doctors in dyspepsia, lientery, and tympanites.

TEPHROSIA SENNA. The leaves are used for senna by the people of Popayan.

TEPHROSIA TOXICA'RIA, *Gale'ga toxica'ria* of Cayenne. The leaves are used for poisoning fish. It has been suggested as a substitute for digitalis.

TEPHROSIA VIRGINIANA, Galega Virginiana.

TEPIDARIUM, see Stove.

TEPLITZ, Töplitz.

TERAS, Monster.

TERATOG''ENY, *Teratogen'ia,* from τερας, τερατος, 'a monster,' and γενεσις, 'generation.' The formation of monsters.

TERATOL'OGY, *Teratolog''ia,* from τερας, τερατος, 'a monster,' and λογος, 'a discourse.' A treatise on monsters.

TERATOSIS, see Monster.

TERCERON, see Mulatto — t. Black, see Mulatto.

TEREBELLA, Trepan.

TEREBELLUM. A name given by Dugès to a perforator, *Perce crâne,* of his invention.

TÉRÉBENTHINE, Terebinthina—*t. de Bordeaux,* see Pinus sylvestris — *t. de Chio,* see Pistacia terebinthus — *t. de Copahu,* Copaiba — *t. Commune,* see Pinus sylvestris — *t. d'Égypte,* see Amyris opobalsamum — *t. de Gilead,* see Amyris opobalsamum — *t. du Grand Caire,* see Amyris opobalsamum — *t. de Judée,* see Amyris opobalsamum — *t. de Mélèze,* see Pinus larix.

TÉRÉBENTHINÉ, Terebinthinate.

TEREBIN'THINA, from τερμινθος, or τερεβινθος, 'the turpentine tree.' *Tur'pentine, Botin, Albotim, Altilibat, Brutino,* (F.) *Térébenthine.* A substance, of the consistence of honey, which flows from many trees of the terebinthaceæ and coniferæ families. It is viscid; shining; more or less transparent; inflammable; of a warm, pungent taste; strong smell; and is entirely composed of resin and essential oil, without benzoic acid. It is soluble in alcohol. See Turpentine, Pinus palustris and Pinus sylvestris. All the turpentines are stimulant, diuretic, and cathartic.

TEREBINTHINA ARGENTORATENSIS, see Pinus picea — t. Balsamea, see Pinus balsamea — t. Canadensis, see Pinus balsamea — t. Chia, see Pistacia terebinthus — t. Communis, see Pinus sylvestris — t. Cypria, see Pistacia terebinthus — t. Empyreumatica, see Pinus sylvestris — t. Laricina, see Pinus larix—t. Veneta, see Pinus larix—t. Vera, see Pistacia terebinthus—t. Vulgaris, see Pinus sylvestris — *t. de Vénise,* see Pinus larix.

TEREBIN'THINATE, *Terebinthina'tus,* (F.) *Térébenthiné.* Having the qualities of turpentine.

TEREBINTHUS, Terminthus—t. Gummifera, Bursera gummifera — t. Lentiscus, Pistacia lentiscus — t. Vulgaris, Pistacia terebinthus.

TEREBRA, Trepan.

TEREBRATIO, Trepanning.

TEREDO OSSIUM, Caries, Spina ventosa.

TERES, *Stron'gylus, Cylindroi'des* 'long and round,' from *tero,* 'to rub,' *quasi* 'rubbed smooth or round.' An epithet given to many organs, the fibres of which are collected into round fasciculi.

TERES LIGAMEN'TUM, (F.) *Ligament rond.*

This name is given to the round ligament in the cotyloid cavity of the os innominatum, which is attached to the head of the bone, and to the bottom of the cavity. It is, also, given to a small fibrous fascia, which extends from the coronoid process of the ulna to below the bicipital tubercle of the radius.

Teres Major, (F.) *Anguli-scapulo-huméral, Scapulo-huméral* (Ch.), *Grand rond*, is situate at the inferior and posterior part of the shoulder. It is attached, on the one hand, to the outer surface of the scapula; to the corresponding part of its axillary margin; and, on the other, to the posterior margin of the bicipital groove of the humerus. It carries the arm backwards and inwards, and carries it, also, inwards in rotation. When it acts with the longissimus dorsi and pectoralis major, it applies the arm against the lateral part of the chest, and keeps it forcibly there.

Teres Minor, *Nonus hu'meri Placenti'ni*, (F.) *Le plus petit sus-scapulo-trochitérien* (Ch.), *Petit rond, Marginí-sus-scapulo-trochitérien*, is situate at the posterior and inferior part of the shoulder; it is narrow and flattened, from above to below, in its inner half; and, from before to behind, in the outer. It is attached, on the one part, to the outer surface of the scapula, near its inferior angle; and, on the other, to the inferior part of the great tuberosity of the humerus. It depresses the arm, and causes it to turn on its axis from within outwards. It also carries it backwards.

TERESIS, Observation.

TERETRIUM, Trepan.

TERETRON, Trepan.

TERGAL, Dorsal.

TERGEMINI, Trigemini.

TERGUM, Dorsum, Vertebral column.

TERMINALIA, see Myrobalanus.

TERMINOLOGY, Nomenclature.

TERMIN'THUS, *Terebin'thus*, from τερμινθος, 'the turpentine tree.' *Phyma Anthrax, Terminthus, Berry* or *Fungous carbuncle*. The ancients gave this name to a tumour, surmounted by a black pustule, and resembling the fruit of the turpentine tree.

Terminthus, Pistacia terebinthus.

TERMINUS SUPERIOR ASPERÆ ARTERIÆ, Larynx.

TERMONOLOGY, Nomenclature.

TERMS, Menses.

TERRA ABSORBENS MINERALIS, Magnesiæ carbonas—t. Aluminis, Argilla pura—t. Amara aërata, Magnesiæ carbonas—t. Amara sulphurica, Magnesiæ sulphas — t. Argillacea hydrata, Argilla pura—t. Argillacea pura, Argilla pura—t. Bolaris, Argilla pura — t. Foliata, Sulphur — t. Foliata mineralis, Soda acetata—t. Foliata tartari, Potassæ acetas — t. Fornacum, see Bricks — t. Fullonica, Cimolia purpurescens — t. Japonica, Catechu, Nauclea gambir.

Terra Lem'nia, *Lemp'nias, Argilla bolus flava, Lem'nian Earth.* A name given by the ancients to a solid, reddish, astringent, substance, prepared with the pulp of the fruit of the Baobab, an African tree, according to Prosper Alpinus. It seems, however, to be an argillaceous earth. It has been employed as an astringent.

Terra Livon'ica. *A terra sigilla'ta* or *sealed earth* from Livonia, redder than that from Silesia, and very astringent.

Terra Merita, Curcuma longa.

Terra Nocería'na. A whitish, soft, and astringent earth, found in the environs of Nocera, in Italy.

Terra Orlea'na, *Pigmen'tum urucu, Urucu*, (F.) *Rocou, Roucou, Bichet.* A pigmental matter obtained from the seeds of *Bixa Orleana* seu *Orella'na* seu *America'na, Orella'na, Orlea'na.* In Jamaica, it is recommended in dysentery, and is considered to possess astringent and stomachic qualities. It is called, according to its shape, *Flag, Roll*, or *Egg Annotto.*

Spanish Annotto, Bixa, is in small, oblong cakes. It is chiefly employed as a colouring matter.

Terra Os'sea, *Mate'ria ossea.* Bony matter. The earthy portion of bones.

Terra Ponderosa, Baryta—t. Ponderosa muriata, Baryta, muriate of — t. Ponderosa salita, Baryta, muriate of — t. Saponaria, Cimolia purpurescens.

Terra Portugal'lica, *Barros, Bucaros.* A reddish, astringent, styptic earth, obtained from Portugal.

Terra Sigilla'ta, *Sealed Earth.* A bole or earthy matter, made into little cakes or flat masses, and stamped with certain impressions, as with the head of the Grand Seignior. To these belong the *Terra Silesiaca, Terra Lemnia, T. Turcica.* See Bole and Bolus alba.

Terra Silesiaca, see Terra sigillata — t. Talcosa oxyanthracodes, Magnesiæ carbonas — t. Turcica, see Terra sigillata.

Terra Uri'næ. The earthy deposit in the urine.

Terra Vitrioli Dulcis, Colcothar.

TERRÆ SIGILLATÆ, see Bole, Bolus alba, and Terra sigillata.

TERRAPIN, Emys palustris.

TERRE BOLAIRE, Bolus — *t. Magnésienne*, Magnesiæ carbonas — *t. Noix*, Bunium bulbocastanum — *t. Pesante*, Baryta — *t. Sigillée*, Bolus alba.

TERRETTE, Glechoma hederacea.

TERTIAN FEVER, *Febris tertia'na, An'etus tertianus, Tritæ'us, Tertian* or *Third Day Ague, Third Day Fever*, (F.) *Fièvre tierce*, from *tertius*, 'the third.' An intermittent, whose paroxysms recur every *third* day, or every 48 hours. The *mildest*, and the most *pernicious*, intermittents belong to this head. As a general rule, it is the most manageable form of ague.

A *double tertian*, (F.) *Double tierce* (*Fièvre*), has a paroxysm every day, — the paroxysms of alternate days being associated.

TERTIANARIA, Scutellaria galericulata.

TESSARA, Cuboid.

TESSELLA, Tabella.

TEST, DANIEL'S, see Docimasia pulmonum — t. Hydrostatic, see Docimasia pulmonum — t. Ploucquet's, see Docimasia pulmonum—t. Static, see Docimasia pulmonum.

TESTA, ('a shell,') see Ostrea — t. Ovi, see Membrana putaminis.

Testa Præpara'ta, *Prepared Oyster-shell.* Oyster-shell, freed from extraneous matter, washed with boiling water, reduced to powder, and prepared in the same manner as Creta præparata.

TESTA'CEOUS, *Testa'ceus*, (F.) *Testacé*, from *testa*, 'a shell.' A powder, consisting of burnt shells. These contain carbonate of lime chiefly, and hence the term has been applied to cretaceous substances. See Creta.

TESTÆ FORNACEÆ, Bricks—t. Ostreæ, see Ostrea.

TESTES. The Testicles, see Testicle. Vulgarly, the *Stones*. A name, also, given to the inferior tubercles of the corpora quadrigemina, to distinguish them from the superior, called *Nates*.

Testes Cerebri, see Quadrigemina corpora.

TES'TICLE, *Testis, T. viri'lis, Testic'ulus, Orchis, Pomum amo'ris, Did'ymus, Her'nia, Gem'ini* (pl.), *Gemelli* (pl.), *Ovum*, (F.) *Testicule*, from *testis*, 'a witness;' because the testicles are evidences of virility. The name of two glandular organs, contained in the scrotum, whose office is to secrete sperm. The substance of the testicle

consists of numerous conical, flattened lobules — *lob'uli testis* — whose bases are directed towards the surface of the organ, and the apices towards the corpus Highmorianum. They are formed of a gray and softish substance, composed of tortuous canals, called *Tu'buli seu Canalic'uli seminif'eri* seu *semina'les, Vasa semina'lia, Vas'cula serpenti'na*, folded on each other, and of extreme fineness; the number of which, according to the estimate of Monro, is 62,500, and the total length 5,208 feet. All these canals, uniting in their course, pass through the corpus Highmorianum, concur in forming the epididymis, and give origin to the vas deferens. The testicles are covered, immediately, by a fibrous membrane, of an opake white colour, and very tough, called *Tu'nica Albugin'ea*, or, simply, *Albugin'ea, Perites'tie*, (F.) *Péridídyme*, of which the corpus Highmorianum is only an enlargement. Over this, again, is the tunica vaginalis, the second envelope of the testis.

TESTICLE, SWELLED, Hernia humoralis.

TESTICONDUS, Crypsorchis.

TESTIC'ULAR, *Testicula'ris*, (F) *Testiculaire*. Belonging or relating to the testicle.

TESTICULE, Testicle.

TESTICULUS, Testicle — t. Accessorius, Epididymis — t. Caninus, Orchis mascula.

TESTIMO'NIUM MATURITA'TIS. 'Evidence of fitness.' A certificate of complete education, required, in the Prussian universities, of a candidate, before he can be admitted to examination for the degree of Doctor of Medicine.

TESTIS FEMINEUS, Ovary — t. Irritable, Orchidalgia — t. Minor, Prostate — t. Muliebris, Ovary — t. Virilis, Testicle.

TESTUDINATIO CRANII, Camarosis.

TESTU'DO, *Chelo'nē*, (F.) *Tortue*. A genus of reptiles, including the turtle, the flesh of which is much esteemed as an article of diet.

Also, an encysted tumour, which has been supposed to resemble the shell of a turtle; *Emphy'ma encys'tis gang'lion*. See Talpa.

TESTUDO CEREBRI, Fornix — t. Scapulæ, see Scapula.

TET, Nipple.

TET'ANIC, *Tetan'icum, Spas'ticum, Convulsi'vum, Convul'sive*, (F.) *Tétanique*, from τεινω, 'I stretch.' A remedy, which acts on the nerves, and, through them, on the muscles, occasioning, in large doses, convulsions. The chief agents of this class are *Nux Vomica, Strychnia, Brucia, Arnica*, and *Toxicodendron*.

Also, an epithet for a tonic convulsion.

TETANINE, Strychnia.

TETANOMATA, Tetanothra.

TETANO'THRA, *Tetanom'ata, Erugato'ria*, from τεταμος, 'free from wrinkles.' Medicines which remove wrinkles. — Gorræus.

TÉTANOS, Tetanus.

TET'ANUS, from τεινω, 'I stretch.' *Spasm with rigidity, Convul'sio In'dica, Holoton'ia, Holoton'icus, Holotet'anus, Tet'anus universa'lis, Rigor nervo'sus* seu *nervo'rum, Erten'sio* seu *Diten'sio, Enta'sia tetanus, Cat'ochus cervi'nus* seu *holoton'icus*, (F.) *Tétanos, Mal de cerf*. A disease which consists in a permanent contraction of all the muscles or merely of some, without alternations of relaxation. It is characterized by closure of the jaws; difficulty or impracticability of deglutition; rigidity and immobility of the limbs and trunk. which is sometimes curved forwards (*Emprosthot'onos*), sometimes backwards (*Opisthot'onos*), and sometimes to one side (*Pleurothot'onos*). When tetanus is confined to the muscles of the jaws, it is called *Trismus*. It is a most formidable affection. The means of treatment are. — copious and repeated blood-letting; bathing, cold and warm; powerful doses of opium, and other narcotics. In *Traumat'ic Tetanus*, or that which supervenes on a wound, every extraneous matter must, of course, be removed from the wound, and soothing applications be made to it.

TETANUS ANTICUS, Emprosthotonos — t. Dolorificus, Cramp — t. Dorsalis, Opisthotonos — t. Lateralis, Pleurothotonos — t. Maxillæ inferioris, Trismus — t. Posterganeus, Opisthotonos — t. Posticus, Opisthotonos — t. Universalis, see Tetanus.

TETARTÆUS, Quartan.

TETARTOPHI'A, from τεταρτος, 'the fourth,' and φυω, 'I arise.' *Quarta'nus remit'tens*. A quartan, in which the intermission is inordinately short or imperfect.

TÊTE, Caput, Head — t. *de Veau*, Elephantiasis of the Greeks.

TETRADRACH'MON, from τετρας, 'four,' and δραχμη, 'a drachm.' A weight of four drachms or half an ounce.

TETRAGONUS, Platysma myoides.

TETRAHIT LONGIFLORUM, Galeopsis grandiflora.

TETRAMY'RON, from τετρας, 'four,' and μυρον, 'an ointment.' An ointment of four ingredients. — Galen.

TETRANGURIA, Cucurbita citrullus.

TETRANTHERA PICHURIM, Pichurim beans.

TETRA'O COTUR'NIX, *Coturnix*, the *Quail*, (F.) *Caille; Class*, Aves; *Ord.* Gallinaceæ. The quail is an esteemed article of diet. The Greek name is ορτυξ, ορτυγος; and the places, called *Ortygia*, are named after it. The excrements of the quail were formerly extolled in epilepsy, and the fat in specks of the eye.

TETRAPHAR'MACUM, from τετρας, 'four,' and φαρμακον, 'a medicine.' A medicine consisting of four ingredients.

TETRAS'CELUS, from τετρα, 'four,' and σκελος, 'leg.' A monster having four legs.—Gurlt.

TETROB'OLON. The weight of four oboli, or two scruples. — Gorræus.

TETROROS, Astragalus.

TETTER, Herpes — t. Crusted, Impetigo — t. Honeycomb, Porrigo favosa — t. Humid, Eczema impetigo — t. Milky, Porrigo larvalis — t. Pustular, Impetigo — t. Running, Impetigo — t. Scaly, Psoriasis.

TETTERWORT, Chelidonium majus.

TEUCRIUM ÆGYPTIACUM, T. capitatum — t. Belium, T. capitatum.

TEUCRIUM CAPITA'TUM, *T. Bel'ium* seu *Ægyptiacum, Po'lium Capita'tum, Poley Mountain of Montpel'lier, Ord.* Labiatæ, is, generally, substituted for T. chamædrys. The common *Poley Mountain* is the *Teucrium monta'num;* and the *Golden Poley Mountain*, the *Teucrium Po'lium, Po'lion*.

TEU'CRIUM CHAMÆ'DRYS, *T. officina'lē, Chamædrys, C. minor repens* seu *vulga'ris, Quer'cula minor* seu *Calamandri'na, Trissa'go, Chamædrops, Trixa'go, Common, Creeping* or *Small Germander, English Treacle*, (F.) *Petit chêne, Chênette, Germandrée officinale*. This is possessed of aromatic and bitter properties. The dose of the dried powder is from ʒss to ʒj.

TEUCRIUM CHAMÆP'ITYS, *Chamæpitys, Arthet'ica, Arthretica, Aju'ga, A.* seu *Bu'gula Chamæpitys, Abiga, Chamæmo'rus, Iva arthrit'ica, Holoc'yron, Io'nia, Sideri'tis, Common Groundpine*, (F.) *Petite Ivette*. Properties like the last. The tops and leaves have been recommended as aperients and tonics; especially in female obstructions, and in paralytic disorders.

TEUCRIUM CRET'ICUM, *T. hyssopifo'lium* seu *Rosmarinifo'lium, Rosmari'nus stœ'chadis facie*,

P. ey-mountain of Candy, Po'lium Cret'icum. The tops and whole herb enter into the old compounds, *Mithridate* and *Theriaca.* It has a moderately aromatic smell; and a nauseous, bitter taste, and is placed among the aperients and corroborants.

TEUCRIUM FLAVUM has similar properties to T. chamædrys.

TEUCRIUM HYSSOPIFOLIUM, T. Creticum.

TEUCRIUM IVA, *Chamæ'pitys moscha'ta, Iva, I. moscha'ta Monspelien'sium, Chamæpitys anthyl'lus, French Groundpine,* (F.) *Ivette musquée.* It has similar virtues to T. Chamæpitys, but is weaker.

TEUCRIUM MARITIMUM, T. Marum.

TEUCRIUM MARUM, *T. marit'imum, Marum Syriacum* seu *Cret'icum* seu *verum* seu *Cortu'si, Majora'na Syr'iaca, Chamæ'drys inca'na marit'ima* seu *marum, Orig'anum Syriacum, Marum germander, Syrian herb mastich, Cat thyme,* (F.) *Marum* ou *Germandrée maritime, Herbe aux chats.* A very aromatic plant, of a camphorated smell; formerly much used in medicine as a tonic, antispasmodic, emmenagogue, &c.

TEUCRIUM OFFICINALE, T. chamædrys — t. Palustre, T. scordium — t. Pyramidale, Ajuga — t. Rosmarinifolium, T. Creticum.

TEUCRIUM SCOR'DIUM, *T. palus'tre, Scordium, Trissa'go palus'tris, Chamædrys palustris* seu *scor'dium, Al'lium red'olens, Water Germander,* (F.) *Germandrée scorodone, Sauge des bois, Germandrée aquatique.* The leaves have a garlicky smell, and bitterish, slightly pungent taste. It has the tonic properties of the other Teucria.

TEXTUM INTERLOBULARE, Interlobular tissue.

TEXTURA, Texture — t. Organica, Histos.

TEX'TURAL. Same etymon as Texture. Relating or appertaining to a texture.

TEXTURE, *Textu'ra, Textus,* from *texere, textum,* 'to weave.' *Tela, Hypha, Hyphē.* The particular arrangement of the tissues that constitute an organ.

TEXTUS, Texture, Tissue—t. Cellulosus, Cellular tissue — t. Desmosus, Desmoid tissue — t. Erectilis, Erectile texture — t. Nervorum, Plexus nervorum — t. Organicus, Cellular tissue — t. Papillaris, Corpus papillare—t. Parenchymalis, Cellular tissue.

THÆRIA, Radzyge.

THAL'AMUS, Θαλαμος, (F.) *Couche.* 'A room or chamber; as bed.' The place at which a nerve originates, or has been considered to originate.

THAL'AMI NERVO'RUM OPTICO'RUM seu OP'TICI, *Eminen'tiæ magnæ cer'ebri, Ganglia cerebri posti'ca, Crura medul'læ oblonga'tæ* (of some), *Stria'ta cor'pora super'na posterio'ra, Collic'uli nervo'rum optico'rum, Optic thal'ami, Posterior cer'ebral gan'glion,* (F.) *Couches des nerfs oculaires* (Ch.), *C. des nerfs optiques, C. optiques.* Two rounded and irregular surfaces, which are seen exposed in the lateral ventricles of the brain, and in the third ventricle, the inferior surface of which presents two projections, called *Corpora geniculata,* that furnish several filaments to the optic nerves. The name was given from a belief that the optic nerves originate from them. They, however, arise more posteriorly, and adhere merely to the inner margin of those bodies. Gall considers, that the thalami act as ganglions to the nerves; and, hence, he calls them *Grand ganglion cérébral inférieur.* They are, also, called *Posterior ganglion of the cerebrum.* From the thalami and corpora striata fibres proceed upwards to constitute the convolutions of the brain, and the various bands that connect the different parts of the brain together. The upper and inner parts of the thalami are so closely connected as to form one continued surface, called *Commissu'ra mollis.* The posterior parts turn downwards and outwards; after which they are elongated to form the two white cords, termed *Tractus op'tici.*

THALAMUS REGALIS, Pericardium.

THALIC'TRON, Θαλικτρον, *Thalictrum, T. magnum* seu *flavum* seu *flaves'cens* seu *praten'sē* seu *ni'gricans* seu *rugo'sum* seu *vagina'tum, Rhabar'barum pau'perum, Meadow-rue, Poor Man's Rhubarb,* (F.) *Pigamon jaunâtre, Rue des prés, Fausse-Rhabarbe, Rhabarbe des pauvres. Ord.* Ranunculaceæ. *Sex. Syst.* Polyandria Polygynia. The root resembles rhubarb in its properties.

THALIC'TRUM ANEMONOÏ'DES, *Meadow Rue, Rue-leaved Anem'ony;* an indigenous plant, flowering in April and May.

THAMARINDUS, Tamarindus.

THAME, Pollex.

THANASIMUS, Mortal.

THANATODES, Mortal.

THAN'ATOID, *Thanatoï'des;* from θανατος, 'death,' and ειδος, 'resemblance.' Resembling death. Apparently dead.

THANATOL'OGY, *Thanatolog''ia, Thnescolog''ia,* from θανατος, 'death,' and λογος, 'a discourse.' A description, or the doctrine, of death.

THANATOS, Death.

THAP'SIA, from the island Thapsus. The *deadly carrot, thopsia asclepias. Family,* Umbelliferæ. *Sex. Syst.* Pentandria Digynia. The root operates violently, both upwards and downwards. It is not used.

THAPSUS BARBATUS, Verbascum nigrum.

THARSI, see Tarsus.

THASPIUM ACTÆIFOLIUM, Ligusticum actæifolium.

THASPIUM ATROPURPU'REUM, *Th. corda'tum, Round heart. Order,* Umbelliferæ. The flowers, which appear in June, are of a dark purple.

THAS'PIUM BARBINO'DE, *Meadow Parsnep.* An indigenous plant, of the Northern and Western States, which flowers in June. Flowers, yellow.

Both plants have been esteemed vulnerary, antisyphilitic, and diaphoretic; and as antidotes to the bite of a rattlesnake.

THASPIUM CORDATUM, Th. atropurpureum.

THE, Thigh.

THÉ, Thea — *t. des Apalaches,* Ilex vomitoria —*t. du Canada,* Gaultheria—*t. Composé,* Species —*t. d'Europe,* Salvia veronica—*t. de France,* Salvia—*t. de Jersey,* Celastrus—*t. de la Mer du Sud,* Ilex vomitoria—*t. du Mexique,* Chenopodium ambrosioides — *t. de Simon Pauli,* Myrica gale — *t. Suisse,* Falltranck.

THEA, *Chaa, Tea,* (F.) *Thé.* There are two principal species of tea-plant; the *Thea Boke'a,* and *Thea vir'idis;* the *black tea,* and the *green. Ord.* Camellieæ. *Sex. Syst.* Polyandria Monogynia. In commerce, many kinds of tea are met with. Several of the differences between these appear to result from the age at which the leaves have been collected, and the mode of their desiccation.

Tea-drinking was introduced into Europe about the year 1666; since which time its use has become almost universal; and, in spite of the assertions of medical terrorists, it is, except in particular idiosyncracies, entirely harmless.

By an analogical transference, very common in language, the word *Tea* has been used almost synonymously with infusion, as *Beef tea, Mint tea,* &c.

THEA GERMANICA, Veronica.

THEBE'SIUS, VEINS OF. A name given to suppositious branches of the coronary veins, which Christopher Adam Thebesius, a German anatomist, described as opening into the heart by small depressions observable in the right auricle; and which have been called *Foram'ina*

Thebe'sii. No such veins can be demonstrated. The valve, at the orifice of the coronary vein, in the right ventricle, is called *Valvula Thebe'sii, V. Guiffurtia'na, V. venæ magnæ.*

THECA, Case, Vagina, Sheath — t. Cerebri, Cranium — t. Cordis, Pericardium — t. Folliculi, see Folliculi Graafiani—t. Vertebralis, see Vertebral canal.

THECI'TIS, from *theca*, and *itis*, denoting inflammation. A term, of hybrid formation, signifying inflammation of the sheaths of tendons.

THEIN, see Coffea Arabica.

THEION, Sulphur.

THEIOPEGÆ, Waters, mineral (sulphureous.)

THEIOTHERMÆ, Waters, mineral, sulphureous.

THELASIS, Lactation.

THELASMUS, Lactation.

THELASTRIA, Nurse.

THELE, Nipple.

THELI'TIS, (F.) *Thélite;* from θηλη, 'the female nipple,' 'the female breast,' and *itis*, denoting inflammation. Inflammation of the nipple.

THELON'CUS, Mastoncus.

THELORRHAG''IA, from θηλη, 'nipple,' and ραγη, 'a rupture.' Hemorrhage from the nipple.

THELOS, Mamma.

THELYGON'IA, from θηλυς, 'pertaining to the female sex,' and γονη, 'generation.' The part taken by the female in the act of generation. Also, nymphomania.

THELYGONUM, Sperm (of the female.)

THELYPTERIS, Pteris aquilina.

THENAD, Thenal.

THENAL, *Thenar;* same etymon as *thenar*. Relating or appertaining to the thenar.

Thenal Aspect. An aspect towards the side on which the thenar is situated.—Barclay. *Thenad* is used, adverbially, by the same writer, to signify 'towards the thenal aspect.'

THENAR, θεναρ, from θενω, 'I strike,' 'I push.' The palm of the hand, or sole of the foot.

Thenar, Flexor brevis pollicis manus, Palm.

Thenar or Thenal Em'inence is the projection at the anterior and outer part of the hand, formed by the abductor brevis, opponens, and flexor brevis pollicis.

Thenar or Thenal Muscle. Riolan and Winslow give this name to the fleshy mass, formed of the abductor brevis, opponens pollicis, and the interior part of the flexor brevis pollicis. In the foot, Winslow gives the name *Thenal muscle* to the abductor and flexor brevis pollicis pedis.

THEOBROMA CACAO, Cacao.

THEOMANIA, Demonomania.

THEOPLEGIA, Apoplexy.

THEOPLEXIA, Apoplexy.

THEORET'ICAL, *Theoret'icus, Theo'ricus*, from θεωρεω, 'I contemplate.' (F.) *Théorétique, Théorique.* That which is confined to theory, or is connected with it. An epithet also applied to a sect of physicians, who founded their doctrine chiefly on reasoning.

THEORIA, Theory.

THÉORIQUE, Theoretical.

THE'ORY, *Theo'ria*, (F.) *Théorie.* Same etymon. The speculative part of a science. The connexion established in the mind between a general fact, or the least possible number of general facts, and all the particular facts dependent thereon: for example, the motions of the heavenly bodies, and the most important natural phenomena are connected with a single fact, previously known by observation; viz. that the force of gravity acts inversely according to the square of the distance. This constitutes the theory of universal gravitation. *Theory* must not be confounded with *system*. Theory regards nature as it is, and is a rigid deduction from facts. *System* is too often the creature of the imagination, to which nature is made to bend.

Theory of Med'icine, *Institutes of Medicine, Theoret'ical Medicine*, is that part of the science which attempts philosophically to account for the various phenomena that present themselves during health as well as in disease. It is the philosophy of Medicine. The *Institutes of Medicine* are generally considered to comprise Physiology and its applications to Pathology, Hygiene, and Therapeutics. By some they are considered to include General Pathology and General Therapeutics.

THEIOTHERMÆ, Waters, mineral, sulphureous.

THERAPEIA, Curation, Therapeutics.

THERAPEUSIS, Therapeutics.

THERAPEUTA, Therapeutist.

THERAPEUTICE, Therapeutics.

THERAPEU'TICS, *Therapeu'ticè, Therapeu'sia, Therapeu'sis, Iatrotech'nicè, Therapei'a, Therapi'a, Curato'ria Meth'odus, Methodus Medeu'di, Practice of Physic*, (F.) *Thérapeutique, Thérapie*, from θεραπευω, 'I wait upon, I alleviate, I attend upon the sick.' That part of medicine, the object of which is the treatment of disease. With others, the department which comprises an explanation of the *modus operandi* of medicines.

THÉRAPEUTIQUE, Therapeutics.

THERAPEU'TIST, *Therapeu'ta.* Same etymon. One who practices therapeutics. A practitioner of medicine. To be a good therapeutist, a man must be well versed in every department of medicine, and be capable of observing and reasoning well. He may be a good *observer*, and yet a bad *reasoner*. He cannot practice well unless he is both. Hence, the comparatively small number of good therapeutists.

THERAPIA, Therapeutics.

THÉRAPIE, Therapeutics.

THERIA, Radzyge.

THERIAC, Theriaca — t. of Antipater, Antipatri theriaca.

THE'RIACA, θηριακα, *The'riac*, from θηρ, 'a ferocious or venomous animal.' *Treacle, Molasses*, (F.) *Thériaque.* Also, a medicine, believed to be capable of curing or preventing the effects of the bite of a venomous animal. In this sense it is chiefly used by writers. *Theriac* and *Theriacal* have been used adjectively for medicinal.

Theriaca Androm'achi, *Venice Treacle*, is an ancient *alexipharmic electuary;* consisting of a farrago of 61 different ingredients, which possessed the most opposite properties. It was invented by Andromachus of Crete, and prepared by order of Nero. It has received various modifications; and, to the discredit of the *Faculté de Médecine* of Paris, long held its place in their Codex, with even an additional number of ingredients. The *Electua'rium Opia'tum polyphar'macum* of the Codex has contained *acid ingredients*, 5; *astringent*, 5; *bitter*, 22; *indigenous aromatics*, 10; *umbelliferous aromatics*, 7; *balsams and resinous substances*, 8; *fetid ingredients*, 6; *narcotics*, 1; *earthy substances*, 1; *gummy* or *amylaceous*, 4; *saccharine*, 3; total, 72! and one of these the *flesh of the viper!* A little more than a grain of opium is contained in each drachm of the compound.

Theriaca Articulorum, Colchicum—t. Celestis, Tinctura opii — t. Communis, Melasses — t. Edinensis, Confectio opii.

Theriaca Germano'rum. An extract or rob, prepared from juniper berries. Used as a stomachic.

Theriaca Londinen'sis, *Cataplasma Cymi'ni.* A cataplasm of *cumin seed, bay berries, german-*

der, snakeroot, cloves, honey, and sometimes *opium,* or *syrup of poppies.*

THERIACA RUSTICORUM, Allium.

THÉRIAQUE, Theriaca.

THERIAKI. In Turkey, *opium-eaters,* or they who indulge largely in the use of opium, are so called.

THERIATRICA, Veterinary art.

THERIODES, Ferine.

THERIO'MA, *Therion,* from θηρ, 'a venomous animal.' Any extremely malignant ulcer. Sometimes confined to ulcers of the lungs.

THERION, Theriома.

THERIOTOMY, Zootomy.

THERMA, Heat—t. Emphytum, Animal heat.

THERMÆ, θερμαι, *Ther'mata.* Warm baths or springs. See Waters (mineral.)

THERMÆ FABARIÆ, Pfeffers, Mineral Waters of — t. Piperinæ, Pfeffers, Mineral Waters of — t. Plumbariæ, Plombières, Mineral Waters of.

THERMAL, *Therma'lis;* from θερμη, 'heat,' θερμος, 'hot.' Relating or appertain ng to heat. Hot, warm. As 'a *thermal* mineral water.'

THERMANTICA, Calefacients.

THERMASMA, Fomentation.

THERMATA, Thermæ.

THERMOMETER, see Heat.

THERMUM EMPHYTUM, Animal heat, Biolychnium.

THESIS, θεσις, from τιθημι, 'to put.' 'A position or proposition.' *Dispuita'tio inaugura'lis, Inaug'ural Disserta'tion.* The name usually given to the essay composed by a candidate for graduation in medicine, which he is at times required to defend publicly. Often, however, it is a mere form, giving useless labour and trouble to the student, inasmuch as it is executed as a task, and never afterwards regarded by the preceptor or by others. Sandifort, Haller, Smellie, and Stoll, have published collections of these.

Also, a suffix denoting 'arrangement;' hence *Diathesis.*

THEVE'TIA A'HOUAI, *Ahouai.* The kernels of the nut of this Brazilian tree are said to be a violent poison. At the Antilles, its nuts are called *Noix de Serpent;* and they are used against the bites of serpents.

THEW, Tendon.

THEY, Thigh.

THICK-LISTED, Pursy.

THIGH, Sax. θeoh, *Femur, Femen, Crus, Merus, Me'rium,* (Sc.) *The, They,* (F.) *Cuisse.* (Of old, *Femur* meant the thigh generally, and especially the outer part; — *Femen,* the inner). The part of the lower limb which extends from the pelvis to the leg. The thigh is larger at its superior than inferior part, and has the form of an inverted and truncated cone, slightly depressed from within outwards. *Above,* it is bounded, *anteriorly,* by the groin: *externally,* by the hip; *behind,* by the fold of the nates; and *within,* by the perineal region. *Below,* it is bounded, *anteriorly,* by the prominence of the knee; *posteriorly,* by the ham. It is formed of a considerable number of muscles, blood-vessels, lymphatics, nerves, &c.; and is covered by a strong aponeurosis.

THIGHBONE, Femur—t. Neck of the, Collum femoris.

THIMBLE WEED, Rudbeckia laciniata.

THION, Sulphur.

THIRST, Sax. θyrst, (D.) Dorst, *Sitis, Dipsa, Potio'nis deside'rium.* (F.) *Soif.* A simple desire or an absolute want for liquids. Physiologists are not entirely agreed regarding the seat of thirst; some place it in the fauces; others in the stomach. Its immediate cause is not known. It has been attributed to a dry condition of the nervous papillæ of the pharynx, produced by suppression of the salivary and mucous secretions. This is probably true; but, again, it is owing to the wants of the system, — a supply of fluid being required to compensate the numerous losses that are constantly taking place. Thirst is an *internal sensation,* — an *instinctive want* — arising from organization, and inexplicable. It is an urgent symptom in many diseases, particularly in those of vascular excitement.

THIRST, EXCESSIVE, Polydipsia — t. Morbid Dipsosis.

THIRSTY, Dipsodes.

THISTLE, BLESSED, Centaurea benedicta — t. Cotton, Onopordium acanthium — t. Globe, Echinops—t. Holy, Centaurea benedicta — t. Ladies', Carduus Marianus—t. Milk, common, Carduus Marianus — t. Pine, Atractylus gummifera —t. Sow, Sonchus oleraceus — t. Star, Centaurea calcitrapa — t. Yellow, Argemone Mexicana.

THLADIAS, Eunuch.

THLASIAS, Eunuch.

THLASIS, Contusion—t. Depressio, Depression.

THLASMA, Contusion—t. Concussio, Concussion — t. Stremma, Sprain.

THLASPI, *Pennycress. Ord.* Cruciferæ. *Sex. Syst.* Tetradynamia Siliculosa. Two species of thlaspi are directed, in some pharmacopœias, for medical use: — *Thlaspi arven'sē* or *Treacle mustard,* and *Thlaspi campes'trē* seu *hirsu'tum* seu *vulga'tius, Lepid'ium campes'trē, Lep'ia* seu *Ibe'ris campes'tris, Mith'ridate mustard.* The pharmaceutical properties of both kinds resemble those of common mustard.

THLASPI BURSA, *Th. bursa'tum, Thlaspi* seu *Capsell'a* seu *Ibe'ris* seu *Nastur'tium* seu *Rodschied'ia bursa pasto'ris, Bursa pasto'ris, Shepherd's purse, Cocowort, St. James's wort, Poor man's Parmacity,* (F.) *Fleur de St. Jacques, Bourse à berger* ou *à pasteur, Tabouret.* A common European plant, introduced into this country. It is slightly astringent, but is little used.

THLASPI BURSATUM, Thlaspi bursa — th. Nasturtium, Lepidium sativum—th. Sativum, Lepidium sativum.

THLIBIAS, Eunuch.

THLIPSENCEPHALIA, Derencephalia.

THLIPSENCEPH'ALUS, from θλιψις, 'compression,' and εγκεφαλος, 'the encephalon.' A monster in whom the skull is open, not merely in the frontal and parietal, but also in the occipital regions — a distinct fontanelle not existing.

THLIP'SIS, θλιψις, *Compres'sio.* Compression, and especially constriction of vessels by an external cause. Oppression.

THNESCOLOGIA, Thanatology.

THOLUS, Achicolum — t. Diocleus, Scapha.

THOMPSO'NIAN. One who practises or believes in Thompsonianism.

THOMPSO'NIANISM, *Thomp'sonism.* A fanciful doctrine, of which a person of the name of Thompson, of New York, is the founder. One of its leading principles is, that the human body is composed of four *elements* [?], earth, air, fire and water; and one of its apothegms, — that metals and minerals are in the earth, and, being extracted from the depths of the earth, have a tendency to carry all down into the earth who use them; that the tendency of all vegetables is to spring up from the earth, and therefore to uphold mankind from the grave.

The Thompsonians are Botanical Doctors. See Herb doctor.

THORACENTESIS, *Thoracocentesis.*

THORACHIQUE, Thoracic.

THORAC'IC, *Thorac''icus,* from *thorax, thoracis,* 'the chest;' (F.) *Thoracique* ou *Thorachique.* That which relates or belongs to the chest; as *Thoracic vis'cera,* &c.

THORACIC INFERIOR ARTERY, *Arte'ria Thorac''ica Exter'na Infe'rior* seu *Longa* seu *mam-*

ma'ria externa seu *Thoracica inferior*, (F.) *Deuxième des Thoraciques* (Ch.), arises from the axillary, a little below the preceding, and descends vertically over the latter part of the thorax, and the serratus major anticus. It afterwards bends inwards; becomes subcutaneous, and divides into several branches, which embrace the breast. It gives numerous ramifications to the pectoralis major, serratus anticus, intercostals, ganglions of the axilla, mamma, &c.

THORACIC SUPERIOR ARTERY, *Arte'ria Thoracica Exter'na Superior*, (F.) *Artère thoracique supérieure, Première des Thoraciques* (Ch.), arises from the axillary artery or from the acromial; and descends forwards between the Pectoralis major and P. minor, to which it distributes itself by a great number of branches. In some subjects, there are two or three *Arteriæ thoracicæ externæ superiores*.

THORACIC DUCT, *Ductus thorac''icus* seu *thoracicus poste'rior* seu *vertebra'lis* seu *chy'lifer* seu *chyli* seu *lac'teus* seu *ro'rifer* seu *Pecqueti* seu *Pecquetia'nus, Vena alba thora'cis, Alveus ampulles'cens, Distributo'ria lactea thoracica, Galax'ia, Duct of Pecquet, Alimen'tary Duct*, (F.) *Canal* ou *Conduit Thoracique*, is the duct in which the lymphatics of the lower limbs, abdomen, left superior extremity, left side of the head, neck, and thorax terminate. It begins at the *receptaculum chyli*, which is formed by the union of five or six large lymphatic trunks,—themselves formed from the union of all the absorbent plexuses of the abdomen. The duct ascends into the chest through the pillars of the diaphragm, and by the side of the aorta and vena azygos. It contracts in dimension, as far as the 6th dorsal vertebra, when it inclines towards the left hand; ascends behind the arch of the aorta; passes behind the left internal jugular vein, and opens at the posterior part of the subclavian vein of the same side. Its embouchure is furnished with two valves, which prevent the blood from passing from the vein into the duct.

THORACIC LIMBS are the upper limbs; so called because they are articulated with the lateral and upper parts of the chest.

THORACIC, LONG or INFERIOR, Mammary inferior external artery.

THORACIC NERVES. The *short* or *anterior thoracic nerves* are two in number. They arise from the brachial plexus, and divide into an anterior and a posterior branch: — the former distributed to the pectoralis major muscle; the latter uniting with a branch of the other to form a loop, from which numerous branches are given off to the pectoralis major and p. minor.

The *long thorac''ic nerve, Poste'rior thorac''ic, External res'piratory* of Sir Charles Bell, is a long branch, which arises from the fourth and fifth cervical nerves, immediately after their escape from the intervertebral foramina, and passes downwards to be distributed upon the serratus magnus muscle.

THORACIC REGIONS are the different regions of the chest. Thus we say, *anterior, lateral*, and *superior thoracic*, &c.

THORACICA, Pectorals.

THORACICS, FIRST OF THE, Mammary superior external artery.

THORACIQUE, Thoracic.

THORACOCENTE'SIS, *Thoracente'sis, Thoracot'omy*, from θωραξ, θωρακος, 'the chest,' and κεντησις, 'puncture.' *Paracente'sis thora'cis*. Perforation of the chest to evacuate contained fluid — as in empyema.

THORACOCYSTIS, Thoracystis.

THORACODID'YMUS, from θωραξ, θωρακος, 'the chest,' and διδυμος, 'a twin.' A monstrosity in which twins are united by the thorax.—Gurlt.

THORACODYNE, Pleurodynia.

THORACO-FACIAL, Platysma myoides.

THOR'ACO-GASTRODID'YMUS, *Did'ymus sym'phyo-thoracogas'trius, Xiphodid'ymus*: from θωραξ, θωρακος, 'the chest,' γαστηρ, 'the belly,' and διδυμος, 'a twin.' A monstrosity in which twins are united by the chest and abdomen. — Gurlt.

THORACO-MAXILLO-FACIAL, Platysma myoides.

THORACOMETER, Stethometer.

THORACOPATHI'A, from θωραξ, θωρακος, 'the chest,' and παθος, 'disease.' Disease or suffering in the chest.

THORACOSCOPIA, see Auscultation.

THORACOSCOPIUM, Stethoscope.

THORACOTOMY, Thoracocentesis.

THORACYST'IS, *Thoracyst''is*, from θωραξ, θωρακος, 'the chest,' and κυστις, 'a bladder.' Encysted dropsy of the chest. Hydatids in the chest.

THORAX, θωραξ, 'a cuirass, a coat of mail.' *Cith'arus, Venter me'dius, Pectus, Stethus, Scutum pec'toris, Bir, Chelys, Cassa*, the *Breast*, the *Chest*, (F.) *Poitrine*. One of the splanchnic cavities, *Cavum thora'cis*, bounded, posteriorly by the vertebræ; laterally, by the ribs and scapula: anteriorly, by the sternum; above, by the clavicle: and below, by the diaphragm. It is destined to lodge and protect the chief organs of respiration and circulation — the lungs and the heart.

THORAX, Corset.

THORE, Sperm.

THORN APPLE, Datura stramonium—t. Red, Datura Sanguinea.

THOROUGHSTEM, Eupatorium perfoliatum.

THOROUGHWAX, Eupatorium perfoliatum.

THOROUGHWORT, Eupatorium perfoliatum

THOROW-WAX, Bupleurum rotundifolium.

THORULUS STRAMINEUS, *Fanon*.

THRÆNINE, see Tears.

THREADWORM, Dracunculus—t. Long, Tri chocephalus.

THREPSIS, Assimilation, Nutrition.

THREPSOL'OGY, *Threpsolog''ia*, from θρεψις, 'nutrition,' and λογος, 'a description.' The doctrine of, or a treatise on, the nutrition of organized bodies.

THREPTICE, Assimilation.

THRIDACE, Lactucarium.

THRIDAX, Lettuce.

THRIFT, LAVENDER, Statice limonium—t. American, Statice Caroliniana — t. Sea-side, Statice Caroliniana.

THRIX, Capillus, Hair.

THROAT, θρυτε, θρυτα, *Jugulum, Interstit''ium Jugula'rē, Guttur, Sphagē*, (Prov.) *Chokes, Droat, Hause, Hose*, (Sc.) *Halse, Hawse, Witter*. The anterior part of the neck. (F.) *Gorge*. Also, the pharynx.

THROATROOT, Geum Virginianum, Liatris.

THROATWORT, Campanula trachelium.

THROBBING, *Pulsati''vus, Sphyg'micus, Sphygmo'des, Pul'satory*, (F.) *Pulsatif*. *A throbbing pain*, (Prov.) *Stang*, (F.) *Douleur pulsative*, is a kind of pain which is, or seems to be caused or augmented by the pulsation of arteries.

THROE, Agony, Pains, labour.

THROMBI LACTEI, Infarctus mammæ lacteus.

THROMBOCYS'TIS, from θρομβος, 'a clot,' and κυστις, 'a cyst.' The cyst occasionally surrounding a clot of blood — as in encephalic hemorrhage.

THROMBOSIS, Coagulation, Thrombus.

THROMBUS, θρομβος, 'a clot,' from θρομβοω, 'to coagulate;' *Thrombo'sis, Trumbus, Hæmato'ma*. A small, hard, round, bluish tumour; formed by an effusion of blood in the vicinity of a vein which has been opened in the operation of blood-

letting. The thrombus is most commonly owing to the opening in the vein and that of the skin not corresponding; to excessive smallness of the cutaneous orifice; or to small, fatty granules, which prevent the discharge of the blood. Compresses, dipped in salt water; camphorated spirit, and slight compression, usually disperse it. See Blood.

THROMBUS NEONATORUM, Cephalæmatoma.

THROPILL, Trachea.

THROPPLE, Trachea.

THROTTLE, Trachea.

THROW, Agony, Pains, labour.

THROWORT, Leonurus cardiaca.

THRUSH, Aphthæ — t. Milk, Aphthæ — t. White, Aphthæ.

THRUSTY, Dipsodes.

THRYPSIS, Comminution.

THUJA OCCIDENTALIS, Thuya occidentalis.

THUMB, Pollex.

THUREA, Juniperus lycia — t. Virga, Juniperus lycia.

THUS, see Pinus abies — t. Fœmininum, see Pinus abies — t. Judæorum, Croton cascarilla, Styrax, Thymiama — t. Libanotos, Juniperus lycia — t. Masculum, Juniperus lycia — t. Verum, Juniperus lycia — t. Vulgare, see Pinus abies.

THUYA APHYLLA, see Sandarac.

THU'YA seu THUJA OCCIDENTA'LIS, *T. obtu'sa, Cupres'sus Arbor Vitæ, American Arbor Vitæ, Tree of Life. Ord.* Coniferæ. The leaves and wood were formerly in high repute as resolvents, sudorifics, and expectorants, and were given in phthisical affections, intermittent fevers, and dropsies. The expressed juice has been applied to condylomata. The arrangement of the medullary matter of the cerebellum, termed *Arbor Vitæ*, is also called *Thuya*.

THYLACIĬTIS, Gutta rosea.

THYM, Thymus.

THYMA, Thymion.

THYMALOS, Taxus baccata.

THYMASTHMA, Asthma thymicum.

THYMBRA, Satureia hortensis — t. Hispanica, Thymus mastichina.

THYME, CAT, Teucrium Marum — t. Common, Thymus — t. Lemon, see Thymus serpyllum — t. Mother of, Thymus serpyllum — t. Virginia, Pycnanthemum linifolium — t. Wild, Thymus serpyllum.

THYMELÆA, Daphne gnidium — t. Laureola, Daphne laureola — t. Mezereum, Daphne mezereum — t. Monspeliaca, Daphne gnidium.

THYMELCO'SIS, from θυμός, 'thymus,' and ἕλκος, 'an ulcer.' Ulceration of the thymus gland.

THYMIA'MA, θυμίαμα, (θύω, 'I burn perfumes') 'a perfume;' *Thus Judæo'rum, Muskwood*, (F.) *Narcaphte*. A bark from Syria, Cilicia, &c., supposed to be the product of the liquid storax tree. It has an agreeable, balsamic smell; approaching that of liquid storax.

THYMIAMA, Fumigation, Suffimentum.

THYMIASIOTECHNIA, Thymiatechny.

THYMIASIS, Fumigation.

THYMIATECH'NY, *Thymiatech'nia, Thymiasiotech'nia, Cura fumigato'ria*, from θυμίαμα, 'an odour,' and τεχνη, 'art.' The art of employing perfumes in medicine.

THYMIC, *Thy'micus*, (F.) *Thymique*. Having relation to the thymus, as "*thymic* asthma."

THYM'ION, *Thyma, Thymus, Porrum, Porrus, Verru'ca rhagoï'dea Verru'ca minor*, from θυμός, 'thyme.' A small wart on the skin, resembling a bud of thyme.

THYMIOSIS, Frambœsia — t. Indica, Frambœsia.

THYMIQUE, Thymic.

THYMI'TES. Wine impregnated with thyme

THYMI'TIS, from θυμος, 'thymus,' and *itis*, denoting inflammation. Inflammation of the thymus gland.

THYMOPATHI'A, *Psychopathi'a*, from θυμός, 'the mind,' and παθος, 'affection.' A disease of the mind.

THYMOS, Rage.

THYMOXAL'MĒ, from θυμος, 'thyme,' οξις, 'acid,' and ἁλς, 'salt.' A compound of thyme, vinegar and salt.

THYMUS, θυμος, *Gland'ula Thymus, Corpus Thymia'mum* seu *Thy'micum, Glan'dium, Thymus gland, Corpus incomprehensib'ile* of Jos. Frank. *Sweetbread* of the butcher. An organ, concerned in hæmatosis, which is seated in the upper separation of the anterior mediastinum. The thymus has the appearance of a glandular body. It is oblong; bilobate; soft, and very variable in size and colour. In the fœtus, it is very large, and contains in a central cavity — *reservoir of the thymus* — a milky fluid; but it gradually disappears, and in old age is scarcely discernible. The arteries, called *thymic*, are from the inferior thyroid, internal mammary, bronchial, and mediastinal. The veins have the same arrangement. It receives some nervous filaments from the pneumogastric nerves, the phrenic, and the inferior cervical ganglia.

THYMUS, *T. vulga'ris* seu *tenuifo'lius* seu *horten'sis, Common Thyme*, (F.) *Thym, T. ordinaire, Farigoule. Ord.* Labiatæ. *Sex. Syst.* Didynamia Gymnospermia. This herb has an agreeable, aromatic smell; and a warm, pungent taste. It is reputed to be resolvent, emmenagogue, tonic, and stomachic. It is not much used.

THYMUS, Satureia capitata, Thymion — t. Calaminthus, Melissa calamintha — t. Capitatus, Satureia capitata — t. Ciliatus, T. mastichina — t. Creticus, Satureia capitata — t. Hortensis, Thymus — t. Includens, T. serpyllum.

THYMUS MASTICHI'NA, *T. cilia'tus, Marum vulga'rē, Samp'suchus, Clinopo'dia, Mastich'ina Gallo'rum, Thymbra Hispan'ica, Jaca In'dica, Common herb Mastich*. A low, shrubby, Spanish plant, used as an errhine. It has a smell like mastich. Its virtues resemble those of the *Marum Syriacum*; but it is said to be less powerful.

THYMUS MULTIFLORUS, Melissa nepeta — t. Nepeta, Melissa nepeta.

THYMUS, RESERVOIR OF THE, see Thymus.

THYMUS SERPYL'LUM, *T. inclu'dens, Her'pylos, Herpyl'los, Serpyl'lum, Serpul'lum, Serpil'lum, Gila'rum, Serpyl'lum vulga'rē minus, Mother of Thyme, Wild Thyme*, (F.) *Serpolet*. This plant has the same sensible properties as the garden thyme; but has a milder and rather more grateful flavour. *Lemon Thyme*, the *Serpyllum citra'tum*, is merely a variety of the *Thymus Serpyllum*. It is very pungent; and has a particularly grateful odour, approaching that of lemons.

THYMUS SYLVATICUS, Clinopodium vulgare — th. Sylvestris, Satureia capitata — th. Tenuifolius, Thymus — th. Vulgaris, Thymus.

THYRA, θυρα, 'a gate, folding-door.' In composition, *Thyreo* and *Thyro*, θυρεος, 'a shield resembling a folding-door,' mean the thyroid cartilage.

THYREMPHRAXIS, Bronchocele.

THYREO, *Thyro*, in composition, relating to the thyroid cartilage or gland.

THYREOADENITIS, Thyreoitis.

THYREO-ARYT'ENOID, *Thyro-arytenoïdeus* or *Thyro-arytenoïdes*. That which relates to the thyroid and arytenoid cartilages.

THYREO-ARYTENOID LIG'AMENTS, *Inferior Ligaments of the Larynx, Lips of the Glottis, Vocal Cords*, are two ligaments about two lines broad, formed of elastic and parallel fibres, which are

contained in a duplicature of the mucous membrane of the larynx. They extend horizontally from the anterior projection at the base of each arytenoid cartilage to the middle of the angle of union of the thyroid cartilage. They are the essential organs of voice. See Glottis.

Thyreo-arytenoid Muscles, Thyreo-arytenoïdei, are thin muscles, which arise from the middle and inferior part of the posterior surface of the thyroid cartilage; whence they proceed backwards and outwards, to be inserted into the outer part of the base of the arytenoid cartilage. They give the necessary tension to the ligaments of the glottis, in the production of the voice. Santorini has given the name *Thyreo-arytenoïdeus obliquus* to a portion of the *arytenoïdeus* muscle.

THYREO-EPIGLOT'TIC, *Thyreo-epiglottideus, Thyrepiglott'icus.* Sabatier and Santorini have given this name to the outer portion of the thyro-arytenoid muscle; because it passes from the thyroid cartilage to the anterior part of the epiglottis.

THYREO-HYOID, *Thyro-hyoïdeus, Thyrohyoïdes, Hyodeothyreo'des.* That which belongs or relates to the thyroid cartilage and os hyoides.

Thyreo-hyoid or Hyo-thyroid Membrane is a very broad, yellowish, fibrous membrane, thicker at the middle than at the extremities, which is attached, above, to the posterior surface of the body and great cornu of the os hyoides; and, below, to the whole superior edge of the thyroid cartilage.

THYREO-HYOÏDEUS or *Hyo-thyreoïdeus Muscle* is situate at the anterior and superior part of the neck. It is attached to the oblique line on the anterior surface of the thyroid cartilage; to the inferior edge of the body of the os hyoides, and to the anterior portion of its great cornu. It approximates the thyroid cartilage and os hyoides to each other, by raising the cartilage, and with it the whole larynx: or, it can depress the os hyoides.

THYREO-PHARYNGEUS, Thyro-Pharyngeus.

THYREOID, Thyroid.

THYREOÏDIEN, Thyroideal.

THYREOIDEUS, Thyroideal.

THYREOI'TIS, *Thyreoïdeni'tis, Thyreoïdi'tis, Angi'na thyreoïdea,* from θυρεος, 'a shield,' and *itis*, denoting inflammation. Inflammation of the thyroid gland.

THYREONCUS, Bronchocele.

THYREOPHRAXIA, Bronchocele.

THYREPIGLOTTICUS, Thyreoëpiglottic.

THYRO, see Thyreo.

THYRO-ARYTENOID, Thyreo-arytenoid.

THYRO-CRICO-PHARYNGEUS, see Crico-pharyngeal.

THYRO-HYOIDES, Thyreo-hyoid.

THYRO-PHARYNGEUS, *Thyreo-pharyngeus.* Valsalva, Morgagni, Santorini, and Winslow have given this name to the portion of the constrictor pharyngis inferior, which is attached to the thyroid cartilages.

Thyro-Pharyngeus, Constrictor pharyngis, see Crico-pharyngeal.

THYRO-PHARYNGO-STAPHYLINUS, Palato-pharyngeus.

THYROCELE, Bronchocele.

THYROID, *Thy'reoid, Thyroï'des,* from θυρα, 'a gate or folding-door,' or from θυρεος, 'a shield,' and εἰδος, 'form.' That which has the shape of a folding-door.

Thyroid Cartilage, *Cartila'go Scutifor'mis* seu *Scuta'lis* seu *Clypea'lis, Coöperto'rium, C. Pelta'lis* seu *pelta'tus, Scutum, Ada'mi Morsûs Os,* is the largest of the cartilages of the larynx, at the anterior part of which it is situate. It is larger transversely than vertically; broader above than below; and seems formed by the junction of the two quadrilateral plates, which produce, by their union, an angle that projects forwards. Its two posterior margins terminate above, and on each side, by an ensiform prolongation, called *the greater cornu of the thyroid cartilage, cornu supe'rius* seu *longum;* and, below, by a less prominent eminence, the *lesser cornu, Cornu infe'rius* seu *brevē*, which is articulated with the cricoid.

Thyroid Gland, *Corpus Thyreoïdeum, Glan'dula Thyreoïdea,* (F.) *Glande* ou *Corps Thyroïde,* is an organ, the uses of which are not known. It covers the anterior and inferior part of the larynx, as well as the first rings of the trachea, and seems to be composed of two lobes, flattened from before to behind, which are united by a transverse prolongation of the same nature as themselves, called the *Isthmus.* The tissue of the thyroid is soft, spongy, and of a brownish colour; but its intimate structure is unknown. It is formed of several distinct lobules; collected in lobes of greater or less size. These are composed of granulations, some of which contain a yellowish or milky fluid. The thyroid gland receives four large arteries, called *Thyroïdeal,* as well as corresponding veins. Its nerves proceed from the pneumogastric, and from the cervical ganglia. No excretory duct has ever been found in it. Its uses are not known.

THYROIDEAL, *Thyroïdeus, Thyreoïdeus,*(F.) *Thyroïdien, Thyréoïdien.* That which concerns the thyroid gland or cartilage.

Thyroideal Arteries are two on each side. 1. The *superior Thryoïdeal, superior laryngeal, superior guttural,* arises from the anterior part of the external carotid, and proceeds to the upper part of the thyroid gland, after having given off a *laryngeal branch* and a *crico-thyroid.* 2. The *inferior Thyroïdeal, infe'rior gut'tural,* much larger than the last, arises from the upper part of the subclavian. It passes, in a serpentine manner, to the inferior part of the thyroid gland, to which it is distributed, after having given a number of branches to the neighbouring parts, among which is the *cervicalis ascendens.*

Thyroideal Veins are, 1. A *superior thyroïdeal,* and several *middle thyroideal,* which open into the internal jugular vein. 2. An *inferior thyroïdeal,* much larger than the preceding, whose branches form — by anastomosing with those of the opposite side, in front of the trachea — a very remarkable venous plexus, which J. Cloquet calls the *infra-thyroideal plexus.* The inferior thyroideal veins open, — the left into the corresponding subclavian; — the right, into the vena cava superior.

THYROÏDIEN, Thyroideal.

THYROPHRAXIA, Bronchocele.

THYRSUS, Penis.

THYSSELINUM, Peucedanum palustre.

THYSSELIUM PALUSTRE, Peucedanum palustre.

TIBI-PÉRONÉO-TARSIEN, Peronæus longus.

TIB'IA. A Latin word, which signifies a flute or pipe. *Cnemē, Procne'mē, Procne'mium, Fo'cile majus, Arun'do* seu *Canna major, Canna major* seu *domes'tica cruris, Shinbone.* The largest bone of the leg. A long, irregular, and triangular bone, situate on the inner side of the fibula. It has, 1. A *Superior* or *femoral extremity,* which is very large, rounded, and has two eminences at the sides, called *Tuberos'ities of the Tibia,* or *Tibial tuberosities.* The outermost is articulated with the fibula. On its head are two articular, oval, concave surfaces, separated by a process, called

Spine of the tibia, which are articulated with the condyles of the *Os femoris*. 2. An *inferior* or *tarsal extremity*, having an articular surface beneath, which joins the astragalus; within, a triangular eminence, which forms the malleolus internus; and, on the outside, a triangular surface, which articulates with the fibula. 3. The body or shaft of the tibia has three faces, separated by three angles, the anterior of which is the most prominent, and is called the *spine* or *crista of the tibia* or *tibial spine*. It is the *shin*. The tibia is articulated with the femur, fibula, and astragalus. It is developed by three points of ossification, one for the body, and one for each extremity.

TIBIA MINIMA, Fibula.

TIBIÆUS, Tibial.

TIB'IAL, *Tibia'lis*, *Tibiæ'us*, (F.) *Tibial*, *Jambier*. From *tibia*. That which relates to the tibia or to the leg.

TIBIAL APONEURO'SIS, (F.) *Aponévrose Jambière*, surrounds the muscles of the leg. It is continuous, above, with the femoral aponeurosis, and arises, also, from the head of the fibula, and from several fibrous expansions which detach themselves from the tendons of the triceps, sartorius, gracilis, and semitendinosus. Thence it descends around the leg, attaching itself to the whole extent of the anterior and inner edges of the tibia. It sends, below, an expansion, which passes before the tendo Achillis, and is continuous with the anterior annular ligament of the tarsus. It is attached, also, to the sheath of the peronei muscles.

TIBIAL ARTERIES are two in number. 1. *Arte'ria Tibia'lis Anti'ca*, which arises from the popliteal, before its bifurcation: passes immediately through the opening in the upper part of the interosseous ligament, and reaches the anterior part of the leg; when it turns downwards, and descends obliquely, between the extensor communis digitorum pedis and the tibialis anticus, anterior to the interosseous ligament; glides under the anterior annular ligament of the tarsus, and takes the name *Dorsalis tarsi*. Amongst the numerous branches, given off by the tibialis antica, may be distinguished — the *Tibialis recur'rens*, *A. malleola'ris interna*, and *A. malleolaris externa*. 2. *A. Tibialis posti'ca*, arises from the bifurcation of the popliteal artery; and, slightly tortuous, descends between the two planes of the posterior muscles of the leg; until it arrives under the arch of the calcaneum, where it divides into two branches — the *Plantar arteries*.

TIBIAD, see Tibial aspect.

TIB'IAL ASPECT. An aspect towards the side on which the tibia is situated. — Barclay. *Tibiad* is used adverbially by the same writer, to signify, 'towards the tibial aspect.'

TIBIAL NERVES are two in number. 1. The *anterior tibial nerve*, *Prétibio-suspluntaire*, (Ch.) One of the two branches in which the external popliteal terminates. It accompanies the arteria tibialis antica. 2. The *posterior tibial nerve*, *Branche tibiale du nerf fémoro-poplitée* (Ch.), is the *internal popliteal*.

TIBIAL VEINS, ANTERIOR AND POSTERIOR, have the same arrangement as the arteries which they accompany.

TIBIA'LIS ANTI'CUS, *Cate'næ mus'culus*, (F.) *Tibio-sus- métatarsien*, *Tibio-sustarsien* (Ch.), *Jambier antérieur*. A muscle situate at the anterior part of the leg. Above, it has the shape of a triangular prism; below, it is slender and tendinous. It is attached, above, to the anterior part of the external tuberosity of the tibia; to the superior half of the outer surface of that bone; and to the anterior surface of the interosseous ligament. Below, its tendon terminates at the base of the first cuneiform bone, and at the posterior extremity of the first metatarsal bone. This muscle bends the foot on the leg, and directs its point inwards, at the same time that it raises its inner edge. It can, also, bend the leg on the foot, and prevent it from falling backwards in standing.

TIBIALIS GRACILIS, Plantar muscle.

TIBIALIS POSTI'CUS, (F.) *Tibio-tarsien*, *Tibio-sous-tarsien* (Ch.), *Jambier postérieur*. This muscle is situate at the posterior and deep part of the leg. It is thicker above than below; and is attached, above, to the posterior surface of the fibula; to the posterior surface of the tibia, and to the interosseous ligament. Its tendon terminates, below, at the tuberosity on the inferior extremity of the os scaphoides. This muscle extends the foot on the leg; at the same time raising its inner edge. It, likewise, extends the leg on the foot.

TIBIO-CALCANIEN, Soleus — *t. Phalangettien*, Flexor longus digitorum pedis profundus perforans — *t. Sous-tarsien*, Tibialis posticus — *t. Sus-métatarsien*, Tibialis anticus — *t. Sus-tarsien*, Tibialis anticus.

TIB'IO-TARSAL, *Tibio-tar'seus*, (F.) *Tibio-tarsienne*. What relates to the tibia and tarsus.

TIBIO-TARSAL ARTICULA'TION is the articulation of the foot with the leg. It is formed by the tibia and the astragalus; and is strengthened by lateral, and by anterior and posterior ligaments.

TIBIO-TARSIEN, Tibialis posticus.

TIC, *Twitching*, *Vellication*. A local and habitual convulsive motion of certain muscles; and, especially, of some of those of the face. It is, sometimes, called *Tic convulsif* ou *Tic non douloureux*, *Histrion'ic Spasm of the Face*, to distinguish it from *Tic douloureux* or *neuralgia faciei*, and has been termed a *partial chorea* or form of *chronic chorea*, *Spasmus facia'lis*, *Chore'a fa'ciei*.

TIC DOULOUREUX, Neuralgia, facial — *t. non douloureux*, see Tic.

TICKLE WEED, Veratrum viride.

TICKLING, (Sc.) *Kittling*, *Kitilling*, (F.) *Chatouillement*. This word, sometimes, means the action of tickling (*titilla'tio*, *titilla'tion*;) at others, the sensation produced by this action (*pruri'tus*). A vivid sensation, which commonly causes laughter, and a state of general spasm that may be dangerous if too long protracted. There are some parts of the body, where we are easier tickled than others; for example, the sole of the feet, and the hypochondriac regions.

TICKSEED SUNFLOWER, Coreopsis trichosperma.

TICKWEED, Hedeoma — t. Sunflower, Coreopsis trichosperma.

TICO'REA FEBRIF'UGA; a Brazilian plant. *Order*, Rutaceæ, the bark of which is intensely bitter, astringent and antiperiodic.

TICOREA JASMINIFLO'RA. A decoction of the leaves is said to be drunk by the Brazilians as a cure for frambœsia.

TIDAL AIR, see Respiration.

TIERCE, see Tertian.

TIGE PITUITAIRE, Infundibulum of the brain — *t. Sus-sphénoïdale*, Infundibulum of the brain.

TIGILLUM, Crucible.

TIGLIA SEU TIGLII GRANA, see Croton Tiglium.

TIGRETIER, see Mania, dancing.

TIGULA, Saccharum.

TIKIMMA, Cacoucia coccinea.

TILBURY, MINERAL WATERS OF. A saline chalybeate at West Tilbury, in Essex, England. It is not much frequented.

TIL'IA, *T. Europæ'a* seu *grandiflo'ra* seu *cor-*

difo'lia seu *panciflo'ra* seu *plataphyll'a*, (akin to πτελεα, 'the elm tree'). *Phil'yra*. The *Lime* or *Linden tree*, (F.) *Tilleul. Ord.* Tiliaceæ. The flowers have been supposed to possess anodyne and antispasmodic virtues.

TILIA AMERICA'NA. *T. glabra* seu *Canaden'sis, Linden, Linn, Basswood, Whitewood, Spoonwood.* A mucilage prepared by macerating the inner bark in cold water, has been applied to burns. It may be made into a cataplasm by thickening it with bran.

TILIA GLABRA, T. Americana — t. Canadensis, T. Americana.

TILLEUL, Tilia.

TILLICHERRY CORTEX, Nerium antidysentericum.

TILMA, Linteum.

TILMOS, Evulsion.

TILMUS, Carphologia.

TILY, OF THE INDIANS, Viburnum dentatum.

TIMAC. The name of an East India root, but of what vegetable is not clear. It is said to possess diuretic properties; and hence has been given in dropsies.

TIMBRE (F.), 'the sound of a bell.' The quality of sound by which one voice, or one instrument, can be distinguished from another when producing the same note.

TIMIDUS, Rectus inferior oculi.

TIN, (D.) Ten. *Stannum, Cassit'eros, Cattit'eros, Stangos, Ju'piter, Stu'pia, Laos, Plumbum album* seu *can'didum*, (F.) *Étain.* A solid metal; of a peculiar odour when rubbed; insipid; colour whitish; s. g. 7·291; giving a peculiar *tinkling* sound when struck. It is used, in medicine, only as a mechanical anthelmintic. Dose, ℥j of the *Pulvis Stanni, Stannum granula'tum* or *Granular tin*, in molasses. This is made by melting tin in an iron vessel over the fire, and, while it is cooling, stirring until it is reduced to a powder, which is passed through a sieve.—Ph. U. S.

TIN, BUTTER OF, Tin, muriate of—t. Chloruret of, Tin, muriate of—t. Deutohydrochlorate of, T. muriate of.

TIN-FOIL, *Stannum folia'tum, Stanni'olum*, is used for plugging carious teeth, &c.

TIN-GLASS, Bismuth—t. Granular, see Tin—t. Muriate of, superoxygenated, T. muriate of.

TIN, MURIATE OF, *Fuming liquor of Liba'vius, Mu'rios Stanni* seu *Oxyd'uli Stanni, Butter* or *Chlor'uret* or *Deu'to-hydro-chlorate* or *Superoxygena'ted Muriate of Tin.* This is formed of *tin*, one part; *concentrated muriatic acid*, three parts. To be crystallized by the aid of heat. A violent cathartic. Dose, gr. ij or iij.

TIN, SULPHURET OF, Aurum musivum.

TINAGMUS, Concussion.

TINASMUS, Tenesmus.

TINCTU'RA, from *tingere, tinctum*, 'to dye.' *Tincture, Essen'tia, (F.) Teinture Alcoolique, Alcoolé, Alcohol, Alcoolature.* The term tincture is generally restricted to spirituous solutions of vegetable, animal, and some saline substances. It corresponds, therefore, with the word *Quintessence*, in one of its old significations; and with the *Alcoola'tum* of the *Codex* of Paris. It is not unusual, however, to speak of *aqueous tincture, ethereal tincture* (*Éthérolature*, Béral), &c. Tinctures are usually made either with pure alcohol or proof spirit. The former are precipitated by water; and, therefore, are seldom used internally; the latter are common additions to infusions, decoctions, &c. They ought not, of course, to be united with any vehicle which can decompose them, or separate any thing from them in a palpable form: unless such decomposition is desired by the prescriber. In making tinctures, the ingredients should be reduced to a coarse powder; and the maceration be made in close vessels, exposed to a heat of about 80°, and frequently shaken. When completed, they must be filtered, and put away for use in close bottles When the process of displacement is employed, great care must be taken, so that the substances treated may be, as far as possible, exhausted of their soluble principles, and a perfectly clear tincture be obtained. To those who are not familiar with the process, the plan of maceration is preferable.—Ph. U. S.

TINCTURA ABSIN'THII COMPOS'ITA, *Essen'tia absin'thii composita* seu *amara, Compound Tincture of wormwood.* (*Absinth., artem. pontic., caryoph.* ää ℥ss, *sacch.* ℥ij, *alcohol.* Oss. Macerate for fifteen days. *Ph. P.*) Tonic, stomachic, vermifuge, and carminative. Dose, f ℥ij to f ℥ss.

TINCTURA ACACIÆ CATECHU, T. catechu — t. Acetatis ferri eum alcohole, see T. ferri acetatis — t. Acidi sulphurici, Sulphuricum acidum aromaticum.

TINCTURA ACONI'TI, (Ph. U. S. 1842.) *Tinctu'ra Aconi'ti folio'rum*, (Ph. U. S. 1851.) *Tincture of Ac'onite*, (*Aconit. folior.* ℥iv, *alcohol dilut.* Oij. Macerate for 14 days, express, and filter through paper. It may also be made by displacement. Ph. U. S.) Dose, gtt. xx or xxx. It is rubbed on the seat of neuralgia.

TINCTURA ACONI'TI RADI'CIS, *Tincture of Aconite root*, (*Aconit. radicis* contus. ℔j, *Alcohol.* Oij. Macerate for 14 days; express and filter. It may also be prepared by displacement. Ph. U. S.) Uses same as the last.

TINCTURA ÆTHE'REA CAMPHORA'TA, *Solu'tio cam'phoræ æthe'rea, Liquor nervi'nus Bang'ii, Spiritus sulphu'rico-ætbereus camphora'tus, Naphtha vitrioli camphora'ta.* (*Camphor.* p. i. *Æther sulphuric.* p. ii.) Stimulant in atonic diseases, arthritic cardialgia, and spasm. Dose, 20 to 30 drops in white wine.

TINCTURA ÆTHEREA FERRI, Alcohol (seu Tinctura) sulphurico-ætbereus ferri — t. Alcoholica Chinæ composita, T. cinchonæ composita—t. Alcoholica corticum aurantiorum Whyttii, Tinctura cinchonæ amara — t. Alexipharmaca Huxhami, Tinctura cinchonæ composita.

TINCTURA AL'OES, *T. Al'oes Socotori'næ, Essen'tia Aloes, Al'cohol cum Aloë perfolia'tâ, Tincture of Aloes.* (*Aloes*, pulv. ℥j, *ext. glycyrrh.* ℥iij, *aquæ* Oiss, *alcohol.* Oss. Macerate for 14 days, and filter. Ph. U. S.) Properties, those of aloes. Dose, f ℥ss to f ℥iss.

TINCTURA ALOES ÆTHE'REA, *T. Aloës vitriola'ta, Æthe'real Tincture of Aloes.* (*Aloes Socot., Myrrh.*, ää ℥iss, *croci* ℥j, *sp. ætheris sulph.* Oj. Digest the myrrh in the ether for 4 days; then add the aloes and saffron. *Ph. E.*) Stimulant and cathartic. Dose, f ℥j to f ℥ij.

TINCTURA ALOES COMPOS'ITA, *Elix'ir Proprietat'is* seu *aperitif'eum* seu *Aloes, Tinctura Aloes cum Myrrhâ* seu *Aloës et Myrrhæ* (Ph. U. S.,) seu *Aloes et Myrrhæ crocea'ta, Elixir of long life, Compound Tincture of Aloes*, (F.) *Elixir de longue vie, Baume de vie de Lelièvre*, (*Aloes*, in pulv., ℥iij, *croci*, ℥j, *Tinct. Myrrhæ*, Oij.) Macerate for 14 days, and filter. Purgative and stomachic. Dose, f ℥j to f ℥ij.

Boerhaave's Elixir consisted of *aloes, myrrh, saffron*, and *tartrate of potassa*, digested in *alcohol* and *water.*

Radcliffe's Elixir is formed of *Aloes socotr.* ℥vj, *cort. cinnam., rad. zedoar*, ää ℥ss, *rad. rhei* ℥j, *cochineil.* ℥ss, *syrup. rhamni* ℥ij, *sp. tenuior.* Oj, *aquæ puræ* f ℥v.

TINCTURA ALOES ET MYRRHÆ, T. aloës composita — t. Aloes et myrrhæ crocata, T. A. composita — t. Aloes vitriolata, T. A. ætherea — t. Amara, T. gentianæ composita — t. Ammoniæ composita, Spiritus ammoniæ succinatus — t.

Amomi repentis, T. cardamomi — t. Amomi zingiberis, T. zingiberis.

Tinctura Angustu'ræ, *T. Cuspa'riæ, Tincture of Angustura.* (*Cort. cuspar.* in pulv. crass. redact. ℥ij. *sp. vin. ten.* Oij. Digest. *Ph. D.*) Dose, f℥j to f℥ij.

Tinctura Antifebrilis Warburgi, see Bebeeru.

Tinctura Antiodontal'gica, *Toothach Tincture.* (*Tannin.* ℈j, *Mastich.* gr. v, *æther.* ℥ij. M.) To be applied on cotton wool to the tooth previously dried.

Tinctura Aristolochiæ Serpentariæ, T. serpentariæ — t. Aromatica, T. cinnamomi composita—t. Aromatica ammoniata, Spiritus ammoniæ aromaticus.

Tinctura Assafœ'tidæ, *T. Fer'ulæ Assafœtidæ, T. fœ'tida* seu *assafœtidæ, Tincture of Assafœtida.* (*Assafœtid.* ℥iv, *alcohol.* Oij. Macerate for 14 days and filter. *Ph. D.*) Dose, gtt. xv to f℥j.

Tinctura Assafœtidæ Ammoniata, Spiritus Ammoniæ fœtidus.

Tinctura Auran'tii, *T. Cor'ticis Aurantii, Tincture of Orange Peel.* (*Aurant. cort.* recent. ℥iij, *sp. rect.* Oij. Digest for 14 days.) Stomachic. Used as an adjunct to stomachic draughts. Dose, f℥ss to f℥ij.

Tinctura Aurea, Alcohol seu tinctura sulphurico-ætherea ferri.

Tinctura Belladon'næ, *Tincture of Belladonna.* (*Belladonnæ,* ℥iv, *alcohol. dilut.* Oij. Macerate for 14 days; express, and filter through paper. It may, also, be prepared by displacement. Ph. U. S.)

Tinctura Benzo'ini Compos'ita, *T. Ben'zoës composita, Bal'samum Catholi'cum* seu *Per'sicum* seu *traumat'icum, Elixir traumaticum, Compound Tincture of Benzoin, Friar's* or *Vervain's Balsam, Wade's* or *Jesuit's drops, Commander's* or *Wound Balsam, Balsam for Cuts.* (*Benzoin.* ℥iij, *styrac. purif.* ℥ij, *Balsam. tolut.* ℥j, *aloes,* in pulv. ℥ss, *alcohol.* Oij. Macerate for 14 days and filter. Ph. U. S.) Stimulant. Used chiefly to wounds and ulcers.

The basis of *Turlington's Balsam of Life, Turlington's Balsam,* is the Compound Tincture of Benzoin. The following form is recommended by a committee of the Philadelphia College of Pharmacy:—*Alcohol.* Ovij, *Benzoin.* ℥xij. *Styrac. liquid.* ℥iv, *Aloes Socotrin.* ℥j, *Balsam. Peruvian.* ℥ij, *Myrrhæ* ℥j, *Rad. Angelic.* ℥ss, *Balsam. Tolut., Ext. Glycyrrh.* ää ℥iv. Digest for 10 days, and strain.

The *Essence of Coltsfoot* consists of equal parts of the *Compound Tincture of Benzoin* and *Balsam of Tolu,* to which is added double the quantity of *Rectified Spirit of Wine.* It is sold as a pectoral.

Tinctura Buchu, *T. Buchu, Tincture of Buchu.* (*Buch.* ℥v, *Alcohol. dilut.* Oij (Imp. meas.). Digest for seven days and filter. It may be made, also, by percolation. *Ph. E.*) Dose, f℥j to f℥iv.

Tinctura Bucku, Tinctura Buchu.

Tinctura Calum'bæ, *T. Columbæ* seu *Colombæ* (Ph. U. S.), *Tincture of Columbo, Columbo Bitters,* (*Columb. rad.* cont. ℥iv, *alcohol. dilut.* Oij. Macerate for 14 days; express, and filter. Ph. U. S.) Dose, f℥ss to f℥iv. It may, also, be made by displacement.

Tinctura Camphoræ, Spiritus camphoræ.

Tinctura Cam'phoræ Compos'ita, *T. Opii Camphora'ta* (Ph. U. S.), *Compound Tincture* or *Camphorated Tincture of Opium, Elixir Paregor'icum, Paregor'ic Elixir.* (*Opii,* in pulv., *Acid Benzoic.* ää ℥j *ol. anisi,* f℥j, *mellis despumat.* ℥ij, *Camphor.* ℈ij, *alcohol. dilut.* Oij. Macerate for 14 days, and filter through paper. Ph. U. S.) One fluidounce contains nearly gr. ij of opium. Anodyne. Dose, f℥j to f℥iij.

Squire's Elixir, an empirical carminative preparation, is thus made, according to one formula. (*Opii* ℥iv, *camphor.* ℥j, *coccinell.* ℥j, *fœnicul. dulc.* ℥ij, *tinct. serpent.* Oj, *sp. anisi.* cong. ij, *aquæ* Oij, *auri musivi,* ℥vj.)

Tinctura Can'nabis In'dicæ, *Tincture of Indian Hemp.* (*Ext. Cannab. purif.* ℥ss (avoirdupois), *sp. rectificat.* Oss (Imp. meas.) Dissolve. *Ph. D.*) Dose, about 40 drops.

Tinctura Canthar'idis, *T. C. Vesicato'riæ, T. Lyttæ* seu *Meloës vesicato'rii, Tincture of Cantharides, Tincture of Blistering Flies, T. of Spanish Flies,* (F.) *Teinture rubéfiante.* (*Cantharid.* cont. ℥ij, *alcohol. dilut.* Oij. Macerate for 14 days; express, and filter. It may, also, be prepared by displacement. Ph. U. S.) Stimulant and diuretic, but not often used internally. Externally, stimulant. Dose, gtt. x.

Matthew's Injection, a once celebrated nostrum for fistula in ano, consisted wholly of a dilute *Tincture of Cantharides.*

Tinctura Cap'sici, *Tincture of Capsicum* or *Cayenne Pepper.* (*Capsic.* ℥j, *alcohol. dil.* Oij. Macerate for 14 days, and filter. It may, also, be prepared by displacement. Ph. U. S.) Stimulant. Dose, f℥ss to f℥j.

Tinctura Cardamo'mi, *T. amo'mi repen'tis, Tincture of Car'damoms.* (*Cardam.* cont. ℥iv, *alcohol. dilut.* Oij. Macerate for 14 days, strain, and filter. It may, also, be made by displacement. Ph. U. S.) Use, the same as the seeds Dose, f℥j to f℥iv.

Solomon's Balm of Gil'ead, an empirical preparation, seems to be an aromatic tincture, — of which *Cardamoms* form a leading ingredient, —made with brandy. Some affirm that it contains *cantharides.*

Tinctura Cardamomi Compos'ita, *Tincture Stomach'ica, Compound Tincture of Card'amoms, Stomach Tincture.* (*Cardamom.* cont. ℥vj. *Carui.* cont. ℥ij. *cinnam.* cont. ℥v, *Uvæ passæ* demptic acinis, ℥v, *cocci.* cont. ℥j, *alcohol. dilut.* Oiiss Macerate for 14 days; express and filter. Ph. U. S.) Stomachic and carminative. Dose, f℥ij to f℥iv.

Tinctura Carminati'va Syl'vii, *Alcoola'tum Carminati'vum Sylvii, Carminative Elixir of Sylvius.* (*Rad. angelic.* 4 p., *rad. imperator., galang.* ää 6 p., *fol. rosmarin., majoran., rutæ, basilic.* ää 48 p., *baccar. laur. nobil.* 12 p. *sem. angelic., ligust. levist., anis.* ää 16 p., *zingib., nuc. moschat.* ää 6 p., *cinnam.* 12 p., *caryoph., cort. limon.* ää 4 p. Add *alcohol* 1500 p. Macerate and distil, 1000 p. *Ph. P.*) A warm stomachic, carminative, &c. Dose, f℥ss to f℥ss.

Tinctura Cascaril'læ, *T. Croto'nis Eleuthe'riæ, Al'cohol cum Croto'nē Cascarillâ, Tincture of Cascarilla.* (*Cascarill. cort.* cont. ℥iv, *sp. ten.* Oij. *Ph. L.*) Dose, f℥j to f℥iv.

Tinctura Casto'rei, *T. Castorei Ros'sici* seu *Castorei Canaden'sis, Essen'tia Castorei, Al'cohol castoria'tum, Tincture of Castor.* (*Castor* cont. ℥ij, *alcohol.* Oij. Macerate for 7 days, express, and filter. *Ph. U. S.*) Tonic and antispasmodic. Dose, gtt. xx to f℥j, or more.

Tinctura Castorei Compos'ita, *T. C. ammonia'ta, Compound Tincture of Castor.* (*Cast.* ℥j, *g. asafœtid.* ℥ss, *alcohol. ammoniat.* Oj. *Ph. E.*) Antispasmodic. Dose, f℥j to f℥iv. Called, also, *Elixir fœ'tidum, Tinctura castorei fœtida* seu *fœtida ammonia'ta.*

Tinctura Cat'echu, *Tinctura Japon'ica* seu *Mimo'æ Catechu* seu *Aca'ciæ Catechu, Tincture of Catechu.* Catech. ℥iij, *cinnam.* contus. ℥ij, *alcohol. dilut.* Oij. Macerate for 14 days, express and filter. *Ph. U. S.*) Astringent. Dose, f℥j to f℥ij.

The *Concentrated Solution of Charcoal*, sold for cleaning the teeth, seems to be little more than the tincture of catechu.

Tinctura Chiretti'æ, *Tincture of Chiret'ta.* (*Chirett.* cont. ℥v, (avoird.) *alcohol. dilut.* Oij. (Imp. meas.) Macerate for 14 days. *Ph. D.*) Dose, f℥j, or f℥ij, as a tonic.

Tinctura Cicutæ, T. conii maculati.

Tinctura Cincho'næ, *T. Cor'ticis Peruvia'ni Simplex* seu *Cort. Peruvia'ni, Tincture of Cinchona* or *of Bark.* (*Cinchon. flav.* in pulv. ℥vj, *alcohol. dilut.* Oij. Macerate for 14 days, express, and filter through paper. It may, also, be made by displacement. *Ph. U. S.*) Dose, f℥j to f℥iv, or more.

Tinctura Cincho'næ Ama'ra seu *alcohol'ica corticum aurantio'rum Whyttii* seu *Kinki'næ ama'ra, Elixir antihypochondri'acum* seu *rob'orans Whyt'tii* seu *Whyttii* seu *stomach'icum spirituo'sum, Essen'tia Cor'ticis Peruvia'ni Composita.* (*Cinch.* p. viij, *Gentian. Rad., Cort. Aurant.* p. ij. *Alcohol.* (·900) 96 p. Digest. Dose, one or two teaspoonfuls.)

Tinctura Cinchonæ Ammonia'ta, *T. Cor'ticis Peruvia'ni volat'ilis, Ammoniated* or *Volatile Tincture of Bark.* (*Cinchon. lancifol. cort.* cont. ℥iv, *sp. ammon. aromat.* Oij. *Ph. L.*) In dyspepsia, combined with acidity and languor.

Tinctura Cinchonæ Æthe'rea Compos'ita, *T. Kinæ Kinæ æthe'rea compos'ita, Elixir'ium Antisep'ticum Docto'ris Chaussier, Chaussier's Antisep'tic Elixir.* (*Cinchon. officin.* ℥ij, *cascarill.* ℥ss, *cinnam.* ℥iij, *croci* ℥ss, *sacch. alb.* ℥xxxviij. Put these bruised into a matrass, and add *vin. alb. Hispanic.* vel *vin. muscat., alcohol.* ää Oj. Macerate for two days, and add *sulphuric ether* ℥iss. *Ph. P.*) Tonic, stimulant, and antiseptic. Dose, f℥ss to f℥j.

Tinctura Cinchonæ Compos'ita, *T. Cor'ticis Peruvia'ni Composita* seu *febrif'uga Docto'ris Huxha'mi* seu *Alexiphar'maca Huxhami* seu *Alcohol'ica Chinæ Compos'ita, Essen'tia Chinæ* seu *Cor'ticis Peruvia'ni Alexiphar'maca Huxhami* seu *antisep'tica Huxhami, Compound Tincture of Cinchona* or *Bark, Huxham's Tincture of Bark.* (*Cinchon. rubr.* pulv. ℥ij, *aurant. cort.* cont. ℥iss, *serpent.* cont. ℥iij, *croci, santal.* ää ℥j, *alcohol. dilut.* f℥xx. Macerate for 14 days, express, and filter. *Ph. U. S.*) It may, also, be made by displacement. More grateful than the simple tincture. Dose, f℥j to f℥iij.

Tinctura Cinnamo'mi, *T. Lauri Cinnamomi, Essen'tia Cinnamomi, Tincture of Cinnamon.* (*Cinnam.* cont. ℥iij, *alcohol. dilut.* Oij. Macerate for 14 days, express, and filter. *Ph. U. S.*) It may, also, be prepared by displacement. Stomachic. Dose, f℥j to f℥ij.

Tinctura Cinnamo'mi Compos'ita, *T.* seu *Essen'tia Aromat'ica, Alcoöl cum Aromat'ibus Compos'itus, Compound Tincture of Cinnamon,* (F.) *Eau de Bonferme* ou *d'Armagnac.* (*Cinnam.* cont. ℥j, *cardam.* cont. ℥ss, *zingib.* cont. ℥iij, *alcohol. dilut.* Oij. Macerate for 14 days, express, and filter. *Ph. U. S.*) It may, also, be prepared by displacement. Use, same as the last. Dose, f℥j to f℥iij.

Tinctura Cocci Cacti, *Tincture of Coch'ineal.* (*Cocci* pulv. ℥ij (avoird.), *alcohol. dilut.* Oj. (Imp. meas. *Ph. D.*) Chiefly a colouring ingredient. At times, given in nervous affections. Dose, gtt. xij to f℥j.

Tinctura de Cochlea'riis, *Alcoola'tum de Cochlea'riis* seu *antiscorbu'ticum. (Fol. cochlear. recent.* 2500 p., *rad. armoraciæ,* 230 p., *alcohol.* (22° to 32° Beaumé) 3000 p., distil off 2000 p. *Ph. P.*) Antiscorbutic. Dose, f℥ij to f℥j.

Tinctura Col'chici, *T. C. Sem'inis.* (*Ph. U. S.*), *Tincture of Colchicum Seed.* (*Colchic. sem.* cont. ℥iv, *alcohol. dilut.* Oij. Macerate for 14 days, express, and filter. *Ph. U. S.*) It may, also, be prepared by displacement. Dose, ten to sixty drops.

Tinctura Colchici Composita, Spiritus colchici ammoniatus—t. Colchici seminis, T. colchici —t. Colombæ, T. Calumbæ.

Tinctura Coni'i, *T. C. Macula'ti, T. Cicu'tæ, Tincture of Hemlock.* (*Conii fol.* ℥iv, *alcohol. dil.* Oij. Macerate for 14 days, express, and filter. *Ph. U. S.*) It may also be made by displacement. Use; — the same as that of the leaves.

Tinctura Conii Maculati, T. conii — t. Convolvuli Jalapæ, T. jalapii — t. Corticis aurantii, T. aurantii — t. Corticis Peruviani composita, T. cinchonæ comp. — t. Corticis Peruviani simplex, T. cinchonæ — t. Corticis Peruviani volatilis, T. cinchonæ ammoniata.

Tinctura Croci Sati'vi, *T. Croci, Tincture of Saffron.* (*Croci Angl.* cont. ℥j, *alcohol. dilut.* ℥xv. *Ph. E.*) Slightly stomachic [?]. Dose, f℥j to f℥iij.

Tinctura de Croco Compos'ita, *Elixir'ium de Garus, Alcoola'tum de Croco Compos'itum, Compound Tincture of Saffron, Elixir of Garus.* (*Aloes Socotr.* 320 p., *myrrh.* 64 p., *croci.* 32 p., *cinnam., nuc. moschat., caryoph.* ää, 16 p., *alcohol.* 1000 p. *aq. flor. aurant.* 5000 p. Digest for two days; distil 4000 p. and add *syrup of capillaire,* 5000 p. *Ph. P.*) Aromatic, cordial, stomachic. It is also called *Elixir cordia'lē et stomach'icum,* and *E. anticol'icum croca'tum.*

Tinctura Croto'nis, *Tincture of Croton.* Under this name Mr. E. Wilson recommends 'a most valuable cutaneous stimulant,' made by adding four fluidounces of *alcohol* to one ounce of the bruised seeds of *Croton tiglium.*

Tinctura Crotonis Eleutheriæ, T. cascarillæ.

Tinctura Cubeb'æ, *Tincture of Cubebs.* (*Cubeb.* cont. ℥iv, *alcohol. dilut.* Oij. Macerate for 14 days, express, and filter. *Ph. U. S.*) It may, also, be prepared by displacement. Dose, one or two fluidrachms.

Tinctura Cuspariæ, Tinctura Angusturæ.

Tinctura Digita'lis, *T. Digitalis purpu'reæ. Tincture of Digitalis.* (*Digital.* ℥iv, *alcohol. dilut.* Oij. Macerate for 14 days, express, and filter.) It may, also, be prepared by displacement. Use, same as that of the leaves. Dose, gtt. x.

Tinctura Er'gotæ, *Tincture of Ergot.* (*Ergot.* in pulv. crass. ℥viij (avoird.), *Sp. tenuior.* Oij, (Imp. meas.) Macerate for 14 days, express, and filter. *Ph. D.*) Dose, f℥ j to f℥ij.

Tinctura Er'gotæ Æthe'rea, *Ethe'real Tincture of Ergot.* (*Ergot.* contus. ℥xv, *Æther.* Oij, (Imp. meas.) Macerate for 7 days, express, and filter. *Ph. L.*) Dose, 60 to 90 minims.

Tinctura Febrifuga Doctoris Huxhami, T. cinchonæ composita.

Tinctura Ferri Aceta'tis, *Tincture of Acetate of Iron.* (*Potass. acetat.* ℥ij, *sulph. ferri.* ℥j, *sp. rectif.* Oij. Rub the acetate and sulphate into a soft mass. Dry and rub with the spirit. Digest for 7 days, and pour off. *Ph. D.*) Tonic and astringent. Dose. gtt. xx to f℥j. The Dublin college directs a *Tinctura Acetatis Ferri cum Alcoho'lē,* which differs from the other, in having half the quantity, only, of the *Acetate of Potass.*

Tinctura Ferri Ammonia'ta, *T. Ferri Ammoniaca'lis* seu *Florum martia'lium* seu *Martis Mynsich't, Tincture of Ammoniated Iron.* (*Ferri ammon.* ℥iv, *sp. ten.* Oj. *Ph. L.*) *Use* — same as that of the ammoniated iron. Dose, f℥ss to f℥ij.

Tinctura Ferri Ammo'nio-Chlo'ridi, *Tincture of Ammonio-chloride of Iron.* (*Ferri ammonio-chlorid.* ℥iv, *alcohol. dilut., aquæ destillat.*

āā Oj. (Imp. meas.) Dissolve and filter. *Ph. L.*) Dose, gtt. x to xx.

TINCTURA FERRI CHLORIDI, T. ferri muriatis.

TINCTURA FERRI MURIA'TIS, *T. Ferri chlo'ridi* (*Ph. U. S.*) seu *sesqui-chlo'ridi* seu *Martis in Spiritu Salis* seu *Martis cum Spiritu Salis* seu *Ferri Muria'ti, Liquor Ferri Muria'tis, Tincture of Muriate of Iron, Tincture of Steel, Alcohol ferra'tus.* (*Ferri subcarb.* ℔ss, *acid. muriat.* Oj, *alcohol.* Oiij. Add the acid to the subcarbonate in a glass vessel, and shake during three days. Pour off and add the spirit. *Ph. U. S.*) Tonic and styptic. It has been given, also, with advantage in erysipelas and scarlatina in the dose of ♏ x to ♏ xx, every two or three hours. Dose, gtt. x to xx.

Bestucheff's Tincture or *Klaproth's Tincture* is an ethereal tincture of chloride of iron. It is composed of dry *perchloride of iron*, one part; *Hoffmann's anodyne liquor*, seven parts.

The *Antivenereal Drops*, at one time so celebrated at Amsterdam, were examined by Scheele, and found to be a tincture of chloride of iron and corrosive sublimate.

TINCTURA FERRI SESQUICHLORIDI, T. Ferri muriatis—t. Ferulæ Assafœtidæ, T. Assafœtidæ—t. Florum martialium, T. ferri ammoniata—t. Fœtida, T. assafœtidæ — t. Fœtida ammoniata, T. castorei composita — t. Fuliginis, see Fuligo.

TINCTURA GAL'BANI, *Tincture of Galbanum.* (*Galb.* ℥ij, *sp. tenuior.* Oij. *Ph. D.*) Stimulant and antispasmodic. Dose, f℥j to f℥iij.

TINCTURA GALLA'RUM, *T. Gallæ*, (*Ph. U. S.*) *Tincture of Galls.* (*Gall.* contus. ℥iv, *alcohol. dilut.* Oij. Macerate for 14 days, express and filter. *Ph. U. S.*) It may, also, be prepared by displacement. Astringent. Dose, f℥j to f℥iij.

TINCTURA GENTIA'NÆ COMPOS'ITA, *Tinct. Amara, Elix'ir Stomach'icum, Compound Tincture of Gentian, Spirit Bitters.* (*Gent.* concis. ℥ij, *aurant. cort.* ℥j, *cardam.* cont. ℥ss, *alcohol. dilut.* Oij. Macerate for 14 days, express, and filter. It may, likewise, be prepared by displacement. *Ph. U. S.*) Tonic and stomachic. Dose, f℥j to f℥iij.

Brodum's Nervous Cordial consists of the *Tinctures of Gentian, Columba, Cardamom*, and *Bark*, with the *Compound Spirit of Lavender*, and *Wine of Iron.*

Stoughton's Elixir is a compound tincture of gentian. The *Elixir'ium Docto'ris Stoughton* seu *Tinctu'ra Ama'ra* of the Parisian Codex is prepared as follows: — *Absinth. summit.* exsiccat., *Teucri chamædrys. Rad. gentian., cort. aurant.*, āā ℥vj, *cascarillæ* ℥j, *rhei* ℥ss, *aloes socotr.* ℥j, *alcohol.* Oij.) Digest.

TINCTURA GUAI'ACI, *T. Guaiaci Officina'lis, Tincture of Guai'acum.* (*Guaiac.* ℔ss, *alcohol.* Oij. Macerate for 14 days, and filter. *Ph. U. S.*) Stimulant and sudorific. Used especially in rheumatic and arthritic cases. Nearly the same as *Hill's Essence of Bardana* or *Burdock.*

TINCTURA GUAI'ACI AMMONIA'TA, *T. Guaiaci'na Volati'lis, T. Guai'aci*, (*Ph. L.* 1788,) *Elixir Guai'aci Volatilis, Al'cohol cum Guai'aco officina'le ammoni'atus, A. ammoniæ et Guai'aci, Ammoniated Tincture of Guai'acum, Vol'atile Tincture of Guai'acum.* (*Guaiac.* pulv. ℥iv, *sp. ammon. arom.* Oiss. Macerate for 14 days, and filter. *Ph. U. S.*) Properties same as the last. Dose, f℥j to f℥ij.

Hatfield's Tincture — a nostrum — consists of *Guaiacum* and *Soap*, āā ℥ij, *rectified spirit*, Oiss.

TINCTURA HELLEB'ORI, *T. Helleb'ori Nigri, T. Melampo'dii, Tincture of Black Hellebore.* (*Helleb. nigr.* cont. ℥iv, *alcohol. dilut.* Oij. Macerate for 14 days, express and filter. It may also be prepared by displacement. *Ph. U. S.*) Dose, f℥ss to f℥j.

TINCTURA HIERA, Vinum aloes.

TINCTURA HU'MULI, *T. Lu'puli, Tincture of Hops.* (*Humuli*, ℥v, *alcohol. dilut.* Oij.) Tonic and sedative. Dose, f℥ss to f℥iij.

TINCTURA HYOSCY'AMI, *T. Hyoscyami nigri, Tincture of Henbane.* (*Hyoscyam. fol.* ℥iv, *alcohol. dilut.* Oij. Macerate for 14 days, express and filter. It may also be prepared by displacement. *Ph. U. S.*) Narcotic, anodyne. Dose, gtt. xx. to f℥ij.

TINCTURA IO'DINI, (*Ph. U. S.*, 1842,) *T. Iodin'ii*, (*Ph. U. S.*, 1851,) *Alcohol Io'dii, Tincture of Iodine.* (*Iodin.* ℥j, *alcohol.* Oj. Dissolve. *Ph. U. S.*) The tincture spoils by keeping, or at least, deposits the iodine. It has been much used in goître, &c. Dose, ten drops three times a day.

An ethereal and a chloroform tincture of iodine have been used, to affect the system with iodine by inhalation.

TINCTURA IODINI COMPOS'ITA, (*Ph. U. S.*, 1842,) *T. Iodin'ii Composita*, (*Ph. U. S.*, 1851,) *Compound Tincture of Iodine.* (*Iodin.* ℥ss, *Potassii iodid.* ℥j, *Alcohol.* Oj. Dissolve. *Ph. U. S.*) Dose, 10 to 30 drops.

TINCTURA JALA'PII, *T. Jala'pæ*, (*Ph. U. S.*) seu *Convol'vuli Jalapæ, Vali'ga, Tincture of Jalap.* (*Jalap.* pulv. ℥vi, *Alcohol. dilut.* Oij. Macerate for 14 days, express, and filter. *Ph. U. S.*) It may also be made by displacement. Cathartic. Dose, f℥j to f℥iv.

TINCTURA JALA'PII COMPOS'ITA, *Elixir Jalap'æ Compos'itum* seu *purgans* seu *anthelmin'ticum Sueco'rum, Essen'tia cathol'ica purgans Roth'ii*, (F.) *Eau de vie Allemande.* (*Jalap.* ℔ss, *Scammon.* ℥j, *Alcohol.* (22°) Ovj. Macerate for eight days. *Ph. P.*) Dose, 60 to 100 drops.

TINCTURA JAPONICA, Tinctura catechu — t. Kinæ kinæ ætherea composita, Tinctura cinchonæ ætherea composita—t. Kinkinæ amara, Tinctura cinchonæ amara.

TINCTURA KINO, *Tincture of Kino.* (*Kino*, in pulv., ℥vj; *Alcohol. dilut.* q. *s.* Put the kino, mixed with an equal bulk of sand, into a percolator, and gradually pour on diluted alcohol until f℥viij of filtered liquor pass. The tincture should be renewed frequently, and kept in closely stopped bottles. *Ph. U. S.*) Astringent. Dose, f℥j to f℥ij.

TINCTU'RA KRAME'RIÆ, *Tincture of Rhatany.* (*Kramer.* in pulv. ℥vj, *alcohol. dilut.* Oij. Macerate for 14 days, express, and filter. *Ph. U. S.*) It may also be prepared by displacement. Dose, f℥j to f℥ij.

TINCTURA LACTUCA'RII, *Tincture of Lactucarium.* (*Lactucar.* in pulv. ℥iv, *Sp. tenuior.* Oij. (Imp. meas.) Best prepared by percolation. *Ph. E.*) Dose, 30 minims to f℥j.

TINCTURA LAURI CINNAMOMI, Tinctura cinnamomi—t. Lavandulæ composita, Spiritus lavand. comp.

TINCTURA LIMO'NIS, *Tincture of Lemon peel.* (*Limon. cort.* ℥iiiss, *Sp. tenuior.* Oij. (Imp. meas.) Macerate for 7 days, express and filter. *Ph. D.*) Dose, f℥j to f℥ij.

TINCTU'RA LOBE'LIÆ, *Tincture of Lobelia.* (*Lobel.* ℥iv, *alcohol. dilut.* Oij. Macerate for 14 days, express, and filter. *Ph. U. S.*) It may also be prepared by displacement. Dose, f℥j to f℥ij.

TINCTURA LOBE'LIÆ ÆTHE'REA, *Ethe'real Tincture of Lobe'lia.* (*Lobel.* pulv. ℥v, *Sp. æther. sulph.* Oij. (Imp. meas.) *Ph. E.* and *L.*) Dose, same as the last.

TINCTURA LUPULI, Tinctura Humuli, T. Lupulinæ.

TINCTU'RA LUPULI'NÆ, *T. Lu'puli*, (*Ph. E.*) *Tincture of Lu'puline.* (*Lupulin.* ℥iv, *alcohol.*

Oij. Macerate for 14 days, and filter. *Ph. U. S.*) Dose, f℥j to f℥ij.

Tinctura Lyttæ, Tinctura cantharidis—t. Martis Glauberi, see Ferrum tartarizatum—t. Martis in spiritû salis, Tinctura ferri muriatis—t. Martis Mynsichti, Tinctura ferri ammoniata—t. Martis vinosa, Vinum ferri.

Tinctura Matico, *Tincture of Matico.* (*Matico* in pulv. crass. ℥viij, (avoird.) *Sp. tenuior.* Oij. (Imp. meas.) Macerate for 14 days, express, and filter. *Ph. D.*) Dose, f℥j to f℥iij.

Tinctura Melampodii, Tinctura hellebori nigri—t. Meloes vesicatorii, Tinctura cantharidis—t. Metallorum, Lilium Paracelsi—t. Mimosæ catechu, Tinctura catechu.

Tinctura Moschi, *Tincture* or *Essence of Musk.* (*Mosch.* in pulv. redact. ℥ij. *sp. vini rect.* Oj. Dose, f ℥j to f℥iv.

Tinctura Myrrhæ, *Tincture of Myrrh, Simple Tincture of Myrrh.* (*Myrrhæ* contusæ ℥iv, *alcohol* Oiij. Macerate for 14 days, and filter. *Ph. U. S.*) Tonic, deobstruent, antiseptic, and detergent. It is chiefly used in gargles, and applied to foul ulcers, spongy gums, &c.

Hudson's Preservative for the Teeth and Gums consists of *Tinct. myrrh., tinct. cinch., aq. cinnam.* ää ℥iij, *eau d'arquebusade* ℥j, *pulv. gum. Arab.* ℥ss. M.

Tinctura Nervina Bestucheffii, Tinctura seu alcohol sulphurico-æthereus ferri—t. Nervina Halensis, Tinctura seu alcohol sulphurico-ætherea ferri—t. Nervino-tonica, Lamotte's, Alcohol seu Tinctura sulphurico-ætherea ferri.

Tinctura Nucis Vom'icæ, *Tincture of Nux Vomica.* (*Alcohol. s. g.* 837, f℥j; *Dry Extract of Nux Vomica,* 3 gr.) Dose, gtt. v to xxx, in cases where the nux vomica is indicated.

It is directed, in the last edition of the Ph. U. S. (1851), to be prepared as follows:—*Nucis vomicæ* rasur., ℥viij; *alcohol,* Oij. Macerate for 14 days, express, and filter. It may also be prepared by the process of displacement. Dose, gtt. v to xx.

Tinctura Olei Menthæ Piperi'tæ, *Tincture of Oil of Peppermint, Essence of Peppermint.* (*Ol. menthæ piperitæ,* f℥ij, *alcohol.* Oj. Dissolve. *Ph. U. S.*) Dose, 5 drops, as a carminative.

Tinctura Olei Menthæ Vir'idis, *Tincture of Spearmint, Essence of Spearmint,* is made in the same manner. *Ph. U. S.*

Tinctura O'pii, *T. Theba'ica* seu *Sedati'va, Theriaca cœles'tis, Al'cohol cum Opio, Tincture of Opium, Liquid Lau'danum.* (*Opii* pulv. ℥ijss, *alcohol. dilut.* Oij. Macerate for 14 days, express, and filter. *Ph. U. S.*) Nineteen minims contain about one grain of opium. Properties, those of opium. Dose, gtt. xx to lx and more. By macerating the dregs remaining after making the *Tinctura Opii* in a solution of *Tartaric Acid,* a solution is obtained, which is said to be devoid of the exciting and constipating properties of the tincture of opium. Gray calls it *Haden's Liquor Opii Sedati'vus.*

Tinctu'ra Opii Aceta'ta, *Ac''etated Tincture of Opium.* (*Opii* ℥ij; *aceti,* f℥xij; *alcohol.* Oss. Rub the opium with the vinegar; add the alcohol, and having macerated for 14 days, express and filter. *Ph. U. S.*) Twenty drops are equivalent to a grain of opium.

Tinctura Opii Ammonia'ta, *Ammo'niated Tincture of Opium, Edinburgh Paregor'ic Elix'ir.* (*Flor. benz., croci,* ää ℥iij, *opii* ℥ij, *ol anisi* ℥ss, *alcohol. ammoniat.* f℥xvj. Digest. *Ph. E.*) f℥j contains one grain of opium. Used like the *Tinctura Camphoræ Composita.*

Tinctura Opii Camphorata, Tinctura camphoræ composita—t. Plumbosa, Liquor Plumbi subacetatis dilutus.

Tinctura Quas'siæ, *T. Quassiæ excel'sæ, Tincture of Quassia.* (*Quassiæ rasur.* ℥ij, *alcohol. dilut.* Oij. Macerate for 14 days, express, and filter. *Ph. U. S.*) It may also be prepared by displacement. Tonic. Dose, f℥j to f℥ij.

Tinctura Quas'siæ Compos'ita, *Compound Tincture of Quas'sia* (*Cardam. sem.* contus., *Cocci* contus. ää ℥ss; *Cinnam., Quassiæ,* ää ℥vj; *Uvar pasar,* ℥vij; *Sp. tenuior.* Oij (Imp. meas.). Digest for 7 days; express and filter. May be prepared also by percolation. *Ph. E.*) Dose, as a tonic, f℥j or f℥ij.

Tinctura Quiniæ Compos'ita, *Compound Tincture of Qui'na.* (*Quiniæ sulph,* ℥v and ℈j; *Tinct. aurantii,* Oij, (Imp. meas.) Oij. Digest for 7 days and filter. *Ph. L.*) f℥j, contains a grain of the sulphate.

Tinctura Qui'niæ Sulpha'tis, *Tincture of Sulphate of Qui'nia.* (*Sulphate of Quinia,* gr. vj; *alcohol,* (·847) f℥j. M.) Dose, f℥j to f℥iv, in the day.

Tinctura Cincho'niæ Sulpha'tis may be made in a similar manner.

Tinctura Rhabarbari, Tinctura rhei—t. Rhabarbari composita, Tinctura rhei composita—t. Rhabarbari vinosa, Vinum rhei palmati.

Tinctura Rhei, *T. Rhabarb'ari* seu *Rhabarbari spirituo'sa* seu *Rhæi* seu *Rhei palma'ti, Tincture of Rhubarb.* (*Rhei* contus. ℥iij, *cardam.* cont. ℥ss, *alcohol. dilut.* Oij. Macerate for 14 days, express, and filter. It may also be prepared by displacement. *Ph. U. S.*) Stomachic or purgative, according to the dose employed: f℥j to ℥ij, as a stomachic; f℥iv to ℥j, as a purgative.

Tinctura Rhei Compos'ita, *T. Rhabarbari composita, Compound Tincture of Rhubarb.* (*Rhei rad.* concis. ℥ij, *glycyrrhiz. rad.* cont. ℥ss, *zingib. rad.* concis., *croci stigmat.* ää ℥ij, *aquæ* f℥xij, *sp. ten.* Oj. *Ph. L.*) Properties same as the last.

Tinctura Rhei et Al'oes, *Elixir sacrum, Tincture of Rhubarb and Aloes.* (*Rhei* concis. ℥x, *aloes* pulv. ℥vj, *cardam.* cont. ℥ss, *alcohol. dilut.* Oij. Macerate for 14 days, express, and filter. *Ph. U. S.*) Properties like the last.

Rymer's Car'diac Tincture consists of an infusion of *Capsicum, Camphor, Cardamom seeds, Rhubarb, Aloes* and *Castor* in *Proof Spirit,* with a very small quantity of *Sulphuric Acid.*

Tinctura Rhei et Gentia'næ, *Tinctura Rhei Ama'ra, Tincture of Rhubarb with Gen'tian.* (*Rhei* cont. ℥ij, *gentian.* cont. ℥ss, *alcohol. dilut.* Oij. Macerate for 14 days, express and filter. *Ph. U. S.*) It may also be prepared by displacement. Properties same as the last.

Tinctura Rhei et Sennæ, *Tincture of Rhubarb and Senna, Warner's Gout Cordial.* (*Rhei* cont. ℥j, *sennæ,* ℥ij, *coriandr.* cont., *fœnicul.* cont. ää ℥j, *santal.* rasur. ℥ij, *croci, ext. glycyrrhiz.* rad. ää ℥ss, *uvar. passar.* acinis exemptis, ℔ss, *alcohol. dilut.* Oiij. Macerate for 14 days; express and filter. *Ph. U. S.*) Dose, f℥ss to f℥ij.

Tinctura Rhœi, Tinctura rhei—t. Rhœi amara, Tinctura rhei et gentianæ—t. Sacra, Vinum aloes.

Tinctura Sanguina'riæ, *Tincture of Bloodroot.* (*Sanguinar.* cont. ℥iv, *alcohol. dilut.* Oij. Macerate for 14 days, express, and filter. *Ph. U. S.*) It may also be prepared by displacement. Dose, 30 to 60 drops.

Tinctura Saponis Camphorata, Linimentum saponis—t. Saponis et opii, Linimentum saponis et opii.

Tinctura Scillæ, *Tincture of Squill.* (*Scillæ* ℥iv, *alcohol. dilut.* Oij. Macerate for 14 days, express, and filter. It may also be made by displacement. *Ph. U. S.*) Dose, gtt. xv to lx.

Tinctura Sedativa, Tinctura opii.

Tinctura Sennæ, *T. Sennæ Compos'ita, Elixir Salu'tis, Daffy's Elixir, Tincture of Senna.* (*Sennæ fol.* ℥iij, *carui sem.* cont. ℥iij, *cardam. sem.* cont. ℥j, *uvarum passarum* demptis acinis, ℥iv, *sp. ten.* Oij. *Ph. L. & D.*) Stomachic, carminative and cathartic. Dose, f℥ij to f℥j.

Tinctura Sennæ et Jala'pæ, *Tincture of Senna and Jalap.* (*Sennæ* ℥iij, *jalap.* pulv. ℥j, *coriandr.* cont., *carui* cont., ää ℥ss, *cardam.* cont. ℥ij, *sacch.* ℥iv, *alcohol. dilut.* Oiij. Macerate for 14 days, express, and filter. *Ph. U. S.*) It may also be prepared by displacement. Dose, f℥ij to f℥j.

Tinctura Serpenta'riæ, *T. Serpenta'riæ* seu *Virginia'næ* seu *Aristolochi'æ Serpentariæ, Tincture of Snakerooot.* (*Rad. serpent.* ℥iij, *alcohol. dilut.* Oij. Macerate for 14 days, express, and filter. *Ph. U. S.*) It may also be prepared by displacement. Tonic. Dose, f℥ss to f℥ij.

Tinctura Stomachica, Tinctura cardamomi composita.

Tinctura Stramo'nii, *Tincture of Stramo'nium.* (*Stramon. sem.* cont. ℥iv, *alcohol. dilut.* Oij. Macerate for 14 days, express, and filter. *Ph. U. S.*) It may also be prepared by displacement. Dose, ten to twenty minims.

Tinctura Strych'niæ, *Tincture of Strych'nia.* (*Alcohol.* s. g. ·837, Oj, *Strychniæ*, gr. iij.) Dose, 6 drops to 24. Propertics, those of strychnia.

Tinctura (seu Al'cohol) Sulphu'rico-Ætherеus Ferri, *Guttæ nervi'næ, Liquor Anod'ynus Martia'lis, Al'cohol æthe'reus ferra'tus, Naph'tha Vitrioli Martia'lis, Solutio Muriatis ferrici ætherea, Spir'itus sulphurico-æthe'reus martialis, Tinctu'ra nervi'na Halen'sis* seu *Ton'ico-nervi'na Halen'sis* seu *au'rea* seu *nervina Bestucheffii* seu *nervino-ton'ica* (Lamotte's) seu *æthe'rea ferri, Æther Martia'lis, De La Motte's Golden Drops, Bestucheff's Nervous Tincture,* (F.) *Elixir d'Or de M. le Général De La Motte.* An ethereal solution of muriate of iron. It is much used in gout, hypochondriasis, &c.

Tinctura Sulphuris Volatilis, Liquor fumans Boylii — t. Thebaica, Tinctura opii, Vinum opii.

Tinctura Toluif'eræ Bal'sami, *T. Bal'sami Toluta'ni, T. Toluta'ni* (Ph. U. S., 1842.), *T. Toluta'na* (Ph. U. S., 1851), *Tincture of Balsam of Tolu,* (*Bals. Tolutan.* ℥iij, *alcohol* Oij.) Reputed to be expectorant and corroborant. Dose, f℥ss to f℥j, or more.

Tinctura Tonica Nervina Halensis, Tinctura (seu Alcohol) sulphurico-ætherea ferri.

Tinctura Valeria'næ, *Tincture of Valerian.* (*Valerian.* cont. ℥iv, *alcohol. dilut.* Oij. Macerate for 14 days, express, and strain. It may also be prepared by displacement. *Ph. U. S.*) Stimulant and antispasmodic. Dose, f℥ss to f℥ij.

Tinctura Valerianæ Ammonia'ta, *T. Valerianæ Volat'ilis, Ammo'niated or Volatile Tincture of Valerian.* (*Valerianæ* cont. ℥iv, *sp. ammon. arom.* Oij. Macerate for 14 days, express, and filter. It may also be made by displacement. *Ph. U. S.*) Like the former. Dose, f℥ss to f℥ij.

Tinctura Vera'tri, *T. Veratri albi, Tincture of White Hellebore.* (*Rad. veratri alb.* cont. ℥viij, *alcohol. dilut.* Oijss. *Ph. E.*) Emetic and cathartic; but not very manageable. Dose, gtt. v to x.

Tinctura Zingib'eris, *T. Amo'mi Zingiberis, Tincture of Ginger.* (*Zingib.* cont. ℥viij, *alcohol.* Oij. Macerate for 14 days, express, and filter. It may also be made by displacement. *Ph. U. S.*) Stimulant and carminative. Dose, f℥ss to f℥j.

TINCTURE, Tinctura—t. of Aconite, Tinctura aconiti — t. of Aconite root, Tinctura aconiti radicis — t. of Aloes, Tinctura aloes — t. of Aloes, compound, Tinctura aloes composita—t. of Aloes, ethereal, Tinctura aloes ætherea—t. of Ammonia, compound, Spiritus ammoniæ succinatus — t. of Angustura, Tinctura angusturæ—t. of Assafetida, Tinctura assafetidæ—t. of Balsam of Tolu, Tinctura toluiferæ balsami—t. of Bark, Tinctura cinchonæ — t. of Bark, ammoniated, Tinctura cinchonæ ammoniata—t. of Bark, compound, Tinctura cinchonæ composita—t. of Bark, Huxham's, Tinctura cinchonæ composita — t. of Bark, volatile, Tinctura cinchonæ ammoniata — t. of Belladonna, Tinctura belladonnæ—t. of Benzoin, compound, Tinctura benzoini composita — t. Bestucheff's, see Tinctura ferri muriatis—t. of Blistering fly, Tinctura cantharidis — t. of Bloodroot, Tinctura sanguinariæ — t. of Buchu, Tinctura buchu — t. of Camphor, compound, Tinctura camphoræ composita — t. of Cantharides, Tinctura cantharidis — t. of Capsicum, Tinctura capsici — t. of Cardamoms, Tinctura cardamomi — t. of Cardamoms, compound, Tinctura cardamomi composita — t. Cardiac, Rymer's, Tinctura rhei et aloes—t. of Cascarilla, Tinctura cascarillæ — t. of Castor, Tinctura castorei—t. of Castor, compound, Tinctura castorei composita — t. of Catechu, Tinctura catechu — t. of Cayenne pepper, Tinctura capsici — t. of Chiretta, Tinctura chirettæ — t. of Cinchona, Tinctura cinchonæ—t. of Cinchona, compound, Tinctura cinchonæ composita — t. of Cinnamon, Tinctura cinnamomi — t. of Cinnamon, compound, Tinctura cinnamomi composita—t. of Cochineal, Tinctura cocci cacti—t. of Colchicum, compound, Spiritus colchici ammoniatus — t. of Colchicum seeds, Tinctura colchici—t. of Columbo, Tinctura calumbæ — t. of Croton, Tinctura crotonis — t. of Cubebs, Tinctura cubebæ — t. of Digitalis, Tinctura digitalis — t. of Ergot, Tinctura ergotæ — t. of Ergot, ethereal, Tinctura ergotæ ætherea—t. of Galbanum, Tinctura galbani — t. of Galls, Tinctura gallarum — t. of Gentian, compound, Tinctura gentianæ composita — t. of Ginger, Tinctura zingiberis—t. for the Gout, Dr. Wilson's, see Colchicum autumnale—t. of Guaiacum, Tinctura guaiaci — t. of Guaiacum, ammoniated, Tinctura guaiaci ammoniata—t. of Guaiacum, volatile, Tinctura guaiaci ammoniata — t. Hatfield's, see Tinctura guaiaci ammoniata — t. of Hellebore, black, Tinctura hellebori — t. of Hellebore, white, Tinctura veratri — t. of Hemlock, Tinctura conii — t. of Henbane, Tinctura hyoscyami — t. of Hops, Tinctura humuli — t. of Indian hemp, Tinctura cannabis Indicæ — t. of Iodine, Tinctura iodini—t. of Iodine, compound, Tinctura iodini composita—t. of Iron, acetate of. Tinctura ferri acetatis — t. of Iron, ammoniated, Tinctura ferri ammoniata—t. of Iron, ammoniochloride of, Tinctura ferri ammonio-chloridi — t. of Iron, muriated, Tinctura ferri muriatis—t. of Jalap, Tinctura jalapii—t. of Kino, Tinctura kino — t. Klaproth's, see Tinctura ferri muriatis — t. of Lactucarium, Tinctura lactucarii—t. of Lemon peel, Tinctura limonis — t. of Lobelia, Tinctura lobeliæ—t. of Lobelia, ethereal, Tinctura lobeliæ ætherea—t. of Ludwig, see Ferrum tartarizatum —t. of Lupuline, Tinctura lupulinæ—t. of Matico, Tinctura matico—t. of Musk, Tinctura moschi—t. of Myrrh, Tinctura myrrhæ—t. t. of Rhubarb, Tinctura rhei—t. of Rhubarb and aloes, Tinctura rhei et aloes—t. of Rhubarb, compound, Tinctura rhei composita — t. of Rhubarb and gentian, Tinctura rhei et gentianæ — t. of Rhubarb and senna, Tinctura rhei et sennæ — t. of Saffron, Tinctura croci sativi — t. of Saffron, compound, Tinctura de croco composita — t. of Senna, Tinctura sennæ — t. of Senna and jalap, Tinctura sennæ et jalapæ—t. of Snake root, Tinctura serpentariæ—t. of Soap, camphorated, Linimentum saponis — t. of Spanish fly, Tinctura cantharidis—t. of Spearmint, Tinctura olei menthæ viridis — t. of Squill, Tinctura scillæ — t. of Steel, Tinctura ferri muriatis—t. Stomach, Tinctura cardamomi composita — t. of Stramonium, Tinctura stramonii — t. of Strychnia, Tinctura strychniæ — t. for the Teeth, Greenough's, see Spiritus armoraciæ compositus — t. Toothache, Tinctura antiodontalgica—t. of Valerian, Tinctura valerianæ—t. of Valerian, ammoniated, Tinctura valerianæ ammoniata — t. of Valerian, volatile, Tinctura valerianæ ammoniata—t. of Wormwood, compound, Tinctura absinthii composita.

TINDER, Boletus igniarius.

TINEA, Porrigo—t. Faciei, Porrigo larvalis—t. Favosa, Porrigo favosa — t. Ficosa, Porrigo scutulata — t. Furfuracea, Porrigo furfurans — t. Granulata, Porrigo scutulata, Porrigo lupinosa—t. Lactea, Porrigo larvalis — t. Lupina, Porrigo lupinosa—t. Mucosa, Porrigo lupinosa—t. Porriginosa, Porrigo furfurans — t. Tarsi, Ophthalmia tarsi — t. Tondens, Porrigo decalvans.

TINGLING, from *tinnire*, 'to jingle.' (Sc.) *Dirling.* A sharp, purring or thrilling sensation, not always painful.

TINKER'S WEED, Triosteum.

TINKLING, METALLIC, *Tintement métallique.*

TINNIMENTUM METALLICUM, *Tintement métallique.*

TINNI'TUS AU'RIUM, (*tinnio, tinnitum,* 'to tinkle,') 'ringing of the ears.' *Fluctua'tio* seu *Son'itus* seu *Susur'rus* seu *Sib'ilus* seu *Strep'itus* seu *Sibilismus au'rium, Paracu'sis imagina'ria, Ote'chue, Syrig'mus, Syring'mos, Sibilus clango'sus, Echos, Eneche'ma, Bombus, Bombitatio, Murmur,* (F.) *Tintement, T. d'Oreille, Tintouin, Bourdonnement, Bruissement.* An imaginary sound, like the ringing of a bell, the noise of wind, the murmur of water, &c., heard in health and in sickness. It is, often, an accompaniment of cerebral disorder.

TINTEMENT, Tinnitus aurium—*t. Bullaire, T. métallique.*

TINTEMENT MÉTALLIQUE (F.), *Cliquetis métallique, Tintement bullaire, Tinnimen'tum metal'licum, Canor stethoscop'icus, Metallic Respiration, Metallic Voice, Metallic Tinkling.* A particular noise, heard by the stethoscope when applied to the chest, and which, according to Laënnec, resembles that caused by striking glass, metal, or porcelain, with a pin; but is, perhaps, more like the sound of the keys of a musical snuff-box. The *tintement métallique* or *metallic tinkling* is heard on causing the patient to speak or breathe; but is more distinct when he coughs. When the phenomenon is not so strongly marked, it produces only the *metallic resonance.* The 'metallic tinkling' is a pathognomonic symptom of a communication between the bronchia and cavity of the chest; in other words, of *Pneumothorax.*

TINTEMENT D'OREILLE, Tinnitus aurium.

TINTINNABULUM, Uvula.

TINTOUIN, Tinnitus aurium.

TIPFOOT, see Kyllosis.

TIPSARIA, Decoctum hordei.

TIRE-BALLE, Forceps (bullet.)

TIRE-FOND (F.). A surgical instrument, formerly used to elevate the piece of bone sawed off by the trephine.

TIRE-PUS, Pyulcon.

TIRE-TÊTE (F.). A name given to different instruments used for extracting the head of the child when left in the uterus, and in certain cases of difficult labour. The crotchet is one of those, as well as the *Tire-tête à bascule* of Levret, &c.

TIRES, Milk sickness.

TISANE, *Pti'sana* or *Ptis'ana, Ptisane,* from πτισανη, 'pearl barley,' itself from πτισσω, 'I decorticate.' (F.) *Hydrolé.* A name given to aqueous medicines, containing but little, if any, medicinal agent. The ancients gave the name particularly to the decoction of barley.

TISANE COMMUNE, Decoctum hordei.

TISANE DE FELTZ. A celebrated antisyphilitic, formed of *sarsaparilla, teinglass, sulphuret of antimony* and *water,* boiled together. According to some, bichloride of mercury; and, to others, arsenic enters into its composition. M. Rayer, supposing that it acts by the arsenic it contains, proposes to replace it by arseniate of potassa; and Guibourt, who is of the same opinion, by arsenious acid, in order to ensure certainty of action.

TISIC, Phthisis.

TISICAL, Phthisicus.

TISSICK, see Phthisic.

TISSU, Tissue—*t. Accidental,* see Accidental, and Tissue, accidental—*t. Caverneux,* Cavernous texture—*t. Celluleux des os,* Cancelli—*t. Conjonctif,* Cellular tissue—*t. Inodulaire,* Tissue, inodular—*t. Jaune,* see Fibrous—*t. Lardacé,* see Lardaceous—*t. Spongoïde,* Spongoid tissue.

TISSUE, *Textus, Tela,* (F.) *Tissu.* By this term, in anatomy, is meant the various parts, which, by their union, form the organs; and are, as it were, their anatomical elements. Histological anatomy is the anatomy of the tissues, which are the seat of the investigations of the pathological anatomist. The best division, indeed, of diseases would be according to the tissues mainly implicated. For the elementary tissues, see Fibre. The compound tissues, which, by associating or combining variously, form every organ of the body, have been variously classed: but every division is imperfect and liable to objection. The following, by Messrs. Todd and Bowman, is one of the most recent.

TABULAR VIEW OF THE TISSUES OF THE HUMAN BODY.

	Examples.
1. Simple membrane, homogeneous, or nearly so, employed alone, or in the formation of compound membranes.	Posterior layer of the cornea.—Capsule of the lens.—Sarcolemma of muscle. &c.
2. Filamentous Tissues, the elements of which are real or apparent filaments.	White and yellow fibrous tissues.—Areolar tissue.
3. Compound membranes, composed of simple membrane and a layer of cells of various forms, (epithelium or epidermis.) or of areolar tissue and epithelium.	Mucous membrane —Skin.— True or secreting glands. —Serous and synovial membranes.
4. Tissues which retain the primitive areolar structure as their permanent character.	Adipose tissue.—Cartilage.—Gray nervous matter.
5. Sclerous or hard tissue.	Bone.—Teeth.
6. Compound tissues.	
a. Composed of tubes of homogeneous membrane, containing a peculiar substance.	Muscle.—Nerve
b. Composed of white fibrous tissues and cartilage.	Fibro-cartilage.

TISSUE, ACCIDENTAL or ADVENTITIOUS, consists of every substance — foreign to the primitive organization of the economy, but yet organized and living — which may be developed in the anterior or at the surface of organs. Laënnec divides the accidental tissues into two sections: 1. Those

that resemble others in the animal economy, or *analogous accidental tissues;* and, 2. Those that have nothing analogous in the body, and which are always the result of a morbid process — the *heterologous* or *heteroclite accidental tissues*. To the first class belong, ossifications; accidental fibrous, fibro-cartilaginous, cartilaginous, areolar, and corneous tissues; hairs; the serous membranes of certain encysted tumours; the mucous membranes of fistulous canals, and accidental synovial membranes. To the second belong tubercles, scirrhi, melanosis, &c.

TISSUE, AREOLAR, Cellular tissue.

TISSUE, CARTILAG''INOUS, *Hymenochondro'des* seu *Hymenochondroï'des* (*Textura* seu *Tela.*)

TISSUE, CONNECTIVE, Cellular tissue — t. Cribriform, Cellular tissue—t. Fibrous, see Fibrous—t. Filamentous, Cellular tissue.

TISSUE FORMATION, Histogeny.

TISSUE, INOD'ULAR, *Tela inodula'ris*, (F.) *Inodule, Tissu inodulaire.* A name given by Delpech to an accidental fibrous tissue developed in suppurating wounds, which is the principal agent in cicatrization. It has, at first, the appearance of a reddish cellulo-fibrous layer; but soon loses its vascularity; and its fibres, which pass in all directions, become of a dull white colour, and of a consistence and hardness, that may be compared to those of the strongest articular ligaments. It is well seen in the cicatrix left after burns.

TISSUE, LAMINATED, Cellular tissue — t. Ligamentous, Desmoid tissue — t. Mucous, Cellular tissue—t. Porous, Cellular tissue—t. Reticulated, Cellular tissue.

TIT, Nipple.

TITHENE, Nurse.

TITHYMALUS CYPARISSIAS, Euphorbia cyparissias — t. Lathyris, Euphorbia lathyris — t. Latifolius, Euphorbia lathyris — t. Palustris, Euphorbia palustris — t. Paralias, Euphorbia paralias.

TITILLAMENTUM, Gargarism.

TITILLATION, Tickling.

TITTHE, Nipple.

TITTHION, Nipple.

TITTHIS, Nipple.

TITTHOS, Mamma, Nipple.

TITTY, Mamma, Nipple.

TITUBANTIA, *Bredouillement.*

TITUBATIO, Fidgets, Vacillatio—t. Linguæ, Balbuties.

TJETTEK, Upas tieuté.

TO-AND-FRO-SOUND, *Bruit de frottement.*

TOAD-FLAX, Antirhinum linaria — t. f. Bastard, Comandra umbellata.

TOAST-WATER, *Aqua tostæ panis.* Toast well half a slice of a stale quartern loaf; put it into a pitcher, and pour over it a quart of water. After two hours, decant the water from the bread. It is a common drink in febrile affections.

TOBACCO, Nicotiana tabacum — t. English, Nicotiana rustica — t. Indian, Lobelia inflata — t. Poison, Hyoscyamus niger — t. Wild, Lobelia inflata, Nicotiana rustica.

TOCETOS, Parturition.

TOCODOMYCODORITIS MALIGNA VAGINALIS, Colpocace puerperarum.

TOCOLOGY, Obstetrics.

TOCOS, Parturition.

TODDY. A name given, by the English, to sweet, delicious and refreshing liquors procured in India by wounding the *spathæ* of certain palms. The best is obtained from the Cocos nucifera.—Ainslie.

It is obtained in large quantities from *Saguë'rus sac'charifer* seu *Rumphii, Palma In'dica vina'ria secun'da, Saguë'rus* seu *Gomu'tus Gomu'to, Areu'ga saccharif'era, Gomuto palm.* It is called, also, *Neva*, and, by boiling, yields a coarse kind of sugar, called *Jaggery.* The inhabitants of the Moluccas used, in their wars, a liquor obtained by macerating the fruit, which the Dutch called *Hell water, Aqua infernal'is.*

Toddy is also the common name for a mixture of spirit and water sweetened.

TODDY TREE, Mamei.

TOE, Digitus pedis.

TOEPLITZ, see Töplitz.

TOFUS, Tophus.

TOILE D'ARAIGNÉE, Aranеæ tela—*t. Choroïdienne*, see Choroid — *t. de Gautier*, Sparadrapum Galteri.

TOKAS, Puerpera.

TOKEN, PLAGUE, Plague token.

TOKOLOGY, Obstetrics.

TOLA, Tonsil.

TOL'ERANCE, *Tolera'tia*; from *tolerare*, 'to bear.' The power of bearing. A word used by the Italian school of Rasori, to signify the power of bearing large doses of certain potent remedies, as tartrate of antimony and potassa. See Contro-stimulus.

TOLES, Tonsil.

TOLIUM, Tonsil.

TOLLES, Tonsil.

TOLLUM, Tonsil.

TOLUIF'ERA BAL'SAMUM, *Myrox'ylon* seu *Myrospermum Toluif'erum. Ord.* Leguminosæ. *Sex. Syst.* Decandria Monogynia. The name of the tree which affords the *Balsam of Tolu, Bal samum Toluta'num* (Ph. U. S.), *Toluta'num, Toluif'eræ Balsami Balsamum, Goac'onax, Red Balsam of Peru*, (F.) *Baume de Tolu, B. de Carthagène* ou *d'Amérique* ou *de Saint Thomas.* It has a very fragrant odour, and warm, sweetish taste; is thick, and of a reddish-yellow colour. It is stimulant and expectorant [?], and is used in coughs. It is chiefly, however, employed on account of its flavour.

TOLUTANUM, see Toluifera balsamum.

TOMACINUM, Isicium.

TOMACULUM, Isicium.

TOMATA, Solanum lycopersicum.

TOMATO, Solanum lycopersicum.

TOMÊ, *Tom'us, τομη, τομος*, 'incision.' A common suffix, as in Lith*otomy*, Bronch*otomy*, &c.

TOME, Cut, Incision.

TOMEION, Knife.

TOMEN'TUM CER'EBRI, from *tomentum*, 'a flock of wool.' The infinite number of small vessels which pass between the pia mater and convolutions of the brain. They enter the substance of the brain at right angles.

TOMEUS, Knife.

TOMIS, Scissors.

TOMOTOCIA, Cæsarean section.

TOM-TOE, Pollex, see Digitus pedis.

TONE, *Tonus, τονος*, from *τονοω*, 'I brace or give vigour.' The state of tension or firmness proper to each organic tissue. It is the effect of tonicity.

TONE, see Elasticity.

TONGA, see Datura sanguinea.

TONGRES, MINERAL WATERS OF. The town of Tongres is about a league from Maestricht in the Low Countries. The springs, of which there are several, are chalybeate, containing carbonates of iron and magnesia.

TONGUE, Sax. tunz, (D.) Tong, *Lingua, Glossa, Glotta*, (F.) *Langue.* The tongue is a muscular, symmetrical, and very mobile organ; situate in the mouth, from the os hyoides and epiglottis to the incisor teeth. Its particular use is, to procure the sensation of savours; and it aids in the acts of sucking, mastication, deglutition, pronunciation, and exspuition. It has the

shape of a pyramid, flattened above and below; rounded at its angles, and terminated, anteriorly, by a blunt point. Its *upper surface*, called the *dorsum*, is free, flat, and divided into two portions by a median furrow, *lin'ea media'na;* at the posterior extremity of which is the *foramen cæcum* or *Foramen of Morgagni*. The *inferior surface* is free, and covered by the mucous membrane on its anterior third and sides: but behind and in the middle it is attached to the lower jaw by means of the genio-glossus; and to the hyoides by the hyoglossus. Its *margins* are rounded; thick behind, thinner anteriorly. Its *tip*, or *point*, or *dental extremity* is rounded and free: — the *root, base,* or *hyoid extremity, Radix linguæ*, is continuous with the epiglottis and velum palati. It is very thick at the foramen cæcum; but thinner as it approaches the hyoid bone. The tongue is composed of muscles, and covered by a mucous membrane — *Periglot'tis, Involu'crum linguæ, Membra'na* seu *Tu'nica vagina'lis* seu *Cutis* seu *Epider'mis* seu *Tu'nica* seu *Involu'crum muco'sum* seu *Crusta villo'sa linguæ*—which forms also the frænum beneath the tongue. On this membrane are seen the different *papillæ*. The nerves of the organ proceed from the *inferior maxillary, glosso-pharyngeal* and *hypoglossal*. The first and second are connected with taste; the last with the motions of the organ. Some recent observers, however, consider the glosso-pharyngeal to be the special nerve of gustation. The arteries are the *lingual*, from the external carotid; and the *palatine* and *tonsillar*, from the labial. The veins are the *superficialis linguæ, ranina, lingualis*, and *submentalis*. They open into those of the pharynx and larynx. Its lymphatic vessels pass into ganglia, situate at the edge of the hyoglossi muscles.

TONGUE, BLACK. A fever which prevailed in the Western States in the winter of 1842–3; probably typhoid fever. According to some, an epidemic erysipelas.

TONGUE, HERNIA OF THE, Glossocele — t. Inflammation of the, Glossitis — t. Red, fever, see Typhus.

TONGUE SCRAPER, *Cure-langue* — t. Tie, see Ankyloglossum.

TON'IC, *Ton'icus*, (F.) *Tonique*. Same etymon as Tone. Relating to tone.

Tonic, Ton'icus, Tono'ticus, Antasthen'icus, (F.) *Tonique, Fortifiant*, in Therapeutics, means a medicine, which has the power of exciting slowly, and by insensible degrees, the organic actions of the different systems of the animal economy, and of augmenting their strength in a durable manner. Bitter, vegetable substances which are not associated with an acrid or narcotic principle; preparations of iron; cold water, &c., act as tonics. They are also called *Comfortan'tia, Confortati'va, Corroboran'tia, Confirman'tia, Robora'ntia*, &c.

The following are the chief Tonics:—Acidum Arseniosum, Acidum Nitricum, Acidum Sulphuricum, Argenti Nitras, Bismuthi Subnitras, Carbo Ligni, Cascarilla, Cinchona, Cinchonia, Colomba, Cornus Florida, Cupri Acetas, Cupri Sulphas, Cuprum ammoniatum, Cuspuria, Eupatorium perfoliatum, Ferri Præparata, Gentiana, Liriodendron, Lupulina, Piperina, Prunus Virginiana, Quassia, Quinia, Salix, Salicina, Serpentaria, Zinci præparata; Aquæ minerales aciduläe et ferruginiæ, Mental Tonics, (Confidence, Hope, Amusement.)

TONIC POWER, Irritability.

TONIC SPASM, *Spasmus ton'icus, Convul'sio tonica, Conductio, Spas'ticus, Tonos, Ento'nia, En'tasis, Enta'sia*. A rigid contraction of muscles without relaxation, as in trismus, tetanus, &c. See Tetanus and Spasm.

TONIC"ITY, *Tonic"itas*. Same etymon as Tone. The faculty that determines the general tone of the solids. Excessive tonicity causes *er'ethism* or *eriepness;* deficient tonicity, *atony* or *weakness*. *Tonicity* has been used in the same sense as irritability.

TONIQUE, Tonic.

TONKA BEAN, Dipterix odorata.

TONODES, Tensive.

TONOS, Tonic spasm — t. Trismus, Trismus.

TONOTICUS, Tonic.

TONSIL, *Tonsil'la, Amyg'dala, Paristh'mia, Paristh'mium, Amphibran'chium, Glan'dula colli, Tola, Tolles, Toles, To'lium, Tollum, Spongos, An'tias*, Pl. *Anti'ades, Almond of the ear, Almond of the throat*, (F.) *Amygdale, Tonsille*, (Prov.) *Ear-kecker*. An ovoid collection of follicles, about half an inch in length, similar in shape to an almond, and situate, on each side, between the pillars of the velum palati. The inner surface, projecting into the isthmus of the throat, is covered by the mucous membrane, in which are the orifices of a dozen cells, whence a transparent, viscid mucus oozes on pressure. This mucus is destined to facilitate deglutition, by lubricating the passage of the alimentary bolus.

TONSIL-GUILLOTINE, Amygdalatome.

TONSILLÆ PESTILENTES, Cynanche maligna.

TONSILLARUM GANGRÆNA, Cynanche maligna.

TONSILLE, Tonsil.

TONSILLIT'IC, *Tonsillit'icus*. Belonging or relating to the tonsils; as the '*tonsillitic* branches of the glosso-pharyngeal nerve.'

TONSILLITIS, Cynanche tonsillaris.

TONSILLOTOMIE, Amygdalatome.

TONSORIUS CULTER, Razor.

TOODLE, Tooth.

TOOTH, Sax. ꝺoꝺ, *Dens, Odous*, (Prov.) *Toodle*, (F.) *Dent*. The teeth, *Dentes, Mord'ices*, are small, hard bones, fixed in the alveoli of each jaw, and serving to lay hold of, and to cut, tear, and triturate alimentary substances. True teeth are found only in man, the mammalia, reptiles, and fish. The teeth have, in general, the shape of an irregular cone, the base of which is towards the interior of the mouth; and the apex, single or divided, towards the bottom of the alveoli. Each tooth has a part situate out of the alveolus, and covered by a vitriform substance. This part is called the *crown* or *coro'na*. It is bounded by a narrower portion, called the *cervix*, (F.) *collet*, which separates it from the portion in the alveolus—the *fang* or *root*, (F.) *racine*. In the adult, the teeth are 32 in number; 16 to each jaw: these consist of 4 *incisors*, 2 *canine*, 4 *bicuspidati*, and 6 *molares*. (See these various terms.) The teeth enclose a vascular and nervous pulp, in a central cavity, *Cav'itas Pulpæ, Cavum Dentis, Antrum denta'lë*. They are formed of a very hard, compact tissue; and the corona is covered by a vitreous substance called *Enam'el*. The incisor and canine teeth are developed by a single point of ossification; the lesser molares, by two; and the larger, by four or five. See Dentition. Researches by Retzius, Müller and others, have led them to believe that the *ivory* of the tooth or *Dentine, Ebur, Substan'tia os'sea* of Malpighi, *proper tooth substance, bone of the tooth, osseous substance of tooth, tooth bone*, consists of tubular fibres, which contain organic deposits of calcareous salts; and of intertubular substance, in which are observed corpuscles or osseous cells of the tooth, called, by Professor Owen, *calcig"erous cells*, which also contain earthy salts. At the part where the enamel terminates at the cervix of the tooth, the *crusta petro'sa, cement'um* or *cortical substance*, commences in an extremely

thin stratum, passes down and gradually increases in thickness towards the extremity of the root, where it is generally the thickest. It is said by Nasmyth to have been traced on the enamel, and Purkinje and Fränkel thought that it lined the cavitas pulpæ. They gave it the name *Substantia ostoïdea*. It is the *mate'ria tarta'rea* of Malpighi. It has been found, however, that the hard substance deposited on the inner surface of the dentine, at the age of twenty years or later, and which encroaches on the cavity, has a distinct structure from the cement, and resembles in part dentine, and in part bone. It is the *horny substance* of Blumenbach, the *osteodentine* of Owen, and the *secondary dentine* of Tomes. In the compound teeth of the herbivorous animal, a deposition is found on the surface of the enamel, which has been called *cementum*. Müller, however, regards it to be a deposit from the salts and the saliva, and to be essentially the same as what is called tartar in the human subject.

TOOTH-ACH, Odontalgia—t. Bone, see Tooth — t. Bush, Xanthoxylum fraxineum — t. Tree, Aralia spinosa, Xanthoxylum clava Herculis.

TOOTH EDGE, *Agacement des dents*, Hæmodia — t. Paste, Dentifricium — t. Powder, Dentifrice — t. Rash, Strophulus — t. Shell, dog-like, Dentalium.

TOPHA'CEOUS, *Topha'ceus*, (F.) *Tophacé*; from *tophus*. Relating or belonging to tophus,—as 'a *tophaceous* concretion.'

TOPHACEOUS CONCRETION, Tophus.

TOPHUS, τοφος, *Tofus*, 'a porous or friable stone.' *Osteot'ophus*, *Topha'ceous Concretion*. A collection of hard, calcareous matter, which forms, particularly, at the surface of joints affected with gout; (see Calculi, arthritic,) and occasionally, in the interior of organs, around the teeth, &c. It likewise meant gravel, and chalaza.

TOP'IC, *Top'ical*, *Top'icus*. From τοπος, *locus*, 'a place.' A local application; (F.) *Topique*. See Local.

TOPICUS, Local.

TOPINARIA, Talpa.

TOPIQUE, Topic.

TÖPLITZ or TEPLITZ, MINERAL WATERS OF. Töplitz is a town of Bohemia, celebrated for its numerous thermal springs. The water contains chloride of sodium; carbonate, and sulphate of soda; and carbonates of lime and iron, &c. Temp. 114° to 122° Fahr.

TOPOGRAPHICAL ANATOMY, see Anatomy.

TOQUE, Scutellaria galericulata.

TOR'CULAR, *Tourniquet*. A press for wine, oil, or cider. From *torqueo*, 'I twist.'

TOR'CULAR HEROPH'ILI, *Press of Heroph'ilus*, *Lecheneï'on*, *Lenos*, *Lenum*, *Fourth Sinus*, (F.) *Confluent des Sinus*, *Pressoir d'Hérophile*. A smooth and polished cavity, of irregular shape, in which several sinuses of the dura mater meet. It is situate before the internal occipital protuberance, at the union of the three great duplicatures of the dura mater. It has six openings into it; — one above, that of the superior longitudinal sinus; two below, answering to the occipital sinuses; one anterior, belonging to the straight sinus; and two lateral, and very broad, which lead into the lateral sinuses; and convey from the cavity the blood that has been poured into it by the others.

TORCULUM, Tourniquet.

TORDYL'IUM, *T. Officina'lē*, *Ses'eli Cret'icum* seu *Monta'num*, (F.) *Séseli de Crète*. *Family*, Umbelliferæ. *Sex. Syst.* Pentandria Digynia. The seeds and roots of this Southern European plant are considered carminative and diuretic. They enter into the theriaca.

TORE'NIA ASIAT'ICA, *Cæla-dolo*. A small Malabar plant, the juice of whose leaves, sweetened with sugar, is said to cure gonorrhœa.

TORMENTIL, Geranium maculatum, Tormentilla.

TORMENTIL'LA, *T. erec'ta* seu *sylves'tris* seu *officina'lis* seu *tubero'sa*, *Fraga'ria tormentil'la officina'lis*, *Potentilla tormentilla*, *Heptaphyl'lum*, *Consol'ida rubra*, *Common Tor'mentil*, *Upright Septfoil*, (F.) *Tormentille*. *Ord.* Rosaceæ. *Sex. Syst.* Icosandria Polygynia. The root *Tormentilla* (Ph. U. S.) has a slightly aromatic odour; and austere, styptic taste. It is astringent. Dose, of the powder, gr. x to ʒj.

TORMENTUM, Ileus, Intussusceptio.

TOR'MINA, *Strophos*, *Cœlial'gia*, *Encœlial'gia*, *Anile'ma*, *Anile'sis*, *Gripes*, *Mulligrubs*, *Fretting*, (F.) *Tranchées*. From *torqueo*, 'I twist.' Acute colicky pains. Dysentery.

TORMINA CELSI, Dysentery — t. Parturientium, Pains, labour—t. Post partum, see Pains, labour.

TORNACULUM, Tourniquet.

TOROS'ITAS, *Corpulen'tia carno'sa*, *Hab'itus athlet'icus*. Muscular strength; from *torosus*, 'brawny,'—*torus*, 'brawn.'

TOROSUS, Muscular.

TORPEDO, Narcosis.

TORPEFACTIO UNIVERSALIS, Holonarcosis.

TORPID, *Tor'pidus*, (F.) *Engourdi*; from *torpeo*, 'I am benumbed.' Numb. Incapable of exertion and of feeling. Dull, stupid, inactive.

TORPIDITAS, Torpor.

TORPIDUS, Narcotized, Torpid.

TORPOR, *Torpid'itas*, *Noth'rotes*, *Parap'sis expers*, (F.) *Engourdissement*, from *torpeo*, 'I am benumbed.' State of a part which becomes numb, and almost incapable of motion. *Torpor*, *Torpid'ity*, *Torpid'ness*, *Tor'pitude* are also applied to a debilitated, sluggish condition of a part, or of the whole of the body; *Aër'gia*, (F.) *Accablement*.

TORPOR, Narcosis — t. of the Colon, see Colon, torpor of the—t. Intestinorum, Constipation — t. Soporificus, Nocar.

TORQUAY. A town in Devonshire, England, which, on account of the mildness of its climate, and its sheltered situation from the bleaker winds, is a frequent retreat for the phthisical invalid.

TOR'SION, *Tor'sio*. From *torquere*, *tortum*, 'to twist.' The act of twisting. Torsion of the extremities of bleeding vessels — *Angios'trophē* — until the blood ceases to flow, is sometimes used to arrest hemorrhage.

TORSK, see Oleum jecoris aselli.

TORTELLE, Erysimum.

TORTICOL'LIS, *Caput* seu *Collum obsti'pum*, *Obsti'pa cervix*, *Obstip'itas cap'itis* seu *Colli*, *Trachel'agra*, *Enta'sia Loxia*, *Lox'ios*, *Cephalox'ia*, *Ancylode'rē*, *Ancylode'ris*, *Rhœbocra'nia*, *Anchenorrheu'ma*, *Rheumatis'mus colli* seu *cervi'cis*, *Stiffneck*, *Wryneck*, (Prov.) *Stab*; from *torquere*, *tortum*, 'to twist.' and *collum*, 'the neck.' A variety of rheumatism, seated in the muscles of the neck, which prevents the motion of the head, and causes the patient to hold it inclined to the side affected. It is, commonly, of short duration; usually disappearing in a few days. Rubefacients are the best topical applications. The term is also applied to permanent contraction of the muscles of the neck, which causes the head to be held to one side. The remedy is the division of the contracted muscles.

TORTOISE, FRESHWATER, GREAT, Hydraspis expansa.

TORTUE, Testudo.

TORTURA ORIS, Canine laugh, Neuralgia facici—t. Oris paralytica Linnæi, Paralysis, Bell's.

TOR'ULA CEREVIS'IÆ, *Saccharom'yces* seu

Mycoder'ma cerevisiæ, Cryptococ'cus ferment'um seu *cerevisiæ*, (F.) *Champignon du ferment, Yeast plant.* One of the simplest forms of vegetation, capable, under favourable circumstances, of vegetating rapidly, and assisting in producing the fermentation of saccharine substances. The plant has been found in vomited fluids, and in fæces.

TORULUS GLANDIS, Crown of the glans.

TORUS, Muscle — t. Manûs, Metacarpus.

TOTA BONA, Chenopodium bonus Henricus.

TOTSU KASO, Sphæria Sinensis.

TOTTY, Vertiginous.

TOTUM CARNOSUM, Pancreas.

TOUCH, *Tactus, Tac'tio, Haphè, Hapsis, Tac'tion, Palpa'tion,* (F.) *Toucher.* One of the five senses, and that which makes known to us the palpable qualities of bodies, such as their consistence, quality, &c. It is seated, particularly, in the hands; and differs from tact in being active. See Esaphe, and Palpation.

'*To touch* the mouth with mercury' is to produce the constitutional effects of that agent, as evinced by the falling away of the gums, &c.

TOUCH-ME-NOT, Impatiens fulva.

TOUCH, ROYAL. It was at one time almost universally believed, in England, that the royal touch would remove *Scrofula* or *King's Evil* (as it was thence called). This superstition is now entirely exploded. Edward, the Confessor, was the first English king who *touched* for the Evil.

TOUCHER, Esaphe, Touch — *t. Vaginal*, Esaphe.

TOUCHWOOD, Boletus igniarius.

TOUR DE MAÎTRE, Coup de Maître.

TOURBILLON VASCULAIRE, Vasa vasorum.

TOURNESOL, Heliotropium Europæum.

TOURNIOLE, Paronychia.

TOUR'NIQUET, *Tor'cular, Tor'culum, Tornac'ulum, Præ'lium, Præ'lium, Præ'lium* seu *Prelum arteria'lë, Verticil'lum, Fas'cia tor'tilis,* from (F.) *tourner,* 'to turn.' A surgical instrument for stopping the course of blood in the limbs, by exerting a strong compression upon the principal artery. It was invented by a French surgeon, Morel, in the middle of the 17th century; and was modified subsequently, by Nuck, Verduc, Monro, Petit, and Louis. It is used to suspend, for a time, the circulation in a limb, during great operations; to arrest arterial hemorrhage in cases of wounds; to compress certain aneurismal and other tumours, &c.

TOUS-LES-MOIS, Am'ylum canna'ceum, Canna Starch. A fecula obtained from the root of *Canna edu'lis.* It resembles potato starch, and may be substituted for arrow-root. It is obtained from St. Kitts.

TOUT, Nates.

TOUTE BONNE, Salvia sclarea.

TOUTE ÉPICE, see Myrtus pimenta — *t. Saine,* Sanicula.

TOUX, Tussis—*t. Bleue,* Pertussis — *t. Bronchique,* Bronchial cough, Cough, tubal—*t. Caverneuse,* see Cavernous respiration — *t. Convulsive,* Pertussis — *t. Quinteuse,* Pertussis — *t. Tubaire,* Bronchial cough, Cough, tubal.

TOXICÆMIA, Toxicohæmia.

TOXICAL, Poisonous.

TOXICATIO, Poisoning.

TOXICODENDRON, Rhus toxicodendron.

TOXICOHÆ'MIA, *Toxicæ'mia,* from *toxicum,* 'a poison,' and '*αιμα,* 'blood.' Poisoning of the blood.—Piorry.

TOXICOL'OGY, *Toxicolog''ia,* from *toxicum,* (itself from τοξον, 'a bow,') 'a poison,' and λογος, 'a description.' A treatise on poisons.

TOXICO'SES, (G.) Toxikosen, from *toxicum,* 'a poison.' A family of diseases, according to the classification of Fuchs, caused by the reception of poisons into the system.

TOXICUM, Poison, Venom.

TOXIQUE, Poisonous.

TRABECULA CEREBRI, Corpus callosum—t. Cordis, Columnæ carneæ.

TRABECULÆ CORPORUM CAVERNOSORUM, see Cavernous bodies.

TRABECULÆ SPLENIS, see Spleen—t. Willisii, Chordæ Willisii.

TRABES CORDIS, Columnæ carneæ.

TRABS, Penis—t. Cerebri, Corpus callosum—t. Medullaris, Corpus callosum.

TRACE, PRIMITIVE, Groove, primitive.

TRACHE'A, (generally, however, accented *Tra'chea,*) *Trachei'a* seu *Trachei'a arte'ria, Bronchus, As'pera arteria, Fis'tula spiritua'lis* seu *pulmona'lis, Canna, Syrin'ga, Syrinx;* the *Windpipe, Wosen, Weasaud, Weesel, Throttle,* (Sc.) *Thropill,* (Prov.) *Keckcorn, Kecker, Thropple,* (F.) *Trachée artère;* from τραχυς, 'rough,' and αρτηρια, 'artery,' composed of αηρ, 'air,' and τηρειν, 'to keep.' The trachea is a cyliudrical, fibro-cartilaginous and membranous tube, flattened behind, and situate on the median line, before the vertebral column, from the inferior part of the larynx, as far as the third dorsal vertebra. There it divides into two branches, the *bronchia,* which separate to go to each lung. The trachea, the function of which is to convey air to the lungs during respiration, is composed, 1. Of cartilaginous rings, *Anuuli cartilagin'ei, Segmen'ta cartilagin'ea, Orbes cartilagino'si,* incomplete behind; situate one above the other, and kept *in situ* by a fibrous membrane. 2. Of a mucous membrane, which lines it internally, and contains numerous mucous follicles. 3. Of transverse muscular fibres, not well-marked, which occupy its posterior surface. 4. Of vessels, which proceed from the superior and inferior thyroideal and, 5. Of nerves, that are given off by the pneumogastric and the cervical ganglia.

The breathing tubes of insects are termed *Tracheæ.*

TRACHEA ARTERIA, Trachea.

TRACHEÆ, see Trachea.

TRA'CHEAL, *Trachea'lis.* Appertaining to the trachea. An epithet applied to respiration as heard through the stethoscope opposite the trachea, larynx, and root of the bronchia; the air appearing as if sucked in from the cylinder during inspiration, and expelled during expiration.

TRACHEAL GLANDS. Mucous follicles on the posterior surface of the trachea. They are small, flattened ovoid bodies.

TRACHEA'LIS. The fibres of unstriped muscle, which pass from one portion of each of the tracheal cartilages to the other, at the posterior part of the trachea, have been so called by some anatomists. When they contract, they approximate the extremities of the cartilage; diminish the calibre of the trachea; and thus increase the velocity of the air forced through it, as in coughing, and facilitate the removal of any irritating substance in contact with the lining membrane.

TRACHÉE ARTÈRE, Trachea.

TRACHEITIS, Cynanche trachealis.

TRACHELAGRA, Torticollis. Also, gout in the neck.

TRACHELIAN, Cervical.

TRACHELISM'US, from τραχηλος, 'the neck.' A term proposed by Dr. Marshall Hall, for a fancied spasmodic action of the muscles of the neck, which he esteems to be the cause of many morbid phenomena, by inducing compression of the veins of the neck and an impeded return of blood from the head.

TRACHELITIS, Cynanche trachealis.

TRACHELIUM AMERICANUM, Lobelia cardinalis.

TRACHÉLO-ATLOÏDO-OCCIPITAL, Obliquus superior capitis—*t. Atloïdo-basilaire*, Rectus capitis lateralis — *t. Basilaire*, Rectus capitis internus major — *t. Basilaire, petit*, Rectus capitis internus minor.

TRACHE'LO-DIAPHRAGMAT'IC, *Trachelo-diaphragmat'icus*. The fourth pair of cervical nerves, whence the phrenic nerve chiefly arises. — Chaussier.

TRACHÉLO-MASTOÏDIEN, Complexus minor — *t. Occipital*, Complexus — *t. Scapulaire*, Levator scapulæ.

TRACHELOS, Collum.

TRACHE'O-BRONCHI'TIS. Inflammation of the trachea and bronchia.

TRACHEOCELE, Bronchocele.

TRACHEOPHONY, Laryngophony.

TRACHEOPHTHISIS, see Phthisis laryngea.

TRACHEOPHYMA, Bronchocele.

TRACHEORRHAG''IA, *Hæmop'toë* seu *Hæmop'tysis laryngeʻa et trachea'lis*, from τραχεια, 'the trachea,' and ῥηγνυμι, 'to break forth.' Hæmorrhage from the trachea.

TRACHEOSTENO'SIS, from τραχεια, 'the trachea,' and στενωσις, 'contraction.' Contraction or narrowness of the trachea.

TRACH'EOTOME, from *trachea*, and τομη, 'incision.' An instrument of the trocar kind, for opening the trachea.

TRACHEOTOMY, see Bronchotomy.

TRACHITIS, Cynanche trachealis.

TRACHO'MA, from τραχυς, 'rough.' *Aspre'do, Aspritu'do, Pladar'otes, Asperitu'do, Scabrit''ies, Gran'ular conjunctiva, Gran'ular eyelid*, (F.) *Aspérité des Paupières*. A roughness of the inner surface of the eyelids. A variety of ophthalmia, of which three kinds have been designated: — *T. sabulo'sum*, from sand, &c., getting between the eyelids; *T. caruncula'sum, Pladar'otes, Pladaro'sis, Morum pal'pebræ inter'næ*, from fleshy excrescences; and *T. herpet'icum*, from hard pustules on the inner surface of the eyelids. This last is, also, called *Fico'sis*, and *Pal'pebra fico'sa*.

TRACT, OPTIC, see Optic nerves — t. Respiratory, see Respiratory tract.

TRACTATIO MANUARIA, Surgery.

TRACTORATION, Perkinism, see Tractors, metallic.

TRACTORS, METAL'LIC. Metallic agents, introduced by Dr. Elisha Perkins, of Connecticut, about the end of the last century, to cure diseases. The parts were rubbed with these tractors, and hundreds of thousands of cases were reported to have been cured by the *Tractora'tion*. The affections, in which they were chiefly used, were local inflammations, and pains in different parts. The good effects were, doubtless, owing to the influence exerted by the mind over the body. The bubble did not exist long. See Perkinism.

TRACTUS INTESTINORUM, Intestinal Tube — t. Opticus, see Optic nerves — t. Respiratorius, Respiratory tract.

TRACTUS SPIRA'LIS FORAMINULEN'TUS. Minute openings at the base of the modiolus, arranged in a spiral manner, which transmits the filaments of the cochlear nerve. The central canal of the Tractus is longer than the rest, and is called *Tu'bulus centra'lis modi'oli*.

TRADESCAN'TIA VIRGIN'ICA, *Spiderwort;* indigenous; *Order*, Commelynaceæ; flowering from May to August. The roots are demulcent.

TRAGACAN'THA, from τραγος, 'a goat,' and ακανθα, 'a thorn,' owing to its hirsute boughs. *Gummi Tragacan'tha* seu *Astrag'ali Tragocanthæ, Gum Tragacanth, Gum Dragon*. The concrete juice of the *Astragalus Tragacantha* or *Astragalus Verus*, a native of Persia. *Ord.* Leguminosæ. *Sex. Syst.* Diadelphia Decandria. (F.) *Gomme Adragant, Adragant, Adragante, Adragantheˑ*. This gum is inodorous; nearly insipid; of a whitish colour; semi-transparent, and striated. It is in thin, vermiform pieces; and does not form a smooth, uniform mucilage with water. It is demulcent, but is rarely used alone.

TRAGEA AROMATICA, Pulvis cinnamomi compositus.

TRAG''ICUS, *Trogien* (Ch.), from Tragus. A small, flat, triangular muscle which almost wholly covers the outer surface of the tragus, arising from its base, and terminating at the top of the eminence.

TRAGIEN, Tragicus.

TRAGOMASCHA'LIA, *Tragomas'chalè*, from τραγος, 'a goat,' and μασχαλη, 'axilla.' The strong unpleasant odour of the armpits.

TRAGOPHONIA, Egophony.

TRAGOPO'GON, *Barba hirei;* from τραγος, 'a goat,' and πωγων, 'beard.' A genus of plants; *Ord.* Cichoraceæ. *Sex. Syst.* Syngenesia Polygamia Æqualis. (F.) *Barbe de Bouc;* of which the roots of the *Tragopogon porrifo'lium, Salsifi, Oyster plant, Oyster-root*, (F.) *Salsifis* ou *Cercifis*, and the young shoots of the *T. praten'sé, Meadow Salsifi, Common Goat's Beard*, (F.) *Salsifis des prés*, are eaten as food. The root of the latter has been used as a diuretic.

TRAGOSELINUM, Pimpinella saxifraga — t. Angelica, Ligusticum podagraria — t. Magnum, Pimpinella magna — t. Majus, Pimpinella magna — t. Saxifraga, Pimpinella magna.

TRAGUS; τραγος, 'a goat;' from its being furnished, in some persons, with hair, like the beard of a goat. *Hircus, Hirquus*. A small, flattened, triangular nipple, situate before the meatus auditorius externus, which it appears to conceal. It is covered with hair in old people, whence its name. Also, the peculiar goat-like smell of the axillæ.

TRAGUS MATTHIOLI, Salsola kali.

TRAINASSE, Polygonum aviculare.

TRAITEMENT, Curatio — *t. Palliatif*, see Palliation.

TRAMIS, Perinæum.

TRANCE, Catalepsy, Ecstasis.

TRANCHÉES, Tormina — *t. Utérines*, Pains, after.

TRANS, in composition, 'through, over, or beyond.'

TRANSFIGURATIO, Transformation.

TRANSFORMA'TION, *Transforma'tio, Transfigura'tio, Transmuta'tio, Metab'olè*, from *trans*, and *forma*, 'form.' Change of form.

TRANSFORMATIONS DE TISSU, (F.) The French pathologists designate thus the change that occurs in an organ, the tissue of which becomes similar to that of another organ. The chief transformations are cartilaginous, osseous, and adipous. See Tissue.

TRANSFU'SION, *Transfusio, Metach'ysis*, from *transfundere* (*trans*, and *fundere, fusum*, 'to pour') 'to pour from one vessel into another.'

TRANSFUSION OF BLOOD, *Transfusio San'guinis, Cura Medea'na, Methæmachym'ia, Hæmatometach'ysis, Hæmometach'ysis, Diach'ysis, Transplanta'tio med'ica nova, Chirur'gia transfuso'ria, Exotichæmato'sis*. The act of passing the blood of one animal into the veins of another; an operation which was formerly used to fulfil various therapeutical intentions. It has been revived in cases of uterine hemorrhage; and, apparently, with some success.

The operation can only be performed safely

on animals having like kinds of blood. See Globule.

TRANSLATION, Metastasis.

TRANSMISSIBILITY, see Sensibility.

TRANSMUTATIO, Transformation.

TRANSPIRATIO, Prespiration—t. Unilatera, Hemidiaphoresis.

TRANSPIRATOIRE, Perspiratory.

TRANSPLANTA'TIO, (*trans*, and *planta*,) *Metaphytei'a.* A pretended method of curing diseases, devised by Paracelsus — by making them pass from one individual to another, either animal or vegetable.

TRANSPLANTATIO, Morioplastice — t. Medica nova, Transfusion.

TRANSPLANTA'TIO DENTIS, *Insit''io dentis.* The act of transplanting a tooth from one person to another.

TRANSPORT, Delirium.

TRANSPOSITIO, Metathesis.

TRANSPOSIT''ION, *Transposit''io*, from *trans*, 'over,' and *ponere, positum*, 'to put.' *Metath'esis.* Change of situation.

TRANSPOSITION OF THE VIS'CERA, *Polype'ria promis'cua translati'va, Intus inver'sus*, is a congenital vice of conformation, which consists in the viscera being found out of the situations they ordinarily occupy: the heart, for example, being on the right side; the liver on the left, &c.

TRANSUDATIO, Diapedesis.

TRANSUDA'TION, *Transuda'tio*, (F.) *Transsudation*, from *trans*, 'through,' and *sudare, sudatum*, 'to sweat.' The passage of a fluid through the tissue of any organ, which may collect in small drops on the opposite surface, or evaporate from it.

TRANSUDATION, Exosmose.

TRANSVERSAIRE ÉPINEUX, Transversalis dorsi—*t. Épineux du cou*, Semispinalis colli — *t. Grêle*, see Sacro-lumbalis — *t. Épineux du dos*, Semi-spinatus dorsi.

TRANSVERSAL DE LA CONQUE, Transversalis auris — *t. du Nez*, Compressor nasi — *t. des Orteils*, Transversus pedis.

TRANSVERSALIS, Transverse.

TRANSVERSA'LIS ABDOM'INIS, (F.) *Lombo-abdominal* (Ch.), *Transverse de l'Abdomen.* This muscle is seated, deeply, on the lateral parts of the abdomen. It is flat, thin, and broader before than behind. It is attached, above, to the cartilage of the last true rib, and to those of every false rib; and, below, to the inner lip of the crista of the ilium; to the two outer thirds of the crural arch, and to the upper part of the pubis. Its fibres, moreover, are inserted, behind, by means of broad aponeuroses, into the top of the transverse and spinous processes of the first four lumbar vertebræ; and, before, into the linea alba, and the ensiform cartilage. This muscle, all of whose fibres have a transverse direction, constricts the belly, and diminishes the base of the chest, by drawing inwards the ribs to which it is attached.

TRANSVERSALIS ANTICUS PRIMUS, Rectus capitis lateralis — t. Collateralis colli, see Sacro-lumbalis.

TRANSVERSA'LIS COLLI, *Transversalis Major colli, Portion of the Sacro-spinal* (Ch.), (F.) *Transversaire.* A muscle, seated at the posterior and lateral part of the neck and upper part of the back. It is attached to the transverse processes of the five or six lowest vertebræ of the neck; and to those of the four or five first dorsal. It extends the vertebræ of the neck, and inclines them to its side.

TRANSVERSALIS COLLI, Semi-spinalis colli.

TRANSVERSALIS DORSI, *Transverso-spinalis, Multif'idus Spinæ, Lumbo-cervical portion of the Spinal* (Ch.), (*Transverso-spinalis Lumbo'rum, Transverso-spinalis Dorsi, Transverso-spinalis Colli,*) *Mus'culus sacer, Spinales et transversales lumborum, Semi-spinalis internus* sive *Transverso-spinalis colli pars interna* (Winslow), *Lombo-dorsi-spinal*, &c., (F.) *Transversaire épineux.* This muscle, usually called, by English anatomists, *Multif'idus spinæ*, and including all the *transverso-spinales*, is situate in the vertebral gutters, extending from the posterior part of the sacrum to the second cervical vertebra. It is thicker in the neck and loins than in the back and behind the sacrum. Its use is—to straighten the vertebral column, and to impress upon it a slight rotary motion.

TRANSVERSALIS NASI, Compressor naris.

TRANSVERSARIUS, Transverse.

TRANSVERSE, *Transver'sus, Transversa'lis, Transversa'rius*, from *trans*, 'over,' and *vertere, versum*, 'to turn.' That which runs across: also, that which relates to the transverse processes of the vertebræ.

TRANSVERSE ARTERY OF THE FACE, arises from the temporal; passes transversely across the face, in front of the condyle of the lower jaw, and gives its branches to the different muscles of the cheek.

TRANSVERSE FISSURE, see Liver—t. Fossa, see Liver—t. Ligament of the Atlas, Annular ligament.

TRANSVERSE PERINEAL ARTERY, *Urethro-bulbar* (Ch.), is given off from the upper branch of the internal pudic; and passes inwards and forwards above the transversus perinæi muscles, as far as the bulb of the urethra, into which it dips, subdividing into numerous branches.

TRANSVERSE PROC''ESSES OF THE VER'TEBRÆ, *Diapoph'yses* of Owen, (F.) *Apophyses transverses des vertèbres*, are the bony eminences that jut out transversely and posteriorly from the sides of the vertebræ.

TRANSVERSE SUTURE, *Sutu'ra transversa'lis*, runs across the face, and sinks into the orbit; joining the bones of the skull to those of the face, but with so many irregularities and interruptions, that it can scarcely be recognised as a suture.

TRANSVERSE DE L'ABDOMEN, Transversalis abdominis — *t. de l'Oreille*, Transversus auris — *t. du Périnée*, Transversus perinæi.

TRANSVERSO-SPINAL, Semi-spinalis colli, Semi-spinalis dorsi — t. Spinalis, Transversalis dorsi — t. Spinalis colli, Semi-spinalis colli — t. Spinalis dorsi, Semi-spinalis dorsi.

TRANSVER'SUS AURIS, *Transver'sus Auric'ulæ*, (F.) *Transverse de l'Oreille* (Ch.), *Transversal de la Conque*, is often wanting. It is formed of some transverse fibres, situate transversely, behind the projection of the helix which divides the concha into two portions.

TRANSVERSUS PEDIS, *Scandula'rius*, (F.) *Transversal des Orteils, Métatarso-sous-phalangien transversal du premier orteil* (Chaussier). A muscle, which arises by fleshy slips from the heads of the metatarsal bones of the three outer toes. Its tendon is inserted into the base of the first phalanx of the great toe, being blended with that of the adductor pollicis.

TRANSVERSUS PERINÆI, *Leva'tor Ani parvus*, (F.) *Ischio-périnéal* (Ch.), *Transverse du Périnée*, is placed at the posterior part of the perinæum. It is thin, triangular, and situate transversely. Its external extremity is attached to the ramus and tuberosity of the ischium: its inner extremity is confounded with its fellow of the opposite side, and with the anterior part of the sphincter ani and posterior part of the bulbo-cavernosus. The use of this muscle is, — to compress the urethra, and to support the rectum and bladder. To a

fasciculus of this muscle, Santorini has given the name *Ure'thræ Eleva'tor* seu *Ejacula'tor*.

TRANSVERSUS PERINÆ'I ALTER, *Prostat'icus inferior*. A small muscle which occasionally accompanies the last.

TRAPA NATANS, (F.) *Macre flottante, Noix ou Châtaigne d'Eau*. *Ord.* Onagraceæ. *Sex. Syst.* Tetrandria Monogynia. The plant which affords the *Nuces Aquat'icæ, Trib'uli aquatici, Caltrops*. The nut is considered nutrient and demulcent, and is said to be useful in diarrhœa from abrasion of the bowels, and in calculus. A poultice is sometimes made of it to discuss hard and indolent tumours.

TRAPEZA, Mensa.

TRAPÈZE, Trapezium, Trapezius.

TRAPE'ZIUM OS, τραπεζιον, 'a trapezium.' So called from its shape. *Os multan'gulum majus*, (F.) *Os trapèze*. The first bone of the second row of the carpus. It is articulated, above, with the scaphoides; below, with the first bone of the metacarpus; within, with the trapezoides, and second metacarpal bone. Anteriorly, posteriorly, and externally, it gives attachment to ligaments.

TRAPE'ZIUS, *Cuculla'ris*, (F.) *Dorso-sus-acromien* (Ch.), *Trapèze, Capuchon*. A muscle, seated at the posterior part of the neck and shoulder, and at the upper part of the back. It has the shape of a trapezium; is attached, on the one hand, to the inner third of the upper curved line of the occipital bone; to the posterior cervical ligament; to the spinous process of the 7th cervical vertebra; and to those of all the dorsal vertebræ; and, on the other hand, to the spine of the scapula; the acromion and the outer third of the posterior margin of the clavicle. Its upper fibres are situate obliquely downwards and outwards; the transverse and inferior, obliquely outwards and inwards. This muscle elevates the shoulder; carries it backwards, or depresses it, according as its upper, middle, or lower fibres contract separately. It straightens the head, also, and inclines it to one side.

TRAP'EZOID LIGAMENT, *Ligamen'tum trapezoïdes*. The anterior part of the coraco-clavicular ligament. It is a very strong, fibrous fasciculus, which has the shape of a trapezium, and is situate obliquely, between the acromion process and clavicle.

TRAPEZOÏ'DES, OS, *Os multan'gulum minus* seu *pyramida'lē carpi*, from τραπεζιον, 'a trapezium,' and ειδος, 'shape or resemblance.' The second bone of the second row of the carpus,—so called from its shape. It is smaller than the trapezium, on the inside of which it is situate. It is articulated, above, with the os naviculare; below, with the second metacarpal bone; on the outside, with the trapezium; and internally, with the magnum. Anteriorly and posteriorly, it affords attachment to ligaments.

TRAUBENKUR, Grape cure.

TRAULISMUS, see Balbuties and Blæsitas.

TRAULOTES, see Blæsitas.

TRAUMA, Wound.

TRAUMAT'IC, *Traumat'icus, Vulnera'rius, Vul'nerary*, (F.) *Traumatique*, from τραυμα, τραυματος, 'a wound.' Anything relating to a wound.

TRAUMATICA, Detergents, Vulneraries.

TRAUMATICINE; same etymon as Traumatic. A name given by Eulenberg to a solution of gutta percha in chloroform, which is applied externally in various chronic cutaneous diseases.

TRAUMATICUS, Traumatic, Vulnerary.

TRAU'MATISM, *Traumatis'mus*. The condition of the organism occasioned by a grave wound.

TRAU'MATO-COMI'UM, from τραυμα, τραυματος, 'a wound,' and κομεω, 'I take care of.' An hospital for the reception of the wounded.

TRAUMATOP'YRA, *Febris traumat'ica*; from τραυμα, τραυματος, 'a wound,' and πυρ, 'fire.' A wound fever, or fever consecutive to a wound.

TRAVAIL, Parturition.

TRAVAIL D'ENFANT, Parturition.

TRAVELLER'S JOY, Clematis vitalba.

TREACLE, Melasses, Theriaca — t. English, Teucrium chamædrys — t. Venice, Theriaca.

TREAD, Cicatricula—t. of the Cock, Molecule.

TREATMENT, Curatio.

TREATMENT, DRY. One in which the patient is almost wholly, if not wholly, restricted from the alimentary use of fluids; a valuable *modus medendi* in inflammatory and hemorrhagic conditions.

TREE, ELK, Andromeda arborea — t. of Life, Thuya occidentalis—t. Sour, Andromeda arborea.

TRÈFLE DE CASTOR, Menyanthes trifoliata — *t. D'Eau*, Menyanthes trifoliata — *t. des Marais*, Menyanthes trifoliata.

TREFOIL, Hepatica triloba — t. Bean, stinking, Anagyris — t. Marsh, Menyanthes verna — t. Sour, Oxalis acetosella — t. Shrubby, Ptelea trifoliata—t. Water, Menyanthes trifoliata.

TREMA, Foramen.

TREMBLEMENT, Tremor — *t. Métallique*, see Tremor.

TREMBLES, Milk-sickness.

TREMBLING, Tremor — t. Fevers, Intermittent fever.

TREMELLA AURICULA JUDÆ, Peziza auricula.

TREMOR, *Trepida'tio, Syn'clonus Tremor, Tromo-spasmus, Tromus, Trembling*, (F.) *Tremblement*, from *tremere*, 'to tremble.' Involuntary agitation of the body, or of some part of it, without any obstacle to voluntary motion. It depends, generally, upon debility of the muscular, or of the nervous system; and, hence, is observed in convalescence, and in typhoid affections. It occurs, also, in old people; in hard drinkers; workers in mercury, lead, &c.: in the last case, it is called by the French, *Tremblement métallique, Tremor metal'licus*. Tremor seems to resemble paralysis more than convulsion. See Paralysis agitans and Pavitatio.

TREMOR CORDIS, Hippus, Palpitation — t. Metallicus, see Tremor — t. Potatorum, see Delirium tremens — t. Purring, *Frémissement cataire*.

TREPAN, *Trep'anum, Try'panon, Trip'anon, τρυπανον, Terebel'la, Pereter'ium, Peretor'ium, Serra versat'ilis, Chœn'icis, Chœnic'ion, Ter'ebra, Ter'etron, Tere'trium, Vertib'ulum*, (F.) *Trépan*, from τρυπαω, 'I perforate.' A surgical instrument resembling a wimble, and worked in the same manner. It is used for removing portions of bone, and particularly of the bones of the skull. The term *trepan* is given more particularly to the part of the instrument that makes the perforation. The handle is so constructed as to receive different bits,—as the crown, the *Trépan perforatif* or *Perite'rion*, the *T. exfoliatif* or *Desquamato'rium trep'anum*, and the *T. abaptis'ta*.

In Great Britain and the United States, this instrument has been superseded by the trephine, which is more manageable.

TREPANATIO, Trepanning.

TRÉPANATION, Trepanning.

TREPAN'NING, *Terebra'tio, Anatr'sis, Cephalotripe'sis, Trepana'tio, Trype'sis, Tresis, Prisis, Prismus, Fora'tio*, (F.) *Trépanation*. Same etymon as Trepan. The methodical application of the trepan.

TREPANON, Trepan.

TREPANUM, Trepan.

TREPHINE. The instrument which has replaced the trepan in some countries. It consists of a simple, cylindrical saw; with a handle placed

transversely like that of a gimlet, and from the centre of the circle, described by the teeth of the saw, a sharp little perforator projects, called the *Centre-pin*. The centre-pin is capable of being removed, at the surgeon's option, by means of a key for the purpose. It is used to fix the instrument until the teeth of the saw have made a circular groove, sufficiently deep for it to work steadily. The pin must then be removed. Sometimes the pin is made to slide up and down, and to be fixed in any position, by means of a screw.

TREPHOUSA, Nurse.

TREPIDATIO, Tremor—t. Cordis, Cardiotromus.

TRÉPIED VITAL, Tripod, vital.

TREPON'DO. A weight of three pounds.—Scribonius.

TRE'SIS, *τρησις*, from *τρεω*, 'I bore.' Properly, a perforation. A wound. A forcible solution of continuity in a soft part, commencing externally. A genus in the nosology of Good.

TRESIS, Trepanning, Wound—t. Causis, Burn—t. Punctura, Puncture—t. Vulnus, Wound—t. Vulnus laceratum, see Laceration—t. Vulnus simplex, Cut.

TRESSAILLEMENT, Shuddering.

TRESSO'RIA, low Latin *Episi'on*, *επισειον*. A term formerly applied to the hair covering the mons veneris, the absence of which has, by the vulgar, been esteemed a matter of reproach.

TRI, *τρι*, in composition, 'three.'

TRIACLE, Melasses.

TRIANGLE MÉDULLAIRE, Fornix.

TRIANGLE, VESICAL, see Urinary Bladder.

TRIAN'GULAR, *Trigo'nos*, *Triangula'ris*, from *tri*, and *angulus*, 'an angle.' That which has three angles.

TRIANGULAR or INFRA-PUBIAN LIGAMENT, *Ligamen'tum triangula'rē* seu *infra-pubia'num*, is a ligamentous fascia with short fibres, situate transversely beneath the symphysis pubis, which it strengthens. Also, a ligament extending from the coracoid to the acromial process of the scapula.

TRIANGULARIS, Depressor anguli oris—t. Coccygis, Coccygeus—t. Nasi, Compressor naris.

TRIANGULA'RIS STERNI, *Sterno-costal* (Ch.), *Pectora'lis inter'nus*. A muscle situate at the anterior and inner part of the chest, behind the cartilages of the ribs. It has the shape of a lengthened triangle, the base of which is directed downwards. It is attached to the posterior, lateral, and inferior part of the sternum, whence its fibres pass upwards and outwards, and terminate by as many distinct digitations at the cartilages of the 3d, 4th, 5th, and 6th true ribs. This muscle depresses the ribs and contributes to expiration.

TRIBAS, (F.) *Tribade*, from *τριβω*, 'I rub.' *Frictrix*, *Frica'trix*, *Futu'trix*, *Mas'cula*, *Subagita'trix*, *Subigita'trix*. A female whose clitoris is so large as to cause her to be regarded as an hermaphrodite. One who acts as a male with another female.

TRIBULI AQUATICI, see Trapa natans.

TRIBUTUM LUNARE, Menses—t. Menstruum, Menses.

TRICÆ, Plica—t. Incuborum, Plica—t. Scroforum, Plica.

TRICAGO, Teucrium chamædrys.

TRICAUDALIS, Retrahens auris.

TRICEPH'ALUS, from *tri*, and *κεφαλη*, 'head.' A monster with three heads.

TRICEPS, from *tri*, and *caput*, 'head.' A name given to muscles that have three fleshy bundles at one of their extremities.

TRICEPS ADDUC'TOR FEM'ORIS. Under this appellation are comprehended three distinct muscles; *Adductor brevis*, *A. longus*, and *A. magnus*.

TRICEPS AURIS, Retrahens auris—t. Brachialis, Triceps extensor cubiti.

TRICEPS CRURIS, *Femora'lis*, (F.) *Trifémororotulien* (Ch.), *Crural*, *Trifémoro-tibi-rotulien*. *Triceps crural* ou *de la cuisse*, is situate at the anterior, inner, and outer part of the thigh. It is formed of three bundles at its superior extremity, viz. 1. A middle fasciculus (the *crura'lis* of most anatomists). 2. An external fasciculus (the *vastus externus*) and 3. An inner fasciculus (the *vastus internus*). It is attached, above, to the anterior, inner, and outer surfaces of the femur, and to the two edges of the linea aspera, from the base of the trochanter to within four fingers' breadth of the knee. Below, it terminates by a large tendon, which is attached to the base and edges of the patella, as well as to the inner and outer tuberosities of the tibia. The triceps extends the leg on the thigh, and conversely.

TRICEPS DE LA CUISSE, Triceps cruris—t. *Crural*, Triceps cruris.

TRICEPS EXTEN'SOR CU'BITI, *Triceps brachia'lis*, (F.) *Scapulo-huméro-olécranien* (Ch.), *Triceps brachial*. This muscle, which occupies all the posterior part of the os humeri, is described as two muscles by Douglas, and as three by Winslow. It arises by three heads. The first or long head,—*long head of the biceps externus* of Douglas, *Anconeus major* of Winslow,—arises from the anterior extremity of the inferior costa of the scapula, near its neck, and below the origin of the teres minor. The second head, or *short head of the biceps externus* of Douglas, *Anconeus externus* of Winslow, arises from the upper and outer part of the os humeri, at the base of the great tuberosity; and the third head,—*Brachialis externus* of Douglas, *Anconeus internus* of Winslow.—the shortest of the three, arises from the back part of the os humeri, behind the flat tendon of the latissimus dorsi. These three portions unite about the middle of the arm, so as to form one thick and powerful muscle, which is inserted at the upper part of the olecranon. It extends the forearm on the arm, and conversely.

TRICEPS MAGNUS, Adductor magnus—t. Minor, Adductor longus femoris—t. Secundus, Adductor brevis.

TRICHÆ INCUBORUM, Plica.

TRICHANGIA, Capillary vessels

TRICHANGIECTA'SIA, *Angidiecta'sia*, *Trichocirsus*, from *θριξ*, *τριχος*, 'a hair,' *αγγειον*, 'a vessel,' and *εκτασις*, 'dilatation.' Morbid dilatation of the capillary vessels.

TRICHAUX'Ē, from *θριξ*, *τριχος*, 'hair,' and *αυξη*, 'increase.' Increase in the quantity and size of the hair, without change of texture.

TRICHERA ARVENSIS, Scabiosa.

TRICHIA, Entropion.

TRICHI'ASIS, *Trichio'sis*, *Tricho'sis*, from *θριξ*, *τριχος*, 'hair.' *Morbus pila'ris*. This name has been given to several affections. 1. To a disease of the kidneys or bladder, in which filamentous substances, resembling hairs, are passed in the urine. This is also called *Pilimic'tio*. It must be regarded as a variety of *Catar'rhus vesi'cæ*. 2. To a painful swelling of the breasts, in child-bed women, when the milk is excreted with difficulty:—a disease attributed, by Aristotle, to a hair swallowed by accident and carried to the breasts through the circulation; and 3dly, To inversion of the eye-lashes. See Entropion.

TRICHIASIS LACTEA, Infarctus mammæ lacteus.

TRICHILIA, Cathartics.

TRICHIL'IA EMET'ICA, *Elcaja*. A tree, *Order*, Meliaceæ, common on the mountains of Yemen

and in Senegal. The fruit is used, by the Arabs, as an emetic. The ripe seeds are formed with sesamum oil into an ointment for the itch.

Trichilia Trifolia'ta, a bush of Curaçoa, a decoction of the roots of which is used to promote abortion.

TRICHI'NA SPIRA'LIS. Same etymon. A small species of entozoa discovered in the muscles of voluntary motion. Trichinæ consist of very minute cysts, of an oblong figure, having considerable resemblance, in size and colour, to young pediculi, and are somewhat allied to the eels found in paste and vinegar. No symptoms have as yet been observed to be pathognomonic of their presence.

TRICHIOSIS, Trichiasis—t. Distrix, Distrix.

TRICHIS'MUS. Same etymon. *Capilla'tio, Fissu'ra pila'ris.* A capillary fracture, fissure, or crack.

TRICHIURIA, Trichocephalus.

TRICHOCÉPHALE DE L'HOMME, Trichocephalus.

TRICHOCEPH'ALUS, *Trichocepha'lus dispar;* from θριξ, τριχος, 'a hair,' and κεφαλη, 'head.' *Trichu'ris, T. vulgaris* seu *intestina'lis, Ascaris trichu'ria, Trichiu'ria, Trichocephalus* seu *Mastigo'des hominis, Long thread-worm,* (F.) *Trichocéphale de l'homme.* A worm, from an inch and a half to two inches long; the head acute; the body spirally involuted in the male, almost straight in the female. The *trichocephalus dispar* generally inhabits the cæcum and colon, and is rarely met with in the small intestines. It gives rise to no peculiar symptoms, and requires the usual anthelmintic treatment.

TRICHOCIRSUS, Trichangiectasia.

TRICHOG'ENOUS, from θριξ, τριχος, 'a hair,' and γενναω, 'I generate.' Hair-forming; as a '*trichogenous* remedy,'—one that promotes the growth of hair.

TRICHOLABIS, Madisterium.

TRICHOLABIUM, Madisterium.

TRICHOLOGIA, Carphologia.

TRICHOMA, Capillamentum, Plica.

TRICHOMANES, Asplenium trichomanoides —t. Crenata, Asplenium trichomanoides.

TRI'CHOMAPHYTE, from *trichoma*, 'plica,' and φυτον, 'a vegetable.' A cryptogamous growth, found in plica, and said, by some, to be its cause.

TRICHOMAPHYTON, Mycoderma plicæ.

TRICHOMATION, Capillamentum.

TRICHOMATOSE HAIR, Plica.

TRICHOM'ONAS, *Trichom'onad;* from θριξ, τριχος, 'a hair,' and *monad.* An animalcule found by M. Donné in the mucus of the vagina, where cleanliness has not been attended to, and to which he has given the name *Trichom'onas vagina'lis.* By some it is considered to be nothing more than ciliated epithelium separated from the uterus.

TRICHOMYCES TONSURANS, Porrigo decalvans.

TRICHONOSIS, Porrigo—t. Furfuracea, Porrigo decalvans—t. Plica, Plica—t. Poliosis, Poliosis.

TRICHON'OSUS, from θριξ, τριχος, 'hair,' and νοσος, 'disease.' A disease of the hair.

TRICHOPHY'IA, *Trichophyt'ica,* from θριξ, τριχος, 'hair,' and φυειν, 'to grow.' Remedies that promote the growth of the hair.

TRICHOPHYTON TONSURANS, see Porrigo decalvans.

TRICHOSAN'THES, AMA'RA, (θριξ. τριχος, 'hair,' and ανθη, 'a flower.') *Order,* Cucurbitaceæ; a plant of India; the seeds are bitter and astringent, sometimes emetic. In Jamaica, it is considered to be a poison, and is used for killing rats.

Trichosanthes Corda'ta. The root is used by the natives of India as a substitute for Calumba root.

Trichosanthes Cucumer'ina. The fruit is considered in India to be anthelmintic.

Trichosanthes Inci'sa, *Gashed Trichosanthes,* of the forests of India. The fruit is esteemed to be poisonous. Pounded and intimately blended with cocoa nut oil, it is used in India as an application to offensive sores of the ears, and to ozæna.

Trichosanthes Villo'sa, of Java. The fruit acts like colocynth.

TRICHOSCHISIS, Schizatrichia.

TRICHO'SIS, *Pila'rē malum;* from θριξ, τριχος, 'hair.' Morbid organization or deficiency of hair. A genus in the system of Good.

Trichosis, Entropion, Trichiasis — t. Area, Porrigo decalvans — t. Athrix, Alopecia — t. Distrix, Distrix—t. Furfuracea, Porrigo furfurans — t. Hirsuties, Hirsuties — t. Plica, Plica — t. Poliosis, Poliosis — t. Setosa, Hystriciasis.

TRICHOTON, Scalp.

TRICHURIS, Trichocepbalus.

TRICLISPERMA GRANDIFLORA, Polygala paucifolia.

TRICUS'PID, *Tricus'pis, Tricuspida'lis, Tricuspida'tus,* from *tri,* and *cuspis, cuspidis,* 'a point.' That which has three points.

Tricuspid Valves, *Val'vulæ Tricus'pides* seu *triglo'chines* seu *trisul'cæ,* are three triangular, valvular duplicatures, formed by the inner membrane of the right cavities of the heart, around the orifice by which the auricle communicates with the ventricle. The elongated and pointed top of each of these valves is continuous with the chordæ tendineæ, which set out from the columnæ carneæ of the heart. These valves are depressed to allow the blood to flow from the auricle into the ventricle; and are raised to prevent its reflux into the auricle.

TRIENS, *Un'ciæ qua'tuor.* From *tri,* 'three.' The third part of a pound. Four ounces, Troy. — Galen.

TRIFACIAL, Trigemini.

TRIFÉMORO-ROTULIEN, Triceps cruris—t. *Tibi-rotulien*, Triceps cruris.

TRIFOLIUM ACETOSUM, Oxalis acetosella —t. Aquaticum, Menyanthes trifoliata — t. Aureum, Hepatica triloba—t. Cervinum, Eupatorium cannabinum—t. Fibrinum, Menyanthes trifoliata —t. Hepaticum, Hepatica triloba.

Trifo'lium Melilo'tus Officina'lis, *T. offic''ina'lē* seu *odora'tum* seu *cuballi'num;* from *tri,* and *folium,* 'a leaf.' *Melilotus, Melilo'tus cit'rina, Lotus sylves'tris, Ser'tula Campa'na, Coro'na re'gia, Common mel'ilot,* (F.) *Mélilot. Ord.* Leguminosæ. *Sex. Syst.* Diadelphia Decandria. The infusion or distilled water of this plant has been employed in cases of ophthalmia. It has also been used in fomentations, glysters, &c.

Trifolium Officinale, T. melilotus officinalis —t. Paludosum. Menyanthes trifoliata — t. Palustre, Menyanthes trifoliata.

TRIGAS'TRIC, *Trigas'tricus, Triven'ter;* from *tri,* and γαστηρ, 'belly.' That which has three bellies. An epithet for muscles so circumstanced.

TRIGEM'INI, *Tergem'ini,* from *tri,* and *gem'inus,* 'double;' 'threefold,' 'triplets.' The *fifth pair of nerves, Nervi divi'si* seu *gustato'rii, Nervus quintus* seu *tremellus* seu *mixtus* seu *sympathet'icus me'dius* seu *sympath'icus medius* seu *anonymus* seu *innomina'tus, Pœr trigem'inum* seu *quintum nervorum cerebra'lium* seu *trium funiculo'rum, Trifa'cial,* (F.) *Nerf gustatif innominé, Nerf à trois cordes, Nerf trijumeau.* This nerve arises below the tuber annulare by one large posterior root from the corpora restiformia, and by two small anterior roots from the corpora olivaria, whence, pro-

ceeding forwards to the side of the sella Turcica, the filaments composing the large root form a ganglion — the Gasserian. Emerging from this ganglion, the filaments, of which the large root consists, form, with those constituting the small roots, and which had not passed through the ganglion, two flattened trunks, each of which is soon divided into three branches, in such a manner, however, that the *first*, or *ophthalmic branch*, and the *second* or *upper maxillary*, are composed exclusively of the filaments that arose from the corpora restiformia and passed through the Gasserian ganglion; whilst the *third* or *lower maxillary branch* is composed in part of those filaments, and in part of those that arose from the corpora olivaria, and passed on one side of the ganglion without going through it. The whole, therefore, of the first and second branches, and a part of the third are sensiferous nerves, whilst the remaining part of the third — the *man'ducatory* or *mas'ticatory* — is wholly motiferous, and passes to the pterygoid and other muscles concerned in mastication.

TRIGONE CÉRÉBRAL, Fornix—*t. Vésical*, see Urinary Bladder.

TRIGONEL'LA FŒNUM, *T. Fœ'num Græ'cum*, diminutive of *trigona*, three sided—from the shape of its flower; *Fen'ugreek, Fœ'nugreek, Fœnum Græ'cum, Bu'ceras, B. Fœnum Græ'cum, Carphos, Ægoc''eras*, (F.) *Fénugrec, Sénégrain. Ord.* Leguminosæ. *Sex. Syst.* Diadelphia Decandria. A native of the south of France. The seeds have a strong, disagreeable smell, and an unctuous, farinaceous taste; accompanied by a slight bitterness. They are chiefly used in poultices.

TRIGONIUM OLFACTORIUM, see Mammillary eminence.

TRIGONOS, Triangular.

TRIGONUS VESICÆ, see Urinary bladder—t. Lieutaudi, see Urinary bladder.

TRIJUMEAUX, Trigemini.

TRIL'LIUM LATIFO'LIUM, from *trilix*, 'triple,'—all the parts being in threes. *Broad-leaf Bethroot, Bethroot, Rattlesnake root, Wakerobin, Coughroot, Indian Balm, Ground Lily, Jews' Harp, Indian Shamrock, Pariswort, Truelove. Ord.* Trilliaceæ. *Sex. Syst.* Hexandria Trigynia. A plant peculiar to North America, which blossoms in the spring. The root is astringent.

There are many species of Trillium, all of which possess the same properties.

TRIOCEPHALIA, Aprosopia.

TRIOR'CHIS, from *tri*, and ὀρχις, 'a testicle.' One who has three testicles.

TRIOSTEOSPERMUM, Triosteum.

TRIOS'TEUM, *T. Perfolia'tum* seu *majus*, from *tri*, and ὀστεον, 'a bone,' in allusion to the three bony nuts; *Triosteosper'mum, Bastard Ipecacuan'ha, Fever Root, Feverwort, Tinker's weed, Horse ginseng* or *gentian, Ipecac., Wild Coffee, White ginseng, Gen'tian, White Gentian, Sweet Bitter.* Indigenous; *Ord.* Caprifoliaceæ. In very large doses, the bark of the root proves emetic. It is a good cathartic, in doses of twenty or thirty grains. It sometimes operates as a diuretic.

TRIOSTEUM AUGUSTIFOLIUM, *T. minus*, has similar virtues.

TRIPE DE ROCHE. Different lichens of the species Gyrophora, inhabiting the Arctic regions of America, bear this name. They are eaten as food by the hunters.

TRIPHAR'MACUM, τριφαρμακον. From *tri*, and φαρμακον, 'a medicine.' A medicine composed of three ingredients.

TRIPLET, from *triplex* 'triple.' One of three children born at the same accouchement or gestation. Also, relating to triplets — as a '*triplet* conception.'

TRIPLET MONSTERS, *Monstra trip'lica* seu *trigem'ina*, are such as have parts of the body tripled. They are rare.

TRIPOD, VITAL, (F.) *Trépied vital.* The heart, lungs, and brain have been so called, as their united action is necessary for the maintenance of life.

TRIPSIS, Contusio, Trituration.

TRIPUDIATIO SPASTICA, Chorea.

TRIQUETRA OSSA, Wormiana ossa.

TRIQUETRUM, (OS,) Cuneiform (bone.)

TRISIS, Brygmus.

TRISMUS, from τριζω, 'I gnash.' *Enta'sia* seu *Tonos Trismus, Capis'trum, Mas'ticatory spasm of the face, Locked Jaw, Spasmus* seu *Rigor* seu *Tet'anus maxill'æ inferio'ris, Gnathospas'mus, Stomatospas'mus*, (F.) *Mal de Machoire.* Spastic closure of the under jaw; a partial tetanus. Cullen makes two varieties — *T. nascen'tium* seu *neonato'rum, Nineday fits*, (F.) *Sarrète*, attacking infants during two weeks from birth; and *T. traumaticus*, originating from a wound.

TRISMUS CAPISTRATUS, *Brédissure*—t. Catarrhalis maxillaris, Neuralgia maxillaris—t. Clonicus, Neuralgia faciei—t. Cynicus, see Canine laugh—t. Diastrophe Sauvagesii, Paralysis, Bell's — t. Dolorificus, Neuralgia faciei—t. Maxillaris, Neuralgia faciei — t. Nascentium, see Trismus — t. Neonatorum, see Trismus — t. Sardonicus, Risus sardonicus.

TRISPERM'UM, from *tri*, and σπερμα, 'a grain or seed.' A cataplasm, consisting of three seeds, — *cumin, bay*, and *smallage*. Gorræus.

TRISPLANCHNIA, Cholera.

TRISPLANCH'NIC, *Trisplanch'nicus*, (F.) *Trisplanchnique*; from *tri*, and σπλαγχνον, 'viscus.' That which relates to three orders of viscera.

TRISPLANCHNIC NERVE, *Nervus trisplanch'nicus* seu *sympathet'icus magnus* seu *sympath'icus* seu *ganglion'icus* seu *vaso-moto'rius*, (F.) *Nerf sympathique* ou *grand sympathique, Great sympathet'ic, Intercos'tal, Ganglion'ic* or *ver'tebral nerve, Nerve of organ'ic life*; — named by Bichat the *organic nervous system*, in opposition to the other nervous parts, called the *animal nervous system.* Gall terms it, the *nervous system of the automat'ic functions.* It has also been called the *ganglionic nervous system.* It is termed *Trisplanchic*, because it distributes its branches to the organs in the three great splanchnic cavities — the head, chest and abdomen. It is composed of a series of ganglia, united by intermediate branches, and passing along the side of the spine to the lowest part of the trunk; communicating, by a branch, with each of the thirty pairs of spinal nerves and several of the cerebral nerves; and detaching nerves from its several ganglia, which accompany the arteries, and are distributed, particularly, to the organs of involuntary functions. At its upper part it is concealed in the canalis caroticus and cavernous sinus, and is joined there by a branch of the 6th pair of nerves, and by a twig from the Vidian nerve of the 5th pair. In passing down by the side of the spine, it forms three ganglia in the neck:—the *superior, middle*, (*thyroid ganglion,*) and *inferior*, (*ver'tebral ganglion*); 12 in the back —the *thoracic*; 5 in the loins—the *lumbar*; and three or four *sacral.* When it reaches the coccyx it unites with its fellow from the opposite side, forming a small ganglion — the *coccyge'al, Gan'glion impar, az'ygous gan'glion.* Meckel divides it into two portions — 1. The *central ganglions* or *central part*, composed of the numerous ganglionic plexuses in the abdomen; the centre of which

is the *semilunar* and *solar plexuses*. 2. The *external ganglions, Limitrophes* or *external part*, which comprise the series of ganglions situate at the sides of the spine, from the base of the cranium to the sacrum. The great sympathetic seems to form a distinct nervous system, destined for the organs of involuntary motion; for although communicating with both brain and spinal marrow, it does not seem to be immediately under the influence of either. Its special functions are not yet, however, well understood, and are the subject — as they have always been — of much interesting investigation.

TRISPLANCHNITIS, Cholera, (spasmodic.)

TRISSAGO, Teucrium chamædrys — t. Palustris, Teucrium scordium.

TRISTEMANIA, Melancholy.

TRISTERN'AL. Béclard has given this name to the third bony portion of the sternum; — that which corresponds to the third intercostal space.

TRISTITIA, Athymia, Mœror.

TRITÆOPHYA AMERICANA, Fever, yellow.

TRITÆOPH'YES, *Tritæoph'ya*, from τριταιος, 'tertian,' and φυω, 'I become.' A fever, whose type approaches the tertian. Sauvages gave the name *Tritæophya Vratislavien'sis*, to an epidemic, which broke out in the Prussian army at Breslaw, in the middle of the last century.

TRITÆUS, Tertian fever.

TRIT'ICUM ÆSTI'VUM, from *terere, tritum*, 'to thrash.' *T. cerea'lē* seu *Cevallos* seu *compac'tum* seu *erina'ceum* seu *Gaertneria'num* seu *Linnæa'num* seu *pruino'sum, Summer wheat;* and TRIT'ICUM HYBERN'UM seu *glaucum* seu *Mu'ticum* seu *Sic'ulum, Winter wheat,* (F.) *Froment. Ord.* Gramineæ. *Sex. Syst.* Triandria Digynia. From these plants our wheaten flour is obtained, by grinding the seeds — *Wheat, Pyrus, Frumen'tum* — and to them we are indebted for our bread and pastry. The nutritive properties of wheaten flour are so well known as not to need comment.

Bread, (F.) *Pain,* mixed with milk, constitutes the ordinary emollient poultice;—and the *crumbs of bread, Micæ panis,* are a common excipient for pills and boluses.

TRITICUM ARVENSE, T. repens — t. Cereale, T. æstivum — t. Cevallos, T. æstivum — t. Compactum, T. æstivum — t. Faginum, Polygonum fagopyrum — t. Gaertnerianum, T. æstivum — t. Glaucum, T. hybernum, and T. repens—t. Hybernum, see T. æstivum—t. Muticum, T. hybernum —t. Linnæanum, T. æstivum — t. Pruinosum, T. æstivum.

TRIT'ICUM REPENS, *T. arven'sē* seu *glaucum, Agrop'yrum lævis'simum, Bromus glaber, Gramen cani'num* seu *Dioscor'idis* seu *repens, Lolia'ceum radi'cē repen'tē, Dog-grass, Couch-grass, Quickens, Twitch-grass,* (Sc.) *Ronnach,* (F.) *Chiendent.* The roots are sweet, and possess aperient properties. They are said, also, to be diuretic.

TRITICUM SICULUM, T. hybernum.

TRITIO, Contritio, Trituration.

TRITON PALUSTRIS, see Ectozoa.

TRITORIUM, Infundibulum.

TRITURA, Contritio.

TRITURA'TION, *Tritura'tio, Tritu'ra, Tritus, Tri'tio, Tripsis,* from *terere, tritum,* 'to bruise.' The act of reducing a substance to powder.

TRITURATION, Contritio.

TRITUS, Contritio, Trituration.

TRIVELIN, see Liver.

TRIVENTER, Trigastric.

TROCAR, *Trochar, Acus paracent'ica* seu *paracentet'ica* seu *trig'uetra vulga'ris, Paracenti'cion, Paracentete'rion.* Corrupted from the (F.) *Troisquarts* or *Trocart,* 'three quarters;' so called from the triangular shape of the point—*Trig'uetrum.* An instrument used for evacuating fluids from cavities, particularly in ascites, hydrocele, &c. A trocar consists of a perforator or stylet and a canula, which is so adapted to the perforator, that, when the puncture is made, both enter the wound with facility; after which, the stylet being withdrawn, the canula remains in the wound and affords the fluid a ready passage outwards.

TROCART, Trocar.

TROCH, Trochiscos.

TROCHAN'TER, *Trokanter, Rota'tor,* from τροχαω, 'I turn.' Anatomists have given the names *great* and *little trochanter* to two processes at the proper extremity of the femur. The *great trochan'ter, glutus,* is the one on the outside; the *less* is lower down and more internally. Both afford attachment to rotator muscles of the thigh, and hence their name. Chaussier, by the word *trochanter,* means the larger process; the smaller he calls *trochantin.*

TROCHANTER'IAN, *Trochanteria'nus, Trokanter'ian.* That which belongs or relates to the great trochanter. — Chaussier.

TROCHANTIN'IAN, *Trokantin'ian, Trochantinia'nus.* That which belongs or relates to the trochantin or less trochanter.

TROCHAR, Trocar.

TROCHES OF CARBONATE OF LIME, Trochisci carbonatis calcis — t. of Chalk, Trochisci carbonatis calcis — t. Escharotic, Trochisci escharotici — t. Gum, Trochisci gummosi — t. of Gum Arabic, Trochisci acaciæ — t. of Ipecacuanha, Trochisci ipecacuanhæ—t. of Lactucarium, Trochisci lactucarii — t. Liquorice, Trochisci glycyrrhizæ — t. Liquorice, with opium, Trochisci glycyrrhizæ cum opio — t. of Magnesia, Trochisci magnesiæ — t. of Morphia, Trochisci morphiæ— t. of Morphia and ipecacuanha, Trochisci morphiæ et ipecacuanhæ—t. Nitre, Trochisci nitratis potassæ — t. of Peppermint, Trochisci menthæ piperitæ—t. of Tartaric acid, Trochisci acidi tartarici.

TROCHIA, Orbit.

TROCHILIA, Trochlea.

TROCHIN, from τροχαειν, 'to turn.' Chaussier has given this name to the smaller of the tuberosities at the upper extremity of the os humeri; because it gives attachment to one of the rotator muscles of the arm,—the subscapularis.

TROCHIN'IAN, *Trochinia'nus.* That which belongs or relates to the trochin.

TROCHIS'CUS, *Phthois, Artis'cus, Collix, Colix, Phthois'cos, Rot'ula, Cyclis'mos,* diminutive of τροχος, 'a wheel.' A *troch* or *round* table, (F.) *Trochisque.* See Pastil, and Tabella. A solid medicine, prepared of powders, incorporated by means of mucilage, erumb of bread, juices of plants, &c. In French nomenclature, the *trochisque* differs from the *tablette,*—the former containing no sugar. This form of preparation is adapted for the purpose of allowing the medicines of which the troch is composed to dissolve slowly in the mouth, and to pass gradually into the stomach.

The Parisian Codex has two formulæ for troches for external use.

TROCHISCI ACA'CIÆ, *Troches of Gum Ar'abic.* (*Acac.* ℥iv; *Amylı* ℥j; *Sacchar.* ℔j. Make into a mass with *rose water,* and form lozenges.—Ph. E.) To allay cough.

TROCHISCI AC''IDI TARTAR'ICI, *Troches of Tartaric Acid.* (*Acid. Tartar.* ℥j; *Sacchar.* ℥viij, *Ol. Limon.* ℳx. Form into troches with mucilage.—Ph. E.) Refrigerant and demulcent.

TROCHISCI BECHICI NIGRI, T. glycyrrhizæ glabræ.

TROCHISCI CARBONA'TIS CALCIS, *T. e Cretâ, T Cretæ* (Ph. U. S.), *Troches of Car'bonate of lime* or *chalk, Lozenges for the heartburn, Tabel'læ ad*

urdo'rem ventric'uli seu *cardial'gicæ* seu *ad sodam.* (*Cret.* ppt. ℥iv; *acaciæ,* in pulv. ℥j; *myrist.* in pulv. ℥j; *sacch.* in pulv. ℥vj. M. Form into troches with *water.*) Antacid and absorbent.

Trochisci e Cretâ, T. carbonatis calcis — t. Cretæ, T. carbonatis calcis.

Trochisci seu Pastil'li Emeti'næ Pectora'les, *Pectoral Lozenges of Em'etine.* (*Sugar,* ℥iv; *emetine,* 32 grains. Form into lozenges of nine grains each.) One is a dose.

Trochisci Escharot'ici, *Escharot'ic Troches.* (*Hydrarg. oxymur.* p. 8; *amyli,* p. 16; *mucilag. g. tragac.* q. s. Make into troches, to which a few drops of laudanum may be added.—Ph. P.) Used in foul ulcers, to remove excrescences, &c.

Trochisci Escharot'ici de Min'io. (*Oxyd. plumbi. rubr.* p. 16; *hydrarg. oxymur.* p. 32; *mic. panis,* p. 128; *aq. rosæ,* q. s. — Ph. P.) Used like the last.

Trochisci Glycyrrhi'zæ, *T. G. Glabræ* seu *Bech'ici nigri, Liq'uorice troches, Black pectoral lozenges.* (*Ext. glyc. glabr., gum. acac.* āā p. j; *sacch. purif.* p. ij. Dissolve in warm water; strain; evaporate, and form into troches.—Ph. E.) Demulcent. To allay cough.

Trochisci Glycyrrhi'zæ cum O'pio, *T. G. et opii* (Ph. U. S.) seu *Theba'ici seu sedati'vo-balsam'ici seu pectora'les regis Dano'rum, Liquorice Troches with Opium, Wistar's Lozenges.* (*Opii,* in pulv. ℈ss; *ext. glycyrrhiz.* in pulv., *sacchar.* in pulv., *acaciæ,* in pulv., āā ℈x; *ol. anisi,* f℥j. Make into troches.—Ph. U. S.) Demulcent and anodyne.

Spitta's Lozenges for coryza, hoarseness, and sore-throat, are composed as follows: — (*Cubeb. recent.* in pulv. ℥ij; *extract. glycyrrhiz.* ℥j; *myroxyl.* ℥j; *acaciæ,* ℥iv; *syrup,* q. s. Make into troches of ten grains each.

Trochisci Gummo'si, *Gum Troches.* (*G. acac.* p. v; *amyli,* p. i; *sacch. pur.* p. xij. Make up the troches with rose-water. — Ph. E.) Demulcent.

Trochis'ci Ipecacuan'hæ, *Troches of Ipecacuanha.* (*Ipecacuanh.* in pulv. ℈ss; *sacchar.* in pulv. ℥xiv; *marantæ,* in pulv. ℥iv; *mucilag. tragacanth.* q. s. Make into troches.—Ph. U. S.)

Trochisci Lactuca'rii, *Troches of Lactuca'rium.* (Prepared with *Lactucarium* in the same proportion and manner as the opium lozenges.—Ph. E.) Each lozenge contains between the fifth and sixth of a grain of lactucarium.

Trochisci Magne'siæ, *Troches of Magne'sia.* (*Magnes.* ℥iv; *sacchar.* ℔j; *myrist.* pulv. ℥j; *mucilag. tragacanth.* q. s. Make into troches.—Ph. U. S.) Useful in acidity of the stomach, with constipation.

Trochisci Menthæ Piperi'tæ, *Troches of Peppermint.* (*Ol. menth. piperit.* f℥j; *sacchar.* in pulv. ℔j; *mucilag. tragacanthæ,* q. s. Make into troches.—Ph. U. S.) Used as a carminative.

Trochisci Morph'iæ, *Troches of Morph'ia.* (*Morph. Muriat.* ℈j; *Tinct. Tolut.* ℈ss; *Sacchar.* ℈xxv. Make into lozenges, with mucilage, weighing 15 grains each.—Ph. E.) Each lozenge contains about one-fortieth of a grain of muriate of morphia. Used to allay cough.

Trochisci Morph'iæ et Ipecacuan'hæ, *Troches of Morph'ia and Ipecacuan'ha.* (*Morph. murr.* ℈j; *Ipecac.* pulv. ℥j; *Tinct. Tolut.* f℈ss; *Sacchar.* ℈xxv. Make into a mass with mucilage, and form lozenges, 15 grains each.—Ph. E.) Each lozenge contains about one-fortieth of a grain of the muriate. Used to allay cough.

Trochisci Nitra'tis Potas'sæ, *Nitre Troches.* (*Potassæ nitrat.* p. j; *sacch. pur.* p. iij. Make into troches with mucilage of tragacanth. — Ph. E.) In slight inflammatory sore-throat and fever.

Trochisci Pectorales Regis Danorum, T. glycyrrhizæ cum opio — t. Sedativo-balsamica, T. glycyrrhizæ cum opio.

Trochis'ci Sodæ Bicarbona'tis, *Troches of Bicar'bonate of Soda.* (*Sodæ bicarb.* ℥iv; *sacchar.* in pulv. ℔j; *mucilag. tragacanth.* q. s. To be made into a mass, and divided into troches, each weighing ten grains.—Ph. U. S.) Antacid.

The *Pastilles de Vichy, Pastilles digestives d'Hauterive-Vichy, Pastil'li digesti'vi Darcet'ii,* composed of *bicarbonate of soda, oil of peppermint,* and *sugar,* are much used in France, like the Vichy waters, in cardialgia, gout, and lithiasis.

Trochisci Stibiati, Tabellæ antimoniales Kunckelii — t. Thebaici, T. glycyrrhizæ cum opio.

TROCHISQUE, Trochiscos.

TROCH'ITER, from τροχαειν, 'to turn.' The larger of the two tuberosities at the upper extremity of the os humeri; so called because it affords insertion to rotator muscles. — Chaussier.

TROCHITER'IAN, in the language of Chaussier, means any thing belonging or relating to the trochiter.

TROCH'LEA, *Trochil'ia,* (F.) *Trochlée* ou *Troklée.* A pulley; from τροχαειν, 'to turn,'—for example, the articular surface at the lower extremity of the os humeri; so called from its forming a kind of pulley on which the ulna moves, in flexion and extension of the forearm. Also, the cartilaginous pulley over which the tendon of the trochlearis muscle passes, at the upper and inner part of the orbit.

Trochlea Labyrinthi, Cochlea.

TROCHLEARIS, Obliquus superior oculi.

TROCHLÉATEUR, GRAND, Obliquus superior oculi — *t. Petit,* Obliquus superior oculi.

TROCHLÉE, Trochlea.

TRO'CHOID, from τροχος, 'a wheel,' and ειδος, 'resemblance.' *Trochoï'des, Ax'ea commissu'ra.* An articulation, in which one bone turns upon another, like a wheel upon its axle; as the *Atloïdo-axoid articulation.*

TROCHOIDES, Axea commissura.

TROËNE, Ligustrum vulgare.

TROISQUARTS, Trocar.

TROKANTER, Trochanter.

TROKANTERIAN, Trochanterian.

TROKANTINIAN, Trochantinian.

TROKLÉE, Trochlea.

TROLLIUS LAXUS, *T. America'nus, Globe flower; Order,* Ranunculaceæ; indigenous; has the same medical properties as the Ranunculus.

TROMOMANIA, Delirium tremens.

TROMOPARANŒA, Delirium tremens.

TROMOS, see Paralysis agitans.

TROMOSPASMUS, Tremor.

TROMPE, Tuba — *t. d'Eustache,* Eustachian tube—*t. de Fallope,* Tuba Fallopiana—*t. Utérine,* Tuba Fallopiana.

TROMUS, Tremor.

TRONC, Trunk—*t. Brachial,* Brachial artery — *t. Basilaire,* Basilary artery.

TROPÆ'OLUM MAJUS, *Nastur'tium Ind'icum* seu *Peruvia'num, Acrivi'ola, Flos sanguin'eus monar'di, Cardamin'dum majus, Car'damum majus, Indian Cress. Ord.* Geraniaceæ. *Sex. Syst.* Octandria Monogynia. (F.) *Cresson des Indes, Cresson du Mexique, Capucine.* An antiscorbutic.

Tropæ'olum Tubero'sum, *Ulluco.* A tuberous plant, cultivated in the Sierra, Peru. It is smaller than the potato.

TROPHALIS, Colostrum.

TROPHE, Aliment, Cibatio, Pabulum.

TROPHI. Same etymon as Trophy. In in-

sects, the parts of the mouth that are employed in receiving and preparing the food.

TROPH'ICAL, *Troph'icus*, (F.) *Trophique*. Same etymon as Trophy. Relating to nourishment or nutrition.

TROPH'ICAL NERVES. The organic nerves, or nerves of the sympathetic system, have been so termed, from the belief that they are concerned in nutrition.

TROPHIMOS, Nutrition.

TROPHONEURO'SES, from τροφη, 'nourishment,' and *neurosis*. Morbid conditions of the process of nutrition, owing to modified nervous influence. — Romberg.

TROPHON'OSI, *Trophonu'si*, from τροφη, 'nourishment,' and νοσος, 'a disease.' Diseases of nutrition.

TROPH'Y, *Troph'ia*, τροφη, a suffix denoting 'nourishment or nutrition;' as in hypertrophy, 'excess of nourishment or nutrition.'

TROPONU'SI, *Morbi trop'ici*, from τροπη, the solstitial or tropical point where the sun turns or alters its course, and νουσος, 'a disease.' Diseases that prevail in the tropics.

TROSTER, see Spirit.

TROU, Foramen — *t. Anonyme*, Foramen stylomastoideum — *t. Aveugle* ou *Borgne*, Cæcum foramen — *t. Borgne* of the Medulla oblongata, Foramen cæcum of the medulla oblongata — *t. de Botal*, Botal foramen, Ovale foramen — *t. Déchiré antérieur*, Lacerum anterius foramen — *t. Déchiré postérieur*, Lacerum posterius foramen — *t. Épineux*, Spinale foramen — *t. Mentonnier*, Mental foramen — *t. Optique*, Foramen opticum — *t. Orbitaire supérieur*, Foramen supra-orbitarium — *t. Orbitaire supérieur*, Orbitar foramen superior — *t. Ovale*, Ovale foramen — *t. Rond, petit*, Spinale foramen — *t. Sous-orbitaire*, see Suborbitar canal — *t. Sous-pubien*, Obturatorium foramen — *t. Sphéno-épineux*, Spinale foramen — *t. Sus-orbitaire*, Foramen supra-orbitarium.

TROUS CAROTIDIENS, Carotica foramina — *t. Condyloïdiens*, Condyloidea foramina — *t. de Conjugaison*, Conjugationis foramina, see Vertebræ — *t. Olfactifs*, Olfactory foramina — *t. Rachidiens*, Spinal foramina.

TROUSSE, Case (pocket).

TROUSSE-GALANT, Cholera morbus.

TROUSSEAU, Fasciculus.

TROUSSEAUX ARRIÈRE-MÉSENTÉRIQUES (F.). A name given by Winslow to the nervous plexus situate between the two mesenteric plexuses, of which it is a dependence, and which descends into the pelvis to concur in the formation of the hypogastric plexus.

TRUBS, Lycoperdon tuber.

TRUCK, see Medicament.

TRUCULENTUS, Homicidal.

TRUDGEBACKED, see Hump.

TRUELOVE, Paris, Trillium latifolium.

TRUFFE, Lycoperdon tuber.

TRUFFLE, Lycoperdon tuber — t. Hart's, Elaphomyces granulatus.

TRULLA, Fart.

TRUMBUS, Thrombus.

TRUMPET CREEPER, Tecoma radicans — t. Flower, Tecoma radicans — t. Weed, Eupatorium purpureum.

TRUNCUS, Trunk.

TRUNK, *Truncus*, (F.) *Tronc*. The principal part of the body, to which the limbs are articulated. The trunk has been divided into three parts: — a *superior*, the *head*; a *middle*, the *thorax*, and an *inferior*, the *pelvis*. These three regions contain the great splanchnic cavities. They are united by a common *stalk* — the vertebral column. To the *middle* are articulated the superior extremities; and, to the *inferior*, the lower extremities.

The *trunk* of an artery, vein, nerve, or lymphatic, is its largest part, which has not yet given off branches. It is, also, applied to the parent vessel, after branches have been sent off.

TRUSS, from (F.) *trousser*, 'to tie up.' *Broche'rium, Brachie'rium, Brachi'lè, Brochi'rolum, Bracheri'olum, Amma, Hamma, Subligac'ulum, Subligatu'ra*, (F.) *Brayer*. A hernial bandage for keeping hernia reduced. The ancient trusses were inelastic. They consisted simply of a pad and strap. At the present day, elastic bandages are alone employed. They possess the advantage of making an equable and continuous pressure on the aperture of the sac, and of yielding to the changes of form in the abdominal parietes. The most important part of these bandages is a piece of narrow steel, flat, and adapted to the shape of the body. This is the *spring*, (F.) *Ressort*. It embraces the body on the side affected; extends from beyond the spine, and terminates opposite the ruptured part, by an iron plate to which it is riveted. The posterior surface of this plate is furnished with a convex *pad*, (F.) *Pelote*, adapted in shape and size to the aperture which it has to close. The spring is covered with leather, and its inner surface is padded; a strap extends from its posterior extremity; passes round the sound side, and is attached to the plate of the pad. This strap is pierced with numerous holes, which allow the patient to tighten or slacken it at pleasure. Trusses have been variously constructed; and different patents obtained for the modifications. They all act upon the above principle. Sometimes they have a double pad.

TRYGODES, Feculent.

TRYPANON, Trepan.

TRYPESIS, Trepanning.

TRYPSIS, Friction.

TSCHERBET, Sherbet.

TSHETTIK, Upas tieuté.

TSIANA, Costus.

TSJAMPACA, Michelia champaca.

TUBA, Tube — t. Aristotelica, Eustachian tube — t. Cæca, Tuba Fallopiana — t. Uterina, Tuba Fallopiana — t. Vocalis, Tube, vocal.

TUBAL PREGNANCY, see Pregnancy, tubal — t. Respiration, see Murmur, respiratory.

TUBE, *Tuba, Trumpet, Salpinx*, (F.) *Trompe*. A name given to some parts which are hollow and have the shape of a trumpet.

TUBE, ALIMENTARY, Canal, alimentary — t. Eustachian, Eustachian tube.

TUBE, FALLO'PIAN, *Tuba Fallopia'na* seu *Fallopii* seu *uteri'na* seu *cæca, Metrosalpinx, Hystérosalpinx, Oviduc'tus mulie'bris, Vas def'erens mulie'ris, Ductus varico'sus* seu *Proces'sus latera'lis* seu *Mea'tus semina'lis* seu *Me'atus semina'rius u'teri, O'viduct, Vector canal*, (F.) *Trompe de Fallope* ou *utérine*, is a canal, floating in the abdomen, and extending on each side from the superior angles of the uterus as far as the sides of the brim of the pelvis. They are 4 or 5 inches long. Near the uterus, they are straight and very narrow; but, in their course, they widen, become tortuous, and terminate by a free, expanded, and *fim'briated extremity*; called, also, *Folia'ceum ornamen'tum, Morsus diab'oli, Infundib'ulum* seu *Digitatio'nes* seu *Fim'briæ* seu *Vexillæ* seu *Lacin'iæ tuba'rum Fallo'pii*, (F.) *Morceau frangé, Pavillon de la trompe, Morceau du diable*. Within, the tubes are hollow and lined by a mucous membrane: the tissue exterior to which is spongy and erectile. The use of the Fallopian tubes is to conduct the sperm to the ovarium, and the fecundated ovum back to the uterus. They establish a communication between the cavity of the peritoneum and that of the

uterus, the abdominal termination being termed *Os'tium abdomina'lē;* the uterine *Os'tium uteri'num.* When the tube embraces the ovary, a funnel-shaped cavity—*Oorol'la infundibuliform'is*—is formed at its extremity, into which the ovule passes.

TUBE, INTESTINAL, Canal, alimentary.

TUBE, ŒSOPHAGE'AL, *Stomach Tube.* A long elastic gum tube, capable of being passed into the œsophagus or stomach.

TUBE, POLLEN, see Pollen.

TUBE, RECTAL, *Defeca'tion tube.* An elastic gum tube, similar to the last, which is sometimes passed into the colon, to remove air from that intestine, or to enable enemata to be thrown up into it.

TUBE, STOMACH, see Tube, œsophageal.

TUBE, VOCAL, *Tuba voca'lis.* The part of the air passages above the inferior ligaments of the larynx, including the passages through the nose and mouth.

TUBER, Hump, Lycoperdon tuber, Tubercle —t. Annulare, Pons varolii—*t. Atloïdo-occipital,* Rectus capitis posticus minor—t. Cervinum, Elaphomyces granulatus —t. Cibarium, Lycoperdon tuber.

TUBER CINE'REUM, *T. C. cum Infundib'ulo.* A grayish tubercle, seen at the base of the brain behind the commissure of the optic nerves, which is continuous with the infundibulum.

TUBER CORPORIS CALLOSI, see Corpus callosum.

TUBER FRONTALE, Frontal protuberance — t. Gulosorum, Lycoperdon tuber — t. Gutturosum, Bronchocele — *t. Ischio-trochantérien,* Quadratus femoris—t. Ischii, see Ischiatic—t. Nigrum, Lycoperdon tuber — t. Parietale, see Parietal Bones —t. Pellagra, Pellagra—t. Tympani, Promontory of the tympanum.

TUBERA TERRÆ, Lycoperdon tuber.

TU'BERCLE, *Tuber'culum, Tuber, Strangal'ion, Stran'galis, Tuber'culous depos'it,* (vulg.) a *Kernel, a Knot,* (F.) *Tubercule.* A tumour in the substance of organs, from the production of new matter; — sensation null; growth sluggish. In *Pathological Anatomy,* the term is generally given to a species of degeneration which consists of an opake matter, of a pale yellow colour: this, in its crude condition, has a consistence analogous to that of concrete albumen: it subsequently becomes soft and friable, and gradually acquires a consistence and appearance analogous to those of pus. Tubercles may be developed in different parts of the body; but they are most frequently observed in the lungs and mesentery. Pulmonary tubercles, *Pneumophy'mata, Tuber'cula Pulmo'num,* (F.) *Tubercules pulmonaires,* are the cause of *Tuber'cular Phthisis. Mesenteric tubercles* are often met with in the same affection, but particularly in *Tabes Meseuterica.* Laënnec classes tubercles among the accidental tissues, which have no resemblance to the natural tissues, and which never exist except in consequence of morbid action. Others consider them as a scrofulous degeneration. Broussais conceives that they are produced exclusively by inflammation of the white vessels, whose existence, however, is more than questionable. When tubercles in any organ are few in number, they may pass to the state of permanent induration without danger to the patient; but when they are very numerous, they usually cause serious mischief. Dr. Baron considers that they are produced by hydatids. The morbid condition which gives rise to the development of tubercles, *Tuberculiza'tion,* is termed *Tuberculo'sis, Morbus tuberculo'sus, Strumosis* seu *Phymato'sis pulmonum,* and *Dyscra'sia Tuberculo'sa.* Tubercles are seen of various forms,—to wit, in fine points, (F.) *Poussière tuberculeuse,* gray and yellow granulations, miliary tubercles; and gray and yellow tubercular masses, softened, and cretaceous.

TUBERCLE, BLACK, Melanosis — t. Painful subcutaneous, see Neuroma.

TUBERCLES OF THE AREOLA, see Mamma.

TUBERCLES, PEARLY, *T. seba'ceous mil'iary, Follic'ular eleva'tions.* Small collections of sebaceous matter in the sebaceous glands or ducts, often seen in the thin skin of the lower eyelids, where they sometimes attain an inconvenient size.

TUBERCLES, SEBACEOUS MILIARY, T. pearly.

TUBER'CULA ARAN'TII, *Cor'pora* seu *Corpus'cula Aran'tii, Tubercles of Arantius* or *Aranzi.* Small eminences at the middle part of the convex edge of the semilunar valves of the pulmonary artery and aorta.

TUBERCULA ARTHRITICA, Calculi, arthritic — t. Cerebri, Encephalophymata—t. Gonorrhoica, Gonorrhœa impura—t. Hepatis, *Hépato-strumosie* — t. Intestinorum, Enterophymata — t. Nervorum nodosa, Ganglions, nervous — t. Parva duræ matris, Glandulæ Pacchioni — t. Peritonæi, Cœliophymata — t. Pulmonum, see Tubercles (of the lungs) — t. Quadrigemina, Quadrigemina Tuberculа.

TUBER'CULAR, *Tuber'culous, Tuberculo'sus, Tuber'culate, Tuber'culated,* (F.) *Tuberculeux, Tuberculé.* That which relates to tubercles, or which is formed by tubercles.

TUBERCULAR or TUBERCULOUS CONSTITUTION or DIATHESIS, *Phthisio'sis,* is the habit of body which predisposes to tubercular phthisis; as *Tuberculous Cachex'ia, Tuberculo'sis, Morbus tuberculo'sus, Dyscra'sia tuberculo'sa,* is the condition of one labouring under tuberculosis.

TUBERCULAR MATTER. A morbid production, contained in cysts, or loose in the tissue of organs. It varies, in its consistence, at the different periods of the tubercular affection: being, at first, compact, and yellowish; at times, calcareous; afterwards pultaceous, semi-fluid, and curdy. See Tubercle.

TUBERCULAR PHTHISIS is that produced by the development of tubercles in the lungs.

TUBERCULAR SORE THROAT, Pharyngitis, follicular.

TUBERCULATE, Tubercular.

TUBERCULATE SARCO'MA OF AB'ERNETHY, *Emphy'ma Sarcoma tuberculo'sum, Tumor tuberculosus.* Tubercles, firm, round, and clustering; pea-sized or bean-sized; yellowish or brownish-red; when large, disposed to ulcerate, and produce a painful, malignant, and often fatal sore. Found chiefly in the lymphatic glands of the neck; often, simultaneously, in other glands and organs.

TUBERCULATED, Tubercular — t. Liver, Cirrhosis.

TUBERCULE, Tubercle.

TUBERCULÉ, Tubercular.

TUBERCULES BIJUMEAUX, Quadrigemina tubercula — *t. des Glandes lymphatiques,* Scrofula — *t. du Foie, Hépatostrumosie* — *t. des Ganglions Mésentériques,* Tabes mesenterica — t. of the Larynx and Fauces, Pharyngitis, follicular — t. Miliary, see Granulation — *t. Pisiformes,* Mamillary tubercles—*t. Pulmonaires,* see Tubercle — *t. Quadrijumeaux,* Quadrigemina corpora.

TUBERCULEUX, Tubercular.

TUBERCULI'TIS. A word of hybrid formation; from *tuberculum,* 'a tubercle,' and *itis,* denoting inflammation. Inflammation of a tubercle or of tubercular masses. — Jos. Frank.

TUBERCULIZATION, see Tubercle.

TUBERCULOSIS, see Tubercle, and Tuberculous Cachexia — t. Laryngis et Tracheæ, Phthisis laryngea — t. Pulmonum, Phthisis pulmonalis — t. Vertebrarum, Vertebral disease.

TUBERCULOSUS, Tubercular.

TUBERCULOUS, Tubercular—t. Deposit, Tubercle — t. Disease of the Lungs, Phthisis pulmonalis — t. Dust, *Poussière tuberculeuse.*

TUBERCULUM, diminutive of *tuber*, Tubercle.

Tuberculum Cine'reum, 'Ash coloured tubercle;' *Fasci'ola cine'rea.* A mass of cineritious substance at the top of the calamus scriptorius, which is continuous below with the posterior horn of cineritious substance in the cord, and upon the sides with the corpus restiforme.

Tuberculum Lacrymale, see Lachrymal puncta — t. Loweri, Lower, tubercle of.

TUBEROSITAS, Tuberosity — t. Tympani, Promontory of the tympanum.

TUBÉROSITÉ BICIPITALE, Bicipital tubercle — *t. Sciatique*, see Ischiatic.

TUBEROS'ITY, *Tuberos'itas*, (F.) *Tubérosité*, from *tuber*, 'a bump.' Anatomists have given this name to an eminence or process, the surface of which is unequal and rough; and which gives attachment to muscles or ligaments.

TUBES OF FERREIN, see Uriniferous Tubes.

TUBI MEMBRANACEI, see Villous membranes.

TU'BULAR, *Tubula'ris*, *Tubulo'sus*, (F.) *Tubuleux*, *Tubulaire.* Same etymon as the next. Relating to or having the form of a small tube. An epithet applied to glands — *Glan'dulæ tubulo'sæ*, which, like those of the stomach, have the shape of small tubes.

Tubular Blowing Sound, see Murmur, respiratory—t. Neurine, see Neurine—t. Substance of the Kidney, see Kidney.

TUBULE, *Tu'bulus;* diminutive of *Tuba*, 'a tube.' A small tube.

TUBULEUX, Tubular.

TUBULI BELLINI, Uriniferous tubes — t. Contorti, see Uriniferous tubes—t. Duræ matris, Sinuses of the dura mater — t. Ferreinii, see Uriniferous tubes — t. Nervei, Nerve fibres — t. Pelvis renum, see Calix—t. Recti, see Rete testis and Uriniferous tubes — t. Seminiferi, see Testicle —t. Seminales, see Testicle—t. Uriniferi Bellini, Uriniferous tubes.

TUBULOSUS, Tubular.

TUBULUS, Cannula — t. Centralis Modioli, see Tractus spiralis foraminulentus.

TUBUS ACUSTICUS, Ear-trumpet — t. Alimentarius, Canal, alimentary — t. Intestinorum, Canal, alimentary—t. Nervorum, Neurilemma—t. Pollinicus, see Pollen — t. Vermicularis cæci, Appendix vermiformis cæci.

TUCKAHO, Lycoperdon tuber.

TUE-CHIEN, Colchicum autumnale.

TULBAG'HIA ALLIA'CEA. A South African plant, *Nat. Ord.* Asphodeleæ, the bulbs of which, boiled in milk, are recommended in phthisis and as an anthelmintic.

Tulbaghia cepa'cea and *T. viola'cea*, serve the same purpose.

TULIP, CAPE, Homeria collina — t. Tree, Liriodendron.

TULIPIER, Liriodendron.

TULIPIFERA LIRIODENDRON, Liriodendron tulipifera.

TUMEFACTIO, Swelling—t. Mollis, Puffiness.

TÚMESCENTIA PITUITOSA, Leucophlegmatia.

TUMEUR, Tumour — *t. Anomale*, see Hæmatodes fungus — *t. Blanche*, Hydrarthrus — *t. Caverneuse*, see Hæmatodes fungus — *t. Encéphaloïde*, Encephaloid — *t. Érectile*, see Hæmatodes fungus—*t. Fongoïde*, Encephaloid—*t. Fongueuse*, Encephaloid — *t. Hémorrhagiale circonscrite*, see Aneurism — *t. Lymphatique des articulations*, Hydrarthrus — *t. Ossivore*, Encephaloid — *t. Pulpeuse*, Encephaloid — *t. Spléniforme*, Encephaloid—*t. Spongieuse*, Encephaloid—*t. Variqueuse*, see Hæmatodes fungus.

TUMOR, Swelling, Tumour—t. Albus, Hydrarthrus—t. Anomalus, Hæmatodes fungus—t. Artuum, Obdormitio—t. Capitis Sanguineus, Cephalæmatoma — t. Carneus, Sarcoma—t. Cysticus, Encystis — t. Cysticus serosus, Hygroma — t. Desmoides, Tumour, fibrous — t. Fibrosus, Tumour, fibrous — t. Ficosus, Ficus — t. Flatulentus, Emphysema — t. Fugax, see Fugacious — t. Fungosus articuli, Spina ventosa — t. Fungosus sanguineus, Hæmatodes fungus—t. Gangliformis, Ganglion, nervous—t. Genarum, Meloncus—t. Genu albus, Genocace—t. Glandulæ parotideæ, Parotidoncus — t. Lacteus, Galactocele — t. Lardeus, Steatoma — t. Malarum, Meloncus — t. Ovarii, Oarioncus — t. Parotidis, Parotidoncus — t. Prostatæ, Prostatoncus—t. Renalis, Nephroncus—t. Sanguineus, Hæmatoma—t. Squamiformis carnosus, Lepidosarcoma — t. Tuberculosus, Tuberculate sarcoma — t. Tunicatus, Encystis — t. Uteri, Hysteroncus.

TUMOUR, from *tumeo*, 'I swell;' *Tumor*, *Oncos*, *Oncus*, *Epar'ma*, *Eparsis*, *Emphy'ma*, *Exorescen'tia* (Sauvages), *Ecphy'ma*, (Sc.) *Swalme*, (F.) *Tumeur.* A rising or prominence, of greater or less size, developed by a morbific cause in some part of the body. Cullen defines a tumour to be "a partial swelling without inflammation." Sauvages restricts the term to a rising formed by the congestion of a fluid; and he calls *excrescences* those which have a fleshy or osseous consistence. Boyer defines it "any preternatural eminence developed on any part of the body." Good uses it synonymously with tubercle. Boyer's is the best general definition. Tumours differ greatly from each other; according to their seat, the organs interested, their nature, &c.

The French use the term *Tumeur blanche* synonymously with *White Swelling;*—see Hydrarthrus. The term is, however, applied by the generality of surgeons to swellings of the greater joints, without change of colour of the skin, and of a more or less firm consistence, which are dependent upon disease of the osseous or of the soft parts about the joint.

Scrofula is the most common cause of these affections.

Tumour, Cellulo-Fibrous, Tumour fibro-cellular — t. Epithelial, see Epithelial.

Tumour, Fibro-Cel'lular, *Cellulo-fibrous tumour.* A soft and elastic form of fibrous tumour, a variety of the *gelatinous sarcoma* of Rokitansky, of which the softer kind of polypus of the nose is an example.

Tumour, Erec'tile. A tumour produced by the development of a soft, vascular tissue, which is susceptible of elevation and depression. See Erectile.

Tumour, Fibro-Plastic, Sarcoma.

Tumour, Fibrous, *Fibrous growth*, *Fibro'ma*, *Fibroid*, *Ino'ma*, *Tumor fibro'sus* seu *desmoïdes*, *Inohylo'ma.* A tumour or growth formed of fibrous tissue.

Tumour, Laminated Nacreous Fatty, Cholesteatoma—t. Milk-like, Encephaloid—t. Phantom, see Fantom.

Tumour, Var'icose, *Tumor varico'sus.* A circumscribed, bluish tumour, formed by the dilatation and turgescence of the capillary vessels of a part.

Tumour, Vascular, see Hæmorrhois and Nævus.

TUNAS, see Cactus opuntia.

TUNBRIDGE, MINERAL WATERS OF. A celebrated acidulous chalybeate in Kent, England, a few miles distant from the village of Tunbridge, and thirty-six miles south of London, which is much frequented. It contains carbonic acid, carbonate of iron, and sulphate of magnesia.

TUNDA OCULI, Conjunctiva membrana.

TUNDUS CORDIS, Mucro cordis.

TUNIC, *Tu'nica, Chi'ton*, a *coat*. An envelope. A name given to different membranes, which envelop organs; as the tunics or coats of the eye, stomach, bladder, &c.

TUNICA ACINALIS, Uvea — t. Aciniformis, Uvea — t. Acinosa, Uvea — t. Adnata, Conjunctiva—t. Adventitia, see Artery—t. Agnata, Conjunctiva — t. Alba oculi, Sclerotic—t. Albuginea, Albuginea, see Kidney—t. Albuginea oculi, Sclerotic — t. Allantoides, Allantois — t. Arachnodes, Arachnoid membrane — t. Aranea, Arachnoid membrane—t. Caduca, Decidua—t. Candida oculi, Sclerotic — t. Carnosa, Panniculus carnosus — t. Cellularis, see Artery—t. Conjunctiva, Conjunctiva—t. Costalis, Pleura — t. Crassa, Decidua—t. Crystallina, Arachnoid membrane — t. Dartos, see Dartos—t. Dura oculi, Sclerotic—t. Durior et crassa, Sclerotic—t. Elastica, see Artery—t. Elytroides, Vaginal coat — t. Erythroides, Cremaster—t. Exterior ovi, Decidua—t. Externa, see Artery—t. Extima oculi, Sclerotic—t. Farciminalis, Allantois — t. Fibrosa, see Folliculi Graafiani —t. Filamentosa, Decidua—t. Glabra, see Artery.

TUNICA GRANULO'SA. An investment of the ovum exterior to the zona pellucida, described by Dr. Barry, but the existence of which, as a structure, distinct and independent from the membrana granulosa, is denied.

TUNICA HORTENSIS, Dianthus caryophyllus — t. Innominata oculi, Sclerotic — t. Interna oculi, Retina—t. Intima, see Artery.

TUNICA JACO'BI, *Membra'na Jaco'bi, Jacob's coat* or *membrane*. A highly delicate serous membrane, interposed between the retina and the choroid coat, discovered by Dr. Jacob, of Dublin. Its structure is curious, being composed of cylindrical, transparent, highly refractive staff-shaped bodies, and hence called *Stratum bacillo'rum* seu *bacilla'tum, Ba'cillar layer of the retina*, which are arranged perpendicularly to the surface of the retina, their outer extremities being imbedded, to a greater or less depth, in a layer of the pigmentum nigrum.

TUNICA MEDIA, see Artery — t. Muscularis, Dartos — t. Nervea oculi, Retina — t. Nervorum, Neurilemma — t. Perforata, Uvea — t. Prætensa abdominis, Peritonæum — t. Propria, see Kidney — t. Reticularis, Retina — t. Retiformis, Retina — t. Rhagoides, Choroïdea tunica, Uvea — t. Rubicunda scroti, Dartos — t. Rubra, Dianthus caryophyllus — t. Ruyschiana, see Choroid — t. Subcostalis, Pleura — t. Thoracis, Corset — t. Uvalis, Uvea — t. Uvea, Uvea — t. Uviformis, Uvea — t. Vaginalis, see Vaginal — t. Vaginalis Linguæ, see Tongue — t. Vaginalis Propria, Vaginal coat of the Testicle — t. Vaginalis reflexa, Vaginal coat of the Testicle — t. Vaginalis testis, see Testicle—t. Vasculosa oculi, Choroid, see Eye.

TUNICA VASCULO'SA TESTIS, *Pia mater testis*. An extremely delicate membrane, consisting of minute ramifications of the spermatic vessels united by areolar tissue, which separates the lobules of the testis from each other. It is situate immediately within the tunica albuginea, and encloses the substance of the gland. It sends processes inward that separate the lobules, in the same manner as the pia mater is reflected between the convolutions of the brain.

TUNICA VITREA, Hyaloid membrane.

TUNICULA, Clitoris.

TUNIQUE ALBUGINÉE, Albuginea — *t Commune de Bichat*, Endangium.

TUN'NELLING. A term, sometimes employed for the treatment of stricture of the urethra, by making pressure upon it from within so as to promote its removal by absorption.

TUNNYFISH, SALTED, Omotarichos.

TUPHLO-ENTERITIS, Typhlo-enteritis.

TUPHUS, Typhus.

TUPINARIA, Talpa.

TURBA HÆMORRHOIDALIS, see Hæmorrhois.

TURBATIONES ANIMI, Affections of the mind.

TUR'BINATED BONES, *Ossa turbina'ta*. Bones shaped like a top; from *turbo, turbinis* or *turben*, 'a top;' *Ossa spongio'sa, O. ter'tia maxillæ superio'ris, Cornua, Conchæ na'rium* seu *ven'eris, Tur'bines nasi* seu *na'rium, Conchy'lia, Bucci'na, Lam'inæ spongio'sæ nasi*, (F.) *Cornets*. Very thin, bony plates, rolled up in the form of horns, and situate in the nasal fossa. 1. *Os spongio'sum supe'rius* or *Cornet de Morgagni*; — the highest. 2. *Os spongiosum me'dium*, the *middle cornu* of French anatomists,—the *ethmoïd'al cornu* or *Os spongiosum superius* seu *turbinatum*, of English anatomists, *Os convolu'tum superius, Concha, C. na'rium superior* seu *Morgagnia'na*, (F.) *Cornet moyen*. This bone projects inwards and downwards into the cavity of the nose, from the ethmoid cells at the side of the nasal lamella, and serves to enlarge the organ of smell. It is convex towards the septum, and concave outwards. 3. *Os spongiosum* seu *turbinatum inferius, Concha inferior, Convolu'tum inferius os, Os sous-ethmoïdal* (Ch.), projects at the under part of the side of the nose, is convex towards the septum, and concave outwards. It is connected to the os maxillare, os palati, and os unguis. 4. *Sphenoïd'al cornu*.

All the turbinated bones extend the olfactory surface.

TURBINES NASI SEU NARIUM, Turbinated bones.

TURBITH BLANC, Globularia alypum — t. Mineral, Hydrargyrus vitriolatus — t. Montpellier. Globularia alypum—*t. Noir*, see Hydrargyri oxydum cinereum — t. Plant, Convolvulus turpethum.

TURBO CEREBRI, Pineal gland.

TURGENTIA, Turgescence.

TURGES'CENCE, *Turges'cency, Turgid'ity, Tur'gidness, Turgescen'tia, Turgen'tia, Orgas'mus*, from *turgescere*, 'to begin to swell,' *turgere*, 'to swell.' Superabundance of humours in a part. The term *Turgescence of Bile* was formerly used to denote the passage of that fluid into the stomach, and its discharge by vomiting. A vital action of turgescence or expansibility — *Turgor vita'lis* — has been presumed to exist in certain organs, as in the capillaries; but the generality of physiologists do not admit it.

TURGESCENTIA, Turgescence.

TURGESCEN'TIA VESIC'ULÆ FELL'EÆ, *Asci'tes Hep'ato-cys'ticus, Physco'nia* seu *Cystoce'lè bilio'sa, Hepatal'gia Petitia'na, Hydrocholecys'tis, Hydrops vesi'cæ fell'eæ*, (F.) *Hydropisie de la Vésicule du Fiel, Distension de la Vésicule du Fiel, Cholicystiectasie*. Distension of the gall-bladder by bile.

TURGIDITY, Turgescence.

TURGIDNESS, Turgescence.

TURGOR VITALIS, see Turgescence.

TURMERIC, Curcuma longa, Sanguinaria Canadensis.

TURN OF LIFE, see Menses.

TURNING, *Versio* from (F.) *tourner*, 'to turn.' (F.) *Version*.

VERSIO FŒTÛS. The operation of bringing

down the feet, or some part of the lower extremity, when the presentation of the child is such that it cannot be delivered by the natural efforts.

TURNIP, Brassica rapa — t. Dragon, Arum triphyllum — t. Indian, Arum triphyllum — t. Pepper, Arum triphyllum.

TURNS, Menses.

TURPENTINE, Terebinthina — t. Bordeaux, see Pinus sylvestris—t. Briançon, see Pinus cembra — t. Chio, see Pistacia terebinthus — t. Common, see Pinus sylvestris—t. Common, American, see Pinus sylvestris — t. Cyprus, see Pistacia terebinthus—t. Damarra, see Pinus damarra — t. Dombeya, see Dombeya excelsa — t. Horse, see Pinus sylvestris — t. Strasburg, see Pinus picea.

Turpentine Tree, Pistacia terebinthus.

Turpentine, Venice, see Pinus larix — t. Venice, true, see Pistacia terebinthus—t. White, see Pinus sylvestris.

TURPETHUM, Convolvulus turpethum — t. Minerale, Hydrargyrus vitriolatus — t. Nigrum, Hydrargyri oxydum cinereum.

TURQUETTE, Herniaria glabra.

TURQUOISE. This stone has been long imagined to change its colour, according as the wearer is at the time in good or bad health: — a superstitious notion.

TURTLE BLOOM, Chelone glabra—t. Green, Chelonia mydas — t. Head, Chelone glabra.

TURUNDA, Tent.

TURUN'DÆ ITAL'ICÆ. Pastes made of the finest and most glutinous wheat — known under the names of *Maccaroni, Vermicelli* and *Italian* or *Cagliari paste.*

TURUNDULA, Tent.

TUSCARORA ACID SPRING, see Canada, mineral waters of.

TUSSACA RETICULATA, Goodyera pubescens.

TUSSEDO, Tussis.

TUSSICULA, Tussis.

TUSSIC'ULAR, *Tussicula'ris, Tussicnlo'sus,* from diminutive of *tussis,* 'a cough.' Relating to a cough, or to a slight cough.

TUSSICULOSUS, Tussicular.

TUSSILA'GO, *T. Far'fara* seu *vulga'ris,* from *tussis,* 'a cough,' which it relieves; *Be'chium, Be'chion, Cal'ceum equi'num, Chamæleu'cē, Chamægei'ron, Fil'ius ante patrem, Farfarel'la, Galliomarchus, Farfara, F. Be'chium, Un'gula caballi'na, Coltefoot, Foal-foot,* (F.) *Pas d'âne, Herbe de Saint-Quirin. Ord.* Compositæ. *Sex. Syst.* Syngenesia Polygamia Superflua. It is demulcent and expectorant, and has been used in coughs, and pulmonary affections in general, and in some cutaneous diseases.

Tussilago Farfara, Tussilago — t. Hybrida, T. petasites.

Tussilago Petasi'tes, *T. hy'brida* seu *petasites hermaphrodi'ta, Petasites, P. major* seu *rubens* seu *officina'lis* seu *hy'bridus* seu *vulga'ris, Butterbur, Pestilent-wort.* The roots of this plant have been recommended as aperient and alexipharmic. They have a strong smell; and a bitterish, acrid taste, of the aromatic kind, but not agreeable.

Tussilago Petasites Hermaphrodita, T. petasites — t. Vulgaris, Tussilago.

TUSSIS — diminutive, *Tussic'ula; Begma, Bex, Tusse'do, Bexis, Tussis nervo'sa, Cotar'rhus, Pneusis Tussis, Cough, Coughing,* (Prov.) *Couf,* (Sc.) *Host, Hoast, Hoist,* (F.) *Toux.* A violent, sonorous, frequent, and short expiration, by means of which the air, in passing rapidly through the bronchia and trachea, carries along with it the mucus of the parts, which forms the sputa. The cough is said to be *dry,* when unaccompanied by expectoration. It is symptomatic of many diseases. See Bronchitis.

Tussis Amphemerina, Pertussis — t. Asinina, Pertussis—t. Bronchica, Cough, tubal, see Bronchitis—t. Canina, Pertussis — t. Catarrhalis Simplex, Catarrh — t. Clamosa, Pertussis — t. Clangosa, Pertussis — t. Convulsiva, Pertussis — t. Delassans, Pertussis — t. Ferina, Pertussis — t. Pueros strangulans, Pertussis — t. Quinta, Pertussis—t. Senilis, Bronchitis (chronic) — t. Spasmodica, Pertussis — t. Stomachalis, Pertussis — t. Suffocans, Pertussis — t. Suffocativa, Pertussis — t. Tussiculosa, Pertussis.

TUSSIVE; *Tussi'vus;* from *tussis,* 'cough.' Belonging or relating to cough:—as *tussive* vibration; the vibration of the parietes of the chest, caused by coughing.

TUTAM'INA, pl. of *Tutamen,* 'a defence,' 'a protection,' from *tutare,* 'to defend.' Parts are so called which defend or protect each other.

Tutamina Cer'ebri are the scalp, pericranium, bones of the skull, and the meninges.

Tutamina Oc'uli are the eyebrows, eyelids, and lachrymal apparatus.

TUTENAG, Zincum.

TUTHIA, Tutia.

TU'TIA, *Pom'pholyx, Cadmi'a, Alfasa, Mesera, Capni'tis, Tuthia, Ox'ydum zinci impu'rum.* The oxyd of zinc that attaches itself to the chimneys of furnaces in which ores of zinc are smelted. It is in the form of gray incrustations; and is sometimes used for making an eye-salve. It is prepared, for this purpose, by levigation.

TUTTERING, Stuttering.

TWIGG'S HAIR DYE, see Hair dye.

TWIN, Gemellus.

TWINGE, see Pain.

TWINKLING OF THE EYE, Nictation.

TWINLEAF, COMMON, Jeffersonia Bartoni.

TWINROOT, Orchis.

TWINS, SIAMESE. Two brothers, Chang and Eng, connected by means of a ligamentous band passing from the epigastrium of one to that of the other, who were exhibited in various parts of Europe and America, about the year 1830. They have lived in North Carolina, are married, and have children. See Xiphopages.

TWITCH-GRASS, Triticum repens.

TWITCHING, Tic.

TYCH'ICA, from *τυχη,* 'accident.' Fortuitous lesions or deformities. The 7th class of Good's *Nosology.*

TYLE, Callosity.

TYLOMA, Callosity.

TYLOPH'ORA ASTHMAT'ICA, *Ascle'pias asthmat'ica, Cynan'chum Ipecacuan'ha* seu *vomito'rium* seu *viridiflo'rum* seu *tomento'sum, Ipecacuanha of the Isle of France,* (F.) *Ipecacuanha blanc de l'Ile de France. Order,* Asclepiadaceæ. A native of various parts of the East Indies, both of the continent and islands. The root is acrid, and is used on the coast of Coromandel as a substitute for ipecacuanha. In large doses, it is emetic; in smaller, often repeated, it is cathartic. It is recommended, also, as a diaphoretic, and especially in humeral asthma.

TYLOSIS, Callosity.

TYLUS, Callosity.

TYMMA, Wound.

TYMPAN, Tympanum.

TYMPANAL, Tympanic.

TYMPANAL, Cadre du tympan.

TYMPANIA, Tympanites.

TYMPANIAS, Tympanites.

TYM'PANIC, *Tympan'icus, Tym'panal,* (F.) *Tympanique;* same etymon as Tympanum. Relating to the tympanum, as 'tympanic canal.'

Tympanic Nerve, see Petrous ganglion.

TYMPANIQUE, Tympanic.

TYMPANITA, Tympanites.

TYMPANITE, Tympanites.

TYMPANI'TES, *Emphyse'ma* seu *Pneumato'sis Abdom'inis*, *Hydrops Tympanites*, *Affec'tio tympanii'tica*, *Ectympano'sis*, *Hydrops abdominis aëreus*, *Aëro'sis*, *Aëro-enterecta'sia*, *Aërenterecta'sia*, *Enteraërecta'sia*, *Physocœ'lia*, *Tympano'sis*, *Physe'ma*, *Physe'sis*, *Hydrops siccus et flatulentus*, *Tympa'nia*, *Tympa'nias*, *Tympani't'ta*, *Tympani'tis*, *Emphyse'ma Tympanites*, *E. Tympanii'tcum*, *Meteorism'us*, *Tym'pany*, *Me'teorism*, *Wind dropsy*, (F.) *Tympanite*, *Pneumatose péritonéale*, *Ballonnement*, from *τυμπανον*, 'a drum;' so called because the abdomen is distended with wind, and sounds like a drum when struck. A swelling of the abdomen, caused by accumulation of air in the intestinal tube or in the peritoneum. Tympanites may be idiopathic or symptomatic. The former depends upon exhalation of air from the inner surface of the intestine, or from the decomposition of substances contained in it; the latter is the result of some organic affection, and often depends upon obliteration of the digestive tube, which prevents the gas from escaping. Idiopathic tympanites may be more readily cured. The symptomatic is usually fatal. On dissection in such cases, the stomach and intestines are found enormously distended; with strangulation or disorganization of some part of the mucous membrane of the intestine. Carminatives may be proper when tympanites depends upon atony of the digestive organs: but, in cases of the symptomatic kind, they cannot be productive of advantage, and may do harm.

Sometimes the air is contained in the cavity of the peritoneum—constituting *Tympani'tes abdomina'lis*, *Aéropéritonie*, of some:—the accumulation in the intestines being called *Tympani'tes intestina'lis*.

TYMPANITES, UTERINE, Physometra.

TYMPANI'TIS, *Inflamma'tio tym'pani*; from *τυμπανον*, 'a drum,' and *itis*, denoting inflammation. Inflammation of the lining membrane of the middle ear. Also, tympanites.

TYMPANOSIS, Tympanites.

TYM'PANUM, *τυμπανον*, 'a drum.' The *Drum* or *barrel of the ear*. The names *Cavity of the Tympanum* or *of the Drum*, *Cav'itas seu Cavum Tym'pani*, *Antrum* seu *cavitas antro'sa Auris*, (F.) *Tympan*, *Cavité du tympan*, *Caisse du tambour* ou *du Tympan*—have been given to a cavity of an irregular shape, which constitutes the middle ear, and has been compared to a drum. It is situate in the pars petrosa of the temporal bone, between the meatus auditorius externus and the labyrinth. This cavity is lined by a mucous membrane; and communicates, externally, by means of the Eustachian tube, which is situate between it and the pharynx. The tympanum has six parietes. 1. An *external*, which is almost entirely formed of the *Membrane of the Drum*, *Membra'na tym'pani*, *Diaphrug'ma* seu *Mediasti'num* seu *Tegmen'tum auris*, *Myrin'ga*, *Myrinx*, (F.) *Membrane du tympan*—a species of thin, transparent, circular septum; convex within, and concave without, which closes the inner extremity of the meatus auditorius. 2. An *internal*, on which are the *Fenes'tra ova'lis*, *Prom'ontory*, and *Fora'men rotun'dum*. 3. A *superior*. 4. An *inferior*, on which is the *glenoid fissure*. 5. A *posterior*, on which are the opening of the mastoid cells, and the pyramid. 6. An *anterior*, on which are the *Proces'sus cochleaform'is* and the inner orince of the *Eustachian tube*. The cavity of the tympanum is crossed by a series of four small bones, articulated with each other by diarthrosis, moved by certain muscles, and representing a kind of bent lever extending from the membrana tympani to the fenestra ovalis. They are called the *Bones* or *Ossicles of the Ear*, and are the malleus, incus, os orbiculare, and stapes.

For the nervous plexus of the tympanum, see Petrosal Ganglion, and Otic Ganglion.

TYMPANUM MINUS, see Fenestra — t. Secundarium, see Fenestra.

TYMPANY, Tympanites — t. of the Womb, Physometra.

TYPE, *Typus*, *Periodus morbi*, from *τυπος*, 'a stamp,' itself from *τυπτω*, 'I strike.' The *type* is the order in which the symptoms of a disease exhibit themselves, and succeed each other. It may be continued, intermittent, or remittent.

TYPHA ANGUSTIFOLIA has the same properties as

TYPHA AROMATICA, Acorus calamus, and

TYPHA LATIFOLIA, (*τυφος*, 'a marsh,' [?]). *Cattail Reed mace*, *Bulls-egg*, (F.) *Massette*, *Masse* ou *Quenouille d'Eau*. A plant common in marshes and ponds, in this country and Europe. *Ord.* Typhaceæ. *Sex. Syst.* Monœcia triandria. Its roots have been used in dysentery and blennorhagia. The young shoots, before they reach the surface of the water, when boiled, taste like asparagus.

The down, (F.) *Aigrette*, *Poils*, which accompanies the flowers, has been applied to burns like cotton.

TYPHICUS, Typhoid.

TYPHIQUE, Typhoid, Typhus.

TYPHLITIS, Typhlo-enteritis.

TYPHLO-ENTERI'TIS, *Typhlo-enteri'tis*, *Typhli'tis*, *Typhloteri'tis*, *Inflamma'tio Cæci*, *Phleg'monous Tumour of the Cæcum*, (F.) *Inflammation du Cæcum*, *Cæcite* (Piorry); from *τυφλος*, *cæcus*, and *enteritis*, 'inflammation of the intestines.' Inflammation of the cæcum, occasionally leading to perforative ulceration.

TYPHLOENTERUM, Cæcum.

TYPHLOPS, Cæcus.

TYPHLOSIS, Cæcitas.

TYPHLOTERITIS, Typhlo-enteritis.

TYPHLOTERON MONOCOLON, Cæcum.

TYPHLOTERUM, Cæcum.

TYPHLOTES, Cæcitas.

TYPHODES, Typhoid.

TYPHOÉMIE ENTÉRIQUE, see Typhus.

TYPHOHÆMIA, see Putrefaction.

TYPHOID, *Typhoïdes*, *Typho'des*, (*τυφωδης*, 'stupefied,') *Ty'phicus*, *Typhos'us*, *Lac'tica*, (F.) *Typhique*, *Typhoïde*, *Typhode*. From *typhus*, and *ειδος*, 'resemblance.' Appertaining to or resembling typhus; as *Typhoid Fever*. Also, according to some, *Typhous Fever*, typhus. Fuchs has employed the word *Typhoïde* for a family of diseases, to distinguish them from *Phlogoses*; of this family, *Stomacace*, *Pharyngocace*, and *Pneumocace* are examples.

TYPHOID AFFECTION, see Typhus — t. Fever of India, Cholera.

TYPHOMA'NIA, from *τυφος*, 'stupor,' and *μανια*, 'delirium.' *Delirium with stupor*, *Subdelir'ium*. The kind of delirium common in typhus.

TYPHOMANIA, Coma vigil, Insomnia.

TYPHONIA, Coma vigil.

TYPHOSEPSES, Typhoseptoses.

TYPHOSEPTO'SES, *Typhosep'ses*, from *τυφος*, and *σηψις*, 'putrefaction.' Typhous affections.

TYPHOSUS, Typhoid.

TYPHOUS, *Typhos'us*, (F.) *Typhique*. Same etymon as Typhus. Belonging or relating to typhus.

TYPHOUS DEPOS'IT. A peculiar substance of new formation found in the areolar membrane, between the mucous and muscular coats of the patches of Peyer in typhoid fever.

TYPHOUS FEVER, see Typhoid.

TYPHUS, *Semipes'tis, Typhus, Febris Typho'des* seu *asthen'ica* seu *adynam'ica, Asthenop'yra,* (F.) *Fièvre adynamique* ou *ataxique* ou *adynamique ataxique, Typhus d'Europe;* from τυφος, 'stupor.' A fever characterized by small, weak, and unequal, but usually frequent pulse, with great prostration of strength, and much cerebral disturbance; its duration being usually from a fortnight to three weeks or longer. It is continued fever, accompanied with great cerebral irritation and prostration. (See Fever.) By most writers, this disease has been divided into two varieties—the *Typhus mitior* and *Typhus gravior.*

TYPHUS MIT'IOR seu *simplex* seu *nervo'sus* seu *comato'sus, Fe'bris lenta nervosa* seu *pu'trida nervosa* seu *hec'tica malig'na nervosa, Blechrop'yrus, Neurop'yra, Neuropyr'etus, Nervous Fever,* (F.) *Fièvre nerveuse,* is characterized by slight shiverings, heavy, vertiginous headach; great oppression, peculiar expression of anxiety, nausea, sighing, despondency, and coma or quiet delirium.

TYPHUS GRA'VIOR seu *car'cerum* seu *castren'sis* seu *anthropophthor'acus* seu *contagio'sus exanthemat'icus* seu *nostras* seu *Europæ'us* seu *commu'nis* seu *bel'licus* seu *exanthemat'icus* seu *Hiber'nicus* seu *petechia'lis, Febris nervo'sa epidem'ica* seu *nervosa exanthemat'ica* seu *malig'na cum sopo'rē* seu *nervo'sa petechia'lis* seu *pestilentia'lis Euro'pæ* seu *puncticula'ris* seu *sæpropyra* seu *car'cerum et nosocomio'rum* seu *putrida* seu *con'tinens pu'trida* seu *contin'ua pu'trida* seu *pes'tilens malig'na* seu *nau'tica pestilentia'lis* seu *petechia'lis, Septop'yra, Porphyrotyphus, Pulicularis morbus, Pestis bel'lica, True* or *Exanthemat'ic* or *conta'gious typhus, Nervous fever with exanthem'atous eruption, Putrid, Jail, Hospital* or *Ship Fever,* (F.) *Fièvre des Camps, F. nautique, F. d'hôpital, F. nosocomiale, F. des Prisons, F. lenticulaire, Typhus contagieux* is attended with rigors and heat, alternating; little or no perspiration; pulse, tense and hard, usually quick, but fluttering; pain over the forehead and vertex; a '*mulberry rash,*' appearing on the fifth to the seventh day of the disease, and lasting till the end; delirium succeeded by stupor, signs of incipient putrescency,—as true petechiæ, vibices, hemorrhages, &c. Typhus, under particular circumstances, seems to be communicable by contagion; but if proper attention be paid to cleanliness and ventilation, there is not much danger of communication. The general principles of treatment, laid down under the head of Fever, are applicable here. All the varieties of continued fever resemble each other in the cardinal points, although they may differ in many of their characters. Ventilation and cleanliness; warm or cold ablution or sponging; keeping the bowels free; and attending to symptoms as they may rise, with the avoiding of all irritation of every kind, are the main indications. When symptoms of great prostration occur, the strength must be supported by wine; and tonics be exhibited, with the mineral acids. Of the tonics, the sulphate of quinia is perhaps as good as any, whilst it is free from the objection which applies to most others.—of being too bulky. In the whole management of this affection, however, the physician has to discriminate carefully between oppression and prostration. The former may require evacuants; the latter cannot.

Of late years, it has been maintained by many, that there is an essential difference between typhoid fever and typhus; that the former is an abdominal affection, and dependent upon, or connected with, an inflamed or ulcerated condition of the mucous follicles of the intestines; hence it has received the names *Fièvre mésentérique, F. typhoïde, Maladie* ou *Affection typhoïde, F. entéro-mésentérique, Entérite typho-hémique, Typhoémie entérique, Entéro-mésentérite typhoïde, Exanthème intestinale, Dothinentérie, Dothinentérite,* &c., *Ileodiclidite, Entérite folliculeuse, Gastro-entérite* with nervous affection of the brain, *Follicular gastro-enteri'tis, F. enteritis, Enteri'tis follicula'sa, Typhus abdomina'lis, T. intestina'lis, T. Sporad'icus, Enterotyphus, T. gangliona'ris abdomina'lis, Febris intestina'lis ulcero'sa, F. nervo'sa gas'trica, F. nervo'sa enter'ica, F. enter'ica, F. nervo'sa mesenter'ica, Enterhelio'sis nervo'sa, Typhus enter'icus, Ileop'yra, Ileoty'phus, Typhoid affection, Enter'ic fever.* Accompanying this form of fever there is generally a typhoid eruption, consisting of rose-red papulæ, (see Spots, red,) which appear mostly on the abdomen. They are distinct from true petechiæ, as they can be removed by pressure; and distinct also from sudamina, which are perhaps the universal accompaniments of sweating, and are consequently a variety of miliaria. The common continued fever or synochus of Great Britain, and of this country, has been presumed by some to be this variety: but farther observations are needed to establish the distinctions which have been attempted; and there is reason to believe, that the abdominal affection is a complication, existing in certain cases and epidemics of adynamic fever, and not in others. The *Red Tongue Fever* of Kentucky is considered by Professor Bartlett to be typhoid fever.

Certain modern French writers have considered the Typhus of the European continent, *Typhus of Europe, pestilential fever, contagious typhus, Hungary fever, Hospital fever, camp fever, jail fever, lenticular petechial fever,* (F.) *Peste d'Europe,* &c., to be identical with the typhoid affection. They admit but one fever on the European continent — the typhoid. Typhus, they maintain — but by no means establish the position — to be peculiar to England.

TYPHUS ABDOMINALIS, see Typhus — *t. d'Amérique,* Fever yellow — t. Anthracicus, Plague — t. Anthropophthoracus, Typhus — t. Aphthoideus, Aphthæ — t. Bellicus, Typhus — t. Bengalensis, Cholera — t. Vesicularis, Pemphigus.

TYP'IC, *Typ'ical, Typ'icus,* (F.) *Typique.* Same etymon as *Type.* Characterized by periodicity, — as a '*typical* fever;' or one which observes a particular type.

TYPOSES, see Periodicity.

TYPUS, Type.

TYRANNUS, see Critical days.

TYRBASIA, Agitation.

TYRBE, Agitation.

TYREM'ESIS, *Tyrotem'esis,* from τυρος, 'cheese,' and εμεσις, 'vomiting;' *Tyro'sis, Tyreu'sis.* Vomiting of curdy matter, in infants especially.

TYREUSIS, Tyremesis, Tyrosis.

TYRIA, Porrigo decalvans.

TYRIASIS, Elephantiasis Arabica.
TYRINE, Casein.
TYRODES, Cheesy.
TYROMA, Porrigo decalvans.
TYROS, Cheese.
TYROSIS, Tyremesis. Also, the curdling of milk in the stomach; *Tyreu'sis.*
TYROTEMESIS, Tyremesis.

U.

UBERIS APEX, Nipple, Papilla.
ULA, Gingivæ.
ULATROPHI'TA, from *ουλον*, 'the gum,' and *atrophia*, atrophy. Shrinking of the gums; falling away of the gums.
ULCER, *Ulcus*, genitive *Ulceris*, diminutive *Ulcus'culum*; *Hulcus*, 'ελκος, *Helcos*, *Elco'sis*, *Elco'ma*, *Helcus*, *Helco'ma*, a *Sore*, (Sc.) *Sair*, (Prov.) *Kile*, (F.) *Ulcère*. A solution of continuity in the soft parts, of longer or shorter standing, and kept up by some local disease or constitutional cause. Richerand makes four great distinctions between a wound and an ulcer. 1. A wound arises from the action of an extraneous body: — the cause of an ulcer is inherent in the economy. 2. A wound is always idiopathic: — an ulcer is always symptomatic. 3. A wound has essentially a tendency to heal, because the action of its cause has been momentary: — an ulcer, on the contrary, has a tendency to enlarge, because its cause persists. 4. The treatment of a wound is purely surgical; that of an ulcer is medical as well. The immediate cause of an ulcer is perverted nutrition; the formative cells losing their plastic properties. Ulcers have been variously divided, according to their nature; — into *simple*, *sinuous*, *fistulous*, *fungous*, *gangrenous*, *scorbutic*, *syphilitic*, *cancerous*, *inveterate*, *scrofulous*, *phagedenic*, *virulent*, *cacoëthic*, *sordid*, *carious*, *varicose*, &c. The treatment consists in removing, by appropriate means, the internal and the local causes which keep up the ulceration, and in exciting the vessels of the part, where necessary, by appropriate bandaging, &c.
ULCER, Jacob's, Lupus — u. Malignant, Hospital gangrene — u. Putrid, Hospital gangrene — u. Warty of Marjolin, see Warty Tumour of Cicatrices.
ULCERA INTESTINALIA, Gastrelcosis — u. Laryngis, Phthisis laryngea — u. Serpentia oris, Aphthæ — u. Uteri, see Metrophthisis — u. Ventriculi, Gastrelcosis — u. Vesicæ, Cystophthisis.
UL'CERATED, *Ulcera'tus*, *Exulcera'tus*, *Helco'des*, (F.) *Ulcéré*; from *ulcus*, *ulceris*, 'an ulcer.' In the state of an ulcer. Affected with ulcers.
ULCERATIO INTESTINALIS, Enterelcosis — u. Ventriculi, Gastrelcosis.
ULCERA'TION, *Ulcera'tio*, *Exulceratio*, *Pyogen'ia corrosi'va*. Same etymon. A superficial ulcer. The formation of an ulcer — *Exelco'sis*, *Elco'sis*, and *Helco'sis*.
UL'CERATIVE, *Ulcerati'vus*, (F.) *Ulcératif*. Relating to ulceration, — as an '*ulcerative* process.'
ULCÈRE, Ulcer — *u. du Larynx*, Phthisis laryngea.
ULCÉREUX, Ulcerous.
UL'CEROUS, *Ulcero'sus*, *Helco'des*, *Helcoïdes*, (F.) *Ulcéreux*. Same etymon. Having the character of an ulcer. Affected with ulcers.
ULCERS, EGYPTIAN, Ægyptia ulcera.
ULCUS, Ulcer — u. Atonicum, Rupia — u. Cacoëthes, Cacoëthes — u. Cancrosum, Cancer, Chancre — u. Dacryodes, see Dacryodes — u. Depascens, Phagedenic ulcer — u. Ferinum, Phagedenic ulcer — u. Fistulosum, Hypophora — u. Hypulum, see Hypulus — u. Narium fœtens, Ozæna — u. Obambulans, Phagedenic ulcer — u. Pulmonum, Phthisis pulmonalis — u. Sinuosum, Hypophora — u. Syriacum, Cynanche maligna — u. Telephium, Telephium — u. Tuberculosum, Lupus — u. Uteri, Hysterelcosis, Leucorrhœa.
ULCUSCULA PRÆPUTII, Herpes præputii.
ULCUSCULUM, Ulcer — u. Cancrosum, Chancre.
ULE, Cicatrix.
ULETICUS, Gingivalis.
ULICUS, Gingivalis.
ULI'TIS, from *ουλος*, 'solid,' (*σαρξ ουλη*, 'solid flesh:') hence, *ουλον*, 'the gum,' and *itis*, denoting inflammation. *Ouli'tis*, *Inflamma'tio gingi'væ*, *Periodonti'tis gingiva'rum*, (F.) *Gengivite*, *Inflammation des gencives*, from *ουλον*, 'the gum,' and *itis*, denoting inflammation. Inflammation of the gums.
ULITIS SEPTICA, Cancer aquaticus.
ULLUCO, Tropæolum tuberosum.
ULMAIRE, Spiræa ulmaria.
ULMARIA, Spiræa ulmaria — u. Palustris, Spiræa ulmaria.
ULMUS, *U. campes'tris* seu *glabra* seu *monta'na* seu *nuda* seu *sati'va* seu *scabra*, *Ptelea*, *Common Elm*, (F.) *Orme*, *Ormeau*, *Orme pyramidale* ou *champêtre*. *Ord.* Ulmaceæ. *Sex. Syst.* Pentandria Digynia. The inner, rough bark — *Ulmus*, (Ph. L.) — of this tree is inodorous; and has a bitter, austere, and mucilaginous taste. It is considered tonic, alterative, and diuretic; and has been used, chiefly, in lepra and other cutaneous affections.
ULMUS ALA'TA, *Lynn Wahoo*. The bark of the root has been used successfully as a cataplasm in phlegmonous inflammation.
ULMUS AMERICA'NA, *U. fulva* seu *rubra*, *Rough-leaved*, *Red*, or *Slippery Elm*. The inner bark — *Ulmus*, (Ph. U. S.) — is highly mucilaginous, and is used in coughs, diarrhœas, and dysenteries; also, as a poultice for tumours, lacerated and contused wounds, &c.
ULMUS CAMPESTRIS, Ulmus — u. Fulva, U. Americana, U. rubra — u. Glabra, Ulmus — u. Montana, Ulmus — u. Nuda, Ulmus — u. Sativa, Ulmus — u. Scabra, Ulmus.
ULNA, *O'lenē*, *Foc''ilē inferius* seu *majus*, *Canna Bra'chii*, *Os cu'biti inferius*, *Os procubita'lē*, *Cu'bitus*, *A-un'do bra'chii major*, *Cubit.* Anatomists have given this name to the bone of the forearm which forms the prominence of the elbow, during the flexion of that joint. It is the longer and larger of the two bones, and is inserted at the inner side. Its upper and larger extremity has, behind, a considerable process, called *olecranon*; and, before, a smaller one, called *coronoid*. These two eminences are separated from each other by the greater *sigmoid* or *semilunar fossa* or *olec'ranoid cavity*, which receives the articular trochlea of the humerus. The tubercle of the ulna is a small, rough spot, under the root of the coronoid process, for the

insertion of the *Brachialis internus*. On the outside of this extremity of the bone is the *lesser sigmoid cavity*. It is articulated with the head of the radius. The inferior extremity of the cubitus, which is much smaller than the superior, and articulated with the radius, has a surface that corresponds to the fibro-cartilage which separates it from the os cuneiforme; and a pointed process, called *styloid*. The body of the ulna is manifestly triangular. It is articulated with the os humeri and radius, and, mediately, with the os cuneiforme. It is developed by three points of ossification.

Also, the elbow.

ULNAD, see Ulnar aspect.

ULNAR, Cubital.

Ulnar Aspect. An aspect towards the side on which the ulna is situated.—Barclay. Ulnad is used adverbially by the same writer, to signify 'towards the ulnar aspect.'

ULNARIS, Cubital—u. Externus, see Cubital muscles—u. Gracilis, Palmaris longus—u. Internus, see Cubital muscles.

ULOCACE, Cancer aquaticus, Stomacace.

ULON'CUS, from *ουλον*, 'the gum,' and *ογκος*, 'tumour.' Swelling of the gums; epulis.

ULORRHAG''IA, *Oulorrhag''ia, Stomatorrhag''ia, Hæmorrhag''ia gingiva'rum, Ulorrhœ'a*, from *ουλον*, 'the gum,' and *ρηγνυμι*, 'I break forth.' Bleeding from the gums.

ULORRHŒA, Ulorrhagia.

ULOTICA, Cicatrisantia.

UL'TIMI-STERNAL. Professor Béclard gave this appellation to the sixth or last bony portion of the sternum. He calls it also *Ensisternal*.

UL'TIMUM MO'RIENS, 'last dying.' A term given to the part of the economy which dies last.

ULVA CRISPA, Fucus crispus.

Ulva Latis'sima, *Broad Green Laver, Green Sloke, Oyster green; Order*, Algæ; is used at table cooked in the same way as the next, to which it is greatly inferior.

Ulva Umbilica'lis, *Por'phyra lacinia'ta* seu *umbilica'lis, Lacin'iated Purple Laver*, abundant on the shores of Great Britain, is pickled with salt and sold in London as *Laver*. It is eaten at table, stewed with pepper, butter or oil and lemon-juice or vinegar. It has been suggested, also, as an antiscorbutic.

UMBIL, YELLOW, Cypripedium luteum.

UMBILIC, Umbilical, Umbilicus.

UMBIL'ICAL, *Um'bilic, Umbilica'lis, Umbilica'tus*, (F.) *Ombilical*, from *umbilicus*, 'the navel.' That which belongs or relates to the navel.

Umbilical Arteries, which exist only in the fœtus, seem, as it were, continuations of the primitive iliacs. They clear the umbilical ring, and proceed to the placenta, to which they carry the residuum of the blood sent to the fœtus by the umbilical vein. As soon as respiration is established, the blood ceases to pass by the umbilical arteries, which become obliterated, as well as the vein, and are transformed into two very strong ligamentous cords,—the vein forming the *Ligamen'tum rotun'dum* of the liver.

Umbilical Cord, Funiculus umbilicalis.

Umbilical Region, *Re'gio umbilica'lis* seu *gas'trica* seu *Mesogastrica, Mesogas'trium*, (F.) *Région ombilicale*, is the middle region of the abdomen, in which the umbilicus is placed. The sides of this are called the *flanks* or *lumbar regions*. In the umbilical region are the omentum majus; the inferior extremity of the duodenum; the jejunum; and the greater part of the mesentery; the aorta; vena cava; the trunks of the renal arteries and veins; the origin of the spermatic arteries, &c.

Umbilical Ring, *An'nulus umbilica'lis*, (F.) *Anneau ombilical*, is a fibrous ring which surrounds the aperture of the umbilicus, and through which umbilical hernia occurs in children.

Umbilical Vesicle, Vesicula umbilicalis.

Umbilical Vessels, (F.) *Vaisseaux ombilicaux*, include the two arteries, and umbilical vein. The umbilical vein arises from the placenta, and terminates at the fissure on the inferior surface of the liver of the fœtus, to which it conveys the blood necessary for its nutrition.

UMBILICALIS, Umbilical.

UMBILICATUS, Umbilical.

UMBILI'CUS, *Umbili'cum, Umbo, Om'phalos, Radix* seu *Me'dium ventris, Mesompha'lium, Mesom'phalum, Protme'sis* (*novel of a new-born child;*) the *umbilic, navel*, (Prov.) *Spoon;* from *umbo*, 'the button or prominence in the midst of a buckler,' or from *υμφαλος*, or rather *ομφαλος*, which signifies the same, as well as the navel; (F.) *Ombilic, Nombril*. A round cicatrix, about the median line of the abdomen. It is in the situation of an' aperture, which, in the fœtus, affords passage to the vessels of the umbilical cord.

Umbilicus Mari'nus, *Cotyle'don marina, Andro'sacē, Acetab'ulum marinum, Andro'sacē Matthi'oli, Fungus petræ'us marinus*. A submarine production, found on the rocks and the shells of fishes, in the south of France. It is reputed to be anthelmintic and diuretic.

UMBO, Elbow, Umbilicus.

UMBRELLA TREE, Magnolia tripetala.

UMSCHLAG, see Compress.

UNBOWELING, Exenterismus.

UNCARIA GAMBIR, Nauclea Gambir.

UNCAS, INDIAN, Veratrum viride.

UNCIA, Ounce.

UN'CIFORM, *Uncifor'mis, Uncina'tus*, from *uncus*, 'a hook,' and *forma*, 'shape.' That which has the shape of a hook.

Uniform Bone, *Os uniform'ē* seu *hama'tum* seu *uncina'tum*, (F.) *Os crochu*. The fourth bone of the second row of the carpus. Its shape is very irregular. Inwards and forwards, it has a considerable eminence, which is curved upon itself, and gives attachment to the annular ligament of the carpus. It is articulated with the os semilunare, os magnum, os cuneiforme, and the fourth and fifth metacarpal bones. It is developed from a single point of ossification.

Uniform Eminence, Hippocampus minor.

Uniform Process, *Proces'sus uncina'tus* seu *Blumenbach'ii, Great Process of the Ethmoid*. The most considerable of the thin irregularly twisted laminæ on the inferior surface of the ethmoid bone, which narrow the opening of the maxillary sinuses.

UNCINATUS, Uniform.

UNCINUS, Hook.

UNCTION, Inunction, Unguentum, Unguentum hydrargyri.

UNCUS, Hook.

UNDERCLIFF, ISLE OF WIGHT, ENGLAND, (CLIMATE OF.) The Undercliff comprehends a tract of country from Dunnose to St. Catherine's Hill, on the southeast coast, about six miles in length, and from a quarter to half a mile in breadth. It is well protected from the colder winds; and the climate is remarkably equable, as well as mild and dry, so that there are not many days during the winter in which the invalid cannot take exercise in the open air. It is an excellent climate for the pulmonary valetudinarian.

UNDIM'IA. A name given, by Paracelsus, to a tumour, filled with a gelatinous matter, like the white of an egg.

UNDOSUS, Cymatodes.

UNDULATIO, Fluctuation.

UNEDO, Arbutus unedo — u. Papyracea, Arbutus unedo.

UN'GEAL, *Ungea'lis*, from *unguis*, 'a nail.' Belonging, or relating, to the nails of the hands or feet.

UNGUEAL MATRIX, see Nail.

UNGUEN, Unguentum — u. Articulare, Synovia.

UNGUENT, ARMATORY, Hoplochrysma.

UNGUENTARIA, see Myristica moschata.

UNGUENTA'RIUS, *Myropœ'us, Myrep'eus, Myropo'les, Myropo'lus, Pigmenta'rius;* from *unguen'tum*, 'an ointment.' One who makes and sells ointments. A perfumer.

UNGUEN'TUM, *Unguen, Myron, Unction,* (F.) *Onguent,* from *ungere, unctum,* 'to anoint.' Ointment. Ointments are topical applications, of a consistence more or less analogous to that of lard. They are used, chiefly, as local applications to ulcers and wounds; but are sometimes rubbed upon a part in cutaneous affections; and, especially, where it is desired that the constituents of the ointment should be absorbed. Ointments are of less consistence than cerates, although the terms are often used indiscriminately.

UNGUEN'TUM AC''IDI NITRO'SI, *Ointment of Nitrous Acid, Poma'tum* seu *Unguen'tum Ni'tricum* seu *Oxygena'tum,* (F.) *Pommade oxygénée, Graisse oxygénée, Pommade d'Alyon.* (*Adip. suilli,* ℔j; *acid. nitros.* ℥vj. Melt the fat, and rub in the acid gradually, till cold. *Ph. E.*) Stimulant. Used in itch and other cutaneous eruptions, and in foul ulcers.

UNGUENTUM ADIPOCERÆ CETORUM, Ceratum cetacei — u. Ægyptiacum, Linimentum æruginis — u. Ægyptium album, Crinomyron — u. Æruginis, U. subacetatis cupri—u. Album, Unguentum cetacei — u. Album Resolvens, Linimentum ammoniæ fortius.

UNGUENTUM DE ALTHÆÂ, *U. de Terebin'thinâ et cerâ* seu *cit'rinum* seu *resi'næ piui sylves'tris compos'itum* seu *resumpti'vum* seu *leniti'vum, Cera'tum de Althææ, Emplas'trum mucilagino'sum* seu *emol'liens* seu *cit'rinum* seu *flavum* seu *de Althææ, Unguentum flavum, Marsh mal'low Ointment,* (F.) *Onguent de guimauve, O. d'althéa.* (*Olei de mucilaginibus,* 1000 p., *ceræ flavæ,* 250 p., *resinæ, terebinthin.,* ää 125 p. Liquefy; strain and stir till cold. *Ph. P.*) *Common Olive Oil* might be substituted for the *Oil of Mucilages.*

UNGUENTUM AMYGDALINUM, Ceratum Galeni.

UNGUENTUM ANTIMO'NII, *U. Antimonia'le, U. A. Tartariza'ti, U. A. Potassio-tar'tratis, U. tartari emet'ici, Ointment of tar'tarized an'timony, Antimo'nial Ointment, Tartar emetic ointment.* (*Antimon. et potass. tartrat.* in pulv. subtiliss. ℥ij, *adipis.* ℥j. *Ph. U. S.*) If a drachm of this ointment be rubbed upon any part, night and morning, it will excite, in a few days, a painful pustular eruption. Hence, it is employed as a counter-irritant. This preparation is also called *Ung. Tar'tari stibia'ti* seu *emet'ici, Ung. e Tar'taro stibia'to, Adeps Tartarē stibii medica'tus, Ung. Tar'tratis Potass'æ stibia't i,* (F.) *Pommade d'Autenrieth, Pommade stibiée.* This method of employing the tartrate of antimony and potassa, as a revellent, is, at times, called *stibio-dermic,* (F.) *La méthode stibio-dermique.*

UNGUENTUM ANTIMONII POTASSIO-TARTRATIS, Unguentum antimonii—u. Antimonii tartarizati, U. antimonii — u. Antipernium, see Antipernius.

UNGUENTUM AQUÆ ROSÆ, *Ointment of Rose water, Cold Cream.* (*Aq. Rosæ,* f℥ij; *ol. amygdal.* f℥ij; *cetacei,* ℥ss; *ceræ albæ,* ℥j. Melt together, in a water-bath, the oil, spermaceti, and wax; then add the rose-water, and stir until it is cold. *Ph. U. S.*) Cooling to irritated surfaces.

UNGUENTUM ARMARIUM, Hoplochrysma — u. Arthanitæ, see Arthanita—u. Articulare, Synovia —u. Basilicon flavum, Ceratum resinæ—u. Basilicon nigrum, Unguentum resinæ nigræ — u. Basilicum viride, Unguentum subacetatis cupri.

UNGUENTUM BELLADON'NÆ, *Ointment of Belladonna.* (*Ext. belladonnæ* ℥j; *adipis* ℥j; M. *Ph. U. S.*) An anodyne application to irritable ulcers, &c.

UNGUENTUM CANTHARIDIS, Unguentum lyttæ.

UNGUEN'TUM CERÆ (*albæ* seu *flavæ*), *Unguentum simplex* (*Ph. U. S.*), *Liniмen'tum simplex, Wax Ointment, Oil and Bees' Wax,* (F.) *Onguent de cire.* (*Ceræ* ℔j, *adipis* ℔iv (*Ph. U. S.*), or—*ceræ* ℥ij, *ol. oliv.* ℥v.) Emollient. A mild dressing. Also, the basis of most of the compound ointments.

UNGUENTUM CERATUM, Ceratum Galeni — u. Cerussæ, Unguentum oxidi plumbi albi, Unguentum plumbi subcarbonatis — u. Cerussæ acetatæ, Ceratum plumbi superacetatis, U. plumbi superacetatis—u. Citrinum, U. de althæâ, U. hydrargyri nitratis.

UNGUENTUM CETA'CEI, *U. Sper'matis Ceti* seu *album, Liniмen'tum album, Spermace'ti ointment,* (F.) *Onguent de blanc de baleine.* (*Cetacei* ℥vj, *ceræ albæ* ℥iv, *ol. oliv.* f℥iij. *Ph. L.*) The ordinary dressing for blisters and excoriations. See Ceratum cetacei.

UNGUENTUM COC'CULI, *Ointment of Coc'culus Ind'icus.* (Take any quantity of *Cocculus Indicus;* separate and preserve the kernels; beat them well in a mortar, first alone, and then with a little *lard;* then add *lard* till it amounts altogether to five times the weight of the kernels. *Ph. E.*) Used to destroy vermin, and to cure scabies and ringworm of the scalp.

UNGUENTUM CONI, *Ointment of Hemlock.* (*Conii fol.* recent.; *adipis* ää ℔j. Boil the hemlock in the lard till it becomes crisp, and express through linen. *Ph. L.*) Used to irritable tumours and ulcers.

UNGUEN'TUM CREASO'TI, *Ointment of Cre'asote.* (*Creasot.* f℥ss; *adipis,* ℥j. Add the creasote to the lard previously melted with a moderate heat, and stir constantly till cold. *Ph. U. S.*) Used in chronic cutaneous affections.

UNGUENTUM CUPRI SUBACETATIS, Unguentum subacetatis cupri — u. Diapompholygos, Unguentum oxidi zinci impuri.

UNGUENTUM DIGESTI'VUM SIMPLEX, *U. Terebin'thinæ et ovo'rum vitel'li, Simple digestive ointment,* (F.) *Onguent digestif simple.* (*Terebinthin. pur.* 64 p. *Vitell. ovor.* No. 2, vel 32 p. Mix, for a long time, in a glass mortar, and add, gradually, enough of the *Oil of Hypericum* (*Millepertuis*) to make a soft ointment. *Ph. P.*) Detergent. It may be rendered more so by adding a little of the *Acetate of copper.*

UNGUENTUM ELEMI, Balsam of Arcæus, Unguentum elemi compositum.

UNGUENTUM EL'EMI COMPOS'ITUM, *Unguentum e gummi elemi* seu *de terebin'thinâ et adip'ibus* seu *elemi, Liniмen'tum Arcæ'i, Ointment of Elemi,* (F.) *Baume d'Arcéus.* (*Elemi* ℔j, *terebinthinæ vulgaris* ℥x, *sevi præparati* ℔ij, *olivæ olei* f℥ij. Melt the elemi with the suet; remove it from the fire; and mix in the turpentine and oil. Strain the mixture through a linen cloth. *Ph. L.*) Stimulant and digestive. To keep open issues, &c.

UNGUENTUM EPISPAS'TICUM DE DAPHNĒ GNIDIO, *Adeps Cor'ticē daphnes gnidii medica'tus,* (F.) *Pommade de Garou.* (*Adip. præpar.* 320 p., *ceræ,* 32 p., *cort. daphn. gnid.* 128 p. Melt the fat and wax; and add the bark softened in water. Boil until the water is evaporated: then pass through cloth. *Ph. P.*) To keep open blisters, issues, &c. See Unguentum Meaerei.

Unguentum Epispasticum Fortius, Cerate of cantharides—u. Epispasticum mitius, Unguentum lyttæ—u. Epispasticum viride, Unguentum lyttæ medicatum—u. Flavum, Unguentum de althæâ—u. e Gummi elemi, Unguentum compositum — u. Hellebori albi, Unguentum veratri.

Unguentum Gallæ, *Ointment of Galls*, (*Gallæ* in pulv. ℥j; *adipis*, ℥vij. M. *Ph. U. S.*) As an astringent in piles, indolent ulcers, &c.

Unguentum Gallæ Compos'itum, *U. Gallæ et O'pii*, *Compound Ointment of Galls*. (*Gall.* in pulv. subtil. ℥vj, *adipis*. ℥vj, *opii* pulv. ℥iss. M. *Ph. L.*) Used in painful hemorrhoids. ℥ss or ℥j, of camphor is sometimes added.

Unguen'tum Hydrar'gyri, *U. cæru'leum* seu *Neapolita'num*, *Cera'tum mercuria'lē*, *Adeps Hydrar'gyro medica'tus*, *Mercurial Ointment*, *Blue ointment*, *Unction*, (F.) *Onguent mercuriel* ou *Napolitain*.

The *Strong Mercurial Ointment*, *Unguentum Hydrargyri fortius* of the London Pharmacopœia, *U. Hydrar'gyri* (*Ph. U. S.*), is thus made — *Hydrarg.* ℔ij, *adipis* ℥xxiij, *sevi* ℥j. Rub till the globules entirely disappear.

The *Milder Mercurial Ointment*,—*U. Hydrargyri Mitius*, — is made by adding, to one pound of the strong, two pounds of lard.

Mercurial ointment is antisyphilitic and discutient. It is rubbed on the inside of the thigh, in venereal affections; especially in those cases where mercury, given internally, runs off by the bowels. The *stronger* ointment is used for this purpose. The *weaker* is employed as a dressing, or as an application to cutaneous eruptions.

Unguentum Hydrargyri Ammoniati, Unguentum hydrargyri præcipitati albi — u. Hydrargyri calcis albæ, Unguentum hydrargyri præcipitati albi—u. Hydrargyri compositum, Unguentum hydrargyri nitratis—u. Hydrargyri deutoxydi nitrati, Unguentum hydrargyri nitrico-oxydi.

Unguentum Hydrar'gyri Iod'idi, *Ointment of Iodide of Mer'cury*. (*Hydrarg. Iodid.* ℥j, *ceræ alb.* ℥ij, *adipis* ℥vj. *Ph. L.*)

Unguentum Hydrar'gyri Iod'idi Rubri, *Ointment of Red Iodide of Mer'cury*. (*Hydrarg. Iodid. Rubr.* ℥j, *Ung. ceræ albæ* ℥vij. *Ph. D.*) Both these ointments may be applied to scrofulous and indolent ulcers.

Unguentum ex Hydrargyro mitius dictum cinereum, Unguentum oxydi hydrargyri cinereum.

Unguentum Hydrargyri Nitra'tis, *U. hydrargyri nitrati* seu *supernitra'tis hydrargyri* seu *hydrar'gyri compos'itum* seu *mercurialē cit'rinum* seu *cit'rinum ad scabiem*, *Bal'samum mercuria'lē*, *Adeps nitra'te hydrargyri medica'tus*, *Ointment of Nitrate of Mer'cury*, *Citrine Ointment*, (F.) *Onguent de nitrate de mercure*, *O. citrin contre la gale*. (*Hydrarg.* ℥j, *acid. nitric.* f ℥xiv. *olei bubuli* f ℥ix, *adipis* ℥iij. Dissolve the mercury in the acid; and, while hot, add the oil and melted lard. *Ph. U. S.*

A milder ointment,—*Ung. nitratis Hydrargyri mitius*, —is made with triple the quantity of oil and lard. It is stimulant and detergent, and is much used as an application to herpes, porrigo, and cutaneous eruptions. The weaker ointment is sometimes used in ophthalmia tarsi, &c.

Unguentum Hydrargyri Ni'trico-ox'ydi, *U. subnitra'tis hydrargyri* seu *Oxydi Hydrargyri rubri*, *U. H. oxidi rubri* (*Ph. U. S.*), *U. deutoxydi hydrarg. nitrati* seu *Hydrargyri rubri* seu *ex Hydrargyro oxyda'to rubro* seu *mercurii rubrum* seu *ophthal'micum rubrum* seu *subnitra'tis hydrargyr'ici*, *Bal'samum ophthal'micum rubrum*, *Ointment of Nitric Oxyd of Mercury*, *Red Precip'itate Ointment*, *Golden Ointment*, *Singleton's Eye Salve*. (*Hydrarg. oxid. rubr.* in pulv. subtiliss. ℥j; *Ung. simpl.* ℥j. Add the oxyd, reduced to a fine powder, to the melted oiutment. *Ph. U. S.*) Stimulant and escharotic. Applied to foul ulcers, to inflammation of the tarsi, &c. &c.

Belleville's Cerate, which has been long used in cases of scalled head, and of chronic cutaneous diseases in general, is made as follows:—*Plumbi acet.* ℥j; *hydrarg. oxid. rubr.* ℥ss; *hyd. chlorid. mit.* ℥ij; *ceræ albæ* ℥iv; *ol. olivæ* ℥vj. Melt the last two, and add the others in fine powder.

Unguentum Hydrargyri Oxidi Rubri, Unguentum hydrargyri nitrico-oxydi — u. ex Hydrargyro oxydato rubro, Unguentum hydrargyri nitrico-oxydi—u. Hydrargyri oxydi rubri, Unguentum hydrargyri nitrico-oxydi.

Unguentum Hydrargyri Præcipita'ti Albi, *U. Hydrar'gyri ammonia'ti*, (*Ph. U. S.*) seu *submuria'tis hydrargyri ammonia'ti* seu *ad scabiem Zelleri* seu *mercuria'lē album* seu *mundifi'cans Zelleri* seu *e mercu'rio præcipita'to* seu *calcis hydrargyri albæ*, *Ointment of white precipitate*. (*Hyd. ammon.* ℥j, *ung. simpl.* ℥iss. Melt the fat, and add the precipitate.) Detergent. Used in cutaneous eruptions, to destroy vermin, &c.

Unguentum Hydrargyri Rubri, U. Hydrargyri nitrico-oxydi — u. Hydrargyri submuriatis ammoniati, U. Hydrargyri præcipitati albi — u. Hydrargyrici subnitratis, U. hydrargyri nitrico-oxydi—u. Hydrargyri subnitratis, U. hydrargyri nitrico-oxydi — u. Hydrargyri supernitratis, U. hydrargyri nitratis—u. Infusi meloes vesicatorii, U. lyttæ — u. Irritans, U. lyttæ.

Unguen'tum Iod'ini, *U. Iodin'ii*, *Ointment of Iodine*. (*Iodin.* ℈j; *Potass. iodid.* gr. iv; *Aquæ* ♏vi; *Adipis.* ℥j. Rub the iodine and iodide first with the water until liquefied, and then with the lard until mixed. *Ph. U. S.*) Used as a local application to goitrous and other swellings.

Unguentum Iod'ini Compos'itum, *U. Iodin'ii compositum*, *Compound Ointment of Iodine*. (*Iodin* ℥ss; *Potassii iodid.* ℥j; *Alcohol*, f ℥j; *adipis* ℥ij Rub the iodine and iodide first with the alcohol and then with the lard until they are well mixed. *Ph. U. S.*)

Unguentum Lau'rinum, *O'leum lau'rinum*, *Adeps lauro-medica'tus*, *Bay Ointment*, (F.) *Onguent* ou *Huile de laurier*. (*Fol. lauri*, 500 p., *adip. suillæ*, 1000 p. Bruise in a marble mortar; evaporate all humidity by boiling; and add *Bay berries*, in powder, 500 p. Digest and pass through linen. *Ph. P.*) Reputed to be corroborant and nervine. It is simply emollient.

Unguentum Lenitivum, U. de althæa—u. Liliaceum, Crinomyron.

Unguentum Lyttæ, *Ung. canthar'idis* seu *vesicato'rium* seu *irri'tans* seu *ad vesica'ta* seu *infu'si mel'oes vesicato'rii* seu *epispas'ticum mit'ius*, *Blistering Salve*, *Ointment of Spanish Flies*, *Ointment of Infusion of Spanish Flies*, *Milder blis'tering Ointment*. (*Cantharid.* in pulv. ℥ij; *aquæ destillat.* Oss; *cerat. resin.* ℥viij. Boil down the water with the Spanish flies to one-half, and strain; then mix the cerate with the strained liquor, and evaporate to the proper corsistence. *Ph. U. S.*) It is stimulant and epispastic; and is chiefly used for keeping up the discharge from a blistered surface.

Unguentum Lyttæ Medica'tum, *Adeps cantharid'ibus medica'tus*, *Poma'tum* seu *Unguentum epispas'ticum vir'idē stimu'lans ac'ribus*, *Green blis'tering Ointment*, (F.) *Pommade épispastique verte*. (*Pomati* seu *unguenti cantharid.* 64 p., *unguent. populei* 168 p., *ceræ albæ* 256 p., *cupri acetat.*, *ext. opii*, āā 24 p. Melt the unguentum populeum, and wax, and add, as they cool, the oxyd of copper, cantharides, and opium. *Ph. P.*) Use, same as the last.

Unguentum Lyttæ Medica'tum A'liud, *Adeps cantharid'ibus medica'tus alius*, *Poma'tum epispas'ticum flavum et mit'ius*, *Yellow Blister-*

ing Ointment, (F.) *Pommade épispastique jaune.* (*Pulv. cantharid.* 120 p., *adip. præp.* 1680 p., *aquæ* 250 p. Melt the lard; mix the cantharides, and add the water at the same time; place the whole on a gentle fire; stir continually for two hours, and add a little water to replace that which has been evaporated. Pass through linen and strain. Keep it in a water-bath, and add powdered *turmeric*, 8 p. Let it cool till the superfluous liquid separates; pour off and add *yellow wax*, 250 p., *Oil of Lemon*, 8 p. *Ph. P.*) A complex preparation. Use, same as the last.

An ointment, not very philosophically combined, was used by Dr. Physick, which is known by the name of "*Dr. Physick's Issue Ointment.*" It is made by boiling half an ounce of powdered *cantharides* in two ounces of *rose-water*, and evaporating until one-half of the fluid is driven off, having previously added 15 grains of *tartar emetic*. The decoction is to be strained, and three ounces of *olive oil*, an ounce and a half of *white wax*, and one ounce of *spermaceti* added to it, and the mixture then boiled till all the water is evaporated.

Unguentum Melanicum Causticum, Caustic Æthiopicum.

Unguentum Mercuriale Album, Unguentum hydrargyri præcipitati albi — u. Mercuriale citrinum, Unguentum hydrargyri nitratis—u. e Mercurio præcipitato, Unguentum hydrargyri præcipitati albi — u. Mercurii rubrum, Unguentum hydrargyri nitrico-oxydi—u. Mundificans Zelleri, Unguentum hydrargyri præcipitati albi.

Unguentum Meze'rei, *Ointment of Mezereon.* (*Mezer.* incis. transversim, ℥iv; *adipis*, ℥xiv; *ceræ albæ*, ℥ij; moisten the mezereon with a little alcohol, and beat in an iron mortar, until reduced to a fibrous mass; then digest it with the lard, in a salt-water bath, for 12 hours; strain forcibly, and allow the strained liquor to cool slowly, so that any undissolved matters may subside; from these separate the medicated lard; melt it with the wax at a moderate heat, and stir constantly till they are cold. Ph. U. S.) To keep open blisters, issues, &c.

Unguentum Muria'tis Hydrargyri Oxygena'to Medica'tum, *Adeps muria'tis hydrargyri oxygena'to medicatus, Cyrillo's Ointment*, (F.) *Pommade de Cyrillo.* (*Hydrar. oxymur.* 4 p.; *adipis suilli præp.* 32 p.—Ph. P.) Antivenereal and alterative. Used in friction, ℥ss at a time.

Unguentum Nardinum, see Nardus Indica — u. Neapolitanum, Unguentum hydrargyri — u. Nervinum, Unguentum Sambuci — u. Nitricum seu oxygenatum, Unguentum acidi nitrosi.

Unguentum Ophthal'micum, *Adeps ox'ido hydrargyri rubro et plumbi aceta'tē medica'tus, Regent's Pommade ophthalmique*, (F.) *Pommade ophthalmique.* (*Butyr. recent., aq. rosar. lavat.* āā 4½ p.; *camphor., oxyd. hydrarg. rubr., acetatis plumbi*, āā 0.25 p. Mix intimately.—Ph. P.) In chronic inflammation of the conjunctiva or tarsi.

Unguentum Ophthalmicum, Unguentum oxidi zinci impuri—u. Ophthalmicum rubrum, Unguentum hydrargyri nitrico-oxydi.

Unguentum O'pii, *Ointment of Opium.* (*Opii* pulv. ℈j; *adipis* ℥j; M.—Ph. L.) To be used where the local application of opium by inunction is needed.

Unguentum Ox'idi Hydrargyri Cine'rei, *Adeps* seu *Unguentum ex hydrargyro mit'ius dictum cinereum, Ointment of gray oxide of mercury*, (F.) *Onguent gris.* (*Oxyd. hydrarg. ciner.* p. j; *adipis suilli*, p. iij.— Ph. E.) Properties like the mercurial ointment. It is not much used.

Unguentum Ox'idi Plumbi Albi, *U. cerus'æ* seu *album* seu *subaceta'tis plumbi, Ointment of white oxide of lead, White ointment.* (*Ung. simplicis*, p. v; *oxyd. plumb. alb.* p. j.— Ph. E. and P.) Cooling and desiccative. Applied to excoriated and burnt surfaces.

Unguentum Oxidi Plumbi Carbonati, U. Plumbi subcarbonatis — u. Oxidi zinci, Unguentum zinci.

Unguentum Ox'idi Zinci Impu'ri, *U. tu'tiæ* seu *ophthal'micum* seu *diapomphol'ygos, Adeps ox'idi zinci medica'tus, Eye-salve, Tutty ointment, Ointment of impure oxide of zinc.* (*Linim. simpl.* p. v; *oxyd. zinc. imp. præp.* p. j.— Ph. E.) Generally used in ophthalmia tarsi and atonic ophthalmia.

Unguentum Picis Liq'uidæ, *U. Picis* seu *e Picē, Tar Ointment.* (*Picis liquid., sevi*, sing. ℔j. Melt, and stir till cold.—Ph. U. S.) Stimulant and detergent. Used in tinea capitis, and other cutaneous eruptions.

Unguentum Picis Nigræ, Unguentum resinæ nigræ — u. Plumbi acetatis, Ceratum plumbi superacetatis — u. Plumbi carbonatis, Unguentum plumbi subcarbonatis.

Unguentum Plumbi Compos'itum, *Compound Ointment of Lead.* (*Emp. Plumbi*, ℔iij; *ol. olivæ* f℥xviij; *cret. præpar.* ℥vj; *acid. acet. dil.* f℥vj. Dissolve the plaster in the oil with a slow fire; then add the chalk, and afterwards the acid, constantly stirring until they become cold.—Ph. L.) Used as a dressing to flabby, indulent ulcers.

Unguentum Plumbi Iod'idi, *Ointment of Iodide of Lead.* (*Plumb. iodid.* ℥j; *adipis*, ℥viij; M.—Ph. L.) Used as a eutrophic in chronic, glandular, and other swellings.

Unguentum Plumbi Oxydi Carbonati, Unguentum plumbi subcarbonatis—u. Plumbi subacetatis, Unguentum oxidi plumbi albi—u. Plumbici carbonatis, Unguentum plumbi subcarbonatis.

Unguentum Plumbi Subcarbona'tis, *U. plumbi carbona'tis* (Ph. U. S.) seu *album* seu *album simplex* seu *carbona'tis plumbici* seu *cerus'æ* seu *oxidi plumbi carbona'ti, Cera'tum de cerus'â*, (F.) *Onguent blanc de Rhazes, O. de céruse, O. de Tornamira.* (*Plumbi carbonat.* in pulv. subtiliss. ℥ij; *Unguent. simpl.* ℔j. Add the carbonate of lead to the ointment previously softened over a gentle fire, and mix.— Ph. U. S.) Chiefly used as a dressing for burns.

Unguentum Plumbi Superaceta'tis, *U. aceta'tis plumbi* seu *saturni'num* seu *cerus'æ aceta'tæ, Bal'samum universa'lē, Ointment of sugar of lead.* (*Olive oil*, ℔ss; *white wax*, ℥iss; *superacetate of lead*, ℥ij.) Cooling, desiccative. Called, also, *Balsamum saturni'num, Buty'rum satur'ni, Linimen'tum plumba'tum, Poma'tum eatur'ni, Ung. triphar'macum.*

Unguentum Populē'um, *Adeps popav'erē, hyoscy'amo, et belladon'nā medica'tus.* Fresh buds of the *populus nigra*, 500 p., macerated in *adeps suillus præp.* melted, 1500 p., for 24 hours. Preserve this. Take *black poppy leaves, belladonna, hyoscyamus, black nightshade*, āā 128 p.; bruise in a mortar with the former preparation; boil until all the humidity is evaporated, and strain.—Ph. P.) Anodyne. Applied to local inflammations, hemorrhoids, sore nipples, cancer, &c. Green elder ointment is often sold for this.

Unguentum Populeum, see Populus.

Unguentum Potas'sæ Hydrioda'tis, *U. potas'sii iod'idi* (Ph. U. S.), *Ointment of hydri'odate of potass.* (*Potass. iodid.* in pulv. subtil. ℥j; *aq. bullient.* f℥j; *adipis*, ℥j. Dissolve the iodide in the water, and mix the solution with the lard.—Ph. U. S.) Half a drachm of this ointment is rubbed on scrofulous glands, goître, &c.

Unguentum Potassii Iodidi, Unguentum Potassæ Hydriodatis—u. Pulveris meloes vesicatorii, Cerate of cantharides — u. Resinæ flavæ, Ceratum resinæ flavæ.

Unguentum Resi'næ Nigræ, *U. resinæ nigrum* seu *basil'icon nigrum* seu *Picis nigræ* seu *Picis*

tetrapharm'acum, Black basilicon, Black resin ointment, Ointment of pitch, Ointment of black pitch. (*Resin nigr., ceræ flavæ, resinæ flav.* āā ℥ix; *olei olivæ*, Oj.—Ph. L.) Uses, the same as the *Ceratum resinæ* or *Yellow basilicon.*

Unguentum Resinæ Pini Sylvestris Compositum, Unguentum de Althæâ—u. Resinosum, Ceratum resinæ flavæ—u. Resumptivum, Unguentum de althæâ.

Unguentum Sabinæ, Ceratum Sabinæ.

Unguentum Sambu'ci, *U. sambu'cinum* seu *nervi'num, Green ointment, Elder ointment,* (F.) *Onguent de sureau.* (*Sambuci flor.* ℔ij; *adipis præp.* ℔ij. Boil.—Ph. L.) Emollient.

Unguentum Saturninum, Unguentum plumbi superacetatis—u. ad Scabiem Zelleri, Unguentum hydrargyri præcipitati albi—u. Simplex, Ceratum Galeni, Unguentum ceræ—u. Solidum de cicutâ, Emplastrum cicutæ—u. Spermatis ceti, Unguentum cetaceti.

Unguentum Stramo'nii, *Ointment of Stramo'nium.* (*Ext. stramon. fol.* ℥j; *adipis*, ℥j. Rub the extract with a little water until uniformly soft, and then with the lard.—Ph. U. S.) An anodyne ointment to irritable ulcers, hemorrhoids, &c.

Unguentum Subaceta'tis Cupri, *U. cupri subaceta'tis* (Ph. U. S.) seu *deter'gens seu basil'icum vir'ide seu æru'ginis, Balsamum viride, Ointment of subacetate of copper, Ver'digris ointment.* (*Cupri subacet.* in pulv. subtiliss. ℥j; *ung. simpl.* ℥xv. Add the subacetate to the ointment previously melted with a moderate heat, and stir till cold.—Ph. U. S.) Detergent and escharotic.

Unguentum Sulphura'tum ad Sca'biem, *Adeps sul'phurē et ammo'niæ muria'tē medica'tus.* (*Adipis*, 120 p.; *sulph. lot.* 60 p.; *ammoniæ muriat., aluminæ sulphat.* āā 4 p.; fiat unguentum.—Ph. P.) Antipsoric.

Bailey's Itch Ointment is composed of *olive oil, lard, nitre, alum, sulphate of zinc,* and *cinnabar;* scented with *oil of aniseed, oil of origanum,* and *oil of spike,* and coloured with *alkanet-root.*

Unguentum Sulphura'tum Alcali'num ad Sca'biem, *Adeps sulph'urē et carbona'tē potassæ medica'tus, Hel'merick's Alcaline Sulphura'ted Itch Ointment.* (*Adip. præp.* 800 p.; *sulphur. lot.* 200 p.; *carbonat. potass. pur.* 100 p.; fiat ung.—Ph. P.) Use, same as the last.

Bateman's Itch Ointment resembles this. It is coloured with *cinnabar,* and scented with *essence of bergamot.*

Unguentum Sul'phuris, *U. e sulph'urē, Sulphur ointment.* (*Sulph.* ℔j; *adip.* ℔ij.—Ph. U. S.) Used chiefly in itch, and some herpetic affections.

Unguentum Sulphuris Compos'itum, *U. Antipsor'icum, Compound Sulphur Ointment, Itch Ointment, Jackson's Itch Ointment, Pommade Antipsorique de Jasser.* (*Sulph. sublim.* ℔ss; *veratri rad.* contus. ℥ij; *potassæ nitrat.* ℥j; *saponis mollis*, ℔ss; *adipis*, ℔iss; *ol. bergamot.* ℥xxx.—Ph. L.) The Unguentum Sulphuris Compositum of the Pharm. U. S. is made as follows:—*Sulphur.* ℥j; *hydrargyri ammoniat., acid. benzoic.* āā ℥j; *ol. bergamot., acid. sulphuric.* āā f℥j; *potassæ nitrat.* ℥ij; *adipis*, ℔ss. To the melted lard add the other ingredients, and stir till cold. Use, the same as the last; but it is more stimulating.

Unguentum Sulph'uris Iod'idi, *Ointment of Iodide of Sulphur.* (*Sulphur. iodid.* ℥ss; *adipis*, ℥j. Rub the iodide with a little of the lard; add the remainder, and mix.—Ph. U. S.) An excellent application in chronic cutaneous affections.

Unguentum Susinum, Crinomyron.

Unguentum Tab'aci, *Tobacco Ointment.* (*Tabac. recent.* concis. ℥j; *adipis*, ℔j. Boil the tobacco in the lard, over a gentle fire, till it becomes friable; then strain through linen.—Ph. U. S.) Applied to irritable ulcars, tinea capitis, &c.

Unguentum Tartari Emetici, U. antimonii tartarizati—u. Tartari stibiati, U. antimonii tartarizati—u. e Tartaro potassæ stibiati, U. antimonii tartarizati—u. Tartratis potassæ stibiati, U. antimonii tartarizati—u. de Terebinthinâ et adipibus, U. elemi compositum—u. de Terebinthinâ et cerâ, U. de althæâ—u. Terebinthinæ et ovorum vitelli, U. digestivum simplex—u. Tetrapharmacum, Basilicon, U. resinæ nigræ—u. Tripharmacum, U. plumbi superacetatis—u. Tutiæ, U. oxidi zinci impuri.

Unguentum Vera'tri, *U. Veratri albi* (Ph. U. S.) seu *helleb'ori albi, White hellebore ointment.* (*Veratr.* pulv. ℥ij; *adipis*, ℥viij; *olei limon.* ℥xx.) Used in cases of itch, where sulphur is objected to. It is not equally efficacious.

The principal ingredients in the Edinburgh Ointment are *white hellebore* and *muriate of ammonia.*

Unguentum ad Vesicata, U. lyttæ—u. ad Vesicatoria, Cerate of cantharides—u. Vesicatorium, Unguentum lyttæ.

Unguentum Zinci, *U. ox'idi zinci* seu *zinci oxi'di* (Ph. U. S.), *Zinc ointment.* (*Zinci oxid.* ℥j; *adipis*, ℥vj.) Use, the same as that of the *Unguentum tutiæ.*

Unguentum Zinci Oxidi, U. zinci.

Unguis, Hippocampus minor, Nail, Onyx, Pterygion—u. Avis, Hippocampus minor—u. Halleri, Hippocampus minor—u. Odoratus, Blatta Byzantia.

Unguis Os, *Os lacryma'lē.* A small, quadrilateral, very thin, and semi-transparent bone, which has been compared to a human *nail,* and is situate at the anterior and inner part of the orbit. It aids in the formation of the lachrymal gutter and the nasal duct. It is articulated with the frontal, superior maxillary, ethmoid, and inferior spongy bones, and is developed by a single *punctum ossificationis.*

UNGULA CABALLINA, Tussilago.

UNGULÆ PALPEBRARUM, see Tarsus.

UNHEALTHY, Sickly.

UNICORN ROOT, Chamælirium luteum.

UNILOC'ULAR, *Unilocula'ris,* from *unus,* 'one,' and *loculus,* (diminutive of *locus,*) 'a cell.' Having one cell or cavity, as *biloc'ular* means having two cells or cavities; *multiloc'ular,* having many.

UNIO. Pearl.

UNIOCULUS, Cyclops, Monoculus.

UNION BY THE FIRST AND SECOND INTENTIONS, see Intention.

UNIPARIENS, Uniparous.

UNIPARIENT, Uniparous.

UNIP'AROUS, *Unipa'rient, Uniparie'us,* from *unus,* 'one,' and *pario,* 'I bring forth.' Producing one at a birth.

UNISE'MA DELTIFO'LIA, *Pontede'ria corda'ta, Shovel Pickerelweed, Pond Shovel, Shovel-leaf, Water Plantain.* An indigenous plant, *Ord.* Pontederiaceæ, *Sex. Syst.* Hexandria Monogynia, which grows in water, and flowers from June to August. The root is emollient and astringent.

UNITAIRES (*MONSTRES*) (F.), from *unitas,* 'oneness.' A class of monsters in which are found only the complete or incomplete elements of a single individual. In contradistinction to *Compound monsters,* (F.) *Monstres composés,* in which there are the complete or incomplete elements of more than one.

UNI'TING BANDAGE, (F.) *Bandage unissant.* A bandage for bringing the edges of a wound into approximation. The arrangement

of such a bandage differs according as the wound is transverse or longitudinal.

UNIVOCAL GENERATION, see Generation.

UNOCULUS, *Borgne.* Cyclops, Monoculus.

UNORGANIZED, Inorganic.

UNSTRIPED MUSCULAR FIBRE, see Muscular fibre.

UNWELL, see Menstruation.

UPAS. A word used in the Archipelagos of Moluccа and Sunda, and signifying *Vegetable Poison, Ipo, Bohon, Pohon,* or *Boa* or *Boon Upas, Upas, Pohon Antiar, Antejar.* A substance used by the natives of those places for poisoning their arrows. The smallest quantity is capable of destroying the largest animal. The tree which produces it is said to be the *Antia'ris Toxica'ria.* Another species of upas, *U. Tieuté, Tshettik* or *Tjettek,* is the produce of a *Strychnos, S. Tieuté.* Many idle stories are told regarding the upas, most of which are fabulous.

U'RACHUS, *Uraeus, Urinae'ulum,* from *ουρον,* 'urine,' and *εχω,* 'I contain.' (F.) *Ouraque.* The urachus, in certain animals, is a long membranous canal, which arises from the bladder, makes its exit from the abdomen by the umbilicus, and terminates in the pouch called *allantois.* According to Sabatier, this is the arrangement of the urachus in the human fœtus; but Bichat and other anatomists consider, that when the canal exists in it, it is a malformation. They regard it as a kind of suspensory ligament of the bladder, extending from the top of that organ to the umbilicus; and, at the umbilicus, confounded with the abdominal aponeurosis.

URACRATIA, Enuresis.

URACUS, Urachus.

URÆ'MIA, *Urhæ'mia,* (F.) *Urémie,* from *ουρον,* 'urine,' and *αιμα,* 'blood.' A condition of the blood in which it contains urine or urea.

URALI, Curare.

URANA, Ureter.

URANE, Urinal.

URANISCONI'TIS, from *ουρανισκος,* 'the palate,' and *itis,* denoting inflammation. *Palati'tis.* Inflammation of the palate.

URANISCOPLAS'TY, *Uraniscoplas'ticē,* from *ουρανισκος,* 'the palate,' and *πλαστικος,* 'forming.' The operation of engrafting in case of deficiency of the soft palate.

URANISCORRHAPHIA, Staphylorraphy.

URANISCOS, Palate.

URANORRHAPHIA, Staphylorraphy.

URAPOSTE'MA, *Abcess'sus urino'sus, Urœde'ma,* from *ουρον,* 'urine,' and *αποστημα,* 'an abscess.' A tumefaction produced by the escape of urine. An abscess containing urine.

URARI, Curare.

URAS, Urate.

URATE, *Uras, Lithate, Lithas;* from *ουρον,* 'urine.' A generic name for salts, formed by the combination of uric or lithic acid with different bases. *Urate* or *Lithate of Soda,* for example, is found in arthritic and certain urinary concretions:—*Urate* or *Lithate of Ammo'nia* in certain urinary deposits.

URE'A, *Uren, Uren'ium, U'ricum, Mate'ria urino'sa, Princip'ium* seu *Sal urino'sum, Nephrine,* (F.) *Urée.* Same etymon. A white, pearly, brilliant substance, in transparent plates, inodorous, and of a cool taste; very soluble in water; deliquescent, and soluble in alcohol. It exists, in great quantity, in the urine; and is an essential part of it. It has been used as a diuretic. Dose, gr. xv to ʒj.

UREC'CHYSIS, *Urech'ysis,* from *ουρον,* 'urine,' and *εκχυσις,* 'effusion.' Effusion of urine into the cellular membrane.

UREDO, Urticaria.

URÉE, Urea.

UREMA, Urine.

URÉMIE, Uræmia.

UREN, Urea.

URENIUM, Urea.

URENS, Caustic.

UREORRHŒA, Diabetes.

URESIÆSTHESIS, Diuresiæsthesis.

URESIS, Micturition.

URE'TER, *ουρητηρ.* Same etymon as Urate. *U'rana, Vena alba renum, Cana'lis ner'veus fistulo'sus renum, Ductus* seu *Ductor Uri'næ, Vas urina'rium,* (F.) *Uretère.* A long, excretory canal — membranous and cylindrical — which conveys the urine from the kidney to the bladder. It extends, obliquely, between the pelvis of the kidney, with which it is continuous, and the *bas fond* of the bladder, into which it opens. It enters at the posterior and inferior part, for some distance between the coats, and opens into the cavity of the bladder, at the posterior angle of the *Trigone vésical.* The ureter is formed of an exterior, white, opake, and fibrous membrane; and of an inner, which is mucous.

URETERAL'GIA, from *ουρητηρ,* 'the ureter,' and *αλγος,* 'pain.' Pain in the course of the ureter,—as from calculus, *Ureteral'gia calculo'sa.*

URETERALGIA CALCULOSA, see Ureteralgia—u. Inflammatoria, Ureteritis.

URETÈRE, Ureter.

URETER'ICUS. An epithet for ischury, &c., arising from an affection of the ureter.

URETERI'TIS, *Ureteral'gia inflammato'ria, Ureterophlegma'sia,* from *ureter,* and *itis,* denoting inflammation. Inflammation of the ureter; generally caused by calculus.

URETERO-LITH'ICUS, from *ureter,* and *λιθος,* 'a stone.' An epithet applied to ischury or other affection caused by a stone in the ureter.

URETEROL'ITHUS. Same etymon. Calculus in the ureter.

URETEROPHLEGMASIA, Ureteritis.

URETERO-PHLEGMAT'ICUS, from *ureter,* and *φλεγμα,* 'phlegm or mucus.' Any affection caused by mucus accumulated in the ureter.

URETERO-PY'ICUS, from *ureter,* and *πυον,* 'pus.' An epithet applied to affections caused by the presence of pus in the ureter.

URETERORRHAG''IA, from *ureter,* and *ραγη,* 'rupture.' Hemorrhage from the ureter.

URETERO-STOMAT'ICUS, from *ureter,* and *στομα,* 'orifice.' That which is dependent upon obstruction of the orifice of the ureter.

URETERO-THROMBOÏ'DES, from *ureter, Σρομβος,* 'grumous blood,' and *ειδος,* 'resemblance.' Ischury from grumous blood in the ureter.

URE'THRA, *ουρηθρα, Cana'lis* seu *Mea'tus* seu *Ductus urina'rius, Uriae, Ure'tra, Fis'tula urina'ria, Iter urina'rium* seu *Uri'næ;* (F.) *Urèthre, Urètre,* from *ουρον,* 'urine.' The excretory ducts for the urine in both sexes; and for the sperm in man. In the latter, it is 8 or 10 inches long; and extends from the neck of the bladder to the extremity of the penis, in which its external aperture is situate. In the male urethra, three portions are distinguished:—1. A *Prostatic portion,* near the bladder, about an inch and a quarter in length, which traverses the prostate gland:—2. A *membranous portion, Isthmus ure'thræ, Pars ure'thræ membrana'cea,* from 8 to 10 lines long, which is separated from the rectum by the areolar tissue only:—3. A *spongy portion,* which expands, anteriorly, to form the glans, and which commences at the *bulb of the urethra.* Before opening externally, the canal has a dilatation, called the *Fossa* or *Fossic'ula navicula'ris.* On the interior of the urethra two white lines are perceptible — the one above, the other below. The latter commences at the *verumontanum;* and

at the surface of this, the *ejaculatory ducts*, and *prostatic ducts* open. The urethra is lined, in its whole extent, by a mucous membrane; on which are seen, particularly at the bulb, the orifices of a number of follicular ducts, *Lacunæ* or *Sinuses of Morgagni*. At about an inch and a half from the opening of the meatus, one of these lacunæ is generally found, much larger than the rest, and is named *Lacuna Magna*. The arteries of the urethra are numerous, and proceed from the internal pudic,—the largest branches entering the bulb. The veins follow the course of the arteries. The lymphatics pass into the inguinal and hypogastric plexuses. The nerves come from the pudic and gluteal. In the *female*, the urethra is only about an inch long. It is wider than in man, and susceptible of great dilatation. It is very wide at its commencement; and descends obliquely forwards, to terminate at the top of the external aperture of the vagina by the *meatus urina'rius*. In its course, it is slightly curved, the concavity being forwards.

URETHRA, BLIND DUCTS OF THE, see Cæcus — u. Mucous lacunæ of the, see Cæcus.

URE'THRAL, *Urethra'lis*, *Ure'thricus*. Relating to the urethra.

URETHRAL'GIA, from *urethra*, and ἀλγος, 'pain.' Pain in the urethra. Gonorrhœa.

URÈTHRE, Urethra.

URETHREMPHRAXIS, Urethrophraxis.

URETHRITIS, Gonorrhœa.

URETHROBLENNORRHŒ'A, from *urethra*, βλεννα, 'mucus,' and ῥεω, 'I flow.' Gonorrhœa; gleet.

URETHROCYSTAUCHENOTOMIA, see Lithotomy.

URÈTHROCYSTEOANEURYSMATOTOMIA, see Lithotomy.

URETHROCYSTEOTRACHELOTOMIA, see Lithotomy.

URETHROHÆMORRHAGIA, Urethrorrhagia.

URETHROPHRAX'IS, *Urethremphrax'is*, from *urethra*, and φραασω, 'I obstruct.' Obstruction of the urethra.

URETHROPLAS'TIC, *Urethroplas'ticus*; from *urethra*, and πλαασω, 'I form.' An epithet given to the operation, *Ure'throplasty*, which supplies defects in the canal of the urethra through which the urine escapes.

URETHRORRHA'GIA, *Urethrohæmorrha'gia*, *Caulorrha'gia* seu *Hæmatu'ria stillativ'ia*, from *urethra*, and ῥηγνυμι, 'I break out.' Hemorrhage from the urethra.—Frank.

URETHRORRHŒ'A, from *urethra*, and ῥεω, 'I flow.' A discharge of any kind from the urethra.

URETHROSTENO'SIS, *Strictu'ra ure'thræ*, *Urosteno'sis*, *Urethrosten'ia*, (F.) *Rétrécissement de l'Urèthre*, from *urethra*, and στενωσις, 'narrowness.' Stricture of the urethra.

URETHROTOME, *Urethrot'omus*, (F.) *Uréthrotome*, from *urethra*, and τεμνω, 'I cut.' An instrument so called by Le Cat, with which he divided the skin, and laid open the urethra, in the operation for lithotomy. Also, an instrument for dividing strictures of the urethra.

URETHROT'OMY, *Urethrotom'ia*; same etymon. An operation, which consists in opening the urethra with the *Urethrotome*, for the removal of stricture. See *Boutonnière*.

URETHRYMENO'DES, from *urethra*, and ὑμην, 'a membrane.' That which is caused by a membrane formed in the urethra.

URETICUS, Diuretic, Urinary.

URETRA, Urethra.

URÈTRE, Urethra.

URETRIS, Urinal.

URGINEA SCILLA, Scilla.

URHÆMIA, Uræmia.

URIAS, Fistula (urinary), Urethra.

URIASIS, Lithia, Uresis.

URIC ACID, *Ac'idum u'ricum* seu *urolith'icum* seu *lith'icum*, *Lith'ic*, *Uryl'ic*, *Cal'culous*, *Bezoär'dic*, *Lithia'sic* or *Litheu'ic Acid*, (F.) *Acide urique*. An acid which exists in human urine, chiefly, if not wholly, in the form of urate of soda or urate of ammonia, and which in combination constitutes the greater part of urinary calculi. It is often deposited from the urine in health. See Calculi, urinary.

URIC OXIDE, *Ox'idum u'ricum*, *Xanthic oxide*, *Xanthine*, *Urous acid*. A substance not discovered in healthy urine, although probably bearing some relation to the yellow colouring matter. It is a very rare ingredient of calculous concretions, and little is known either of its chemical or pathological history.

URICUM, Urea.

URICUS, Urinary.

URIDRO'SIS, from ουρον, 'urine,' and ἱδρως, 'sweat.' Urinous sweating. (F.) *Sueur uri-neuse*.

URINA CEREBELLA, see Cerebella—u. Chyli, see Urine — u. Cibi, see Urine — u. Diabetica, Urine, diabetic — u. Febrilis, Urine, febrile — u. Furfuracea, see Furfuraceous—u. Galactodes, see Galactodes—u. Genitalis, Sperm—u. Jumentosa seu Jumentaria, Urine, jumentous — u. Mucosa, Cystirrhœa — u. Nephelodes, see Nepheloid — u. Oroboides seu Orobodes, see Oroboides—u. Pericardii, see Pericardium — u. Potûs, see Urine — u. Sanguinis, see Urine—u. Vaccæ, Urine, cows'.

URINACULUM, Urachus, Urinal.

URINÆ PROFLUVIUM, Diabetes — u. Suppressio, Ischuria—u. Stillicidium, Strangury—u Substillum, Strangury.

URINAIRE, Urinary.

U'RINAL, *Urinato'rium*, *Chernib'ium*, *U'vanē*, *Ure'trie*, *Urinac'ulum*, *Urodochi'um*, *Urod'ochē*, *Urodoche'um*, *Uratra'cium*, *Mat'ula*, *Matel'la*; from *urina*, 'urine.' A name given, 1. To certain vessels, used to pass the urine into. 2. To reservoirs, of different shapes and character, which are adapted to the penis, in cases of incontinence of urine, and which are intended to receive the urine as it flows off.

URINALIS, Diuretic, Urinary.

URINARIA, Antirhinum linaria, Leontodon taraxacum.

U'RINARY, *Urina'rius*, *Urina'lis*, *Urino'sus*, *U'ricus*, *Uret'icus*, (F.) *Urinaire*. Same etymon. That which relates to the urine.

URINARY BLADDER, *Bladder*, *Vesi'ca Urina'ria*, *Cystis*, *Urocys'tis*, (F.) *Vessie*. A musculo-membranous reservoir, intended for the reception of the urine, until the accumulation of a certain quantity solicits its excretion. The bladder is situate in the hypogastric region, between the rectum and pubis in man; and between the pubis and vagina in the female. Its upper region is not covered, except by the peritoneum, posteriorly. From its centre arises the *urachus*. Its lower region is bounded, anteriorly, by the prostate, in man; and rests on the vesiculæ seminales and rectum. In the female, it corresponds to the vagina. The lowest portion of this region bears the name *Bas-fond*. The anterior surface of the organ is not covered by peritoneum. It is attached to the symphysis pubis by a fibro-cellular expansion called the *anterior ligament*. The *posterior ligaments* or *recto-vesicol folds*—*plicæ semilunares*—are duplicatures of the peritoneum on its posterior surface, which extend from this surface to the rectum in the male, and to the uterus in the female. The bladder is composed of a serous membrane, formed by the peri-

toneum; — of a muscular membrane; of a somewhat thick layer of areolar tissue; and is lined on its inner surface by a mucous membrane, which is sometimes raised up, here and there, in long prominences or *columns* by the muscular fibres beneath. To this condition, the French anatomists give the term — *vessie à colonnes*. In the *base-fond* the two ureters open, and the urethra commences; and the triangular space, which the apertures of these three canals leave between them, is called, by the French, the *Trigone vésical* or *Vesical Triangle, Trigo'nus* seu *Trigo'num vesi'cæ* seu *Lieutau'di, Corpus trigo'num*. In the orifice of the urethra, which is also called the neck of the bladder, there is, at its lower part, a more or less prominent tubercle, which is formed by the anterior angle of the *Trigone vésical*, and is called the *Vesical uvula, U'vula vesi'cæ*, (F.) *Luette vésicale*.

The arteries of the bladder proceed from the hypogastric, umbilical, sciatic, middle hemorrhoidal, and internal pudic. Its veins, which are more numerous than the arteries, open into the hypogastric venous plexus. Its nerves emanate from the sciatic and hypogastric plexuses; and its lymphatic vessels pass into the hypogastric ganglia.

URINARY CALCULI. The calculi which form in the urinary passages. See Calculi, urinary.

URINARY PASSAGES, (F.) *Voies urinaires*. The aggregate of canals and cavities intended to contain the urine and convey it externally. These *ways* are composed of excretory ducts, which form the tubular portion of the kidney; of calices; pelvis; ureters; bladder; and urethra.

URINATION, Micturition. M. Béraud elaborately defines it—a function, the result of which is the expulsion of matters principally solid, but held in solution, which have become improper for nutrition.

URINATORIUM, Urinal.

URINE, *Uri'na, ovpov, U'ron, Ure'ma, Lot'ium, Lot, Lapis au'reus, Omich'ma, Recremen'ta* seu *Retrimen'ta vesi'cæ, Aqua pedum, Aqua*, (Old Eng.) *Stale, Lee*, (Prov.) *Herrin, Netting, Saag*. An excrementitial fluid; secreted by the cortical part of the kidney; filtered through the tubular portion; poured *guttatim* from the apices of the tubular papillæ into the pelvis of the kidney; and transmitted by it to the ureters; which convey it slowly, but in a continuous manner, into the bladder, where it remains deposited, until its accumulation excites a desire to void it. The excretion of the fluid takes place through the urethra; and is caused by the action of the abdominal muscles and diaphragm and the contraction of the fibrous coat of the bladder. Urine is transparent; of a citron-yellow colour; of a peculiar odour, and of an acid, saline, and slightly bitter taste. That which is passed some time after taking fluid, is less coloured, and less odorous and dense than that which is voided 7 or 8 hours after eating. The first is the *Uri'na potûs*, (F.) *Urine de la Boisson, Urine of drink:* — the latter *Uri'na sanguinis*, (F.) *Urine de la digestion, Urine de la coction, Urine cuite, Coctedurine, Urine of digestion*. Three distinct varieties of urine may, according to Dr. Golding Bird, be recognised: *First*. That passed some little time after drinking freely of fluids, which is generally pale, and of low specific gravity — 1.003 to 1.009 — *Urina potûs*. *Secondly*. That secreted after the digestion of a full meal; s. g. 1.020 to 1.028, or even 1.030 — *Urina chyli* seu *cibi*. *Thirdly*. That secreted independently of the immediate stimulus of food and drink, as after a night's rest, which is usually of average density—1.015 to 1.025, and presents the essential characters of urine — *Urina sanguinis*.

The following are the ordinary constituents of healthy human urine:—urea, uric acid, [hippuric acid;] extractive matters, embracing alcohol extract, spirit extract, and water extract, with their respective constituents; mucus; brown colouring matter of the urine, (hæmaphæin;) red colouring matter of the urine, (uroërythrin;) carbonic, lactic, hydrochloric, sulphuric, phosphoric, silicic, and hydrofluoric acids; soda; potassa; ammonia; lime; magnesia; and peroxide of iron. The proportion of solid matters in 1000 parts of urine may vary from 20 to 70. The following table expresses the relative amounts of the different components in every 100 parts of the solid matter, according to the analysis of different observers:

	Berzelius.	Lehmann.	Simon.	Marchand.
Urea,	45.10	49.68	33.80	48.91
Uric Acid,	1.50	1.61.	1.40	1.59
Extractive matter, Ammonia, Salts, and Chloride of Sodium,	36.30	28.95	42.60	32.49
Alkaline Sulphates,	10.30	11.58	8.14	10.18
Alkaline Phosphates,	6.88	5.96	6.50	4.57
Phosphates of lime and magnesia,	1.50	1.97	1.59	1.81

Its average specific gravity is about 1.015. The quantity passed by the adult in the 24 hours varies. On the average it may amount to two pounds and a half. Sometimes, the urine, in health and disease, exhibits appearances that have received special names. Thus, that which is characterized by a deficiency of solid matters generally, has been called *Hydru'ria*, (*'ὕδωρ*, 'water;') by a deficiency of urea, *Anazotu'ria*, (*av*, privative, and *azote;*) by a superabundance of urea, *Azotu'ria*. Urine in which the deposit consists of lithic acid, and the lithates, has been termed *Lithu'ria;* and that in which the deposit consists of the earthy and earthy-alkaline phosphates, *Phosphu'ria, Ceramu'ria*, (*κεραμος*, 'potters' earth,') &c. &c. At times, a *pellicle* forms on the surface (*Cremor urinæ*) which consists of mucus and some salts: at others, there is a *cloud*, (*Nubec'ula, nubes,*) towards its upper part, which is called *Enæore'ma* when it is suspended, as it were, about the middle of the liquid. Occasionally, there is a sediment, to which the names *Hypos'tasis, Sedimen'tum*, &c., have been given. (See these various words.) The urine is often deserving of attention in disease; but it has been considered a matter of more importance than it merits. Some empirics have presumed to pronounce on the nature of disease by simply inspecting it. See Uroscopy.

Human urine was, at one time, considered aperient; and was given in jaundice, in the dose of one or two ounces. Cows' urine, *Urina Vaccæ, Allflower water*, was once used, warm from the cow, as a purge, in the dose of Oss.

Urine has been variously designated by pathologists, according to its appearance, &c., for example:—

URINE, ANÆ'MIC, *Uri'na anæ'mica*. A term used, but not felicitously, for the form of urine that occurs in anæmia, chlorosis, &c.—Becquerel.

URINE ARDENTE, Ardent urine—u. Bloody, Hæmaturia — *u. de la Boisson*, Urine, hysterical, see Urine—*u. Briqueté*, see Lateritious—*u. de la Coction*, see Urine.

URINE, CRUDE, (F.) *Urine crue*. Urine that is thin, transparent, and but little coloured, affording neither cloud nor deposite.

URINE CRUE, Urine, crude — *u. Cuite*, see Urine.

URINE, CYSTIN'IC, *Cystinu'ria*. Urine containing cystine or cystic oxide in solution, or as a deposite.

URINE, DIABET'IC, *Uri'na diabe'tica.* Urine passed in *Diabetes mellitus, Melitu'ria.* It contains a large quantity of sugar analogous to that of the grape, which may be separated in the form of crystals. In other respects, the urine is very abundant and very limpid in that affection.

URINE DE LA DIGESTION, see Urine.

URINE, DROP'SICAL, is an ammoniacal urine, often containing much albumen and scarcely any urea.

URINE, DYSPEP'TIC, has been found to precipitate tannin abundantly, and to soon putrefy.

URINE ÉPAISSE, Urine, mucilaginous.

URINE, FEBRILE, *Uri'na febri'lis.* Urine discharged in inflammation and inflammatory fever.

URINE, FILAMENTOUS, see Filamentous.

URINE, FLOC'CULENT, (F.) *Urine floconneuse,* is when the fluid is troubled by flocculi, suspended in it.

URINE, FURFURA'CEOUS, see Furfuraceous—*u. Floconneuse,* Urine, flocculent—*u. des Goutteux,* Urine, gouty.

URINE, GOUTY, (F.) *Urine des goutteux,* contains much phosphate of lime, and, after severe attacks of gout, precipitates a mixture of the uric and rosacic acids.

URINE HUILEUSE, Urine, oily.

URINE, HYSTER'ICAL, is clear, colourless, and similar to the *Urine de la Boisson.*

URINE, ICTER'ICAL, contains bile.

URINE, INCONTINENCE OF, Enuresis.

URINE OF INFLAM'MATORY DISEASES. This is, generally, small in quantity, and very high-coloured.

URINE, INVOLUNTARY DISCHARGE OF, Enuresis.

URINE, JUMEN'TOUS, *Uri'na jumento'sa* seu *jumenta'ria,* (F.) *Urine Jumenteuse.* A term used, by the French, for ammoniacal urine, rendered turbid by a substance similar to small grains of dust, which causes it to resemble the urine of herbivorous animals.

URINE LACTESCENTE, U. milky—*u. Laiteuse,* Urine, milky.

URINE, MILKY, (F.) *Urine lactescente* ou *laiteuse.* White and troubled urine.

URINE, MUCILAG''INOUS, (F.) *Urine épaisse.* Urine containing much mucus.

URINE, NERVOUS. Thin and very liquid urine; such as is passed shortly after the attack of nervous diseases.

URINE OF NERVOUS FEVERS is generally very thin; and often deposits a mixture of uric and rosacic acids.

URINE, OILY, (F.) *Urine huileuse,* is that which pours like oil, or which has an oily pellicle at its surface.

URINE, OXAL'IC, *Oxalu'ria.* Urine containing a salt of the oxalic acid.

URINE, PHOSPHORES'CENT, *Phosphoru'ria, Phosphu'ria.* Urine which is luminous or phosphorescent.

URINE, PURPURIC, see Porphyruria.

URINE, RICK'ETY, contains much phosphate of lime.

URINE, SANDY, Arenosa urina—u. Stoppage of, Ischuria—*u. Ténue,* Urine, thin.

URINE, THIN, (F.) *Urine ténue.* Urine that is transparent, slightly coloured, and but little dense.

URINEUX, Urinous.

URINIF'EROUS, *Urinifer,* (F.) *Urinifère,* from *ουρον,* 'urine,' and *fero,* 'I carry.' That which carries urine.

URINIFEROUS SUBSTANCE OF THE KIDNEY, see Kidney.

URINIF'EROUS TUBES OF DUCTS OF BELLI'NI, *Tu'buli* seu *duc'tus urinif'eri Belli'ni, Tu'buli Belli'ni* seu *recti, Bellinia'ni Ductus, Bellinia'næ Fis'tulæ.* The collection of small tubes, converging from the cortical part of the kidney to the apices of the papillæ. The tortuous uriniferous ducts are called *Tubes of Ferrein, Tu'buli contor'ti* seu *Ferrei'nii.*

URINIP'AROUS, (F.) *Urinipare,* from *urina,* 'urine,' and *parere,* 'to produce.' An epithet for tubes in the cortical portion of the kidney, which prepare the urine.

URINODES, Urinous.

URINOM'ETER, from *ουρον,* 'urine,' and *μετρον,* 'measure.' A small hydrometer for taking the specific gravity of urine. The urinometer suggested by Dr. Prout is divided into 60 degrees, the zero being the point at which it floats in distilled water. The numbers on the scale added to 1000, the specific gravity of water, give the particular specific gravity: thus, supposing the number cut by the surface of the liquid to be 30, it would indicate a s. g. of 1.030. The letters H. S. on the back of the scale mean "healthy standard," which ranges from 10° to 20°.

Urinometer.

U'RINOUS, *Urino'sus, Urino'des,* (F.) *Urineux.* Having the character of urine. Similar to urine.

UROCE'LE, *Œde'ma scroti urino'sum, Urorscheoce'lē, Oncheoce'lē urina'lis,* from *ουρον,* and *κηλη,* 'a rupture.' A tumour of the scrotum, owing to the effusion of urine into the same, and into the areolar tissue.

UROCHES'IA, *Urochez'ia,* from *ουρον,* and *χεζειν,* 'to go to stool.' A discharge of urine by the bowels.

UROCRASIA, Enuresis.

UROCRIS'IA, from *ουρον,* and *κρινω,* 'I judge.' *Urocrite'rion.* A judgment formed either of the urine, or of disease after inspecting the uriue.

UROCRITERION, Urocrisia.

UROCYSTIS, Urinary bladder.

UROCYSTITIS, Cystitis.

UROCYSTOCATARRHUS, Cystirrhœa.

URODIAL'YSIS, from *ουρον,* and *διαλυσις,* 'dissolution, loss of strength.' A partial and temporary suspension of the function of the kidney, such as occurs in the course of most acute diseases. A condition of the function of the kidney and of the urine, similar to that observed in acute diseases, but without local mischief or preceding inflammatory fever, has been termed, when occurring in children, *Urodial'ysis Neonato'rum;* in the aged, *Urodialysis Senum.*—Schönlein.

URODOCHIUM, Urinal.

URODYN'IA, from *ουρον,* and *οδυνη,* 'pain.' Pain during the excretion of the urine.

URŒDÈMA, Urapostema.

UROERYTHRIN, see Porphyruria.

UROGEN'ITAL, *Urogenita'lis, Gen'ito-u'rinary, Gen'ito-urina'rius.* Relating or appertaining to the urinary and genital apparatus—as the 'urogenital organs'—*Or'gana urogenita'lia.*

UROGENITAL SINUS, *Sinus uro-genita'lis.* A cavity or canal in the embryo of the mammalia opening externally, in which the excretory ducts of the Wolffian bodies, the ureters and the efferent parts of the generative apparatus, terminate internally. It is prolonged into the urachus. Subsequently it becomes separated by a process of division into a *pars urina'ria* and a *pars genita'lis.* The former, extending towards the urachus, is converted into the urinary bladder;

whilst from the latter are formed the *vesiculæ seminales* in the male, and the middle portion of the uterus in the female.—J. Müller.

UROLITHI, Calculi, urinary.

UROLITHIASIS, Lithia.

UROLITHOLOG''IA, from *ουρον*, *λιθος*, 'a stone,' and *λογος*, 'a description.' A description of urinary calculi.

UROLITHOTOMIA, Lithotomy.

UROLOGY, Uronology.

UROMANTI'A, from *ουρον*, and *μαντεια*, 'divination.' The art of divining diseases by simple inspection of the urine; *Uroseo'pia*. One professing to be able to do this is called *Uroman'tes*. Vulgarly, a *water-doctor*, *water-caster*.

UROM'ELES, (F.) *Uromèle*, from *ουρα*, 'a tail,' and *μελος*, 'a limb.' A genus of monsters in which the two lower limbs are united, very incomplete, and terminated by a single foot, which is almost always imperfect, and the sole of which is turned forwards.—I. G. St. Hilaire.

UROMPH'ALUS, *Her'nia U'rachi*. A monstrosity, which consists in the protrusion of the urachus at the umbilicus.

URON, Urine.

URON'CUS, from *ουρον*, and *ογκος*, 'a swelling.' A urinary swelling.

URONOL'OGY, *Uronolog''ia*, *Urol'ogy*, *Urolog''ia*, from *ουρον*, and *λογος*, 'a description.' The part of medicine which treats of the urine.

UROPHTHISIS, Diabetes mellitus.

UROPLA'NIA, from *ουρον*, and *πλανη*, 'wandering.' The presence of urine in other parts than the urinary organs.

UROPOE'SIS, *Uropoïe'sis*, from *ουρον*, and *ποιεω*, 'I make.' *Secre'tio uri'næ* seu *lo'tii*. The secretion of urine by the kidney.

UROPOIESIS, Uropoesis.

UROPYGION, Coccyx.

UROPYGIUM, *Croupion*.

URORHODINE, see Porphyruria.

URORRHAGIA, Diabetes.

URORRHŒA, Enuresis, Diabetes.

UROSCHEOCELE, Urocele.

UROSCOPIA, see Uromantia.

URO'SES, from *ουρον*, 'urine.' Diseases of the urinary organs.—Alibert.

UROSTEALITH, *Urosteal'ithos*, from *ουρον*, *στεαρ*, 'suet,' and *λιθος*, 'stone.' A peculiar fatty ingredient of urinary calculi, discovered by Heller.

UROSTENOSIS, Urethrostenosis.

UROUS ACID, Uric oxide.

UROZEMIA, Diabetes—u. Albuminosa, Kidney, Bright's disease of the—u. Mellita, Diabetes mellitus.

URRHODINE, see Porphyruria.

URROSACINE, see Porphyruria.

URTI'CA, *U. Dioi'ca* seu *major* seu *his'pida*, *Pyr'ethrum*, *Ad'icē*, *Common stinging nettle*, (Prov.) *Ettle*, (F.) *Ortie*. *Ord.* Urticaceæ. *Sex. Syst.* Monœcia Tetrandria. This plant has been long used for medical and culinary purposes. The young shoots, in the spring, are considered to possess diuretic and antiscorbutic properties. The pain produced by its sting is well known, but it is not to be compared to the torture occasioned by *Urtica atim'ulans*, and *U. crenula'ta* of India; and, still less, to *Urtica urentis'sima* of Timor, which is called by the natives *Daonn Setan*, *'Devil's leaf,'* on account of the persistence and severity of the pain.

URTICA BALEARICA, U. pilulifera—u. Crenulata, see Urtica—u. Dioica, Urtica—u. Hispida, Urtica—u. Iners magna fœtidissima, Galeopsis—u. Major, U. dioica—u. Minor, U. urens—u. Mortua, Lamium album.

URTICA PILULIF'ERA, *U. Pilulo'sa* seu *Roma'na* seu *Balea'rica*, *Pill-bearing Nettle*, (F.) *Ortie Romaine*. The seed was formerly given in diseases of the chest.

URTICA PILULOSA, U. pilulifera—u. Romana, U. pilulifera—u. Stimulans, see Urtica.

URTICA URENS, *U. minor*, *Dwarf nettle*, (F.) *Ortie brulante*. A lesser variety of the nettle, possessing similar virtues.

URTICA URENTISSIMA, see Urtica.

Nettles have been used as stimulants to paralytic limbs.

URTICAIRE, Urticaria.

URTICA'RIA, from *urtica*, 'a nettle,' (*uro*, 'I burn;') *Enanthe'sis urtica'ria*, *Ure'do*, *Scarlati'na* seu *Febris* seu *Pur'pura urtica'ta*, *Cnido'sis*, *Urtica'ria porcel'lana*, *Exanthe'ma urtica'tum*, *Epinyc'tis prurigino'sa*, *Febris rubra prurigino'sa*, *Saltans rosa*, (F.) *Urticaire*, *Fièvre Ortie*, *Porcelaine*, *Nettle-rash*, *Nettle-springe*; vulgarly *Hives*, *Bold Hives*; from *urtica*, 'a nettle,' because the eruption resembles that produced by the stings of a nettle. A disease distinguished by those elevations of the cuticle called *wheals*. They have a white top, and are often surrounded by a diffuse redness. They excite intolerable itching, especially when the person is warm in bed. The eruption frequently goes and comes once or more in the 24 hours, and is generally dependent upon gastric derangement. In some people, nettle-rash is induced by shell-fish, eggs, nuts, &c. It is not usually a disease of any consequence, and its treatment is limited to the use of absorbent laxatives, and simple general means. Willan has described six varieties of the complaint:—*Urtica'ria febri'lis*, *U. evan'ida*, *U. perstans*, *U. confer'ta*, *U. subcuta'nea*, and *U. tubero'sa*.

URTICARIA PORCELLANA, Essera, Urticaria.

URTICA'TIO, *Cnido'sis*, *Urtica'tion*, from *urtica*, 'a nettle.' A sort of flagellation, with nettles;—used with the intention of exciting the skin.

URUCU, Terra Orleana.

URYLIC ACID, Uric acid.

USNEA, Lichen saxatilis—u. Florida hirta, Lichen plicatus—u. Hirta, Lichen plicatus—u. Plicata, Lichen plicatus.

USSACU, Hura Brasiliensis.

USTILAGO, Ergot.

USTIO, Burn, Ustion.

USTION, *Us'tio*, *Causis*, from *urere*, *ustum*, 'to burn.' The act of burning or of applying the actual cautery. Also, the effect of cauterization; a burn.

USTULA'TIO, *Ustula'tion*. Same etymon. A pharmaceutical operation by which a substance is dried by heat. It is often restricted to the roasting of ores to drive off the volatile matters, as in the case of arsenic.

USUALIA, Officinals.

USUS, Habit.

UTER, Uterus.

UTERI ADSCENSUS, Hysteria—u. Anteversio, Hysteroloxia anterior—u. Carcinoma, Metrocarcinoma—u. Convulsivus morbus, Lorind matricis—u. Coryza, Leucorrhœa—u. Exulceratio, Hysterelcosis—u. Flexio, Hysteroloxia—u. Inclinatio, Hysteroloxia—u. Obliquitas, Hysteroloxia—u. Pronatio, Hysteroloxia anterior—u. Pruritus, Nymphomania—u. Reflexio completa, Hysteroloxia posterior—u. Retroversio, Hysteroloxia posterior—u. Rheuma, Leucorrhœa—u. Ulcus, Hysterelcosis—u. Versio incompleta, Hysteroloxia.

U'TERINE, *Uteri'nus*, from *uterus*, 'the womb.' That which belongs or relates to the womb.

UTERINE ARTERY, *Arte'ria uteri'na hypogas'trica*. Its size is always in a ratio with the greater or less state of development of the uterus. It arises from the hypogastric, either separately

or with the umbilical, or from the internal pudic; passes upon the lateral parts of the vagina, to which it gives branches; and afterwards ascends on the sides of the uterus, and divides into a considerable number of very tortuous branches, which enter the tissue of the organ.

Uterine Bougie, Sound, uterine.

Uterine Brother. One born of the same mother, but of a different father.

Uterine Glands, Utricular glands.

Uterine Muscle of Ruysch consists of some fleshy fibres at the fundus of the uterus, which he regarded as forming a particular muscle.

Uterine Sound, Sound, uterine.

UTERI'NUS FRATER. In law, a brother by the mother's side.

UTERO-ABDOMINAL SUPPORTER, see Belt, Russian.

UTERO-GESTATION, Pregnancy.

UTEROMANIA, Nymphomania.

U'TERUS, οὐδαρ, *Uter, Utric'ulus, Vulva, Loci, L. mulie'bres, Vulva, Venter, Conceptac'ulum, Matrix, Arvum* seu *Ager natu'ræ, Hys'tera, Metra, Stera, An'gus, Delphys, Alvus, Epompha'lion, Gaster, Mater, Nedys, Postrema*, the *Womb*, (Sc.) *Weam*, (Prov.) *Wem*, (F.) *Matrice, Sein*. The uterus, destined to lodge the fœtus from the commencement of conception till birth, is a hollow symmetrical organ, having the shape of a truncated conoid: it is situate in the pelvis, between the bladder and the rectum, above the vagina, and below the convolutions of the small intestine. The uterus is flattened from before to behind, and is nearly an inch in thickness. It is two inches broad at its highest part, and becomes narrower towards the vagina; terminating in a contracted portion, called the *cervix* or *neck*, to distinguish it from the rest of the organ, called the *body*. From its *fundus* or upper portion, the Fallopian tubes pass off. The mouth is called *Os U'teri, Os Tincæ, Os u'teri extern'um, Orific''ium vagina'lis*. At the point where the body of the uterus is continuous, below, with the neck, the cavity is slightly constricted, forming what is sometimes named the *internal orifice, Os u'teri intern'um, Os intern'um, Isthmus* seu *os'tium u'teri, Orific''ium uteri'num*. Between these is the *Cana'lis cervi'cis*.

The cavity of the uterus is very small, and its parietes are thick. The portion of the cavity corresponding with the body is triangular and flattened. Its superior angles present the extremely fine orifices of the Fallopian tubes. The cavity of the neck is slightly dilated before opening into the vagina. The uterus is composed, 1. Of a *serous membrane*. This is external, and furnished by the peritoneum; which is reflected upon the uterus from the posterior surface of the bladder and the anterior surface of the rectum. These folds of the peritoneum are sometimes called, respectively, the *anterior* and the *posterior* ligaments. The former are also named the *vesico-uterine* and the latter the *recto-uterine* folds or *plicæ semiluna're*. It forms, also, the *broad ligaments of the uterus, Ligamen'ta lata, Alæ vespertilio'nis, Re'tia U'teri*. These contain, above, the Fallopian tube; beneath and anteriorly, the round ligaments; and, behind, the ovary. They are two membranous productions or duplicatures of the peritoneum, sent from the edges of the uterus and posterior extremity of the vagina, in a transverse direction, to be fixed to, and line, the side of the pelvis. 2. Of a *mucous membrane*, which is a prolongation of that of the vagina, and extends into the tubes. 3. Of a *proper tissue*, whose thickness is considerable. It is of a close texture; is grayish and elastic; and resists the instrument that divides it. Its intimate nature is but little known. During gestation it is truly muscular. The arteries of the uterus proceed from the spermatic and hypogastric. Its veins follow the same course, and bear the same name as the arteries. They are very tortuous, and form large sinuses in the parietes of the organ, called *U'terine Si'nuses*. Its nerves proceed from the sciatic and hypogastric plexuses. Its lymphatic vessels are very multiplied; and during pregnancy acquire enormous dimensions. The changes experienced by the uterus during gestation, and after delivery, are very numerous and important to be known. They regard its situation, direction, size, shape, texture, connexions vital properties, &c.

Uterus, Abdomen — u. Anteversion of the, Hysteroloxia anterior.

Uterus Bif'idus. A double uterus. One separated into two cavities.

Uterus Duplex, Dihysteria — u. Hour-glass contraction of the, *Chaton*—u. Inclinatus, Hysteroloxia.

Uterus, Ir'ritable, *Neural'gia of the Uterus*. A disease characterized by deep-seated pain in the lower part of the abdomen, and in the back and loins; generally diminished by lying down, and increased by exercise, and more severe for a few days preceding and during menstruation. On examination *per vaginam*, the uterus is found to be tender on pressure, *Metryperæsthe'sis;* and the cervix and body slightly swollen, but not usually indurated. It is an obstinate affection, but frequently ends of itself after years of suffering. The treatment must be, — the horizontal posture; local blood-letting to the uterus; emollients; soothing injections; narcotics, warm bath, &c. See Hysteralgia.

Uterus, Inversion of the, *Inver'sio U'teri, Metranas'trophē, Ædopto'sis Uteri inver'sa*, (F.) *Inversion* ou *Renversement de la Matrice*. The uterus, displaced and turned inside out. This can only happen through want of caution on the part of the medical practitioner. It is a fatal accident, unless speedily reduced. This must be done by gradually returning the superior part, by grasping it with the hand, and making the rest follow.

Uterus Masculinus, see Ejaculatory ducts — u. Obliquus, Hysteroloxia — u. Retroversion of the, Hysteroloxia posterior.

Uterus, Rupture of the, *Metrorrhex'is, Hysterorrhex'is, Ruptu'ra* seu *Perfora'tio Uteri, Laceration of the Womb*, (F.) *Rupture* ou *Déchirure de la Matrice*. This dreadful accident occurs during labour, and is known to have taken place, when the child's head suddenly recedes during a pain, with vomiting, sinking of the pulse, cold sweats, &c. When it is evident that this has occurred, the hand must be passed into the uterus, and the feet of the child be brought down.

Cases are on record, in which partial lacerations of the uterus have healed, and the patient has done well. This is a rare event, and not to be anticipated.

UTRICLE, see Semicircular canals.

U'tricle, Primor'dial, *Utric'ulus primordia'lis*. A delicate membrane, of protein composition, which lines the cell wall of vegetable structures, and from the exterior of which the layer of cellulose is secreted.

UTRIC'ULAR, *Utricula'ris;* from *utriculus*, (diminutive of *uter, utris*,) 'a small bag or bottle.' Relating to or resembling a small bag or bottle.

Utricular Glands, *Glan'dulæ utricula'res* seu *uteri'næ*. The glands or follicles in the interior of the uterus, which are concerned in the formation of the decidua.

UTRICULUS, see Ejaculatory ducts, Uterus — u. Communis, see Semicircular canals — u. Lacteus, Receptaculum chyli — u. Primordialis, Utri-

cle, primordial — u. Prostaticus, see Ejaculatory ducts.

UVA, Uvula, see Vitis vinifera — u. Inversa, Paris—u. Lupina, Paris—u. Passa, see Vitis vinifera—u. Ursi, see Arbutus uva ursi—u. Vulpina, Paris.

Uvæ Corinthiacæ, see Vitis Corinthiaca.

Uvæ Passæ, *Rhages, Dried Grapes, Raisins*, see Vitis vinifera.

Uvæ Passæ Majores, see Vitis vinifera — u. Passæ minores, see Vitis Corinthiaca — u. Passæ sole siccatæ, see Vitis vinifera.

UVARIA TRILOBA, see Carica papaya.

UVATIO, Ceratocele, Staphyloma.

U'VEA, from *uva*, 'an unripe grape.' *Tu'nica acino'sa* seu *acinifor'mis* seu *uva'lis* seu *acina'lis* seu *uvifor'mis* seu *rhagoïdes* seu *uvea* seu *perfora'ta, Membrana uvea, Rhagoï'des, Rhox*, (F.) *Uvée*. Some anatomists have given this name to the choroid coat of the eye; others, to the posterior layer of the iris, on account of the black and very thick varnish that covers it. See Iris.

Uvea, Commissure of the, Ciliary ligament.

UVÉE, Uvea.

UVEI'TIS; a word of hybrid formation; from *uvea*, 'the uvea,' and *itis*, denoting inflammation; properly, *Rhagodei'tis*. Inflammation of the uvea. See Iritis.

UVIGENA, Uvula.

UVIGERA, Uvula.

U'VULA, diminutive of *uva*, 'a grape.' *Pinnac'ulum for'nicis guttura'lis, Uva, Staph'ylè, Tintinnab'ulum, Columel'la, Cion, Ci'onis, Garga'reon, Colum'na oris, Gargu'lio, Interseptum, Processus* seu *Cartila'go U'vifer, Uvig''ena, Uvig''era, Pap of the Throat, Himas, Plectrum, Sublin'gua, Sublin'guium*, (Sc.) *Pap of the Hâse*, (F.) *Luette*. A fleshy appendix or prolongation, which hangs from the middle or free edge of the velum palati. The uvula has a conical shape, and is of a greater or less size in individuals. It is formed, especially, by the mucous membrane of the velum palati; and contains, within it, the azygos uvulæ muscle. Its use is not clear.

Also, a small prominence or lobule in the portion of the cerebellum that forms the posterior boundary of the fourth ventricle, *U'vula cerebell'i*. It is on the median line, and behind the nodulus.

Uvula, see Vermiform process inferior — u. Cerebelli, see Uvula—u. Decidua, Staphylœdema — u. Relaxata, Staphylœdema — u. Vesicæ, see Urinary bladder — u. Vesical, see Urinary bladder.

U'VULAR, *Uvula'ris*, from *uvula*. That which belongs to the uvula.

Uvular Glands are small follicles, belonging to the mucous membrane covering the uvula.

UVULARIA, so called from the flowers hanging like the uvula [?], Ruscus hypoglossum.

Uvula'ria Perfolia'ta, *Smaller Bellwort*; indigenous; *Order*, Melanthaceæ; flowering in May and June. The root, when fresh, is subacrid and mucilaginous. A decoction of the plant is used in sore mouth. It is said to cure the bites of rattlesnakes.

Uvularia Grandiflo'ra and *U. Sessilifo'lia* have similar properties.

UVULI'TIS, a word of hybrid formation, from *uvula*, and *itis*, denoting inflammation. *Angi'na uvula'ris, Staphyli'tis, Cioni'tis, Inflamma'tio u'vulæ*, (F.) *Inflammation de la Luette, Falling down of the Palate*. Inflammation of the uvula. When to a slight degree, *Hypostaphyli'tis*.

V.

VACCIN, see Vaccina.

VACCI'NA, *V. primig''ena* seu *vaccinato'ria* seu *antivariolo'sa, Vaccin'ia, Vari'ola vaccina, V. vaccin'ica* seu *tuto'ria* seu *tutrix, Exanthe'ma vaccina* seu *antivariolo'sum, Syn'ocha vaccina, Em'phlysis vaccina inser'ta, Vacci'ola, V. scutella'ta, V. vera, Vari'olæ tuto'riæ, Cow-pox, Kine Pock, Inoc'ulated Cow-pox*, from *vacca*, 'a cow;' (F.) *Vaccine*. The cow-pox is a disease of the cow, arising spontaneously, which, if transmitted to man by means of inoculation, may preserve him from small-pox contagion. The promulgation of this valuable property of the vaccine virus is due to Dr. Jenner. When inoculating for small-pox in Gloucestershire, in 1775, he was surprised to meet with a number of persons in the same district, on whom the insertion of the virus produced no effect, although they had never passed through small-pox. On investigation, he found that all these persons had previously been affected by a pustular eruption of the cow, which they had taken by milking the animal; and which eruption they called *Cow-pox*. This discovery induced him to institute experiments, and he found that such preservative effect actually existed. The *Vaccine Virus, Virus Vaccinum*, (F.) *Vaccin* or the fluid of the eruption, is not now usually taken immediately from the cow: experience having demonstrated that it is nearly as efficacious when obtained from the human vesicle. The characteristic of cow-pox eruption is:— a semi-transparent, pearl-coloured vesicle, with a circular or somewhat oval base; its upper surface, until the end of the 8th day, being more elevated at the margin than in the centre; and the margin itself being turgid, shining, and rounded, so as often to extend a little over the line of the base. This vesicle is filled with clear lymph, contained in numerous little cells, that communicate with each other. After the 8th or 9th day from the insertion of the virus, it is surrounded by a bright red, circumscribed areola, which varies in its diameter, in different cases, from a quarter of an inch to two inches; and is usually attended with a considerable tumour, and hardness of the adjoining areolar membrane. This areola declines on the 11th or 12th day; the surface of the vesicle then becomes brown in the centre; and the fluid in the cells gradually concretes into a hard, rounded scab or crust, of a reddish-brown colour, which at length becomes darker, contracted, and dry, but is not detached till three weeks after vaccination. It leaves a permanent, circular cicatrix, about five lines in diameter, and a little depressed; the surface being marked with very minute pits or indentations, denoting the number of cells of which the vesicle had been composed. This is the progress of the *genuine cow-pox*. At times, fever occurs about the 9th or 11th day; but, at others, not the slightest indisposition is felt. Aberrations from this progress occur, which must be attended to; as the same preservative influence is not exerted by *irregular* or *spurious cow-pox*. If the erup-

tion runs speedily to a height, has an areola too early, is irregular at its edges, and contains pus instead of a limpid fluid, — it cannot at all be depended upon.

Small-pox occurs, occasionally, as an epidemic after vaccination. For a while, the enthusiastic advocates of vaccination would not admit the affection to be small-pox; and, accordingly, they gave it the name Varioloid. It is unquestionably small-pox, but modified, and greatly divested of its terrors by previous vaccination; and it is said to happen less frequently after vaccination than after *small-pox inoculation*. Vaccination is now practised everywhere, except among those in whom ignorance and prejudice exclude the lights of reason and philanthropy. There is ground, however, for the belief, that for full protection *revaccination* may be occasionally necessary.

Vaccina Antivariolosa, Vaccina — v. Primigena, Vaccina — v. Tutoria, Vaccina — v. Tutrix, Vaccina — v. Vaccinatoria, Vaccina.

VACCINAL, Vaccine.

VACCINA'TION, *Vaccina'tio*, from *vacca*, 'a cow;' *Cow-pox inoculation*, *Jenne'rian inoculation*. An operation which consists in inserting the vaccine virus under the cuticle, so that it may come in contact with the absorbents. It is extremely simple, and requires merely that the point of the lancet should be held under the cuticle for a short time. The best time for taking the matter from the *Cow-pox vesicle*, for vaccination, is about the 7th or 8th day, before the appearance of the areola, when it ought to be limpid and transparent. The most certain method is, to pass it from arm to arm; but this is not always convenient; and, hence it is taken upon *points* or pieces of quill, or between glasses. It must, of course, be softened for use. This is done by means of a little water, which does not destroy its efficiency. The scab, too, which falls off about the end of three weeks—sooner or later — is capable of communicating the affection, if dissolved in water; and this is the most common method of transmitting the vaccine virus in some countries.

VAC'CINATOR, *Vac'cinist*. One who inoculates for the cow-pox.

VACCINE, Vaccina.

Vaccine, *Vacci'nus*, *Vaccina'lis*, (F.) *Vaccinal*; same etymon. Relating or appertaining to vaccination, as the '*vaccine* vesicle,' 'a *vaccine* physician.'

VACCINEL'LA. A term employed by some to designate spurious cow-pox. *Vaccin'oïs*, *Vacci'ola spu'ria* seu *lepro'sa*, (F.) *Vaccinelle*, *Vaccinoïde*.

VACCINIA, Vaccina—v. Palustris, Vaccinium oxycoccos.

VACCINIST, Vaccinator.

VACCINIUM MACROCARPON, see V. oxycoccos.

Vaccin'ium Myrtyl'lus, either corrupted from *hyacinthus*, or, and more probably, *baccinium*; from *baccæ*, 'berries,' in allusion to its fruit. *Vitis idæ'a myrtil'lus*, *Vacciu'ia myrtil'lus*, *Vaccin'ium nigrum*, *Myrtle Berry*, *Bilberry*, *Bleaberry*, *Whortle-berry*, *Black Whorts*, (Sc.) *Blaeberry*, (Prov.) *Hurtleberry*, *Whimberry*, (F.) *Airelle Anguleuse*, *Raisin de Bois*. *Ord.* Vaccinieæ. *Sex. Syst.* Octandria Monogynia. The berries—*Baccæ Myrtillo'rum* — are esteemed to be antiscorbutic, when prepared with vinegar. They are also said to possess antiseptic and sub-astringent properties when dried. They are not used in medicine; but are frequently eaten with milk and sugar.

Vaccinium Nigrum, V. myrtillus.

Vaccinium Oxycoc'cos, *Oxycoc'cos*, *O. palustris*, *Schollera oxycoccos*, *Vaccinia palus'tris*, *Vitis Idæ'a palus'tris*, *Moorberry*, *Cranberry*, *Mossberry*, *Swamp Redberry*, *Sourberry*, (F.) *Canneberge*. The berries are pleasantly acid and cooling. They make an agreeable preserve. The common American Cranberry is from *Vaccinium macrocarpon*.

Vaccinium Pennsylvan'icum, *Low Blueberry*. The leaves and bark of the root are astringent.

Vaccinium Punctatum, V. vitis idæa—v. Resinosum, Gaylussacia resinosa.

Vaccinium Stamin'eum, *Buckberry*, *Squaw Huckleberry*, *Deerberry*. The leaves of these plants are astringent.

Vaccinium Vitis Idæ'a, *V. puncta'tum*, *Vitis Idæ'a puncta'ta*, *Am'pelos Idæ'a*, *Red Bilberry*, (Sc.) *Brawlins*, *Alpine Cranberry*, *Whortleberry*, *Cowberry*, (F.) *Airelle* ou *Canneberge ponctuée*. A decoction of the leaves has been used in calculous affections. They are astringent. The ripe berries are pleasantly acid, and refrigerant. *Whortleberries* are furnished by different species of Vaccinium.

VACCINOÏDE, Vaccinella.

VACCINOIS, Vaccinella.

VACCINUS, Vaccine.

VACCIOLA, Vaccina — v. Leprosa, Vaccinella — v. Scutellata, Vaccina — v. Spuria, Vaccinella —v. Vera, Vaccina.

VACILLA'TIO, *Tituba'tio*, from *vacillare*, 'to waver.' Staggering; waddling — *claudica'tio anat'ica*.

Vacillatio Dentium, Odontoseisis.

VAGIN, Vagina.

VAGI'NA, 'a sheath,' *V. mulie'bris* seu *uteri'na* seu *U'teri* seu *Penis*, *Sinus mulie'bris* seu *Pudo'ris* seu *Puden'di*, *Col'eus*, *Peris*, *Perin*, *Colpos*, *Vulvo-uterine canal*, (F.) *Vagin*, *Conduit de la pudeur*. A cylindrical canal, five or six inches long; situate within the pelvis, between the bladder and rectum. It communicates by one extremity, *Aulos*, with the vulva; by the other, *Fornix* seu *Fundus*, with the womb, *Pars* seu *Portio vagina'lis u'teri*, the neck of which it embraces. The vagina is lined, internally, by a mucous membrane; and is partly closed, in young females, by the hymen, and carunculæ myrtiformes. Around the mucous membrane is a layer of spongy, erectile tissue; and a cellulo-vascular membrane. A constrictor muscle; numerous vessels furnished by the vaginal artery, particularly; veins and nerves, proceeding from the sciatic plexus, also, enter into the composition of the organ.

The term Vagina or sheath, *Theca*, is extended to many parts, which serve as envelopes to others.

Sheath, (F.) *Gaîne*, is sometimes applied to the fascia enveloping the limbs; to areolar membrane, enveloping the muscles, and entering between their fibres; to that which surrounds the blood-vessels; to the synovial membranes surrounding tendons, and lining the gutters of bones, &c.

Vagina Cordis, Pericardium — v. Femoris, Fascia lata aponeurosis—v. Funiculi Umbilicalis, see Funiculus umbilicalis — v. Glissonii, Capsule of Glisson—v. Malleolaris externa, Retinaculum tendinum perinæorum—v. Muliebris, Vagina—v. Muscularis, Perimysium — v. Nervorum, Neurilemma—v. Penis, Vagina—v. Pili, see Hair—v. Portæ, Capsule of Glisson — v. Uterina, Vagina.

Vagina of the Vena Porta, *Sheath of the Vena Porta*, (F.) *Gaîne de la Veine-porte*, is the areolar membrane that accompanies the divisions of the vena porta into the substance of the liver.

VAGINÆ SYNOVIALES, Bursæ mucosæ.

VAG''INAL, *Vagina'lis*, from *vagina*, 'a sheath. Relating or pertaining to a sheath.

Vaginal Artery. This exists, as a matter of

course, only in the female. It arises from the hypogastric or from the uterine, vesical, internal pudic, umbilical, &c., and sends its branches, first to the lateral parts of the vagina, and afterwards to the anterior and posterior surfaces.

VAGINAL BIL'IARY PLEXUS. A plexus of ramifications of the hepatic duct through the capsule of Glisson.

VAGINAL BRANCHES OF THE VENA PORTA are those which have to pass through the sheath of the capsule of Glisson, previous to entering the interlobular spaces. In this course, they form the *vaginal plexus*. There are, also, *vaginal branches*, and a *vaginal plexus* formed by the hepatic artery.

VAGINAL COAT OF THE EYE, see Eye.

VAGINAL COAT OF THE TESTICLE, *Tu'nica Vagina'lis* seu *Elytroï'des* seu *Elytro'des*, is the serous membrane which envelops the testicle. Before the descent of the testicle, the tunica vaginalis does not exist. It is formed by a prolongation, furnished by the peritoneum to the testicle when it issues from the abdomen. The tunica vaginalis forms a close sac, investing the testicle and epididymis, without containing them in its cavity, and reflected so as to form a bag around the circumference of the testis; hence it is divided into *Tu'nica vagina'lis pro'pria* and *Tu'nica vagina'lis reflex'a*. Between the two layers, the inner surface is smooth, and lubricated by a serous fluid.

VAGINAL GANGLIA, see Spermatic ganglion.

VAGINAL PLEXUS, see Vaginal branches of the vena porta.

VAGINAL PROCESS OF THE TEMPORAL BONE, (F.) *Apophyse vaginale* ou *engaînante, Gaîne de l'apophyse styloïde, Chaton*, is a bony crista, which embraces the base of the styloid process.

VAGINAL PULSE, Pulse, vaginal.

VAGINITIS, Leucorrhœa (vaginal.)

VAGINO-VESICAL, Vesico-vaginal.

VAGISSEMENT, Cry, Vagitus.

VAGI'TUS, (F.) *Vagiesement*. The cry of the new-born child. *Squalling*.

VAGI'TUS UTERI'NUS. The cry of the child in utero.

VAGUS NERVUS, Pneumogastric.

VAIRON (F.), *Dispar oc'ulus*. One who has eyes of different colours. It also means a *wall-eyed* animal, or one whose iris is surrounded by a whitish circle.

VAISSEAU, Vessel — *v. Sanguin*, Blood-vessel.

VAISSEAUX CAPILLAIRES, Capillary vessels — *v. Chylifères*, Chyliferous vessels — *v. Lactés*, Chyliferous vessels — *v. Lactifères*, Lactiferous vessels — *v. Ombilicaux*, Umbilical vessels — *v. Tourbillonnés*, Vasa vorticosa.

VALANIDA, Fagus sylvatica.

VALANTIA APARINE, Galium aparine.

VALERIAN, AMERICAN, Cypripedium luteum, Valeriana pauciflora—v. Garden, Valeriana phu — v. Greek, Polemonium reptans — v. Officinal, Valeriana—v. Wild, Senecio aureus, Valeriana, V. pauciflora.

VALERIA'NA, *V. officina'lis* seu *minor*, *Leucolach'anum*, *Wild* or *Offic'inal Valerian*. *Ord.* Valerianaceæ. *Sex. Syst.* Triandria Monogynia. The root, *Valeria'na* (Ph. U. S.), has been long extolled as an efficacious remedy in epilepsy, and in a variety of nervous complaints. It has been also advised as a tonic, antispasmodic, and emmenagogue. It has a strong, fetid odour; bitterish, subacrid, and warm taste; and its virtues are extracted by water and alcohol. The distilled oil is officinal in the Pharmacopœia of the United States.

VALERIANA CAPEN'SIS, a South African species, has similar virtues.

VALERIANA CELT'ICA, *V. Saxat'ilis*, *Spica Cel'tica* seu *Cel'tica Dioscor'idis* seu *Alpi'na*, *Nardus Cel'tica*, *Salun'ca*, *Nardum Gall'icum*, *Celtic Nard*, (F.) *Nard Celtique*. The roots of this Alpine plant have been recommended as a stomachic, carminative and diuretic. It has a moderately strong smell, and a warm, bitterish, subacrid taste.

VALERIANA DENTA'TA, *V. locus'ta*, *Corn Salad*. A wholesome, succulent plant, cultivated in Europe as a salad. It is antiscorbutic and gently aperient.

VALERIANA MAJOR, V. phu — v. Locusta, V. dentata — v. Minor, Valeriana — v. Officinalis, Valeriana.

VALERIANA PAUCIFLO'RA, *American* or *Wild Vale'rian*, and *V. sylvat'ica*, have the properties of the other Valerians.

VALERIANA PHU, *V. major*, *Garden Valerian*, (F.) *Grande Valériane*. The root has been recommended in rheumatism; especially in sciatica, and in epilepsy.

VALERIANA SAXATILIS, V. celtica — v. Spica, Nardus Indica — v. Sylvatica, see V. pauciflora.

VALÉRIANE, GRANDE, Valeriana phu.

VALET À PATIN (F.), *Volsel'la Pati'ni*. The common ligature forceps is a modification of this instrument invented by one Patin. It consists of two branches, united at the middle by a hinge, which may be separated or approximated by means of a screw or running ring. It is used for seizing hold of vessels that are to be tied.

VALÉTUDINAIRE, Valetudinary.

VALETUDINARIUM, Hospital.

VALETUDINARIUS, Sickly, Valetudinary.

VALETU'DINARY, *Valetudina'rian*, *Valetudina'rius*, *Inval'idus*, (F.) *Valétudinaire*, from *valetudo*, 'health,' *valeo*, 'to be well.' One of delicate health. One subject to frequent diseases. An *Invalid*.

VALETUDO, Sanitas—v. Adversa, Disease—v. Bona, Sanitas—v. Commoda, Sanitas—v. Secunda, Sanitas.

VALGUS, see Cnemoscoliosis and Kyllosis.

VALIGA, Tinctura jalapii.

VALITUDO, Sanitas.

VALLECULA, Valley—v. Unguis, see Nail.

VALLEY, *Vallec'ula*, *V. Reil'ii*, (diminutive of *vallis*, 'a valley.') (F.) *Grand Scissure Médiane du Cervelet*. The deep fissure on the inferior part of the cerebellum, which divides it into two symmetrical portions.

VALLUM. The eyebrow or supercilium. Also, a species of bandage. — Galen.

VALS, MINERAL WATERS OF. A French acidulous chalybeate at Vals, six leagues from Viviers, in the department of Ardèche. There are five springs, containing carbonic acid, sulphate of iron, and alum. They are employed in passive hemorrhages, leucorrhœa, &c.

VALVE, *Val'vula*, *Diclis*, (F.) *Valvule*, from *valvæ*, 'folding-doors,' itself from *volvo*, 'I fold up.' A small door. Any membrane or duplicature of a membrane, which prevents a reflux of humours or other matters in the vessels and canals of the animal body. There are some valves, whose functions appear to be, — to retard or to modify the course of substances along canals, &c. See *mitral*, *sigmoid*, *tricuspid*, *ileo-cæcal valve*, &c.

VALVE OF FALLOPIUS, Bauhin, valve of — v. Ileo-cœcal, Bauhin, valve of—v. Ileo-colic, Bauhin, valve of—v. of Tulpius, Bauhin, valve of—v. of Varolius, Bauhin, valve of.

VALVES, KERKRINGIAN, Valvulæ conniventes — v. Semilunar, Sigmoid valves.

VALVULA, Valve—v. Cæci, Bauhin, valve of —v. Cerebelli, Valvula Vieussenii—v. Coli, Bau-

hiu, valve of — v. Foraminis ovalis, Ovalis fossa — v. Guiffartiana, see Thebesius, veins of — v. Ilei, Bauhin, valve of — v. Magna Cerebri, V. Vieussenii.

Valvula Semiluna'ris, *Plica Semiluna'ris* seu *luna'ta, Membrau'ula semiluna'ris conjuncti'va.* A small doubling of the tunica conjunctiva, which lies between the caruncula lacrymalis and the ball of the eye. In birds, this is large, and called *Membra'na nic'titans* seu *Pal'pebra ter'tia.*

Valvula Tarini, Velum medullare posterius — v. Thebesii, see Thebesius, veins of — v. Vaginæ, Hymen — v. Venæ magnæ, see Thebesius, valve of.

Valvula Vieusse'nii, *V. cerebel'li* seu *Willisia'na* seu *magna cer'ebri, Velum Vieusse'nii* seu *interjec'tum cerebelli, V. apoph'ysi vermiformi obtentum, V. medulla'rē* seu *medulla'rē anti'cum* seu *ante'rius, Lacu'nar ventric'uli quarti superior,* (F.) *Valvule de Vieussens, Voile médullaire supérieure.* A thin, medullary lamina, over the under end of the Aquæductus Sylvii and upper part of the fourth ventricle. At the sides of the valves are two medullary tracts, called *Process'us ad Testes, Colum'næ Val'vulæ Vieussenii* or *Oblique inter'er'ebral Con'missure.*

Valvula Willisiana, Valvula Vieussenii.

Valvulæ Bicuspidales, Mitral valves.

Valvulæ Conniven'tes, *V. C. Kerkrin'gii, Plicæ conniven'tes, Kerkrin'gian valves.* Numerous circular folds in the intestinal canal from the pyloric orifice through the greater part of the small intestine. They are folds of the mucous membrane; and their chief use appears to be, to retard the course of the alimentary mass, and to afford a larger surface for the origin of chyliferous vessels.

Valvulæ Cordis, Ostiola cordis — v. Cordis mitrales, Mitral valves — v. Triglochines, Tricuspid valves — v. Trisulcæ, Tricuspid valves.

VALVULE, Valve — *v. d'Eustache,* Eustachian valve — *v. de Pylore,* see Pylorus — *v. de Vieussens,* Valvula Vieussenii.

VALVULES ÉPISCOPALES, Mitral valves — *v. Sigmoïdes* ou *Semilunaires,* Sigmoid valves.

VANDEL'LIA DIFFU'SA. A native of Brazil, Guiana and Isle of France; *Order,* Scrophulariaceæ; is used there as an antibilious emetic and antiperiodic; and is regarded as an efficacious remedy in malignant fever and dysentery, especially in cases connected with a disordered state of the liver.

VANELLOE, Vanilla.

VANIL'LA, *Banil'ia, Banilas, Banilloës, Banilla, Benzo'ëinil, Ar'acus aromat'icus,* (F.) *Vanille, Baume de Vanille.* The *Vanelloe — Sil'iqua vanill'æ* seu *Banill'æ* seu *Vaniglicæ* seu *vanilliæ* seu *Ar'aci aromat'ici* — is a long, flattish pod; containing, under a wrinkled, brittle shell, a reddish-brown pulp, with small, shining, black seeds. The parasitic plant which affords this pod is the *Epiden'drum Vanilla, Vanilla aromat'ica* seu *Mexica'na,* and other species. *Family,* Orchidaceæ. *Sex. Syst.* Gynandria Monandria. Vanelloes have an unctuous, aromatic taste, and a fragrant smell, like that of some of the finer balsams, heightened with musk. Although chiefly used as perfumes, they are reputed to possess aphrodisiac virtues.

Vanilla Aromatica, see Vanilla.

VAPEURS, Hypochondriasis, Hysteria.

Vapor Sanguinis, Gaz sanguinis.

Vapora'rium, *Atmiste'rion, Lacon'icum, Py'ria, Pyriate'rium, Vapour bath,* from *vapor,* 'steam.' A useful remedy in rheumatic and cutaneous affections; and wherever it is important to relax the cutaneous capillaries. In the *Russian Vapour Bath,* the vapour is produced by throwing water over hot stones. Its temperature is from 122° to 145°.

Vaporarium, Hypocaustum, see Stove.

Vaporatio, Evaporation.

Vapores Uterini, Hysteria.

Vapour, Flatulence — v. Bath, Vaporarium.

Vapourish, Hypochondriac, Hysterical.

Vapourous, Windy.

Vapours, Hypochondriasis, Hysteria.

Vapoury, Hypochondriacal, Hysterical.

Vara, *Barre.*

Varec, Kelp — *v. Vésiculeux,* Fucus vesiculosus.

Vareni, Ambulo-flatulentus, Gout (wander ing.)

VARICE, Varix.

Varicel'la, (diminutive of *Variola,* Smallpox,) *Em'phlysis* seu *Exanthe'ma* seu *Syn'ochus varicella, Variola lymphat'ica* seu *spu'ria* seu *sylves'tris, Variolæ nothæ* seu *illegit'imæ* seu *volat'icæ* seu *pucellæ, Pseudo-variolæ, Æol'lion, Æollium, Chicken pox,* (F.) *Varicelle, Petite vérole volante, Vérolette, Fausse variole.* A disease characterized by vesicles scattered over the body, which are glabrous, transparent, and about the size of peas. They appear in successive crops, are covered by a thin pellicle, and, about the third, fourth, or fifth day from their appearance, burst at the top, and concrete into small, puckered scabs, which rarely leave a pit in the skin. Three varieties have, sometimes, been designated. 1. The *V. lentiformes,* or *lenticular chicken pox,* which are irregularly circular, and flattened on the top; the fluid being at first whitish, and afterwards straw-coloured. This is the *common chicken pox.* 2. The *Varicella conifor'mis, Pem'phigus variolo'des, Variola lymphat'ica, Hydrach'nis, Conoid'al Chicken Pox, Swine Pox, Water Pox, Water Jags,* in which the vesicles are generally acuminated, and the fluid pellucid throughout; and, 3dly, the *Varicel'la globula'ris* or *Hives,* in which the vesicles are globular and larger; the fluid being, at first, whey-coloured, and afterwards yellowish. These divisions are, however, very arbitrary, for they are generally confounded.

Hornpox is a papular variety of varicella.

Variola has been, sometimes, mistaken for this disease, and conversely. A little attention to the history of the eruption in the two affections will prevent error. Varicella is not contagious. At times, it prevails epidemically. It cannot be propagated by inoculation. The treatment is extremely simple; rest, abstinence, and the antiphlogistic regimen, being all that is generally required. See Varioloid.

Varicella Varioloidea Varioloid.

Varicellar Fever, see Varioloid.

Varicifor'mes Paras'tatæ. A name given, by some authors, to the ducts of the epididymis, because they seem knotty and varicose.

Varicobleph'aron, from *varix, varicis,* and *βλεφαρον,* 'eyelid.' A varicose tumour of the eyelid.

Varicoce'lē, from *varix, varicis,* and *κηλη,* 'a tumour;' *Oscheoce'lē varico'sa, Her'nia varico'sa, Rumex varico'sus, Spermatoce'lē, Cirsocele.* A varicose dilatation of the veins of the scrotum and spermatic cord. This latter variety of the disease is more common on the left side than the right. It appears under the form of a soft, doughy, unequal, knotty, compressible, and indolent tumour, situate in the course of the cord, and increasing from below upwards. It is less when the individual is in the recumbent posture, and increases when he is erect. It is, ordinarily, an affection of no moment, and is very common, requiring merely the use of a proper suspensory bandage. It has been advised, in bad cases, to

tie the enlarged vein, but the operation is not free from danger induced by phlebitis. Sir A. Cooper has proposed the removal of a portion of the scrotum, so as to render the remainder of the scrotum a natural bandage. This plan has been found effectual.

VARICOM'PHALUS, from *varix*, *varicis*, and *ὀμφαλος*, 'the umbilicus.' Varicose tumour of the umbilicus; cirsomphalus.

VAR'ICOSE, *Varico'sus*, (F.) *Variqueux*. From *varix*, *varicis*. Affected with varix; or belonging to, or connected with, varix;—as a *varicose vein*, a *varicose ulcer*, that is, one kept up by *varices*.

VARICOSITAS, see Varix — v. Conjunctivæ, Cirsophthalmia.

VARICOSITY, see Varix.

VARIC'ULA, *Varix parva*. Diminutive of *varix*. Also, a varicose swelling of the veins of the tunica conjunctiva. — M. A. Severinus.

VARI'OLA, *Variolæ*, *V. veræ*, *Varioli*, *Empyese'sis Variola*, *Euphlog'ia*, *Chaspē*, *Pestis* seu *Febris variolo'sa*, *Œlec'thyma*, *Small-Pox*, *Pox* (N. of England); from *varius*, 'spotted,' or from *vari*, 'pimples;' (F.) *Variole*, *Petite Vérole*, *Picote*. A disease, now of somewhat less interest than before the discovery of vaccination. It is of a very contagious nature, and is supposed to have been introduced into Europe from Asia, at an early period of the middle ages. It is characterized by fever, with pustules appearing from the third to the fifth day, and suppurating from the eighth to the tenth, and it possesses all the distinctive properties of the major exanthemata. It is capable of being produced by inoculation, but this *inoculated small-pox* — *Vari'ola inser'ta* — communicates the disease as readily through the air as the *natural small-pox*, or that received without inoculation.

Small-pox is distinguished into two classes, according to the character of the eruption, the *discrete* or *distinct*, and the *confluent*. 1. In VARIOLA DISCRE'TA, *Empyesis variola discreta*, *Variola discreta benig'na*, *Variolæ regulares* seu *discretæ*, *Distinct Small-pox*, the pustules are usually of the size of peas; distinct, distended, and circular; the intervening spaces being red; the fever inflammatory throughout, and ceasing when the eruption is complete. 2. In VARIOLA CON'FLUENS, *Empyesis variola confluens*, *Variolæ regula'res confluen'tes*, *Vesic'ulæ Divæ Bar'baræ*, *Vésicules de Sainte-Barbe*, *Confluent Small-pox*, the pustules are confluent, or run together; flaccid and irregularly circumscribed; the intervening spaces being pale, and the accompanying fever typhoid. In children, diarrhœa, and, in adults, ptyalism, with swelling of the hands and feet, generally appear, towards the period of the *sec'ondary fever*, which occurs from the tenth to the thirteenth day. The fever that precedes and accompanies the eruption is called the *Eruptive fever*. The prognosis is favourable in the distinct kind, if properly managed. The confluent is always dangerous, — the unfavourable symptoms being — flattening of the pustules, or subsidence of the eruption; the breathing becoming much obstructed or oppressed; or marks of inflammatory and congestive affections occurring in the different viscera. The treatment of the distinct kind is very simple: the antiphlogistic regimen being all that is necessary. The confluent kind requires the same management as typhus fever.

When the pimples are confluent in patches, the patches, being, however, separated by intervals of unaffected skin; it constitutes the clustered, coherent, or corymbose variety — *Vari'ola corymbo'sa*.

VARIOLA AMBOINENSIS, Frambœsia — v. Corymbosa, see Variola — v. Inserta, Variola (by inoculation) — v. Lymphatica, Varicella — v. Mitigata, Varioloid.

VARI'OLA sine VARI'OLIS, *Vari'olous Fever*. These terms are applied to cases occasionally observed during the prevalence of variola, in which the constitutional phenomena are present without the cutaneous eruption.

VARIOLA SPURIA, Varicella — v. Vaccina, Vaccina — v. Vaccinatorum, Varioloid.

VARIOLÆ, Variola — v. Equinæ, see Grease — v. Illegitimæ, Varicella — v. Modificatæ, Varioloid — v. Nothæ, Varicella — v. Pucellæ, Varicella — v. Sylvestris, Varicella — v. Tutoriæ, Vaccina — v. Veræ, Variola — v. Volaticæ, Varicella.

VARIOLATION, Inoculation (Small-pox.)

VARIOLE, Variola.

VARIOLI, Variola.

VARIOLIQUE, Variolous.

VAR'IOLOID, *Variolo'ïs*, *Variolo'ïdes*, *Vari'ola modifica'ta* seu *mitiga'ta* seu *vaccinato'rum*, *Varicel'la* (of some), *Varicel'la Variolo'ïdea*, from *variola*, small-pox, and *εἰδος*, 'form,' — resembling small-pox. This is, really, small-pox, modified by previous inoculation or vaccination; and hence it has been properly called *modified small-pox*. That it is small-pox is proved by the fact, that matter, taken from a varioloid pustule, will communicate small-pox to one who has never been vaccinated. It is, almost always, a milder disease than small-pox; and this circumstance, with its shorter duration, exhibits the salutary effects of previous vaccination or inoculation. It has appeared epidemically.

Occasionally, when varioloid is epidemic, *varioloid* or *varicellar fever* occurs without the eruption. This is the *varicel'læ sine varicel'lis* of Mr. Erasmus Wilson, who calls varioloid, *varicella*.

VARIOLOID FEVER, see Varioloid.

VARIOLOIS, Varioloid.

VARI'OLOUS, *Variolo'sus*, (F.) *Variolique*. Relating or belonging to variola.

VARIQUEUX, Varicose.

VARIX, genitive *varicis*, *Phlebeurys'ma*, *Phlebec'tasis*, *Her'nia* seu *Ecta'sia vena'rum*, *Angiecta'sia veno'sa*, *Ix'ia*, *Cirsus*, *Cedma*, *Var'icose Vein*, (F.) *Varice*, is considered, by some, to come from the verb *variare*, 'to turn,' 'to twist,' — on account of the sinuosities of varicose veins. Dilatation of a vein; *Varico'sitas*, *Varicosity*. Varices are owing to local retardation of the venous circulation; and, in some cases, to relaxation of the parietes of the veins. They are very common in the superficial veins of the lower limbs, especially of pregnant females. The tumour or tumours, formed by varices, are soft, knotty, unequal, indolent, and livid; without pulsation, and yielding readily to the impression of the finger; but returning as soon as the compression is discontinued. Sometimes, the vein bursts and gives rise to hemorrhage. The treatment is usually palliative, and consists in exerting a uniform and constant pressure upon the part, by means of an appropriate bandage. The radical cure has, also, been obtained by extirpation, division of the vein, or ligature. The second course is apt to be followed by phlebitis.

VAROLI, BRIDGE OF, Pons Varolii.

VARUS, Acne, Ionthus, see Entogonyaneon and Kyllosis — v. Mentagra, Sycosis.

VAS, Vessel, Penis — v. Deferens mulieris, Tuba Fallopiana — v. Urinarium, Ureter.

VASA ABERRAN'TIA. Peculiar ramifications of the biliary duct in the liver are so called by E. H. Weber. — Kölliker.

VASA ABSORBENTIA, Absorbent vessels — v. Afferentia, see Afferent and Efferent—v. Capillaria, Capillary vessels—v. Chylifera seu Chylofera, Chyliferous vessels.

VASA CHYLOPOËT'ICA URINIF'ERA. Blood-vessels, which, according to Lippi, convey drinks from the chyliferous vessels to the renal veins.

VASA EFFERENTIA, see Efferent — v. Exhalantia, Exhalant vessels—v. Hydragoga, Lymphatic vessels — v. Inferentia, see Afferent and Efferent —v. Lactea, Chyliferous vessels, Lactiferous vessels—v. Meningea, Meningeal vessels—v. Sedalia, Hæmorrhoidal vessels—v. Lymphatica, Lymphatic vessels—v. Nutrientia, Vasa vasorum—v. Nutritia, Vasa vasorum — v. Recta, see Rete testis — v. Resorbentia, Absorbent vessels, Lymphatic vessels — v. Serosa, see Capillary vessels.

VASA VASO'RUM, *V nutrit''ia* seu *nutrien'tia*. Small vessels that supply larger. However minutely a vessel is traced, its parietes will be found supplied with blood for its nutrition by a smaller vessel.

VASA VORTICO'SA, (F.) *Vaisseaux tourbillonnés, Tourbillon vasculaire*. The contorted vessels which creep on the choroid coat of the eye; ciliary veins.

VASCO'A AMPLEXICAU'LIS. A South African shrub, *Nat. Ord.* Leguminosæ, the roots of which taste like liquorice. They are used, in decoction, in catarrh and phthisis, and are a good substitute for liquorice.

VASCULA SERPENTINA, see Testicle.

VAS'CULAR, *Vascula'ris, Vasculo'sus, Angei'al*, (F.) *Vasculaire*, from *vas, vasis*, 'a vessel,' *vasculum*, 'a little vessel.' That which belongs or relates to vessels; — arterial, venous, or lymphatic; but generally restricted to blood-vessels only. Full of vessels. Bichat gave the name *Vascular system, Syste'ma vaso'rum, Hæmatau'lica*, to the blood-vessels, and of this he made two divisions. 1. The *Arterial system*, or *System of red blood*, (F.) *Système vasculaire à sang rouge*, which commences with the radicles of the pulmonary veins; and includes the pulmonary veins, the left cavities of the heart, and the aorta with all its ramifications. The blood, in this system, is distributed to the general capillary system, where it loses its arterial quality and becomes venous. 2. The *Venous system* or *Vascular system of black blood*, (F.) *Système vasculaire à sang noir*, carries the blood from every part of the system to the lungs. It takes its origin in the general capillary system; continues in the veins, right auricle, and ventricle of the heart and the pulmonary artery and its branches, and is finally lost in the capillary system of the lungs. See Circulation.

VASCULAR LAYER, see *Tache embryonnaire* — v. Radicals, Radical vessels—v. Substance of the Kidney, see Kidney—v. System, see Vascular—v. System, intermediate, Capillary system — v. System, peripheral, Capillary system—v. Tumour, see Hæmorrhois.

VASCULARITY, *Vascular'itas*, (F.) *Vascularité*. The state of being vascular, or largely supplied with vessels.

VASCULUM, Penis, Vessel.

VAS'CULUM ABER'RANS, *Appendix to the Epidid'ymis*. A small convoluted duct, of variable length, generally connected with the duct of the epididymis, immediately before the commencement of the vas deferens.

VASE À SAIGNER, Cup.

VASTUS. That which is *vast* or has a great extent.

VASTUS EXTERNUS and VASTUS INTERNUS are two considerable, fleshy masses, which form part of the Triceps cruris.

VASUM, Vessel.

VATER, AMPULLA OF, (F.) *Ampoule de Vater*. An ampulla formed by the orifice of the pancreatic duct in the duodenum.

VATER, CORPUSCLES OF, Corpuscles, Pacinian.

VATERIA INDICA, see Copal.

VATICINIUM CHIROMANTICUM, Chiromancy.

VAULT, (old F. *Voulte,*) 'a round or turn;' from *volvere, volutum*, 'to turn;' *Fornix, Cam'era*, (F.) *Voûte*. A name given by anatomists to several parts which are rounded superiorly; concave and arched inferiorly,—as the *Vault of the cranium* or the upper part of the skull,—the *Palatine vault* or *roof of the mouth*, &c., &c.

VAUQUELINE, Strychnia.

VEAL TEA. This may be made in the same manner as beef tea, by using a pound of fillet of *veal*, free from fat and sliced, and a pint and a half of *boiling water;* and boiling for half an hour. It may also be made with the same quantity of the fleshy part of a knuckle of veal.

VECORDIA, Idiotism.

VECTIS, Lever—v. Elevatorius, Elevator—v. Triploides, Elevator, triploid.

VECTOR CANAL, Tube, Fallopian.

VEGETAL'ITY, *Vegetal'itas*, (F.) *Végétalité* The aggregate of physiological phenomena, which exist alone in the vegetable, but are common to both plants and animals. See Animality.

VEGETARIAN, see Vegetarianism.

VEGETA'RIANISM. Same etymon as Vegetation. A modern term, employed to designate the view, that man, for his full mental and corporeal development, ought to subsist on the direct productions of the vegetable kingdom, and totally abstain from flesh and blood. An embracer and practiser of this doctrine is called a *vegetarian*.

VÉGÉTATIF, Vegetative.

VEGETA'TION, *Vegeta'tio*, 'growing like a plant,' from *vegeo* or *vigeo*, 'I flourish.' A morbid production, which rises as an excrescence on the valves of the heart, in syphilis, &c. — as the *Cauliflower excrescence*, &c. The term is also applied to the fleshy granulations or *Hypersarcoses*, which sometimes arise at the surfaces of wounds or ulcers.

VEG''ETATIVE, *Vegetati'vus*, (F.) *Végétatif*, same etymon as the last. Having relation to growth or nutrition; hence, the *vegetative* or nutritive functions.

VEGETATIVE LAYER, see *Tache embryonnaire*.

VEGETATIVUS, Vegetative.

VE'HICLE, *Vehic'ulum, Ochc'ma, Constit'uens*, (F.) *Véhicule*, from *vehere*, 'to carry.' Anything which serves to carry; thus air is the *vehicle* of sound; the arteries are the *vehicles* of the blood, &c. In *Pharmacy*, the name *vehicle* is given to any excipient; or to substances which serve as the media of administration for any medicine.

VÉHICULE, Vehicle.

VEILED PUFF, see Cavernous respiration

VEIN, *Vena*, diminutive *ven'ula, Phlebs, Phleps*, (F.) *Veine*. The veins are vessels for the conveyance of black blood from every part of the body to the heart. They are found wherever there are arteries, and, altogether, form the *venous system*, which may be subdivided into two distinct secondary systems. 1. The *General venous system*, which commences in all the organs, by very minute radicles; and terminates in the heart by the cava and the coronary vein. 2. The *Abdominal*

venous system, which is limited to the abdominal cavity; commences, also, by a great number of branches, and terminates in the liver by a single trunk, which subdivides in that organ. It is called, also, the *System of the Vena Porta* or the *Portal System*. See Porta. The veins form two sets, one *deep-seated, Venæ satellites, V. concomites*, which accompany the arteries; the other *superficial* or *subcutaneous*. Their parietes, which are thinner than those of the arteries, are composed of two coats; the one, external, loose, extensible, and with parallel, longitudinal fibres — the *proper membrane;* the other, the *common* or *inner membrane*, which is thin, polished, and has numerous duplicatures or folds forming parabolic valves. These valves are most numerous in the veins of the lower extremities. The coats of the veins are supplied with small arteries or *vasa vasorum*, veins, and lymphatics. They have not as many nervous filaments as the arteries. These filaments are from the great sympathetic.

TABLE OF THE VEINS.

1. VEINS WHICH FORM THE SUPERIOR VENA CAVA.

1. Subclavians.
- Receive the 1. Axillary which
  - Receives the 1. Basilic, formed of the
    1. Posterior ulnar.
    2. Anterior ulnar.
    3. Median basilic.
  - 2. Cephalic, forming the
    1. Superficial radial.
    2. Median cephalic.
  - 3. Circumflex veins.
  - 4. Inferior scapular.
  - 5. Long thoracic.
  - 6. Superior thoracic.
  - 7. Acromial veins.
- 2. External Jugular.
  - Receives the 1. Internal maxillary, composed of the
    1. Pterygoid.
    2. Spheno-palatine.
    3. Alveolar.
    4. Infra-orbitar.
    5. Mental.
    6. Inferior dental.
    7. Deep temporal.
  - 2. Superficial Temporal, composed of the
    1. Middle temporal.
    2. Anterior auriculars.
    3. Transverse of the face.
  - 3. Posterior Auricular. The trunk then takes the name of *External Jugular*, and in its course along the neck, receives —
  - 4. Cervical cutaneous.
  - 5. Trachelo-scapular, &c.
- 3. Internal Jugular.
  - Receives
    1. Superior Cerebral Veins.
    2. Veins of the Corpus Striatum.
    3. Veins of the Choroid plexus.
    4. Superior Cerebellar Veins.
    5. Inferior Cerebellar Veins.
    6. Lateral and inferior Cerebral Veins.
  - 7. Ophthalmic Vein, composed of the
    1. Lachrymal.
    2. Central of the retina.
    3. Infra-orbitar.
    4. Ciliary.
    5. Ethmoidal.
    6. Palpebral, and
    7. Nasal Veins.
  - 8. Facial vein, called *angular*, near the eye, receiving the
    1. Palpebral, and
    2. Superciliary Veins.
    3. Dorsals of the nose.
    4. Superior ∫ Coronaries
    5. Inferior { of the lip.
    6. Several Buccal and
    7. Masseteric Veins.
    8. Ranine.
    9. Submental, and
    10. Inferior Palatine.
  - 9. Lingual and Pharyngeal Veins.
  - 10. Superior thyroid.
  - 11. Occipital, and
  - 12. Veins of the Diploë.

2. Right Internal Mammary Vein.

3. Inferior Thyroid Vein, opening into the Vena Cava, between the two Subclavians.

4. Vena Azygos, which receives the
1. Right Bronchial.
2. Intercostal Veins.
3. Semi-azygos.

2. VEINS WHICH FORM THE INFERIOR VENA CAVA.

1. Common Iliacs.
- Receive the 1. External Iliacs, formed by the—
  - 1. Femoral or Crural, which is a continuation of the 2. Popliteal, commencing by 3. veins which accompany the fibular arteries, and receiving the—
    - 1. External Saphena and
    - 2. Internal Saphena, which receive—
      1. Several abdominal veins.
      2. Circumflex Iliac, and
      3. External pudic veins.
- 2. Internal Iliacs which receive the —
  - 1. Vesical Veins. commencing with the
    2. Sacro-lateral Veins.
    - 1. Dorsal veins of the penis of the male.
    - 2. Veins of the clitoris, in the female.
- 3. Middle Sacral Vein.
- 4. Lumbar Veins—four in number on each side, commencing by an—
  1. Abdominal branch
  2. Dorsal branch.
- 5. Spermatic Veins, commencing with the
  1. Spermatic plexus in the male.
  2. Those of the Ovarium, Fallopian tube, &c. in the female.
- 6. Renal Veins.
- 7. Capsular and Adipose Veins.
- 8. Hepatic Veins.
- 9. Middle,
- 10. Left, and
- 11. Right } Hepatic Veins.
- 12. Inferior Diaphragmatic Veins, two in number

3. VEINS OF THE HEART.

1. Great right Coronary.
2. Small right Coronary.
3. Left Coronary Veins.

4. VEINS WHICH FORM THE VENA PORTA.

1. Splenic Vein.
- Receives the
  1. Veins which correspond to the vasa brevia.
  2. Right and left gastro-epiploic.
  3. Duodenal, and
  4. Pancreatic veins.
  5. Coronary Vein of the Stomach, and
  6. Small mesenteric vein.

2. Superior Mesenteric Vein.

VEIN, BRONCHIAL, LEFT, see Azygos — v. Demi-azygous, see Azygos — v. Frontal, see Facial vein — v. Semi-azygous, see Azygos (vena) — v. Superior intercostal, left, see Azygos — v. Tibio-malleolar, Saphena, great — v. Palato-labial, Facial vein — v. Peroneo-malleolar, Saphena minor — v. Varicose, Varix.

VEINE, Vein — *v. Cave*, Cava vena — *v. Céphalique*, Jugular vein, internal — *v. Céphalique du pouce*, Cephalic vein of the thumb — *v. Cubitale cutanée*, Basilic vein — *v. Fessière*, Gluteal vein — *v. de Médine*, Dracunculus — *v. Porte*, Porta vena — *v. Prélombo-thoracique*, Azygos, (vena) — *v. Préparate*, Facial vein — *v. Radiale cutanée*, Cephalic vein — *v. Sans paire*, Azygos, vein — *v. Trachélo-sous-cutanée*, Jugular vein, external.

VEINES ARTÉRIELLES, Arterial veins — *v. Ciliaires*, Ciliary veins — *v. Sous-clavières*, Subclavian veins — *v. Sus-hépatiques*, Hepatic veins.

VEINEUX, Venous.

VEINS, CORONARY, Cardiac veins — v. Intralobular, Hepatic veins — v. Supra-hepatic, Hepatic veins.

VEINSTONE, Phlebolite.

VEINULE, Venula.

VEJUCO DE MAYACURE, see Curare.

VELAMEN NATIVUM, Integument.

VELAMENTA BOMBYCINA, Villous membranes — v. Cerebralia, Meninges — v. Infantis, Membranes of the fœtus.

VELAMENTUM ABDOMINALE, Peritonæum — v. Corporis commune, Integument — v. Linguæ, Glosso-epiglottic ligament — v. Nativum, Integument.

VÉLAR, Erysimum.
VELLICATION, Tic.
VELOSYNTHESIS, Staphylorraphy.
VELUM, 'a veil, a cover,' Velum pendulum palati — v. Apophysi vermiformi obtentum, Valvula Vieussenii — v. Interjectum cerebelli, Valvula Vieussenii — v. Medullare anticum, Valvula Vieussenii.
VELUM MEDULLA'RĒ INFERIUS, (F.) *Voile médullaire inférieur*. A name given, by Reil, to the medullary band or strip, by which the cerebellum communicates with the medulla.
VELUM MEDULLA'RĒ POSTE'RIUS seu POSTI'CUS seu SEMILUNA'RĒ, *Valvu'la Tari'ni*. The small posterior valve of the cerebellum; a thin medullary plate, situate between the medulla oblongata and vermis inferior, in front of the nodulus.
VELUM PALATI, Velum pendulum palati — v. Palatinum, Velum pendulum palati.
VELUM PEN'DULUM PALA'TI, 'Pendulous veil of the palate.' *Velum, V. Palati'num* seu *Palati* seu *Pen'dulum* seu *Staphyli'num, Pala'tum pen'dulum* seu *mollē* seu *mob'ilē, Pen'dulum* seu *Claustrum Palati, Palatum Mollē, Soft Palate*, (F.) *Septum Staphylin* (Ch.), *Voile du Palais*. A movable, soft, and broad septum, attached to the posterior extremity of the palatine arch, and separating the mouth from the pharynx. Its form is nearly quadrilateral. Its *anterior surface* corresponds to the mouth; the *posterior* to the pharynx. Its *superior edge* is fixed to the palatine arch; the inferior is free, floating, and has an appendix at its middle — the *uvula*. The lateral margins of the velum are held down by two folds, separated from each other by a triangular space; these are called the *pillars;* the anterior passes to the base of the tongue, the posterior to the sides of the pharynx. The velum palati is formed of a mucous coat, which contains numerous follicles, and of a muscular stratum, in which are the peristaphylini interni and p. externi muscles, the glosso-staphylini, the pharyngo-staphylini and the palato-staphylinus. The arteries of the velum palati are furnished by the internal maxillary, the labial and the superior pharyngeal. Its veins open into the internal jugular. Its nerves are sent off from the ganglion of Meckel, and come from the palatine branches. The glosso-pharyngeal nerve, likewise, sends it some filaments.
VELUM STAPHYLINUM, Velum pendulum palati —v. Vieussenii, Valvula Vieussenii.
VELVET LEAF, Abutilon Avicennæ, Pareira.
VENA, Vein, Penis—v. Alba renum, Ureter—v. Alba thoracis, Thoracic duct—v. Apoplectica, Jugular vein, internal—v. Arteriosa, Porta vena, Pulmonary artery—v. Capitis, Cephalic vein—v. Cava, Cava vena—v. Cubiti interior, Basilic vein—v. Demiazygos, see Azygos—v. Falcis cerebri, Sinus longitudinalis inferior—v. Hemiazyga, see Azygos — v. Lactea, Porta vena — v. Lienalis, Splenic vein—v. Magna, Porta vena—v. Medina Arabum, Dracunculus — v. Medinensis, Dracunculus — v. Ostiaria, Porta vena — v. Pari carens, Azygos, (vena) — v. Portalis, Porta vena — v. Portarum, Porta vena—v. ad Portas, Porta vena—v. quæ ad Portas est, Porta vena—v. Ramalis, Porta vena — v. sine Pari, Azygos, (vena) —v. Splenica, Splenic vein—v. Stelechiæa, Porta vena—v. Subalaris, Vena axillaris—v. Terminalis, Circulus venosus.
VENÆ APOPLECTICÆ, Jugular veins — v. Cavæ hepatis, Hepatic veins—v. Centrales, Intralobular veins — v. Concomites, see Vein — v. Galeni, Choroid, (veins)—v. Innominatæ, see Innominatum — v. Intralobulares, Intralobular veins —v. Lacteæ, Chyliferous vessels—v. Lymphaticæ, Lymphatic vessels — v. Micantes, (arteries,) see Artery—v. Pulsatiles, (arteries,) see Artery—v. Satellites, see Vein — v. Soporales, Jugular veins—v. Sphagitides, Jugular veins.
VENÆSECTIO, see Blood-letting—v. Revulsoria, see Blood-letting.
VENÆ VORTICO'SÆ. The veins which principally form the external or venous layer of the choroid coat of the eye; so called from their peculiar arrangement; from *vertex* seu *vortex*, 'a whirlpool.'
VENAL, Venous.
VENEFICIUM, Poisoning.
VENENATION, Poison, Poisoning, Venom.
VENENATUS, Venomous.
VÉNÉNEUX, Poisonous.
VENENOSE, Venomous.
VENENUM, Poison, Venom.
VENE'REAL, *Vene'reus, Aphrodisiacus, Vene'rean*, (F.) *Vénérien*, from *Venus, veneris*, 'the goddess of pleasure.' That which relates to the pleasures of love. In a more restricted sense, the word *venereal*—as well as *aphroditic*—is synonymous with *syphilitic*, and also with *syphilis*. Some authors have proposed that those diseases should be called *venereal* which are produced by excess in venery; and that *syphilitic* should be limited to those which are the result of impure connexion. It is, also, used in the same sense as aphrodisiac,—adapted to excite venereal desire.
VENEREAL DESIRE, Libido — v. Disease, Syphilis.
VÉNÉRIEN, Venereal. This term, also, means one labouring under syphilis; as *Hôpital des vénériens*.
VENERIVAGUS, Libidinous.
VEN'ERY. Same etymon. The pleasures of love. Sexual communication. Coition.
VENESECTION, see Blood-letting.
VENIMEUX, Venomous.
VENIN, Venom.
VENOM, *Vene'num, Toxicum, Venena'tion*, (F.) *Venin*. A poisonous fluid secreted by certain animals, as the viper, in a state of health, and which they preserve in a particular reservoir, to use as a means of attack or defence. It differs, according to some, from *virus*, as the latter is always the result of a morbid process, which may be produced by the individuals who receive it, in their turn, and be transmitted to others.
VENOM, QUICKENING, Sperm—v. Vital, Sperm.
VEN'OMOUS, *Venena'tus, Ven'enose*, (F.) *Venimeux*. An epithet applied to animals which have a secretion of venom, as the viper, rattlesnake, &c., as well as to the venom itself; and, by some, to liquids in the animal body, which have been so perverted by previous disease, that their contact occasions serious mischief in sound individuals; as happens in hydrophobia. Virus is more commonly used in this case.
VENOSITAS, Venosity — v. Sanguinis, Præ dominium sanguinis venosi.
VENOS'ITY, *Venos'itas, Ve'nousness, Venous state* or *cachex'ia, Melanæ'mia, Melano'sis universa'lis*, from *vena*, 'a vein.' A condition in which, it has been supposed, the blood is moved slowly; is more venous; and the venous blood itself in greater quantity. This state is said to be chiefly observed in hemorrhoids, gout, hypochondriasis, melancholia, &c.—Puchelt.
VENOUS, *Venal, Veno'sus*, (F.) *Veineux*. Same etymon. Appertaining to a vein, or to the blood of the veins; as *venous* cachexia, *venous* pulse.
VENOUS CACHEXIA, Venosity — v. Hum, *Bruit de Diable* — v. State, Venosity — v. System, see Vascular—v. System, abdominal, Porta vena.
VENOUS SYSTEM OF JACOBSON. A system of vessels in the three classes of vertebrated animals other than the mammalia, which forms a

communication between the vena porta and the vena cava.

VENOUSNESS, Venosity.

VENT, Wind.

VENTER, Abdomen, Belly, Uterus. In law, venter designates the maternal parentage of children. Thus, if A were B's child by his first wife, he would be described in law as "by the first *venter*." "A died seised, leaving two infant daughters by different *venters*."

VENTER IMUS, Abdomen, Hypogastrium, Neiæra — v. Inferius, Abdomen — v. Infimus, Abdomen—v. Magnus, Ingluvies—v. Medius, Thorax —v. Parvus, Hypogastrium—v. Propendens, Hysteroloxia anterior—v. Renum, Pelvis of the kidney—v. Supremus, Cavum cranii.

VENTEUX, Windy.

VENTILA'TION, *Ventila'tio*, from *ventus*, 'wind,' *ventulus*, 'a little wind.' The act of renewing the air of vessels, hospitals, and apartments, or of situations where many people are collected together. The utility of such renewal must be evident, when it is considered that atmospheric air loses its oxygen during respiration, and that carbonic acid supplies its place. Stagnant air, also, becomes loaded with numerous impurities; and hence one of the greatest hygienic improvements, of modern times, has been a proper attention to circulation of air. It is, moreover, one of the most valuable additions to our stock of therapeutical agencies in many diseases.

Instruments used for the purpose of renewing the air, in ships, apartments, &c., have been called *ventilators*.

VENTOSITÉ, Flatulence.

VENTOSITY, Flatulence.

VENTOUSES SCARIFIÉES, Cupping with the scarificator.

VENTOUSES SÈCHES, Cupping, dry.

VENTRAL, from *venter*, 'the belly.' Abdominal.

VENTRAL HER'NIA, *Her'nia ventra'lis*. Direct hernia occurring in any part of the abdomen. It is most frequently found between the recti muscles.

VENTRALE, 'an apron,' Belt (Russian.)

VENTRALE CUTA'NEUM, 'Cutaneous apron.' (F.) *Tablier*. An elongation of the nymphæ in the Bosjesman female, which hangs down before the vulva like an apron.

VENTRE, Abdomen — *v. Inférieur*, Abdomen —*v. Resserré*, Constipation.

VENTRE INSPICIENDO DE, see De ventre inspiciendo.

VEN'TRICLE, *Ventric'ulus*, diminutive of *venter*, 'belly.' (F.) *Ventricule*. Literally, a *little belly*. A name given, in anatomy, to various parts.

VENTRICLE OF ARAN'TIUS. A small cavity, lined with gray substance, at the point of the calamus scriptorius.

VENTRICLES OF THE BRAIN, *Ventric'uli* seu *Cavita'tes* seu *Sinus Cer'ebri*, (F.) *Ventricules du cerveau*, are five cavities in the interior of that organ, which are distinguished into the *lateral ventricles*, *middle ventricle*, *fourth ventricle* or *ventricle of the cerebellum*, and *fifth ventricle*. The *middle ventricle* or *third ventricle*, (F.) *Ventricule moyen du cerveau*, is situate in front of the pineal gland. It is bounded, *above*, by the tela choroidea and the fornix; *below*, by a portion of cerebral substance, which separates it from the base of the cranium; *laterally*, by the thalami nervorum opticorum; *anteriorly*, by a medullary cord, called the *anterior commissure;* and, *posteriorly*, by another medullary cord, called the *posterior commissure*. It communicates with the lateral ventricles by two openings, situate behind the anterior pillar or crus of the fornix. The *Lateral ventricles*, *Ventric'uli latera'les* seu *magni* seu *majo'res* seu *prio'res* seu *superio'res* seu *tricor'nes*, (F.) *Ventricules latéraux*, are two in number. They are large, and, owing to their considerable curvature, occupy a great part of the cerebral centre. They are bounded, *above*, by the inferior surface of the corpus callosum; *anteriorly*, by the curved portion of the same body; *posteriorly*, by a considerable mass of cerebral substance; and, *internally*, they are separated from each other by the septum of the ventricles, — a medullary plate, which is given off from the lower part of the corpus callosum. The lateral ventricles have, in their upper and anterior portion, the *Corpora striata*, *Thalami optici*, and *Tænia semicircularis:* — their inferior portion contains the *corpus fimbriatum*, *cornu Ammonis*, &c. Each of the ventricles has a *body* or *centre* —*cella me'dia*—and *horns*, cornua. The *Fourth ventricle*, *Ventriculus cerebelli* seu *quartus* seu *Aran'tii*, *Sinus rhomboï'deus*, (F.) *Quatrième ventricule*, is situate beneath the *aqueduct of Sylvius*, by which it communicates with the third ventricle. It extends from this aqueduct to the upper part of the medulla; and is seated in the substance of the tuber annulare. The *Fifth ventricle*, *Ventric'ulus septi pellu'cidi*, *Incisu'ra septi*, (F.) *Cinquième ventricule*, is the small serous cavity between the laminæ of the septum lucidum; called, also, *Sinus of the septum lu'cidum*, *S. of the median septum* (Ch.).

VENTRICLES OF THE HEART, *Ventric'uli cordis*, *Specus cordis*, (F.) *Ventricules du cœur*, are two in number. The *Right ventricle*, *Pulmonary ventricle*, *Ventric'ulus anterior* seu *primus* seu *pulmona'lis*, (F.) *Ventricule droit* ou *pulmonaire*, is situate at the fore-part of the heart, the base and apex corresponding to those of the heart. In it are seen the *Columnæ carneæ* and *Cordæ tendineæ*. The right ventricle communicates with the right auricle by the *Ostium venosum*, and from it the *Pulmonary artery* arises. Around the auricular orifice is a tendinous margin or ring, from which the tricuspid valve is given off. The use of the ventricle is to send the blood, by its contraction, along the pulmonary artery to the lungs. The *Left ventricle*, *Ventric'ulus aor'ticus* seu *posterior* seu *secundus*, (F.) *Ventricule gauche* ou *aortique*, is situate at the posterior and left part of the heart. Its parietes are much thicker and stronger than those of the right, owing to its having to send the blood over the whole system. The inner surface has the same general appearance as that of the right. The *Columnæ carneæ* and *Cordæ tendineæ* are, however, much stronger. It communicates with the left auricle by means of the *Mitral valve;* and from it proceeds the largest blood-vessel of the body — the aorta.

VENTRICLES OF THE LARYNX, *Ventric'uli* seu *Sac'culi laryngæ'i*, *Ventric'uli Morgagni'i*, *Sinuses of the larynx*, (F.) *Ventricules* ou *Sinus du larynx*, are two depressions in the larynx, comprised between the superior and inferior ligaments.

VENTRICLE, PULMONARY, V. right.

VENTRIC'ULAR, *Ventricula'ris*, (F.) *Ventriculaire*. Same etymon as Ventricle. Relating to a ventricle.

VENTRICULE, Ventricle.

VENTRICULE AORTIQUE, Ventricle, left — *v. Cinquième*, Ventricle, fifth — *v. Droit*, Ventricle, right—*v. Gauche*, Ventricle, left—*v. Moyen du Cerveau*, Ventricle, middle, of the brain — *v. Pulmonaire*, Ventricle, right—*v. Quatrième*, Ventricle, fourth.

VENTRICULES DU CERVEAU, Ventricles of the brain — *v. du Cœur*, Ventricles of the heart — *v. Latéraux*, Ventricles, lateral.

VENTRICULI CORDIS, Ventricles of the heart — v. Dilatatio, Gastrectasis — v. Dissolutio, Gastro-malacia — v. Duræ matris, Sinuses of the dura mater — v. Emollitio, Gastro-malacia — v. Exulceratio, Gastrelcosis — v. Fluxus, Gastrorrhœa — v. Inflammatio, Gastritis — v. Laryngei, Ventricles of the larynx—v. Laterales, see Ventricles, lateral, of the brain — v. Magni, Ventricles, lateral, of the brain—v. Majores, Ventricles, lateral—v. Metamorphosis gelatiniformis, Gastro-malacia — v. Morgagnii, Ventricles of the larynx — v. Perforatio, Gastro-brosis — v. Priores, Ventricles, lateral — v. Pseudophlogosis resolutiva et colliquativa, Gastro-malacia—v. Superiores, Ventricles, lateral — v. Tricornes, Ventricles, lateral —v. Ulceratio, Gastrelcosis.

VENTRICULUS, Stomach, Ventricle—v. Anterior, Ventricle, right — v. Aorticus, Ventricle, left—v. Arantii, see Ventricles of the brain.

VENTRICULUS CALLO'SUS, 'Callous stomach.' The *gizzard* or *third stomach* of the gallinaceous bird. (F.) *Gésier*. It consists of a double-bellied or *digastric* muscle; is lined by a firm cuticle, and forms a kind of pouch, depending from the alimentary tube, in which the second stomach terminates, and from which the duodenum or *Ventriculus succenturia'tus* issues. In the interior of the gizzard there are numerous pebbles, which seem to be destined to aid in the trituration of the food. The gizzard is an organ of mastication, and is possessed of great muscular power.

VENTRICULUS CEREBELLI, see Ventricles of the brain — v. Intestinalis, Abomasus — v. Posterior, Ventricle, left — v. Primus, Ventricle, right — v. Pulmonalis, Ventricle, right — v. Quartus, see Ventricles of the brain — v. Secundus, Ventricle, left — v. Septi Pellucidi, see Ventricles of the brain—v. Succenturiatus, Duodenum.

VENTRILOQUE, Engastrimythos.

VENTRILOQUISM, see Engastrimyth.

VENTRILOQUIST, Engastrimyth.

VENTRILOQUY, see Engastrimyth.

VENTRIOSUS, Abdominous.

VENTRIPOTENT, Abdominous.

VENTROSITAS, Physconia.

VENTROSUS, Abdominous.

VENTS, Flatulence.

VENTUS, Wind.

VEN'ULA, *Phlebion*, diminutive of *Vena*. See Vein. (F.) *Veinule*. A small vein. Hippocrates seems to use it in the same sense as *Arteria*.

VENULÆ CENTRALES, Intralobular veins —v. Intralobulares, Intralobular veins.

VENUS, Clitoris, Coition, Cuprum—v. Crystals of, Cupri subacetas — *v. Crystaux de*, Cupri subacetas.

VER CUCURBITIN, Tænia solium — *v. Cutané*, Dracunculus — *v. Filaire*, Dracunculus — *v. de Guinée*, Dracunculus—*v. Luisant*, Cicindela—*v. de Médine*, Dracunculus—*v. Solitaire*, Bothriocephalus latus, Tænia solium.

VERATRIA, Veratrina.

VERATRI'NA, *Vera'tria, Ver'atrine;* from *veratrum*. A vegetable alkali, found in the seeds of *Vera'trum sabadil'la, V. officina'lē, Helo'nias officina'lis*, and *Asagræ'a officina'lis*, which are known in commerce under the names *Cebadill'a, Cevadill'a*, and *Sabadill'a*, and are imported from Mexico. They usually occur, in commerce, mixed with the fruit of the plant, are two or three lines long, of a black colour, and are shining, flat, shrivelled, winged, and elastic seeds. *Veratrine* is solid, white, pulverulent, and inodorous; of a very acrid taste; decomposable by heat; very soluble in water, and soluble in alcohol. When prepared in the usual manner, it still contains other substances, — *Sabadil'lin, Ver'atrin*, gum resin of the sabadilla, and black greasy matter. It is extremely poisonous, and but little used internally in medicine. Magendie gave it as an emetic and drastic in very small doses. It has been recommended to be applied in the way of friction, or endermically, (from gr. v to xx to ʒj of lard or cerate,) in various neuralgic affections. The following is the formula for its preparation in the Pharmacopœia of the United States: — Take of *cevadilla*, ℔ij; *alcohol*, 2 gallons; *sulphuric acid, solution of ammonia, purified animal charcoal*, and *magnesia*, each a sufficient quantity. Boil the cevadilla in a gallon of the alcohol, in a retort with a receiver attached, for an hour, and pour off the liquor. To the residue add another gallon of the alcohol, together with the portion recently distilled; again boil for an hour, and pour off the liquor. Repeat the boiling a third time with the remaining alcohol, and with that distilled in the previous operation. Press the cevadilla, mix and strain the liquors, and, by means of a water-bath, distil off the alcohol. Boil the residue three or four times in water acidulated with sulphuric acid, mix and strain the liquors, and evaporate to the consistence of syrup. Add magnesia in slight excess, shake the mixture frequently, then express and wash what remains. Repeat the expression and washing two or three times, and having dried the residue, digest it with a gentle heat several times in alcohol, and strain after each digestion. Distil off the alcohol from the mixed liquor, boil the residue for fifteen minutes in water with a little sulphuric acid and purified animal charcoal, and strain. Having thoroughly washed what remains, mix the washings with the strained liquor, evaporate with a moderate heat to the consistence of syrup, and then drop in as much solution of ammonia as may be necessary to precipitate the veratria. Lastly, separate and dry the precipitate. See Colchicum autumnale.

VERATRINE, Veratrina.

VERATRINE, SULPHATE OF, *Vera'triæ sulphas*, (F.) *Sulfate de Vératrine*, possesses the same virtues as veratrine. A solution of one grain in two ounces of distilled water has been suggested as a substitute for the *Eau médicinale d'Husson* — a celebrated gout remedy — in the dose of fʒj to fʒij.

VERA'TRUM ALBUM, (*verē atrum*, 'truly black,' from the colour of the roots [?]). *Helleb'orus albus, Elleb'orum album, Elleborus albus, Cherbachem, White hellebore, Langwort*, (F.) *Hellébore blanc. Sex. Syst.* Polygamia Monœcia. *Nat. Ord.* Melanthaceæ (Lindley). The root or rhizoma of this common European plant is indebted to the veratrine for its properties. It is inodorous; has a bitterish, acrid, nauseous taste, and is violently emetic and purgative, even when applied to an ulcerated surface. It is, also, possessed of errhine properties, and acts, externally, as a stimulant. It is rarely exhibited internally. Sometimes it is given as a *sneezing powder;* but it operates with great violence. It forms, also, an itch ointment. See Ung. Veratri.

VERATRUM LUTEUM, Chamælirium luteum.

VERATRUM SABADIL'LA, *Sabadilla, Sabatilla, Canis Interfec'tor, Caus'ticum America'num, Cevadil'la Hispano'rum, Sevadilla, Hor'deum caus'ticum*, (F.) *Cévadille*. The seeds of this plant, *Sabadilla, Cevadilla* (Ph. U. S.), have been used, mostly as anthelmintics. Dose, gr. ij to a child four years old. It possesses the same general properties as the veratrum album.

VERATRUM VIR'IDE, *American Hellebore, Swamp hellebore, Indian poke, Indian Uncas, Poke weed, Bear weed, Itch weed, Tickle weed, Earth gall, Devilbit, Wolfbane, Puppet root*, is indigenous in the swampy districts of almost every part of the United States. Its properties are like those of

the genus. It has been brought forward, however, in recent times, in the Southern States, as a powerful sedative in inflammatory diseases. Dose, eight drops of a saturated tincture.

VERBASCULUM, Primula veris.

VERBASCUM ALBUM, V. thapsus—v. Alatum, V. thapsus—v. Collinum, V. thapsus—v. Crassifolium, V. thapsus—v. Elongatum, V. thapsus—v. Lychnitis, V. thapsus—v. Montanum, V. thapsus.

VERBAS'CUM NIGRUM, (supposed to be a corruption from *Barbascum*, owing to its hairy coat; *barba*, 'a beard.') *Candela re'gia, Thapsus barba'tus, Tapsus barba'tus, Candela'ria, Lana'ria, Black Mullein;* and VERBAS'CUM THAPSUS, *V. thapsoi'des* seu *ala'tum* seu *colli'num* seu *album* seu *crassifo'lium* seu *elonga'tum* seu *lychni'tis* seu *monta'num* seu *simplex, Phlogmus, Phlomus, Phlox, great broad-leaved* or *yellow Mullein, High Taper, Cow's Lungwort*, (F.) *Molène, Bouillon blanc, Bonhomme, Cierge de notre dame, Herbe Saint-Fiacre. Ord.* Scrophulariaceæ, *Sex. Syst.* Pentandria Monogynia,—especially the latter,—have been used as emollients, applied externally in the form of fomentation. The large leaves have been chosen for this purpose. Occasionally, the mucilage which they contain has been extracted by decoction or infusion, and administered in pectoral affections.

VERBASCUM SIMPLEX, V. thapsus—v. Thapsoides, V. thapsus—v. Thapsus, see V. nigrum.

VERBE'NA HAS'TATA, *V. panicula'ta, Blue vervain, Simpler's Joy*, an American species, is more bitter than the European, and said to be emetic.

VERBE'NA OFFICINA'LIS, *Verbena, Dichro'mos, Verbena'ca, Periste'rium, Hierobot'anē, Herba sacra, Vervain, Purvain*, (PROV.) *Berbine, Juno's Tears*, (F.) *Verveine, Herbe à tous les maux; Ord.* Verbenaceæ. *Sex. Syst.* Diandria Monogynia. A plant formerly held sacred; used in sacrifices, and suspended round the neck as an amulet. In the form of cataplasm, it is said to have relieved obstinate headaches, and to have been of service in scrofula. It is not used.

VERBENA PANICULATA, V. hastata.

VERBE'NA URTICIFO'LIA, an indigenous species, has been used in poisoning from Rhus Toxicodendron.

VERBENACA, Verbena officinalis.

VERBESINA ACMELLA, Spilanthus Acmella.

VERBESI'NA VIRGIN'ICA, *Crown Beard.* Indigenous. *Order*, Compositæ. A decoction of the roots is used by the Indians as diaphoretic and depurative.

VERBUS, Penis.

VERCOQUIN, Phreni'tis vermino'sa. A form of phrenitis, attributed to the presence of a worm in the brain!

VERDET, Cupri subacetas.

VERDIGRIS, Cupri subacetas.

VERENDA, Genital organs.

VERETRUM, Penis.

VERGE, Penis—*v. d'Or*, Solidago virgaurea.

VERGERETTE DE PHILADELPHIE, Erigeron Philadelphicum.

VERGETURES, Vibices.

VERJUICE, *Ompha'cium*, (F.) *Verjus, Verdjus, (verd*, 'green,' and *jus*, 'juice.') "The juice of green fruits." A sour kind of grape. Also, an acid liquor, prepared from very sour grapes or crab-apples. It is principally used in culinary preparations; although, occasionally, an ingredient in medicinal compounds. See Vitis vinifera.

VERJUS, Verjuice.

VERMES, Worms—v. Cerebri, Choroid plexus.

VERMICELLI, see Turundæ Italicæ.

VERMICULAIRE BRÛLANTE, Sedum.

VERMICULAR. Vermiform.

VERMICULARIS, Lumbricalis, Sedum.

VERMICULI SPERMATICI, Spermatozoa.

VERMIC'ULUM, *Vermyc'ilum.* An elixir; a tincture. — Ruland and Johnson.

VERMICULUS CAPILLARIS, Dracunculus.

VER'MIFORM, *Vermic'ular, Vermicula'ris, Vermifor'mis*, (F.) *Vermiculaire, Vermiforme*, from *vermis*, 'a worm,' and *forma*, 'form.' That which resembles a worm.

VERM'IFORM PROC''ESSES, *Proces'sus* seu *Protuberan'tiæ* seu *appen'dices vermiformes, Vermes, Montic'uli cerebel'li, Worms*, (F.) *Éminences vermiformes du cervelet*, are two medullary projections, at the surface of the cerebellum. The *superior vermiform process, Vermis superior cerebelli*, is an elongated projection, at the anterior and middle part of the superior surface of the cerebellum; — and the *inferior vermiform process, Vermis inferior cerebelli, Pyr'amid of Malacarne*, is a somewhat larger projection, situate in the depression at the inferior surface of the same organ. The inferior vermiform process is usually described as consisting of three portions—the *pyramid*, the *uvula*, and the *nodulus*. The anterior portion of the superior vermiform process is elevated, and termed *Montic'ulus.*

VERMIFUGE, Anthelmintic.

VERMIFUGE, MATHIEU'S. This consisted of two distinct electuaries; the one for killing, the other for expelling tape-worm. The former is made of an ounce of *tin filings*, and six drachms of *fern root.*

VERMIFUGUS, Anthelmintic.

VERMILION, Hydrargyri sulphuretum rubrum.

VERMILLON DE PROVENCE, Antimonii sulphuretum rubrum.

VERMINATIO, Helminthiasis.

VERMINATION, CUTANEOUS, Malis.

VERMINEUX, Verminous.

VERM'INOUS, *Vermino'sus*, (F.) *Vermineux.* From *vermis*, 'a worm.' That which is caused by worms; as '*a verminous affection.*'

VERMIS, see Vermiform processes—v. Bombycinus, Cornu ammonis — v. Cerebelli, Vermiform process—v. Cerebri, Fever, Hungary—v. Cucurbitinus, Tænia solium—v. Digiti, Paronychia.

VERMITIO, Helminthiasis.

VERNIX CASEO'SA, 'cheesy varnish.' The fatty varnish, or deposit, often found on the fœtus, which is secreted by the sebaceous follicles of the skin.

VERNIX SICCA, Sandarac.

VERNO'NIA ANTHELMIN'TICA, *Ascari'cida anthelmin'tica, Calagirah, Calageri.* A plant which is indigenous in India. *Ord.* Compositæ. *Sex. Syst.* Syngenesia Polygamia superflua. It has great celebrity in the East Indies, and is a bitter tonic; but the seeds are chiefly used as an anthelmintic, in cases of ascarides and lumbrici in children.

VERNO'NIA NOVEBORACEN'SIS, *Iron weed, Flat top;* an indigenous plant; whose purple flowers appear in August and September, is reported to possess cathartic properties.

VÉROLE, Syphilis — *v. Petite*, Varicla — *v. Petite volante*, Varicella.

VÉROLÉ, Syphilitic.

VÉROLETTE, Varicella.

VÉROLIQUE, Syphilitic.

VERO'NICA, *V. officina'lis* seu *Tournefor'tii* seu *mas, Thea German'ica, Beton'ica Pauli, Chamæ'drys, Male Veronica, Fluellin, Officinal Speedwell, Eyebright, Paul's Betony*, (F.) *Véronique, Thé d'Europe, Herbe aux ladres. Ord.* Sire-

phulariaceæ. *Sex. Syst.* Diandria Monogynia. This plant was once used as a pectoral.

VERONICA AQUATICA, V. beccabunga.

VERONICA BECCABUN'GA, *Beccabunga, Anagal'lis* seu *vero'nica aquat'ica, Laver Germav'icum, Cepæ'a, Water Pim'pernel, Brooklime, Brooklime Speedwell, Water Speedwell, Neckweed, Water Purslain,* (Sc.) *Water-purpie,* (F.) *Véronique cressonée.* This plant was formerly used in a variety of diseases. It is, however, almost insipid and inodorous; and has been long banished from practice.

VERONICA MAS, Veronica — v. Officinalis, Veronica.

VERONICA PEREGRI'NA, *Neckweed, Purslain, Speedwell;* indigenous; flowering from April to June, is given internally in scrofulosis, and is applied as a wash to scrofulous tumours.

VERONICA PURPUREA, Betonica officinalis—v. Tournefortii, Veronica — v. Virginica, Leptandra Virginica.

VÉRONIQUE, Veronica—*v. Cressonée,* Veronica beccabunga.

VERPA, Penis.

VERRE, Vitrum — *v. d'Antimoine,* Antimonii vitrum.

VERRU'CA, diminutive *Verru'cula, Ecphy'ma verruca, Phymato'sis verruco'sa,* a *Wart,* (Prov.) *Wret,* (F.) *Verrue, Poireau.* A small, hard, mamillary tumour, which forms at the surface of the skin, and particularly on that of the hands and face. Warts are generally rugous at the surface, and broad at the base; their roots being implanted in the derma by whitish filaments, which are dense, semifibrous, and very numerous.

Warts may be destroyed by caustic, or removed by excision. Their vitality is, generally, not great.

VERRUCA CARNOSA, Condyloma — v. Formicaria, Formica — v. Minor, Thymion—v. Palpebrarum, see Hydatid — v. Pensilis, Acrochordon—v. Rhagoïdes, Thymion.

VERRUCARIA, Calendula officinalis, Heliotropium Europæum.

VERRUCOSE, Warty.

VERRUCOUS, Warty.

VERRUCULA, Verruca.

VERRUE, Verruca.

VERS, Worms.

VERSE-CHARMS, see Charm.

VERSIO, Turning — v. Fœtûs, Turning — v. Spontanea, Evolution, spontaneous — v. Uteri, Hysteroloxia.

VERSION, Turning.

VERT-DE-GRIS, Cupri subacetas.

VERTEBRA DENTATA, Axis — v. Dorsi Prima, Lophia — v. Lumborum Prima, Asphaltites — v. Magna, Sacrum.

VER'TEBRÆ, *Spon'dyli, Spondles, Whetlebones,* (F.) *Vertèbres;* from *vertere,* 'to turn.' This name has been given to the bones, which by their union form the vertebral or spinal column. The vertebræ are short, thick, very angular bones; twenty-four in number, and situate one above another. The *body — centrum,* of Owen—of the vertebra is the middle and anterior portion. Above and below it is articulated, by means of a fibro-cartilage, with the contiguous vertebræ. The *Processes,* (F.) *Masses apophysaires,* of each vertebra are:—1. The *spinous process,* situate behind, and in the median line. 2. The two *transverse processes,* standing off from each side. 3. The *four articular,* or *oblique processes — zygapophyses,* of Owen — two *superior,* and two *inferior*—which serve to unite the vertebræ with each other. These transverse and articulating processes are made continuous with the lateral and posterior parts of the body of the vertebra by narrow bony portions or pedicles, on each of which are notches. These, by their union with similar notches in the contiguous vertebra, form the lateral foramina, (F.) *Trous de conjugaison,* through which the spinal nerves leave the vertebral canal. The different processes are united with each other, so as to form a kind of *ring* of the lateral and posterior parts of the vertebra; and the foramen, within this,—that is, between the body and processes, *fora'men vertebra'lë, rachid'ium,* — concurs in forming the vertebral canal. The *arch* or *lamina* of a vertebra, *neuropoph'ysis,* is the part from which the several processes project. The vertebræ have particular characters, according to the regions they occupy. They are divided into seven *cervical,* twelve *dorsal,* and five *lumbar.* The first cervical is called *atlas;* the second, *axis* or *vertebra dentata;* and the seventh, *vertebra prœminens.* The vertebræ are articulated with each other. Those of the back are joined, moreover, to the ribs by their articulating surfaces — *parapophyses.* The first or atlas is articulated with the occipital bone; and the last lumbar vertebra with the sacrum. The cervical vertebræ are developed by nine points of ossification; the dorsal and lumbar by eight.

VER'TEBRAL, *Vertebra'lis.* That which relates or belongs to the vertebræ.

VERTEBRAL ARTERY, *Posterior cerebral artery,* (Ch.), is the largest of the branches of the subclavian. It arises from the posterior part of that vessel; is lodged in a canal, (F.) *Petit canal vertébral,* formed by the foramina in the transverse processes; enters the cranium, and proceeds to anastomose with its fellow of the opposite side, and to form the *Basilary artery.* Besides the branches sent to the neck, the vertebral artery gives off the *anterior* and *posterior spinal arteries,* and the *inferior cerebellous,* in the cavity of the cranium.

VERTEBRAL COLUMN, *Rachis, Rhachis, Notos, Acnes'tis, Cari'na, C. hom'inis, Spina, S. dorsi* seu *vertebra'lis, Colum'na spina'lis* seu *vertebra'lis* seu *dorsi, Dorsum, Tergum, Compa'ges Vertebra'rum, Acan'tha, Sacra fis'tula, Hi'era Syrinx, Spine, Back bone,* (Sc.) *Backeprent,* (F.) *Colonne vertébrale, Épine du dos, Échine.* A kind of bony column, situate at the posterior and central part of the trunk; extending from the head to the sacrum; flexible in every direction, yet very solid and hollowed by a *canal* called *vertebral,* which gives it lightness without diminishing its strength, and runs through its whole length. The vertebral column is formed by the superposition of the vertebræ. It represents a pyramid, whose base is below. Anteriorly, it is convex in the neck; concave in the back, and convex, again, in the loins. Behind, the curvatures are of course the reverse of these. There is also, in the dorsal region, a lateral curvature, the concavity of which is towards the left side. Considered as a whole, the vertebral column has an *anterior* or *prespinal* surface; a *posterior* or *spinal;* two *lateral;* a *base;* and an *apex* or top. In the nomenclature of Chaussier, the anterior surface, in the neck, is called *trachelian;* in the back, *predorsal;* and in the loins, *prelumbar.* The dorsal surface has, at its middle, the spinous processes; and, at its sides, the *vertebral gutters,* (F.) *Gouttières vertébrales,* formed by the sucession of the *vertebral plates,* (F.) *Lames vertébrales,* which, by their junction, constitute the spinous processes. These are filled by the sacro-spinalis muscle. The sides or lateral surfaces present the foramina resulting from the union of the *vertebral notches,* (F.) *Échancrures vertébrales.* These are called *vertebral foramina,* (F.) *Trous de conjugaison,* and give passage to the *vertebral nerves.* The base

of the vertebral column is oblique, to unite with the sacrum; and forms with it an angle, called *sacro-vertebral angle* or *promontory*. The *apex* or *top* of the vertebral column is articulated with the occipital bone. Sometimes, the term *vertebral column* includes the whole of the column from the occipital bone to the extremity of the coccyx. The *Vertebral* or *Spinal* or *Rachid'ian Canal, Solen, Cana'lis medullæ Spina'lis, Specus pro medull'a Spina'li* seu *vertebra'lis*, exists through the whole of the vertebral column, whose curvatures it follows. It is continuous, above, with the cranium; below, with the sacral canal, if we consider the vertebræ to terminate at the sacrum. It is lined by a prolongation of the meninges, forming the *Theca vertebra'lis*, and lodges the spinal marrow.

The vertebral column, which unites lightness with solidity, serves to support the head and chest. It is the seat of all the movements of the trunk, the weight of which it transmits to the pelvis. It lodges and protects the spinal marrow, and gives passage to the vertebral nerves, and to numerous vessels.

VERTEBRAL DISEASE, *Rachial'gia* (of some,) *Caries of the Ver'tebræ, Spondylarthroc'acē, Spondyloc'acē, Kypho'sis inflammato'ria* seu *paraly't'ica, Gibbos'itas cario'sa, Ca'ries vertebra'rum, Spondylal'gia, Spondylopyo'sis, Tuberculo'sis Vertebra'rum*. The spinal column is liable to distortion, (see Hump,) at times, without the vertebræ being much, if at all, diseased. At other times, a more formidable affection is induced; the vertebræ becoming carious, and the intervertebral cartilages ulcerated; followed by a more or less complete loss of power over the lower extremities. In such case, on examining the spine, one or more of the spinous processes is found to project beyond the rest. The disease was first well described by Mr. Percival Pott; and, hence, it has been called, by the French, *Maladie de Pott, Malum* seu *Gibbus Pot'tii, Pott's disease* or *curvature*. It usually occurs in scrofulous subjects, and the treatment consists in establishing a counter-irritation by blisters, issues, or the moxa, opposite the transverse processes of the diseased vertebræ. The sore must be suffered to remain open and the patient kept in the horizontal posture until the use of the limbs is recovered; employing tonics, the free admission of fresh air, &c., at the same time.

VERTEBRAL LIG'AMENTS, (F.) *Ligaments vertébraux, Surtouts ligamenteux de la colonne vertébrale*, are distinguished into *anterior* and *posterior*. They consist of long, ligamentous coverings; the *anterior* occupying the anterior part of the vertebral column; and the *posterior* seeming to arise from the occipito-axoid ligament, and seated behind the bodies of the vertebræ, from the axis to the sacrum.

VERTEBRAL NERVE, Trisplanchnic.

VERTEBRAL NERVES, *Spinal Nerves*, (F.) *Nerfs rachidiens*, spring successively from the spinal marrow; from its origin to its termination. These nerves—30 pairs in all—arise by two roots; one *anterior*, from the *anterior* or *an'tero-lat'eral column* of the spinal marrow, and the other *posterior*, from the *posterior* or *pos'tero-lat'eral column*, and afterwards issue by the vertebral and sacral foramina. Each of these roots seems to have a distinct function; the *posterior* being destined to convey sensation to parts; the *anterior*, motion. On the posterior root, before its junction with the anterior, there is a ganglion. Of the 30 pairs, 7 are *cervical nerves*, 12 *dorsal*, 5 *lumbar*, and 6 *sacral*. See Nerves.

VER'TEBRATED, *Vertebra'tus*, (F.) *Vertébré*. Provided with vertebræ.

VERTÈBRES, Vertebræ.

VERTEBRODYMIA, see Somatodymia.

VERTEBRO-ILIAC LIGAMENT, Ileo-lumbar ligament.

VERTEX, *Cor'yphē, Acrori'a, Spon'dylus*. The top or highest part or *crown* of the head. (Sc.) *Cantel, Now, Pallat, Palad*. See Sinciput.

VERTEX CORDIS, Mucro Cordis — v. Cubiti, Olecranon — v. Palpitans, Fontanella.

VERTIBULUM, Trepan.

VERTICULA, Articulation.

VERTICULUM, Articulation.

VERTICULUS, Articulation.

VERTIGE, Vertigo.

VERTIG"INOUS, *Vertigino'sus*, (Old Eng. and Prov.) *Totty*, (F.) *Vertigineux*. Relating or pertaining to vertigo; *Giddy, Dizzy*.

VERTI'GO, from *vertere*, 'to turn;' *Dinos, Ilin'gos, Dinus* seu *Hallucina'tio* seu *Autal'gia vertigo, Circumgyra'tio, Gid'diness, Diz'ziness, Swimming of the head*, (Prov.) *Swee, Swimmying*, (F.) *Vertige, Étourdissement*. A state in which it seems that all objects are turning round; or that the individual himself is performing a movement of gyration. Two varieties have been designated; — *simple vertigo*, where the objects are seen; and *scotodynia*, in which the sight is obscured, and the individual often falls. Vertigo is dependent upon the condition of the brain; and often announces an attack of apoplexy or epilepsy.

VERTIGO TENEBRICOSA, Scotodynia.

VERUGAS (S.), from *verruca*. A peculiar disease affecting certain localities of Peru, which manifests itself by sore-throat, pains in the bones, and other febrile symptoms. In the course of a few days, an eruption of red pimples or boils appears. These sometimes increase in magnitude till they become nearly as large as an egg, and discharge blood copiously. It is ascribed to the water of certain springs in the valleys, and especially in that of Surea: called *Agua de Veruga*. —Tschudi.

VERU MONTANUM, Gallinaginis caput.

VERVAIN, Verbena officinalis—v. Blue, Verbena hastata.

VERVEINE, Verbena officinalis.

VESA'NIA, *Vesa'niæ*, 'madness.' Derangement of the intellectual and moral faculties, without coma or fever. Many nosologists have used this as a generic term; under which they have included the different species of mental alienation, hypochondriasis, somnambulism, and even hydrophobia. See Nosology.

VESANIA MANIA, Mania.

VESANIÆ, Insanity.

VESICA BILIARIA, Gall-bladder—v. Cordis, see Pericardium—v. Fellea, Gall-bladder—v. Intestinalis, Vesicula umbilicalis—v. Prostatica, see Ejaculatory ducts—v. Saccata, Cystostenochoria—v. Urinaria, Urinary bladder.

VESICÆ IRRITABILITAS, Cysterethismus — v. Unguinosæ tendinum, Bursæ mucosæ.

VES'ICAL, *Vesica'lis*, from *vesica*, 'the bladder.' That which belongs or relates to the bladder.

VESICAL ARTERIES vary in number and origin. The umbilical artery always sends off two or three: the middle hemorrhoidal, internal pudic, and obturator furnish others, which ramify and anastomose in the parietes of the bladder; the hypogastric furnishes one which is somewhat larger, the *Vesico-prostatic* (Ch.), and proceeds to the *bas-fond* of the bladder, sending numerous ramifications to it as well as to the surrounding parts.

VESICAL GANGLIA, see Spermatic Ganglion—

v. Ligaments, see Urinary bladder — v. Oxyd, Oxyd, cystic—v. Triangle, see Urinary bladder.

VESICAL VEINS, much more numerous than the arteries, open into the hypogastric plexus.

VESICANT, Blister, Epispastic.

VESICARIUM, Ovarium.

VESICA'TION, *Vesica'tio;* from *vesica,* 'a bladder.' The action of a vesicant. The formation of blisters.

VÉSICATOIRE, Blister — *v. Magistral,* Magistral.

VESICATORIUM, Blister.

VESICLE, Vesicula—v. Allantoid, Allantois—v. Blastodermic, see Molecule — v. Cowpox, see Vaccination.

VESICLE OF DEVELOPMENT, *V. of Evolution.* A vesicle or cyst concerned in histogeny.

VESICLE OF EVOLUTION, V. of Development — v. Germinal, see Molecule — v. Purkinjean, see Molecule — v. Umbilical, Vesicula umbilicalis.

VESICLES, ASCHERSO'NIAN. When fluid fat and fluid albumen are shaken together, the resulting fat globules become surrounded by an albuminous layer. The vesicles, thus formed, are called after Ascherson, their discoverer.

VESICLES OF DE GRAAF, Folliculi Graafiani — v. Seminal, Vesiculæ seminales.

VESICOCE'LÈ. Badly compounded for Cystocele.

VES'ICO-U'TERINE, *Vesi'co-uteri'nus,* from *vesica,* 'the bladder,' and 'uterus.' Appertaining, or relating to, the bladder and uterus.

VESICO-UTERINE FOLDS, see Uterus.

VES'ICO-VAG''INAL, *Vesi'co-vagina'lis, Vag''ino-ves'ical.* Relating to the bladder and the vagina; as *vesico-vaginal fistula.*

VESIC'ULA, *Cystinx, Ves'icle, Blister,* (F.) *Vésicule;* diminutive of *vesica,* 'a bladder.' A small bladder or cyst.

VESICULA, *Ves'icle, Ecphly'sis, Cystinx,* in pathology, means a small orbicular elevation of the cuticle containing lymph, which is sometimes clear and colourless, but often opake and whitish or pearl-coloured. It is succeeded, either by a scurf, or by a laminated scab.

VESICULA ÆNIGMATOSA, Vesicula umbilicalis — v. Alba, Vesicula umbilicalis — v. Bilis, Gall-bladder — v. Blastodermatica, see Molecule — v. Blastodermica, see Molecule—v. Chyli, Receptaculum chyli — v. Erythroidea, Erythroid vesicle —v. Fellis, Gall-bladder—v. Gangrænescens, see Anthrax—v. Germinativa, see Molecule—v. Omphalo-mesenterica, Vesicula umbilicalis—v. Ovalis, Vesicula umbilicalis — v. Prolifera, see Molecule — v. Prostatica, see Ejaculatory ducts.

VESIC'ULA UMBILICA'LIS, *V. alba* seu *om'phalo-mesenter'ica* seu *ænigmato'sa* seu *ova'lis, Vesi'ca intestinalis, Vitellic'ulus, Umbil'ical* or *Intestinal Vesicle, Vit'elline Pouch, Vitell'icle.* A small, pyriform, round, or spheroidal sac, which, about the fifteenth or twentieth day after fecundation, is of the size of a common pea, and probably acquires its greatest dimensions in the course of the third or fourth week. After the seventh week, it becomes shrivelled and disappears insensibly. It seems to be situate between the chorion and amnion, and is commonly adherent either to the outer surface of the amnion, or to the inner surface of the chorion, but at times is loose between them. The *vitelline ped'icle,* which attaches the vesicle to the embryo, is continuous with the intestinal canal; and, up to twenty or thirty days of embryonic life, is hollow,— *Ductus om'phalo-mesenter'icus* seu *vitello-intestina'lis* seu *vitella'rius, vitelline Duct.* Its arteries are the omphalo-mesenteric. The *vitelline fluid,* contained in the vesicle—in the *Vitelline* or *Yolk membrane*—has been compared, from analogy, to the *vitellus* or *yolk* of birds; and, like it, is an oleaginous substance, and presumed to be inservient to the nutrition of the embryo.

VESICULÆ constitute the 6th order of Bateman's classification of *Cutaneous Diseases.*

VESICULÆ, see Villous membranes — v. Divæ Barbaræ, Variola confluens — v. Gingivarum, Aphthæ—v. Pulmonales, see Cellule—v. Rotundæ cervicis uteri, Nabothi glandulæ — v. Sanguinis, Globules of the blood — v. Seminales mulierum, Nabothi glandulæ — v. Spermaticæ, Vesiculæ seminales.

VESICULÆ SEMINA'LES, *V. Semina'riæ* seu *spermat'icæ, Cap'sulæ semina'les, Conceptac'ula seminaria, Gonecys'tides, Sem'inal ves'icles,* (F.) *Vésicules séminales, Gardouches, Greniers,* are two small membranous sacs, which serve as reservoirs for the sperm, and probably secrete a fluid to be mixed with the sperm. They are situate beneath the bladder, and above the rectum, behind the prostate and to the outer side of the vasa deferentia. They are of an irregular conoidal shape; flattened from above to below; embossed on their surface, and of a grayish tint. Their *posterior extremity* or *fundus* terminates by a round cul-de-sac. Their *anterior extremity* or *neck* is narrow and elongated, and is continuous with the excretory duct of the vesicula. This duct joins the vas deferens, and forms with it the ejaculatory duct. The interior of the vesiculæ exhibits several cells, which communicate with each other, and are lined by a very thin, mucous membrane.

VESIC'ULAR, *Vesicula'ris,* (F.) *Vésiculaire.* Of or belonging to a vesicle:—full of or containing small vesicles or cells. The cortical or gray matter of the brain is sometimes termed *vesicular.* See Cortex cerebri and Neurine.

VÉSICULE, Vesicula—*v. Biliai're,* Gall-bladder — *v. du Fiel,* Gall-bladder — *v. Germinative,* see Molecule — *v. Ovulifère,* see Folliculi Graafiani.

VÉSICULES DE GRAAF, Folliculi Graafiani —*v. de Sainte Barbe,* Variola confluens—*v. Séminales,* Vesiculæ seminales.

VESIC'ULO-TYMPANIT'IC, *Vesic'ulo-tympanit'icus.* An epithet for a sound or resonance heard on percussion, which consists of the vesicular and tympanitic sounds combined. It occurs when the parenchyma of the lungs is incompletely solidified. — Flint.

VESPA, Wasp.

VESSEL, *Vas, Vasum,* diminutive *Vasculum, Angei'on, Angos, Conceptac'ulum,* from (L.) *vas, vasculum,* (F.) *Vaisseau.* A canal, more or less elastic, formed by the superposition of membranes, and distinguished, according to its uses and general arrangement, into *Artery, Vein,* and *Lymphatic.* See, also, Vascular.

VESSELOUP, Lycoperdon.

VESSIE, Urinary bladder—*v. à Colonnes,* see Urinary bladder — *v. Col de là,* Collum vesicæ.

VESSIE NATATOIRE, Air-bladder.

VESTIBULAR NERVE, see Auditory nerve.

VES'TIBULE, *Vestib'ulum,* from *vestio,* 'to cover.' The porch or entrance to a house.

VESTIBULE. *Vestib'ulum, V. Vagi'næ, Prona'us, Atrium Vagi'næ, Amb'itus genita'lis mulic'bris,* is a smooth cavity between the perinæum and nymphæ in the female, which leads to two passages — to the urethra above, and to the vagina below.

VESTIBULE OF THE EAR, *Vestib'ulum, V. labyrin'thi,* (F.) *Vestibule.* A cavity of an irregular shape, which forms part of the labyrinth or internal ear. The vestibule is situate on the inner side of the tympanum; on the outer side of the meatus auditorius internus; before the semicircular canals, and behind the cochlea. It is lined

by a particular membrane, and contains the liquor of Cotunnius and branches of the auditory nerve. There is also another membrane, constituting the *membranous vestibule*, but it is not an exact imitation of the osseous cavity. It is composed of two distinct sacs, which open into each other — the *sac'culus vestib'uli*, and the *sacculus*. There are three contiguous *cavities* in the vestibule; one of which, the *semi-oval*, is situate above; another, the *hemispherical*, below; and the third, or *sulciform*, which is the orifice of the aquæductus vestibuli, behind.

VESTIBULUM LABYRINTHI, Vestibule of the ear — v. Vaginæ, Vestibule.

VESTIGE (F.) *Vestig"ium*, 'a vestige,' 'a trace.' A kind of fracture of flat bones, consisting of a simple incision having the mark of the instrument that caused it. The term is also applied to a part of the body, which may have no evident use in man, and yet may be greatly employed in animals. For example, the muscles of the external ear in man are almost devoid of use, or are *vestiges* of what they are in certain animals.

VESTIGIUM, Sole, *Vestige* — v. Foraminis ovalis, Ovalis fossa — v. Pedis, Metatarsus.

VESTI'TUS, *Esthe'ma, Esthe'sis, Res vestia'ria, Clothing, Dress, Vesture*, (F.) *Vêtement*, from *vestire, vestitum*, 'to clothe.' Any substance used for the purpose of covering nakedness, or preserving from atmospheric temperature by being worn on the body. The best clothing in winter is composed of articles that are bad conductors of caloric, and do not admit of ready evaporation of the matter of perspiration. In this respect, woollen vestments deserve the first place, and cotton the second. Colour has likewise to be regarded — the darkest hues transmitting the heat most readily through them. It has been found that the same rule applies to odours — the darker colours retaining a greater amount of odorous particles than the lighter. Hence the necessity of white walls, white bed-clothes, &c., in the wards of hospitals; for it is probable that the like law applies to contagious miasms.

VESTURE, Vestitus.

VETA, Puna.

VÊTEMENT, Vestitus.

VETERANA, Rubeola.

VETERINARIUS, see Hippiater and Veterinary.

VET'ERINARY, *Veterina'rius*, (F.) *Vétérinaire*, from *veterinus*, 'that which bears burdens;' itself, perhaps, from *vehiterinus*, from *vehere*, 'to carry.' That which appertains to beasts of burden: hence, *veterinary surgeon*, (see Farrier,) *veterinary college*, and *veterinary medicine*.

VETERINARY ANATOMY, see Anatomy.

VETERINARY ART, *Ars* seu *Medici'na veterina'ria, Zoöi'asis, Zoiatri'a, Theriat'rica, Mulomedici'na, Zoötherapi'a, Zoötherapeu'ticê, Ars zoiat'rica, Far'riery*. The art of treating the diseases, &c., of cattle.

VETERNOSITAS, Coma vigil.

VETERNUS, Coma vigil.

VETIVERIA ODORATA. Andropogon muricatus.

VETTONICA, Betonica officinalis.

VETULA, Sacrum.

VEXILLA TUBARUM FALLOPII, see Tube, Fallopian.

VEXILLUM, *Drapeau*.

VIA, Way — v. Curandi, Ratio medendi — v. Stomachi et ventris, Œsophagus.

VIABILITY, see Viable.

VI'ABLE, *Viab'ilis*, from *via*, 'way;' or from (F.) *vie*, 'life,' (Orfila.) A word, which may be introduced with great advantage from the French into our language. It is an epithet applied to a fœtus whose organs are properly formed, and so developed as to permit its continued existence. Every fœtus is not *viable*. Anencephali have lived ten or twelve days, yet they are not viable. The older the fœtus, the more viable is it. It is an idle prejudice that a child, born at the end of eight months, is less likely to live than one born at the end of seven. The signs of *viability* are drawn from the weight, length, external conformation, &c., of the fœtus. It may be laid down as a general rule, that no fœtus born before the end of the seventh month is viable.

VIÆ CHYLIFERÆ, Chyliferous vessels.

VIÆ CLANDES'TINÆ, *Clandestine Passages*. Supposititious secret ways or passages or 'royal roads,' to account for the rapid transmission of substances taken into the stomach to the kidneys or bladder.

VIÆ EXTRAORDINARIÆ LACTIS, Galactoplania — v. Lacrymales, Lachrymal passages — v. Primæ, Ways, digestive — v. Secundæ, Ways, second.

VIAL, Phiala.

VIANDES FAISANDÉES, see Hyposaprus.

VIBI'CES, *Mol'opes, Striæ*, (F.) *Vergetures*, 'Stripes.' Large purple spots, like the marks produced by the strokes of a whip, which appear under the skin in certain malignant fevers. They are unfavourable indications, as they denote great prostration.

VIBRAMEN, Oscillation.

VIBRANS, Vibratory.

VIBRATILE, Vibratory.

VIBRATIL'ITY, *Vibratil'itas*, (F.) *Vibratilité*, from *vibrare, vibratum*, 'to quiver.' Capability of being thrown into vibration.

VIBRATIO, Oscillation — v. Cardiaca, Palpitation — v. Cordis, Palpitation.

VIBRATION, PECTORAL, see Fremitus — v. Tactile, see Fremitus — v. Tussive, see Tussive.

VIBRATIONS OF SOUND, see Sound.

VIBRATOR, Deferens vas.

VI'BRATORY, *Vibrans, Vi'brative*, (F.) *Vibratile, Vibratoire*. An epithet applied to the pain that accompanies some neuralgiæ, which seems to the patient to vibrate among the nerves.

VIBRATORY MOTION, see Cilia.

VIBRATUS, Oscillation.

VIB'RIO; from *vibrare*, 'to quiver.' A genus of infusory animalcules, of which different species are met with, — for example, *Vib'rio pro'lifer* in almost all putrescent fluids containing protein, and in the pus of chancres; in which last the *V. lineola* has likewise been found.

VIBRIS'SÆ. Same etymon. The hairs which grow at the entrance of the nostrils and of other outlets. In the feline tribe, the whiskers.

VIBURNUM CASSINOIDES, Ilex Paraguensis.

VIBUR'NUM DENTA'TUM, *Arrow Wood, Mealy Tree, Tily* of the Indians. *Ord.* Caprifoliaceæ. A high indigenous shrub, of the same family as V. lentago; the bark of which has been used by the Indians as a diuretic.

VIBURNUM EDU'LE flourishes in the Hudson's Bay territory. The fruit has an orange colour, and is less acid, more fleshy, and more agreeable to the taste than the cranberry.

VIBURNUM LÆVIGATUM, Ilex Paraguensis.

VIBURNUM LENTA'GO, *Sweet Viburnum, Nannyberry*. A handsome indigenous tree, of the honeysuckle *family*—Caprifoliaceæ—which flowers in May and June. It has been used as an antiperiodic.

VIBUR'NUM PRUNIFO'LIUM, *Black Haw, Sloe-leaved Viburnum, Sloe*. Indigenous: flowering in May. The leaves have been used as tea.

VIBURNUM, SLOW-LEAVED, V. prunifolium — v. Sweet, V. lentago.

VIC-LE-COMPTE, MINERAL WATERS OF. Vic-le-Compte is a small village in the de-

partment of Puy de Dôme, three leagues from Issoire; where there is an acidulous chalybeate, which is aperient.

VICA'RIOUS, *Vica'rius*, from *vicis*, 'change, place.' Taking the place of another:—as 'vicarious secretion,' *Secre'tio vica'ria*; a secretion which takes place in one part instead of another.

VICAR'S BRAY, MINERAL WATERS OF. This spring is situate in Perthshire, Scotland, about two miles from Dollor, and near to Blarngone. The water is one of the strongest chalybeates known.

VICE, Cachosis.

VICE DE CONFORMATION. Faulty formation of a part of the body.

VICHY, MINERAL WATERS OF. Carbonated alkaline chalybeates, the sources of which are at Vichy, six leagues from Moulins, in the department of Allier. The springs are seven in number. Almost all are thermal; give off bubbles of carbonic acid gas, and have a slightly sulphureous odour. They deposite carbonates of lime and magnesia, and a little oxide of iron; and afford, on analysis, carbonates of lime, soda, iron, and magnesia, carbonic acid, sulphate of soda, and chloride of sodium. They are employed as tonics, particularly in chronic affections of the abdominal viscera, in old catarrhs, diseases of the joints, &c.

VICHY WATER, FACTIT''IOUS, *Aqua Vicien'sis*, (F.) *Eau de Vichy*, is made of simple *acidulous water*, impregnated with twice its bulk of *carbonic acid*, ℥xxss; *subcarbonate of soda*, gr. xxxij; *sulphate of soda*, gr. xvj; *chloride of sodium*, gr. lv; *subcarbonate of magnesia*, gr. ss; *chloride of iron*, gr. ¼. Mix. *Ph. P.*)

VICIA ERVILIA, Ervum.

VIC''IA FABA, *Faba, F. major* seu *vulgaris*, *Or'obus faba*, *Common Garden Bean*, (F.) *Fève* ou *Fève des marais*. *Ord.* Leguminosæ. *Sex. Syst.* Diadelphia Decandria. A native of Egypt, of which there are many varieties. Beans are not easy of digestion. They are proverbially flatulent, especially when old. When young, they are more digestible and wholesome. Bean meal was one of the four resolvent meals of the ancients.

VICINITRACTUS, Erysipelas.

VICINITRAHA, Erysipelas.

VICTORIALIS FEMINEA, Gladiolus vulgaris — v. Longa, Allium victoriale — v. Rotunda, Gladiolus vulgaris.

VICTÛS RATIO, Diet.

VIDANGES, Lochia.

VIDIAN CANAL, Pterygoid canal—v. Nerve, Pterygoid nerve.

VIE, Life — *v. Durée de la*, see Longevity — *v. Moyenne*, see Longevity.

VIEILLESSE, Senectus.

VIELLOTTE, Colchicum autumnale.

VIERGE, Virgin.

VIF ARGENT, Hydrargyrum.

VIGILANCE, Insomnia.

VIGILANTIA, Egregorsis.

VIGILATIO, Egregorsis.

VIGILIA, Egregorsis.

VIGILIÆ, Egregorsis—v. Nimiæ, Coma vigil.

VIGILIUM, Egregorsis.

VIGNE, Vitis vinifera — *v. Blanche*, Bryonia alba — *v. de Judée*, Solanum dulcamara — *v. du Nord*, Humulus lupulus—*v. Vierge*, Bryonia alba.

VIGNETTE, Spiræa ulmaria.

VIGNOBLE, Mercurialis.

VIGOR, Acme.

VILLA FRANCA, (CLIMATE OF.) This little town is situate immediately to the eastward of Montalbano, which separates the bay of Villa Franca from that of Nice. It is on the southern declivity of a steep and lofty range of mountains; and is more effectually sheltered from the north and north-west winds than Nice, with the climate of which that of Villa Franca closely corresponds.

VILLI, see Villous membranes.

VILLOUS, *Villo'sus*, (F.) *Velleux*, from *villus*, 'a hair.'

VILLOUS MEMBRANES or COATS, *Velamen'ta Bombyc''ina*, (F.) *Membranes villeuses*, *Membranes veloutés*, are such as are covered with soft papillæ or *Villi*, *Flocci*, *Floc'culi*, *Vesic'ulæ*, *Cylin'dri*, *Tubi Membrana'cei*, constituted of blood-vessels, nerves, and absorbents; or such as are covered with fine down, so as to cause them to feel soft and velvety. The term is, however, chiefly restricted to the former. Chaussier gives the name *simple villous membranes* to the serous membranes; and that of *complicated* or *follicular villous membranes* to the mucous membranes.

VIN, Wine — *v. de Bordeaux*, Claret — *v. de Poulet*, see *Poulet*—*v. de Quinquina composé*, Vinum de kinâ kinâ compositum—*v. Rouge d'Oporto*, Vinum Portugallicum — *v. Sec*, Sack.

VINAIGRE, Acetum, see Aceticum acidum—*v. Scillitique*, Acetum scillæ — *v. de Bois*, Pyroligneous acid.

VINAIGRES MÉDICINAUX, Acetica.

VINCA MINOR, *V. pervin'ca*, from *vincio*, 'I bind,' because of its usefulness in making bands. *Clem'atis daphnoï'des major*, *Lesser periwinkle*, (F.) *Pervenche*, *Violette des Sorciers*. It has bitter and astringent properties, and has been used in gargles and diseases of the chest.

VINCETOXICUM, Asclepias vincetoxicum.

VINCTURA, Fascia.

VINCULA, Fascia.

VINCULUM, Bandage, Lien — v. Caninum, Frænum penis—v. Linguæ, Frænum linguæ—v. Præputii, Frænum penis—v. Umbilicale, Funiculus umbilicalis.

VINE, Vitis vinifera—v. Grape, Vitis vinifera.

VINE POISON, Rhus radicans.

VINE, WILD, Pareira.

VINEGAR, AROMATIC SPIRIT OF, see Aceticum acidum.

VINEGAR OF CANTHARIDES, Acetum cantharidis.

VINEGAR, COMMON, Acetum — *v.* Distilled, see Aceticum acidum — v. Estragon, Artemisia dracunculus — v. Marseilles, Acetum aromaticum.

VINEGAR OF MEADOW SAFFRON, Acetum colchici — v. of Opium, Guttæ nigræ.

VINEGAR, RADICAL, Aceticum acidum.

VINEGAR OF SQUILLS, Acetum scillæ—v. of the Four Thieves, Acetum aromaticum.

VINEGAR, THIEVES', Acetum aromaticum — v. Whey, see Acetum.

VINEGAR OF WOOD, see Aceticum acidum.

VINETTE, Rumex acetosa.

VINETTIER, Oxyacantha Galeni.

VINEUX, Vinous.

VINOLENTA, see Temulentia.

VINOLENTIA, Temulentia.

VINOSUS, Vinous.

VINOUS, *Vino'sus*, *Œno'des*, *Œnoï'des*, (F.) *Vineux*, from *vinum*, 'wine.' Relating to wine. Having the character of, or resembling, wine. Made of wine.

VINUM, Wine, Sherry wine (Ph. U. S. 1842). See Wine. A medicinal wine, (F.) *Vin médicinal*, *Onolé*, *Onolature*.

VINUM ABSINTHI'TES, *Wine of Wormwood*. (*Fol. absinth. exsic.*, *absinth. Pontic.*, ää ℥vj, *vini albi* Oiv. Macerate for 24 hours, and strain. *Ph. P.*) Stimulant, tonic, febrifuge, vermifuge.

VINUM ADUSTUM, Brandy — v. Album, Sherry wine (Ph. U. S. 1851), see Wine—v. Album Hispanicum, see Wine — v. Album Montanum, see Wine.

VINUM AL'OËS, *V. aloës Socotori'næ* seu *aloët'icum* seu *aro'mo-aloëticum*, *Tinctu'ra hi'era*, *Tinct-*

u'ra sacra, Wine of Aloes. (*Aloës* in pulv. ℥j, *cardam.* cont., *Zingib.* cont., ää ℥j; *vini alb.* Oj. Macerate for 14 days, and filter. *Ph. U. S.*) Purgative and stomachic, according to the dose. Dose, f℥j to f℥ij.

Vinum Amarum, V. Gentianæ comp.—v. Amarum scilliticum, &c., V. diureticum amarum — v. Amarum cum spiritû vini, V. gentianæ compositum — v. Antimoniale, V. antimonii tartarizati — v. Antimoniatum Huxhami, V. antimonii tartarizati—v. Antimonii potassio-tartratis, V. antimonii tartarizati.

Vinum Antimo'nii, *V. antimo'nii tartariza'ti* seu *tartra'tis antimonii* seu *antimo'nii potas'sio-tartratis* seu *benedic'tum* seu *antimonia'tum Huxha'mi* seu *antimonialē* seu *emet'icum, Liquor tar'tari emet'ici, Essen'tia antimonii* seu *stib'ii, Aqua benedic'ta Rulan'di, Solution of tar'tarized antimony, Antimonial wine.* (*Ant. et Potass. tart.* ℈j, *vini albi* f℥x. Dissolve the tartarized antimony in the wine. *Ph. U. S.*) Each fluidounce contains two grains of the tartrate.

The ordinary *Antimonial wine* is made with *glass of antimony* ℥j, *sherry* Oiss.

Ward's Red Drop consists of a strong vinous solution of *tartarized antimony.*

Vinum Antiscorbu'ticum, *Antiscorbu'tic wine.* (*Rad. armoraciæ recent.* ℥j, *fol. cochleariæ recent., nasturtii aquatic., trifol. aquatic., semin. sinap.*, ää ℥ss, *ammoniæ muriat.* ℥ij, *vin. albi* Oij. Macerate for 36 hours; filter, and add *tincturæ cochlear.* ℥ss. *Ph. P.*) Stimulant and tonic. Dose, f℥ss to f℥ij.

Vinum Aromat'icum, *Aromatic wine.* (*Species aromatic.* ℥iv, *vin. rubr.* Oij. Macerate for 6 days and filter. *Ph. P.*) Stimulant and tonic. Used, externally, in fomentations, embrocations, &c.

Vinum Aromo-aloeticum, V. aloes — v. Benedictum, V. antimonii tartarizati.

Vinum Campa'num, *V. Campana'ceum.* Champagne wine. A well-known sparkling wine of France. See Wine.

Vinum Canarinum, see Wine—v. Chalybeatum, V. ferri — v. Cinchonæ compositum, V. de kinâ kinâ comp.

Vinum Col'chici, *V. Colchici Radi'cis, Wine of Colchicum, Want's Eau d'Husson.* (*Colchic. rad.* bene contus. ℔j. *vini alb.* Oij. Macerate for 14 days, with occasional agitation, and then express strongly, and filter. *Ph. U. S.*) It may also be prepared by displacement. Diuretic, sedative, and purgative. Chiefly used in gout. Dose, gtt. 40 to f℥j.

Reynolds's Specific for gout and rheumatism consisted of the fresh bulb of *Colchicum* ℥viij, *Sherry wine,* f℥xvj. The colchicum was macerated for eight or ten days in the wine, at a gentle heat; coloured with *syrup of poppies* and flavoured with *rum.* Reynolds is said to have killed himself by taking an over-dose of it.

Vinum Colchici Radicis, V. colchici.

Vinum Colchici Sem'inis, *Wine of Colchicum seed.* (*Colchic. sem.* cont. ℥iv; *vini alb.* Oij. Macerate for 14 days, with occasional agitation, then express and filter. *Ph. U. S.*) Dose, f℥j to f℥ij.

Vinum Crematum, Brandy.

Vinum Diuret'icum Ama'rum, *V. amarum scillit'icum compos'itum in Charita'tis Nosocomi'o usurpa'tum, Bitter diuret'ic wine.* (*Cort. cinchon., Winteran., limon.*, ää ℥ij, *rhus toxicodendr., scillæ, cacumin. angelicæ*, ää ℥ss, *fol. absinth., melissæ*, ää ℥j, *baccar. junip., macis*, ää ℥ss, *vin. alb.* Oviij. Macerate and filter. *Ph. P.*) Stimulant, tonic, and diuretic. Dose, f℥ss to f℥iss.

Vinum Emeticum, V. antimonii tartarizati.

Vinum Er'gotæ, *Wine of Ergot.* (*Ergotæ*, sont., ℥ij; *vini alb.* Oj. Macerate for 14 days, with occasional agitation; then express and filter. *Ph. U. S.*) Dose, ♏xx to f℥j to produce the peculiar effects of ergot.

Vinum Ferratum, V. Ferri.

Vinum Ferri, *V. Chalybea'tum* seu *ferra'tum* seu *Martia'tum* seu *Martis, Tinctura Martis vino'sa* seu *Martis cum vino, Steel wine, Wine of Iron.* (*Iron wire*, ℥j; *Sherry wine*, Oij (Imp. meas.). Digest for thirty days and filter. *Ph. L.*) Tonic. Dose, f℥j to f℥iv.

It is sometimes made by adding *two pints of wine* to *two ounces of iron filings;* macerating and filtering.

Vinum Gentia'næ, *V. G. Compos'itum* seu *Ama'rum* seu *Amarum cum spiritu Vini, Infu'sum ama'rum vino'sum, Compound wine of gentian, Wine bitters.* (*Rad. gentian. lutecæ* ℥ss, *cort. cinchon. offic.* ℥j, *cort. aurant.* ℥ij, *canellæ alb.* ℥j, *alcohol. dilut.* f℥iv, *vini alb. Hispanic.* Oijss. *Ph. E.*) Dose, f℥j to f℥vj.

Vinum Hippocraticum, Claret—v. Hispanicum, Vinum, see Wine—v. Hordeaceum, Cerevisia—v. Hydatodes, see Hydatoid.

Vinum Ipecacuan'næ, *Ipecacuan'ha wine.* (*Ipecacuan.* cont. ℥ij, *vini alb.* Oij.) Macerate for 14 days, express, and filter. Emetic and diaphoretic. Dose, as an emetic, f℥iv to f℥x.

Vinum de Kinâ Kinâ Compos'itum, *V. cincho'næ compositum, Compound bark wine,* (F.) *Vin de quinquina composé.* (*Cort. cinchon.* pulv. ℔ss, *quassiæ, cort. Winteran., cort. aurant.* sicc., ää ℥ss, *alcohol.* (12° to 22° Beaumé) Oj. Macerate for 24 hours; and add *vini albi* Ovj. Macerate for four days, and filter. *Ph. P.*) Tonic, febrifuge, and stomachic. Dose, f℥ss to f℥ij.

Vinum Martiatum, V. ferri — v. Martis, V. ferri — v. Medicatum, see Claret.

Vinum Medicina'lē, *Med'icated Wine.* Wine, holding in solution one or more medicines. Medicinal wines are obtained by macerating or digesting medicinal substances in wine. They differ, of course, according to the nature of the medicine employed, the strength of the wine, &c. In a late Pharmacopœia of the London College, all the wines were changed into weak tinctures; but the old names were left unaltered. Sherry is the wine usually employed. The following are medicated wines.

Vinum Merum, Acratum—v. Nicotianæ tabaci, V. tabaci — v. Opiatum fermeutatione paratum, Laudanum abbatis Rousseau.

Vinum O'pii, *V. de opio compos'itum, Laud'anum liq'uidum Sydenha'mi* seu *Hoffman'ni, Tinctu'ra Theba'ica, Wine of Opium, Sydenham's Laud'anum, Ford's laudanum.* (*Opii* in pulv. ℥ij; *cinnam.* cont., *caryophyll.* cont. ää ℥j, *vini albi* Oj. Macerate for 14 days; express and filter.—*Ph. U. S.*) Narcotic. Dose, gtt. xv to f℥j.

Vinum de Opio Compositum, V. opii—v. Picatum, Pissites.

Vinum Portugal'icum, *V. rubrum, (Ph. U. S.* 1851,) (F.) *Vin rouge d'Oporto.* Wine of Portugal or of Oporto. Port wine. A strong astringent wine, not much drunk in the United States; but greatly used in England.

Vinum Qui'niæ, *Wine of Qui'nia.* (*Wine* ℔ij, *sulphate of quinia* gr. x. Mix.) Dose, f℥iss or more; according as it is used as a stomachic, or to arrest ague. A *Vinum Cinchoniæ* may be made in the same way.

Vinum Rhei, *V. R. palma'ti, V. Rhabarbari, Tinctura Rhabar'bari Vino'sa, Elixir Rhei dulce, E. R. Compos'itum, Rhubarb Wine.* (*Rhei* cont. ℥ij, *canellæ* cont. ℥j, *alcohol. dilut.* f℥ij, *vini albi*, Oj. Macerate for 14 days; express and filter. — *Ph. U. S.*) Laxative and stimulant. Dose, f℥iv to f℥iss.

Vinum Rhei Palmati, V. Rhei—v. Rhenanum,

see Wine — v. Rhabarbari, V. rhei palmati — v. Rubrum, V. Portugallicum — v. Rubrum Portugallicum, see Wine.

Vinum Tab'aci, *Vinum Nicotia'næ Tabaci, Tobac'co Wine.* (*Tabac.* incis. ℥j, *vini albi*, Oj. Macerate for 14 days; express and strain. *Ph. U. S.*) Narcotic, diuretic, and antispasmodic. In dropsical cases, colica pictonum, and ileus. Not used. Dose, gtt. xx to xxxvj.

Vinum Vera'tri, *V. V. albi, Wine of White Hellebore.* (*Veratri cont.* ℥iv; *Vini albi*, Oj. Macerate for 14 days, express and filter.—*Ph. U. S.*) In cutaneous affections, and in gout. Dose, ten minims.

Vinum Veratri Albi, V. Veratri—v. Xericum, see Vinum.

VIOL, Stuprum.

VI'OLA, *Viola odora'ta* seu *mar'tia, Ion, Matrona'lis, Viola'ria, Sweet Violet,* (F.) *Violette à bouquets, V. odorante. Ord.* Violaceæ. The flowers of the sweet violet, have a pleasant, peculiar odour, and scarcely any taste. They are slightly laxative.

Viola Cani'na, *V. sylves'tris, Dog Violet.* The root of this plant is emetic and cathartic. Dose, ℈j.

Viola Ipecacuanha, see Ipecacuanha — v. Lutea, Cheiranthus cheiri—v. Martia, Viola — v. Odorata, Viola—v. Palustris, Pinguicola vulgaris.

Viola Pela'ta, *Viola,* (*Ph. U. S.*) This indigenous violet, which grows from New England to Carolina, is regarded by some as a useful demulcent in pectoral affections.

Viola Sylvestris, V. Canina.

Viola Tri'color, *Jace'a tricolor, Herba* seu *Flos Trinita'tis, Heart's ease, Pansy, Peney, Pansies,* (Prov.) *Beedy's eyes, Biddy's eyes,* (F.) *Pensée, P. sauvage.* The decoction of this beautiful little plant has been recommended in diseases of the skin, &c. Its roots are, also, emetic and cathartic.

VIOLARIA, Viola.

VIOLET, DOG, Viola canina—v. Dog's Tooth, Erythronium Americanum.

Violet Bloom, Solanum dulcamara.

Violet, Sweet, Viola.

VIOLETTE À BOUQUETS, Viola—*v. Odorante.* Viola—*v. des Sorciers,* Vinca minor.

VIOLIER JAUNE, Cheiranthus cheiri.

VIORNA, Clematis vitalba.

VIPER, EGYPTIAN, Aspis — v. Ten-inch long, Echidna ocellata.

Viper Grass, Scorzonera.

VIPERA, Coluber berus.

VIPERARIA, Aristolochia serpentaria, Scorzonera.

VIPERINA VIRGINIANA, Aristolochia serpentaria.

VIPÉRINE DE VIRGINIE, Aristolochia serpentaria.

VIPER'S DANCE, Chorea.

VIR, Aner, Penis—v. Effœminatus, Gynæcaner.

VIRAGO, see Pogoniasis.

VIREUX, Virulent.

VIRGA, Penis—v. Cerea, *Bougie*—v. Cerebri, Pineal gland.

VIRGILLA, Cladrastis tinctoria.

VIRGIN, *Virgo,* genitive *virginis, Par'thenus, Expers nuptia'rum,* (F.) *Vierge, Pucelle.* A female who has never had sexual intercourse. Applied, also, occasionally to the male so circumstanced.

VIRGIN-MARY THISTLE, Centaurea benedicta.

VIR'GINAL, *Virgina'lis,* from *virgo, virginis,* 'a virgin.' The external genital organs of the virgin.

Virginal Membrane, Hymen.

VIRGIN'IA, MINERAL WATERS OF. There are several celebrated mineral springs in Virginia, on the western side of the Blue Ridge. Two *Thermal* springs exist in Bath county. The *Warm Spring,* as it is called, issues with a bold stream, sufficient to turn a mill, and to keep the water of its basin at the temperature of 97°. The *Hot Spring* is a few miles from the warm. Its temperature is 107°. They are both slightly sulphureous. The *Sweet Springs* are at the eastern foot of the Allegheny, in Botetourt county; 42 miles from the Warm Springs. The water has a temperature of 70°, and is highly impregnated with carbonic acid. The *White Sulphur,* as well as the *Red Sulphur,* and *Salt Sulphur Springs,* are also much celebrated. The Red Spring is affirmed to exert a sedative influence on the pulse, diminishing the number of its beats. Prof. W. B. Rogers analyzed the water of the White Sulphur, and found it to be composed as follows: — Gaseous contents in a wine gallon. *Sulphuretted hydrogen,* 2·5 cubic inches, *carbonic acid,* 2; *oxygen,* 1·448; *nitrogen,* 3·552.—Total, 9·5. Solid contents in a pint; *sulphate of magnesia,* 5·588 grains; *sulphate of lime,* 7·744; *carbonate of lime,* 1·150; *chloride of calcium,* 0·204; *chloride of sodium,* 0·180; *oxide of iron,* a trace; loss, 0·410. Total, 15·276 grains.

The *Rockbridge Alum Springs* are situated 17 miles west of Lexington, and are in much favour. Their solid constituents are said to be,—sulphate of potassa, 1·765 gr.; sulphate of lime, 3·263; sulphate of magnesia, 1·763; protoxide of iron, 4·863; alumina, 17·905; crenate of ammonia, 0·700; chloride of sodium, 1·008; silicic acid, 2·840; free sulphuric acid, 15·224; free carbonic acid, 7·536 — water 58315·133. They are used in dyspepsia, scrofula, chronic diarrhœa, and cutaneous affections. The *Bath Alum Springs* are about 17 miles west of the Rockbridge Springs, in Bath county. They consist of free sulphuric acid, 7·878 grs; carbonic acid, 3·846; sulphate of potassa, 0·258; magnesia, 1·282; lime, 2·539; protoxide of iron, 21·776; alumina, 12·293; crenate of ammonia, 1·776; silicate of soda, 3·150; water, 58317·202. They are more chalybeate than the last.

About 15 miles from Staunton are *Stribling's Springs*— a sulphuretted water; and near *Warrenton,* in *Fauquier county,* there is a sulphureous water, called *Lee's Springs,* which is much frequented. *Berkley* or *Bath,* and *Capon Springs* are likewise celebrated.

Virginia, Hymen.

VIRGINIS VITIATIO, Defloration.

VIRGIN'ITY, *Virgin'itas, Parthenei'a, Integ'ritas, Maid'enhood, Maid'enhead,* (F.) *Virginité, Pucélage;* from *virgo, virginis,* 'a virgin.' The state of one who has never had carnal commerce.

VIRGIN'S BOWER, COMMON, Clematis vitalba, Clematis Virginica — v. Bower, upright, Clematis recta—v. Sweet-scented, Clematis flammula.

Virgin's Milk, *Lac Vir'ginis* seu *Virgina'lè,* (F.) *Lait virginal.* A tincture of benjamin or of any other balsam, precipitated by the addition of water, which gives it a milky appearance. Also, sub-acetate of lead precipitated by water. It has been used as a cosmetic to remove freckles, &c.

VIRGINITAS DEFLORATA, Defloration.

VIRGO, Virgin—v. Aurea, Solidago virgaurea.

VIRGULA, Penis.

VIRIDE ÆRIS, Cupri subacetas — v. Montanum, Cuprum.

VIRILE, Penis.

VIRILES'CENCE; from *virilis, (vir,* 'a man,) 'manly.' The state of the aged female in which she assumes certain of the characteristics of the male. — Mehliss.

VIRILIA, Pudibilia.

VIRILITY, Adult age.

VIROSUS, Virulent.

VIRTUE, Faculty.

VIRTUS FORMATRIX, Plastic force — v. Plastica, Plastic force.

VIR'ULENT, *Virulen'tus, Viro'sus*, (F.) *Virulent*, from *virus*. That which is of the nature of a virus or which is caused by a virus. Highly noxious.

VIRUS, from *vis*, 'force,' plural *vires* [?]. A Latin word, which signifies poison; but which, in medicine, has a somewhat different acceptation. By it is understood a principle, unknown in its nature and inappreciable by the senses, which is the agent for the transmission of infectious diseases. Thus we speak of the *variolic, vaccine*, and *syphilitic viruses*. *Virus* differs from *venom* in the latter being a secretion natural to certain animals, whilst the former is always the result of a morbid process, — a *morbid poison*.

VIRUS, Ichor, Poison, Sanies — v. Vaccine, see Vaccina — v. Vitale, Sperm.

VIS, Force — v. Adhæsionis, Cohesion (force of) — v. Attractionis, Cohesion (force of) — v. Aucta, Sthenia — v. Cohæsionis, Cohesion (force of) — v. Conservatrix, V. medicatrix naturæ — v. Elastica, Elasticity — v. Essentialis, Plastic force.

VIS EXPUL'TRIX. The organic force by which, it was supposed, the useless was removed from the body.

VIS FORMATIVA, Plastic force — v. Generatrix, Potentia generandi—v. Imminuta, Asthenia—v. Insita, Irritability—v. Irritabilitatis, Irritability.

VIS MEDICA'TRIX NATU'RÆ, *V. conserva'trix, Autocrati'a, Autonom'ia, Autocrato'ria, Authygian'sis, Autotherapei'a, Physiat'ricē, Physioautocrati'a, Physiautocrati'a*, (F.) *Force médicatrice*. A term, employed by some, to express that instinctive healing power, in an animal or vegetable, by virtue of which it can repair injuries inflicted upon it, or remove disease.

VIS METABOLICA, Metabolic force.

VIS MOR'TUA, Under this name Haller included the mechanical properties of membrane, —flexibility, extensibility, elasticity, &c.—which are totally independent of the vital properties. They remain some time after the complete extinction of life in all its functions; seem to be connected with the mechanical arrangement of particles and the chymical composition of the substance in which they reside, and not to be affected until the progress of decomposition has become sensible.

VIS MUSCULARIS, Myodynamia—v. Nervorum, Nervous power—v. Nervosa, Nervous power—v. Plastica, Plastic force—v. Reproductiva, Plastic force — v. Vitæ, Irritability.

VIS VITA'LIS, *Vis* seu *Fac'ultas Zo'tica*, (F.) *Force vitale*. The *vital force* — *Biod* of Baron Von Reichenbach — which distinguishes living matter from the dead. Also, Irritability.

VIS ZOTICA, Vis vitalis.

VISAGE, Countenance.

VISCAGO BEHEN, Cucubalus behen.

VISCERA, Entrails.

VISCERAL, Splanchnic.

VISCERALIS, Stomachal.

VISCERATION, Exenterismus.

VISCÈRES, Entrails.

VISCONIA, Physconia.

VISCUM ALBUM, *Ixos, Ix'ia, Dabach, Mis'tletoe*, (F.) *Gui, Gui de Chêne, Gillon*. A parasitic plant, which grows on a number of trees. *Order*, Loranthaceæ. *Sex. Syst.* Dicœcia Tetrandria. That of the oak — *Viscum quercī'num* — has been most celebrated, but it does not differ from the others. It was, at one time, much used in epilepsy and other neuroses; the wood or leaves being given in powder, in the dose of ʒss or ʒj. The berries, also called *Pommes hémorrhoïdales*, from their supposed virtues, are drastic; and, when applied externally, are maturative.

VISCUM CAPEN'SE. A South African parasitic shrub, which grows on the stems of several species of Rhus and Euclea.

VISCUM FLAVES'CENS, *V. verticilla'tum, Yellow* or *Yel'lowish Mis'tletoe*, indigenous, has been given in similar cases as the *Viscum album*.

VISCUM VERTICILLATUM, V. flavescens.

VISIO, Pupil, Vision.

VIS'ION, *Sight, Vis'io, Visus*, from *videre, visum*, 'to see;' *Opsis, Omma*, (F.) *Vue*. The action of seeing. The sight is one of the five senses, and the eye is its organ. By it we distinguish colours, and appreciate most of the physical qualities of external-objects. The eye is composed of different transparent media, whose curvatures and refractive powers are so combined as to render insensible the aberrations of sphericity and refrangibility, and to concentrate the numerous rays proceeding from more or less distant objects. These rays traverse, successively, the transparent cornea, the aqueous humour, the crystalline, the vitreous humour, and strike upon the retina, on which they impress the figure of the object whence they have proceeded; and, in order that no obscurity may arise from the reflections that might otherwise occur, the anterior of the eye is lined by a membrane—the choroid—which is itself covered internally by a dark pigment. This absorbs the light, like the dark pigment in the interior of telescopes, and thus obviates confusion. As the rays proceeding from an object must cross each other in their course to the retina, it follows that those proceeding from the upper part of an object must fall upon the lower part of the retina, and conversely; so that the object must be impressed upon the retina in an inverted position; yet experience teaches us to appreciate the position accurately.

VISION, BINOCULAR, see Binocular — v. Coloured, Chromopsia — v. Double, Diplopia — v. Iridescent, Chromopsia — v. Manifold, Polyopsia — v. Multiple, Polyopsia — v. Phantasmatum, Metamorphopsia — v. Single, see Binocular.

VISNOMY, Physiognomy.

VISORIUM ORGANUM, Eye.

VISORIUS, Visual.

VIS'UAL, *Visua'lis, Viso'rius*, (F.) *Visuel*. Same etymon as Vision. That which concerns the sight or belongs to vision.

VISUAL ANGLE is the angle formed by the crossing of two rays, proceeding from opposite points of any body, in their passage through the pupil. It is by the size of this angle that we judge, to a certain extent, of the dimensions of objects.

VISUEL, Visual.

VISUS, Vision — v. Acris, Oxydercia — v. Acrior, Nyctalopia — v. Coloratus, Chromopsia — v. Debilitas, Asthenopia — v. Decolor, Achromatopsia—v. Defiguratus, Metamorphopsia—v. Dimidiatus, Hemiopia—v. Diurnus, Hemeralopia—v. Duplicatus, Diplopia—v. Hebetudo, Amblyopia —v. Juvenum, Myopia—v. Lucidus, Photopsia—v. Muscarum, see Metamorphopsia — v. Nebulosus, Nebula—v. Nocturnus, Nyctalopia—v. Senilis, Presbytia.

VITA, Life — v. Propria, Irritability.

VITAL, *Vita'lis, Biot'ic, Biot'icus*, (F.) *Vital*, from *vita*, 'life.' Relating or appertaining to life.

VITAL CAPAC''ITY, *Pulmon'ic* or *Lung capacity*. A term employed by Dr. Hutchinson to designate the number of cubic inches of air, which a person can forcibly expire after a full inspiration.

VITAL DYNAMICS, see Dynamic—v. Force, Vis vitalis.

VITAL PRIN'CIPLE, *Flam'mula* seu *Aura vita'lis, Microcosme'tor*, (F.) *Flamme vitale, Vital Flame.* The principle which, in association with matter, as in organized bodies, controls its manifestations and properties, and distinguishes organized matter from the inorganic. We know nothing of this principle, except in its connexion with organization.

VITAL PROPERTIES, see Properties, vital — v. Statistics, Statistics, medical.

VITALBA, Clematis vitalba.

VI'TALISM, *Vitalism'us.* The doctrine of the *vitalist*—*vitalis'ta*—who ascribes every function of the organism to the direct agency of the vital principle.

• VITALIST, see Vitalism.

VITAL'ITY, *Vital'itas*, (F.) *Vitalité*, from *vita*, 'life.' The vital principle: also, used in the sense of vital action or movement.

VITALIZE. To endow with life.

VITALS, *Vita'lia.* Parts that are necessary for life — the heart, lungs, and nervous centres more especially.

VITARO'BORANT, PALMER'S. A farinaceous preparation, which appears to consist of a mixture of the red or Arabian lentil and wheat flour, the latter in considerable amount, sweetened with sugar. It bears considerable resemblance to Revalenta.

VITELLARY, Vitelline — v. Membrane, Zona pellucida.

VITELLINE, Zona pellucida.

VIT'ELLINE, *Vitel'linus, Vit'ellary, Lecitho'les*, from *vitellus*, 'the yolk of an egg.' Appertaining to or resembling the vitellus or yolk. Also, the yolk membrane. See Vesicula umbilicalis.

VITELLINE DISC, Proligerous Disc — v. Fluid, see Vesicula umbilicalis.

VITELLINE PED'ICLE or APOPE'YSIS is the pedicle which attaches the umbilical vesicle to the embryo. See Vesicula umbilicalis.

VITELLINE POUCH, Vesicula umbilicalis — v. Vessels, Omphalo-mesenteric.

VITELLO-MESENTERIC, Omphalo-mesenteric.

VITELLUM OVI, see Ovum.

VITELLUS OVI, see Ovum.

VITEX, from *vieo*, 'I bind' [?]; *V. Agnus Castus* seu *verticilla'ta*, (F.) *Gattilier, Petit Poivre, Poivre de moine* ou *sauvage. Ord.* Verbenaceæ. *Sex. Syst.* Didynamia Angiospermia. The *Chaste Tree.* The seeds, when fresh, have a fragrant smell, and an acrid, aromatic taste. Formerly, they were celebrated as antaphrodisiacs.

VITI SALTUS, Chorea.

VITIA PRIMÆ CONFORMATIONIS, see Monster.

VITIATIO, Stuprum.

VITILIGINES, Ephelides.

VITILIGO, Lepra — v. Alphus, Lepra alphoides—v. Melas, Lepra nigricans—v. Nigra, Lepra nigricans.

VITILIGOÏ'DEA, from *vitiligo*, and εἶδος, 'resemblance.' A disease of the skin, so called from its resembling the vitiligo of Willan. It appears under two forms; either as tubercles—*V. tubero'sa* — varying from the size of a pin's head to that of a large pea, isolated or confluent; or as yellow patches of irregular outline, slightly elevated, and with but little hardness—*V. plana.*

VITIS ALBA SYLVESTRIS, Bryonia alba — v. Apyrena, see V. Corinthiaca.

VITIS CORINTHIACA. *Ord.* Vitaceæ. *Sex. Syst.* Pentandria Monogynia. This plant affords the *Uvæ Corinthiacæ passæ mino'res, Passæ Corinthiacæ, Pas'ulæ mino'res, Corinthiacæ, Currants*, (F.) *Raisins de Corinthe;* which are the dried fruit of the *Vitis Corinthiaca* or *Vitis apyre'na;* and are similar, in their properties, to the raisin.

VITIS IDÆA MYRTILLUS, Vaccinium myrtillus — v. Idæa Palustris, Vaccinium oxycoccos — v. Idæa punctata, Vaccinium vitis idæa—v. Sativa, V. vinifera.

VITIS VINIF'ERA, *V. sati'va, Am'pelos, A. Œnoph'oros, Grape vine, Vine,* (F.) *Vigne.* Vine leaves and the tendrils have an astringent taste, and were formerly used in diarrhœa, hemorrhage, &c. The juice or sap, called *Lac'ryma*, has been recommended in calculous disorders and in cases of chronic ophthalmia. The juice of the unripe fruit is called *Verjuice.* The *Grape, Uva, Botrys, Staph'ylē, Rhax,* (F.) *Raisin*, when ripe, is a wholesome delicious fruit; and, when dried, forms the *Uvæ passæ majo'res, Pass'ulæ majo'res, Uvæ passæ solē sicca'tæ, Uva passa* (Ph. U. S.), *Zibebæ, Raisins.* These are inodorous; and to the taste, sub-acidulous, sweet, and mucilaginous. They are demulcent and nutritive.

VITIUM, Disease — v. Caducum, Epilepsy.

VITIUM CONFORMA'TIONIS. A disease or fault of conformation.

VITIUM DIVINUM, Epilepsy — v. Herculeum, Epilepsy — v. Scrophulosum, Scrofula.

VITRARIA, Parietaria.

VITRÉ, Hyaline.

VITREO-CAPSULITIS, Hyalitis.

VITREOUS, Hyaline — v. Humour, Corpus vitreum—v. Humour of the ear, *Vitrine auditive.*

VITREUS, Hyaline.

VITREUX, Hyaline.

VITRINA OCULARIS, Corpus vitreum.

VITRINE AUDITIVE (F.), from *vitrum*, 'glass;' *A'quula vit'rea auditi'va, End'olymph, Liquor* or *Fluid of Scarpa, Vitreous Humour of the Ear.* The fluid contained in the *membranous labyrinth* of the ear, so called from its resemblance to the *vitreous* humour of the eye.

VITRIOL, Ferri sulphas — v. Blue, Cupri sulphas—v. Green, Ferri sulphas—v. Roman, Cupri sulphas — v. White, Zinci sulphas.

VITRIOLUM ALBUM, Zinci sulphas — v. Ammoniacale, Ammoniæ sulphas—v. Cæruleum, Cupri sulphas—v. Cupri, Cupri sulphas—v. Cyprium, Cupri sulphas—v. Ferri, Ferri sulphas—v. Goslariense, Zinci sulphas—v. Martis, Ferri sulphas — v. Romanum, Cupri sulphas—v. Veneris, Cupri sulphas—v. Viride, Ferri sulphas—v. Zinci, Zinci sulphas.

VITRUM, *Hy'alos, Glass, Brancia,* (F.) *Verre.* Glass, coarsely powdered, has been sometimes used to remove specks of the cornea.

Powdered glass has been regarded, but erroneously, as a poison. It acts only mechanically.

The saline scum, which swims on glass when first made, has been used in tooth-powders. It is called *Sandiver, Sel de verre, Glass Gall, Fel vitri,* &c.

VITRUM ANTIMONII, see Antimonii vitrum — v. Hypocleptieum, Separatorium — v. Oculare, see Spectacles — v. Sublimatorium, Aludel.

VITTA, *Bandelette*, Caul.

VITTARIA CETERACH, Asplenium ceterach.

VITTIE VAYR, Andropogon muricatus.

VIVACE, from *vivax, vivacis*, (*vivere*, 'to live,') 'living long, tenacious of life.' An epithet given by Levret to uterine polypi, which he considers to be, commonly, vegetations of some ulcer in the interior of the uterus, and incurable.

VIVÆSECTIO, Vivisection.

VIVERRA CIVETTA, see Civetta.

VIVIPARE, Viviparous.

VIVIPARITÉ, see Viviparous.

VIVIP'AROUS, (F.) *Vivipare*, from *vivus*, 'alive,' and *pario*, 'I bring forth.' An epithet applied to animals whose young are brought forth detached, without requiring to be hatched, as in the *Oviparous*. The condition may be termed *Vivip'arousness*. (F.) *Viviparité*. See Generation.

VIVIPAROUSNESS, see Viviparous.

VIVISEC'TION, *Vivisec'tio, Vivæsec'tio, Biotom'ia*, from *vivus*, 'alive,' and *secare, sectum*, 'to cut.' The act of opening or dissecting living animals. One who performs vivisections is a vivisector.

VOCAL, Oral—v. Cords, see Cords, vocal—v. Ligaments, see Cords, Vocal—v. Tube, see Tube, vocal.

VOCALIS, Vowel.

VOCE DI PETTO, see Voice—*v. di Testa*, see Voice.

VOICE, *Vox, Audē, Phonē*, (F.) *Voix*, from *vocare*, 'to name, to call.' An appreciable sound produced by the air, when driven from the lungs, throwing the inferior ligaments of the glottis into vibration. The function by which this is effected has been called *Phona'tion*. It is a function of *animal* life; and, in animals, is limited to the production of the *simple* or *instinct'ive voice*, as well as in the idiot; but, in intellectual man, becomes much more complicated and articulated,—an evidence of his intellectual superiority.

VOICE, ARTIC'ULATED, *Speech, Loque'la, Glossa, Glotta, La'lia, Phrasis*, (F.) *Parole, Voix articulée*, is the voice as produced by the glottis, modified by the motions of the tongue, lip, and other parts of the vocal tube. Most physiologists agree in regarding the glottis, or the space between the thyro-arytenoid ligaments plus the ligaments themselves, as the part where vocal sounds are formed; but the mechanism of this formation is a matter of dispute. The greater part of individuals regard the glottis and its ligaments, with the *vocal tube*, or the space which the sound has to traverse after it is produced in the glottis, as a reed instrument, like the clarionet, the inferior ligaments of the glottis constituting the reed. In speech, as ordinarily effected, the tongue, lips, teeth, &c., are concerned, but there are some authentic cases on record, where it has been accomplished after the tongue has been removed. In such cases, the articulated voice must have been produced in the glottis alone, or in it aided by an obscure action of the parts above it.

The singing voice is not limited to the larynx; the pharynx would seem to be concerned also. The notes that are produced in the latter have been termed *supra-laryngeal*, or *notes of the second register*. They constitute the *pharyngeal voice*, *falsetto* or *faucette* voice or *voce di testa* (I.), *Voix de tête, Voix de fausset* (F.). The *laryngeal voice* or *voice of the first register, Chest voice*, is the *Voce di Petto* (I.), *Voix de Poitrine* (F.). The laryngeal voice, which is always more elevated, by an octave, in the female than in the male, furnishes the types called *Soprano, Alto* or *Contralto, Tenor* and *Bass*. The first two belong to the female voice; the last two to the male. The *Baritone* is between the bass and tenor.

VOICE, BLEATING, Egophony—v. Cavernous, Pectoriloquy—v. Chest, see Voice, articulated.

VOICE, CHOL'ERIC, *Vox Choler'ica*. The peculiar husky voice of those affected with cholera.

VOICE, CONVUL'SIVE, *Vox convulsi'va*, (F.) *Voix convulsive*. A neurosis of the voice, consisting in the production of discordant sounds—acute and grave—which cannot be brought to the natural tones by any effort of volition. It seems to be caused by disordered contraction of the muscles of the larynx.

VOICE, FALSETTO, see Voice—v. Goat's, Egophony—v. Laryngeal, Laryngophony, see Voice—v. Pharyngeal, see Voice—v. Tracheal, Laryngophony.

VOIE, Way.

VOIES DIGESTIVES, Ways, digestive—*v. Lacrymales*, Lachrymal passages—*v. Premières*, Ways, digestive—*v. Secondes*, Ways, second—*v. Urinaires*, Urinary passages.

VOILE DU PALAIS, Velum pendulum palati—*v. Médullaire inférieure*, Velum medullare inferius—*v. Médullaire supérieure*, Valvula Vieussenii.

VOIX, Voice—*v. Aigre*, see Acid—*v. Articulée*, Voice, articulated, Pectoriloquy—*v. Bourdonnante*, see Resonance—*v. Bronchique*, Resonance—*v. Caverneuse*, Pectoriloquy—*v. Chévrotante*, Egophony—*v. Égophonique*, Egophony—*v. de Fausset*, see Voice, articulated—*v. de Poitrine*, see Voice, articulated—*v. de Polichinelle*, Egophony—*v. Sénile*, Egophony—*v. de Tête*, see Voice, articulated—*v. Tubaire*, see Resonance.

VOLA, Palm—v. Manūs, Palm—v. Pedis, Sole.

VOLANT D'EAU, Nymphæa alba.

VOLATICA, Lichen.

VOLATILIZA'TION, *Volatilisa'tio, Volatisa'tio*, from *volare*, 'to fly.' The operation of reducing volatilizable substances into gas or vapour.

VOLATISATIO, Volatilization.

VOLIT''ION, *Volit''io*, from *volo*, 'to will.' The act of willing. Hence:

VOLIT''IONAL, relating to volition. Thus the muscles may be moved by a *volitional* or by an *emotional* impulse.

VOLNUS, Wound.

VOLONTAIRE, Voluntary.

VOLONTÉ, Voluntas.

VOLSELLA, Acanthobolos, Forceps, Madisterium—v. Patini, *Valet à Patin*.

VOLTAISM, Galvanism.

VOLTUS, Countenance, Face.

VOL'UNTARY, *Hecu'sius, Volunta'rius*, (F.) *Volontaire*, from *voluntas*, 'will.' Relating to the will; as '*voluntary* muscles;' muscles which act in obedience to the will.

VOLUNTAS, *Volen'tia. Arbit'rium, Cupid'itas, Boule'sis, Bule'sis, Thele'ma*, (F.) *Volonté*, from *volo*, 'I will.' Will or desire.

VOLUN'TAS seu CUPID'ITAS DESEDEND'I, *Lubi'do intesti'ni*. The desire to go to stool.

VOLVA, Vulva.

VOLVULUS, Ileus—v. Intestinorum, Intussusceptio.

VOMENDI CONAMEN INANE, Vomiturition.

VOMER, 'a ploughshare;' *Os vo'meris, Os maxill'æ superio'ris undec''imum, Ara'trum*. One of the bones of the face, so called from its resemblance. It is an azygous bone, forming the posterior part of the septum narium. It is thin, flat, and quadrilateral; and is articulated, below, to the superior maxillary and palatine bones; and above, to the sphenoid, ethmoid, and cornets of Bertin. It is developed by a single point of ossification. Also, the penis.

VOM'ICA, *Pyocys'tis*, from *vomere*, 'to vomit,' 'to cast up.' (F.) *Vomique, Crachement de pus*. A term used by some authors for any encysted collection of purulent matter in the interior of a viscus. The acceptation is commonly, however, restricted to purulent collections in the lungs, encysted or not, which may be discharged by the mouth, by breaking into the bronchial tubes. Two kinds of vomicæ are distinguished; the one caused by the softening or breaking down of pulmonary tubercles; the other, of much more rare occurrence, formed by a circumscribed abscess of the lungs. Instead of opening into the bronchia, the abscess is sometimes discharged into the cavity of the pleura, causing empyema.

VOMICINE, Brucia.

VOMIQUE, Vomica.

VOMIQUIER, Strychnos nux vomica.

VOMISSEMENT, Vomiting — *v. de Sang*, Hæmatemesis.

VOMIT, Emetic — v. Black, Fever, yellow, Melæna.

VOMIT, DRY, OF MARRIOTT. A once celebrated emetic, called 'dry,' from its having been given without solution. It consisted of equal portions of tartrate of antimony and potassa, and sulphate of copper.

VOMITIF, Emetic.

VOMITINE, Emetine.

VOMITING, *Vom'itus*, *Vomit''io*, *Vomit''ium*, *Vom'itum*, *Evomit''io*, *Anatropē*, *Em'esis*, *Palmus vom'itus*, *Ægritu'do ventric'uli*, *Spewing*, *Puking*, *Sickness of the Stomach*, (Old Eng.) *Parbreaking*, (Sc.) *Bokking*, *Bocking*, *Braking*, *Brocht*, (Prov.) *Hull'uping*, (vulg.) *Casca'ding*, *Casting*, (F.) *Vomissement*, from *vomere*, *vomitum*, 'to throw up.' The act by which solids and liquids, contained in the stomach, are ejected by the mouth. Vomiting is the effect of some special irritation of the nerves of the stomach, calling, by reflex action, on the appropriate muscles to expel the contents of the viscus. It is not accomplished solely by the contraction of the stomach, as was for a long time believed. That organ, indeed, assists in the process; but the main cause is the compression exerted upon the parietes of the viscus by the diaphragm and abdominal muscles. Vomiting is a symptom common to numerous diseases. At times, it is sympathetic, as in affections of the kidney, uterus, brain, &c. At others, it is symptomatic, as in gastritis, peritonitis, &c. When very troublesome, it may often be palliated by effervescent draughts, aromatics, sinapisms, or blisters to the epigastric region, &c.

VOMITING AT PLEASURE, Regurgitation — v. of Blood, Hæmatemesis — v. Stercoraceous, Copremesis.

VOMITIO, Vomiting—v. Sanguinis, Hæmatemesis.

VOMITIUM, Vomiting.

VOMITO NEGRO, Fever, yellow — v. Prieto, Fever, yellow.

VOMITORIUM, Emetic.

VOMITORY, Emetic.

VOMITUM, Vomiting.

VOMITURIT''ION, *Vomiturit''io*, *Emes'ia*, *Dysemes'ia*, *Subver'sio stom'achi*. Same etymon as Vomiting. Ineffectual efforts to vomit; *Vomen'di cona'men ina'nē*, *Retching*, *Reaching*, *Heaving*, (Old Eng.) *Bolke*, (Sc.) *Bok*, *Bock*, *Braking*. Some authors mean, by this term, a vomiting of but little matter, or that which is effected almost without effort. The first acceptation is the most general.

VOMITUS, Vomiting—v. Cruentus, Hæmatemesis—v. Fæculentus, Copremesis — v. Marinus, Nausea marina—v. Navigantium, Nausea marina —v. Niger, Fever, yellow—v. Pituitosus, Blennemesis—v. Profusus, Hyperemesis—v. Purulentus, Pyemesis—v. Sanguinis, Hæmatemesis—v. Stercoris, Copremesis.

VOORARA, Curare.

VOTIVE TABLET, Tabula votiva.

VOUACAPUA AMERICANA, Geoffræa inermis.

VOUSSURE PRÉCORDIALE, 'Præcordial arching or prominence." The elevation or arching of the parietes of the thorax, witnessed in certain thoracic affections, as in hypertrophy of the heart.

VOÛTE, Vault — *v. Médullaire*, Corpus callosum—*v. à Trois Piliers*, Fornix.

VOWEL, *Voca'lis*, from Latin *vox*, *vocis*, 'the voice,' and *voco*, 'to call.' (F.) *Voyelle*. Physiologically, a continuous breath or sound, produced in the glottis; but more or less modified by the form of the vocal tube, through which it has to pass. In the English language, *a*, *e*, *i*, *o*, *u*, *w*, and *y*, are vowels.

VOX, Voice — v. Cholerica, Voice, choleric — v. Clangosa, Oxyphonia — v. Convulsiva, *Voix Convulsive*—v. Nasalis, Rhinophonia—v. Rauca, Raucedo, Raucous voice—v. Raucisona, Raucous voice.

VOYELLE, Vowel.

VUE, Vision — *v. Basse*, Myopia — *v. Courte*, Myopia — *v. Diurne*, Hemeralopia — *v. Faible*, Amblyopia — *v. Longue*, Presbytia — *v. Louche*, Strabismus—*v. Nocturne*, Nyctalopia.

VULGA, Vulva.

VULNERA SCLOPETARIA, see Wound — v. à Sclopetis, see Wound.

VULNÉRAIRE, Vulnerary — *v. Suisse*, see Falltranck.

VULNERARIUS, Traumatic.

VUL'NERARY, *Vulnera'rius*, *Traumat'icus*, *Traumat'ic*, from *vulnus*, *vulneris*, 'a wound.' (F.) *Vulnéraire*. A name applied by the ancients to medicines, which they considered capable of favouring the consolidation of wounds. The property has been ascribed to various plants.

VULNERATIO NERVI, Neurotrosis.

VULNERUM VINCTURA, Deligation.

VULNUS, Wound — v. Laceratum, see Laceration — v. Sclopetarium, Wound, gun-shot — v. Simplex, Cut.

VULNUSCULUM, Wound.

VULPIS MORBUS, Alopecia.

VULTUEUX (F.), *Vultuo'sus*. Corvisart has used the expression, *Face vultueuse*, *Fa'cies vultuo'sa*, for the face when it is more florid and swollen than in the natural state. This appearance, which is observed in active aneurism of the heart, according to Corvisart, is owing to the afflux of blood into the arterial capillaries, and hence differs from the livid and swollen appearance caused by the accumulation of blood in the venous capillaries, constituting the *Face injectée*.

VULTUS, Countenance, Face—v. Tetricus et Mœstus, Scythropasmus.

VULVA, Uterus, see Vulva.

VULVA, *volva* (formerly, the uterus, especially of animals). *Hortus*, *Cunnus*, *Puden'dum mulie'brē*, *Sinus pudo'ris*, *Ictar*, *Choiros*, *Arvum*, *Bucca*, *Bulga*, *Cadur'cus*, *Custos*, *Femen*, *An'nulus*, *Femur summum*, *Follic'ulus*, *Fundus*, *Gre'mium*, *Hia'tus*, *Lauv'vium*, *Navis*, *Oppid'ulum*, *Specus*, *Vulga*, *Cymba*, *Cysthus*, *Saltus*, *Clitor'ium*, *Os'tium*, *Sulcus*, *Amphicaus'tis*, *Concha*, *Porcus*, *Porta*, *Interfemin'eum*, *Mulie'bria*, *Fossa magna mulie'bris*, *Episet'on*, *Es'chara*, *Hor'tulus cupid'inis*, *Bouba'lios*, *Byssos*, *Cava*, *Caver'na*, *Delphys*, *Delta*, *Fov'ea*, *Gynæce'um*, *Loci mulie'bres*, *Female puden'dum*, *Female organs of generation*, *Female parts*, (F.) *Vulve*. A longitudinal opening between the projecting parts of the external organs of generation in the female, extending from the mons veneris to the perineum, and which is called, also, *Fossa magna*. Some anatomists mean, by this term, the whole of the external genital organs of the female: — mons veneris; labia majora, and the cleft or vestibule separating them; the clitoris; nymphæ; meatus urinarius; entrance of the vagina; with the hymen or the carunculæ myrtiformes, fossa navicularis and fourchette.

VULVA, *Fora'men commu'nē ante'rius*, *Iter* seu *Ad'itus ad infundib'ulum*, *I.* seu *Ad'itus ad ter'tium ventric'ulum*, *Rima ad infundib'ulum*, *Aperitu'ra ante'rior ventric'uli ter'tii cer'ebri*. An

opening situate at the junction of the optic thalami, in the third ventricle of the brain, and immediately beneath the anterior crus of the fornix.

VULVAIRE, Chenopodium vulvaria.

VULVAR, *Vulva'ris,* from *vulva.* That which relates to the vulva. Chaussier gives this name to the external pudic arteries, because they are distributed to the vulva.

VULVARIA, Chenopodium vulvaria.

VULVE, Vulva.

VULVI'TIS, a hybrid word, from *vulva,* and *itis,* denoting inflammation. Inflammation of the vulva.

VULVO-UTERINE CANAL, Vagina.

W.

WABRAN LEAVES, Plantago.

WAD, Graphites.

WAHOO, see Euonymus.

WAIR, see Pila marina.

WAISTCOAT, STRAIT, *Indu'cula,* (F.) *Camisole, Gilet de force.* A dress, used for restraining maniacs, or those labouring under violent delirium. It has long sleeves, which are tied behind the body, so that the arms cannot be extricated from them. It ought, of course, to be made of very resisting materials.

WAKE-ROBIN, Arum maculatum, Trillium latifolium.

WALE, Wheal.

WALKING, *Gressus, Inces'sus, Deambula'tio, Ambula'tio, Bad'isis,* (F.) *La Marche, Progression.* Sax. pealcan, 'to walk.' The action by which we change place, by means of a succession of steps in the same direction. In walking forwards, the centre of gravity is constantly altered; and a series of small, parabolic curves is described on the heads of the thigh-bones, the extent of which is regulated by volition, under the guidance of vision.

WALLA'CHIA, MINERAL WATERS OF. There are many excellent sulphureous springs in this country, especially those at Bobotsch, Fineceschti, Sibitschiudi Suz, Bräsa, Otschin, Serboneschte, Kimpalungi, Kosia, and Oloneschti, Chalybeate and saline springs have, also, been found at Sibitschiudi Suz.—Siller.

WALLFLOWER, Cheiranthus cheiri.

WALLRUE, Asplenium ruta muraria.

WALL-TEETH, Molar teeth.

WALNUT, Juglans regia — w. Black, Juglans regia — w. White, Juglans cinerea.

WALTHE'RIA DOURADINHA. A plant of Brazil, *Order,* Sterculiaceæ, which is used there in diseases of the chest, and in venereal affections. It is a demulcent.

WALTON, MINERAL WATERS OF. A mineral spring near Tewkesbury, in Gloucestershire, England. It is an acidulous chalybeate.

WAMPEE. Peltandra Virginica.

WANGTEETH, Molar teeth.

WANT, from past participle of Sax. panian, 'to wane,' 'to fall away.' 'Need of that which is necessary.' (F.) *Besoin.* This word is sometimes used to express the imperious necessity which impels us to take food, drink, &c. (See Hunger and Thirst.) In a more general sense, it means the impressions transmitted by the organs to the brain, when it is necessary that they should act: these wants are called *instinctive desires* and *internal sensations* or *stimuli.* Such are the desires or wants to eat, drink, void the urine, breathe (*besoin de respirer*), &c.

WANT, in the sense of indigence, (L.) *Egestas, Indigen'tia,* is the cause of a number of diseases.

WARBURG'S FEVER-DROPS, see Bebeeru.

WARD'S ESSENCE FOR THE HEADACH, Linimentum camphoræ compositum — w. White Drops, see Hydrargyri nitras.

WARE, see Pila marina.

WARISON, Stomach.

WARK, Pain.

WARMBRUNN, MINERAL WATERS OF. Much frequented springs in Silesia, about a league from Hirschberg. They are thermal, 95° to 100° Fah., and are chiefly used as baths. The impregnating materials are carbonate of soda, sulphate of soda, sulphate of lime, chloride of sodium, carbonate of magnesia, and sulphohydric acid gas.

WARM SPRINGS, see Georgia, Mineral waters of, and Virginia, Mineral waters of.

WARNERA CANADENSIS, Hydrastis Canadensis.

WARRENTON SPRINGS, see Virginia, mineral waters of.

WART, Verruca — w. Corneous, Cornu — w Moist, Acrothymion.

WARTY, *Ver'rucose, Ver'rucous, Verruco'sus,* from Sax. peapt. Full of warts. Resembling, relating, or belonging to warts.

WARTY TUMOUR OF CICATRICES. A name given by Mr. Howship to the tumour, which sometimes appears on an old scar, many years, perhaps, after the injury that caused it. The ulcer, formed under such circumstances, has been called the *warty ulcer of Marjolin* — having been well described by that surgeon.

WASH, BLACK, see Hydrargyri submurias — w. Phagedenic, see Hydrargyri submurias — w. Preventive, Lotion, Hannay's — w. Red, Lotio rubra, and Lotion, camphorated, of Bates — w. White, Liquor plumbi subacetatis dilutus — w. Yellow, see Hydrargyri oxymurias.

WASHERWOMAN'S SCALL, Psoriasis diffusa.

WASHITAW SPRINGS, see Arkansas, mineral waters of.

WASP, *Vespa, Sphex,* (F.) *Guêpe.* A genus of gregarious insects, like the bee and the ant. They are armed with a sting, which pours a poisonous fluid into the puncture made by it. (See Poisons, Table of.) The best application is the sp. ammoniæ aromaticus, or some preparation of ammonia.

WASSERBURG, MINERAL WATERS OF. Wasserburg is a town of Bavaria, seated on the Inn, 28 miles east of Münich. The water, called, also, *Aqua Aga'tii,* contains carbonic acid; carbonates of lime and magnesia; sulphates of lime and magnesia; chloride of sodium, carbonate of soda and oxide of iron.

WASSERKUR, Hydrosudotherapeia.

WASTING, Consumption, Tabes.

WATER, Sax. pæter, (G.) Wasser, *Aqua, Hydor, ὕδωρ, Alma,* (F.) *Eau, Protox'ide of hydrogen.* Water was at one time regarded as a simple element. It is now known to consist of eight parts by weight of oxygen, and one of hydrogen. It freezes at 32°, and boils at 212 of Fahrenheit; and is taken as the unit in all tables of specific gravity of solid and liquid sub-

stances. Water, as we meet with it, is very different in its state of purity; generally, it contains small quantities of saline matter; at other times, as in sea-water and mineral waters, it is largely impregnated. The characters of water, as met with under ordinary circumstances, are well compared by Celsus, *"Aqua levissima pluvialis est; deinde fontana; tum ex flumine; tum ex puteo; post hæc ex nive, aut glacie; gravior his ex lacu; gravissima ex palude."* Pure water is one of the best diluents that can be used. When cold, and especially when iced, it is one of the most useful refrigerants; and, in the form of the cold, tepid, and warm bath, it is serviceable in numerous diseases.

Water of Aix-la-Chapelle, see Aix-la-Chapelle — w. Allflower, Urine, cows' — w. Alum, Bates's, Liquor aluminis compositus — w. of carbonate of Ammonia, Liquor ammoniæ subcarbonatis—w. Anise, see Pimpinella anisum—w. Apple, Apple-tree—w. Barley, Decoctum hordei.

Water Bed, *Hydrostat'ic bed.* A bed, contrived by Dr. Arnott, which, in consequence of its being placed on water, is well adapted for the bedridden.

Water, Binelli, Aqua Binellii.

Water of Bitter Almonds, Aqua Amygdalarum concentrata.

Water Blebs, Pemphigus—w. Brash, Pyrosis.

Water, Brocchieri, Aqua Brocchierii — w. Camphor, Mistura Camphoræ.

Water Canker, Cancer aquaticus.

Water, Caraway, see Carum carui — w. Caraway, strong, Spiritus carui — w. of Cassia, see Laurus Cassia.

Water Caster, see Uromantia.

Water, Cherry Laurel, see Prunus laurocerasus—w. Chicken, Chicken-tea—w. Chlorine, see Chlorine—w. Cinnamon, Aqua cinnamomi — w. Cinnamon, strong, Spiritus cinnamomi — w. Cologne, *Eau de Cologne.*

Water Cure, Hydrosudotherapeia.

Water, dill, see Anethum graveolens.

Water, Distil'led, *Aqua destilla'ta,* (F.) *Eau distillée, Hydrolat, Holy Water,* is generally ordered in extemporaneous prescriptions, but is rarely used. In some cases, however, it is absolutely necessary; — the water, containing any saline impregnation—hard water, for example—decomposes certain substances. Distilled water has been recommended as a diet-drink in cancerous affections; and it is used in the religious ceremonies of the Catholic church. In the Pharmacopœia of the United States, it is directed to be made as follows: — Take of *water,* ten gallons. First distil two pints, and throw them away; then distil eight gallons. Keep the distilled water in glass bottles.

Distilled waters, (F.) *Hydrolats,* consist of common water, charged by distillation with the volatile principles of medicinal agents. See Aquæ destillatæ.

Water-doctor, see Uromantia.

Water-dressing. The treatment of wounds and ulcers by the application of water. It generally consists in dipping folds of lint in water, and placing them on the part:—the whole being covered with oiled silk, elastic gum, or spongiopiline. *Water strapping* or *wet strapping* means the treatment of ulcers, and certain cutaneous affections of the extremities, &c., with strips of linen or cotton saturated with water.

Water, Elder, see Sambucus — w. Epileptic of Langius, Langii aqua epileptica — w. Fennel Aqua fœniculi.

Water Flag, Yellow, Iris pseudacorus.

Water, Florida, — a celebrated perfume, — may be made of *Ol. Bergami* f℥iv; *Tinct. benzoin. c.* f℥ij; *Alcohol.* cong.

Waterfright, Hydrophobia.

Water, Goulard, Liquor plumbi subacetatis dilutus.

Water, Hard. Common water, which decomposes and curdles soap; in contradistinction to *soft water,* which is readily miscible with soap. The hardness of water depends upon the presence in it of earthy salts, the most common of which is sulphate of lime.

Water, Hell, see Toddy.

Water, Holy, Water, distilled — w. Honey, see Mel.

Water in the Head, Hydrocephalus.

Water, Hungary, Spiritus rosmarini.

Water Jags, see Varicella.

Water, Lake, *Aqua ex lacu,* (F.) *Eau de lac,* is apt to be impure, from decayed animal and vegetable matters. A great deal will, however, depend upon the magnitude of the collection, and the degree of stagnation.

Water, Laurel, see Prunus lauro-cerasus — w. Lavender, Spiritus lavandulæ — w. Lead, Liquor plumbi subacetatis dilutus — w. Lemonpeel, see Lemonpeel Tea—w. Lime, Liquor calcis—w. Lime, compound, Liquor calcis compositus — w. Magnesia, aerated, Magnesia, fluid—w. Magnesia, carbonated, Magnesia, fluid.

Water, Marsh, *Aqua paludo'sa,* (F.) *Eau de Marais,* is the most impure of all. It is generally more stagnant, and of course more loaded with decomposing animal and vegetable matters.

Water, Medicated, see Aquæ medicatæ.

Water, Mineral, *Aqua minera'lis* seu *salubris* seu *medica'ta* seu *Sote'ria, Fons saluta'ris* seu *medica'tus* seu *sote'rius,* (F.) *Eau minérale* ou *médicinale naturelle.* Water, holding in solution different saline and gazeous substances in sufficient quantity to be possessed of medicinal properties, or of a temperature different from that of the ordinary springs of the country.

The following Table by Dr. Percira exhibits the composition of some of the principal mineral waters.

FIXED CONSTITUENTS

ENTERING INTO THE COMPOSITION OF SOME OF THE MORE CELEBRATED

MINERAL SPRINGS.

PROPORTIONS IN 10,000 PARTS OF WATER.

NOTE.—In reducing the analyses contained in this Table to a uniform measure, in order to render them susceptible of direct comparison with each other, the old English gallon is assumed to be as = 58,338 grains; the wine pint = 7305 grains; the imperial gallon = 70,000 grains; and the German 16-ounce measure = 7368 grains.

The different salts have been reduced to their elementary constituents by Wollaston's scale of chemical equivalents.

THERMAL.

NAME.	COUNTRY.	ACIDS.			BASES.			Oxide of Iron.	Silica.	SUM.	AUTHORITY AND DATE.	REMARKS.

Mineral waters may be divided into four classes: — 1. *Gazeous* or *Acidulous*. 2. *Chalybeate*. 3. *Saline*. 4. *Sulphureous*. These may be *thermal*, or *cold*, — *natural*, or *artificial*. Many of these divisions, however, run into each other; some of the substances, which they hold dissolved, belonging to one class as well as to another.

1. *Ga'zeous, Acid'ulous* or *Car'bonated Min'eral Waters, Soda* or *Beer Springs, Aquæ minera'les acid'ulæ*, (F.) *Eaux minérales gazeuses* ou *acidules*. The waters referred to this class are those that contain carbonic acid gas in such quantity as to communicate to it certain sensible qualities, Waters impregnated with free carbonic acid, sparkle when drawn from the spring, or when poured into a glass. They have a sharp, acidulous taste; but become vapid from exposure to the air. Along with the carbonic acid, there are generally present portions of saline, earthy or metallic matter, chiefly carbonates of lime, magnesia, and iron. Waters, highly impregnated with carbonic acid gas, are grateful to the stomach; increase the appetite, and are diuretic; hence, their utility in dyspepsia, hypochondriasis, and gout. Their properties are, of course, modified by the saline matter that may be also contained in them. The most celebrated amongst the acidulous waters are those of Bar, Chateldon, St. Myon, Mont d'Or, Langeac, Seltzer, Schlangenbad, Sultzmatt, Pyrmont, Spa, Carlsbad, Cheltenham, Scarborough, Saratoga, Ballston, and the Sweet Springs of Virginia.

2. *Chalyb'eate* or *Ferru'ginous Mineral Waters, Aquæ minera'les ferrugino'sæ* seu *Chalybea'tæ* seu *Martia'les* sen *Ferro'sæ, Chalybope'gæ, Chalybokre'næ, Siderope'gæ, Siderokre'næ*, (F.) *Eaux minérales ferrugineuses*, contain iron — sulphate, chloride or carbonate, generally the latter—held in solution by an excess of acid. Chalybeate waters have a peculiar styptic taste. They are transparent when taken from the spring; but, when exposed for some time to the air, a pellicle forms on the surface, and a deposite of the iron takes place. Chalybeate waters are used as tonics in debility of all kinds; in all cases, in fact, where iron is considered to be indicated. They are the most numerous of all the classes of mineral waters. In this dictionary, those only are specified which have some celebrity; yet there are about one hundred; more than sixty of these being saline, and forty sulphureous. The most celebrated chalybeates are those of Tunbridge, Scarborough, Spa, Bussang, Forges, Vichy, Pyrmont, Passy, Provins, and Vals.

3. *Saline Mineral Waters, Aquæ minerales sali'næ, Amua alcaliza'ta* (Paracelsus,) *Hydralmæ*, (F.) *Eaux minérales salines*. Waters, holding in solution different saline substances in greater quantity than the acidulous waters. They differ in properties, according to the salts contained in them. The salts usually present are sulphates, chlorides, and carbonates: and the bases, with which the acids forming these are combined, are soda, magnesia, and lime. Saline mineral waters are usually aperient; and the most noted are those of Seltzer, Sedlitz, Balaruc, Bourbonne-les-Bains, Baden, Epsom, Cheltenham, &c.

To this class may also be added *Sea water*.

4. *Sulphu'reous Mineral Waters, Aquæ minerales sulphu'reæ;* when warm, termed *Theiothermæ, Theiope'gæ, Theother'mæ, Fontes sulphu'rei cal'idi*, (F.) *Eaux minérales sulfureuses* ou *sulfurées* ou *sulfureuses* ou *hépatiques*, &c. These waters owe their distinguishing character to an impregnation of sulphuretted hydrogen, and are at once recognised by their peculiar fetid smell, resembling that of rotten eggs. They usually contain saline substances, which modify their powers. From the action of the sulphuretted hydrogen, they are useful in cutaneous affections; and, from the combined action of this and the saline matter, they are valuable agents in diseases of the digestive organs. They are also employed in cutaneous eruptions; and the warm sulphur baths have been especially celebrated in such cases, as well as in rheumatic affections. The most renowned sulphureous waters are those of Barèges, Bagnères-de-Luchon, Cauterets, Bonnes, Aix in Savoy, Aix-la-Chapelle, Enghien, Harrogate, Moffat, Virginia Springs, &c.

Some springs, as those of Bath, Buxton, Dax, Matlock, Warm and Hot Springs of Virginia, &c., are almost pure *Thermal Mineral Waters*. They are valuable agents in rheumatic affections; the warmth being equable during the whole period the individual is immersed in them; which cannot be the case in the artificial thermal bath.

Water, Mineral, Acidulous water, simple.

Waters, Mineral, Artifical, (F.) *Eaux minérales artificielles* ou *factices*. These are imitations of the natural; and some of them — as the factitious Cheltenham water, and Sedlitz water — answer the purpose of the natural water tolerably well. The acidulous and chalybeate waters are, however, most easily imitated.

Water, Nutmeg, Spiritus myristicæ.

Water Pang, Pyrosis—w. Parsnep, creeping, Sium—w. Pennyroyal, spirituous, Spiritus pulegii — w. Peppermint, Aqua menthæ piperitæ — w. Pimento, see Myrtus pimenta.

Water Pox, see Varicella.

Water, Protoxide of Nitrogen, Aqua nitrogenii protoxydi.

Water Purpie, Veronica beccabunga — w. Qualm, Pyrosis.

Water, Rain, *Aqua pulvia'lis* seu *plu'via* seu *im'brium*, (F.) *Eau de pluie*, when collected at a distance from houses or other elevated objects, is the purest natural water, and has the least specific gravity. The only bodies which it usually holds in solution, are carbonic acid, and minute traces of carbonate of lime and chloride of calcium.

Water, Rice, see Oryza.

Water, River, *Aqua fluviat'ilis*, is derived from the conflux of numerous springs and rain water. It is, generally, pretty pure.

Water, Rose, Aqua rosæ.

Water, Sea, *Aqua Mari'na, Humor Dor'idis*, (F.) *Eau de Mer, Eau salée*. This contains chlorides of sodium, magnesium, and calcium, and sulphate of magnesia. It is cathartic, and forms the usual glyster at sea. It makes an excellent tonic bath; superior in most cases — especially in scrofula — to the fresh-water bath.

Water, Searle's Patent Oxygenous Aerated, Aqua Nitrogenii protoxydi — w. Seydschütz, Sedlitz water.

Water Shield, Brasenia hydropeltis.

Water, Snow, *Aqua niva'ta*, (F.) *Eau de neige*, has usually been deemed unwholesome. It exactly resembles rain water in composition, and is equally salubrious.

Water, Soda, Acidulous water, simple — w. Soft, see Water, hard — w. Spearmint, Aqua menthæ viridis.

Water, Spring, *Aqua fonta'na, Hydrope'gē*, (F.) *Eau de fontaine*, contains, in addition to the substances detected in rain water, more or less sulphate of lime. When this is to such an extent as to curdle soap, the water is said to be *hard;* if not, *soft*. Hard water is, of course, inferior to soft, for domestic and medicinal purposes.

Water Strapping, see Water dressing.

Water, Styptic, Sydenham's, Solutio sul-

phatis cupri composita—w. Tar, see Pinus sylvestris—w. Toast, see Toast-water.

WATER TARGET, Brasenia hydropeltis.

WATER, WELL, *Aqua putea'lis* seu *putea'na* seu *ex pu'teo*, (F.) *Eau de puit* ou *de source*, is the same as spring water, but liable to impregnation, owing to the land springs filtering into the wells, and conveying impurities into them.

WATERS, THE, Liquor Amnii—w. Bag of, see Liquor Amnii—w. Discharged or broken, Profusio aquæ—w. Distilled, Aquæ destillatæ—w. First, Primitiæ—w. Green, see Lochia.

WATTWEILER, MINERAL WATERS OF. Wattweiler is a small town in the department of Haut-Rhin, at the foot of the Vosges. The waters are acidulous chalybeates, and contain carbonates of iron, lime, and soda, chloride of sodium, and free carbonic acid.

WAX, Cera—w. Ear, Cerumen.

WAX, MYRTLE. A wax obtained from the fruit of *Myri'ca cerif'era*. It has been prescribed in dysentery.

WAX, YELLOW AND WHITE, Cera flava et alba.

WAXING KERNELS, *Waxen-kernels*, *Crescen'tiæ*, (F.) *Croissances*, *Croissants*, *Glandes de croissance*. A popular term for small tumours, formed by an enlargement of the lymphatic glands—in the groins of children particularly. They have been looked upon as connected with the growth of the body,—hence their name.

WAY, Saxon pæg, *Via*, *Passage*, *Odos*, (F.) *Voie*. A name given to different canals.

WAYBREAD, Plantago major.

WAYS, DIGESTIVE, *Digestive Pas'sages*, *Primæ Viæ*, (F.) *Voies digestives*, *Premières voies*, are the series of hollow organs of digestion, composed of mouth, œsophagus, stomach, and small and large intestines. The term is often restricted to the first three of these.

WAYS, SECOND, *Second Passages*, *Secun'dæ viæ*, (F.) *Secondes voies*, comprise the chyliferous, lymphatic and blood vessels.

WEAKSIGHTEDNESS, Asthenopia.

WEAL, Wheal.

WEAM, Abdomen, Uterus.

WEAM-ILL, Colic.

WEANING, from Saxon penan, 'to wean;' *Ablacta'tio*, *Apogalactis'mus*, (Prov.) *Spaning*, (F.) *Sévrage*. The act of depriving the infant, permanently, of the breast, in order to feed it on other and more solid nourishment.

WEANING BRASH, see Brash, weaning.

WEARING, Consumption.

WEATHERCOCKS, Impatiens.

WEB, Caligo, Pterygium—w. Muscular, Panniculus carnosus.

WEB-EYE, Caligo.

WEBBED FINGERS, Dactylion.

WEBERIAN CORPUSCLE, see Ejaculatory Ducts—w. Organ, see Ejaculatory Ducts.

WEDGED, (D.) wegghe, *Inclu'sus*, *Inhæ'rens*, (F.) *Enclavé*. The head of the fœtus is said to be *wedged*, *locked* or *impacted* in the pelvis, when it remains fixed, notwithstanding the uterine efforts.

The condition is called *Incunea'tio* seu *Inclava'tio fœtûs*, *Spheno'sis*, (F.) *Enclavement*. See Paragomphosis.

WEEBO, Senecio Jacobæa.

WEED, see Mastitis—w. Arrow, Sagittaria variabilis—w. Beetle, Galax aphylla—w. Breast, Saururus cernuus—w. in the Breast, see Mastitis—w. Butter, Erigeron Canadense—w. Cancer, Goodyera pubescens—w. Dyer's, Reseda luteola—w. Field, Anthemis cotula—w. Horse, Erigeron Canadense—w. Horsefly, Sophora tinctoria—w. Milk, Apocynum androsæmifolium—w. Phthisis, Ludwigia palustris—w. Pride, Erigeron Canadense—w. Silver, Potentilla anserina—w. Soldiers', Matico—w. Thimble, Rudbeckia laciniata—w. Wind, Asclepias tuberosa.

WEEPING, Fletus—w. Tear, Tear.

WEESEL, Trachea.

WEID, see Mastitis.

WEIGHT, from Saxon, pægan, 'to weigh;' (F.) *Pesanteur*. A sensation of heaviness or pressure over the whole body, or over a part—the stomach or head, for example.

WEIGHTS AND MEASURES, *Pon'dera et Mensu'ræ*, (F.) *Poids et Mésures*. The importance of possessing a uniform system of weights and measures has impressed the scientific of all countries, and numerous endeavours have been made to accomplish the object. It is, however, a matter of considerable difficulty, and one not likely to be attained. The new French measures are upon decidedly the best footing, but they are not adopted out of France. The greatest diversity prevails over Europe in the measures, both of weight and capacity. Some of the following tables will show, that every subdivision of the pound, as well as the pound itself, differs in England and in France.

WEIGHTS.

Troy Weight, as used by the British Apothecari s.—Pondus pharmaceu'ticum seu *medicinale.*

The *pound* ℔	contains	12 ounces.
The *ounce* ℥		8 drachms.
The *drachm* ʒ		3 scruples.
The *scruple* ℈		20 grains.
The *grain* gr.		

These, and the signs by which they are denoted, are the same in all the British Pharmacopœias, as well as in the American.

lb.	*Oz.*	*Drachms.*	*Scrup.*	*Grs.*
1 =	12 =	96 =	288 =	5760
	1 =	8 =	24 =	480
		1 =	3 =	60
			1 =	20

Poids de Marc.

The *pound*	contains	16 ounces.
The *ounce*		8 drachms.
The *drachm*		3 scruples.
The *scruple*		24 grains.
The *grain*		

Avoirdupois.

Pound.	*Ounces.*	*Drachms.*	*Troy grains.*
lb. 1. =	16 =	256 =	7000
	1 =	16 =	437·5
		1 =	27·34375

The avoirdupois drachm is sometimes divided into three scruples, and the scruple into ten grains. The pound of 7680 grains avoirdupois = 7000 grains troy, and hence 1 grain troy = ·97 grain avoirdupois.

The *Poids de Marc* is that employed by the French Pharmaciens, when the new weights are not. The Avoirdupois is now used by the Dublin College.

The following tables exhibit the relative value of the old French and English weights:

Poids de Marc.	*Troy Wt.*	*Avoird.*	*Troy grs.*
1 pd. (*livre*) =	1·31268*lb* =	1·08014*lb* =	7561
1 *oz.* (*once*) =	·98450*oz* =	1·08014*oz* =	472·5625
1 dr. (*gros.*) =	·95450*dr* =		59·07032
1 gr. =			·820421

Troy.		*Poids de Marc.*		*French grains.*
1 pound	=	0·76180 *lb.*	=	7561
1 ounce	=	1·01574 *once*	=	585·083
1 drachm	=	1·01574 *gros*	=	73·135
1 grain				1·219

Avoirdupois.		*Poids de Marc.*		*French grains.*
1 pound	=	0·925803 *lb.*	=	8532·3
1 ounce	=	0·925803 *once*	=	533·27

To convert French grains into Troy grains, divide by " Troy grains into French grains, multiply by	1·2189
" French ounces into Troy ounces, divide by " Troy ounces into French ounces, multiply by	1·015734
" French pounds (*poids de marc*) into Troy pounds, multiply by " Troy pounds into French pounds, divide by	1·31268

Mètre	39·371 =	1	0	3·37

VALUES OF THE GRECIAN, ROMAN, AND ARABIAN WEIGHTS AND MEASURES IN POIDS DE MARC.

1. *Weights of the Ancient Greeks.*

	lbs.	oz.	dr.	gr.
The *talent* (ταλαντον)	54	2	5	24
The *mna* (μνᾶ)	14	3	3	40
The *drachm* (δραχμη)		1	1	11
The *obolus* (οβολος)				13
The *ceration* (κερατιον)				4
The *chalcus* (χαλκους)				2
The *septon* (σεπτον)				⅓

2. *Weights of the Ancient Romans.*

	oz.	dr.	gr.
The *pound* (*libra*)	10	6	48
The *ounce* (*uncia*)		7	16
The *duella*		2	29
The *sicilicus*		1	58
The *sextula*		1	14
The *consular denier*, *denarius*		1	2
The *imperial denier* or *drachm*, *drachma*			65
The *victoriatus*			37
The *scripturium* or *scruple*			21
The *obolus*			11
The *siliqua*			4

The Greeks divided their obolus into *chalci* and *lepta*: some divided it into 6 *chalci*, and each *chalcus* into 7 lepta; others into 8 chalci, and every chalcus into 8 lepta or *minuta*.

Dr. Milligan, in his edition of Celsus, gives the following table, exhibiting the Troy weight of measures of capacity and of weight in use amongst the Romans.

	Urna.	*Libra.*	*Uncia.*	*Denarius.*	*Scrupulus.*	*Sextans.*	*Chalcus.*	*Grana.*
Amphora	2 =	80 =	960 =	6720 =	20160 =	40320 =	403200 =	420480
Urna	1 =	40 =	480 =	3360 =	10080 =	26160 =	210600 =	210240
Congius	¼ =	10 =	120 =	840 =	2540 =	5040 =	50400 =	52920
Sextarius		1⅔ =	20 =	140 =	420 =	840 =	8400 =	8760
Libra		1 =	12 =	84 =	252 =	504 =	5040 =	5256
Hemina			8 4-7 =	60 =	180 =	360 =	3600 =	3759
Acetabulum			2 1-7 =	15 =	45 =	90 =	900 =	939
Sesqui-cyathus			2 1-7 =	15 =	45 =	90 =	900 =	939
Cyathus			1 3-7 =	10 =	30 =	60 =	600 =	626
Sescuncia			1½ =	10½ =	31½ =	63 =	630 =	657
Uncia			1 =	7 =	21 =	42 =	420 =	438
Cochleare				2½ =	7½ =	15 =	150 =	156
Drachma				1 =	3 =	6 =	60 =	62 4-7
Denarius				1 =	3 =	6 =	60 =	62 4-7
Scrupulus					1 =	2 =	20 =	20⅔
Scrupulus dimidiatus					½ =	1 =	10 =	10⅓
Obolus						1 =	10 =	10⅓
Sextans						1 =	10 =	10⅓
Chalcus							1 =	1 1-30

He gives also the following '*Carmen Mnemonicum*,' which exhibits the analogies of the Roman and British imperial weights.

To the congius and gallon, each, ten pounds allow,
On the bushel and amphora eighty bestow;
Rome's pound, as in Troy weight, twelve ounces obtains,
But her ounce is Abolrdupois, strictly, in grains:
Denarii drams, scruples scrupli define,
Septarius answers to our bottle of wine,
And the mna's a short pint—fourteen ounces in fine.

3. *Weights said to be of the Arabians, Modern Greeks, and Latins of the barbarous periods of the Middle Ages.*

	oz.	dr.	gr.
The *alchemion*	14	3	40
The *manes* or *ominos*	10	6	28
Sacras, *aughben*, *adar*, *assatil*		7	16
The *great* or *royal nut*		3	44
The *sextarius*, *stater*		3	44
The *lesser nut*		2	50
Aliovanus		2	29
Aureus, *Alcobolus*		2	14
The *hāzel nut*, *bendacate*, *holca*, *alchi*, *darchimi*, *atogochilos*, *ologinat*, *nabach*		1	11
The *acorn*, *lupine*, *Egyptian* or *Syrian bean*, the *bachil*			42
The *Alexandrian bean* or *tremesis*			30
The *Greek bean* or *gramme*, the *kermet*, *gonum*, *harmi*, *gracchus*			21
The *ring*, *cumulus*, *seminet*, *onolosich*, *onolossat*			11
The *danich*			8
The *kirat*, *alkilat*, *karariī*			4

1. *Greek Measures.*

	lbs.	oz.	dr.	gr.
The *metretes* (μετρητης)	84	4	3	00
The *chus*, *choa*, *congius* (χους)	7	0	2	66
The *xestes* (ξεστης)	1	1	7	44
The *cotyla* (κοτυλη)		8	7	58
The *tetarton* (τεταρτον)		4	3	65
The *oxybaphon* (οξυβαφον)		2	1	69
The *cyathos* (κυαθος)		1	4	00
The *concha* (κογχη)			6	00
The *mystron* (μυστρον)			3	00
The *chama minor* (χημη)			2	00
The *cochliarion* (κοχλιαριον)			1	00

2. *Roman Measures of Capacity.*

	lbs.	oz.	dr.	gr.
The *amphora* or *cadus*	56	2	7	24
The *urna*	28	1	3	48
The *congius*	7	0	2	66
The *sextarius*	1	4	7	44
The *hemina*		10	1	18
The *quartarius*		5	0	45
The *octabulum*		2	4	23
The *cyathus* or *small glass*		1	5	30
The *ligula* or *spoonful*			3	24

3. *Measures said to be of the Arabian, Arabist, and Latin Physicians of the Middle Ages.*

	lbs.	oz.	dr.	gr.
The *missohaos* weighed	3	8	1	33
Aben, *kirt*, *ejub*, *eberia*, or *Roman mina*	1	6	0	00
The *phial*, *haffilius*, or *hassitimus*		10	1	18
The *calix* or *rejelati*		5	0	44
The *handful*, *pugillum*, *cornusum*		3	2	68
The *hasauf*, *acsasse*, or *anesime*		2	4	20
The *conos* or *coatus*, *alcantus* or *almunesi*, *briale cuabus*		1	5	34
The *lesser bachates*			5	56
The *largest spoonful*			4	44
A *spoonful*			1	52
The *colanos* or *reclanarium*			1	28
A *small spoonful* or *flagerina*, or *cyanes*, The *smallest spoonful* or *fahaliēi*			1	11 42

A good section on weights and measures is contained in the edition of "The Seven Books of Paulus Ægineta," by Mr. Francis Adams, published by the Sydenham Society of London, vol. iii. p. 609, London, 1847.

Besides the weights and measures above mentioned, employed by the moderns, there are modes of estimating the quantities of substances by approximation. For example: —

A *glaseful* or *cupful*, ((F.) *Verre*,) is reckoned to contain 4 or 5 fluidounces.

A *wine-glaseful*, 1½ ounce or two ounces.

A *table-spoonful*, ((F.) *Cuiller à bouche*,) about half an ounce.

A *coffee* or *dessert-spoonful*, about 3 drachms.

A *tea-spoonful*, a fluidrachm.

A *handful*, *manipulus*, ((F.) *Poignée*,) as much as can be held in the hand.

The *Pugillus* ((F.) *Pincée*) is as much as can be held by the three fingers.

These last quantities are occasionally prescribed by the French practitioners. Their weights must, of course, vary, according to the article. The authors of the Parisian codex have valued them, as regards certain substances.

		French. oz.	dr.
A *Manipulus* of	barley weighs	3	2½
"	linseed	1	4
"	linseed meal	3	3
"	dried mallow leaves	1	3
"	dried cichory leaves	1	0
"	flowers of the tilia	1	2½

		dr.	scr.	gr.
A *Pugillus* of	chamomile flowers weighs	2		
"	arnica	1	2	
"	marsh-mallow	1	1	
"	mallow			60
"	fennel seeds		1	60
"	aniseed	1	½	60

A *hen's egg*, newly laid, weighs about 2 ounces and 2 drachms: when deprived of its shell, 2 ounces. The *white* weighs 1 ounce, 2 drachms, and 57 grains: the *yolk*, 5 drachms and 15 grains.

WEILBACH, MINERAL WATERS OF. The village of Weilbach is in the plain between the Maine and the southern extremity of the Taunus hills. It bassin its neighbourhood a cold sulphureous alkaline spring, the water of which is bottled and exported, although not of great efficacy. Its use is at times combined with that of the saline springs in Nassau, and of Baden-Baden, in various chronic abdominal and thoracic affections.

WEINTRAUBENKUR, Grape cure.

WELCOME TO OUR HOUSE, Euphorbia cyparissias.

WELD, Reseda luteola.

WELK, *Whelk*. An inequality; a protuberance; a cutaneous eruption of this character. Acne.

WELTER'S BITTER, Acid, carbazotic.

WEM, Abdomen, Uterus.

WEMDING, MINERAL WATERS OF. These waters are situate about four leagues from Donauwörth in Bavaria. They contain sulphuretted hydrogen; carbonates of lime, magnesia, and soda; sulphates of lime and magnesia; a little chloride of calcium, and oxide of iron; and are much used in asthenic diseases.

WEN, Sax. *pen*, *Lu'pia*, *Tumour*, (F.) *Loup*. A name given to circumscribed, indolent tumours, without inflammation or change of colour of the skin. They may be met with in almost every part of the body. Their magnitude, as well as nature, is very variable. The term is sometimes given to an encysted tumour, and to bronchocele.

WESTERN ISLANDS, Azores.

WEST INDIES, (CLIMATE OF.) The climate of the West Indies has long been regarded as favourable to the consumptive. In confirmed consumption, it appears, however, to be positively injurious. As a prophylactic for those predisposed to consumption, it is generally favourable. The nature of the patient's constitution, in regard to the effects of elevated temperature, has always to be taken into account. In diseases that are benefited by warm climates, the West Indies afford an appropriate residence. The islands in which the invalid can best obtain all the advantages of the climate, are Jamaica, Barbadoes, St. Vincents, Antigua, St. Kitts, and Santa Cruz.

WEST'S SPRING, see South Carolina, mineral waters of.

WET STRAPPING, see Water dressing.

WHAHOO, see Euonymus.

WHEAL, *Weal*, *Wale*, *Pomphus*. A ridge, or elevation of the skin, produced by a rod or whip; or as if produced in that manner. Such elevations are seen in urticaria.

WHEAT, Triticum—w. Indian, Zea mays—w. Turkey, Zea mays.

WHEEZE, (Prov.) *Rezzle*, Sax. hpeoꝛan, formed probably, like *whiz* and *whisper*, from the sound it expresses. To breathe with difficulty and noise, as in asthma.

WHELK, Acne, Welk — w. Chin, Sycosis—w. Rosy, Gutta rosea.

WHETLEBONES, Vertebræ.

WHEY, Serum lactis.

WHEY-CURE, (G.) Molkenkur. In the Kursaal of many of the German watering places, a space is set apart for whey drinkers. The whey is a pleasant diluent, and the saccharine matter it contains may act as a eutrophic; but the main effect on the valetudinarian is probably produced by the new impressions made upon him by his visit to the watering place.

WHEY, MUSTARD, see Sinapis—w. Rennet, see Serum lactis—w. Sack, Wine-whey—w. Tamarind, see Tamarindus — w. Vinegar, see Acetum — w. Wine, Wine-whey.

WHIFFING MURMUR, see Murmur, respiratory.

WHIG, Buttermilk, Serum lactis.

WHIMBERRY, Vaccinium myrtillus.

WHISKY, see Spirit. A spirituous liquor obtained from oats, potatoes, &c., by distillation.

WHISKY LIVER, Liver, nutmeg.

WHISPER, CAVERNOUS, see Cavernous.

WHIS'PERING; evidently an example of onomatopœia (*hooisp'ering*), *Susurra'tio*, *Susurra'tion*. Articulation of the air sent through the vocal tube without any action of the glottis.

WHISPERING SOUFFLE, see *Souffle*.

WHISTLING, *Sifflement*, see *Râle sibilant*.

WHITE BALL, Cephalanthus occidentalis—w. Blisters, Rupia escharotica.

WHITE, FLAKE, Plumbi subcarbonas.

WHITE LEAF, Pyrola maculata, Spiræa tomentosa—w. Leg, Phlegmatia dolens—w. Matter of the brain, see Cerebrum — w. Root, Angelica lucida, Asclepias tuberosa, Ligusticum actæifolium.

WHITE, SPANISH, Bismuth, subnitrate of.

WHITE SUBSTANCE OF SCHWANN, see Nerve fibre — w. Sulphur, see Virginia, mineral waters of — w. Swelling, Hydrarthus — w. Swelling of lying-in women, Phlegmatia dolens — w. Weed, Chrysanthemum leucanthemum—w. Wood, Liriodendron, Tilia Americana.

WHITENESS OF COMPLEXION, Paleness.

WHITES, THE, Leucorrhœa.

WHITLEYA STRAMONIFOLIA, Anisodus luridus.

WHITLOW, Paronychia.

WHOOPING-COUGH, Pertussis.

WHORLYWORT, Leptandria purpurea.

WHORTLEBERRY, Vaccinium myrtillus, Vaccinium vitis idæa — w. Bear's, Arbutus uva ursi.

WHORTS, BLACK, Vaccinium myrtillus.

WHYTT'S DISEASE, Hydrocephalus internus.

WIDOW-WAIL, Cneorum tricoccum, Daphne Alpina.

WIESBADEN, MINERAL WATERS OF, see Wisbaden.

WIESSAU, MINERAL WATERS OF. These waters are situate about four leagues from the convent of Waldsassen in Bavaria. They contain carbonic acid; carbonates of lime and magnesia; chlorides of calcium, magnesium, and aluminium; carbonate of soda, and much oxide of iron. The Bavarians consider them to resemble the waters of Pyrmont.

WILD, Sax. pilð, (D.) Wild. An epithet given to the countenance, when not in harmony with the condition of the individual, and indicating strong mental emotion; — a *wild look*, (F.) *Physiognomie égarée*.

WILDBAD, MINERAL WATERS OF. Wildbad is a small town of Wurtemberg, three German miles from Baden-Baden. It is much frequented as a watering-place. The water is thermal, from 95° to 100° of Fahr., and is much employed in cases in which thermal waters are indicated. It is used internally, a pint not containing more than a grain of solid ingredients, which consists of salts of soda and lime. The proportion of carbonic acid gas is very small.

WILDFIRE, Erysipelas.

Wildfire Rash, Ignis sylvaticus.

WILDUNGEN, MINERAL WATERS OF. Wildungen is situate a few miles from Cassel in Germany. In its neighbourhood are several mineral springs; the chief of which, according to Stucke, contain a bituminous matter; chloride of sodium and sulphate of soda; carbonate and sulphate of lime, &c. They are used, chiefly, as refrigerants.

WILL, Voluntas.

WILLAN, Salix.

WILLOW, Salix—w. Herb, Common, Lythrum salicaria — w. Herb, great, Epilobium angustifolium — w. Herb, purple, Lythrum salicaria — w. Herb, purple veined, Epilobium coloratum.

Willow, Low-bush, Salix humilis—w. Speckled, Salix humilis — w. Red, Cornus sericea — w. Rose, Cornus sericea — w. Sweet, Myrica gale.

WIND, Sax. pind, (an example of onomatopoica—*ooind*) *Ventus*, *An'emos*, (F.) *Vent*. Winds exert considerable influence on the animal economy; acting by their temperature, which necessarily modifies that of the circumambient air, as well as by their moisture or dryness, and by the emanations of different kinds, which they transport to greater or less distances. The winds which blow over a considerable extent of country, are dry and serene: those which come from the ocean are moist and chilly.

Wind, see Flatulence.

Wind of a Ball. A term applied to the compression of air, supposed to be produced by the passage of a ball near a part of the body, so as to occasion what has been called a *wind contusion*.

Wind Contusion, see Wind of a Ball — w. Dropsy, Emphysema, Tympanites — w. Flower, Anemone—w. Pipe, Trachea—w. Root, Asclepias tuberosa — w. Weed, Asclepias tuberosa.

WINDINESS, Flatulence.

WINDY, *Flatulen'tus*, *Flat'ulent*, *Va'porous*, (F.) *Venteux*, *Flatueux*. That which causes wind or flatulence; also, that which is caused by wind or flatulence; as *windy food*, *windy colic*, &c. Also, one affected with flatulence, or who is 'troubled with the wind.'

WINE, Sax. pin, (G.) Wein, originally, perhaps, from *οινος*, *Œnos*, *Vinum*, *μεθυ*, *Methu*, (F.) *Vin*. A name given by chymists to all liquors that have become spirituous by fermentation. The term is generally, however, restricted to the fermented juice of the grape, or of fruits, the product of whose fermentation resembles, in almost all respects, that of the juice of the grape. Wine is composed of alcohol; saccharine matter; malic acid; tartaric acid; bitartrate of potassa; acetic acid; an extractive colouring matter, more or less bitter, and partly resinous; and sometimes of an aromatic substance. The extractive colouring matter is chiefly met with in red wines. All these constituents, except the alcohol, are found ready formed in the grape. The alcohol proceeds from the decomposition of the saccharine matter. A part of the acetic acid is also formed during fermentation.

The following table, drawn up by Mr. Brande, exhibits the quantity of spirit in different kinds of wine and liquors. It is proper, however, to remark, that many of these wines are prepared for the London market, and are more brandied, or "reinforced," than the same varieties sold in the United States. This is strikingly the case with port. Dr. Henderson, too, has remarked, that some of the wines analyzed by Mr. Brande were mixed with a considerable quantity of adventitious alcohol. Dr. Henderson's additions and corrections have the letter H. affixed.

Proportion of Alcohol, s. g. 0·825, in one hundred parts by measure of the following Wines, and Malt and Spirituous Liquors.

1.	Lissa	26·47
	Do.	24·35
	Average, (*a*)	25·41

56.	Irish do	53·90

The only wine recommended in some pharmacopœias is *Sherry, Vinum, V. album Hispan'icum, V. Xer'icum, Leucæ'nus.* It is a *dry wine;* the least variable in its properties, and agrees best with the dyspeptic. Other wines used officinally are — *Canary* or *Sack wine, Vinum Canari'num; Mountain wine, Vinum album monta'num; Tent wine; Rhenish wine, Vinum Rhena'num;* and *Port wine, Vinum rubrum Portugal'icum.*

The wines habitually drunk are almost innumerable. Those that are sweet, or contain a large portion of free, saccharine matter, are decidedly the least wholesome to the dyspeptic.

When wine is good, and of a proper age, it is tonic and nutritive; when new, flatulent and cathartic, disagreeing with the stomach and bowels. In medicine, it is a valuable tonic in the last stage of typhus, when the skin is not too hot and dry. Its use, however, requires great caution; and when once commenced under proper circumstances, it cannot be suddenly dropped without mischief. It is, perhaps, the best permanent stimulus in the catalogue of the materia medica.

(*d*) 12·91 H.

Mulled Wine is made as follows: — Take of bruised *cinnamon* ℥¼; half a *nutmeg* grated; and ten bruised *cloves*. Infuse in boiling *water* Oss for an hour; strain and add *sugar* ℥j. Pour the whole into a pint of hot *Port* or *Sherry*. Useful in adynamic conditions.

WINE, AMINÆAN, Aminæum vinum.

WINE OF ALOES, Vinum aloes.

WINE, ANTIMONIAL, Vinum antimonii — w. Antiscorbutic, Vinum antiscorbuticum — w. Aromatic, Vinum aromaticum — w. Bark, compound, Vinum de kinâ kinâ compositum — w. Barley, Cerevisia — w. Bitter, diuretic, Vinum diureticum amarum.

WINE BITTERS, *Vinum gentia'næ compositum.* The formulæ for these may be various. The following is as good and as agreeable as any. (*Rad. gentian.* ℥bj, *cort. aurant.* ℥x, *sem. cardam.* cont. ℥iv, *cinnam. cort.* ℥iv, *wine,* foreign or domestic, three gallons and a half.) Tonic and stomachic.

WINE, CEDAR, Cedrinum vinum — w. Champagne, Vinum campanum — w. Chian, Chium vinum.

WINE OF COLCHICUM, Vinum colchici — w. of Colchicum seed, Vinum colchici seminis — w. of Ergot, Vinum ergotæ — w. of Gentian, compound, Vinum gentianæ compositum — w. of Hellebore, white, Vinum veratri.

WINE, IPECACUANHA, Vinum Ipecacuanhæ.

WINE OF IRON, Vinum ferri.

WINE, MEDICATED, Vinum medicinale — w. Mulled, see Wine.

WINE OF OPIUM, Vinum opii.

WINE, PORT, Vinum Portugallicum — w. Pullet, *Poulet, vin de.*

WINE OF QUINIA, Vinum quiniæ.

WINE, RHUBARB, Vinum rhei — w. Sherry, Vinum — w. Steel, Vinum ferri — w. Tobacco, Vinum tabaci — w. Tar, see Pinus sylvestris.

WINE WHEY, *White Wine Whey,* (PROV.) *Sack-whey.* Take of good *milk* two-thirds of a pint, and add *water* to make a pint. Take of *sherry,* or any other good white *wine,* two glasses, and of *sugar* a dessert-spoonful. Place the milk and water in a deep pan on the fire; and the moment it boils, pour into it the wine and sugar. Stir assiduously for 12 or 15 minutes, whilst it boils. Lastly, strain through a sieve.

It is a good mode of giving wine in adynamic states.

WINE, WHITE, see Wine.

WINE OF WORMWOOD, Vinum absinthites.

WING-SEED, Ptelea trifoliata.

WINKERS, Cilia.

WINKING, Scardamygmus.

WINTER'S BARK TREE, Wintera aromatica.

WINTER BERRY, SMOOTH, Prinos lævigatus — w. Berry, Virginia, Prinos — w. Berry, whorled, Prinos.

WINTER BLOOM, Hamamelis Virginiana — w. Cough, Bronchitis, chronic — w. Green, Gaultheria — w. Green, round-leaved, Pyrola — w. Green, spotted, Pyrola maculata.

WINTERA, see Wintera aromatica.

WIN'TERA AROMAT'ICA, *Drimys Win'teri, Wintera'na aromat'ica, Winter's bark Tree; Ord.* Magnoliaceæ. The bark, *Wintera* (Ph. U. S.), *Cortex Wintera'nus* seu *Winteranus Magellan'icus, C. Magellan'icus, Cinnamo'mum Magellan'icum,* (F.) *Écorce de Winter, Cannelle poivrée,* is very much allied in its properties to Canella alba.

WINTERANA AROMATICA, Wintera aromatica.

WIRTSPRINGS, Hangnails.

WISBADEN, MINERAL WATERS OF. Wisbaden is a town of Germany, about 6 miles

north of Mainz, and 22 west of Frankfort. It has been long celebrated for its hot springs; and is much frequented. There are numerous cold and thermal springs,—the former containing sulphohydric acid; the latter being saline and acidulous. The temperature of the hot springs varies from 117° to 160° Fahr.

WISMUTHUM, Bismuth.

WITCHEN, Sorbus acuparia.

WITCHHAZEL, Hamamelis Virginiana, Sorbus acuparia.

WITCHMEAL, Lycopodium.

WITCHWOOD, Sorbus acuparia.

WIT TEETH, see Dentition.

WITTER, Throat.

WIZEN, Œsophagus.

WOAD, Isatis tinctoria.

WOD, Insane.

WODNES, Insanity, Mania.

WOLFBANE, Veratrum viride.

WOLFSBANE, Aconitum — w. Wholesome, Aconitum anthora.

WOLFSCLAW, Lycopodium.

WOLFSJAW, see Harelip.

WOMAN, pl. *women*, *Gynē*, (F.) *Femme*, Sax. pirman, 'wifeman,' 'woofman.' The adult female of the human race.

WOMANHOOD, Mulieritas.

WOMB, Uterus—w. Falling down of the, Prolapsus uteri.

Womb Grain, Ergot.

Womb, Laceration of the, Uterus, rupture of the—w. Tympany of the, Physometra.

WONGE, Cheek.

WOOD, BRAZIL, Cæsalpinia echinata — w. Elk, Andromeda arborea — w. Pernambuco, Cæsalpinia echinata.

Wood-lice, Onisci aselli.

Wood-march, Sanicle.

Wood, Nicaragua, see Cæsalpinia—w. Peach, see Cæsalpinia — w. Pernambuco, Cæsalpinia echinata — w. Sampfen, Cæsalpinia sappan — w. Sappan, Cæsalpinia sappan.

Wood Sorrel, Oxalis acetosella.

Wood, Sour, Andromeda arborea—w. Waxen, Genista tinctoria.

WOODWEX, Genista tinctoria.

WOODBINE, COMMON, Lonicera periclymenum.

WOODROOF, SWEET-SCENTED, Asperula odorata.

WOODS, SUDORIF'IC, (F.) *Bois sudorifiques*. This term is applied, collectively, to guaiacum, sassafras, china, and sarsaparilla, which are often used together to form the sudorific decoction.

WOORALI, Curare.

WOORARA, Curare.

WORM, see Alembic, Vermiform process — w. Bark tree, Geoffræa inermis—w. Cakes, Story's, see Cakes, worm, Story's — w. Disease, Helminthiasis — w. Goosefoot, Chenopodium anthelmiticum — w. Grass, perennial, Spigelia Marilandica.

Worm, Guinea, Dracunculus.

Worm Loz'enges, Ching's. Empirical preparations, which consist of yellow and brown lozenges. The former are directed to be taken in the evening; the latter on the following morning. The *Yellow Lozenges*. (*Saffron*, ℥ss, *water*, ℥j; boil, and strain; and add of *white panacea of mercury*, (calomel washed in spirit of wine,) ℔j, *white sugar*, 28 lbs, *mucilage of gum tragacanth* q. s. to make a mass. Divide, so that each lozenge may contain a grain of the panacea.) The *Brown Lozenges*. (*Panacea* ℥vij, *resin of jalap* ℔ijss, *white sugar* ℔ix, *mucilage of gum tragac.* q. s. Each lozenge to contain gr. ss of the panacea.)

Worm Lozenges, Sherman's, are said to be composed of *calomel*, *gamboge*, and *sugar*.

Peter's Worm Lozenges are said to be composed in a similar manner.

Worm Root, Spigelia Marilandica — w. Seed, Artemisia santonica, Chenopodium anthelminticum — w. Seed, goosefoot, Chenopodium anthelminticum — w. Weed, Corsican, Corallina Corsicana, Polanisia graveolens—w. Weed, white, Corallina —w. Wood, biennial, Artemisia biennis — w. Wood, Canada, Artemisia canadensis — w. Wood, common, Artemisia absinthium—w. Wood, creeping, Artemisia rupestris — w. Wood, lesser, Artemisia Pontica—w. Wood, Roman, Artemisia Pontica—w. Wood, sea, Artemisia maritima—w. Wood, silky, Artemisia glacialis.

WORMIA'NA OSSA seu OSSIC'ULA, *O. epacta'lia* seu *raphogeminan'tia* seu *triq'uetra* seu *triangula'ria Bla'sii* seu *sutura'rum*, *Claves calva'riæ*, *Wormian bones*, (F.) *Os Wormiens* ou *épactaux* ou *surnuméraires* (Ch.), ou *intercalés* ou *triangulaires* ou *Clefs du crâne*. Small bones, which are sometimes observable in the sutures of the bones of the cranium, of which they form a part. They were called *Wormiana*, from Olaus Wormius, who is said to have first described them. They had been previously, however, mentioned by G. Andernach, a physician at Strasburg. The Ossa Wormiana exist more commonly in the sutures of the vault of the skull; especially in the lambdoidal, sagittal, and squamous. They are uncommon at the base of the skull. Their size is very variable, and shape irregular. Their structure and development are similar to those of the other bones of the cranium; and, like them, they are bounded by sutures.

WORMIT, Artemisia absinthium.

WORMS, originally from (L.) *Vermes*; (F.) *Vers*; *Entozo'a*, *Entozoa'ria*, *Enterozo'a*, *Endozo'a*, *Entelminth'a*, *Enthelmin'thes*, *Helmin'thi*, *Entoparasites*, (F.) *Entozoaires*. Animals whose common character is that of existing only in other animals; hence their name *entozoa*, from ἐντος, 'within,' and ζωον, 'animal.' They are met with, not only in the natural cavities, but even in the tissue of the organs, but chiefly in the intestines — *Vermes intesti'ni*, *Helmin'thia alvi* seu *pod'icis*, *Splanchnelminth'ia*, *Intes'tinal worms*, (F.) *Vers intestinaux*, *Angibromelminthie*. Piorry, Cuvier, Rudolphi, Brera, Bremser, Laënnec, and others, have endeavoured to classify them,—some according to their shape; others, according to their anatomical characters.

The following table exhibits most of the entozoa which have been met with in the human body, and their usual habitats:—

Entozoa.	*Where found.*
Trichoceph'alus dispar, Oxyu'ris vermicula'ris, As'caris ala'ta, As'caris lumbricoï'des, Ancyclos'toma duodenale, Bothrioceph'alus latus, Tæ'nia so'lium,	Intestines.
Pentas'toma constric'tum, Tæ'nia nana,	" and Liver.
Distoma hæmato'bium,	Intestines and Vena porta.
Ditrachyc'eras rudis, (?)	Intestines.
Diploso'ma crena'ta, Spirop'tera hom'inis, Dactyl'ius aculea'tus,	Urinary bladder.

Dis'toma hepat'icum,	Gall bladder.
Dis'toma lanceola'tum,	Hepatic duct.
Stron'gylus gigas,	Kidney.
Tetras'toma renale,	
Fila'ria oc'uli,	Eye.
Monos'toma lentis,	Crystalline.
Distoma oc'uli huma'ni,	Capsule of crystalline.
Acephalocyst'is endog''ena,	Liver.
Echinococ'cus hom'inis,	Liver, Spleen, and Omentum.
Polys'toma pinguic'ola,	Ovary.
Hexathyrid'ium pinguic'ola	
Polys'toma vena'rum seu sanguic'ola,	Veins.
Hexathyrid'ium vena'rum,	
Fila'ria bronchia'lis,	Bronchial glands.
Trichi'na spira'lis,	Muscles.
Cysticer'cus cellulo'sæ,	
Acephalocyst'is multif'ida,	Brain.
Fila'ria medinen'sis,	Areolar texture.

The most common of these are:—the Oxyuris vermicularis, Ascaris lumbricoïdes, and Tænia, which are found in the intestines. The origin of these worms is extremely singular, and more favourable than any other fact to the hypothesis of spontaneous generation in the lowest tribes of animated nature. They are certainly not identical with any worms out of the body. They are most commonly met with in children improperly fed; but their presence cannot be positively detected by any symptoms, except that of the discharge of the worms themselves in the evacuations. They may, of course, give rise to every kind of irritation in the intestinal tube, and to sympathetic disturbance in most of the functions; but all these signs may be produced by intestinal irritation resulting from other causes.

Anthelmintics or *vermifuges*, employed, as the name imports, for their removal, may be of two kinds—*mechanical* and *true*. To the first class—the *mechanical*—belong *Emetics*, *Purgatives*, *Mucuna*, *powdered Tin*, &c. To the latter—the *true anthelmintics*,—*Turpentine*, *Chenopodium anthelminticum*, *Pink-root*, *Semina Santonici*, &c. Of these, the best is turpentine. See Oleum terebinthinæ. The great object, however, is to prevent their generation. This must be done by generous diet, fresh air, and tonics, where necessary.

WORMS, Acne punctata.

WORSUM, Pus.

WORT, Sax. *pyrt*, *Mustum*, *Infu'sum Bynes* seu *Bra'sii* seu *Malti*, (F.) *Moût de la Bière*. An infusion of salt. This has been recommended in scurvy. One measure of ground malt is added to three equal measures of boiling water. The mixture must be well stirred, and left to stand covered three or four hours. Dose, one to four pints, daily. It has, also, been recommended in other cases, where a strong putrescent disposition appeared to prevail in the fluids, as in cancerous and phagedenic ulcers. It is not now employed

WORTWALE, Hangnail.

WOSEN, Trachea.

WOUND, Sax. *punb*, *Vulnus*, *Volnus*, (diminutive *Vulnus'culum*), *Plaga*, *Trauma*, *Troma*, *Tresis*, *Tresis Vulnus*, *Blabē*, *Tymma*, (F.) *Plaie*, *Blessure*. A solution of continuity in the soft parts, produced by some mechanical agent. Wounds present innumerable differences, as regards their situation; the parts interested; their direction; size; shape; the nature of the instrument or agent by which they are produced; their more or less simple or complex character, duration, &c. A wound is called *incised*, (F.) *Coupure*, *Incision*, when made by a cutting instrument;—*punctured*, *Nygma*, (F.) *Piqure*, when made by a pointed instrument;—*lacerated*, (F.) *Déchirure*, *Plaie par arrachement*, when the parts are lacerated or torn by the wounded body; *poisoned*, *Cellulī'tis venena'ta*, *Necu'sia*, (F.) *Plaie envenimée*, when some virulent or venomous substance has been introduced;—and *contused*, (F.) *Plaie contuse*, when produced by a blunt body. *Gunshot wounds*, *Sclopetopla'gæ*, *Vul'nera sclopeta'ria* seu *à sclopet'is*, (F.) *Plaies d'armes à feu* ou *d'arquebusade* ou *d'arquebuse*, *Coup de feu*, belong to the last division.

WOURALI, Curare.

WOURARI, Curare.

WOURARU, Curare.

WOURSUM, Pus.

WRACK, SEA, Fucus vesiculosus — w. Bladder, yellow, Fucus vesiculosus.

WRAMP, Sprain.

WRAPPING UP, (of the hydropathists,) *Emaillottage*.

WRATACK, Nanus.

WRENCH, Sprain.

WRET, Verruca.

WRETWEED, Euphorbia palustris.

WRIGHTIA ANTIDYSENTERICA, Nerium antidysentericum.

WRINKLE, Sax. *pruncle*, *Ruga*, *Rytis*, *Rhacus*, *Rhachus*, *Rhagus*, *Rhysse'ma*, *Corruga'tio cutis*, *Ruelles*, (Sc.) *Runkle*, *Runkill*, (Prov.) *Crinkle-crankle*, (F.) *Ride*. A furrow or fold in the skin of the face, forehead, vagina, &c. See Corrugation.

WRINKLED, *Rugo'sus*, *Rugous*, *Rugose*, (F.) *Ridé*. Full of wrinkles.

WRIST, Carpus.

WRIST-DROP. Paralysis of the muscles of the forearm, induced by the poison of lead.

WRITERS' SPASM, see Spasm, writers'.

WURALI, Curare.

WURSTGIFT, Allantotoxicum.

WRONG HEIR, Cancellus.

WRYNECK, Torticollis.

X.

X LEG, Entogonyaneon.

XALAPPA, Convolvulus jalapa.

XANTHIC OXIDE, Uric oxide.

XANTHINE, Uric oxide.

XAN'THIUM, *X. Struma'rium* seu *Orienta'lē* seu *Vulga'rē, Barda'na minor, Lappa minor, Lesser Burdock, Burweed, Burthistle, Clotbur, Cocklebur*, (F.) *Lampourde, Petit Glouteron, Petite Bardane*, from ξανθος, 'yellow,' because of the colour the plant is said to yield. This herb, as one of its names imports, was once esteemed for the cure of scrofula. The seeds have been administered in cutaneous affections.

XANTHIURIA, Xanthuria.

XANTHOP'SIA, from ξανθος, 'yellow,' and ωψις, 'vision.' Yellow vision, — as sometimes occurs in jaundice.

XANTHORRHIZA, (ξανθος, 'yellow,' and ριζα, 'root.') Xanthorrhiza apiifolia.

XANTHORRHI'ZA APIIFO'LIA, *Xanthorrhiza, X. simplicis'sima* seu *Marbo'rica, Zanthorrhiza tincto'ria, Yellow Root, Parsley-leaved Yellow Root, Yellow wort, Shrub yellow root.* The root of this American plant—*Xanthorrhiza*, (Ph. U. S.) —is a strong and pleasant bitter; and, in the dose of two scruples, sits easy upon the stomach.

XANTHORRHŒ'A, *Grass Tree.* A genus of trees in Australia, *Nat. Order*, Liliaceæ, of which there are several species. Two resins are obtained from them;—one the *yellow resin of Xanthorrhœa* or *of New Holland, Resi'na lu'tea Novi Belgii, Botany Bay resin, Ac'aroid resin* or *gum, resi'na* vel *gummi acaroi'des*, which probably resembles tolu and storax in medicinal properties; —the other the *red resin of Xanthorrhœa, blackboy gum.*

XANTHOS, Yellow.

XANTHO'SIS. A term applied to the yellow discolouration often observed in cancerous tumours — especially in encephaloid of the testicle. — Lebert.

XANTHOX'YLUM FRAXIN'EUM, (ξανθος, 'yellow,' and ξυλον, 'wood.') *X. america'num, X. fraxinifo'lium, X. ramiflo'rum, X. tricar'pum, Prickly ash, Shrubby prickly ash, Toothache bush, Toothache tree, Pell'itory, Yellow wood, Suterberry. Ord.* Xanthoxylaceæ. A spirituous infusion of the bark — *Xanthox'ylum*—Ph. U. S.— has been highly recommended in cases of violent colic. The fresh juice, expressed from the root of xanthoxylum, is said to afford relief in the dry bellyache of the West Indies. A decoction of the bark is sometimes used as a wash to foul ulcers.

XANTHOXYLUM CAROLIA'NUM has similar properties; but is more acrid.

XANTHOXYLUM CLAVA HERCULIS of the West Indies, (F.) *Clavalier à feuilles de frêne, Frêne épineux* is a very strong stimulant, and powerful sialogogue; and has been given internally in rheumatism.

XANTHOXYLUM OCTANDRA, Fagara octandra.

XANTHU'RIA, *Xanthiu'ria*, from ξανθος, 'yellow,' and ουρον, 'urine.' A condition of the system and of the urine, in which xanthic oxide is deposited from the urine.

XANTICA, Carminatives.

XANTOLINA, Artemisia santonica.

XENODOCEUM, Hospital.

XENODOCHEUM, Hospital.

XERANSIS, Arefaction, Drying.

XERANTIA, Siccantia.

XERA'SIA. Same etymon; from ξηρος, 'dry. A disease of the hairs, which become dry, cease to grow, and resemble down covered with dust.— Galen.

XERION, Catapasma.

XEROCOLLYR'IUM, from ξηρος, 'dry,' and κολλουριον, 'a collyrium;' *Collyr'ium siccum.* A dry collyrium.

XERODER'MA, from ξηρος, 'dry,' and δερμα. 'skin.' Diminution of secretion of the sebaceous glands.

XEROMA, Xeroph thalmia — x. Conjunctival. Xerophthalmia—x. Lachrymal, Xerophthalmia.

XEROMA, LACHRYMAL. Suppression of the lachrymal secretion. See Xerophthalmia.

XEROMYCTER, Xeromycteria.

XEROMYCTE'RIA, *Xeromycter*, from ξηρος, 'dry,' and μυκτηρ, 'the nose.' Dryness of the nose.

XEROMY'RON, *Unguen'tum siccum;* from ξηρος, 'dry,' and μυρον, 'an ointment.' A dry ointment. — Gorræus.

XEROPHA'GIA, from ξηρος, 'dry,' and φαγω, 'I eat.' Excessive use of dry aliment. A kind of regimen to which the ancient athletæ subjected themselves, with the view of increasing their strength.

XEROPHTHAL'MIA, *Ophthal'mia sicca, Ophthalmoxero'sis, Xero'ma*, from ξηρος, 'dry,' and οφθαλμια, 'inflammation of the eye.' An inflammation of the eye, without discharge. The term —as well as *Conjuncti'val* and *Lach'rymal Xero'ma*, and *Cutic'ular Conjuncti'va*—has been given to cases in which the conjunctiva is so changed, that it presents more of the characters of skin than of mucous membrane. It is incapable of radical cure. Also, lippitudo.

XEROTRIBIA, see Friction.

XEROTRIPSIS, Friction, dry.

XIPHISTERNUM, Xiphoid.

XIPHODES, Xiphoid.

XIPHODYMUS, Thoraco-gastrodidymus.

XIPHOID, *Xiphoï'des, Xipho'des Ensifor'mis*, from ξιφος, 'a sword,' and ειδος, 'shape;' *Cartila'go Xiphoïdes* seu *Xiphoï'dea* seu *Scuta'lis* seu *Ensiformis* seu *Pelta'lis* seu *Pelta'rus, Furcel'la infe'rior, Mucrona'tum os, Mucrona'ta Cartila'go, Chondros, Processus xiphosterna'lis* seu *xiphoïdes* seu *sterni xiphoïdeus, Xiphisternum, En'siform car'tilage*, (F.) *Appendice* ou *cartilage xiphoïde, C. Mucroné, Appendice sous-sternale, Palette.* The name of the appendix which terminates the sternum beneath; and which is so called from some resemblance to a sword.

XIPHOID LIG'AMENT, *Costo-xyphoid L.* (F.) *Ligament xiphoïdien* ou *costo-xiphoïdien*, is a small, very thin, ligamentous fasciculus, which passes from the cartilage of prolongation of the 7th rib to the anterior surface of the xiphoid cartilage, into which it is inserted by its fibres decussating with those of the opposite ligament.

XIPHOPA'GES, *Did'ymus Symphyo-epigas'trius;* from ξιφος, 'a sword,' and πηγνυμι, 'I fix.' A monstrosity, in which twins are united by the epigastrium, as in the case of the Siamese twins.

XYLO-ALOES, Agallochum — x. Balsamum, see Amyris opobalsamum — x. Cassia, Laurus cassia — x. Cinnamomum, Laurus cinnamomum.

XYLUM, Gossipium.

XYMPATHIA, Sympathy.

XYRIS, Iris fœtidissima.

XYRIS BULBO'SA, *X. In'dica* seu *Carolinia'na, Yellow-eyed Grass*; indigenous; *Order*, Xyrideæ; flowering from July to September. The roots and leaves are said to be used by the Hindoos in lepra, and chronic cutaneous diseases in general.

XYRUM, Novacula.

XYRUS, Novacula.

XYSMA, Linteum, Rasura, Scobs.

XYSMOS, Rasura.

XYSTER, Raspatorium.

XYSTOS, Linteum.

XYSTRUM, Raspatorium—x. Ophthalmicum, Ophthalmoxyster.

Y.

YAM. This esculent root is principally obtained from three species of *Dioscorea*, — *ala'ta bulbif'era*, and *sati'va*. They grow spontaneously in both the Indies, and their roots are eaten promiscuously, as the potato is with us. Their taste is somewhat like that of the potato.

YAM ROOT, WILD, Dioscorea villosa.

YARD, Penis.

YARROW, COMMON, Achillea millefolium.

YAUPON, Ilex vomitoria.

YAVA SKIN, Elephantiasis Arabum.

YAWNING, from Sax. ȝeonan, *Chasmē, Chasmus, Hia'tus, Osce'do, Oscita'tio, Clonus pandiculatio maxilla'rum, Gaping*, (F.) *Baillement*. Yawning consists of a deep inspiration, with considerable separation of the jaws, executed slowly and in an involuntary manner, and followed by a prolonged and more or less sonorous expiration. This respiratory movement is preceded by a feeling of oppression in the epigastric region, and in the muscles of respiration and mastication. Yawning has been conceived to be owing to torpor in the pulmonary circulation; the causes producing it being commonly *ennui*, fatigue, sleepiness, monotonous sounds, hunger, sympathy, &c. Yawning often precedes the invasion of certain intermittents, attacks of hysteria, &c., and it may, by its frequency, and obstinacy, become a true disease.

YAW ROOT, Stillingia.

YAWS, Frambœsia.

YEAST, Yest — y. Plant, Torula cerevisiæ.

YÈBLE, Sambucus ebulus.

YELK, see Ovum.

YELLOW, *Flavus, Lu'teus, Xanthus*, from past participle of Sax. ȝeælan, 'to burn.' One of the seven primitive colours.

YELLOW ASH, Cladrastis tinctoria — y. Berry, Podophyllum montanum — y. Fever, see Fever, yellow — y. Fever, mild, see Relapse — y. Jack, Fever, yellow.

YELLOW LIG'AMENTS, (F.) *Ligaments jaunes*, occupy the spaces between the *vertebral plates*, from the interval, which separates the second vertebra from the third, to that which separates the last vertebra from the sacrum. They are so called in consequence of their colour.

YELLOW PAINT, Hydrastis Canadensis — y. Root, Jeffersonia Bartoni — y. Root, parsley-leaved, Xanthorrhiza apiifolia — y. Root, shrub, Xanthorrhiza apiifolia.

YELLOW SPRING, see Ohio, Mineral waters of.

YELLOW SPRINGS. These are in Chester county, Pennsylvania. The temperature of the chief spring is 53° Fahr. The water contains no impregnation.

YELLOW STAR, Helenium autumnale—y. Weed, Ranunculus acris—y. Wood, Xanthoxylum fraxineum — y. Wort, Parsley-leaved, Xanthorrhiza apiifolia.

YELLOWS, Cypripedium luteum, Icterus, Ranunculus acris.

YERBA DEL SOLDADA, Matico — *y. de Huaca*, Datura sanguinea.

YEST, *Yeast*, Sax. ȝeȝc, from ýrc, 'a storm,' ýrcliȝ, 'stormy;' *Cervisi'æ Fermen'tum, Spuma, Cerevisi'æ, Barm*, (F.) *Levure, Levure de la Bière*. The scum which collects on the surface of beer whilst fermenting. Yest is antiseptic and tonic. It has been much extolled in putrid fevers, — a table-spoonful being given as a dose, in porter, wine, &c. It is, also, applied in the form of cataplasm, to foul ulcers. In all these cases, it acts by virtue of the generation of carbonic acid gas.

YEUX ARDENS, Ardent eyes — *y. d'Écrevisse*, Cancrorum chelæ.

YEW TREE, Taxus baccata — y. American, Taxus Canadensis.

YLECH, Ilech.

YLIATER, Ilech.

YOKE, Singultus.

YOLK, see Ovum, and Vesicula umbilicalis—y. Membrane, see Vesicula umbilicalis.

YORK SPRINGS. These are in Adams county, Pennsylvania. One of them is a saline, containing sulphates of magnesia and lime, and chloride of sodium, and is a mild cathartic and diuretic; — the other is a strong chalybeate.

YOUK, Itching, Psora.

YOUTH, Adolescence.

YOPON, Ilex vomitoria.

YPSELOGLOSSUS, Basioglossus.

YRIDES, Orpiment.

YSAM'BRA, *Pedigam'bra*. An ancient Spanish poison, of which hellebore formed the greatest part.

YUCCA, Jatropha manihot.

YUCCA FILAMENTO'SA, *Bear's grass, Silk grass*, indigenous. A tincture of the root has been used in gonorrhœa.

YUKE, Itching, Psora.

Y-WER-A, see Spirit.

Z.

ZACCHARUM, Saccharum.

ZAEL, Borosail.

ZAFFRAN, Crocus.

ZAFFRE, Smalt.

ZAMBO, see Mulatto.

ZAMIA INTEGRIFOLIA, see Arrowroot—z. Pumila, see Arrowroot.

ZANNA. A kind of Armenian bole, used by the ancients as a desiccative. It was also called *Zarnacha*.

ZANTHORRHIZA APIIFOLIA, Xanthorrhiza apiifolia.

ZANTHOXYLUM, Xanthoxylum.

ZAPANIA NODIFLORA, Anacoluppa.

ZARNACHA, Zanna.

ZARSA, Smilax sarsaparilla.

ZARZAPARILLA, Smilax sarsaparilla.

ZEA MAYS, *Z. vulga'rē, Mays, M. zea* seu *America'na, Ador, Indian Corn, Corn, Turkey* or *Indian Wheat, Maize, Mayz,* (F.) *Maïs, Graine de Turquie, Blé d'Inde* ou *d'Espagne* ou *d'Italie* ou *de Turquie. Ord.* Gramineæ. A native of America, and much used over the whole of the continent as an article of diet. It is ground for the same purposes as wheat, and forms an excellent bread.

ζεα or ζειa, was the ancient name of a sort of corn.

ZÉDOAIRE ROND, Kæmpferia rotunda.

ZEDOARIA, Kæmpferia rotunda — z. Longa, see Kæmpferia — z. Rotunda, see Kæmpferia.

ZEDOARY, Kæmpferia rotunda.

ZELOSIS, Zelotypia.

ZELOTYP'IA, from ζηλος, 'love,' and τυπος, 'form,' 'model;' *Zelo'sis.* It has been proposed to apply this name to the violent mental affection produced by the acknowledged or presumed infidelity of a beloved object; and to the consequences of such affection; — melancholy, mania, &c.

ZEMA, Decoction.

ZEN'ICON, ζενικον. Ancient name of a Keltic poison, used for poisoning arrows.

ZEOCRITON DISTICHUM, Hordeum distichon.

ZEPHACH, Peritonæum.

ZERMA, Zerna.

ZERNA, *Zerma.* Amongst the barbarous Latin writers it signified ulcerated impetigo, *Impeti'go ulcera'ta.*

ZERUMBET, Cassumuniar.

ZESIS, Effervescence, Decoction.

ZEST, see Citrus medica.

ZESTOLUSIA, Bath, hot.

ZIBEBÆ, see Vitis vinifera.

ZIBETHUM, Civetta.

ZIGNITES, Zingrites.

ZINC, *Zincum, Zinkum, Speltrum, Spealter, Tutenag, Zinchum, Zint, Stannum Ind'icum.* Perhaps formed etymologically from (G.) Zin, 'Tin.' A metal obtained from calamine and blende. Its colour is bluish-white; lustre of the fresh surface considerable, but soon dulled, from the facility with which it oxidates; hard; texture striated. S. g. 7·190. Melts at 700° Fah., burns with a bright flame in a higher temperature, and is volatilized in the form of a white, flocculent oxyd. Its use, in medicine, is in the formation of the following preparations.

ZINC, ACÉTATE DE, Zinci acetas—z. Butter of, Zinci chloridum — z. Chloride of, Zinci chloridum — z. *Chlorure de,* Zinci chloridum — z. *Cyanure de,* Zinci cyanuretum — z. Ferrohydrocyanate of, Zinci cyanuretum — z. Flowers of, Zinci oxydum — z. Hydrocyanate of, Zinci cyanuretum — z. Iodide of, Zinci Iodidum—z. Iodure of, Zinci Iodidum.

ZINC AND MORPH'IA, DOUBLE I'ODIDE OF, (F.) *Iodure double de Zinc et de Morphine.* This salt is prepared by boiling *iodide of iodhydrate of morphia with water and zinc,* after they have acted on each other for some days; filtering and crystallizing. It is considered to combine the properties of morphia and the salts of zinc, and has been prescribed as an anodyne and antispasmodic. Dose, a quarter of a grain.

ZINC, OXIDE DE, Zinci oxydum — z. Oxyd of, Zinci oxydum.

ZINC AND STRYCH'NIA, DOUBLE I'ODIDE OF. This salt is prepared by digesting for several days in hot water, *iodide of iodhydrate of strychnia and zinc;* filtering and crystallizing. It has been proposed in the same cases as strychnia.

ZINC, SULFATE DE, Zinci sulphas—z. Sulphate of, Zinci sulphas — z. Valerianate of, Zinci Valerianas.

ZINCHUM, Zincum.

ZINCI ACE'TAS, *Ac''etate of Zinc,* (F.) *Acétate de Zinc.* (*Plumbi acet.* ℔j, *zinc. granul.* ℥ix, *aquæ destillat.* Oiij. Dissolve the acetate of lead in the water, and filter. Add the zinc to the solution, and agitate them occasionally together, in a stopped bottle, for five or six hours, or until the liquor yields no precipitate with a solution of iodide of potassium. Filter the liquor, evaporate it with a moderate heat to one-fifth, and set it aside to crystallize. Pour off the liquid, and dry the crystals on bibulous paper.

Should the crystals be coloured, dissolve them in distilled water, and having heated the solution, drop into it, while hot, a filtered solution of chlorinated lime, until it ceases to let fall sesquioxide of iron; filter the liquor, acidulate it with a few drops of acetic acid, evaporate, and crystallize.—*Ph. U. S.*)

Frequently used to form a gently astringent wash in ophthalmia and other local inflammations; and as an injection in gonorrhœa.

ZINCI CARBONAS IMPURUS, Calamina.

ZINCI CAR'BONAS PRÆCIPITA'TUS, *Precip'itatea carbonate of Zinc.* (*Zinci sulphat., sodæ carbonat.* āā ℔j; *aq. bullient.* cong. Dissolve the sulphate of zinc and carbonate of soda respectively in Oiv of water. Mix the solutions; stir, and set the mixture by, that the powder may subside. Having poured off the liquid, wash the precipitated carbonate of zinc with hot water, until the fluid of the washings is nearly tasteless, and dry with a gentle heat.—*Ph. U. S.*) Used to prepare the Zinci oxidum.

ZINCI CARBONAS PRÆPARATUS, Calamina præparata — z. Chloridi liquor, see Burnett's Disinfecting Liquid.

ZINCI CHLO'RIDUM, *Z. chlorure'tum, Zincum chlora'tum* seu *muriat'icum* (*oxydatum*), *Chloride*

or *Chloruret of Zinc*, (F.) *Chlorure de Zinc*. (*Zinc.* in frustulis, ℥ijss; *acid. nitric., cretæ præparat.* ää ℥j; *acid. muriat.* q. s. To the zinc, in the porcelain vessel, add gradually sufficient muriatic acid to dissolve it; strain, add the nitric acid, and evaporate to dryness. Dissolve the dry mass in water, add the chalk, allow the mixture to stand for 24 hours, filter, and again evaporate to dryness.—*Ph. U. S.*) It is very deliquescent in the air, forming the *Butter of Zinc, Buty'rum Zinci*.

Chloride of Zinc is a powerful escharotic, and has been lately employed as an effective antiseptic.

Zinci Chloruretum, Z. chloridum.

Zinci Cyanure'tum, *Z. cyan'idum* seu *Hydrocy'anas* seu *Prus'sias*, *Zincum Cyanogena'tum* seu *Borus'sicum* seu *Zoöt'icum*, *Hydrocy'anate of Zinc*, (F.) *Cyanure de Zinc*. This salt is formed by adding sulphate of zinc to hydrocyanate of potassa so long as any precipitate is thrown down. When dried and calcined at a low heat, the product is a mixture of cyanuret of zinc and of potassium. It has been recommended in nervous cardialgia. Dose, from one-sixteenth to one-twelfth of a grain.

It is chiefly used as a caustic; one part of the chloride being mixed with four, three, or two parts of flour, according to the desired strength, and a few drops of water being added to form a paste.

Zinci Ferrohydrocy'anas, *Zinci ferrocyanure'tum*, *Cyanure'tum Ferrozin'cicum*, *Zincum Ferrohydrocyan'icum*, *Ferrohydrocyanate of Zinc*. Made by the mutual decomposition of boiling-hot solutions of sulphate of zinc and ferrocyanate of potassa. It has been recommended in the same cases as the last preparation.

Zinci Hydrocyanas, Zinci cyanuretum.

Zinci Iod'idum, *Z. Iodure'tum*, *Zincum Ioda'tum*, *Iode'tum Zinci* seu *Zin'cicum*, *Protoïodure'tum Zinci*, *Protiode* or *Iod'uret of Zinc*, (F.) *Iodure de Zinc*. This salt is made by boiling together *iodine* and *zinc* to dryness, and subliming. An ointment, composed of a drachm to an ounce of lard, has been used in cases where the external use of iodide of potassium is indicated.

Zinci Iodouretum, Z. iodidum — z. Nix, Zinci oxydum.

Zinci Ox'ydum, *Zincum calcina'tum*, *Nihil Album*, *Lana Philosopho'rum* seu *Philosoph'ica*, *Nix Zinci*, *Nihil Grie'eum*, *Pom'pholyx*, *Oxyd of Zinc*, *Flowers of Zinc*, (F.) *Oxide* ou *Blanc de Zinc*. (Procured by burning zinc in a long, deep crucible, placed so as to collect the sublimate. Also, by exposing the precipitate thrown down from a solution of *sulphate of zinc* by *carbonate of ammonia* to a strong heat, so as to drive off the carbonic acid.—*Ph. U. S.*) It is tonic and antispasmodic; externally, detergent and desiccative. Employed in epilepsy, chorea, &c. For its external use, see Ung. Zinci.

Zinci Oxydum Impurum, Tutia — z. Prussias, Zinci cyanuretum.

Zinci Sulphas, *Sulphate of Zinc*, *Zincum Vitriola'tum*, *Vitrio'lum Album* seu *Goslarien'se* seu *Zinci*, *Sulphas Zin'cicum*, *Gilla Vitrioli* seu *Theophras'ti*, *Sal Vitrioli* seu *Vomito'rium Vitrioli*, *Chalcan'thum Album*, *White Vitriol*, *White Copperas*, (F.) *Sulfate de Zinc*. (*Zinc.* in frustul. ℥iv; *acid. sulphuric.* ℥vj; *aquæ destillat.* Oiv. To the zinc and water, previously introduced into a glass vessel, add by degrees the sulphuric acid, and, when the effervescence shall have ceased, filter the solution through paper; then boil it down till a pellicle begins to form, and set aside to crystallize.—*Ph. U. S.*) The sulphate of zinc is inodorous; taste, styptic. It is in white, semi-transparent, efflorescent crystals; soluble in three parts of water at 60°. It is emetic, tonic, antispasmodic, and, externally, astringent. A nostrum, sold under the name *Antipertus'sis*, and, as its title imports, given in hooping-cough, contains this salt as its chief ingredient. It is emetic. Dose, as an emetic, gr. x to ℥ss; as a tonic, gr. j to ij. Used externally as a collyrium, gr. j. to water f℥j.

Zinci Valeria'nas, *Zincum valerian'icum*, *Vale'rianate of Zinc*. A salt formed by saturating valerianic acid with freshly prepared carbonate of zinc. It is in pure white, pearly scales, and has been recommended as a tonic in neuralgic diseases, epilepsy, &c. The dose is one or two grains several times a day. It is officinal in the Dublin Pharmacopœia.

ZINCUM, Zinc — z. Borussicum, Zinci cyanuretum—z. Calcinatum, Zinci oxydum—z. Chloratum, Zinci chloridum — z. Cyanogenatum, Zinci cyanuretum — z. Ferrohydrocyanicum, Zinci ferrohydrocyanas — z. Iodatum, Zinci iodidum — z. Muriaticum, Zinci chloridum — z. Valerianicum, Zinci valerianas—z. Vitriolatum, Zinci sulphas—z. Zooticum, Zinci cyanuretum.

ZINGIBER, Amomum zingiber—z. Cassumuniar, see Cassumuniar — z. Cliffordia, see Cassumuniar — z. Germanicum, Arum maculatum — z. Officinale, Amomum zingiber—z. Purpureum, see Cassumuniar — z. Spurium, see Cassumuniar—z. Zerumbet, see Cassumuniar.

ZINGIBERIN, Piperoid.

ZINGRI'TES, *Zingri'tes*. A stone, resembling glass; to which the ancients attributed marvellous properties.

ZINKUM, Zincum.

ZINT, Zincum.

ZINZIBER, Amomum zingiber.

ZIPHAC, Peritonæum.

ZIRBUS, Epiploon — z. Adipinus, Epiploon, gastro-colic.

ZIZA'NIA AQUATICA, *Wild Rice; Ord.* Gramineæ; called by the Indians, *Menomene*, grows abundantly on the marshy margins of the northern lakes and waters of the upper branches of the Mississippi. The grain resembles oats. It furnishes the northern savages and the Canadian traders and hunters with their annual supplies of grain. Ζιζανιον was the ancient name of some wild grain.

ZIZYPHUM, Jujube.

ZIZYPHUS JUJUBA, see Jujube—z. Nitida, see Jujube.

Zizyphus Œnop'lia, *Z. Napeca; Ord.* Rhamnaceæ; common all over India. The fruit is eaten by the natives. It is of a pleasant acid taste. A decoction of the bark of the fresh root is used to promote the healing of fresh wounds.

Zizyphus Sativa, see Jujube — z. Sylvestris, see Jujube.

ZOA'GRIA, from ζωη, 'life,' and *αγρευω*, 'I catch up.' The saving and preservation of life. *Zoösis.* A reward for preserving life; *Soetrum.* A votive offering hung up in the temples for a life saved.

ZOANTHRO'PIA, *Melanchol'ia zoänthro'pia*, from ζωον, 'an animal,' and *ανθρωπος*, 'a man.' A species of monomania, in which the patient believes himself transformed into an animal. Lycanthropia and Cynanthropia belong to this species of monomania.

ZOARA, Insomnia.

ZOE, Life.

ZOGRAPHIA, Zoographia.

ZOIATRIA, Veterinary art.

ZOIATRUS, Hippiater.

ZOMIDIUM, Jus.

ZOMOS, *Consommé*, Jus.

ZONA, Herpes zoster — z. Castitatis, Hymen — z. Ciliaris, Ciliary zone — z. Ignea, Herpes zoster.

ZONA PELLU'CIDA, *Oolem'ma pellu'cidum, Vitellary membrane, Chorion* (of some), (F.) *Vitelline, Membrane vitelline.* The membrane that surrounds the yolk in the mammalia is so called on account of its thickness and peculiar transparency.

ZONA SERPIGINOSA, Herpes zoster.

ZONA TENDINO'SA. The whitish circle around the auriculo-ventricular orifice of the right side of the heart.

ZONA VIRGINITATIS, Hymen.

ZONE, Cingulum.

ZONULA CILIARIS, see Ciliary, and Ciliary zone — z. Cochleæ, see Lamina spiralis — z. Hildani, Cingulum Hildani — z. Zinnii, see Ciliary zone.

ZOOBIOLOGIA, see Physiology.

ZOÖCHEMIA, Chymistry, animal.

ZOÖCHEM'ICAL, *Zoöchym'ical, Zoöchem'icus, Zoöchym'icus.* Appertaining or having relation to animal chymistry.

ZOÖCHEMY, Chymistry, animal.

ZOÖCHYMY, Chymistry, animal.

ZOÖGENIUM, Azote.

ZOÖG''ENY, *Zoögen'ia, Zoögen'esis*, from ζωον, 'animal,' and γενεσις, 'generation.' The doctrine of animal formation.

ZOÖG'RAPHY, *Zoögra'phia, Zograph'ia*, from ζωον, and γραφη, 'a description.' A descr. tion of animals. The natural history of animals.

ZOÖHEMATINE, Hæmatine.

ZOÖHY'LAS, from ζωον, and 'υλη, 'matter.' Animal matter.

ZOÖHY'LICA CONCREMEN'TA. Concretions formed of animal matter.

ZOÖIASIS, Veterinary art.

ZO'OID, *Zoöi'des, Zoö'des;* from ζωον, 'animal,' and ειδος, 'resemblance.' Resembling or belonging to an animal. Every living cell may be regarded as a Zooid.

ZOÖL'OGIST, *Zoölogis'ta, Zoöl'ogus*, from ζωον, and λογος, 'description.' One skilled in the natural history of animals.

ZOÖL'OGY, *Zoölog''ia.* Same etymon. The natural history of animals.

ZOÖMAGNETISMUS, Magnetism, animal.

ZOÖMYCUS, Mucus.

ZOÖMYXA, Mucus.

ZOÖN, Animal.

ZOÖNOM'IA, *Organozoönom'ia, Zoön'omy*, from ζωον, and νομος, 'law.' The laws which govern the organic actions of animals in general:—*Animal Physiol'ogy, Zoophysiolog''ia.*

ZOONOSOLOG''IA, from ζωον, νοσος, 'a disease,' and λογος, 'a description.' The nosology of animals.

ZOÖPATHOLOG''IA, from ζωον, παθος, 'a disease,' and λογος, 'a description.' The pathology of animals.

ZOÖPH'AGOUS, *Zoöph'agus*, (F.) *Zoöphage*, from ζωον, and φαγω, 'I eat.' Feeding on animals. Carnivorous.

ZOÖPHTHALMUS, Hydrophthalmia.

ZOÖPHYSIOLOGIA, Physiology, animal, Zoonomia.

ZO'ÖPHYTE, *Zoöph'ytum, Phytozo'ön, Animal plant*, from ζωον, and φυτον, 'a plant.' A name given to the lowest class of animals, which seem to form the transition between the animal and the vegetable kingdoms.

ZOÖSIS, Animation, Zoagria.

ZOÖSPERMATA, Spermatozoa.

ZOÖSPERMES, Spermatozoa.

ZOOTHAP'SIS, from ζωη, 'life,' and θαπτω, 'I inter.' Burial alive. Premature interment.

ZOOT'OMIST, *Zootom'icus.* Same etymon as the next. One who dissects animals.

ZOOT'OMY, *Zoötom'ia*, from ζωον, and τεμνω, 'I cut.' *Anatom'ia anima'lis* seu *comparati'va* seu *compara'ta, Theriot'omy, Compar'ative Anatomy.* The anatomy of animals. Animal anatomy.

ZOPISSA, see Pinus sylvestris.

ZOPYRON, Fomites.

ZOSTER, Herpes zoster.

ZOSTERA MARINA, Pila marina — z. Maritima, Pila marina.

ZOSTÈRE, Pila marina.

ZOUZINETTE, Narcissus pseudonarcissus.

ZOZAR, Saccharum.

ZUCARO, Saccharum.

ZUCCARUM, Saccharum.

ZUCHAR, Saccharum.

ZUCHARUM, Saccharum.

ZUCHRA, Saccharum.

ZULAPIUM, Julep.

ZYGAPOPHYSES, see Vertebræ.

ZYGOMA, Malæ os.

ZYGOMAT'IC, *Zygomat'icus, Juga'lis, Jugal*, (F.) *Zygomatique.* That which relates to the *zygoma* or cheek-bone.

ZYGOMATIC ARCH, see Zygomatic process — z. Bone, Malæ os.

ZYGOMATIC FOSSA is the space included between the posterior margin of the outer ala of the pterygoid process, and the crista which descends from the malar tuberosity to the superior alveolar margin.

ZYGOMATIC MUSCLES are two in number. 1. *Zygomat'icus major, Distort'or Oris*, (F.) *Zygomato-labial* (Ch.), *Muscle grand zygomatique*, which is situate obliquely at the fore-part and sides of the face. It is a small, rounded muscle; arises from the outer surface of the os malæ, and is inserted at the commissure of the lips, which it raises and draws outwards. It acts principally in laughing. 2. *Zygomat'icus minor*, (F.) *Petit Zygomato-labial*, (Ch.), *Petit Zygomatique*, does not always exist. It is situate on the inner side of the last; arises from the outer surface of the os malæ, and is inserted at the corner of the mouth, or rather into the upper lip, which it raises and draws outwards.

ZYGOMATIC PROCESS, *Proces'sus zygomat'icus, Apoph'ysis Zygomat'ica, Malar* or *Jugal process*, (F.) *Apophyse Zygomatique*, arises from the outer surface of the temporal bone by two roots, one of which is transverse, (*Condyle du temporal*, Ch.,) and the other longitudinal: between them is the glenoid cavity. The process passes forwards, and is articulated with the posterior angle of the os malæ, with which it forms a bony bridge, called the *Zygomat'ic arch, Arcus* seu *Pons zygomat'icus*, (F.) *Arcade Zygomatique.* The cavity, beneath this bridge, is sometimes called *Zygo'ma.*

ZYGOMATIC SUTURE is placed between the zygomatic parts of the temporal and cheek bones; and slants obliquely downwards and backwards.

ZYGOMATIQUE, Zygomatic—*z. Grand*, Zygomaticus major — *z. Petit*, Zygomaticus minor.

ZYGOMATO-LABIAL, Zygomaticus major—*z. Labial, petit*, Zygomaticus major—*z. Maxillaire*, Masseter—*z. Oriculaire*, Anterior auris.

ZYGOPHYL'LUM FABA'GO, (F.) *Fabagelle. Ord.* Zygophyllaceæ. A Syrian and Mauritanic plant, possessed of an acrid and bitter taste. It has vermifuge properties. The Arabs believe that the recently expressed juice of *Zygophyllum simplex*, is capable of removing specks from the cornea.

ZYMA, Ferment.

ZYMOMA, Ferment

ZYMOSIS, Fermentation, see Zymotic.

ZYMOT'IC, *Zymot'icus*, (F.) *Zymotique*, from ζυμοω, 'to ferment.' Relating or appertaining to fermentation. A *zymotic disease* is any epidemic, endemic, contagious or sporadic affection, which is produced by some morbific principle acting on the organism similar to a ferment—as the major exanthemata, pyohæmia, &c. *Zymoses* has been used by some to signify such affections.

ZYTHOGALA, Posset.

ZYTHUM, Cerevisia.

ZYTHUS, Cerevisia.

THE END

BLANCHARD & LEA'S
MEDICAL AND SURGICAL PUBLICATIONS.

TO THE MEDICAL PROFESSION.

The greatly enhanced cost of materials and labor has at length obliged us to make a small increase in the price of some of our books, and we have been forced in a few instances to change the style of binding from leather to cloth, in consequence of the increased difficulty of procuring a full supply of the superior quality of leather which we require for our publications. We have made these changes with reluctance, and can only hope that we may not be forced to further modifications by a continued increase of cost.

BLANCHARD & LEA.

PHILADELPHIA, September, 1863.

*** We have recently issued an ILLUSTRATED CATALOGUE of Medical and Scientific Publications, forming an octavo pamphlet of 80 large pages, containing specimens of illustrations, notices of the medical press, &c. &c. It has been prepared without regard to expense, and will be found one of the handsomest specimens of typographical execution as yet presented in this country. Copies will be sent to any address, by mail, free of postage, on receipt of nine cents in stamps.

Catalogues of our numerous publications in miscellaneous and educational literature forwarded on application.

☞ The attention of physicians is especially solicited to the following important new works and new editions, just issued or nearly ready:—

Bowman's Medical Chemistry, a new edition,	See page	4
Barclay on Medical Diagnosis, second edition,	"	5
Brande and Taylor's Chemistry,	"	6
Dalton's Human Physiology, 2d edition,	"	11
Dunglison's Medical Dictionary, a revised edition,	"	12
Erichsen's System of Surgery, a revised edition,	"	14
Flint on the Heart,	"	14
Gross's System of Surgery, second edition,	"	16
Gray's Anatomy, Descriptive and Surgical, 2d edition,	"	17
Hamilton on Fractures and Dislocations, second edition,	"	18
Hodge on Diseases of Women,	"	19
Meigs' Obstetrics, fourth edition,	"	21
Parrish's Practical Pharmacy, a new edition,	"	25
Stillé's Therapeutics and Materia Medica,	"	27
Simpson on Diseases of Women,	"	27
Sargent's Minor Surgery, new edition,	"	28
Watson's Practice of Physic,	"	30
Wilson on the Skin, fifth edition,	"	31
West on Diseases of Women, second edition,	"	32

NO INCREASE OF PRICE.

TWO MEDICAL PERIODICALS, FREE OF POSTAGE,

Containing about Fifteen Hundred large octavo pages,

FOR FIVE DOLLARS PER ANNUM.

THE AMERICAN JOURNAL OF THE MEDICAL SCIENCES, subject to postage, when not paid for in advance, - - - - - - - - $5 00

THE MEDICAL NEWS AND LIBRARY, invariably in advance, - - 1 00

OR, BOTH PERIODICALS mailed, FREE OF POSTAGE (as long as the existing rates are maintained), to any post-office in the United States, for Five Dollars remitted in advance.

It will be observed that notwithstanding the great increase in the cost of production, the subscription price has been maintained at the former very moderate rate, which has long rendered them among the

CHEAPEST OF AMERICAN MEDICAL PERIODICALS.

The publishers trust that this course will be responded to by the profession in a liberal increase to the subscription list.

THE AMERICAN JOURNAL OF THE MEDICAL SCIENCES,

EDITED BY ISAAC HAYS, M. D.,

is published Quarterly, on the first of January, April, July, and October. Each number contains about two hundred and eighty large octavo pages, handsomely and appropriately illustrated, wherever necessary. It has now been issued regularly for more than FORTY years, and it has been under the control of the present editor for more than a quarter of a century. Throughout this long period, it has maintained its position in the highest rank of medical periodicals both at home and abroad, and has received the cordial support of the entire profession in this country. Its list of Collaborators will be found to contain a large number of the most distinguished names of the profession in every section of the United States, rendering the department devoted to

ORIGINAL COMMUNICATIONS

full of varied and important matter, of great interest to all practitioners.

As the aim of the Journal, however, is to combine the advantages presented by all the different varieties of periodicals, in its

REVIEW DEPARTMENT

will be found extended and impartial reviews of all important new works, presenting subjects of novelty and interest, together with very numerous

BIBLIOGRAPHICAL NOTICES,

including nearly all the medical publications of the day, both in this country and Great Britain, with a choice selection of the more important continental works. This is followed by the

QUARTERLY SUMMARY,

being a very full and complete abstract, methodically arranged, of the

IMPROVEMENTS AND DISCOVERIES IN THE MEDICAL SCIENCES.

This department of the Journal, so important to the practising physician, is the object of especial care on the part of the editor. It is classified and arranged under different heads, thus facilitating the researches of the reader in pursuit of particular subjects, and will be found to present a very full and accurate digest of all observations, discoveries, and inventions recorded in every branch of medical science. The very extensive arrangements of the publishers are such as to afford to the editor complete materials for this purpose, as he not only regularly receives

ALL THE AMERICAN MEDICAL AND SCIENTIFIC PERIODICALS,

but also twenty or thirty of the more important Journals issued in Great Britain and on the Continent, thus enabling him to present in a convenient compass a thorough and complete abstract of everything interesting or important to the physician occurring in any part of the civilized world.

To their old subscribers, many of whom have been on their list for twenty or thirty years, the publishers feel that no promises for the future are necessary; but those who may desire for the first time to subscribe, can rest assured that no exertion will be spared to maintain the Journal in the high position which it has occupied for so long a period.

By reference to the terms it will be seen that, in addition to this large amount of valuable and practical information on every branch of medical science, the subscriber, by paying in advance, becomes entitled, without further charge, to

THE MEDICAL NEWS AND LIBRARY,

a monthly periodical of thirty-two large octavo pages. Its "NEWS DEPARTMENT" presents the current information of the day, while the "LIBRARY DEPARTMENT" is devoted to presenting standard works on various branches of medicine. Within a few years, subscribers have thus received, without expense, many works of the highest character and practical value, such as "Watson's Practice," "Todd and Bowman's Physiology," "Malgaigne's Surgery," "West on Children," "West on Females, Part I.," "Habershon on the Alimentary Canal," "Simpson on Females, &c.

While the work at present appearing in its columns, commencing January 1, 1863, is

ASTHMA; ITS PATHOLOGY, CAUSES, CONSEQUENCES, AND TREATMENT.

BY H. H. SALTER, M. D., F. R. S., &c.

This work, the result of much experience in the management of a common and exceedingly intractable disease, can hardly fail to give satisfaction to subscribers, and to maintain the practical character of the valuable series of books which have appeared in the pages of the "NEWS."

It will thus be seen that for the small sum of FIVE DOLLARS, paid in advance, the subscriber will obtain a Quarterly and a Monthly periodical,

EMBRACING ABOUT FIFTEEN HUNDRED LARGE OCTAVO PAGES.

Those subscribers who do not pay in advance will bear in mind that their subscription of Five Dollars will entitle them to the Journal only, without the News, and that they will be at the expense of their own postage on the receipt of each number. The advantage of a remittance when ordering the Journal will thus be apparent.

Remittances of subscriptions can be mailed at our risk, when a certificate is taken from the Postmaster that the money is duly inclosed and forwarded.

Address BLANCHARD & LEA, PHILADELPHIA.

ASHTON (T. J.),
Surgeon to the Blenheim Dispensary, &c.

ON THE DISEASES, INJURIES, AND MALFORMATIONS OF THE RECTUM AND ANUS; with remarks on Habitual Constipation. From the third and enlarged London edition. With handsome illustrations. In one very beautifully printed octavo volume, of about 300 pages, extra cloth. $2 00.

The most complete one we possess on the subject.—*Medico-Chirurgical Review.*

We are satisfied, after a careful examination of the volume, and a comparison of its contents with those of its leading predecessors and contemporaries, that the best way for the reader to avail himself of the excellent advice given in the concluding paragraph above, would be to provide himself with a copy of the book from which it has been taken, and diligently to con its instructive pages. They may secure to him many a triumph and fervent blessing.—*Am. Journal Med. Sciences.*

ALLEN (J. M.), M. D.,
Professor of Anatomy in the Pennsylvania Medical College, &c.

THE PRACTICAL ANATOMIST; or, The Student's Guide in the Dissecting-ROOM. With 266 illustrations. In one handsome royal 12mo. volume, of over 600 pages, extra cloth. $2 25.

We believe it to be one of the most useful works upon the subject ever written. It is handsomely illustrated, well printed, and will be found of convenient size for use in the dissecting-room.—*Med. Examiner.*

However valuable may be the "Dissector's Guides" which we, of late, have had occasion to notice, we feel confident that the work of Dr. Allen is superior to any of them. We believe with the author, that none is so fully illustrated as this, and the arrangement of the work is such as to facilitate the labors of the student. We most cordially recommend it to their attention.—*Western Lancet.*

ANATOMICAL ATLAS.

By Professors H. H. SMITH and W. E. HORNER of the University of Pennsylvania. 1 vol. 8vo., extra cloth, with nearly 650 illustrations. ☞ See SMITH, p. 26.

ABEL (F. A.), F. C. S. AND C. L. BLOXAM.

HANDBOOK OF CHEMISTRY, Theoretical, Practical, and Technical; with a Recommendatory Preface by Dr. HOFMANN. In one large octavo volume, extra cloth, of 662 pages, with illustrations. $3 25.

ASHWELL (SAMUEL), M. D.,
Obstetric Physician and Lecturer to Guy's Hospital, London.

A PRACTICAL TREATISE ON THE DISEASES PECULIAR TO WOMEN. Illustrated by Cases derived from Hospital and Private Practice. Third American, from the Third and revised London edition. In one octavo volume, extra cloth, of 528 pages. $3 00.

The most useful practical work on the subject in the English language.—*Boston Med. and Surg. Journal.*

The most able, and certainly the most standard and practical, work on female diseases that we have yet seen.—*Medico-Chirurgical Review.*

ARNOTT (NEILL), M. D.

ELEMENTS OF PHYSICS; or Natural Philosophy, General and Medical. Written for universal use, in plain or non-technical language. A new edition, by ISAAC HAYS, M. D. Complete in one octavo volume, leather, of 484 pages, with about two hundred illustrations. $2 50.

BIRD (GOLDING), A. M., M. D., &c.

URINARY DEPOSITS: THEIR DIAGNOSIS, PATHOLOGY, AND THERAPEUTICAL INDICATIONS. Edited by EDMUND LLOYD BIRKETT, M. D. A new American, from the last and enlarged London edition. With eighty illustrations on wood. In one handsome octavo volume, of about 400 pages, extra cloth. $2 75. (*Just Ready.*)

It can scarcely be necessary for us to say anything of the merits of this well-known Treatise, which so admirably brings into practical application the results of those microscopical and chemical researches regarding the physiology and pathology of the urinary secretion, which have contributed so much to the increase of our diagnostic powers, and to the extension and satisfactory employment of our therapeutic resources. In the preparation of this new edition of his work, it is obvious that Dr. Golding Bird has spared no pains to render it a faithful representation of the present state of scientific knowledge on the subject it embraces.—*British and Foreign Med.-Chir. Review.*

BENNETT (J. HUGHES), M. D., F. R. S. E.,
Professor of Clinical Medicine in the University of Edinburgh, &c.

THE PATHOLOGY AND TREATMENT OF PULMONARY TUBERCULOSIS, and on the Local Medication of Pharyngeal and Laryngeal Diseases frequently mistaken for or associated with, Phthisis. One vol. 8vo., extra cloth, with wood-cuts. pp. 130. $1 25.

BARLOW (GEORGE H.), M. D.
Physician to Guy's Hospital, London, &c.

A MANUAL OF THE PRACTICE OF MEDICINE. With Additions by D. F. CONDIE, M. D., author of "A Practical Treatise on Diseases of Children," &c. In one handsome octavo volume, extra cloth, of over 600 pages. $2 75.

We recommend Dr. Barlow's Manual in the warmest manner as a most valuable vade-mecum. We have had frequent occasion to consult it, and have found it clear, concise, practical, and sound.—*Boston Med. and Surg. Journal.*

BUDD (GEORGE), M. D., F. R. S.,

Professor of Medicine in King's College, London.

ON DISEASES OF THE LIVER. Third American, from the third and enlarged London edition. In one very handsome octavo volume, extra cloth, with four beautifully colored plates, and numerous wood-cuts. pp. 500. $3 00.

Has fairly established for itself a place among the classical medical literature of England.—*British and Foreign Medico-Chir. Review.*

Dr. Budd's Treatise on Diseases of the Liver is now a standard work in Medical literature, and during the intervals which have elapsed between the successive editions, the author has incorporated into the text the most striking novelties which have characterized the recent progress of hepatic physiology and pathology: so that although the size of the book is not perceptibly changed, the history of liver diseases is made more complete, and is kept upon a level with the progress of modern science. It is the best work on Diseases of the Liver in any language.—*London Med. Times and Gazette.*

BUCKNILL (J. C.), M. D., AND DANIEL H. TUKE, M. D.,

Medical Superintendent of the Devon Lunatic Asylum. Visiting Medical Officer to the York Retreat.

A MANUAL OF PSYCHOLOGICAL MEDICINE; containing the History, Nosology, Description, Statistics, Diagnosis, Pathology, and Treatment of INSANITY. With a Plate. In one handsome octavo volume, of 536 pages, extra cloth. $3 00.

The increase of mental disease in its various forms, and the difficult questions to which it is constantly giving rise, render the subject one of daily enhanced interest, requiring on the part of the physician a constantly greater familiarity with this, the most perplexing branch of his profession. At the same time there has been for some years no work accessible in this country, presenting the results of recent investigations in the Diagnosis and Prognosis of Insanity, and the greatly improved methods of treatment which have done so much in alleviating the condition or restoring the health of the insane. To fill this vacancy the publishers present this volume, assured that the distinguished reputation and experience of the authors will entitle it at once to the confidence of both student and practitioner. Its scope may be gathered from the declaration of the authors that "their aim has been to supply a text book which may serve as a guide in the acquisition of such knowledge, sufficiently elementary to be adapted to the wants of the student, and sufficiently modern in its views and explicit in its teaching to suffice for the demands of the practitioner."

BENNETT (HENRY), M. D.

A PRACTICAL TREATISE ON INFLAMMATION OF THE UTERUS, ITS CERVIX AND APPENDAGES, and on its connection with Uterine Disease. To which is added, a Review of the present state of Uterine Pathology. Fifth American, from the third English edition. In one octavo volume, of about 500 pages, extra cloth. $2 00.

BROWN (ISAAC BAKER),

Surgeon-Accoucheur to St. Mary's Hospital, &c.

ON SOME DISEASES OF WOMEN ADMITTING OF SURGICAL TREATMENT. With handsome illustrations. One vol. 8vo., extra cloth, pp. 276. $1 60.

Mr. Brown has earned for himself a high reputation in the operative treatment of sundry diseases and injuries to which females are peculiarly subject. We can truly say of his work that it is an important addition to obstetrical literature. The operative suggestions and contrivances which Mr. Brown describes, exhibit much practical sagacity and skill, and merit the careful attention of every surgeon-accoucheur.—*Association Journal.*

We have no hesitation in recommending this book to the careful attention of all surgeons who make female complaints a part of their study and practice.—*Dublin Quarterly Journal.*

BOWMAN (JOHN E.), M. D.

PRACTICAL HANDBOOK OF MEDICAL CHEMISTRY. Edited by C. L. Bloxam. Third American, from the fourth and revised English Edition. In one neat volume, royal 12mo., extra cloth with numerous illustrations. pp. 351. $1 75. (*Now Ready*, May, 1863.)

Of this well-known handbook we may say that it retains all its old simplicity and clearness of arrangement and description, whilst it has received from the able editor those finishing touches which the progress of chemistry has rendered necessary.—*London Med. Times and Gazette*, Nov. 29, 1862.

Nor is anything hurried over, anything shirked; open the book where you will, you find the same careful treatment of the subject manifested, and the best process for the attainment of the particular object in view lucidly detailed and explained. And this new edition is not merely a reprint of the last. With a laudable desire to keep the book up to the scientific mark of the present age, every improvement in analytical method has been introduced. In conclusion, we would only say that, familiar from long acquaintance with each page of the former issues of this little book, we gladly place beside them another presenting so many acceptable improvements and additions.—*Dublin Medical Press*, Jan. 7, 1863.

BY THE SAME AUTHOR.

INTRODUCTION TO PRACTICAL CHEMISTRY, INCLUDING ANALYSIS. Second American, from the second and revised London edition. With numerous illustrations. In one neat vol., royal 12mo., extra cloth. pp. 298. $1 25.

BEALE ON THE LAWS OF HEALTH IN RELATION TO MIND AND BODY. A Series of Letters from an old Practitioner to a Patient. In one volume, royal 12mo., extra cloth. pp. 296. 80 cents.

BUSHNAN'S PHYSIOLOGY OF ANIMAL AND VEGETABLE LIFE; a Popular Treatise on the Functions and Phenomena of Organic Life. In one handsome royal 12mo. volume, extra cloth, with over 100 illustrations. pp. 234. 80 cents.

BUCKLER ON THE ETIOLOGY, PATHOLOGY, AND TREATMENT OF FIBRO-BRONCHITIS AND RHEUMATIC PNEUMONIA. In one 8vo. volume, extra cloth. pp. 150. $1 25.

BLOOD AND URINE (MANUALS ON). BY JOHN WILLIAM GRIFFITH, G. OWEN REESE, AND ALFRED MARKWICK. One thick volume, royal 12mo., extra cloth, with plates. pp. 460. $1 25.

BRODIE'S CLINICAL LECTURES ON SURGERY. 1 vol. 8vo. cloth. 350 pp. $1 25.

BUMSTEAD (FREEMAN J.) M. D.,

Lecturer on Venereal Diseases at the College of Physicians and Surgeons, New York, &c.

THE PATHOLOGY AND TREATMENT OF VENEREAL DISEASES,

including the results of recent investigations upon the subject. With illustrations on wood. In one very handsome octavo volume, of nearly 700 pages, extra cloth; $3 75.

By far the most valuable contribution to this particular branch of practice that has seen the light within the last score of years. His clear and accurate descriptions of the various forms of venereal disease, and especially the methods of treatment he proposes, are worthy of the highest encomium. In these respects it is better adapted for the assistance of the every-day practitioner than any other with which we are acquainted. In variety of methods proposed, in minuteness of direction, guided by careful discrimination of varying forms and complications, we write down the book as unsurpassed. It is a work which should be in the possession of every practitioner.—*Chicago Med. Journal*. Nov. 1861.

The foregoing admirable volume comes to us, embracing the whole subject of syphilology, resolving many a doubt, correcting and confirming many an entertained opinion, and in our estimation the best, completest, fullest monograph on this subject in our language. As far as the author's labors themselves are concerned, we feel it a duty to say that he has not only exhausted his subject, but he has presented to us, without the slightest hyperbole, the best digested treatise on these diseases in our language. He has carried its literature down to the present moment, and has achieved his task in a manner which cannot but redound to his credit.—*British American Journal*, Oct. 1861.

We believe this treatise will come to be regarded as high authority in this branch of medical practice, and we cordially commend it to the favorable notice of our brethren in the profession. For our own part, we candidly confess that we have received many new ideas from its perusal, as well as modified many views which we have long, and, as we now think erroneously entertained on the subject of syphilis. To sum up all in a few words, this book is one which no practising physician or medical student can very well afford to do without.—*American Med Times*, Nov. 2, 1861.

The whole work presents a complete history of venereal diseases, comprising much interesting and valuable material that has been spread through medical journals within the last twenty years—the period of many experiments and investigations on the subject—the whole carefully digested by the aid of the author's extensive personal experience, and offered to the profession in an admirable form. Its completeness is secured by good plates, which are especially full in the anatomy of the genital organs. We have examined it with great satisfaction, and congratulate the medical profession in America on the nationality of a work that may fairly be called original.—*Berkshire Med. Journal*, Dec. 1861.

One thing, however, we are impelled to say, that we have met with no other book on syphilis, in the English language, which gave so full, clear, and impartial views of the important subjects on which it treats. We cannot, however, refrain from expressing our satisfaction with the full and perspicuous manner in which the subject has been presented, and the careful attention to minute details, so useful—not to say indispensable—in a practical treatise. In conclusion, if we may be pardoned the use of a phrase now become stereotyped, but which we here employ in all seriousness and sincerity, we do not hesitate to express the opinion that Dr. Bumstead's Treatise on Venereal Diseases is a "work without which no medical library will hereafter be considered complete."—*Boston Med. and Surg. Journal*, Sept. 5, 1861.

BARCLAY (A. W.), M. D.,

Assistant Physician to St. George's Hospital, &c.

A MANUAL OF MEDICAL DIAGNOSIS; being an Analysis of the Signs and Symptoms of Disease.

Second American from the second and revised London edition. In one neat octavo volume, extra cloth, of 451 pages. $2 25.

The demand for a second edition of this work shows that the vacancy which it attempts to supply has been recognized by the profession, and that the efforts of the author to meet the want have been successful. The revision which it has enjoyed will render it better adapted than before to afford assistance to the learner in the prosecution of his studies, and to the practitioner who requires a convenient and accessible manual for speedy reference in the exigencies of his daily duties. For this latter purpose its complete and extensive Index renders it especially valuable, offering facilities for immediately turning to any class of symptoms, or any variety of disease.

The task of composing such a work is neither an easy nor a light one; but Dr. Barclay has performed it in a manner which meets our most unqualified approbation. He is no mere theorist; he knows his work thoroughly, and in attempting to perform it, has not exceeded his powers.—*British Med. Journal*.

We venture to predict that the work will be deservedly popular, and soon become, like Watson's Practice, an indispensable necessity to the practitioner.—*N. A. Med. Journal*.

An inestimable work of reference for the young practitioner and student.—*Nashville Med. Journal*.

We hope the volume will have an extensive circulation, not among students of medicine only, but practitioners also. They will never regret a faithful study of its pages.—*Cincinnati Lancet*.

An important acquisition to medical literature. It is a work of high merit, both from the vast importance of the subject upon which it treats, and also from the real ability displayed in its elaboration. In conclusion, let us bespeak for this volume that attention of every student of our art which it so richly deserves – that place in every medical library which it can so well adorn.—*Peninsular Medical Journal*.

BARTLETT (ELISHA), M. D.

THE HISTORY, DIAGNOSIS, AND TREATMENT OF THE FEVERS OF THE UNITED STATES.

A new and revised edition. By Alonzo Clark, M. D., Prof. of Pathology and Practical Medicine in the N. Y. College of Physicians and Surgeons, &c. In one octavo volume, of six hundred pages, extra cloth. Price $3 00.

It is a work of great practical value and interest, containing much that is new relative to the several diseases of which it treats, and, with the additions of the editor, is fully up to the times. The distinctive features of the different forms of fever are plainly and forcibly portrayed, and the lines of demarcation carefully and accurately drawn, and to the American practitioner is a more valuable and safe guide than any work on fever extant.—*Ohio Med. and Surg Journal*.

This excellent monograph on febrile disease, has stood deservedly high since its first publication. It will be seen that it has now reached its fourth edition under the supervision of Prof. A. Clark, a gentleman who, from the nature of his studies and pursuits, is well calculated to appreciate and discuss the many intricate and difficult questions in pathology. His annotations add much to the interest of the work, and have brought it well up to the condition of the science as it exists at the present day in regard to this class of diseases.—*Southern Med and Surg. Journal*.

BRANDE (WM. T.) D. C. L., AND ALFRED S. TAYLOR, M. D., F. R. S.

Of her Majesty's Mint, &c. Professor of Chemistry and Medical Jurisprudence in Guy's Hospital.

CHEMISTRY. In one handsome 8vo. volume of 696 pages, extra cloth. $3 50.

(Now Ready, May, 1863)

"Having been engaged in teaching Chemistry in this Metropolis, the one for a period of forty, and the other for a period of thirty years, it has appeared to us that, in spite of the number of books already existing, there was room for an additional volume, which should be especially adapted for the use of students. In preparing such a volume for the press, we have endeavored to bear in mind, that the student in the present day has much to learn, and but a short time at his disposal for the acquisition of this learning."—AUTHORS' PREFACE.

In reprinting this volume, its passage through the press has been superintended by a competent chemist, who has sedulously endeavored to secure the accuracy so necessary in a work of this nature. No notes or additions have been introduced, but the publishers have been favored by the authors with some corrections and revisions of the first twenty-one chapters, which have been duly inserted.

In so progressive a science as Chemistry, the latest work always has the advantage of presenting the subject as modified by the results of the latest investigations and discoveries. That this advantage has been made the most of, and that the work possesses superior attractions arising from its clearness, simplicity of style, and lucid arrangement, are manifested by the unanimous testimony of the English medical press.

It needs no great sagacity to foretell that this book will be, literally, the Handbook in Chemistry of the student and practitioner. For clearness of language, accuracy of description, extent of information, and freedom from pedantry and mysticism of modern chemistry, no other text-book comes into competition with it. The result is a work which for fulness of matter, for lucidity of arrangement, for clearness of style, is as yet without a rival. And long will it be without a rival. For, although with the necessary advance of chemical knowledge addenda will be required, there will be little to take away. The fundamental excellences of the book will remain, preserving it for years to come, what it now is, the best guide to the study of Chemistry yet given to the world.—*London Lancet,* Dec. 20, 1862.

Most assuredly, time has not abated one whit of the fluency, the vigor, and the clearness with which they not only have composed the work before us, but have, so to say, cleared the ground for it, by hitting right and left at the affectation, mysticism, and obscurity which pervade some late chemical treatises. Thus conceived, and worked out in the most sturdy, common sense method, this book gives, in the clearest and most summary method possible, all the facts and doctrines of chemistry, with more especial reference to the wants of the medical student.—*London Medical Times and Gazette,* Nov. 29, 1862.

If we are not very much mistaken, this book will occupy a place which none has hitherto held among chemists; for, by avoiding the errors of previous authors, we have a work which, for its size, is certainly the most perfect of any in the English language. There are several points to be noted in this volume which separate it widely from any of its compeers—its wide application, not to the medical student only, nor to the student in chemistry merely, but to every branch of science, art, or commerce which is in any way connected with the domain of chemistry.—*London Med. Review,* Feb. 1863.

BARWELL (RICHARD,) F. R. C. S.,

Assistant Surgeon Charing Cross Hospital, &c.

A TREATISE ON DISEASES OF THE JOINTS. Illustrated with engravings on wood. In one very handsome octavo volume, of about 500 pages, extra cloth; $3 00.

At the outset we may state that the work is worthy of much praise, and bears evidence of much thoughtful and careful inquiry, and here and there of no slight originality. We have already carried this notice further than we intended to do, but not to the extent the work deserves. We can only add, that the perusal of it has afforded us great pleasure. The author has evidently worked very hard at his subject, and his investigations into the Physiology and Pathology of Joints have been carried on in a manner which entitles him to be listened to with attention and respect. We must not omit to mention the very admirable plates with which the volume is enriched. We seldom meet with such striking and faithful delineations of disease.—*London Med. Times and Gazette,* Feb. 9, 1861.

This volume will be welcomed, as the record of much honest research and careful investigation into the nature and treatment of a most important class of disorders. We cannot conclude this notice of a valuable and useful book without calling attention to the amount of *bonâ fide* work it contains. It is no slight matter for a volume to show laborious investigation, and at the same time original thought, on the part of its author, whom we may congratulate on the successful completion of his arduous task.—*London Lancet,* March 9, 1861.

CARPENTER (WILLIAM B.), M. D., F. R. S., &c.,

Examiner in Physiology and Comparative Anatomy in the University of London.

THE MICROSCOPE AND ITS REVELATIONS. With an Appendix containing the Applications of the Microscope to Clinical Medicine, &c. By F. G. SMITH, M. D. Illustrated by four hundred and thirty-four beautiful engravings on wood. In one large and very handsome octavo volume, of 724 pages, extra cloth, $4 50.

The great importance of the microscope as a means of diagnosis, and the number of microscopists who are also physicians, have induced the American publishers, with the author's approval, to add an Appendix, carefully prepared by Professor Smith, on the applications of the instrument to clinical medicine, together with an account of American Microscopes, their modifications and accessories. This portion of the work is illustrated with nearly one hundred wood-cuts, and, it is hoped, will adapt the volume more particularly to the use of the American student.

Those who are acquainted with Dr. Carpenter's previous writings on Animal and Vegetable Physiology, will fully understand how vast a store of knowledge he is able to bring to bear upon so comprehensive a subject as the revelations of the microscope; and even those who have no previous acquaintance with the construction or uses of this instrument, will find abundance of information conveyed in clear and simple language.—*Med. Times and Gazette.*

The additions by Prof. Smith give it a positive claim upon the profession, for which we doubt not he will receive their sincere thanks. Indeed, we know not where the student of medicine will find such a complete and satisfactory collection of microscopic facts bearing upon physiology and practical medicine as is contained in Prof. Smith's appendix; and this of itself, it seems to us, is fully worth the cost of the volume.—*Louisville Medical Review.*

CARPENTER (WILLIAM B.), M. D., F. R. S.,

Examiner in Physiology and Comparative Anatomy in the University of London.

PRINCIPLES OF HUMAN PHYSIOLOGY; with their chief applications to Psychology, Pathology, Therapeutics, Hygiene, and Forensic Medicine. A new American, from the last and revised London edition. With nearly three hundred illustrations. Edited, with additions, by FRANCIS GURNEY SMITH, M. D., Professor of the Institutes of Medicine in the Pennsylvania Medical College, &c. In one very large and beautiful octavo volume, of about nine hundred large pages, handsomely printed and strongly bound in leather, with raised bands. $4 75.

For upwards of thirteen years Dr. Carpenter's work has been considered by the profession generally, both in this country and England, as the most valuable compendium on the subject of physiology in our language. This distinction it owes to the high attainments and unwearied industry of its accomplished author. The present edition (which, like the last American one, was prepared by the author himself), is the result of such extensive revision, that it may almost be considered a new work. We need hardly say, in concluding this brief notice, that while the work is indispensable to every student of medicine in this country, it will amply repay the practitioner for its perusal by the interest and value of its contents.—*Boston Med. and Surg. Journal.*

This is a standard work—the text-book used by all medical students who read the English language. It has passed through several editions in order to keep pace with the rapidly growing science of Physiology. Nothing need be said in its praise, for its merits are universally known; we have nothing to say of its defects, for they only appear where the science of which it treats is incomplete.—*Western Lancet.*

The most complete exposition of physiology which any language can at present give.—*Brit. and For. Med.-Chirurg. Review.*

The greatest, the most reliable, and the best book on the subject which we know of in the English language.—*Stethoscope.*

To eulogize this great work would be superfluous. We should observe, however, that in this edition the author has remodelled a large portion of the former, and the editor has added much matter of interest, especially in the form of illustrations. We may confidently recommend it as the most complete work on Human Physiology in our language.—*Southern Med. and Surg. Journal.*

The most complete work on the science in our language.—*Am. Med. Journal.*

The most complete work now extant in our language.—*N. O. Med. Register.*

The best text-book in the language on this extensive subject.—*London Med. Times.*

A complete cyclopædia of this branch of science.—*N. Y. Med. Times.*

The profession of this country, and perhaps also of Europe, have anxiously and for some time awaited the announcement of this new edition of Carpenter's Human Physiology. His former editions have for many years been almost the only text-book on Physiology in all our medical schools, and its circulation among the profession has been unsurpassed by any work in any department of medical science.

It is quite unnecessary for us to speak of this work as its merits would justify. The mere announcement of its appearance will afford the highest pleasure to every student of Physiology, while its perusal will be of infinite service in advancing physiological science.—*Ohio Med. and Surg. Journ.*

BY THE SAME AUTHOR.

ELEMENTS (OR MANUAL) OF PHYSIOLOGY, INCLUDING PHYSIOLOGICAL ANATOMY. Second American, from a new and revised London edition. With one hundred and ninety illustrations. In one very handsome octavo volume, leather. pp. 566. $3 00.

In publishing the first edition of this work, its title was altered from that of the London volume, by the substitution of the word "Elements" for that of "Manual," and with the author's sanction the title of "Elements" is still retained as being more expressive of the scope of the treatise.

BY THE SAME AUTHOR.

PRINCIPLES OF COMPARATIVE PHYSIOLOGY. New American, from the Fourth and Revised London edition. In one large and handsome octavo volume, with over three hundred beautiful illustrations. pp. 752. Extra cloth, $5 25.

This book should not only be read but thoroughly studied by every member of the profession. None are too wise or old, to be benefited thereby. But especially to the younger class would we cordially commend it as best fitted of any work in the English language to qualify them for the reception and comprehension of those truths which are daily being developed in physiology.—*Medical Counsellor.*

Without pretending to it, it is an encyclopedia of the subject, accurate and complete in all respects—a truthful reflection of the advanced state at which the science has now arrived.—*Dublin Quarterly Journal of Medical Science.*

A truly magnificent work—in itself a perfe[illegible] his high reputation.—*Medical Times.*
siological study.—*Ranking's Abstract.*

no man, we believe, could have brought to so successful an issue as Dr. Carpenter. It required in its production a physiologist at once deep[illegible]eneral, the labors of others capable of tak[illegible]materials at critical, and unprejudiced view o[illegible]ious whole. of combining the varied, hete[illegible]e the reader a very his disposal, so as to [illegible]mirable manner in which We feel that this abght, from the most various imperfect idea o[illegible]o its completeness, of the lucid- idea of its[illegible]ing it contains, or of the clearness materi[illegible]only, but the scientific world at large, sequel deeply indebted to Dr. Carpenter for this sat work. It must, indeed, add largely even to

PRINCI[illegible]

BY THE SAME AUTHOR.

PRIZE ESSAY ON THE USE OF ALCOHOLIC LIQUORS IN HEALTH AND DISEASE. New edition, with a Preface by D. F. CONDIE, M. D., and explanations of scientific words. In one neat 12mo. volume, extra cloth. pp. 178. 50 cents.

CONDIE (D. F.), M. D., &c.

A PRACTICAL TREATISE ON THE DISEASES OF CHILDREN. Fifth edition, revised and augmented. In one large volume, 8vo., extra cloth, of over 750 pages. $3 25.

In presenting a new and revised edition of this favorite work, the publishers have only to state that the author has endeavored to render it in every respect "a complete and faithful exposition of the pathology and therapeutics of the maladies incident to the earlier stages of existence—a full and exact account of the diseases of infancy and childhood." To accomplish this he has subjected the whole work to a careful and thorough revision, rewriting a considerable portion, and adding several new chapters. In this manner it is hoped that any deficiencies which may have previously existed have been supplied, that the recent labors of practitioners and observers have been thoroughly incorporated, and that in every point the work will be found to maintain the high reputation it has enjoyed as a complete and thoroughly practical book of reference in infantile affections.

A few notices of previous editions are subjoined.

Dr. Condie's scholarship, acumen, industry, and practical sense are manifested in this, as in all his numerous contributions to science.—*Dr. Holmes's Report to the American Medical Association.*

Taken as a whole, in our judgment, Dr. Condie's Treatise is the one from the perusal of which the practitioner in this country will rise with the greatest satisfaction.—*Western Journal of Medicine and Surgery.*

One of the best works upon the Diseases of Children in the English language.—*Western Lancet.*

We feel assured from actual experience that no physician's library can be complete without a copy of this work.—*N. Y. Journal of Medicine.*

A veritable pædiatric encyclopædia, and an honor to American medical literature.—*Ohio Medical and Surgical Journal.*

We feel persuaded that the American medical profession will soon regard it not only as a very good, but as the VERY BEST "Practical Treatise on the Diseases of Children."—*American Medical Journal*

In the department of infantile therapeutics, the work of Dr. Condie is considered one of the best which has been published in the English language.—*The Stethoscope.*

We pronounced the first edition to be the best work on the diseases of children in the English language, and, notwithstanding all that has been published, we still regard it in that light.—*Medical Examiner.*

The value of works by native authors on the diseases which the physician is called upon to combat, will be appreciated by all; and the work of Dr. Condie has gained for itself the character of a safe guide for students, and a useful work for consultation by those engaged in practice.—*N. Y. Med. Times.*

This is the fourth edition of this deservedly popular treatise. During the interval since the last edition, it has been subjected to a thorough revision by the author; and all new observations in the pathology and therapeutics of children have been included in the present volume. As we said before, we do not know of a better book on diseases of children, and to a large part of its recommendations we yield an unhesitating concurrence.—*Buffalo Med. Journal.*

Perhaps the most full and complete work now before the profession of the United States; indeed, we may say in the English language. It is vastly superior to most of its predecessors.—*Transylvania Med. Journal*

CHRISTISON (ROBERT), M. D., V. P. R. S. E., &c.

A DISPENSATORY; or, Commentary on the Pharmacopœias of Great Britain and the United States; comprising the Natural History, Description, Chemistry, Pharmacy, Actions, Uses, and Doses of the Articles of the Materia Medica. Second edition, revised and improved, with a Supplement containing the most important New Remedies. With copious Additions, and two hundred and thirteen large wood-engravings. By R. EGLESFELD GRIFFITH, M. D. In one very large and handsome octavo volume, extra cloth, of over 1000 pages. $3 50.

COOPER (BRANSBY B.), F. R. S.

LECTURES ON THE PRINCIPLES AND PRACTICE OF SURGERY. In one very large octavo volume, extra cloth, of 750 pages. $3 00.

COLOMBAT DE L'ISERE ON THE DISEASES OF FEMALES, and on the special Hygiene of their Sex. Translated, with many Notes and Additions, by C. D. MEIGS, M. D. Second edition, and improved. In one large volume, octavo, with numerous wood-cuts. pp. 720.

CARSON (JOSEPH),

Professor of Materia Medica and Pharmacy in the Univer.

SYNOPSIS OF THE COURSE OF LECTURES ON AND PHARMACY, delivered in the University of Pennsylvania.

CURLING (T. B.), F. R. S.,

Surgeon to the London Hospital, President of the Hunterian Society, &c.

A PRACTICAL TREATISE ON DISEASES OF THE TESTIS, SPERMATIC CORD, AND SCROTUM. Second American, from the second and enlarged English edition. In one handsome octavo volume, extra cloth, with numerous illustrations. pp. 420. $2 00

CHURCHILL (FLEETWOOD), M. D., M. R. I. A.

ON THE THEORY AND PRACTICE OF MIDWIFERY. A new American from the fourth revised and enlarged London edition. With Notes and Additions, by D. FRANCIS CONDIE, M. D., author of a "Practical Treatise on the Diseases of Children," &c. With 194 illustrations. In one very handsome octavo volume, leather, of nearly 700 large pages. $3 75.

This work has been so long an established favorite, both as a text-book for the learner and as a reliable aid in consultation for the practitioner, that in presenting a new edition it is only necessary to call attention to the very extended improvements which it has received Having had the benefit of two revisions by the author since the last American reprint, it has been materially enlarged, and Dr. Churchill's well-known conscientious industry is a guarantee that every portion has been thoroughly brought up with the latest results of European investigation in all departments of the science and art of obstetrics. The recent date of the last Dublin edition has not left much of novelty for the American editor to introduce, but he has endeavored to insert whatever has since appeared, together with such matters as his experience has shown him would be desirable for the American student, including a large number of illustrations. With the sanction of the author he has added in the form of an appendix, some chapters from a little "Manual for Midwives and Nurses," recently issued by Dr. Churchill, believing that the details there presented can hardly fail to prove of advantage to the junior practitioner. The result of all these additions is that the work now contains fully one-half more matter than the last American edition, with nearly one-half more illustrations, so that notwithstanding the use of a smaller type, the volume contains almost two hundred pages more than before.

No effort has been spared to secure an improvement in the mechanical execution of the work equal to that which the text has received, and the volume is confidently presented as one of the handsomest that has thus far been laid before the American profession; while the very low price at which it is offered should secure for it a place in every lecture-room and on every office table.

A better book in which to learn these important points we have not met than Dr. Churchill's. Every page of it is full of instruction; the opinion of all writers of authority is given on questions of difficulty, as well as the directions and advice of the learned author himself, to which he adds the result of statistical inquiry, putting statistics in their proper place and giving them their due weight, and no more. We have never read a book more free from professional jealousy than Dr. Churchill's. It appears to be written with the true design of a book on medicine, viz: to give all that is known on the subject of which he treats, both theoretically and practically, and to advance such opinions of his own as he believes will benefit medical science, and insure the safety of the patient. We have said enough to convey to the profession that this book of Dr. Churchill's is admirably suited for a book of reference for the practitioner, as well as a text-book for the student, and we hope it may be extensively purchased amongst our readers. To them we most strongly recommend it.—*Dublin Medical Press.*

To bestow praise on a book that has received such marked approbation would be superfluous. We need only say, therefore, that if the first edition was thought worthy of a favorable reception by the medical public, we can confidently affirm that this will be found much more so. The lecturer, the practitioner, and the student, may all have recourse to its pages, and derive from their perusal much interest and instruction in everything relating to theoretical and practical midwifery.—*Dublin Quarterly Journal of Medical Science.*

A work of very great merit, and such as we can confidently recommend to the study of every obstetric practitioner.—*London Medical Gazette.*

Few treatises will be found better adapted as a text-book for the student, or as a manual for the frequent consultation of the young practitioner.—*American Medical Journal.*

Were we reduced to the necessity of having but one work on midwifery, and *permitted to choose*, we would unhesitatingly take Churchill.—*Western Med. and Surg. Journal.*

It is impossible to conceive a more useful and elegant manual than Dr. Churchill's Practice of Midwifery.—*Provincial Medical Journal.*

Certainly, in our opinion, the very best work on the subject which exists.—*N. Y. Annalist.*

No work holds a higher position, or is more deserving of being placed in the hands of the tyro, the advanced student, or the practitioner.—*Medical Examiner.*

Previous editions have been received with marked favor, and they deserved it; but this, reprinted from a very late Dublin edition, carefully revised and brought up by the author to the present time, does present an unusually accurate and able exposition of every important particular embraced in the department of midwifery. * * The clearness, directness, and precision of its teachings, together with the great amount of statistical research which its text exhibits, have served to place it already in the foremost rank of works in this department of remedial science.—*N. O. Med. and Surg. Journal.*

In our opinion, it forms one of the best if not the very best text-book and epitome of obstetric science which we at present possess in the English language.—*Monthly Journal of Medical Science.*

The clearness and precision of style in which it is written, and the great amount of statistical research which it contains, have served to place it in the first rank of works in this department of medical science. —*N. Y. Journal of Medicine.*

This is certainly the most perfect system extant. It is the best adapted for the purposes of a text-book, and that which he whose necessities confine him to one book, should select in preference to all others.—*Southern Medical and Surgical Journal.*

BY THE SAME AUTHOR. (*Lately Published.*)

ON THE DISEASES OF INFANTS AND CHILDREN. Second American Edition, revised and enlarged by the author. Edited, with Notes, by W. V. KEATING, M. D. In one large and handsome volume, extra cloth, of over 700 pages. $3 25.

In preparing this work a second time for the American profession, the author has spared no labor in giving it a very thorough revision, introducing several new chapters, and rewriting others, while every portion of the volume has been subjected to a severe scrutiny. The efforts of the American editor have been directed to supplying such information relative to matters peculiar to this country as might have escaped the attention of the author, and the whole may, therefore, be safely pronounced one of the most complete works on the subject accessible to the American Profession. By an alteration in the size of the page, these very extensive additions have been accommodated without unduly increasing the size of the work.

BY THE SAME AUTHOR.

ESSAYS ON THE PUERPERAL FEVER, AND OTHER DISEASES PECULIAR TO WOMEN. Selected from the writings of British Authors previous to the close of the Eighteenth Century. In one neat octavo volume, extra cloth, of about 450 pages. $2 50.

CHURCHILL (FLEETWOOD), M. D., M. R. I. A., &c.

ON THE DISEASES OF WOMEN; including those of Pregnancy and Childbed.

A new American edition, revised by the Author. With Notes and Additions, by D. Francis Condie, M. D., author of "A Practical Treatise on the Diseases of Children." With numerous illustrations. In one large and handsome octavo volume, extra cloth, of 768 pages. $3 00.

This edition of Dr. Churchill's very popular treatise may almost be termed a new work, so thoroughly has he revised it in every portion. It will be found greatly enlarged, and completely brought up to the most recent condition of the subject, while the very handsome series of illustrations introduced, representing such pathological conditions as can be accurately portrayed, present a novel feature, and afford valuable assistance to the young practitioner. Such additions as appeared desirable for the American student have been made by the editor, Dr. Condie, while a marked improvement in the mechanical execution keeps pace with the advance in all other respects which the volume has undergone, while the price has been kept at the former very moderate rate.

It comprises, unquestionably, one of the most exact and comprehensive expositions of the present state of medical knowledge in respect to the diseases of women that has yet been published.—*Am. Journ. Med. Sciences.*

This work is the most reliable which we possess on this subject; and is deservedly popular with the profession.—*Charleston Med. Journal*, July, 1857.

We know of no author who deserves that approbation, on "the diseases of females," to the same extent that Dr. Churchill does. His, indeed, is the only thorough treatise we know of on the subject; and it may be commended to practitioners and students as a masterpiece in its particular department. —*The Western Journal of Medicine and Surgery.*

As a comprehensive manual for students, or a work of reference for practitioners, it surpasses any other that has ever issued on the same subject from the British press.—*Dublin Quart. Journal.*

DICKSON (S. H.), M. D.,

Professor of Practice of Medicine in the Jefferson Medical College, Philadelphia.

ELEMENTS OF MEDICINE; a Compendious View of Pathology and Therapeutics, or the History and Treatment of Diseases.

Second edition, revised. In one large and handsome octavo volume, of 750 pages, extra cloth. $3 75.

The steady demand which has so soon exhausted the first edition of this work, sufficiently shows that the author was not mistaken in supposing that a volume of this character was needed—an elementary manual of practice, which should present the leading principles of medicine with the practical results, in a condensed and perspicuous manner. Disencumbered of unnecessary detail and fruitless speculations, it embodies what is most requisite for the student to learn, and at the same time what the active practitioner wants when obliged, in the daily calls of his profession, to refresh his memory on special points. The clear and attractive style of the author renders the whole easy of comprehension, while his long experience gives to his teachings an authority everywhere acknowledged. Few physicians, indeed, have had wider opportunities for observation and experience, and few, perhaps, have used them to better purpose As the result of a long life devoted to study and practice, the present edition, revised and brought up to the date of publication, will doubtless maintain the reputation already acquired as a condensed and convenient American text-book on the Practice of Medicine.

DRUITT (ROBERT), M. R. C. S., &c.

THE PRINCIPLES AND PRACTICE OF MODERN SURGERY.

A new and revised American from the eighth enlarged and improved London edition. Illustrated with four hundred and thirty-two wood-engravings. In one very handsomely printed octavo volume, leather, of nearly 700 large pages. $3 75.

A work which like Druitt's Surgery has for so many years maintained the position of a leading favorite with all classes of the profession, needs no special recommendation to attract attention to a revised edition. It is only necessary to state that the author has spared no pains to keep the work up to its well earned reputation of presenting in a small and convenient compass the latest condition of every department of surgery, considered both as a science and as an art; and that the services of a competent American editor have been employed to introduce whatever novelties may have escaped the author's attention, or may prove of service to the American practitioner. As several editions have appeared in London since the issue of the last American reprint, the volume has had the benefit of repeated revisions by the author, resulting in a very thorough alteration and improvement. The extent of these additions may be estimated from the fact that it now contains about one-third more matter than the previous American edition, and that notwithstanding the adoption of a smaller type, the pages have been increased by about one hundred, while nearly two hundred and fifty wood-cuts have been added to the former list of illustrations.

A marked improvement will also be perceived in the mechanical and artistical execution of the work, which, printed in the best style, on new type, and fine paper, leaves little to be desired as regards external finish; while at the very low price affixed it will be found one of the cheapest volumes accessible to the profession.

This popular volume, now a most comprehensive work on surgery, has undergone many corrections, improvements, and additions, and the principles and the practice of the art have been brought down to the latest record and observation. Of the operations in surgery it is impossible to speak too highly. The descriptions are so clear and concise, and the illustrations so accurate and numerous, that the student can have no difficulty, with instrument in hand, and book by his side, over the dead body, in obtaining a proper knowledge and sufficient tact in this much neglected department of medical education.—*British and Foreign Medico-Chirurg. Review*, Jan. 1860.

In the present edition the author has entirely rewritten many of the chapters, and has incorporated the various improvements and additions in modern surgery. On carefully going over it, we find that nothing of real practical importance has been omitted; it presents a faithful epitome of everything relating to surgery up to the present hour. It is deservedly a popular manual, both with the student and practitioner.—*London Lancet*, Nov. 19, 1859.

In closing this brief notice, we recommend as cordially as ever this most useful and comprehensive hand-book. It must prove a vast assistance, not only to the student of surgery, but also to the busy practitioner who may not have the leisure to devote himself to the study of more lengthy volumes.—*London Med. Times and Gazette*, Oct. 22, 1859.

In a word, this eighth edition of Dr. Druitt's Manual of Surgery is all that the surgical student or practitioner could desire.—*Dublin Quarterly Journal of Med. Sciences*, Nov. 1859.

DALTON, JR. (J. C.), M. D.

Professor of Physiology in the College of Physicians, New York.

A TREATISE ON HUMAN PHYSIOLOGY, designed for the use of Students and Practitioners of Medicine.

Second edition, revised and enlarged, with two hundred and seventy-one illustrations on wood. In one very beautiful octavo volume, of 700 pages, extra cloth, $4 00; leather, raised bands, $4 50.

The general favor which has so soon exhausted an edition of this work has afforded the author an opportunity in its revision of supplying the deficiencies which existed in the former volume. This has caused the insertion of two new chapters—one on the Special Senses, the other on Imbibition, Exhalation, and the Functions of the Lymphatic System—besides numerous additions of smaller amount scattered through the work, and a general revision designed to bring it thoroughly up to the present condition of the science with regard to all points which may be considered as definitely settled. A number of new illustrations has been introduced, and the work, it is hoped, in its improved form, may continue to command the confidence of those for whose use it is intended

It will be seen, therefore, that Dr. Dalton's best efforts have been directed towards perfecting his work. The additions are marked by the same features which characterize the remainder of the volume, and render it by far the most desirable text-book on physiology to place in the hands of the student which, so far as we are aware, exists in the English language, or perhaps in any other. We therefore have no hesitation in recommending Dr. Dalton's book for the classes for which it is intended, satisfied as we are that it is better acapted to their use than any other work of the kind to which they have access.—*American Journal of the Med. Sciences*, April, 1861.

It is, therefore, no disparagement to the many books upon physiology, most excellent in their day, to say that Dalton's is the only one that gives us the science as it was known to the best philosophers throughout the world, at the beginning of the current year. It states in comprehensive but concise diction, the facts established by experiment, or other method of demonstration, and details, in an understandable manner, how it is done, but abstains from the discussion of unsettled or theoretical points. Herein it is unique; and these characteristics render it a text-book without a rival, for those who desire to study physiological science as it is known to its most successful cultivators. And it is physiology thus presented that lies at the foundation of correct pathological knowledge; and this in turn is the basis of rational therapeutics; so that pathology, in fact, becomes of prime importance in the proper discharge of our every-day practical duties. —*Cincinnati Lancet*, May, 1861.

Dr. Dalton needs no word of praise from us. He is universally recognized as among the first, if not the very first, of American physiologists now living. The first edition of his admirable work appeared but two years since, and the advance of science, his own original views and experiments, together with a desire to supply what he considered some deficiencies in the first edition, have already made the present one a necessity, and it will no doubt be even more eagerly sought for than the first. That it is not merely a reprint, will be seen from the author's statement of the following principal additions and alterations which he has made. The present, like the first edition, is printed in the highest style of the printer's art, and the illustrations are truly admirable for their clearness in expressing exactly what their author intended.—*Boston Medical and Surgical Journal*, March 28, 1861.

It is unnecessary to give a detail of the additions; suffice it to say, that they are numerous and important, and such as will render the work still more valuable and acceptable to the profession as a learned and original treatise on this all-important branch of medicine. All that was said in commendation of the getting up of the first edition, and the superior style of the illustrations, apply with equal force to this. No better work on physiology can be placed in the hand of the student.—*St. Louis Medical and Surgical Journal*, May, 1861.

These additions, while testifying to the learning and industry of the author, render the book exceedingly useful, as the most complete exposé of a science, of which Dr. Dalton is doubtless the ablest representative on this side of the Atlantic.—*New Orleans Med. Times*, May, 1861.

A second edition of this deservedly popular work having been called for in the short space of two years, the author has supplied deficiencies, which existed in the former volume, and has thus more completely fulfilled his design of presenting to the profession a reliable and precise text-book, and one which we consider the best outline on the subject of which it treats, in any language.—*N. American Medico-Chirurg. Review*, May, 1861.

DUNGLISON, FORBES, TWEEDIE, AND CONOLLY.

THE CYCLOPÆDIA OF PRACTICAL MEDICINE: comprising Treatises on the Nature and Treatment of Diseases, Materia Medica, and Therapeutics, Diseases of Women and Children, Medical Jurisprudence, &c. &c.

In four large super-royal octavo volumes, of 3254 double-columned pages, strongly and handsomely bound, with raised bands. $12 00.

*** This work contains no less than four hundred and eighteen distinct treatises, contributed by sixty-eight distinguished physicians, rendering it a complete library of reference for the country practitioner.

The most complete work on Practical Medicine extant; or, at least, in our language.—*Buffalo Medical and Surgical Journal.*

For reference, it is above all price to every practitioner.—*Western Lancet.*

One of the most valuable medical publications of the day—as a work of reference it is invaluable.—*Western Journal of Medicine and Surgery.*

It has been to us, both as learner and teacher, a work for ready and frequent reference, one in which modern English medicine is exhibited in the most advantageous light.—*Medical Examiner.*

The editors are practitioners of established reputation, and the list of contributors embraces many of the most eminent professors and teachers of London, Edinburgh, Dublin, and Glasgow. It is, indeed, the great merit of this work that the principal articles have been furnished by practitioners who have not only devoted especial attention to the diseases about which they have written, but have also enjoyed opportunities for an extensive practical acquaintance with them and whose reputation carries the assurance of their competency justly to appreciate the opinions of others, while it stamps their own doctrines with high and just authority.—*American Medical Journal.*

DEWEES'S COMPREHENSIVE SYSTEM OF MIDWIFERY. Illustrated by occasional cases and many engravings. Twelfth edition, with the author's last improvements and corrections. In one octavo volume, extra cloth, of 600 pages. $3 20.

DEWEES'S TREATISE ON THE PHYSICAL AND MEDICAL TREATMENT OF CHILDREN. The last edition. In one volume, octavo, extra cloth, 548 pages. $2 80

DEWEES'S TREATISE ON THE DISEASES OF FEMALES. Tenth edition. In one volume, octavo extra cloth, 532 pages, with plates. $3 00.

DUNGLISON (ROBLEY), M. D.,

Professor of Institutes of Medicine in the Jefferson Medical College, Philadelphia.

NEW AND ENLARGED EDITION.

MEDICAL LEXICON; a Dictionary of Medical Science, containing a concise Explanation of the various Subjects and Terms of Anatomy, Physiology, Pathology, Hygiene, Therapeutics, Pharmacology, Pharmacy, Surgery, Obstetrics, Medical Jurisprudence, Dentistry, &c. Notices of Climate and of Mineral Waters; Formulæ for Officinal, Empirical, and Dietetic Preparations, &c. With French and other Synonymes. Revised and very greatly enlarged. In one very large and handsome octavo volume, of 992 double-columned pages, in small type; strongly bound in leather. Price $4 00.

Especial care has been devoted in the preparation of this edition to render it in every respect worthy a continuance of the very remarkable favor which it has hitherto enjoyed. The rapid sale of FIFTEEN large editions, and the constantly increasing demand, show that it is regarded by the profession as the standard authority. Stimulated by this fact, the author has endeavored in the present revision to introduce whatever might be necessary "to make it a satisfactory and desirable—if not indispensable—lexicon, in which the student may search without disappointment for every term that has been legitimated in the nomenclature of the science." To accomplish this, large additions have been found requisite, and the extent of the author's labors may be estimated from the fact that about SIX THOUSAND subjects and terms have been introduced throughout, rendering the whole number of definitions about SIXTY THOUSAND, to accommodate which, the number of pages has been increased by nearly a hundred, notwithstanding an enlargement in the size of the page. The medical press, both in this country and in England, has pronounced the work indispensable to all medical students and practitioners, and the present improved edition will not lose that enviable reputation.

The publishers have endeavored to render the mechanical execution worthy of a volume of such universal use in daily reference. The greatest care has been exercised to obtain the typographical accuracy so necessary in a work of the kind. By the small but exceedingly clear type employed, an immense amount of matter is condensed in its thousand ample pages, while the binding will be found strong and durable. With all these improvements and enlargements, the price has been kept at the former very moderate rate, placing it within the reach of all.

This work, the appearance of the fifteenth edition of which, it has become our duty and pleasure to announce, is perhaps the most stupendous monument of labor and erudition in medical literature. One would hardly suppose after constant use of the preceding editions, where we have never failed to find a sufficiently full explanation of every medical term, that in this edition "*about six thousand subjects and terms have been added*," with a careful revision and correction of the entire work. It is only necessary to announce the advent of this edition to make it occupy the place of the preceding one on the table of every medical man, as it is without doubt the best and most comprehensive work of the kind which has ever appeared.—*Buffalo Med. Journ.*, Jan. 1858.

The work is a monument of patient research, skilful judgment, and vast physical labor, that will perpetuate the name of the author more effectually than any possible device of stone or metal. Dr. Dunglison deserves the thanks not only of the American profession, but of the whole medical world.—*North Am. Medico-Chir. Review*, Jan. 1858.

A Medical Dictionary better adapted for the wants of the profession than any other with which we are acquainted, and of a character which places it far above comparison and competition.—*Am. Journ. Med. Sciences*, Jan. 1858.

We need only say, that the addition of 6,000 new terms, with their accompanying definitions, may be said to constitute a new work, by itself. We have examined the Dictionary attentively, and are most happy to pronounce it unrivalled of its kind. The erudition displayed, and the extraordinary industry which must have been demanded, in its preparation and perfection, redound to the lasting credit of its author, and have furnished us with a volume *indispensable* at the present day, to all who would find themselves *au niveau* with the highest standards of medical information.—*Boston Medical and Surgical Journal*, Dec. 31, 1857.

Good lexicons and encyclopedic works generally, are the most labor-saving contrivances which literary men enjoy; and the labor which is required to produce them in the perfect manner of this example is something appalling to contemplate. The author tells us in his preface that he has added about six thousand terms and subjects to this edition, which, before, was considered universally as the best work of the kind in any language.—*Silliman's Journal*, March, 1858.

He has razed his gigantic structure to the foundations, and remodelled and reconstructed the entire pile. No less than *six thousand* additional subjects and terms are illustrated and analyzed in this new edition, swelling the grand aggregate to beyond sixty thousand! Thus is placed before the profession a complete and thorough exponent of medical terminology, without rival or possibility of rivalry. —*Nashville Journ. of Med. and Surg.*, Jan. 1858.

It is universally acknowledged, we believe, that this work is incomparably the best and most complete Medical Lexicon in the English language. The amount of labor which the distinguished author has bestowed upon it is truly wonderful, and the learning and research displayed in its preparation are equally remarkable. Comment and commendation are unnecessary, as no one at the present day thinks of purchasing any other Medical Dictionary than this.—*St. Louis Med. and Surg. Journ.*, Jan. 1858.

It is the foundation stone of a good medical library, and should always be included in the first list of books purchased by the medical student.—*Am. Med. Monthly*, Jan. 1858.

A very perfect work of the kind, undoubtedly the most perfect in the English language.—*Med. and Surg. Reporter*, Jan. 1858.

It is now emphatically *the* Medical Dictionary of the English language, and for it there is no substitute.—*N. H. Med. Journ.*, Jan. 1858.

It is scarcely necessary to remark that any medical library wanting a copy of Dunglison's Lexicon must be imperfect.—*Cin. Lancet*, Jan. 1858.

We have ever considered it the best authority published, and the present edition we may safely say has no equal in the world.—*Peninsular Med. Journal*, Jan. 1858.

The most complete authority on the subject to be found in any language.—*Va. Med. Journal*, Feb. '58.

BY THE SAME AUTHOR.

THE PRACTICE OF MEDICINE. A Treatise on Special Pathology and Therapeutics. Third Edition. In two large octavo volumes, leather, of 1,500 pages. $6 25.

DUNGLISON (ROBLEY), M. D.,

Professor of Institutes of Medicine in the Jefferson Medical College, Philadelphia.

HUMAN PHYSIOLOGY. Eighth edition. Thoroughly revised and extensively modified and enlarged, with five hundred and thirty-two illustrations. In two large and handsomely printed octavo volumes, extra cloth, of about 1500 pages. $7 00.

In revising this work for its eighth appearance, the author has spared no labor to render it worthy a continuance of the very great favor which has been extended to it by the profession. The whole contents have been rearranged, and to a great extent remodelled; the investigations which of late years have been so numerous and so important, have been carefully examined and incorporated, and the work in every respect has been brought up to a level with the present state of the subject. The object of the author has been to render it a concise but comprehensive treatise, containing the whole body of physiological science, to which the student and man of science can at all times refer with the certainty of finding whatever they are in search of, fully presented in all its aspects; and on no former edition has the author bestowed more labor to secure this result.

We believe that it can truly be said, no more complete repertory of facts upon the subject treated, can anywhere be found. The author has, moreover, that enviable tact at description and that facility and ease of expression which render him peculiarly acceptable to the casual, or the studious reader. This faculty, so requisite in setting forth many graver and less attractive subjects, lends additional charms to one always fascinating.—*Boston Med. and Surg. Journal.*

The most complete and satisfactory system of Physiology in the English language.—*Amer. Med. Journal.*

The best work of the kind in the English language.—*Silliman's Journal.*

The present edition the author has made a perfect mirror of the science as it is at the present hour. As a work upon physiology proper, the science of the functions performed by the body, the student will find it all he wishes.—*Nashville Journ. of Med.*

That he has succeeded, most admirably succeeded in his purpose, is apparent from the appearance of an eighth edition. It is now the great encyclopædia on the subject, and worthy of a place in every physician's library.—*Western Lancet.*

BY THE SAME AUTHOR. (*A new edition.*)

GENERAL THERAPEUTICS AND MATERIA MEDICA; adapted for a Medical Text-book. With Indexes of Remedies and of Diseases and their Remedies. SIXTH EDITION, revised and improved. With one hundred and ninety-three illustrations. In two large and handsomely printed octavo vols., extra cloth, of about 1100 pages. $6 00.

In announcing a new edition of Dr. Dunglison's General Therapeutics and Materia Medica, we have no words of commendation to bestow upon a work whose merits have been heretofore so often and so justly extolled. It must not be supposed, however, that the present is a mere reprint of the previous edition; the character of the author for laborious research, judicious analysis, and clearness of expression, is fully sustained by the numerous additions he has made to the work, and the careful revision to which he has subjected the whole.—*N. A. Medico-Chir. Review*, Jan. 1858.

The work will, we have little doubt, be bought and read by the majority of medical students; its size, arrangement, and reliability recommend it to all; no one, we venture to predict, will study it without profit, and there are few to whom it will not be in some measure useful as a work of reference. The young practitioner, more especially, will find the copious indexes appended to this edition of great assistance in the selection and preparation of suitable formulæ.—*Charleston Med. Journ. and Review*, Jan. 1858.

BY THE SAME AUTHOR. (*A new Edition.*)

NEW REMEDIES, WITH FORMULÆ FOR THEIR PREPARATION AND ADMINISTRATION. Seventh edition, with extensive Additions. In one very large octavo volume, extra cloth, of 770 pages. $3 75.

One of the most useful of the author's works.—*Southern Medical and Surgical Journal.*

This elaborate and useful volume should be found in every medical library, for as a book of reference, for physicians, it is unsurpassed by any other work in existence, and the double index for diseases and for remedies, will be found greatly to enhance its value.—*New York Med. Gazette.*

The great learning of the author, and his remarkable industry in pushing his researches into every source whence information is derivable, have enabled him to throw together an extensive mass of facts and statements, accompanied by full reference to authorities; which last feature renders the work practically valuable to investigators who desire to examine the original papers.—*The American Journal of Pharmacy.*

ELLIS (BENJAMIN), M. D.

THE MEDICAL FORMULARY: being a Collection of Prescriptions, derived from the writings and practice of many of the most eminent physicians of America and Europe. Together with the usual Dietetic Preparations and Antidotes for Poisons. To which is added an Appendix, on the Endermic use of Medicines, and on the use of Ether and Chloroform. The whole accompanied with a few brief Pharmaceutic and Medical Observations. Eleventh edition, revised and much extended by ROBERT P. THOMAS, M. D., Professor of Materia Medica in the Philadelphia College of Pharmacy. In one volume, 8vo. (*Preparing for early publication.*)

This work has been allowed to remain for some time out of print, awaiting the appearance of the new U. S. Pharmacopœia. Immediately on the publication of the latter it will be issued, and those who have been desirous of procuring it may rely upon obtaining an edition thoroughly brought up with all that has appeared of value since the last edition was issued, and fully worthy to maintain the reputation of this old and favorite work.

ERICHSEN (JOHN),

Professor of Surgery in University College, London, &c.

THE SCIENCE AND ART OF SURGERY; BEING A TREATISE ON SURGICAL INJURIES, DISEASES, AND OPERATIONS.

New and improved American, from the second enlarged and carefully revised London edition. Illustrated with over four hundred engravings on wood. In one large and handsome octavo volume, of one thousand closely printed pages, leather, raised bands. $5 00.

The very distinguished favor with which this work has been received on both sides of the Atlantic has stimulated the author to render it even more worthy of the position which it has so rapidly attained as a standard authority. Every portion has been carefully revised, numerous additions have been made, and the most watchful care has been exercised to render it a complete exponent of the most advanced condition of surgical science. In this manner the work has been enlarged by about a hundred pages, while the series of engravings has been increased by more than a hundred, rendering it one of the most thoroughly illustrated volumes before the profession. The additions of the author having rendered unnecessary most of the notes of the former American editor, but little has been added in this country; some few notes and occasional illustrations have, however, been introduced to elucidate American modes of practice.

It is, in our humble judgment, decidedly the best book of the kind in the English language. Strange that just such books are notofiener produced by public teachers of surgery in this country and Great Britain. Indeed, it is a matter of great astonishment, but no less true than astonishing, that of the many works on surgery republished in this country within the last fifteen or twenty years as text-books for medical students, this is the only one that even approximates to the fulfilment of the peculiar wants of young men just entering upon the study of this branch of the profession.—*Western Jour. of Med. and Surgery.*

Its value is greatly enhanced by a very copious well-arranged index. We regard this as one of the most valuable contributions to modern surgery. To one entering his novitiate of practice, we regard it the most serviceable guide which he can consult. He will find a fulness of detail leading him through every step of the operation, and not deserting him until the final issue of the case is decided.—*Sethoscope.*

Embracing, as will be perceived, the whole surgical domain, and each division of itself almost complete and perfect, each chapter full and explicit, each subject faithfully exhibited, we can only express our estimate of it in the aggregate. We consider it an excellent contribution to surgery, as probably the best single volume now extant on the subject, and with great pleasure we add it to our text-books.—*Nashville Journal of Medicine and Surgery.*

Prof. Erichsen's work, for its size, has not been surpassed; his nine hundred and eight pages, profusely illustrated, are rich in physiological, pathological, and operative suggestions, doctrines, details, and processes; and will prove a reliable resource for information, both to physician and surgeon, in the hour of peril.—*N. O. Med. and Surg. Journal.*

FLINT (AUSTIN), M. D.,

Professor of the Theory and Practice of Medicine in the University of Louisville, &c.

PHYSICAL EXPLORATION AND DIAGNOSIS OF DISEASES AFFECTING THE RESPIRATORY ORGANS.

In one large and handsome octavo volume, extra cloth, 636 pages. $3 00.

We regard it, in point both of arrangement and of the marked ability of its treatment of the subjects, as destined to take the first rank in works of this class. So far as our information extends, it has at present no equal. To the practitioner, as well as the student, it will be invaluable in clearing up the diagnosis of doubtful cases, and in shedding light upon difficult phenomena.—*Buffalo Med. Journal.*

A work of original observation of the highest merit. We recommend the treatise to every one who wishes to become a correct auscultator. Based to a very large extent upon cases numerically examined, it carries the evidence of careful study and discrimination upon every page. It does credit to the author and, through him, to the profession in this country It is, what we cannot call every book upon auscultation, a readable book.—*Am. Jour. Med. Sciences*

This volume belongs to a class of works which confer honor upon their authors and enrich the domain of practical medicine. A cursory examination even will satisfy the scientific physician that Dr. Flint in this treatise has added to medical literature a work based upon original observation, and possessing no ordinary merit.—*N. Y. Journal of Med.*

This is an admirable book, and because of its extraordinary clearness and entire mastery of the subjects discussed, has made itself indispensable to those who are ambitions of a thorough knowledge of physical exploration.—*Nashville Journ of Med.*

The arrangement of the subjects discussed is easy, natural, such as to present the facts in the most forcible light. Where the author has avoided being tediously minute or diffuse, he has nevertheless fully amplified the more important points. In this respect, indeed, his labors will take precedence, and be the means of inviting to this useful department a more general attention.—*O. Med. and Surg. Journ.*

We hope these few extracts taken from Dr. Flint's work may convey some idea of its character and importance. We would, however, advise every physician to at once place it in his library, feeling assured that it may be consulted with great benefit both by young and old.—*Louisville Review.*

BY THE SAME AUTHOR. (*Now Ready.*)

A PRACTICAL TREATISE ON THE DIAGNOSIS, PATHOLOGY, AND TREATMENT OF DISEASES OF THE HEART.

In one neat octavo volume, of about 500 pages, extra cloth. $2 75.

We do not know that Dr. Flint has written anything which is not first rate; but this, his latest contribution to medical literature, in our opinion, surpasses all the others. The work is most comprehensive in its scope, and most sound in the views it enunciates. The descriptions are clear and methodical; the statements are substantiated by facts, and are made with such simplicity and sincerity, that without them they would carry conviction. The style is admirably clear, direct, and free from dryness With Dr. Walshe's excellent treatise before us, we have no hesitation in saying that Dr. Flint's book is the best work on the heart in the English language.—*Boston Med. and Surg. Journal.*

We have thus endeavored to present our readers with a fair analysis of this remarkable work. Preferring to employ the very words of the distinguished author, wherever it was possible, we have essayed to condense into the briefest space a general view of his observations and suggestions, and to direct the attention of our brethren to the abounding stores of valuable matter here collected and arranged for their use and instruction. No medical library will hereafter be considered complete without this volume; and we trust it will promptly find its way into the hands of every American student and physician.—*N. Am. Med. Chir. Review.*

With more than pleasure do we hail the advent of this work, for it fills a wide gap on the list of text-books for our schools, and is, for the practitioner, the most valuable practical work of its kind.—*N. O. Med. News.*

FOWNES (GEORGE), PH. D., &c.

A MANUAL OF ELEMENTARY CHEMISTRY; Theoretical and Practical.

With one hundred and ninety-seven illustrations. Edited by ROBERT BRIDGES, M. D. In one large royal 12mo volume, of 600 pages, extra cloth, $1 65.

The death of the author having placed the editorial care of this work in the practised hands of Drs. Bence Jones and A. W. Hoffman, everything has been done in its revision which experience could suggest to keep it on a level with the rapid advance of chemical science. The additions requisite to this purpose have necessitated an enlargement of the page, notwithstanding which the work has been increased by about fifty pages. At the same time every care has been used to maintain its distinctive character as a condensed manual for the student, divested of all unnecessary detail or mere theoretical speculation. The additions have, of course, been mainly in the department of Organic Chemistry, which has made such rapid progress within the last few years, but yet equal attention has been bestowed on the other branches of the subject—Chemical Physics and Inorganic Chemistry—to present all investigations and discoveries of importance, and to keep up the reputation of the volume as a complete manual of the whole science, admirably adapted for the learner. By the use of a small but exceedingly clear type the matter of a large octavo is compressed within the convenient and portable limits of a moderate sized duodecimo, and at the very low price affixed, it is offered as one of the cheapest volumes before the profession.

Dr. Fownes' excellent work has been universally recognized everywhere in his own and this country, as the best elementary treatise on chemistry in the English tongue, and is very generally adopted, we believe, as the standard text-book in all our colleges, both literary and scientific.—*Charleston Med. Journ. and Review.*

A standard manual, which has long enjoyed the reputation of embodying much knowledge in a small space. The author has achieved the difficult task of condensation with masterly tact. His book is concise without being dry, and brief without being too dogmatical or general.—*Virginia Med. and Surgical Journal.*

The work of Dr. Fownes has long been before the public, and its merits have been fully appreciated as the best text-book on chemistry now in existence. We do not, of course, place it in a rank superior to the works of Brande, Graham, Turner, Gregory, or Gmelin, but we say that, as a work for students, it is preferable to any of them.—*London Journal of Medicine.*

A work well adapted to the wants of the student. It is an excellent exposition of the chief doctrines and facts of modern chemistry. The size of the work, and still more the condensed yet perspicuous style in which it is written, absolve it from the charges very properly urged against most manuals termed popular.—*Edinburgh Journal of Medical Science.*

FISKE FUND PRIZE ESSAYS.—THE EFFECTS OF CLIMATE ON TUBERCULOUS DISEASE. By EDWIN LEE, M. R. C. S., London, and THE INFLUENCE OF PREGNANCY ON THE DEVELOPMENT OF TUBERCLES. By EDWARD WARREN, M. D., of Edenton, N. C. Together in one neat 8vo. volume, extra cloth. $1 00.

FRICK ON RENAL AFFECTIONS; their Diagnosis and Pathology. With illustrations. One volume, royal 12mo., extra cloth. 75 cents.

FERGUSSON (WILLIAM), F. R. S.,

Professor of Surgery in King's College, London, &c.

A SYSTEM OF PRACTICAL SURGERY. Fourth American, from the third and enlarged London edition.

In one large and beautifully printed octavo volume, of about 700 pages, with 393 handsome illustrations, leather. $3 00.

GRAHAM (THOMAS), F. R. S.

THE ELEMENTS OF INORGANIC CHEMISTRY, including the Applications of the Science in the Arts.

New and much enlarged edition, by HENRY WATTS and ROBERT BRIDGES, M. D. Complete in one large and handsome octavo volume, of over 800 very large pages, with two hundred and thirty-two wood-cuts, extra cloth. $4 50.

*** Part II., completing the work from p. 431 to end, with Index, Title Matter, &c., may be had separate, cloth backs and paper sides. Price $2 50.

From Prof. E. N. Horsford, Harvard College.

It has, in its earlier and less perfect editions, been familiar to me, and the excellence of its plan and the clearness and completeness of its discussions, have long been my admiration.

No reader of English works on this science can afford to be without this edition of Prof. Graham's Elements.—*Silliman's Journal*, March, 1863.

From Prof. Wolcott Gibbs, N. Y. Free Academy.

The work is an admirable one in all respects, and its republication here cannot fail to exert a positive influence upon the progress of science in this country.

GRIFFITH (ROBERT E.), M. D., &c.

A UNIVERSAL FORMULARY, containing the methods of Preparing and Administering Officinal and other Medicines.

The whole adapted to Physicians and Pharmaceutists. SECOND EDITION, thoroughly revised, with numerous additions, by ROBERT P. THOMAS, M. D., Professor of Materia Medica in the Philadelphia College of Pharmacy. In one large and handsome octavo volume, extra cloth, of 650 pages, double columns. $3 25.

It was a work requiring much perseverance, and when published was looked upon as by far the best work of its kind that had issued from the American press. Prof. Thomas has certainly "improved," as well as added to this Formulary, and has rendered it additionally deserving of the confidence of pharmaceutists and physicians.—*Am. Journal of Pharmacy.*

We are happy to announce a new and improved edition of this, one of the most valuable and useful works that have emanated from an American pen. It would do credit to any country, and will be found of daily usefulness to practitioners of medicine; it is better adapted to their purposes than the dispensatories.—*Southern Med. and Surg. Journal.*

It is one of the most useful books a country practitioner can possibly have.—*Medical Chronicle.*

This is a work of six hundred and fifty-one pages, embracing all on the subject of preparing and administering medicines that can be desired by the physician and pharmaceutist.—*Western Lancet.*

The amount of useful, every-day matter, for a practicing physician, is really immense.—*Boston Med. and Surg. Journal.*

This edition has been greatly improved by the revision and ample additions of Dr. Thomas, and is now, we believe, one of the most complete works of its kind in any language. The additions amount to about seventy pages, and no effort has been spared to include in them all the recent improvements. A work of this kind appears to us indispensable to the physician, and there is none we can more cordially recommend.—*N. Y. Journal of Medicine.*

GROSS (SAMUEL D.), M. D.,

Professor of Surgery in the Jefferson Medical College of Philadelphia, &c.

Enlarged Edition.

A SYSTEM OF SURGERY: Pathological, Diagnostic, Therapeutic, and Operative. Illustrated by TWELVE HUNDRED AND TWENTY-SEVEN ENGRAVINGS. Second edition, much enlarged and carefully revised. In two large and beautifully printed octavo volumes, of about twenty-two hundred pages; strongly bound in leather. Price $12.

The exhaustion in little more than two years of a large edition of so elaborate and comprehensive a work as this is the best evidence that the author was not mistaken in his estimate of the want which existed of a complete American System of Surgery, presenting the science in all its necessary details and in all its branches. That he has succeeded in the attempt to supply this want is shown not only by the rapid sale of the work, but also by the very favorable manner in which it has been received by the organs of the profession in this country and in Europe, and by the fact that a translation is now preparing in Holland—a mark of appreciation not often bestowed on any scientific work so extended in size.

The author has not been insensible to the kindness thus bestowed upon his labors, and in revising the work for a new edition he has spared no pains to render it worthy of the favor with which it has been received. Every portion has been subjected to close examination and revision; any deficiencies apparent have been supplied, and the results of recent progress in the science and art of surgery have been everywhere introduced; while the series of illustrations has been enlarged by the addition of nearly three hundred wood-cuts, rendering it one of the most thoroughly illustrated works ever laid before the profession. To accommodate these very extensive additions, the work has been printed upon a smaller type, so that notwithstanding the very large increase in the matter and value of the book, its size is more convenient and less cumbrous than before. Every care has been taken in the printing to render the typographical execution unexceptionable, and it is confidently presented as a work in every way worthy of a place in even the most limited library of the practitioner or student.

Has Dr. Gross satisfactorily fulfilled this object? A careful perusal of his volumes enables us to give an answer in the affirmative. Not only has he given to the reader an elaborate and well-written account of his own vast experience, but he has not failed to embody in his pages the opinions and practice of surgeons in this and other countries of Europe. The result has been a work of such completeness, that it has no superior in the systematic treatises on surgery which have emanated from English or Continental authors. It has been justly objected that these have been far from complete in many essential particulars, many of them having been deficient in some of the most important points which should characterize such works Some of them have been elaborate—too elaborate—with respect to certain diseases, while they have merely glanced at, or given an unsatisfactory account of, others equally important to the surgeon. Dr. Gross has avoided this error, and has produced the most complete work that has yet issued from the press on the science and practice of surgery. It is not, strictly speaking, a Dictionary of Surgery, but it gives to the reader all the information that he may require for his treatment of surgical diseases. Having said so much, it might appear superfluous to add another word; but it is only due to Dr. Gross to state that he has embraced the opportunity of transferring to his pages a vast number of engravings from English and other authors, illustrative of the pathology and treatment of surgical diseases. To these are added several hundred original wood-cuts. The work altogether commends itself to the attention of British surgeons, from whom it cannot fail to meet with extensive patronage.—*London Lancet*, Sept. 1, 1860.

Of Dr. Gross's treatise on Surgery we can say no more than that it is the most elaborate and complete work on this branch of the healing art which has ever been published in any country. A systematic work, it admits of no analytical review; but, did our space permit, we should gladly give some extracts from it, to enable our readers to judge of the classical style of the author, and the exhausting way in which each subject is treated.—*Dub Quarterly Journal of Med. Science.*

The work is so superior to its predecessors in matter and extent, as well as in illustrations and style of publication, that we can honestly recommend it as the best work of the kind to be taken home by the young practitioner.—*Am. Med. Journ.*

With pleasure we record the completion of this long-anticipated work. The reputation which the author has for many years sustained, both as a surgeon and as a writer, had prepared us to expect a treatise of great excellence and originality; but we confess we were by no means prepared for the work which is before us—the most complete treatise upon surgery ever published. either in this or any other country, and we might, perhaps, safely say, the most original. There is no subject belonging properly to surgery which has not received from the author a due share of attention. Dr. Gross has supplied a want in surgical literature which has long been felt by practitioners; he has furnished us with a complete practical treatise upon surgery in all its departments As Americans, we are proud of the achievement; as surgeons, we are most sincerely thankful to him for his extraordinary labors in our behalf.—*N. Y. Review and Buffalo Med Journal.*

BY THE SAME AUTHOR.

ELEMENTS OF PATHOLOGICAL ANATOMY. Third edition, thoroughly revised and greatly improved. In one large and very handsome octavo volume, with about three hundred and fifty beautiful illustrations, of which a large number are from original drawings, extra cloth. $4 75.

The very rapid advances in the Science of Pathological Anatomy during the last few years have rendered essential a thorough modification of this work, with a view of making it a correct exponent of the present state of the subject. The very careful manner in which this task has been executed, and the amount of alteration which it has undergone, have enabled the author to say that "with the many changes and improvements now introduced, the work may be regarded almost as a new treatise," while the efforts of the author have been seconded as regards the mechanical execution of the volume, rendering it one of the handsomest productions of the American press.

We most sincerely congratulate the author on the successful manner in which he has accomplished his proposed object. His book is most admirably calculated to fill up a blank which has long been felt to exist in this department of medical literature, and as such must become very widely circulated amongst all classes of the profession.—*Dublin Quarterly Journ. of Med. Science*, Nov. 1857.

We have been favorably impressed with the general manner in which Dr. Gross has executed his task of affording a comprehensive digest of the present state of the literature of Pathological Anatomy, and have much pleasure in recommending his work to our readers, as we believe one well deserving of diligent perusal and careful study.—*Montreal Med. Chron.*, Sept. 1857.

BY THE SAME AUTHOR.

A PRACTICAL TREATISE ON FOREIGN BODIES IN THE AIR-PASSAGES. In one handsome octavo volume, extra cloth, with illustrations. pp. 468. $2 75.

GROSS (SAMUEL D.), M. D.,

Professor of Surgery in the Jefferson Medical College of Philadelphia, &c.

A PRACTICAL TREATISE ON THE DISEASES, INJURIES, AND MALFORMATIONS OF THE URINARY BLADDER, THE PROSTATE GLAND, AND THE URETHRA.

Second Edition, revised and much enlarged, with one hundred and eighty-four illustrations. In one large and very handsome octavo volume, of over nine hundred pages, extra cloth, $4 75.

Philosophical in its design, methodical in its arrangement, ample and sound in its practical details, it may in truth be said to leave scarcely anything to be desired on so important a subject.—*Boston Med. and Surg Journal.*

Whoever will peruse the vast amount of valuable practical information it contains, will, we think, agree with us, that there is no work in the English language which can make any just pretensions to be its equal.—*N. Y. Journal of Medicine.*

A volume replete with truths and principles of the utmost value in the investigation of these diseases.—*American Medical Journal.*

GRAY (HENRY), F. R. S.,

Lecturer on Anatomy at St. George's Hospital, London, &c.

ANATOMY, DESCRIPTIVE AND SURGICAL.

The Drawings by H. V. Carter, M. D., late Demonstrator on Anatomy at St. George's Hospital; the Dissections jointly by the Author and Dr. Carter. Second American, from the second revised and improved London edition. In one magnificent imperial octavo volume, of over 800 pages, with 388 large and elaborate engravings on wood. Price in extra cloth, $6 25; leather, raised bands, $7 00.

The speedy exhaustion of a large edition of this work is sufficient evidence that its plan and execution have been found to present superior practical advantages in facilitating the study of Anatomy. In presenting it to the profession a second time, the author has availed himself of the opportunity to supply any deficiencies which experience in its use had shown to exist, and to correct any errors of detail, to which the first edition of a scientific work on so extensive and complicated a science is liable. These improvements have resulted in some increase in the size of the volume, while twenty-six new wood-cuts have been added to the beautiful series of illustrations which form so distinctive a feature of the work. The American edition has been passed through the press under the supervision of a competent professional man, who has taken every care to render it in all respects accurate, and it is now presented, without any increase of price, as fitted to maintain and extend the popularity which it has everywhere acquired.

With little trouble, the busy practitioner whose knowledge of anatomy may have become obscured by want of practice, may now resuscitate his former anatomical lore, and be ready for any emergency. It is to this class of individuals, and not to the student alone, that this work will ultimately tend to be of most incalculable advantage, and we feel satisfied that the library of the medical man will soon be considered incomplete in which a copy of this work does not exist.—*Madras Quarterly Journal of Med. Science*, July, 1861.

This edition is much improved and enlarged, and contains several new illustrations by Dr. Westmacott. The volume is a complete companion to the dissecting-room, and saves the necessity of the student possessing a variety of "Manuals."—*The London Lancet*, Feb. 9, 1861.

The work before us is one entitled to the highest praise, and we accordingly welcome it as a valuable addition to medical literature. Intermediate in fulness of detail between the treatises of Suarpey and of Wilson, its characteristic merit lies in the number and excellence of the engravings it contains. Most of these are original, of much larger than ordinary size, and admirably executed. The various parts are also lettered after the plan adopted in Holden's Osteology. It would be difficult to over-estimate the advantages offered by this mode of pictorial illustration. Bones, ligaments, muscles, bloodvessels, and nerves are each in turn figured, and marked with their appropriate names; thus enabling the student to comprehend, at a glance, what would otherwise often be ignored, or at any rate, acquired only by prolonged and irksome application. In conclusion, we heartily commend the work of Mr. Gray to the attention of the medical profession, feeling certain that it should be regarded as one of the most valuable contributions ever made to educational literature.—*N. Y. Monthly Review.* Dec. 1859.

In this view, we regard the work of Mr. Gray as far better adapted to the wants of the profession, and especially of the student, than any treatise on anatomy yet published in this country. It is destined, we believe, to supersede all others, both as a manual of dissections, and a standard of reference to the student of general or relative anatomy.—*N. Y. Journal of Medicine*, Nov. 1859.

For this truly admirable work the profession is indebted to the distinguished author of "Gray on the Spleen." The vacancy it fills has been long felt to exist in this country. Mr. Gray writes throughout with both branches of his subject in view. His description of each particular part is followed by a notice of its relations to the parts with which it is connected, and this, too, sufficiently ample for all the purposes of the operative surgeon. After describing the bones and muscles, he gives a concise statement of the fractures to which the bones of the extremities are most liable, together with the amount and direction of the displacement to which the fragments are subjected by muscular action. The section on arteries is remarkably full and accurate. Not only is the surgical anatomy given to every important vessel, with directions for its ligation, but at the end of the description of each arterial trunk we have a useful summary of the irregularities which may occur in its origin, course, and termination.—*N. A. Med. Chir. Review*, Mar. 1859.

Mr. Gray's book, in excellency of arrangement and completeness of execution, exceeds any work on anatomy hitherto published in the English language, affording a complete view of the structure of the human body, with especial reference to practical surgery. Thus the volume constitutes a perfect book of reference for the practitioner, demanding a place in even the most limited library of the physician or surgeon, and a work of necessity for the student to fix in his mind what he has learned by the dissecting knife from the book of nature.—*The Dublin Quarterly Journal of Med. Sciences*, Nov. 1858.

In our judgment, the mode of illustration adopted in the present volume cannot but present many advantages to the student of anatomy. To the zealous disciple of Vesalius, earnestly desirous of real improvement, the book will certainly be of immense value; but, at the same time, we must also confess that to those simply desirous of "cramming" it will be an undoubted godsend. The peculiar value of Mr. Gray's mode of illustration is nowhere more markedly evident than in the chapter on osteology, and especially in those portions which treat of the bones of the head and of their development. The study of these parts is thus made one of comparative ease, if not of positive pleasure; and those bugbears of the student, the temporal and sphenoid bones, are shorn of half their terrors. It is, in our estimation, an admirable and complete text-book for the student, and a useful work of reference for the practitioner; its pictorial character forming a novel element, to which we have already sufficiently alluded.—*Am. Journ. Med. Sci.*, July, 1859.

GIBSON'S INSTITUTES AND PRACTICE OF SURGERY. Eighth edition, improved and altered. With thirty-four plates. In two handsome octavo volumes, containing about 1,000 pages, leather, raised bands. $6 50

GARDNER'S MEDICAL CHEMISTRY, for the use of Students and the Profession. In one royal 12mo. vol., cloth, pp. 396, with wood-cuts. $1.

GLUGE'S ATLAS OF PATHOLOGICAL HISTOLOGY. Translated, with Notes and Additions. by JOSEPH LEIDY, M. D. In one volume, very large imperial quarto, extra cloth, with 320 copper-plate figures, plain and colored, $5 00.

HUGHES' INTRODUCTION TO THE PRACTICE OF AUSCULTATION AND OTHER MODES OF PHYSICAL DIAGNOSIS IN DISEASES OF THE LUNGS AND HEART. Second edition 1 vol. royal 12mo., ex. cloth, pp. 304. $1 00.

HAMILTON (FRANK H.), M. D.,

Professor of Surgery in the Long Island College Hospital.

A PRACTICAL TREATISE ON FRACTURES AND DISLOCATIONS.

Second edition, revised and improved. In one large and handsome octavo volume, of over 750 pages, with nearly 300 illustrations, extra cloth, $4 75. (*Just Ready*, May, 1860.)

The early demand for a new edition of this work shows that it has been successful in securing the confidence of the profession as a standard authority for consultation and reference on its important and difficult subject. In again passing it through the press, the author has taken the opportunity to revise it carefully, and introduce whatever improvements have been suggested by further experience and observation An additional chapter on Gun-shot Fractures will be found to adapt it still more fully to the exigencies of the time.

Among the many good workers at surgery of whom America may now boast not the least is Frank Hastings Hamilton; and the volume before us is (we say it with a pang of wounded patriotism) the best and handiest book on the subject in the English language. It is in vain to attempt a review of it; nearly as vain to seek for any sins, either of commission or omission. We have seen no work on practical surgery which we would sooner recommend to our brother surgeons, especially those of "the services," or those whose practice lies in districts where a man has necessarily to rely on his own unaided resources. The practitioner will find in it directions for nearly every possible accident, easily found and comprehended; and much pleasant reading for him to muse over in the after consideration of his cases.—*Edinburgh Med. Journ* Feb. 1861.

This is a valuable contribution to the surgery of most important affections, and is the more welcome, inasmuch as at the present time we do not possess a single complete treatise on Fractures and Dislocations in the English language. It has remained for our American brother to produce a complete treatise upon the subject, and bring together in a convenient form those alterations and improvements that have been made from time to time in the treatment of these affections. One great and valuable feature in the work before us is the fact that it comprises all the improvements introduced into the practice of both English and American surgery, and though far from omitting mention of our continental neighbors, the author by no means encourages the notion—but too prevalent in some quarters—that nothing is good unless imported from France or Germany. The latter half of the work is devoted to the consideration of the various dislocations and their appropriate treatment, and its merit is fully equal to that of the preceding portion.—*The London Lancet*, May 5, 1860.

It is emphatically *the* book upon the subjects of which it treats, and we cannot doubt that it will continue so to be for an indefinite period of time. When we say, however, that we believe it will at once take its place as the best book for consultation by the practitioner; and that it will form the most complete, available, and reliable guide in emergencies of every nature connected with its subjects; and also that the student of surgery may make it his text-book with entire confidence, and with pleasure also, from its agreeable and easy style—we think our own opinion may be gathered as to its value.—*Boston Medical and Surgical Journal*, March 1, 1860.

The work is concise, judicious, and accurate, and adapted to the wants of the student, practitioner, and investigator, honorable to the author and to the profession.—*Chicago Med. Journal*, March, 1860.

We regard this work as an honor not only to its author, but to the profession of our country. Were we to review it thoroughly, we could not convey to the mind of the reader more forcibly our honest opinion expressed in the few words—we think it the best book of its kind extant. Every man interested in surgery will soon have this work on his desk. He who does not, will be the loser.—*New Orleans Medical News*, March, 1860.

Dr. Hamilton is fortunate in having succeeded in filling the void, so long felt, with what cannot fail to be at once accepted as a model monograph in some respects, and a work of classical authority. We sincerely congratulate the profession of the United States on the appearance of such a publication from one of their number. We have reason to be proud of it as an original work, both in a literary and scientific point of view, and to esteem it as a valuable guide in a most difficult and important branch of study and practice. On every account, therefore, we hope that it may soon be widely known abroad as an evidence of genuine progress on this side of the Atlantic, and further, that it may be still more widely known at home as an authoritative teacher from which every one may profitably learn, and as affording an example of honest, well-directed, and untiring industry in authorship which every surgeon may emulate.—*Am. Med. Journal*, April, 1860.

HOBLYN (RICHARD D.), M. D.

A DICTIONARY OF THE TERMS USED IN MEDICINE AND THE COLLATERAL SCIENCES. A new American edition. Revised, with numerous Additions, by ISAAC HAYS, M. D., editor of the "American Journal of the Medical Sciences." In one large royal 12mo. volume, leather, of over 500 double columned pages. $1 50.

To both practitioner and student, we recommend this dictionary as being convenient in size, accurate in definition, and sufficiently full and complete for ordinary consultation.—*Charleston Med. Journ.*

We know of no dictionary better arranged and adapted. It is not encumbered with the obsolete terms of a bygone age, but it contains all that are now in use; embracing every department of medical science down to the very latest date.—*Western Lancet.*

Hoblyn's Dictionary has long been a favorite with us. It is the best book of definitions we have, and ought always to be upon the student's table.—*Southern Med. and Surg. Journal.*

HOLLAND'S MEDICAL NOTES AND REFLECTIONS. From the third London edition. In one handsome octavo volume, extra cloth. $3.

HORNER'S SPECIAL ANATOMY AND HISTOLOGY. Eighth edition. Extensively revised and modified. In two large octavo volumes, extra cloth, of more than 1000 pages, with over 300 illustrations. $6 00.

HODGE (HUGH L.), M. D.,

Professor of Midwifery and the Diseases of Women and Children in the University of Pennsylvania, &c.

ON DISEASES PECULIAR TO WOMEN, including Displacements of the Uterus. With original illustrations. In one beautifully printed octavo volume, of nearly 500 pages, extra cloth. $3 25.

We will say at once that the work fulfils its object capitally well; and we will moreover venture the assertion that it will inaugurate an improved practice throughout this whole country. The secrets of the author's success are so clearly revealed that the attentive student cannot fail to insure a goodly portion of similar success in his own practice. It is a credit to *all* medical literature; and we add, that the physician who does not place it in his library, and who does not faithfully con its pages, will lose a vast deal of knowledge that would be most useful to himself and beneficial to his patients. *It is a practical work of the highest order of merit;* and it will take rank as such immediately.—*Maryland and Virginia Medical Journal*, Feb. 1861.

This contribution towards the elucidation of the pathology and treatment of some of the diseases peculiar to women, cannot fail to meet with a favorable reception from the medical profession. The character of the particular maladies of which the work before us treats; their frequency, variety, and obscurity; the amount of malaise and even of actual suffering by which they are invariably attended; their obstinacy, the difficulty with which they are overcome, and their disposition again and again to recur—these, taken in connection with the entire competency of the author to render a correct account of their nature, their causes, and their appropriate management—his ample experience, his matured judgment, and his perfect conscientiousness—invest this publication with an interest and value to which few of the medical treatises of a recent date can lay a stronger, if, perchance, an equal claim.—*Am. Journ. Med. Sciences*, Jan. 1861.

Indeed, although no part of the volume is not eminently deserving of perusal and study, we think that the nine chapters devoted to this subject, are especially so, and we know of no more valuable monograph upon the symptoms, prognosis, and management of these annoying maladies than is constituted by this part of the work. We cannot but regard it as one of the most original and most practical works of the day; one which every accoucheur and physician should most carefully read; for we are persuaded that he will arise from its perusal with new ideas, which will induct him into a more rational practice in regard to many a suffering female, who may have placed her health in his hands.—*British American Journal*, Feb. 1861.

Of the many excellences of the work we will not speak at length. We advise all who would acquire a knowledge of the proper management of the maladies of which it treats, to study it with care. The second part is of itself a most valuable contribution to the practice of our art.—*Am. Med. Monthly and New York Review*, Feb. 1861.

The illustrations, which are all original, are drawn to a uniform scale of one-half the natural size.

HABERSHON (S. O.), M. D.,

Assistant Physician to and Lecturer on Materia Medica and Therapeutics at Guy's Hospital, &c.

PATHOLOGICAL AND PRACTICAL OBSERVATIONS ON DISEASES OF THE ALIMENTARY CANAL, ŒSOPHAGUS, STOMACH, CÆCUM, AND INTESTINES. With illustrations on wood. In one handsome octavo volume of 312 pages, extra cloth $1 75.

JONES (T. WHARTON), F. R. S.,

Professor of Ophthalmic Medicine and Surgery in University College, London, &c.

THE PRINCIPLES AND PRACTICE OF OPHTHALMIC MEDICINE AND SURGERY. With one hundred and ten illustrations. Second American from the second and revised London edition, with additions by EDWARD HARTSHORNE, M. D., Surgeon to Wills' Hospital, &c. In one large, handsome royal 12mo. volume, extra cloth, of 500 pages. $1 50.

JONES (C. HANDFIELD), F. R. S., & EDWARD H. SIEVEKING, M.D.,

Assistant Physicians and Lecturers in St. Mary's Hospital, London.

A MANUAL OF PATHOLOGICAL ANATOMY. First American Edition, Revised. With three hundred and ninety-seven handsome wood engravings. In one large and beautiful octavo volume of nearly 750 pages, extra cloth. $3 75.

As a concise text-book, containing, in a condensed form, a complete outline of what is known in the domain of Pathological Anatomy, it is perhaps the best work in the English language. Its great merit consists in its completeness and brevity, and in this respect it supplies a great desideratum in our literature. Heretofore the student of pathology was obliged to glean from a great number of monographs, and the field was so extensive that but few cultivated it with any degree of success. As a simple work of reference, therefore, it is of great value to the student of pathological anatomy, and should be in every physician's library.—*Western Lancet.*

KIRKES (WILLIAM SENHOUSE), M. D.,

Demonstrator of Morbid Anatomy at St. Bartholomew's Hospital, &c.

A MANUAL OF PHYSIOLOGY. A new American, from the third and improved London edition. With two hundred illustrations. In one large and handsome royal 12mo. volume, extra cloth. pp. 586. $2 00.

This is a new and very much improved edition of Dr. Kirkes' well-known Handbook of Physiology. It combines conciseness with completeness, and is, therefore, admirably adapted for consultation by the busy practitioner.—*Dublin Quarterly Journal.*

One of the very best handbooks of Physiology we possess—presenting just such an outline of the science as the student requires during his attendance upon a course of lectures, or for reference whilst preparing for examination.—*Am. Medical Journal.*

Its excellence is in its compactness, its clearness, and its carefully cited authorities. It is the most convenient of text-books. These gentlemen, Messrs. Kirkes and Paget, have the gift of telling us what we want to know, without thinking it necessary to tell us all they know.—*Boston Med. and Surg. Journal.*

For the student beginning this study, and the practitioner who has but leisure to refresh his memory, this book is invaluable, as it contains all that it is important to know.—*Charleston Med. Journal.*

KNAPP'S TECHNOLOGY; or, Chemistry applied to the Arts and to Manufactures. Edited by Dr. RONALDS, Dr. RICHARDSON, and Prof. W. R. JOHNSON. In two handsome 8vo. vols., extra cloth, with about 500 wood-engravings. $6 00.

LAYCOCK'S LECTURES ON THE PRINCIPLES AND METHODS OF MEDICAL OBSERVATION AND RESEARCH. For the Use of Advanced Students and Junior Practitioners. In one royal 12mo. volume, extra cloth. Price $1.

LALLEMAND AND WILSON.

A PRACTICAL TREATISE ON THE CAUSES, SYMPTOMS, AND TREATMENT OF SPERMATORRHŒA. By M. LALLEMAND. Translated and edited by HENRY J. McDOUGALL. Third American edition. To which is added ——— ON DISEASES OF THE VESICULÆ SEMINALES; AND THEIR ASSOCIATED ORGANS. With special reference to the Morbid Secretions of the Prostatic and Urethral Mucous Membrane. By MARRIS WILSON, M. D. In one neat octavo volume, of about 400 pp., extra cloth. $2 00.

LA ROCHE (R.), M. D., &c.

YELLOW FEVER, considered in its Historical, Pathological, Etiological, and Therapeutical Relations. Including a Sketch of the Disease as it has occurred in Philadelphia from 1699 to 1854, with an examination of the connections between it and the fevers known under the same name in other parts of temperate as well as in tropical regions. In two large and handsome octavo volumes of nearly 1500 pages, extra cloth. $7 00.

From Professor S. H. Dickson, Charleston, S. C., September 18, 1855.

A monument of intelligent and well applied research, almost without example. It is, indeed, in itself, a large library, and is destined to constitute the special resort as a book of reference, in the subject of which it treats, to all future time.

We have not time at present, engaged as we are, by day and by night, in the work of combating this very disease, now prevailing in our city, to do more than give this cursory notice of what we consider as undoubtedly the most able and erudite medical publication our country has yet produced. But in view of the startling fact, that this, the most malignant and unmanageable disease of modern times, has for several years been prevailing in our country to a greater extent than ever before; that it is no longer confined to either large or small cities, but penetrates country villages, plantations, and farm-houses; that it is treated with scarcely better success now than thirty or forty years ago; that there is vast mischief done by ignorant pretenders to knowledge in regard to the disease, and in view of the probability that a majority of southern physicians will be called upon to treat the disease, we trust that this able and comprehensive treatise will be very generally read in the south.—*Memphis Med. Recorder.*

BY THE SAME AUTHOR.

PNEUMONIA; its Supposed Connection, Pathological and Etiological, with Autumnal Fevers, including an Inquiry into the Existence and Morbid Agency of Malaria. In one handsome octavo volume, extra cloth, of 500 pages. $3 00.

LAWRENCE (W.), F. R. S., &c.

A TREATISE ON DISEASES OF THE EYE. A new edition, edited, with numerous additions, and 243 illustrations, by ISAAC HAYS, M. D., Surgeon to Will's Hospital, &c. In one very large and handsome octavo volume, of 950 pages, strongly bound in leather with raised bands. $6 00.

LUDLOW (J. L.), M. D.

A MANUAL OF EXAMINATIONS upon Anatomy, Physiology, Surgery, Practice of Medicine, Obstetrics, Materia Medica, Chemistry, Pharmacy, and Therapeutics. To which is added a Medical Formulary. Third edition, thoroughly revised and greatly extended and enlarged. With 370 illustrations. In one handsome royal 12mo. volume, leather, of 816 large pages. $2 50.

We know of no better companion for the student during the hours spent in the lecture room, or to refresh, at a glance, his memory of the various topics *crammed* into his head by the various professors to whom he is compelled to listen.—*Western Lancet*, May, 1857.

LEHMANN (C. G.)

PHYSIOLOGICAL CHEMISTRY. Translated from the second edition by GEORGE E. DAY, M. D., F. R. S., &c., edited by R. E. ROGERS, M. D., Professor of Chemistry in the Medical Department of the University of Pennsylvania, with illustrations selected from Funke's Atlas of Physiological Chemistry, and an Appendix of plates. Complete in two large and handsome octavo volumes, extra cloth, containing 1200 pages, with nearly two hundred illustrations. $6 00.

The work of Lehmann stands unrivalled as the most comprehensive book of reference and information extant on every branch of the subject on which it treats.—*Edinburgh Journal of Medical Science.*

The most important contribution as yet made to Physiological Chemistry.—*Am. Journal Med. Sciences*, Jan. 1856.

BY THE SAME AUTHOR.

MANUAL OF CHEMICAL PHYSIOLOGY. Translated from the German, with Notes and Additions, by J. CHESTON MORRIS, M. D., with an Introductory Essay on Vital Force, by Professor SAMUEL JACKSON, M. D., of the University of Pennsylvania. With illustrations on wood. In one very handsome octavo volume, extra cloth, of 336 pages. $2 25.

From Prof. Jackson's Introductory Essay.

In adopting the handbook of Dr. Lehmann as a manual of Organic Chemistry for the use of the students of the University, and in recommending his original work of PHYSIOLOGICAL CHEMISTRY for their more mature studies, the high value of his researches, and the great weight of his authority in that important department of medical science are fully recognized.

LYONS (ROBERT D.), K. C. C.,

Late Pathologist in-chief to the British Army in the Crimea, &c.

A TREATISE ON FEVER; or, selections from a course of Lectures on Fever.

Being part of a course of Theory and Practice of Medicine. In one neat octavo volume, of 362 pages, extra cloth; $2 00. (*Just Issued.*)

We have great pleasure in recommending Dr. Lyons' work on *Fever* to the attention of the profession. It is a work which cannot fail to enhance the author's previous well-earned reputation, as a diligent, careful, and accurate observer.—*British Med. Journal*, March 2, 1861.

Taken as a whole we can recommend it in the highest terms as well worthy the careful perusal and study of every student and practitioner of medicine. We consider the work a most valuable addition to medical literature, and one destined to wield no little influence over the mind of the profession.—*Med and Surg. Reporter*, May 4, 1861.

This is an admirable work upon the most remarkable and most important class of diseases to which mankind are liable.—*Med. Journ. of N. Carolina*, May, 1861.

MEIGS (CHARLES D.), M. D.,

Lately Professor of Obstetrics, &c. in the Jefferson Medical College, Philadelphia.

OBSTETRICS: THE SCIENCE AND THE ART. Fourth edition, revised and improved.

With one hundred and twenty-nine illustrations. In one beautifully printed octavo volume, leather, of seven hundred and thirty large pages. $4 00. (*Now Ready*, Feb. 1863.)

FROM THE AUTHOR'S PREFACE.

"In this edition I have endeavored to amend the work by changes in its form; by careful corrections of many expressions, and by a few omissions and some additions as to the text.

"The Student will find that I have recast the article on Placenta Prævia, which I was led to do out of my desire to notice certain new modes of treatment which I regarded as not only ill founded as to the philosophy of our department, but dangerous to the people.

"In changing the form of my work by dividing it into paragraphs or sections, numbered from 1 to 959, I thought to present to the reader a common-place book of the whole volume. Such a table of contents ought to prove both convenient and useful to a Student while attending public lectures."

A work which has enjoyed so extensive a reputation and has been received with such general favor, requires only the assurance that the author has labored assiduously to embody in his new edition whatever has been found necessary to render it fully on a level with the most advanced state of the subject. Both as a text-book for the student and as a reliable work of reference for the practitioner, it is therefore to be hoped that the volume will be found worthy a continuance of the confidence reposed in previous editions.

As an elementary treatise—concise, but, withal, clear and comprehensive—we know of no one better adapted for the use of the student; while the young practitioner will find in it a body of sound doctrine, and a series of excellent practical directions, adapted to all the conditions of the various forms of labor and their results, which he will be induced, we are persuaded, again and again to consult, and always with profit. It has seldom been our lot to peruse a work upon the subject, from which we have received greater satisfaction, and which we believe to be better calculated to communicate to the student correct and definite views upon the several topics embraced within the scope of its teachings.—*Am. Journ. Med Sci.*

An author of established merit, a professor of Midwifery, and a practitioner of high reputation and immense experience—we may assuredly regard his work now before us as representing the most advanced state of obstetric science in America up to the time at which he writes. We consider Dr. Meigs' book as a valuable acquisition to obstetric literature, and one that will very much assist the practitioner under many circumstances of doubt and perplexity.—*The Dublin Quarterly Journal.*

These various heads are subdivided so well, so lucidly explained, that a good memory is all that is necessary in order to put the reader in possession of a thorough knowledge of this important subject. Dr. Meigs has conferred a great benefit on the profession in publishing this excellent work.—*St. Louis Medical and Surgical Journal.*

He has an earnest way with him, when speaking of the most elementary subjects, which fixes the attention and adds much value to the work as a text-book for students; indeed it is obviously the result of much practical acquaintance with the art of teaching.—*The British and Foreign Med.-Chirurg. Review.*

We are acquainted with no work on midwifery of greater practical value.—*Boston Med. & Surg. Journ.*

BY THE SAME AUTHOR. (*Just Issued.*)

WOMAN: HER DISEASES AND THEIR REMEDIES. A Series of Lectures to his Class. Fourth and Improved edition.

In one large and beautifully printed octavo volume, extra cloth, of over 700 pages. $3 60.

In other respects, in our estimation, too much cannot be said in praise of this work. It abounds with beautiful passages, and for conciseness, for originality, and for all that is commendable in a work on the diseases of females, it is not excelled, and probably not equalled in the English language. On the whole, we know of no work on the diseases of women which we can so cordially commend to the student and practitioner as the one before us.—*Ohio Med. and Surg. Journal.*

The body of the book is worthy of attentive consideration, and is evidently the production of a clever, thoughtful, and sagacious physician. Dr. Meigs's letters on the diseases of the external organs, contain many interesting and rare cases, and many instructive observations. We take our leave of Dr. Meigs, with a high opinion of his talents and originality.—*The British and Foreign Medico-Chirurgical Review.*

Every chapter is replete with practical instruction, and bears the impress of being the composition of an acute and experienced mind. There is a terseness, and at the same time an accuracy in his description of symptoms, and in the rules for diagnosis, which cannot fail to recommend the volume to the attention of the reader.—*Ranking's Abstract.*

It contains a vast amount of practical knowledge, by one who has accurately observed and retained the experience of many years.—*Dublin Quarterly Journal.*

Full of important matter, conveyed in a ready and agreeable manner.—*St. Louis Med. and Surg. Jour.*

There is an off-hand fervor, a glow, and a warm-heartedness infecting the effort of Dr. Meigs, which is entirely captivating, and which absolutely hurries the reader through from beginning to end. Besides, the book teems with solid instruction, and it shows the very highest evidence of ability, viz., the clearness with which the information is presented. We know of no better test of one's understanding a subject than the evidence of the power of lucidly explaining it. The most elementary, as well as the obscurest subjects, under the pencil of Prof. Meigs, are isolated and made to stand out in such bold relief, as to produce distinct impressions upon the mind and memory of the reader.—*The Charleston Med. Journal.*

MEIGS (CHARLES D.), M. D.,

Lately Professor of Obstetrics, &c., in Jefferson Medical College, Philadelphia.

ON THE NATURE, SIGNS, AND TREATMENT OF CHILDBED FEVER.

In a Series of Letters addressed to the Students of his Class. In one handsome octavo volume, extra cloth, of 365 pages. $2 50.

The instructive and interesting author of this work, whose previous labors have placed his countrymen under deep and abiding obligations, again challenges their admiration in the fresh and vigorous, attractive and racy pages before us. It is a delectable book. * * * This treatise upon childbed fevers will have an extensive sale, being destined, as it deserves, to find a place in the library of every practitioner who scorns to lag in the rear.—*Nashville Journal of Medicine and Surgery.*

BY THE SAME AUTHOR; WITH COLORED PLATES.

A TREATISE ON ACUTE AND CHRONIC DISEASES OF THE NECK OF THE UTERUS.

With numerous plates, drawn and colored from nature in the highest style of art. In one handsome octavo volume, extra cloth. $4 50.

MACLISE (JOSEPH), SURGEON.

SURGICAL ANATOMY.

Forming one volume, very large imperial quarto. With sixty-eight large and splendid Plates, drawn in the best style and beautifully colored. Containing one hundred and ninety Figures, many of them the size of life. Together with copious and explanatory letter-press. Strongly and handsomely bound in extra cloth, being one of the cheapest and best executed Surgical works as yet issued in this country. $11 00.

Gentlemen preparing for service in the field or hospital will find these plates of the highest practical value, either for consultation in emergencies or to refresh their recollection of the dissecting room.

*** The size of this work prevents its transmission through the post-office as a whole, but those who desire to have copies forwarded by mail, can receive them in five parts, done up in stout wrappers. Price $9 00.

One of the greatest artistic triumphs of the age in Surgical Anatomy.—*British American Medical Journal.*

No practitioner whose means will admit should fail to possess it.—*Ranking's Abstract.*

Too much cannot be said in its praise; indeed, we have not language to do it justice.—*Ohio Medical and Surgical Journal.*

The most accurately engraved and beautifully colored plates we have ever seen in an American book—one of the best and cheapest surgical works ever published.—*Buffalo Medical Journal.*

It is very rare that so elegantly printed, so well illustrated, and so useful a work, is offered at so moderate a price.—*Charleston Medical Journal.*

Its plates can boast a superiority which places them almost beyond the reach of competition.—*Medical Examiner.*

Country practitioners will find these plates of immense value.—*N. Y. Medical Gazette.*

A work which has no parallel in point of accuracy and cheapness in the English language.—*N. Y. Journal of Medicine.*

We are extremely gratified to announce to the profession the completion of this truly magnificent work, which, as a whole, certainly stands unrivalled, both for accuracy of drawing, beauty of coloring, and all the requisite explanations of the subject in hand.—*The New Orleans Medical and Surgical Journal.*

This is by far the ablest work on Surgical Anatomy that has come under our observation. We know of no other work that would justify a student, in any degree, for neglect of actual dissection. In those sudden emergencies that so often arise, and which require the instantaneous command of minute anatomical knowledge, a work of this kind keeps the details of the dissecting-room perpetually fresh in the memory.—*The Western Journal of Medicine and Surgery.*

MILLER (HENRY), M. D.,

Professor of Obstetrics and Diseases of Women and Children in the University of Louisville.

PRINCIPLES AND PRACTICE OF OBSTETRICS, &c.; including the Treatment of Chronic Inflammation of the Cervix and Body of the Uterus considered as a frequent cause of Abortion.

With about one hundred illustrations on wood. In one very handsome octavo volume, of over 600 pages, extra cloth. $3 75.

We congratulate the author that the task is done. We congratulate him that he has given to the medical public a work which will secure for him a high and permanent position among the standard authorities on the principles and practice of obstetrics. Congratulations are not less due to the medical profession of this country, on the acquisition of a treatise embodying the results of the studies, reflections, and experience of Prof. Miller.—*Buffalo Medical Journal.*

In fact, this volume must take its place among the standard systematic treatises on obstetrics; a position to which its merits justly entitle it.—*The Cincinnati Lancet and Observer.*

A most respectable and valuable addition to our home medical literature, and one reflecting credit alike on the author and the institution to which he is attached. The student will find in this work a most useful guide to his studies; the country practitioner, rusty in his reading, can obtain from its pages a fair résumé of the modern literature of the science; and we hope to see this American production generally consulted by the profession.—*Va. Med. Journal.*

MACKENZIE (W.), M. D.,

Surgeon Oculist in Scotland in ordinary to Her Majesty, &c. &c.

A PRACTICAL TREATISE ON DISEASES AND INJURIES OF THE EYE.

To which is prefixed an Anatomical Introduction explanatory of a Horizontal Section of the Human Eyeball, by THOMAS WHARTON JONES, F. R. S. From the Fourth Revised and Enlarged London Edition. With Notes and Additions by ADDINELL HEWSON, M. D., Surgeon to Wills Hospital, &c. &c. In one very large and handsome octavo volume, extra cloth, with plates and numerous wood-cuts. $5 25.

The treatise of Dr. Mackenzie indisputably holds the first place, and forms, in respect of learning and research, an Encyclopædia unequalled in extent by any other work of the kind, either English or foreign.—*Dixon on Diseases of the Eye.*

We consider it the duty of every one who has the love of his profession and the welfare of his patient at heart, to make himself familiar with this the most complete work in the English language upon the diseases of the eye.—*Med. Times and Gazette.*

MILLER (JAMES), F. R. S. E.,

Professor of Surgery in the University of Edinburgh, &c.

PRINCIPLES OF SURGERY.

Fourth American, from the third and revised Edinburgh edition. In one large and very beautiful volume, extra cloth, of 700 pages, with two hundred and forty illustrations on wood. $3 75.

BY THE SAME AUTHOR.

THE PRACTICE OF SURGERY.

Fourth American from the last Edinburgh edition. Revised by the American editor. Illustrated by three hundred and sixty-four engravings on wood. In one large octavo volume, extra cloth, of nearly 700 pages. $3 75.

No encomium of ours could add to the popularity of Miller's Surgery. Its reputation in this country is unsurpassed by that of any other work, and, when taken in connection with the author's *Principles of Surgery*, constitutes a whole, without reference to which no conscientious surgeon would be willing to practice his art.—*Southern Med. and Surg. Journal.*

It is seldom that two volumes have ever made so profound an impression in so short a time as the "Principles" and the "Practice" of Surgery by Mr. Miller—or so richly merited the reputation they have acquired. The author is an eminently sensible, practical, and well-informed man, who knows exactly what he is talking about and exactly how to talk it.—*Kentucky Medical Recorder.*

By the almost unanimous voice of the profession, his works, both on the principles and practice of surgery have been assigned the highest rank. If we were limited to but one work on surgery, that one should be Miller's, as we regard it as superior to all others.—*St. Louis Med. and Surg. Journal.*

The author has in this and his "Principles," presented to the profession one of the most complete and reliable systems of Surgery extant. His style of writing is original, impressive, and engaging, energetic, concise, and lucid. Few have the faculty of condensing so much in small space, and at the same time so persistently holding the attention. Whether as a text-book for students or a book of reference for practitioners, it cannot be too strongly recommended.—*Southern Journal of Med. and Physical Sciences.*

MORLAND (W. W.), M. D.,

Fellow of the Massachusetts Medical Society, &c.

DISEASES OF THE URINARY ORGANS;

a Compendium of their Diagnosis, Pathology, and Treatment. With illustrations. In one large and handsome octavo volume, of about 600 pages, extra cloth. $3 50.

Taken as a whole, we can recommend Dr. Morland's compendium as a very desirable addition to the library of every medical or surgical practitioner.—*Brit. and For. Med.-Chir. Rev.*, April, 1859.

Every medical practitioner whose attention has been to any extent attracted towards the class of diseases to which this treatise relates, must have often and sorely experienced the want of some full, yet concise recent compendium to which he could refer. This desideratum has been supplied by Dr. Morland, and it has been ably done. He has placed before us a full, judicious, and reliable digest. Each subject is treated with sufficient minuteness, yet in a succinct, narrational style, such as to render the work one of great interest, and one which will prove in the highest degree useful to the general practitioner.—*N. Y. Journ. of Medicine.*

BY THE SAME AUTHOR.

THE MORBID EFFECTS OF THE RETENTION IN THE BLOOD OF THE ELEMENTS OF THE URINARY SECRETION.

Being the Dissertation to which the Fiske Fund Prize was awarded, July 11, 1861. In one small octavo volume, 83 pages, extra cloth. 75 cents.

MONTGOMERY (W. F.), M. D., M. R. I. A., &c.,

Professor of Midwifery in the King and Queen's College of Physicians in Ireland, &c.

AN EXPOSITION OF THE SIGNS AND SYMPTOMS OF PREGNANCY.

With some other Papers on Subjects connected with Midwifery. From the second and enlarged English edition. With two exquisite colored plates, and numerous wood-cuts. In one very handsome octavo volume, extra cloth, of nearly 600 pages. $3 75.

A book unusually rich in practical suggestions.—*Am. Journal Med. Sciences*, Jan. 1857.

These several subjects so interesting in themselves, and so important, every one of them, to the most delicate and precious of social relations, controlling often the honor and domestic peace of a family, the legitimacy of offspring, or the life of its parent, are all treated with an elegance of diction, fulness of illustrations, acuteness and justice of reasoning, unparalleled in obstetrics, and unsurpassed in medicine. The reader's interest can never flag, so fresh, and vigorous, and classical is our author's style; and one forgets, in the renewed charm of every page, that it, and every line, and every word has been weighed and reweighed through years of preparation; that this is of all others the book of Obstetric Law, on each of its several topics; on all points connected with pregnancy, to be everywhere received as a manual of special jurisprudence, at once announcing fact, affording argument, establishing precedent, and governing alike the juryman, advocate, and judge.—*N. A. Med.-Chir. Review.*

MOHR (FRANCIS), PH. D., AND REDWOOD (THEOPHILUS).

PRACTICAL PHARMACY.

Comprising the Arrangements, Apparatus, and Manipulations of the Pharmaceutical Shop and Laboratory. Edited, with extensive Additions, by Prof. WILLIAM PROCTER, of the Philadelphia College of Pharmacy. In one handsomely printed octavo volume, extra cloth, of 570 pages, with over 500 engravings on wood. $2 75

MAYNE'S DISPENSATORY AND THERAPEUTICAL REMEMBRANCER. With every Practical Formula contained in the three British Pharmacopœias. Edited, with the addition of the Formulæ of the U. S. Pharmacopœia, by R. E. GRIFFITH, M.D. 1 12mo. vol. ex. cl., 300 pp. 75 c.

MALGAIGNE'S OPERATIVE SURGERY, based on Normal and Pathological Anatomy. Translated from the French by FREDERICK BRITTAN, A.B., M.D. With numerous illustrations on wood. In one handsome octavo volume, extra cloth, of nearly six hundred pages. $2 25.

RIGBY (EDWARD), M. D.,

Senior Physician to the General Lying-in Hospital, &c.

A SYSTEM OF MIDWIFERY. With Notes and Additional Illustrations. Second American Edition. One volume octavo, extra cloth, 422 pages. $2 50.

BY THE SAME AUTHOR.

ON THE CONSTITUTIONAL TREATMENT OF FEMALE DISEASES. In one neat royal 12mo. volume, extra cloth, of about 250 pages. $1 00.

RAMSBOTHAM (FRANCIS H.), M. D.

THE PRINCIPLES AND PRACTICE OF OBSTETRIC MEDICINE AND SURGERY, in reference to the Process of Parturition. A new and enlarged edition, thoroughly revised by the Author. With Additions by W. V. KEATING, M. D., Professor of Obstetrics, &c., in the Jefferson Medical College, Philadelphia. In one large and handsome imperial octavo volume, of 650 pages, strongly bound in leather, with raised bands; with sixty-four beautiful Plates, and numerous Wood-cuts in the text, containing in all nearly 200 large and beautiful figures. $5 50.

From Prof. Hodge, of the University of Pa.

To the American public, it is most valuable, from its intrinsic undoubted excellence, and as being the best authorized exponent of British Midwifery. Its circulation will, I trust, be extensive throughout our country.

It is unnecessary to say anything in regard to the utility of this work. It is already appreciated in our country for the value of the matter, the clearness of its style, and the fulness of its illustrations. To the physician's library it is indispensable, while to the student as a text-book, from which to extract the material for laying the foundation of an education on obstetrical science, it has no superior.—*Ohio Med. and Surg. Journal.*

The publishers have secured its success by the truly elegant style in which they have brought it out, excelling themselves in its production, especially in its plates. It is dedicated to Prof. Meigs, and has the emphatic endorsement of Prof. Hodge, as the best exponent of British Midwifery. We know of no text-book which deserves in all respects to be more highly recommended to students, and we could wish to see it in the hands of every practitioner, for they will find it invaluable for reference.—*Med. Gazette.*

RICORD (P.), M. D.

A TREATISE ON THE VENEREAL DISEASE. By JOHN HUNTER, F. R. S. With copious Additions, by PH. RICORD, M. D. Translated and Edited, with Notes, by FREEMAN J. BUMSTEAD, M. D., Lecturer on Venereal at the College of Physicians and Surgeons, New York. Second edition, revised, containing a *résumé* of RICORD'S RECENT LECTURES ON CHANCRE. In one handsome octavo volume, extra cloth, of 550 pages, with eight plates. $3 25.

Every one will recognize the attractiveness and value which this work derives from thus presenting the opinions of these two masters side by side. But, it must be admitted, what has made the fortune of the book, is the fact that it contains the "most complete embodiment of the veritable doctrines of the Hôpital du Midi," which has ever been made public. In conclusion we can say that this is unconstestably the best treatise on syphilis with which we are acquainted, and, as we do not often employ the phrase, we may be excused for expressing the hope that it may find a place in the library of every physician.—*Virginia Med. and Surg. Journal.*

BY THE SAME AUTHOR.

RICORD'S LETTERS ON SYPHILIS. Translated by W. P. LATTIMORE, M. D. In one neat octavo volume, of 270 pages, extra cloth. $2 00.

ROYLE'S MATERIA MEDICA AND THERAPEUTICS; including the Preparations of the Pharmacopœias of London, Edinburgh, Dublin, and of the United States. With many new medicines. Edited by JOSEPH CARSON, M. D. With ninety-eight illustrations. In one large octavo volume, extra cloth, of about 700 pages. $3 00.

SMITH (HENRY H.), M. D., AND HORNER (WILLIAM E.), M. D.

AN ANATOMICAL ATLAS, illustrative of the Structure of the Human Body. In one volume, large imperial octavo, extra cloth, with about six hundred and fifty beautiful figures. $3 50.

The plan of this Atlas, which renders it so peculiarly convenient for the student, and its superb artistical execution, have been already pointed out. We must congratulate the student upon the completion of this Atlas, as it is the most convenient work of the kind that has yet appeared; and we must add, the very beautiful manner in which it is "got up" is so creditable to the country as to be flattering to our national pride.—*American Medical Journal.*

SHARPEY (WILLIAM), M. D., JONES QUAIN, M. D., AND RICHARD QUAIN, F. R. S., &c.

HUMAN ANATOMY. Revised, with Notes and Additions, by JOSEPH LEIDY, M. D., Professor of Anatomy in the University of Pennsylvania. Complete in two large octavo volumes, extra cloth, of about thirteen hundred pages. With over 500 illustrations $6 00.

SOLLY ON THE HUMAN BRAIN; its Structure, Physiology, and Diseases. From the Second and much enlarged London edition. In one octavo volume, extra cloth, of 500 pages, with 120 wood-cuts. $2 00.

SKEY'S OPERATIVE SURGERY. In one very handsome octavo volume, extra cloth, of over 650 pages, with about one hundred wood-cuts. $3 25.

SIMON'S GENERAL PATHOLOGY, as conducive to the Establishment of Rational Principles for the prevention and Cure of Disease. In one octavo volume, extra cloth, of 212 pages. $1 25.

STILLE (ALFRED), M. D.

THERAPEUTICS AND MATERIA MEDICA; a Systematic Treatise on the Action and Uses of Medicinal Agents, including their Description and History. In two large and handsome octavo volumes, of 1789 pages, leather. $8 00.

This work is designed especially for the student and practitioner of medicine, and treats the various articles of the Materia Medica from the point of view of the bedside, and not of the shop or of the lecture-room. While thus endeavoring to give all practical information likely to be useful with respect to the employment of special remedies in special affections, and the results to be anticipated from their administration, a copious Index of Diseases and their Remedies renders the work eminently fitted for reference by showing at a glance the different means which have been employed, and enabling the practitioner to extend his resources in difficult cases with all that the experience of the profession has suggested.

Rarely, indeed, have we had submitted to us a work on medicine so ponderous in its dimensions as that now before us, and yet so fascinating in its contents. It is, therefore, with a peculiar gratification that we recognize in Dr. Stillé the possession of many of those more distinguished qualifications which entitle him to approbation, and which justify him in coming before his medical brethren as an instructor. A comprehensive knowledge, tested by a sound and penetrating judgment, joined to a love of progress—which a discriminating spirit of inquiry has tempered so as to accept nothing new because it is new, and abandon nothing old because it is old, but which estimates either according to its relations to a just logic and experience—manifests itself everywhere, and gives to the guidance of the author all the assurance of safety which the difficulties of his subject can allow. In conclusion, we earnestly advise our readers to ascertain for themselves, by a study of Dr. Stillé's volumes, the great value and interest of the stores of knowledge they present. We have pleasure in referring rather to the ample treasury of undoubted truths, the real and assured conquest of medicine, accumulated by Dr. Stillé in his pages; and commend the sum of his labors to the attention of our readers, as alike honorable to our science, and creditable to the zeal, the candor, and the judgment of him who has garnered the whole so carefully.—*Edinburgh Med. Journal.*

Our expectations of the value of this work were based on the well-known reputation and character of the author as a man of scholarly attainments, an elegant writer, a candid inquirer after truth, and a philosophical thinker; we knew that the task would be conscientiously performed, and that few, if any, among the distinguished medical teachers in this country are better qualified than he to prepare a systematic treatise on therapeutics in accordance with the present requirements of medical science. Our preliminary examination of the work has satisfied us that we were not mistaken in our anticipations.—*New Orleans Medical News*, March, 1860.

The most recent authority is the one last mentioned, Stillé. His great work on "Materia Medica and Therapeutics," published last year, in two octavo volumes, of some sixteen hundred pages, while it embodies the results of the labor of others up to the time of publication, is enriched with a great amount of original observation and research. We would draw attention, by the way, to the very convenient mode in which the *Index* is arranged in this work. There is first an "Index of Remedies;" next an "Index of Diseases and their Remedies." Such an arrangement of the Indices, in our opinion, greatly enhances the practical value of books of this kind. In tedious, obstinate cases of disease, where we have to try one remedy after another until our stock is pretty nearly exhausted, and we are almost driven to our wit's end, such an index as the second of the two just mentioned, is precisely what we want.—*London Med. Times and Gazette*, April, 1861.

We think this work will do much to obviate the reluctance to a thorough investigation of this branch of scientific study, for in the wide range of medical literature treasured in the English tongue, we shall hardly find a work written in a style more clear and simple, conveying forcibly the facts taught, and yet free from turgidity and redundancy. There is a fascination in its pages that will insure to it a wide popularity and attentive perusal, and a degree of usefulness not often attained through the influence of a single work. The author has much enhanced the practical utility of his book by passing briefly over the physical, botanical, and commercial history of medicines, and directing attention chiefly to their physiological action, and their application for the amelioration or cure of disease. He ignores hypothesis and theory which are so alluring to many medical writers, and so liable to lead them astray, and confines himself to such facts as have been tried in the crucible of experience.—*Chicago Medical Journal.*

SIMPSON (J. Y.), M. D.,

Professor of Midwifery, &c., in the University of Edinburgh, &c.

CLINICAL LECTURES ON THE DISEASES OF WOMEN. With numerous illustrations. In one handsome octavo volume, of over 500 pages, extra cloth, $3 00. (*Now Ready*, 1863.)

This valuable work having passed through the columns of "THE MEDICAL NEWS AND LIBRARY" for 1860, 1861, and 1862, is now completed, and may be had separate in one handsome volume.

These Lectures were delivered by Professor Simpson at the Royal Infirmary of Edinburgh, and were published in the "London Medical Times and Gazette" during the years 1859, 1860, and 1861. The distinguished reputation of the author, and the valuable practical matter contained in the Lectures have seemed to entitle them to a more permanent form than the evanescent pages of a periodical. Embracing a wide range of subjects, and each one elaborately treated and complete in itself, the volume can hardly fail to prove a valuable addition to the library of the practising physician.

The principal topics embraced in the Lectures are Vesico-Vaginal Fistula, Cancer of the Uterus, Treatment of Carcinoma by Caustics, Dysmenorrhœa, Amenorrhœa, Closures, Contractions, &c., of the Vagina, Vulvitis, Causes of Death after Surgical Operations, Surgical Fever, Phlegmasia Dolens, Coccyodinia, Pelvic Cellulitis, Pelvic Hæmatoma, Spurious Pregnancy, Ovarian Dropsy, Ovariotomy, Cranioclasm, Diseases of the Fallopian Tubes, Puerperal Mania, Sub-Involution and Super-Involution of the Uterus, &c. &c.

As a series of monographs on these important topics—many of which receive little attention in the ordinary text-books—elucidated with the extensive experience and readiness of resource for which Professor Simpson is so distinguished, there are few practitioners who will not find in its pages matter of the utmost importance in the treatment of obscure and difficult cases.

SALTER (H. H.), M. D.

ASTHMA; its Pathology, Causes, Consequences, and Treatment. (Now publishing in the "Medical News and Library" for 1863.) To form one volume, 8vo.

SARGENT (F. W.), M. D.

ON BANDAGING AND OTHER OPERATIONS OF MINOR SURGERY.

New edition, with an additional chapter on Military Surgery. One handsome royal 12mo. vol., of nearly 400 pages, with 184 wood cuts. Extra cloth, $1 50. *(Now Ready.)*

The value of this work as a handy and convenient manual for surgeons engaged in active duty, has induced the publishers to render it more complete for those purposes by the addition of a chapter on gun-shot wounds and other matters peculiar to military surgery. In its present form, therefore, with no increase in price, it will be found a very cheap and convenient vade-mecum for consultation and reference in the daily exigencies of military as well as civil practice.

We consider that no better book could be placed in the hands of an hospital dresser, or the young surgeon, whose education in this respect has not been perfected. We most cordially commend this volume as one which the medical student should most closely study, to perfect himself in these minor surgical operations in which neatness and dexterity are so much required, and on which a great portion of his reputation as a future surgeon must evidently rest. And to the surgeon in practice it must prove itself a valuable volume, as instructive on many points which he may have forgotten.—*British American Journal*, May, 1862.

The instruction given upon the subject of *Bandaging*, is alone of great value, and while the author modestly proposes to instruct the students of medicine, and the younger physicians, we will say that experienced physicians will obtain many exceedingly valuable suggestions by its perusal. It will be found one of the most satisfactory manuals for reference in the field, or hospital yet published; thoroughly adapted to the wants of Military surgeons, and at the same time equally useful for ready and convenient reference by surgeons everywhere.—*Buffalo Med. and Surg. Journal*, June, 1862.

SMITH (W. TYLER), M. D.,

Physician Accoucheur to St. Mary's Hospital, &c.

ON PARTURITION, AND THE PRINCIPLES AND PRACTICE OF OBSTETRICS.

In one royal 12mo. volume, extra cloth, of 400 pages. $1 25.

BY THE SAME AUTHOR.

A PRACTICAL TREATISE ON THE PATHOLOGY AND TREATMENT OF LEUCORRHŒA.

With numerous illustrations. In one very handsome octavo volume, extra cloth, of about 250 pages. $1 50.

TANNER (T. H.), M. D.,

Physician to the Hospital for Women, &c.

A MANUAL OF CLINICAL MEDICINE AND PHYSICAL DIAGNOSIS.

To which is added The Code of Ethics of the American Medical Association. Second American Edition. In one neat volume, small 12mo., extra cloth, 87½ cents.

TAYLOR (ALFRED S.), M. D., F. R. S.,

Lecturer on Medical Jurisprudence and Chemistry in Guy's Hospital.

MEDICAL JURISPRUDENCE.

Fifth American, from the seventh improved and enlarged London edition. With Notes and References to American Decisions, by EDWARD HARTSHORNE, M. D. In one large 8vo. volume, extra cloth, of over 700 pages. $3 25.

This standard work having had the advantage of two revisions at the hands of the author since the appearance of the last American edition, will be found thoroughly revised and brought up completely to the present state of the science. As a work of authority, it must therefore maintain its position, both as a text-book for the student, and a compendious treatise to which the practitioner can at all times refer in cases of doubt or difficulty.

No work upon the subject can be put into the hands of students either of law or medicine which will engage them more closely or profitably; and none could be offered to the busy practitioner of either calling, for the purpose of casual or hasty reference, that would be more likely to afford the aid desired. We therefore recommend it as the best and safest manual for daily use.—*American Journal of Medical Sciences.*

It is not excess of praise to say that the volume before us is the very best treatise extant on Medical Jurisprudence. In saying this, we do not wish to be understood as detracting from the merits of the excellent works of Beck, Ryan, Traill, Guy, and others; but in interest and value we think it must be conceded that Taylor is superior to anything that has preceded it.—*N. W. Medical and Surg. Journal*

It is at once comprehensive and eminently practical, and by universal consent stands at the head of American and British legal medicine. It should be in the possession of every physician, as the subject is one of great and increasing importance to the public as well as to the profession.—*St. Louis Med. and Surg. Journal.*

This work of Dr. Taylor's is generally acknowledged to be one of the ablest extant on the subject of medical jurisprudence. It is certainly one of the most attractive books that we have met with; supplying so much both to interest and instruct, that we do not hesitate to affirm that after having once commenced its perusal, few could be prevailed upon to desist before completing it. In the last London edition, all the newly observed and accurately recorded facts have been inserted, including much that is recent of Chemical, Microscopical, and Pathological research, besides papers on numerous subjects never before published.—*Charleston Med. Journal and Review.*

BY THE SAME AUTHOR.

ON POISONS, IN RELATION TO MEDICAL JURISPRUDENCE AND MEDICINE.

Second American, from a second and revised London edition. In one large octavo volume, of 755 pages, extra cloth. $3 50.

Mr. Taylor's position as the leading medical jurist of England, has conferred on him extraordinary advantages in acquiring experience on these subjects, nearly all cases of moment being referred to him for examination, as an expert whose testimony is generally accepted as final. The results of his labors, therefore, as gathered together in this volume, carefully weighed and sifted, and presented in the clear and intelligible style for which he is noted, may be received as an acknowledged authority, and as a guide to be followed with implicit confidence.

BY THE SAME AUTHOR AND WM BRANDE.

CHEMISTRY.

In one volume 8vo. See "BRANDE," p. 6.

TODD (ROBERT BENTLEY), M. D., F. R. S.,
Professor of Physiology in King's College, London; and

WILLIAM BOWMAN, F. R. S.,
Demonstrator of Anatomy in King's College, London.

THE PHYSIOLOGICAL ANATOMY AND PHYSIOLOGY OF MAN. With

about three hundred large and beautiful illustrations on wood. Complete in one large octavo volume, of 950 pages, extra cloth. Price $4 50.

It is more concise than Carpenter's Principles, and more modern than the accessible edition of Müller's Elements; its details are brief, but sufficient; its descriptions vivid; its illustrations exact and copious; and its language terse and perspicuous.—*Charleston Med. Journal.*

A magnificent contribution to British medicine, and the American physician who shall fail to peruse it, will have failed to read one of the most instructive books of the nineteenth century.—*N. O. Med. and Surg. Journal.*

TODD (R. B.) M. D., F. R. S., &c.

CLINICAL LECTURES ON CERTAIN DISEASES OF THE URINARY

ORGANS AND ON DROPSIES. In one octavo volume, 284 pages, extra cloth. $1 50.

BY THE SAME AUTHOR.

CLINICAL LECTURES ON CERTAIN ACUTE DISEASES. In one neat

octavo volume, of 320 pages, extra cloth. $1 75.

TOYNBEE (JOSEPH), F. R. S.,
Aural Surgeon to, and Lecturer on Surgery at, St. Mary's Hospital.

A PRACTICAL TREATISE ON DISEASES OF THE EAR; their Diag-

nosis, Pathology, and Treatment. Illustrated with one hundred engravings on wood. In one very handsome octavo volume, extra cloth, $3 00.

The work is a model of its kind, and every page and paragraph of it are worthy of the most thorough study. Considered all in all—as an original work, well written, philosophically elaborated, and happily illustrated with cases and drawings—it is by far the ablest monograph that has ever appeared on the anatomy and diseases of the ear, and one of the most valuable contributions to the art and science of surgery in the nineteenth century.—*N. Amer. Medico-Chirurg Review*, Sept. 1860.

We are speaking within the limits of modest acknowledgment, and with a sincere and unbiassed judgment, when we affirm that as a treatise on Aural Surgery, it is without a rival in our language or any other.—*Charleston Med. Journ. and Rev.*, Sept. 1860.

The work of Mr. Toynbee is undoubtedly, upon the whole, the most valuable production of the kind in any language. The author has long been known by his numerous monographs upon subjects connected with diseases of the ear, and is now regarded as the highest authority on most points in his department of science. Mr. Toynbee's work, as we have already said, is undoubtedly the most reliable guide for the study of the diseases of the ear in any language, and should be in the library of every physician.—*Chicago Med. Journal*, July, 1860.

WILLIAMS (C. J. B.), M. D., F. R. S.,
Professor of Clinical Medicine in University College, London, &c.

PRINCIPLES OF MEDICINE. An Elementary View of the Causes, Nature,

Treatment, Diagnosis, and Prognosis of Disease; with brief remarks on Hygienics, or the preservation of health. A new American, from the third and revised London edition. In one octavo volume, extra cloth, of about 500 pages. $2 50.

WHAT TO OBSERVE

AT THE BEDSIDE AND AFTER DEATH, IN MEDICAL CASES.

Published under the authority of the London Society for Medical Observation. A new American, from the second and revised London edition. In one very handsome volume, royal 12mo., extra cloth. $1 00.

To the observer who prefers accuracy to blunders and precision to carelessness, this little book is invaluable.—*N. H. Journal of Medicine.*

One of the finest aids to a young practitioner we have ever seen.—*Peninsular Journal of Medicine.*

WALSHE (W. H.), M. D.,
Professor of the Principles and Practice of Medicine in University College, London, &c.

A PRACTICAL TREATISE ON DISEASES OF THE LUNGS; including

the Principles of Physical Diagnosis. Third American, from the third revised and much enlarged London edition. In one vol. octavo, of 468 pages, extra cloth. $2 25.

The present edition has been carefully revised and much enlarged, and may be said in the main to be rewritten. Descriptions of several diseases, previously omitted, are now introduced; an effort has been made to bring the description of anatomical characters to the level of the wants of the practical physician; and the diagnosis and prognosis of each complaint are more completely considered. The sections on TREATMENT and the Appendix have, especially, been largely extended.—*Author's Preface.*

BY THE SAME AUTHOR.

A PRACTICAL TREATISE ON THE DISEASES OF THE HEART AND

GREAT VESSELS, including the Principles of Physical Diagnosis. Third American, from the third revised and much enlarged London edition. In one handsome octavo volume of 420 pages, extra cloth. $2 25.

The present edition has been carefully revised; much new matter has been added, and the entire work in a measure remodelled. Numerous facts and discussions, more or less completely novel, will be found in the description of the principles of physical diagnosis; but the chief additions have been made in the practical portions of the book. Several affections, of which little or no account had been given in the previous editions, are now treated of in detail.—*Author's Preface.*

New and much enlarged edition.

WATSON (THOMAS), M. D., &c.,

Late Physician to the Middlesex Hospital, &c.

LECTURES ON THE PRINCIPLES AND PRACTICE OF PHYSIC.

Delivered at King's College, London. A new American, from the last revised and enlarged English edition, with Additions, by D. Francis Condie, M. D., author of "A Practical Treatise on the Diseases of Children," &c. With one hundred and eighty-five illustrations on wood. In one very large and handsome volume, imperial octavo, of over 1200 closely printed pages in small type; the whole strongly bound in leather, with raised bands. Price $5 00.

That the high reputation of this work might be fully maintained, the author has subjected it to a thorough revision; every portion has been examined with the aid of the most recent researches in pathology, and the results of modern investigations in both theoretical and practical subjects have been carefully weighed and embodied throughout its pages. The watchful scrutiny of the editor has likewise introduced whatever possesses immediate importance to the American physician in relation to diseases incident to our climate which are little known in England, as well as those points in which experience here has led to different modes of practice; and he has also added largely to the series of illustrations, believing that in this manner valuable assistance may be conveyed to the student in elucidating the text. The work will, therefore, be found thoroughly on a level with the most advanced state of medical science on both sides of the Atlantic.

The additions which the work has received are shown by the fact that notwithstanding an enlargement in the size of the page, more than two hundred additional pages have been necessary to accommodate the two large volumes of the London edition (which sells at ten dollars), within the compass of a single volume, and in its present form it contains the matter of at least three ordinary octavos. Believing it to be a work which should lie on the table of every physician, and be in the hands of every student, the publishers have put it at a price within the reach of all, making it one of the cheapest books as yet presented to the American profession, while at the same time the beauty of its mechanical execution renders it an exceedingly attractive volume.

The fourth edition now appears, so carefully revised, as to add considerably to the value of a book already acknowledged, wherever the English language is read, to be beyond all comparison the best systematic work on the Principles and Practice of Physic in the whole range of medical literature. Every lecture contains proof of the extreme anxiety of the author to keep pace with the advancing knowledge of the day One scarcely knows whether to admire most the pure, simple, forcible English—the vast amount of useful practical information condensed into the Lectures—or the manly, kind-hearted, unassuming character of the lecturer shining through his work.—*Lond. Med. Times.*

Thus these admirable volumes come before the profession in their fourth edition, abounding in those distinguished attributes of moderation, judgment, erudite cultivation, clearness, and eloquence, with which they were from the first invested, but yet richer than before in the results of more prolonged observation, and in the able appreciation of the latest advances in pathology and medicine by one of the most profound medical thinkers of the day.—*London Lancet.*

The lecturer's skill, his wisdom, his learning, are equalled by the ease of his graceful diction, his eloquence, and the far higher qualities of candor, of courtesy, of modesty, and of generous appreciation of merit in others.—*N. A. Med-Chir Review.*

Watson's unrivalled, perhaps unapproachable work on Practice—the copious additions made to which (the fourth edition) have given it all the novelty and much of the interest of a new book.—*Charleston Med. Journal.*

Lecturers, practitioners, and students of medicine will equally hail the reappearance of the work of Dr. Watson in the form of a new—a fourth—edition. We merely do justice to our own feelings, and, we are sure, of the whole profession, if we thank him for having, in the trouble and turmoil of a large practice, made leisure to supply the hiatus caused by the exhaustion of the third edition. For Dr. Watson has not merely caused the lectures to be reprinted, but scattered through the whole work we find additions or alterations which prove that the author has in every way sought to bring up his teaching to the level of the most recent acquisitions in science.—*Brit. and For Medico-Chir. Review.*

New and much enlarged edition.

WILSON (ERASMUS), F. R. S.

A SYSTEM OF HUMAN ANATOMY, General and Special.

A new and revised American, from the last and enlarged English Edition. Edited by W. H. Gobrecht, M. D., Professor of Anatomy in the Pennsylvania Medical College, &c. Illustrated with three hundred and ninety-seven engravings on wood. In one large and exquisitely printed octavo volume, of over 600 large pages; leather. $3 75.

The publishers trust that the well earned reputation so long enjoyed by this work will be more than maintained by the present edition. Besides a very thorough revision by the author, it has been most carefully examined by the editor, and the efforts of both have been directed to introducing everything which increased experience in its use has suggested as desirable to render it a complete text-book for those seeking to obtain or to renew an acquaintance with Human Anatomy. The amount of additions which it has thus received may be estimated from the fact that the present edition contains over one-fourth more matter than the last, rendering a smaller type and an enlarged page requisite to keep the volume within a convenient size. The editor has exercised the utmost caution to obtain entire accuracy in the text, and has largely increased the number of illustrations, of which there are about one hundred and fifty more in this edition than in the last, thus bringing distinctly before the eye of the student everything of interest or importance.

It may be recommended to the student as no less distinguished by its accuracy and clearness of description than by its typographical elegance. The wood-cuts are exquisite.—*Brit. and For. Medical Review.*

An elegant edition of one of the most useful and accurate systems of anatomical science which has been issued from the press The illustrations are really beautiful. In its style the work is extremely concise and intelligible. No one can possibly take up this volume without being struck with the great beauty of its mechanical execution, and the clearness of the descriptions which it contains is equally evident. Let students, by all means examine the claims of this work on their notice, before they purchase a text-book of the vitally important science which this volume so fully and easily unfolds.—*Lancet.*

We regard it as the best system now extant for students.—*Western Lancet.*

It therefore receives our highest commendation.—*Southern Med. and Surg. Journal.*

WILSON (ERASMUS), F. R. S.

ON DISEASES OF THE SKIN. Fifth American, from the Fifth enlarged London edition. In one handsome octavo volume, of nearly 700 large pages, with illustrations on wood, extra cloth. $3 25. (*Now Ready*, May, 1863.)

This classical work, which for twenty years has occupied the position of the leading authority in the English language on its important subject, has just received a thorough revision at the hands of the author, and is now presented as embodying the results of the latest investigations and experience on all matters connected with diseases of the skin. The increase in the size of the work shows the industry of the author, and his determination that it shall maintain the position which it has acquired as thoroughly on a level with the most advanced condition of medical science.

A few notices of the last edition are appended.

The writings of Wilson, upon diseases of the skin, are by far the most scientific and practical that have ever been presented to the medical world on this subject. The present edition is a great improvement on all its predecessors. To dwell upon all the great merits and high claims of the work before us, *seriatim*, would indeed be an agreeable service; it would be a mental homage which we could freely offer, but we should thus occupy an undue amount of space in this *Journal*. We will, however, look at some of the more salient points with which it abounds, and which make it incomparably superior to all other treatises on the subject of dermatology. No mere speculative views are allowed a place in this volume, which, without a doubt, will, for a very long period, be acknowledged as the chief standard work on dermatology. The principles of an enlightened and rational therapeia are introduced on every appropriate occasion.—*Am. Jour. Med. Science.*

When the first edition of this work appeared, about fourteen years ago, Mr Erasmus Wilson had already given some years to the study of Diseases of the Skin, and then expressed his intention of devoting his future life to the elucidation of this branch of Medical Science. In the present edition Mr. Wilson presents us with the results of his matured experience, and we have now before us not merely a reprint of his former publications, but an entirely new and rewritten volume. Thus, the whole history of the diseases affecting the skin, whether they originate in that structure or are the mere manifestations of derangement of internal organs, is brought under notice, and the book includes a mass of information which is spread over a great part of the domain of Medical and Surgical Pathology. We can safely recommend it to the profession as the best work on the subject now in existence in the English language.—*London Med. Times and Gazette.*

No matter what other treatises may be in the library of the medical attendant, he needs the clear and suggestive counsels of Wilson, who is thoroughly posted up on all subjects connected with cutaneous pathology. We have, it is very true, other valuable works on the maladies that invade the skin; but, compared with the volume under consideration, they are certainly to be regarded as inferior lights in guiding the judgment of the medical man.—*Boston Med. and Surg. Journal*, Oct. 1857.

The author adopts a simple and entertaining style. He strives to clear away the complications of his subject, and has thus produced a book filled with a vast amount of information, in a form so agreeable as to make it pleasant reading, even to the uninitiated. More especially does it deserve our praise because of its beautiful and complete atlas, which the American publishers have successfully imitated from the original plates. We pronounce them by far the best imitations of nature yet published in our country. With the text-book and atlas at hand, the diagnosis is rendered easy and accurate, and the practitioner feels himself safe in his treatment. We will add that this work, although it must have been very expensive to the publishers, is not high priced. There is no reason, then, to prevent every physician from obtaining a work of such importance, and one which will save him both labor and perplexity.—*Va. Med. Journal.*

As a practical guide to the classification, diagnosis, and treatment of the diseases of the skin, the book is complete. We know nothing, considered in this aspect, better in our language; it is a safe authority on all the ordinary matters which, in this range of diseases, engage the practitioner's attention, and possesses the high quality—unknown, we believe, to every older manual, of being on a level with science's high-water mark; a sound book of practice.—*London Med. Times.*

ALSO, NOW READY,

A SERIES OF PLATES ILLUSTRATING WILSON ON DISEASES OF THE SKIN; consisting of twenty beautifully executed plates, of which thirteen are exquisitely colored, presenting the Normal Anatomy and Pathology of the Skin, and containing accurate representations of about one hundred varieties of disease, most of them the size of nature. Price in cloth. $4 50.

In beauty of drawing and accuracy and finish of coloring these plates will be found equal to anything of the kind as yet issued in this country. The value of the new edition is enhanced by an additional colored plate.

The plates by which this edition is accompanied leave nothing to be desired, so far as excellence of delineation and perfect accuracy of illustration are concerned.—*Medico-Chirurgical Review.*

Of these plates it is impossible to speak too highly. The representations of the various forms of cutaneous disease are singularly accurate, and the coloring exceeds almost anything we have met with.—*British and Foreign Medical Review.*

We have already expressed our high appreciation of Mr. Wilson's treatise on Diseases of the Skin. The plates are comprised in a separate volume, which we counsel all those who possess the text to purchase. It is a beautiful specimen of color printing, and the representations of the various forms of skin disease are as faithful as is possible in plates of the size.—*Boston Med. and Surg. Journal*, April 8, 1858.

Also, the TEXT and PLATES done up in one handsome volume, extra cloth, price $7 50.

BY THE SAME AUTHOR.

THE DISSECTOR'S MANUAL; or, Practical and Surgical Anatomy. Third American, from the last revised and enlarged English edition. Modified and rearranged, by WILLIAM HUNT, M. D., Demonstrator of Anatomy in the University of Pennsylvania. In one large and handsome royal 12mo. volume, extra cloth, of 582 pages, with 154 illustrations. $2 00.

BY THE SAME AUTHOR.

ON CONSTITUTIONAL AND HEREDITARY SYPHILIS, AND ON SYPHILITIC ERUPTIONS. In one small octavo volume, extra cloth, beautifully printed, with four exquisite colored plates, presenting more than thirty varieties of syphilitic eruptions. $2 25.

BY THE SAME AUTHOR.

HEALTHY SKIN; A Popular Treatise on the Skin and Hair, their Preservation and Management. Second American, from the fourth London edition. One neat volume, royal 12mo., extra cloth, of about 300 pages, with numerous illustrations. $1 00; paper cover, 75 cents.

WINSLOW (FORBES), M. D., D. C. L., &c.

ON OBSCURE DISEASES OF THE BRAIN AND DISORDERS OF THE MIND; their incipient Symptoms, Pathology, Diagnosis, Treatment, and Prophylaxis. In one handsome octavo volume, of nearly 600 pages, extra cloth. $3 00.

We close this brief and necessarily very imperfect notice of Dr. Winslow's great and classical work, by expressing our conviction that it is long since so important and beautifully written a volume has issued from the British medical press.—*Dublin Med. Press*, July 25, 1860.

We honestly believe this to be the best book of the season.—*Ranking's Abstract*, July, 1860.

The latter portion of Dr. Winslow's work is exclusively devoted to the consideration of Cerebral Pathology. It completely exhausts the subject, in the same manner as the previous seventeen chapters relating to morbid psychical phenomena left nothing unnoticed in reference to the mental symptoms premonitory of cerebral disease. It is impossible to overrate the benefits likely to result from a general perusal of Dr. Winslow's valuable and deeply interesting work.—*London Lancet*, June 23, 1860.

It contains an immense mass of information.—*Brit. and For. Med.-Chir. Review*, Oct. 1860.

WEST (CHARLES), M. D.,

Accoucheur to and Lecturer on Midwifery at St. Bartholomew's Hospital, Physician to the Hospital for Sick Children, &c.

LECTURES ON THE DISEASES OF WOMEN. Second American, from the second London edition. In one handsome octavo volume, extra cloth, of about 500 pages; price $2 50.

*** Gentlemen who received the first portion, as issued in the "Medical News and Library," can now complete their copies by procuring Part II, being page 309 to end, with Index, Title matter, &c., 8vo., cloth, price $1.

We must now conclude this hastily written sketch with the confident assurance to our readers that the work will well repay perusal. The conscientious, painstaking, practical physician is apparent on every page.—*N. Y. Journal of Medicine.*

We know of no treatise of the kind so complete and yet so compact.—*Chicago Med. Jour.*

A fairer, more honest, more earnest, and more reliable investigator of the many diseases of women and children is not to be found in any country.—*Southern Med. and Surg. Journal.*

We have to say of it, briefly and decidedly, that it is the best work on the subject in any language; and that it stamps Dr. West as the *facile princeps* of British obstetric authors.—*Edinb. Med. Journ.*

We gladly recommend his Lectures as in the highest degree instructive to all who are interested in obstetric practice.—*London Lancet.*

Happy in his simplicity of manner, and moderate in his expression of opinion, the author is a sound reasoner and a good practitioner, and his book is worthy of the handsome garb in which it has appeared.—*Virginia Med. Journal.*

We must take leave of Dr. West's very useful work, with our commendation of the clearness of its style, and the industry and sobriety of judgment of which it gives evidence.—*London Med Times.*

Sound judgment and good sense pervade every chapter of the book. From its perusal we have derived unmixed satisfaction.—*Dublin Quart. Journ.*

BY THE SAME AUTHOR.

LECTURES ON THE DISEASES OF INFANCY AND CHILDHOOD. Third American, from the fourth enlarged and improved London edition. In one handsome octavo volume, extra cloth, of about six hundred and fifty pages. $3 75.

The three former editions of the work now before us have placed the author in the foremost rank of those physicians who have devoted special attention to the diseases of early life. We attempt no analysis of this edition, but may refer the reader to some of the chapters to which the largest additions have been made—those on Diphtheria, Disorders of the Mind, and Idiocy, for instance—as a proof that the work is really a new edition; not a mere reprint. In its present shape it will be found of the greatest possible service in the every-day practice of nine-tenths of the profession.—*Med. Times and Gazette*, London, Dec. 10, 1859.

All things considered, this book of Dr. West is by far the best treatise in our language upon such modifications of morbid action and disease as are witnessed when we have to deal with infancy and childhood. It is true that it confines itself to such disorders as come within the province of the *physician*, and even with respect to these it is unequal as regards minuteness of consideration, and some diseases it omits to notice altogether. But those who know anything of the present condition of pædiatrics will readily admit that it would be next to impossible to effect more, or effect it better, than the accoucheur of St. Bartholomew's has done in a single volume. The lecture (XVI.) upon Disorders of the Mind in children is an admirable specimen of the value of the later information conveyed in the Lectures of Dr. Charles West.—*London Lancet*, Oct. 22, 1859.

Since the appearance of the first edition, about eleven years ago, the experience of the author has doubled; so that, whereas the lectures at first were founded on six hundred observations, and one hundred and eighty dissections made among nearly fourteen thousand children, they now embody the results of nine hundred observations, and two hundred and eighty-eight post-mortem examinations made among nearly thirty thousand children, who, during the past twenty years, have been under his care.—*British Med. Journal*, Oct. 1, 1859.
